(iv.) *The Latin version of the commentaries on Galatians–Philemon*.—More important for our knowledge of Theodore than even the discoveries of Mai and Cramer was the identification of a Latin version of the commentary on the ten shorter epistles. The Benedictine editors of St. Ambrose noticed that, of two sister MSS of an exposition of St. Paul belonging to the great library of the abbey of Corbie, near Amiens, the first contained on Romans and on 1 and 2 Corinthians the well-known commentary of Ambrosiaster, the second contained on the remaining epistles (Hebrews not being included) a commentary wholly unknown to them save that Rabanus Maurus had obviously made large use of it (*Ambrosii Opera*, ii., Paris, 1690, App. p. 21).† The next scholar to concern himself with the Corbie commentary (which meanwhile, since the time of the Revolution, had become Nos. 87 and 88 in the public library at Amiens) was another Benedictine, dom, afterwards cardinal, J. B. Pitra. Pitra saw that the unknown commentary was a genuine and unadulterated survival from the Patristic period, far older than the 9th cent.—the date both of Rabanus and of the Corbie MS; and believing that he had found the true author in the person of St. Hilary of Poitiers, he published in 1852, under that Father's name, the full commentary on Galatians, Ephesians, and Philemon, with brief notes on the rest (*Spicilegium Solesmense*, Paris, i. pp. xxvi–xxxv, 49–159). But a comparison of Pitra's text with Cramer's lately published Catena on the same epistles revealed the fact that in the Greek fragments which bore the name of Theodore was to be found the equivalent, so far as they went, of the

* E. Sachau's *Theodori Mopsuesteni fragmenta Syriaca e codicibus Musei Britannici Niriacis* (Leipzig, 1869) appears to contain nothing from any of the commentaries on the Epistles.

† Besides Rabanus (who, however, for Gal. and Eph. used the real Ambrosiaster, and only began his use of the unknown authority with Philippians), we can now add Amalarus, *de Ecclesiasticis Officiis* (Philippians and 1 Timothy), and archbishop Lanfranc's commentary on St. Paul (Galatians to Philemon), as well as an isolated reference on Galatians in the *Collectanea* of Sedulius Scotus; see Swete's *Theodore*, pp. xlvi–li, and vol. ii. p. 346.

* The letter was really written by Pelagius' deacon, Gregory, afterwards pope Gregory the Great.

Latin of the Corbie MS; and the only possible conclusion was that in the latter we possessed a complete version of Theodore's commentary on these epistles. The comparison was made, and the conclusion drawn, by J. L. Jacobi in 1854 (*Deutsche Zeitschrift für christliche Wissenschaft und christliches Leben*), and, independently, by Dr. Hort in 1859 (*Journal of Classical and Sacred Philology*, iv. 302-308). Dr. Hort afterwards discovered a second and slightly earlier MS in Brit. Mus. Harley 3063, from Cusa on the Moselle; and an edition of the Latin version, with a re-collation of Cramer's Greek fragments for the ten epistles covered by it, was published in 1880 by Dr. H. B. Swete (*Theodore of Mopsuestia on the minor Epistles of St. Paul: Theodori Mopsuesteni in epistolas B. Pauli commentarii*, 2 vols., Cambridge)—a book of the rare kind for which praise is superfluous.

The Latin supplies us on the one hand with some sort of representation of Theodore's meaning over long pages where the Greek entirely fails us, and on the other with a test for the verification of what really in the Catena belongs to Theodore. It is satisfactory to find that the net result has been to add to the number of fragments admitted as genuine by Fritzsche; for whereas only seven of his passages have to be struck out, there are nearly 40 others in the Catena of which Theodore had wrongly been deprived (Swete, p. xvii, n. 3 and 4). That the catenist can now be shown to have often abridged and occasionally paraphrased his author (Swete, p. xxxv), is no more than the parallel experience of other writers in the Catena might have led us to expect.

The translator may be credited on the whole with faithfulness and conscientiousness; but neither his knowledge of Greek (at any rate of Theodore's Greek) nor his command of his own tongue was sufficient to produce what could be called, from a literary point of view, a successful version. As to his date, it is natural to bring the attempt to introduce Theodore to Western readers into connexion with the circle of Faundus and Junilius, and to place him conjecturally at or soon after the middle of the 6th cent.; and the conjecture is in harmony with the evidence of his Biblical text, which (when it is not simply a literal rendering of Theodore's) displays sometimes reminiscences of the Vulgate, but more often reminiscences of the Old Latin (see, for fuller details on all these points, Swete, pp. xxxv-lviii). It is a less easy question to answer, whether his translation included also the longer epistles. The evidence of Rabanus Maurus suggests that there were MSS which gave Ambrosiaster for Rom.-Ephesians, Theodore for the rest; the existing MSS with Lanfranc (and, presumably, Sedulius) make the change from Ambrosiaster to Theodore between 2 Cor. and Gal.; possibly, therefore, it may be argued, other MSS may have existed which supplanted Ambrosiaster by Theodore at a still earlier point or even from the beginning. Yet we have seen (p. 509^b) that Theodore's Greek commentaries on the epistles did not circulate in a single volume; and in the absence of definite indications to the contrary it is safest to suppose that the translator had access to only a portion of them, and that the whole of his work has now been recovered. As an imperfect commentary, there was an obvious reason for completing it by borrowing the missing epistles from some other commentary, such as Ambrosiaster's; and the accident that the missing epistles happened to be the first in the series explains also how it was that the name already attached to them came to be attached to the rest of the series as well, so that Carolingian scribes and scholars

read Theodore of Mopsuestia under the pseudonym of Ambrose of Milan.

(v.) *Order and date of Theodore's commentaries on the Epistles.*—Of the order in which Theodore commented on the different epistles of St. Paul he gives several indications by cross-references from one commentary to another (Swete, p. lxiii).—(a) *Galatians after Romans*: on Gal 3²⁵ (Swete, i. p. 51, l. 6) he refers to Ro 11³²: 'si nostram decurrere voluerit interpretationem in qua latius id explicasse videmur.'—(β) *Galatians after Hebrews*: on Gal 4²⁴ (i. 76, l. 10) he says, 'in epistola illa quæ ad Hebræos est interpretantes ostendimus evidentius.'*—(γ) *Galatians after several (?) other epistles*: on Gal 2⁴ (i. 16, l. 20) he alludes to previous notes on many passages, 'multis enim in locis coniunctiones a beato Paulo non cum debita sequentia positas esse ostendimus.'—(δ) *Ephesians after Galatians*: on Eph 1⁴ (i. 123, l. 4) he refers to his comment on Gal 3²³: 'dixi ['dixit' MSS, wrongly] namque et in epistola Galatarum.'—(ε) *Colossians after Philippians*: on Col 1¹⁷ (i. 272, l. 12) he refers to Ph 2⁵⁻⁸: 'hoc enim ostendimus ['ostendimus' MSS, but the confusion of i and e is very common] fecisse apostolum et Philippiensis scribentem.'—(ζ) *1 Timothy after Philippians*: on 1 Ti 3⁸ (ii. 118, l. 13) he refers to Ph 1⁴: καὶ τοῦτο ἐπεσημειώθη καὶ ἐν τῇ πρὸς Φιλιππησίους.—(η) *1 Timothy after most of the other Epistles*: on 1 Ti 1³⁻⁴ (ii. 71, l. 12) he mentions 'interpretationem nostram quam propemodum per omnes epistolas explicasse videmur.'—(θ) *Titus after 1 Timothy*: on Tit 1⁶ (ii. 237, l. 20) he refers to 1 Ti 3³: 'dictum est nobis hoc idem latius in illa epistola quam ad Timotheum inprimis dudum scripseramus.'

Thus, with the exception that Hebrews came somewhere near the beginning of the list, Theodore appears, so far as we can judge, to have written on the Epistles in the order of our New Testament Canon. But both the separate dedications of the different groups recorded by Ebed-jesu (p. 509, above), and the interval between the commentary on Titus and that on 1 Timothy 'quam dudum scripseramus,'† suggest that the whole exposition may have been spread over some considerable number of years. The work on at least the later Epistles was posterior to the work on the Gospels: on Col 1¹⁷ (i. 273, l. 5) he refers to the explanation of Jn 5, 'si interpretationem nostram decurrere voluerit in illam partem evangelii Iohannis'; on 1 Ti 1⁴ (ii. 74, ll. 2-6) to the explanation of the genealogies, 'interpretationem nostram . . . quam de evangelii expressisse visum sumus'; and on 1 Ti 3⁴⁻⁶ (ii. 137, l. 14) to his exegesis of the Epistles and Gospels as a whole, 'sicut non solum in apostolica interpretatione id ostendimus, sed et in evangeliorum interpretatione identidem id demonstravimus.'

Seeing that Theodore's prolonged span of exegetical activity extended over the whole of the last quarter of the 4th cent. and of the first quarter of the 5th, the conclusion so far reached with regard to the date or dates of his commentaries on the Epistles is not very precise. One line of argument, however, still remains to be examined which may bear upon the chronology, namely, the relation of his commentaries to those of other more or less contemporary exegetes.‡

* Note that the Epistle to the Hebrews comes next before Galatians in the Sahidic version (Scrivener, *Introduct. to the Criticism of the NT* i. 57, ll. 138); next after Galatians in the system of chapters running through the Pauline epistles in the margin of B (*op. cit.* i. 56, 57).

† Yet 'dudum' may only represent *ἔκδη*, as perhaps in Swete, i. 112, l. 2.

‡ Dr. Swete (p. lxi) emphasizes in this connexion the use apparently made by Theodore of the Euthalian 'chapters' as indicating a date after A.D. 396. Some attempt will be made later on in this article (see p. 524) to deal in outline with the intricate questions that centre round the name of Euthalius.

Ancient commentators were accustomed to study and copy earlier models, and were studied and copied by later imitators in their turn. Theodore, though he was of too independent a mind to copy his predecessors as much as others did, probably studied them quite as much, to judge from the frequency with which he records the views of 'certain people' and expresses disagreement with them. To Origen's system of exegesis he, of course, stood in fundamental opposition. The material is hardly sufficient to enable us to estimate the extent of his undoubted debt to Diodore; and even if it should be proved that he used also Chrysostom and Severian—both of them more nearly his contemporaries than was Diodore—yet even their expositions might have been in his hands before the year 400 A.D. Of his successors, Theodoret can be shown to have exploited him freely (below, p. 517^a); but Theodoret probably wrote after Theodore's death, and furnishes us therefore with no new *terminus ad quem*. But between Diodore and Chrysostom on the one hand, and Theodoret on the other, there is yet one other commentator whose evidence is crucial for the chronology of Theodore. The date of Pelagius' Latin exposition of St. Paul falls within the years 401-409, and since his points of contact with Theodore appear to be unambiguous (Swete, pp. lxxiv-lxxvi), we get a new *terminus ad quem* or *a quo* for the latter, according as we make his share in the common matter original or derivative. The question can be fully answered only when the true text of Pelagius has been restored from a comparison of the various recensions in which he has come down to us.* Dr. Swete inclines to the view that Theodore borrowed from Pelagius; but it would be unusual to find a Greek writer using a Latin authority, and in two at least of the parallels (Gal 3²⁰, 2 Ti 2²⁰), while Theodore states his own view and no other, Pelagius prefixes to the view that coincides with Theodore the formula 'ut quidam putant.'† If then Pelagius drew on Theodore, and that for the later as well as the earlier Epistles, it would follow that Theodore's exposition of St. Paul was completed very early in the 5th century; nor does there seem to be anything which seriously conflicts with such a conclusion.

4. **THEODORE AS A COMMENTATOR ON ST. PAUL.**‡—Theodore is the typical Antiochene exegete, not in the sense that he serves as a standard for judging other commentators of the school, or as a mean from which in one direction or another they diverge, but in the sense that the literal and historical method of interpretation, which (with whatever qualifications) is distinctive of them all, is in him carried out to its most rigorous extreme. The present age is impatient of any form of allegorizing, and so is inclined to sympathize with Theodore; and yet it might be well to recollect that it was Origen's allegorical interpretation of the early chapters of Genesis which, as much as anything else, aroused the opposition of the Antiochenes, and that Theodore's literalist principles committed him to the

acceptance of the story of Jonah as a record of actual historical fact. No doubt, Messianic applications of the Old Testament had often led to exegesis that was arbitrary in the extreme, and Theodore voices the reaction of common-sense; no doubt also it can be urged, with show of truth, that at least in the New Testament there is no place for allegory, and that Theodore's position is here inexpugnable. And he would be a singularly unfair critic who failed to recognize and appreciate the services of Theodore's severely logical mind in expounding the often difficult connexion and concatenation of the Apostle's thought; in this direction probably no ancient expositor either attempted or achieved as much; and for that alone, if all other merits were refused them, these commentaries of his would possess a real and permanent value. But it is also just this relentless sense of logic which from another side sets a fatal limitation on Theodore's powers of exegesis; for he approaches the study of the Epistles, unconsciously no doubt to himself, with the expectation of finding in them, not merely a theological system as complete as his own, but the particular system at which he had himself arrived. St. Paul's thoughts do not always consent to be labelled and put in their proper place as parts of an organized and coherent body of doctrine; and so far as they do admit of it, it is not quite on Theodore's lines. The contrast between *ἡ παρούσα* and *ἡ μέλλουσα κατάστασις*, which dominates Theodore's whole scheme of the universe, is a fruitful one, but it does not exhaust, and in part it does not even correspond to, the theology of St. Paul. To Theodore the 'present condition' and 'future condition' are indeed those of sin and sinlessness, but they are also those of death and immortality, of change and changelessness; and it is on this aspect of the contrast that Theodore's optimistic thought habitually dwells. Redemption tends to be predominantly the restoration of the gift of immortality, moral lapse a weakness of our mortal condition, Christ our human example in the successful struggle with it. It would be rash to say that there is no room for Theodore's conceptions in the wide cycle of Christian theology; but they are not the characteristic conceptions of St. Paul, and so far Theodore could not be his ideal 'Interpreter.'

16. **Isidore of Pelusium** (letters on detailed points of exegesis).—

With Isidore a new chapter opens: we are on the threshold of the era when Greek exegesis ceases to be strictly original, and begins to reproduce what seemed most worthy of preservation in the great writers of the past; and however great the loss in vigour and freshness which this change entailed, it carried with it at least the compensating advantage of expanded sympathies. Allegorical and literalist systems could each claim the sanction of illustrious names; neither could be wholly rejected by those who wished to walk in the footsteps of the 'Fathers.' St. Isidore is the earliest expositor in whose case geographical position is not the decisive factor in determining exegetical affinities. His nationality and all the external circumstances of his life connected him exclusively with Alexandria, while his literary studies and his ecclesiastical hero-worship tended rather to make him a follower of the great homilist of Antioch. The interest which attaches to him in these respects is sufficient excuse for finding a place in this article for a writer whose exegetical remains consist only of answers to correspondents about difficulties in the explanation of detached passages of the Sacred Text.

Isidore, as his name suggests, was an Egyptian; and his whole career, so far as we know, was spent

* With the appearance of H. Zimmer's book *Pelagius in Irland* (Berlin, 1901), all previous discussions of the subject of Pelagius' commentary, and of the related commentaries of pseudo-Jerome and pseudo-Primasius (cf. Swete, p. xlv), were at once superseded; see a review of Zimmer by the present writer in *Journal of Theological Studies* (October 1902), iv, 132-141.

† Of course a common source for Theodore and Pelagius—in that case probably Diodore—is conceivable; but Theodore's work is the more likely to have reached the West.

‡ See Swete, pp. lxx-lxxi, lxxix-lxxxvii, and Kihn, *Theodor von Aloysius und Junibis Africanus als Exegeten* (Freiburg im Breisgau, 1880). The first 200 pages of Dr. Kihn's admirable monograph are devoted to Theodore and his Biblical exegesis; unfortunately, he wrote before the publication of Dr. Swete's edition, and pays little or no attention to the commentaries on St. Paul.

in Egypt. Of Alexandrine family (according to Ephraem of Antioch, in Photius cod. 228), and, to judge from his extensive learning, of Alexandrine training, he early embraced the monastic life and commenced the prolonged residence at Pelusium, the frontier-city between Egypt and Palestine, which has given him the title that distinguishes him from his namesake of Seville. From Pelusium he carried on, during a period of which different critics extend the limits as far back as 395 and as far on as 450, the vast correspondence on which his fame mainly rests. It is enough for the present purpose to say that Isidore, when writing to Cyril of Alexandria during and after the Council of Ephesus in 431, employs towards the archbishop a familiarity and even authority of tone which imply either advanced age or long-established reputation.

The dogmatic interest was a much stronger one than the exegetical in the generations which succeeded Isidore; and it appears probable that his letters owe their survival as a collection to the use made of them in the Monophysite controversy. Whether or no he survived till the outbreak under Dioscorus of the secular struggle, Isidore was sufficiently Antiochene, in theology as well as exegesis, to have spoken with no uncertain sound about the truth of Christ's manhood: Θεοῦ πάθος οὐ λέγεται, Χριστοῦ γὰρ τὸ πάθος γέγονε, σαρκωθέντος δηλονότι Θεοῦ καὶ τῇ προλήψει τῆς σαρκὸς τὸ πάθος ὑπομειναντος (*Ep.* i. 124); ἐκ φύσεως διούτι ὁ εἰς ὑπάρχων υἱὸς (*Ep.* i. 323, to Cyril); ἐν ἐκατέραις ταῖς φύσεσιν εἰς ὑπάρχει υἱὸς Θεοῦ (*Ep.* i. 405). Consequently we find the writers on the Chalcedonian side, Ephraem of Antioch, Leontius of Byzantium, Facundus of Hermiana, appealing to his authority; while the great Monophysite writer Severus attempts (according to Stephen Gobar, in Photius cod. 232) to turn the edge of the appeal by accusing Isidore of Origenism. The principal stronghold at Constantinople of the Chalcedonians was the monastery of the *Acemetae* or 'Sleepless ones'; and it was the *Acemetae* who, somewhere in the century 450-550 A.D., collected and published an edition of 2000 of Isidore's letters. Facundus apparently quotes from this collection; and nearly fifty letters were excerpted from it and translated into Latin (together with a very numerous series of documents bearing on the Nestorian controversy) by a scholar of the time of Justinian, whose work is preserved to us in two MSS of the 12th cent., Casinensis 2 and Vaticanus 1319.

From the same collection of 2000 letters, and from no other source, all our Greek MSS are derived. The oldest of them (Grotta Ferrata B a I), written in 985, and never yet employed for the printed texts, contains 1600 letters, numbered from 1 to 600, and from 1001 to 2000; another at Paris (gr. 832, of the 13th cent.) contains the first 1213 letters; while two 16th cent. MSS at the Vatican (Vat. gr. 649-650 and Vat. Ottob. gr. 341-383) contain the whole 2000, numbered through continuously from the first to the last. One or two more give some portion of the collection in its proper order; but a much larger number give groups of letters selected out of the rest because of their connexion with some particular topic. Thus Bodl. Laud. gr. 42, sec. xii., contains thirty-eight letters on the Psalter, arranged in the order of the Psalms with which they deal, though to each letter is still prefixed its proper number in the continuous series. Within this class one MS distinguishes itself from the rest, both for the large bulk of letters which it contains and for the influence which it has exercised upon the printed texts,—Venice Marcianus 126, sec. xiv.: of its 1148 letters, the first division,

484 in number, are concerned exclusively with the exegesis of different parts of Scripture.*

Unfortunately, the history of the printed texts became entangled at an early point with this other or indirect line of the manuscript tradition. The *editio princeps*, prepared by the abbé Jacques Billi, and published posthumously at Paris in 1585, was taken, indeed, from the Paris MS above mentioned, and consisted therefore of the first 1213 letters of the original collection. These were divided by the editor, it is not clear on what grounds, into three books, the first comprising 500, the second 300, and the third the remaining 413; but, apart from this division into books, the letters then printed were printed in the exact order in which the *Acemetae* had arranged them. To the next editor, Rittershusius, or rather to the MS on which he relied, is due the confusion which still prevails in the printed texts of Isidore. He used a Munich copy of the Venice MS, and found in it as many as 230 letters which had not appeared in Billi's edition; his own edition, published at Heidelberg in 1605, repeated Billi's three books, and added to them a fourth, consisting of the 230 new letters, thus raising the total number to 1443. As we have seen that the interest of the scholar (whoever he was) who put together the collection of the Venice MS was in the first place exegetical, it is not surprising that the fourth book should contain a specially large proportion of strictly exegetical letters, or that the editor who finally completed the printed collection, the Jesuit A. Schott, though he was able to add 569 new letters from the Vatican Library, added few of the more strictly exegetical sort. Schott published his 569 letters as a fifth book† (without reprinting the earlier books), first in Greek alone, Antwerp 1623; next in a Latin version only, Rome 1624; and finally in both Greek and Latin, Frankfurt 1629. The four books of Billi-Rittershusius and the fifth book of Schott were combined in the Paris edition of Morel, 1638; and this edition (which has Greek text and Latin translation throughout) has never been superseded, though the imperfections of its text are only less glaring than its faults of typography and defective indexes. Something was done for the improvement of the text in the publication by P. Possinus, Rome 1670, of collations made from Roman MSS, under the direction of cardinal Barberini, some thirty years earlier; and these notes of Possinus are incorporated at the foot of the page in Migne's reprint of Morel's text (*Patr. Gr.* 78). Four dissertations by German, French, Swedish, and Italian scholars respectively — Niemayer, (Halle, 1825; reprinted in Migne), E. L. A. Bouvy (Nîmes, 1884), V. Lundström (in *Eranos*, vol. ii. [Upsala, 1897] p. 68), and N. Capo in *Studi di filologia classica*, ix. (Florence, 1901)—have each contributed something to our knowledge of the MSS of Isidore; but a new edition remains one of the *desiderata* of Patristic literature.‡

Among the letters of Isidore which deal with the study of Holy Scripture in general may be mentioned *Epp.* i. 369; iv. 91, 140, 208, 221; v. 281, 293, 318. More nearly approaching the subject of exegesis are the letters on linguistic topics, such as that on the use of *μήποτε* in Scripture (ii. 270), or those on Scripture synonyms [Trench, *Synonyms of*

* There is some reason to think that Isidore's letters may have been translated into Syriac; two British Museum MSS (cod. dcccxxvii. = Add. 14731, sec. xi., and cod. xlix. of Rose and Forshall's catalogue, sec. xiii.) contain selections from his correspondence.

† The total number of letters thus became 2012; but Rittershusius had printed in his fourth book several that were really already in Billi, and in the same way Schott's fifth book contained several that had appeared in Rittershusius.

‡ Fuller details about the history, MSS, and editions of the collection of Isidore's letters will be found in a paper by the present writer, *Journal of Theological Studies*, 1904.

the *New Testament*, pp. xiv-xvi, does not seem to know of them] (iii. 92; iv. 130; v. 128, 203, 286, 337, 338, 411). Far more numerous are the letters which are exegetical in the strictest sense, as explaining passages in which Isidore's correspondents had appealed to him for help.

The prominent place which belongs here to the Pauline epistles may be explained naturally enough on the ground of their inherent difficulties; but it also corresponds to the special veneration which Isidore displays towards the Apostle. He never tires of drawing on the resources of his vocabulary for fresh phrases with which to do him honour: St. Paul is *ὁ θεσπέσιος Παῦλος, τὸ σκεῦος τῆς ἐκλογῆς, ὁ τῶν τοῦ Χριστοῦ νομημάτων ταμίς, ὁ γῆν καὶ θάλασσαν ρυθμίνας, ὁ βαρβάρους φιλοσοφεῖν ἀναπειλάς* (ii. 124); *ὁ κορυφαῖος [τῶν νομίμων τὸν παρόντα βίον διαθλήσαντων]* (iii. 207); *ὁ τῶν ἀνθρωπίνων πραγμάτων ἀκριβῶς βασανίσας τὴν φύσιν* (iii. 351; cf. v. 74); *ὁ ἐξ Ἰουδαϊκῆς ἐπάλλξεως εὐαγγελικὸν μηχανήμα γεγονώς* (v. 197); and see especially iv. 80 (on St. Paul as the σκεῦος ἐκλογῆς, and on miracles) and v. 299 (on the reasons for our veneration of St. Paul, and on the contrast between him and those who claim to be his successors).

The following is a list of the letters, some eighty in number, which are directed exclusively or primarily to the interpretation of passages in the Pauline Epistles:—

<i>Rō</i>	<i>Epp.</i>	<i>1 Co</i>	<i>Epp.</i>
<i>Rō</i> 1 ²²	ii. 213; iii. 350; iv. 194.	<i>1 Co</i> 9 ²⁷	iii. 265; v. 144.
1 ²⁸	iv. 59.	10 ¹²	iv. 14.
1 ³²	iv. 60 (cf. v. 74).	10 ²⁷	iv. 68.
2 ¹⁰	iv. 61.	12 ²⁷	iv. 103.
3 ²⁵	iv. 100.	13 ¹¹	i. 443, 444.
6 ^{12, 23}	iv. 52.	13 ¹²	ii. 56.
7 ⁸	iv. 62.	14 ²⁰	i. 442.
8 ⁸	i. 477.	15 ²⁹	i. 221.
8 ¹⁸	iv. 63.	15 ³¹	iii. 399.
8 ²⁸	iv. 13, 51.	15 ⁵⁶	iv. 52.
9 ¹⁻³	ii. 58.	2 <i>Co</i> 4 ⁷	ii. 4, 5.
11 ⁸	iv. 101.	5 ¹³	iii. 266.
12 ¹	iii. 75.	5 ¹⁶	iv. 46.
12 ¹⁸	iii. 284, 285; iv. 36, 37, 120, 220.	12 ⁹	i. 428; iii. 182.
12 ²⁰	iv. 11.	13 ⁷	iv. 7.
13 ¹	ii. 216.	Gal 1 ⁸	iii. 165.
13 ⁷	iv. 12, 102.	3 ¹⁵	ii. 196.
13 ⁷	iv. 16.	Eph 2 ¹⁵	iii. 53.
13 ¹³	i. 456.	4 ²⁶	ii. 189, 239.
1 <i>Co</i> 1 ²⁰	i. 429.	4 ³¹	i. 328.
2 ²	iv. 150.	Ph 1 ²⁹	iv. 104.
2 ¹⁴	iv. 81, 127.	2 ³	iv. 22.
3 ¹⁻²	i. 445.	2 ⁶	i. 139.
3 ⁸	v. 82.	3 ¹⁹	iii. 186, 187, 188.
3 ¹⁸	iv. 6.	Col 1 ¹⁵	iii. 31.
4 ⁵	iv. 94.	2 ⁹	iv. 166.
6 ⁷	iv. 95.	2 ¹⁵	iv. 108.
6 ¹⁰	iv. 42.	1 <i>Ti</i> 3 ¹	iii. 216; iv. 219.
6 ¹⁸	iv. 129.	3 ¹⁶	ii. 192.
7 ²⁹	i. 413.	4 ³	iv. 112.
9 ⁵	iii. 176.	5 ⁸	ii. 124.
9 ^{20, 21}	ii. 138.	Tit 1 ¹⁶	ii. 64; iv. 85.*

None of the printed *Catenæ* on the Epistles have made any extended use of this large body of letters. Isidore is quoted once in Cramer's *Bodleian Catena* on Romans: 7⁸=*Ep.* iv. 62; eleven times in his *Munich Catena* on Romans: 7⁸ as before; 8⁸=i. 477; 8²⁸=iv. 51; 9¹⁻³=ii. 58; 11⁸=iv. 101; 12¹=iii. 75; 12¹⁸=iv. 220; 12²⁰=iv. 11; 13¹=ii. 216;

13⁷=iv. 16; 13¹³=i. 456; and twice in his *Catena* on 1 Corinthians: 6¹⁸=iv. 129, and 9^{20, 21}=ii. 138. Among Karo and Lietzmann's *Catenæ*, No. vii. (on Romans) quotes, we are told, *Epp.* 1245, 1244, 1323, 1337; but these letters belong exactly to that part of the collection where it is not at present possible to bring the old numeration into comparison with the printed text—no doubt they are all to be found in Book iv.

Isidore as an independent interpreter has a terseness and directness of his own: but perhaps the reason why he is not more often quoted in the *Catenæ* is that his explanations are sometimes only echoes of those of Chrysostom; compare, for instance, the comment on Ro 12¹⁸ in *Ep.* iii. 284 with the parallel passage in the latter's *Homilies*. Isidore's panegyric on Chrysostom's whole exposition of the Romans has been mentioned above (p. 502^b); and elsewhere he cites the letter of Libanius to Chrysostom as illustrating τὴν τοῦ αἰδίου Ἰωάννου [sc. Chrysostom] γλῶτταν καὶ τὸ κάλλος τῶν νομημάτων καὶ τὴν πυκνότητα τῶν ἐνθυμημάτων (ii. 42). Nor was admiration for his writings divorced in Isidore's mind from admiration for his life and character: Chrysostom is called by him (in reference to his *De Sacerdotio*) ὁ τῶν τοῦ θεοῦ ἀπορρήτων ὑποφίτης, ὁ τῆς ἐν Βυζαντίῳ ἐκκλησίας καὶ πάσης ὀφθαλμός (i. 156): in the cause of Chrysostom he can speak plainly about one patriarch of Alexandria, or plead boldly with another; Egypt, he says, by making use of Theophilus τὸν λιθομανῆ καὶ χρυσολάτρην, τὸν θεοφιλῆ καὶ θεολόγον κατεπολέμησεν ἀνθρώπων (i. 152), and he writes to Cyril, in the interests of peace and reconciliation, a letter that is universally understood to allude to the restoration of St. Chrysostom's name to the diptychs (i. 370).

Thus, just as in doctrine he represents a reaction in Egypt from the extremest type of Egyptian theology, so too in exegesis Isidore, Egyptian and Alexandrine though he was, modified the allegorical traditions of Alexandrine exegesis under the influences of Chrysostom's writings. He takes up a middle position between those who interpreted the whole of the Old Testament directly of Christ, and those who refused so to interpret any of it: ἐγὼ δὲ ἀναγκαίως φημὶ ἀμφοτέρω γεγενῆσθαι, τὸ τε μὴ πάντα λελέχθαι περὶ αὐτοῦ καὶ τὸ μὴ παντελῶς τὰ κατ' αὐτὸν σεσιγῆσθαι (ii. 195). He will not refuse to allow some place to allegorical interpretations, and he gently rebukes a correspondent who had asked for a purely literalist explanation of some provisions of the Mosaic legislation: τοὺς τὰς θεωρίας ὑποφάροντας καὶ τὸ γράμμα εἰς τὸ πνεῦμα μεταρρυθμίζοντας οὐκ οἶδ' ὅπως αἰτιασάμενος, καίτοι πολλὰς ὠφελιμὰ τινα τοῖς ἀκρομαῖσι λέγοντας, αὐτὰ τὰ πράγματα ἐρμηνεύθηναι σοὶ λιπαρῶς παρεκάλεσας (ii. 81). Even in matters belonging to the New Testament, allegorical interpretations can be found in Isidore; but to what a subordinate position, at least in dealing with the Pauline epistles, he relegates the allegorical sense, may be illustrated from *Ep.* iv. 129, where, in enumerating many possible explanations of the precise meaning of 1 *Co* 6¹⁸ εἰς τὸ ἴδιον σῶμα ἀμαρτάνει, he has recourse to allegorizing as a ninth alternative only: εἰ δὲ καὶ τραπήναι ἡμᾶς βούλει εἰς τὴν τῆς ἀλληγορίας ὁδόν, ἐνάτῃ ἐστω ἡ λεχθησομένη.

17. Cyril of Alexandria (commentaries on Romans, 1 Corinthians, 2 Corinthians).—

Cyril, the great opponent of Nestorianism, was archbishop of Alexandria from 412 till his death in 444. Nothing is known as to the date of his birth. His relations to Isidore of Pelusium seem to have been those of a younger to an older man, but he was of sufficiently mature years in 403 to be present, in the train of his uncle and predecessor Theophilus, at the Council of the Oak which condemned Chrysostom. The overpowering dogmatic

* For completeness' sake, references to the Hebrews may here be added: He 13⁸=*Epp.* iii. 53; 21⁵=iv. 146; 4⁹=iv. 147, v. 91; 41³=i. 94; 91⁷=iv. 113; 10²⁸=iv. 168; 12⁷=iii. 184; 121⁶=i. 320; 121⁷=iv. 26; 13⁴=iv. 192.

interest of Cyril's career and writings has naturally tended to obscure the interest of his exegetical work; yet the bulk even of what is preserved of the latter class is far more considerable than that of the former, and the original discrepancy must have been greater still. Too much stress need not be laid on the statement of Cassiodorus, in the preface to his *Inst. Div. Litt.*, that Cyril was one of those who had expounded in the Greek language the Divine Scriptures of the Old and New Testament 'ab ipso principio usque ad finem'; for not only Clement of Alexandria (of whose *Hypotyposes* it was more or less true, see below, p. 520^b), but Chrysostom, Gregory, and Basil, are included under the same heading, and there is every reason to suppose it inexact in the case of the latter writers. But out of the seven volumes which make up the only complete edition of Cyril's works—that of Aubert (Paris, 1638)—four consist wholly of exegetical matter; and yet this edition contained nothing on the New Testament except the portions which have survived of the commentary on St. John. For two centuries after Aubert little more was done; but the last seventy years have witnessed the recovery of a Syriac version of the commentary on St. Luke, and of considerable fragments in the original Greek of commentaries on St. Matthew and on some of the Pauline epistles.

That Cyril had commented on the Epistle to the Hebrews there was a good deal of ancient evidence, in Theodoret, Leontius, Facondus, and others, to show; but for the epistles of St. Paul, properly speaking, the only direct witness that was in print until within the last sixty or seventy years appears to have been a solitary quotation (itself perhaps taken from a Catena) in the Acts of the Second Council of Nicæa in 787 (Mansi, xiii. 289). The 'definition' of the Iconoclastic Council of 754 had appealed to 2 Co 5¹⁶,¹⁷, and the answer of the orthodox appeals, among other interpreters, to Cyril: καὶ Κυρίλλος δὲ ὁ Ἀλεξανδρεὺς ὁ ὑπέρμαχος τῆς εὐαγγελικῆς ἡμῶν πίστεως σαφηνίζων ἡμῖν τὸ αὐτὸ ῥητὸν οὕτως διερμηνεύει: Ἐπειδὴ γὰρ γέγονεν ἄνθρωπος ὁ μονογενὴς τοῦ Θεοῦ Λόγος (there follows a passage of some 18 lines).*

Cramer's Catena on the Epistles to the Corinthians (A.D. 1841) and Romans (A.D. 1844) first supplied sufficient material to prove the existence of continuous commentaries; for his Catena on 1 Corinthians contained sixty quotations from Cyril, his Bodleian Catena forty-four quotations for Ro 1-8, and his Munich Catena about seventy for Ro 7-16. Similar proof for 2 Corinthians (the epistle cited in the Second Nicene Council) was not long delayed, for the 3rd volume of Mai's *Novæ Patrum Bibliotheca*—the title-page of which bears the date 1845, though the year 1849 is mentioned in the preface—published from the Vatican Catena, MS gr. 762, a whole series of Cyrilline excerpts on Romans (pp. 1-47), 1 Corinthians (pp. 48-82), and 2 Corinthians (pp. 83-103), together with one fragment apiece from other sources for Galatians and Colossians; a Latin translation follows in part 2 of the same volume, pp. 1-67. For the first two epistles Mai had been largely anticipated by Cramer, since two of the latter's MSS (that on 1 Cor. and the Bodleian Catena on Romans) were descendants, collateral or direct, of Mai's Vatican MS; but for the latter chapters of Romans Mai's matter was partly, and for 2 Corinthians it was wholly, new.

A commencement of a comprehensive reissue of Cyril's works was made by the late P. E. Pusey, and the following portions had appeared when the

work was prematurely cut short by his death in 1880: the commentary on the Minor Prophets (2 vols., Oxford, 1868), the commentary on St. John (3 vols., 1872), and two volumes of dogmatic treatises (1875, 1877). Happily for our present purpose, the third volume of the commentary on St. John was extended to include the remains of the commentaries on St. Paul: Romans (pp. 173-248), 1 Corinthians (pp. 249-319), 2 Corinthians (pp. 320-361, as well as Hebrews, pp. 362-440). This edition entirely superseded those of Cramer (whose two MSS on the Romans were re-collated) and Mai; for it combines their material with additional fragments on the two Corinthian epistles from an early Catena in the monastery of Pantocrator on Mount Athos (see below, p. 522^b),* and with a few new fragments on Ro 1 (Pusey, pp. 173-175) drawn from a Vienna Catena (Karo and Lietzmann's No. vii.: see above, p. 489^a). Several important changes are also made in this edition in the matter of passages incorrectly ascribed to St. Cyril.†

From the Athos Catena the division of Cyril's commentaries on the two Corinthian epistles into τόμοι and λόγοι can to some extent be reconstructed, though it must of course be remembered that these 'tomes' and 'chapters' do not necessarily begin at the verses where they happen to be quoted. The following indications are supplied: 1 Co 6¹⁸ ἐκ τοῦ γ' τόμου, 7²¹ ἐκ τοῦ δ' [MS Δ ἰοῦ Δ] τόμου, 10¹ τόμος δ' λόγος γ', 11³ τόμος δ' λόγος δ', 12³ τόμος ε' λόγος α', 14² τόμος ε' λόγος β', 14¹⁰ τόμος ε' λόγος γ' [MS inverts the two numbers], 15¹ τόμος ε' [MS omits ε'] λόγος δ', 15³⁵ ἐκ τοῦ ζ' τόμου. And for 2 Corinthians: 1¹ τόμος α' λόγος α', 1¹⁸ τόμος α' λόγος β', 3⁴ τόμος β' λόγος α', 4⁷ τόμος γ' λόγος α', 4¹⁶ τόμος γ' λόγος β', 5³ τόμος δ' λόγος α'. The Syriac fragments catalogued in the next paragraph testify, wherever they give details, to a similar arrangement: on 1 Co 15²⁰ the 'fifth tome' is quoted, and on 15⁴² the 'seventh tome'; on 2 Co 5³ the 'third tome,' and on 13³ the 'fourth tome.'

The Greek evidence of which an account has so far been given would by itself create a strong presumption that Cyril had not commented on any but the longer epistles of St. Paul; for the diligence of Cramer, Mai, and Pusey, between them, has found nothing on the shorter epistles save two or three citations on Galatians and Colossians. But isolated citations from Fathers of great theological repute are presumably taken, as was shown on p. 498 above, from their dogmatic writings. Thus the Vienna Catena just referred to cites Cyril for the Epistle to the Romans, not only ἐκ τοῦ ὕψους,— 'from the text of the commentary,' or perhaps we should best represent the words by translating them 'ad loc.',—but also from the κατὰ Λουκᾶν, from the Θεσαυρὸς, from the πρὸς Ἐρμίαν, from the Περὶ τῆς ἐν Πνεύματι λατρείας, Book vi., and from the κατὰ Ἰουλιανὸν. The μία χρῆσις in Cramer's Catena on Colossians (pp. 305, 340: see above, p. 507^b) is from the Θεσαυρὸς,‡ and the two cited from a MS of Oecumenius on the same epistle (*op. cit.* p. 411) are from the Περὶ τῆς ἐν Πνεύματι λατρείας. And this conclusion is reinforced by the testimony of the Syriac manuscripts, where there is no trace of any commentary (apart from Hebrews) save those on the Roman and Corinthian epistles, though Cyril

* Unfortunately, a fresh element of confusion is introduced by the fact that the quotations from Vat. 762 and the Athos MS, though they tally in sense, rarely tally in words: the former appears to contain more Scripture citations, the latter more technical theology.

† Thus about a dozen of the passages quoted in the Munich Catena on Romans are identified as belonging to other writings of St. Cyril (the *ad Hieronim* and the *Theaurus*), and three or four to other writers altogether—Chrysostom, Theodoret, Photius.

‡ The citation on p. 320 of Cramer headed Κυρίλλου belongs really to the *Homilies* of Chrysostom, *ad loc.*

* The printed Oecumenius contained six quotations by name from Cyril on Romans, three on 1 Corinthians, one on 2 Corinthians, two on Galatians; but these might conceivably have been all culled out of his dogmatic writings.

was of course an author much used in the Monophysite circles from which this Syriac literature comes to us. Even the commentary on Romans was but sparsely known: from the two Corinthian epistles the quotations are more numerous, as the following list of British Museum MSS will show:—

Severus of Antioch against Julian: MS dexe. (Add. 12158), A.D. 588, quotes Cyril on 1 Cor., foll. 11a, 26b; on 2 Cor., fol. 119b.

Monophysite treatise: MS dcecxviii. (Add. 14535), sæc. ix. ineunt.: on 1 Cor., fol. 3a.

Catenæ patrum (the last of the six exegetical, the rest doctrinal)—

MS dceclvi. (Add. 14529), sæc. vii.-viii.: on (1?) Cor., fol. 20a.

MS dceclvii. (Add. 12155), sæc. viii.: on 1 Cor., fol. 125a; on 'the epistles to the Corinthians,' foll. 63a, 68b.

MS dceclviii. (Add. 14532), sæc. viii.: on 2 Cor., fol. 37b, 48b.

MS. dceclix. (Add. 14533), sæc. viii.-ix.: on 1 Cor., fol. 103b; on 2 Cor., foll. 53a, 59b.

MS dceclxiii. (Add. 14538), sæc. x.: on 1 Cor., fol. 23a.

MS dcecliii. (Add. 12144), A.D. 1081; on Rom., 1 Cor., 2 Cor.

No external data appear to exist which would enable us to date the commentaries on the three epistles. According to Bardenhever (*Patrologie*², p. 321), the commentary on St. John is later than the outbreak of the Nestorian struggle, but earlier than the other NT commentaries. His ground for the latter statement appears to be that these commentaries represent a progressive advance in the direction of emphasis on the literal sense, which contrasts strongly with the book, for instance, on Worship in Spirit and Truth, where the Pentateuch is allegorically explained. It is, no doubt, true that we do find a mixture and combination of elements in the exegesis of the Epistles: for instance, in explaining Ro 8²⁸ τοῖς κατὰ πρόθεσιν κλητοῖς, Cyril explains that one would not err in saying that some are called κατὰ πρόθεσιν τὴν τε τοῦ κεκληκόςτος καὶ τὴν αὐτῶν. But it would seem premature to draw from these features any definite conclusion as to date; and there are not wanting, in the history of the Catenæ (see below, p. 522^b), indications which suggest that the commentaries of Cyril passed into circulation at no inconsiderable interval before those of Theodoret.

18. Theodoret of Cyrrhus (commentaries on all the Epistles).—

Theodoret, the younger contemporary of Cyril and typical representative of the orthodox Antiochene theology as Cyril of the orthodox Alexandrine, was born at Antioch in the latter part of the 4th cent., and became bishop of Cyrrhus in eastern Syria about A.D. 423: he died not many years after the Council of Chalcedon in 451. Like Cyril too, although his fame rests primarily on the share he took in the dogmatic controversies of his day, his own literary activity (to judge at least by those works of his which have been preserved) was more largely exegetical than either doctrinal or ecclesiastical or historical or apologetic, though his *Dialogues*, his *Letters*, his *Church History*, and his *Cure for Pagan Affections*, survive to show us what a many-sided theologian he was. Of the four volumes of Sirmond's edition (Paris, 1642), vols. i. and ii. are taken up with OT exegesis, and the first half of vol. iii. with the commentary on the Pauline epistles: * of the ten volumes (5 tomes, each in two parts) of J. L. Schulze's edition (Halle, 1769-1774), the first four are OT, the fifth (tom. iii. part 1) is our Pauline

commentary (the editing of which was in fact done for Schulze by J. A. Noesselt), while the last two contain little more than dissertations and indexes.

The editions of Sirmond, to which Garnier added a supplementary volume in 1684, and of Schulze-Noesselt, which incorporates the material of both Sirmond and Garnier, have remained—with the exception of Migne, *Patr. Gr.*, vols. 80-84 (Pauline epistles in vol. 82, cc. 35-878)—the only collected editions of the works of Theodoret. But for his commentary on St. Paul the Oxford Library of the Fathers made a real advance towards a critical edition, though the standard reached may not have been so high as in Field's sister edition of Chrysostom (p. 506^b, above). Mr. Charles Marriott of Oriel College, to whom the task was entrusted, was, of all the Oxford Tractarians, perhaps the most deeply versed in Patristic scholarship. At the moment of the too early breakdown of his health, the first volume, containing Romans, 1 and 2 Corinthians, and Galatians, had already been issued (1852)*; the second and concluding volume was nearly complete, but the usual delays that attend posthumous publication prevented its appearing till 1870. A brief account of the editions of the text, and of the MSS used in them, is prefixed to the first volume. Sirmond appears to have used only one MS, but gives no details by which it can be identified. Noesselt used two: an 'Augustanus' which he called A—this is no other than the familiar Munich Catena on Ro 7-16—and a 'Bavaricus,' B, no doubt identical with Munich gr. 18, sæc. xvi.† Marriott took over Noesselt's material and his symbols A and B, but his main reliance was on two Paris MSS, coislin 82, sæc. xi. (C), and gr. 217, sæc. x. (D). By the help of the latter MS, brought from Constantinople to the Royal Library after Sirmond's day, a lacuna in the commentary on Galatians (2^o-14, pp. 336. 14-339. 20) was for the first time filled up. Marriott made use also of the printed Oecumenius, and of such of Cramer's Catena as contained material from Theodoret. Unfortunately, he restricted within very narrow limits the improvements he allowed himself to make upon Noesselt's text; nor was it easy to build up definitive results out of MSS so few in number as those he employed.

Unlike Chrysostom, and apparently unlike Theodoret, Theodoret expounded the whole of the fourteen epistles on one scale and in a single work, to which is prefixed a common preface (*προθεωρία*) and a common title ([τοῦ μακαρίου] Θεοδώρητου ἐπισκόπου Κύρου ἐρμηνεία τῶν εἰς ἐπιστολῶν τοῦ ἁγίου ἀποστόλου Παύλου). To this difference in method and system between Theodoret and his predecessors corresponds a difference in the bulk of their respective expositions; for whereas Chrysostom's *Homilies* on St. Paul fill seven fairly thick octavo volumes, Theodoret's are all comprised within two quite thin ones. When Theodoret wrote, the reaction was probably already in full swing against what must have seemed the long-windedness of the older commentators—Origen, Chrysostom, even Theodoret. There was a real gap to fill with an exposition of the literal sense, that should be less discursive and homiletic than Chrysostom's, less ambitiously conceived than Theodoret's; and it could hardly have been filled better than by the commentary of Theodoret. In two succinct phrases he has sketched his plan and its limits: τὰς ἀφορμὰς ἐκ τῶν μακαρίων συλλέξω πατέρων· συντομία δὲ ὅτι μάλιστα φροντιῶ.

An earlier passage in the preface indicates that the 'blessed Fathers' whom Theodoret especially

* Though this was the *editio princeps* of the original Greek of Theodoret on St. Paul, a Latin version by Gentianus Hervetus had been published as far back as 1552.

* Although Migne's edition was not published till 1864, it does not seem to have taken any account of this volume.

† This MS is not improbably a direct copy of a Venice MS of Theodoret on St. Paul, Marcianus 36, sæc. x.

followed were two in number: he might well, he says, be indicted for shameless audacity in setting his own hand to the 'interpretation of the Apostle,' *μετὰ τὸν δέονα καὶ τὸν δέονα τοὺς τῆς οἰκουμένης φωστῆρας*. That he is there referring to Chrysostom and Theodore is beyond question. It has been long recognized of his commentary 'que ce ne soit qu'un abrégé de Saint Chrysostome' (Simon, *Hist. Crit. des Commentateurs du NT*, p. 314): and, now that part of Theodore's work has been recovered, Simon's further divination, 'Je ne doute point qu'il n'ait aussi consulté les commentaires de Théodore de Mopsueste,' is abundantly verified; though at the same time it is to be remembered that Theodoret avoids carefully the less orthodox speculations of his predecessor, and indeed seldom, if ever, verbally reproduces him (Swete, *Theodore*, p. lxxvi). When, then, it is admitted that Theodoret's commentary, 'for appreciation, terseness of expression, and good sense, is perhaps unsurpassed,' and that 'if the absence of faults were a just standard of merit, it would deserve the first place' (Lightfoot, *Galatians*⁵, p. 230), all and more than all is conceded which Theodoret would have wished to claim.

To what period of Theodoret's life the commentary on St. Paul belongs, is a question which four cross-references to it in his own writings enable us to answer within comparatively narrow limits.

a. *Ep. I* is addressed to an (unfortunately) unnamed correspondent, to whom Theodoret had sent *τὴν εἰς τὸν θεῖον Ἀπόστολον συγγραφείσαν βίβλον*, and who had read it through and returned it without any expression of opinion about it. It would seem that the letter, if it did not even precede, must have immediately followed the publication of the commentary; but there is nothing whatever to fix its date.

β. In *Quest. I* in *Leviticum* Theodoret gives a brief summary of some of his writings, mentioning those 'against the Greeks,' 'against Heresies,' 'against the Magi,' the 'interpretation of the Prophets,' and the 'notes on the Apostolic epistles,' *τῶν ἀποστολικῶν ἐπιστολῶν ὑπομνήματα*. Of these *Questiones* on the Octateuch we know that they were earlier than the *Questiones* on the Books of Kings; but as they are not mentioned in the next two lists, it is probable that they are themselves posterior to A.D. 440.

γ, δ. In two parallel and not far from contemporary letters (*Epp. 82 ad Eusebium Ancyranum* and *113 ad Leonem ep. Romæ*, A.D. 448-449), Theodoret, under the stress of the early years of the Monophysite controversy, is appealing for assistance alike to East and West; and in both letters he reviews a number of his earlier works—books written 'either before the Synod of Ephesus, or at any rate not less than twelve years ago,' 'twenty years or eighteen years or fifteen years or twelve years ago'—as guarantees that the orthodox doctrine he now professed was no new thing with him. To Eusebius he says: 'I expounded all the Prophets, and the Psalter, and the Apostle; and I wrote long ago against Arians and Macedonians and Apollinaris and Marcion; and I composed a *μυστικὴ βίβλος*, and another on Providence, and yet another against the questions of the Magi, and the Life of the Saints, and many other books as well.' The list given to Leo is the same in substance, though different in order and in detail: 'I wrote against Arians and Eunomians; against Jews and Greeks; against the Magi in Persia; on Universal Providence; on Theology and the Divine *ἐνανθρώπησις*: I interpreted, by the grace of God, both the Apostolic writings (*τὰ ἀποστολικά συγγράμματα*) and the Prophetic oracles.'

In both these bare estimates of the writings

of a single decade the commentary on St. Paul finds a place, and it would be unreasonable to reject the evidence that thus fixes it between A.D. 429 and 438. But the internal characteristics of the commentary enable us to go a step further and reduce this interval by some years. For Theodoret closes his comment on Col 2⁹ (*ἐν αὐτῷ κατοικεῖ πᾶν τὸ πλήρωμα τῆς θεότητος σωματικῶς*) with the words *θεὸς γὰρ ἐστὶ καὶ ἄνθρωπος, καὶ τὸ ὁρώμενον τοῦτο πᾶσαν ἔχει ἡνωμένην τοῦ μονογενοῦς τὴν θεότητα*, and he would hardly have thus expressed himself, until the progress of the Nestorian controversy had led the more moderate Antiochenes about A.D. 432 to adopt the terminology of the *ἔνωσις* as a definite guarantee of their orthodoxy.

19. Gennadius of Constantinople (commentaries on all the Epistles).—

Gennadius, patriarch of Constantinople from 458 till 471 A.D., was not only a supporter of the Council of Chalcedon and an opponent of the Monophysites, but had even in earlier life—during the interval between the Council of Ephesus in 431 and the Reunion in 433—written against the Twelve Articles of St. Cyril. Facundus, to whom we owe this information (*pro Defens. Trium. Capit. ii. 4*, ed. Sirmond, pp. 76-81), renders into Latin some specimens of Gennadius' controversial style (such as 'quales Cyrilli Aegyptii et quantas blasphemias incurri . . . anathematizaturus est te Deus, paries dealbate'), in order to contrast the censures meted out, for no stronger language about Cyril, to Theodoret and Ibas with the immunity enjoyed by 'sanctus Gennadius,' 'beate memoriae Gennadius.' The theological tendencies of Gennadius being thus obviously Antiochene, it is natural to conclude that his affinities as an exegete would be of the same type; and it was in the domain of exegesis rather than of dogmatic theology that his special interests lay. Such at least is the impression left on us by the account of him in Gennadius of Marseilles, *de Viris Ill.* 90: 'Gennadius Constantinopolitanae ecclesiae episcopus, vir lingua nitidus et ingenio acer, tam dives ex lectione antiquorum fuit ut Daniele prophetam ex integro ad verbum commentatus exponeret; homilias etiam multas composuit.' The expression 'ex integro ad verbum' seems to imply that Gennadius found something to say on every word of his text; in any case, what was regarded as his most marked characteristic was his 'reading of the ancients,' that is, apparently, his knowledge of the works of earlier commentators. Gennadius in fact, like Isidore and Theodoret, belongs to the generation of exegetes intermediate between the more original writers on the one hand and mere catenists on the other,—to those who, either out of the whole bulk of existing commentaries, or from the one or two predecessors to whom they specially attached themselves, selected and abbreviated material which they combined in varying degrees with what was properly their own.

The published remains of Gennadius have been collected in Migne, *Patr. Gr.* 85, cc. 1611-1734; the department of exegesis is represented chiefly by Catena fragments on Genesis and on St. Paul. For the latter, Migne's only Greek sources were: (i.) the Catena of Oecumenius, which, in the printed text, ascribes to Gennadius five passages on Romans, four on 1 Corinthians, one on 2 Corinthians, two on Galatians, one on 2 Thessalonians; (ii.) the Catena of Cramer, of which the Bodleian Catena on Romans has 57 Gennadius citations, the Munich Catena on Romans 64 citations,* the Catena on 1 Corinthians two citations. Another

* Since the two Catena overlap for Ro 77-91, some of these citations occur twice over, and the total is therefore considerably less than the sum of 57+64. It is curious that no citations from Gennadius occur before Ro 51².

Catena can now be added to the list of those which use Gennadius, Karo and Lietzmann's No. vii. (g on p. 489^a, above), which appears to draw on him both directly and indirectly, *i.e.* both from the text of his commentary (*ἐκ τοῦ ὑφ' αὐτοῦ*) and from earlier Catena. Since this Catena is also on the Romans (it breaks off at 1 Co 11²), the mass of Gennadius material on that one epistle is so large compared with the mere fragments that have come down to us on the other twelve, that the question may arise whether, after all, Gennadius commented formally on any other epistle than the Romans. But there is more than one reason which makes any such suspicion untenable.

In the first place, the longer epistles are very much better represented in the known Catena than the shorter ones; and, so far as printed material enables us to judge, the range of authors employed is decidedly larger on the Roman even than on the Corinthian epistles. No doubt, the explanation of this may lie partly in the fact that more commentaries were actually accessible on the Romans than on the rest; we have seen, for instance, that the two Arian writers, Asterius and Eunomius, commented on that epistle only (pp. 498^b, 500^b): but it may also well be that among the original compilers, of whose labours our existing Catena MSS are the ultimate result, were some who started working at the first of the Epistles on a scale and with a thoroughness which were never equalled by the scholars who dealt, then or later, with the rest. For the seven epistles, Philippians-Philemon, no Catena material (besides Oecumenius) has yet been described other than the unique MS, Paris coislin gr. 204, printed by Cramer; and that Catena, since no name is cited in it later than Theodore of Mopsuestia, may actually have been put together in the first half of the 5th cent., before the commentaries of Gennadius, or even of Theodore, had passed into circulation. In face, then, of the quotations in Oecumenius, few and scattered though they be, the absence of Gennadius material on these epistles in other sources might probably be discounted.

In the second place, we have definite external evidence which would outweigh the argument from silence, even if that were stronger than it is. The *Chronicle* of Marcellinus (a 6th century continuation, with special interest in Constantinople, of the *Chronicle* of Jerome), as printed in the earlier editions, concludes a notice of Gennadius, under the year 470, with the words 'et Pauli epistolas omnes exposuit.' It is true that these words are rejected by Mommsen (*Mon. Germ. Hist., Chronica Minora*, ii. 56) as not part of the original Marcellinus; but they are found in the Bodleian MS of Marcellinus, written about A.D. 600, and they belong, therefore, at least to a very early recension. The correctness of the information is of course quite independent of the authorship of Marcellinus, and there is no reason at all for doubting it.

Gennadius, then, commented on all the Epistles. But it still remains true that our knowledge of his commentaries is practically confined to what Cramer's two Catena on the Romans have preserved for us; and to Cramer's volume we must turn if we are to get to closer quarters with the exegesis of Gennadius. The two characteristics which we have learnt so far to associate with him are Antiochene sympathies and wide reading in the literature of exegesis; and the Catena fragments bear ample testimony to both of them.

(a) The commentator's erudition is apparent. The quotation of Aquila's rendering of Is 8¹⁴ *κατὰ τὴν ἑκδοσὴν τοῦ Ἀκύλου . . . Ἀὐτὸς φόβηται ὑμῶν καὶ αὐτὸς θρόνους ὑμῶν καὶ ἔσται εἰς ἁγίασμα καὶ εἰς λίθον προσκύματος καὶ εἰς πέτρην σκανδάλου*, in illustration

of Ro 9³² (Cramer, 367. 9-21), must be one of the latest instances of the use of the unauthorized Greek versions of the OT. And the references to previous expositors are quite unusually numerous, though unfortunately all anonymous; Ro 8³⁴ (Cramer, 152. 2) οὐ γὰρ, ὡς τινες ᾤκησαν . . . : Ro 8³⁷ (289. 31) τὰ ὑπερnikώμενα οὕτως ἀπέδωκε τις; Ro 9²⁻³ (161. 24) αὐτὴ μὲν οὖν ἡ τῆς προεκτελέσεως πίστεως * ἀκριβῆς ἐρμηνεία κωλιδεῖ δὲ οὐδὲν καὶ τὴν δόξαν ἐτέροις εἰπεῖν (where there can be no doubt that the 'others' are right and Gennadius wrong). In the middle of one long exposition of an earlier commentator's view (on Ro 9^{13a})—extending from 349. 30, ἕτερος δὲ τοῦτο οὕτως ἐρμήνευσεν, as far as 351. 1, ταῦτα πρὸς τοῦτο . . . ἀντιπῶν, ἐρμηνεύει λοιπὸν καὶ τῶν προτεθειμένων ῥήσεων τὸν σκοπὸν—occur the words ἀλλὰ γὰρ δὲ τινῶν ἐπὶ τοῦ παρόντος τεθαύμακα, τοῦτο καὶ πρὸς σε, φίλτατε μοι Πέτρε, βούλομαι διελθεῖν: and this address to 'dear Peter' is therefore not Gennadius' own, but is taken over with the rest of the passage from his source. What the source was, it would be interesting to know; the turn of the phrase suggests perhaps rather a letter than a formal commentary.

(b) In several directions the fragments betray the Antiochene temper of Gennadius' commentaries. He uses, if not so frequently as Theodore and Theodoret, the title ὁ δεσπότης Χριστός (Cramer, 63. 35; 410. 21; 478. 34). He speaks of the καὶνὴ κατάστασις (43. 15), and dwells with special emphasis on ζωὴ, ἀθανασία, ἀπάθεια (*e.g.* 50. 33; 56. 29; 60. 2; 117. 11; 118. 32; 146. 25). In commenting on Ro 8³ his Christology expresses itself in language which contrasts strongly with the more guarded and accurate phraseology of Diodore (Cramer, 124. 3-11) on the same passage: 123. 13, τὸν γὰρ νῦν πέμψας τὸν ἑαυτοῦ, σάρκα τὴν αὐτὴν ἡμῖν ἔχοντα παθητὴν τε καὶ ἁμαρτεῖν ἐπιδεχομένην ὁμοίωμα γὰρ σαρκὸς ἁμαρτίας τὴν ἐνδεχομένην ἁμαρτήσαι σάρκα φησὶν, ὡς καὶ τὸ ἐν ὁμοιώματι ἀνθρώπου γενόμενος ἀντὶ τοῦ γενόμενος ἄνθρωπος. So in the treatment of the problems raised in the Pelagian controversy: on Ro 5¹² ἐφ' ᾧ πάντες ἥμαρτον, πάντες is equivalent, he writes (43. 1-11), to οἱ πολλοί, since, though it is true that all have died, it is not true that all have sinned; infants, for instance, οἱ οὕτε πράξεις οὕτε διακριτικῆς προαιρέσεως ὄντες ἐντός, πῶς ἂν εἴεν ὑπεύθυνοι πλημμελημάτων;

As we should therefore expect, Gennadius shows himself to be no allegorizer, and devotes himself to the literal meaning. Special mention may be made of his notes on the 'idioms' of Scripture: Ro 7¹¹ (93. 23=176. 7), on personifications κατὰ τὸ τῆς θείας ἔθος γραφῆς of abstractions such as Sin or Righteousness: Ro 7¹⁴ πεπραμένους (100. 13=186. 1), on the use of metaphors, according to the ἰδιωμα γραφικόν, without the introductory ὡς: Ro 8²⁰ ἡ κτίσις (139. 8-19), on personifications of inanimate creatures: Ro 15²⁶ ὁ δὲ θεός . . . τὸν θεόν (499. 18-25), on repetition of the name of the subject (τὸν θεόν instead of αὐτόν) as an ἰδιωμα τῆς γραφῆς. Interesting specimens of an exegesis which is rather clear than deep may be found on the following passages: Ro 9¹ (159. 4-162. 16), a summary of the Jewish position and of St. Paul's attitude towards it: Ro 13¹ (458. 3-22), how the overflow of new life and power in the spiritual charismata of the primitive Church created a danger which called out the Apostle's exhortation to civil obedience and orderliness: Ro 14¹⁵⁻¹⁷ (482. 12-25), on the simplicity and effectiveness of every detail in the style of these verses.

With Isidore and Cyril, Theodoret and Gennadius, we have reached the close of the golden age of Greek exegesis. Of the three names that still remain for cursory notice, the first two, Theodore the Monk and John of Damascus, appear to have

* So Cramer: Dr. Sanday suggests ῥήσεων.

confined themselves exclusively to the task of compilation from previous commentators, while the third, the patriarch Photius, stands at the very limit of the Patristic period; and all three might perhaps have found a more appropriate place at an earlier point in this article (p. 485).

20. Theodore the Monk (commentary on Romans?).—

In Cramer's Munich Catena on Ro 7¹-16 nearly forty citations are given under the name of an otherwise unknown exegete, Θεοδώρου Μοναχού: and mention was made above (p. 510^b) of Fritzsche's analysis of these passages, from which it appeared that many of them are found elsewhere ascribed to Diodore, Theodore, or Theodoret. So large a proportion, indeed, recur as Theodore's (16 out of 39), that the doubt inevitably rises whether the Θεοδώρου Μοναχού of the Munich catenist may not, after all, have been a misunderstanding of Θεοδώρου Μο(φ)ουεστίας; but, tempting at first sight as this explanation is, it breaks down when confronted with the facts. It does not account for the Diodore passages; * of the fourteen citations from Theodore the Monk in that part of the epistle (Ro 7¹-9¹) which is covered also by the Bodleian Catena, four, indeed, reappear in the latter under the authorship of Theodore of Mopsuestia, but two, and parts of two more, under the authorship of Diodore.† And it is inconsistent with the introductory phrases under which Theodore the Monk ushers in his borrowed matter, for these betray at once the compiler's hand: thus Cramer, 175. 7, *τινὲς δὲ φασί* (what follows is from Theod. Mops.): 248. 4 *ἕτερος δὲ ἀπεφώνητο* (from the same writer): 328. 25 and 379. 6, *ἔφη τις*: 417. 25, *ἔφη δὲ τις περὶ τούτων καὶ οὕτως*. Less stress can be laid on the use of *ἡ, ἡ τάχα, ἡ καὶ οὕτως*, since nearly all commentators from time to time give alternative interpretations; but their relative frequency in Theodore the Monk serves to bear out the conclusion that the Munich catenist has stumbled somehow upon an unknown compiler, the staple of whose material was derived from writers of the Antiochene school, and principally, it would seem, from Diodore and Theodore. The anonymous form of his quotations, *τις, τινὲς, ἕτερος*, may be accidental, or it may conceal the desire to recommend the subject-matter of the two great expositors, who had fallen under the odium of Nestorian heresy, in quarters where suspicion might be awakened by the express mention of their names. There is nothing to show when the Monk lived; but the data on the whole point to the 6th century.

21. John of Damascus (commentary on all the Epistles).—

St. John Damascene belongs to the time—he was born about 685 and died about 760 A.D.—when Greek theology, though it had still to produce Theodore of Studium, was approaching the close of its creative era; and it was his unique work to sum up the results of previous thinkers in that domain and to combine them in a great constructive system. But theology cannot be divorced from New Testament exegesis, and systematic theology moved therefore on parallel lines with Catena compilations: in the West the author of the *Summa* was the author also of the *Catena Aurea*; and in the case of John of Damascus, side by side with the systematic treatise *On the Faith* may be set the commentary on the Pauline epistles which will be found in le Quien's edition of his

works (Paris, 1712, vol. ii., pp. 1-274) or in Migne's reprint (*Patr. Gr.* 95, cc. 439-1034).

The very title of this work, as le Quien prints it, shows at once that John aims at nothing further than the selection of what is best and most authoritative in the exegesis of the past: *ἐκ τῆς καθόλου ἐρμηνείας Ἰωάννου τοῦ Χρυσοστόμου ἐκλογαὶ ἐν ἐπιτομῇ ἐκλεγείσαι παρὰ Ἰωάννου τοῦ Δαμασκηνοῦ*. But the sources of the commentary are not, le Quien points out, confined in fact exclusively to Chrysostom. Although on the longer epistles John follows him closely, the case, it is said, is different with the shorter ones; attention is called to the note on Col 2⁹, where, in the technical language of the Nestorian controversy, a merely 'relative' (*σχετικὸς* or *συναπτικὸς*) indwelling of the Word in Christ is expressly rejected: in the commentary on the epistles to the Ephesians, Colossians, Philippians, and Thessalonians, le Quien could find no trace at all of the use of Chrysostom, and according to the same authority the commentaries both of Cyril (to judge by the parallels in the Oecumenian Catena) and of Theodoret are exploited by John. An obvious objection to le Quien's view as thus stated is that we have seen reason to conclude (p. 515) that it was on the longer epistles only that Cyril wrote;* and a further analysis of John's commentary is all the more desirable, because it may probably be found to have exercised a dominant influence on later compilations such as those of Photius and Theophylact.

For this purpose, however, a new edition of the commentary would appear to be essential; le Quien based his text on an ancient but imperfect MS (Paris gr. 702 [=Reg. 2331], foll. 252-434, sec. x.), and warns us in his preface 'codicem multis passim mendis scatere mutilumque esse, ut sensus saepe impervius sit et obscurus.' But he had heard also of a MS at Patmos; and No. 61 (ξα') of Sakkellion's new catalogue of the Patmos library (Athens, 1890) contains, in fact, the commentary of John. In its present condition this MS, which is attributed to the beginning of the 10th cent., has lost most of the commentary on Romans, and Sakkellion was therefore unable to fix the authorship; but the portions of the text which he prints, such as the argument for 1 Corinthians and the opening words of the commentary on the same epistle, are amply sufficient for the identification. In the Patmos MS, then, together with a recollection of the Paris MS, material for the revision of the text is ready to hand.

It is interesting to note that, according to le Quien, the *lemmata* prefixed to the exposition give a text of the epistles which is not that used by St. Chrysostom—another reason for a new and complete edition.

22. Photius of Constantinople (commentaries on all the Epistles?).—

In the person of Photius (A.D. 820-891), statesman, ecclesiastic, scholar, exegete, the illustrious line of Greek writers on St. Paul that began with Origen finds a fitting close; and indeed his many-sided qualities and multifarious learning bring him, intellectually if not morally, into comparison rather with Origen than with any intermediate commentator. Considering the position of authority which Photius has enjoyed in the Byzantine Church, it is a little strange that his exposition of the Pauline epistles has neither been discovered in any direct MS tradition, nor yet extracted from the Catena and separately collected either in the volumes of Migne (*Patr. Gr.* 101-104) or in

* Theodoret appears to come into the question only through the mistake of Cramer's index; the last three passages there ascribed to Theodorus Monachus are given in the text as Θεοδώρου.

† Diodore: Cramer, 188. 19=105. 4; 199. 19=114. 16; 212. 30=120. 17; 226. 29=128. 21. Theodore: Cramer, 175. 7=94. 6; 202. 22=116. 10; 239. 32=131. 6; 248. 6=135. 30 and 137. 19.

* If John could be shown to have used Cyril through the medium of the Oecumenian Catena, this would constitute a further proof of the early date which recent discoveries (see p. 523, below) have vindicated for Oecumenius.

the Greek edition of Photius' works at present in process of issue. Yet the material is abundant, and could easily be worked, as the following conspectus will show.

(a) A later recension of the Oecumenian Catena (see p. 488^b, above) distinguishes itself from the original work exactly by a large use of Photius; in Karo and Lietzmann's specimen (Ro 7^{88f}) four passages are taken from Photius as against twelve from all other writers. The principal MSS known to give this recension are: at Milan, Ambros. D 541 inf., sec. x.; at Rome, Vat. Palat. gr. 204, sec. x.; at Venice, Marcianus 33, sec. xi. In these MSS the Photius passages are incorporated in the text: other methods of grafting the new matter on to the Oecumenian stock are illustrated (i.) by Paris coislin 27, sec. x., where the Photius passages are inserted in the margin by the second hand; and (ii.) by Oxford Magd. Coll. gr. 7, sec. xi. ineunt. (containing, however, only Romans and 1 and 2 Corinthians),* which adds at the end of each epistle τὰ λείποντα, that is to say, a large number of quotations from Photius and a small number from Gennadius.

(b) Though these Oecumenian MSS would be the principal means of the reconstruction of the commentaries of Photius, yet for the longer epistles considerable assistance would be given by other Catene. The Catena of Vat. gr. 762, so far as we can restore it from Cramer's texts, should contain something from Photius on Romans, and a good deal on 1 Corinthians. Cramer's Munich Catena on Ro 7-16 has about 25 quotations from him. Karo and Lietzmann's Vienna Catena (g on p. 489, above) cites him 'sepius,' but apparently from an earlier Catena rather than direct from the text of his commentary, and perhaps only through the Photian recension of Oecumenius.

Since Photius' literary activity falls in the second half of the 9th cent., and five out of the Catena MSS just enumerated belong to the 10th or 11th cent., there is a fair presumption that his text could be restored from them with tolerable correctness; and the attempt would be worth the making. But it is not possible to say, without further analysis of the quotations from him than has yet been undertaken, whether the result would contribute—in the measure in which an edition of John of Damascus, for instance, ought to contribute—to our knowledge of that exegetical tradition of the earlier centuries which it is the purpose of this article to illustrate.

23. ADDENDUM (to p. 489^b, above). Clement of Alexandria (notes on all the Epistles?).—

The series of commentaries on the Pauline epistles should have included the name of Clement; for the express evidence of Photius makes certain, what is indeed already implied by Eusebius, that the lost *Ἰστορίαι* or *Outlines* included notes on the Epistles.† Eusebius tells us (*HE* vi. 14, § 1) that 'in the *Hypotyposes* Clement gave concise accounts (*ἐπιτεμνόμενας πεπολιγται διηγήσεις*) of the whole of canonical Scripture, including such doubtful books as Jude and the other Catholic epistles and Barnabas and the so-called Apocalypse of Peter'; and he adds some few details about Clement's treatment of the Epistle to the Hebrews and of the Gospels. Photius testifies more clearly (cod. 109) to the exegetical side of the work: of the three writings of Clement, presbyter of Alexandria, *Hypotyposes*, *Stromateus* (*sic*), and *Pedagogus*, the *Hypotyposes* 'contain discussions on

selected verses (*διαλαμβάνουσι περί ῥητῶν τινῶν*) up and down both Testaments, in the form of a summary exposition and interpretation' (*ὧν καὶ κεφαλαιωδῶς ὡς δῆθεν ἐξήγησιν τε καὶ ἐρμηνείαν ποιῶται*). Photius proceeds to criticise the theology of the *Hypotyposes* from the standpoint of Byzantine orthodoxy, and concludes thus: 'All these things he attempts to establish from phrases found here and there in Scripture; and there are countless other follies and blasphemies committed either by Clement himself or by some one who has usurped his name. This blasphemous nonsense occupies eight volumes: the author continually repeats himself, and distorts his texts (*παράγει τὰ ῥητά*) promiscuously and indiscriminately like a lunatic. Speaking roughly, the general scheme of the work consists of explanations (*ὁ δὲ ὅλος σκοπὸς ὧσανεὶ ἐρμηνεῖαι τυγχάνουσι*) of Genesis, Exodus, the Psalms, the epistles of Saint Paul, the Catholic epistles, and Ecclesiastes.'*

Though both Eusebius and Photius have something to say about the *Hypotyposes*, neither of them has preserved much of its actual words: it is to a Western scholar that we owe the only considerable portion which survives. We have already seen (in connexion with Cyril of Alexandria, p. 515^a) that Cassiodorus named Clement—no doubt with reference to the *Hypotyposes*—at the head of those Greek commentators who had explained the whole of both Testaments: and when he comes to deal with the Catholic epistles (*Inst. Div. Litt.* 8) he tells us that Clement 'quodam Attico sermone declaravit' about 1 Peter, 1 and 2 John, and James; that in expounding them he said many things that were acute, but a few that were over-hasty; and that therefore he himself had arranged for the commentary to be rendered into Latin in such a way that Clement's teaching, strained free of some small causes of offence, might be fearlessly absorbed. About the identity of this translation with the extant *Adumbrationes Clementis Alexandrini in epistolas canonicas*—although the four epistles actually expounded there are 1 Peter, 1 and 2 John, and (not James but) Jude—there can be as little real doubt as about the intended equivalence of *Adumbrationes* to *Ἰστορίαι*.

Zahn's text of these *Adumbrationes* covers only fourteen pages in all; and though it must be borne in mind that Cassiodorus ordered the omission of certain passages of the original, it would seem that Photius was abundantly justified in speaking of the exegesis as 'summary' and 'select' (*κεφαλαιωδῶς, ῥητά τινα*). A commentary which ranged over the whole Bible in eight 'books' must needs have been of the nature of an epitome. In fact it becomes clear that, side by side with the tradition of lengthy and detailed exposition, which had its rise among the Gnostics (Basilides, as we know, devoted twenty-four books of *Exegetica* to 'the Gospel') and was taken up and developed in the commentaries of Origen, another and very different method, modelled possibly on Papias' 'Exposition of the Sayings of the Lord,' can claim an equal or almost equal antiquity. Origen himself was no stranger to the system of interpretation by 'scholia' or notes: see above, in connexion with the Roman, Corinthian, and Galatian epistles, pp. 492, 493. Among early commentaries on the canonical Gospels, that of Victorinus on St. Matthew is described by Cassiodorus in the phrase 'de quo [*sc* Matthæo] et Victorinus . . . nonnulla disseruit' (*Inst. Div. Litt.* 7); nor does the work of Hippolytus on the same Gospel appear to have contained anything like a continuous exposition.†

* The second half of the Magdalen College MS is in the Cambridge University Library, Ff. i. 30; and the arrangement of it is the same.

† On this subject the indispensable monograph is Th. Zahn's *Forschungen zur Geschichte des NTlichen Kanons und der altkirchlichen Literatur*, iii.: 'Supplementum Clementinum,' pp. 64-103, 130-156.

* Not Ecclesiasticus: see Zahn, p. 66, n. 1.

† See a paper by the present writer, 'An Exegetical Fragment of the Third Century,' in *JThS* v. 218-241 (especially pp. 225-227), Jan. 1904.

Twelve comments on passages in the Pauline epistles are directly cited from the *Hypotyposes* (Zahn, *op. cit.* pp. 66-77; Preuschen in Harnack, *Altchr. Literatur* 303-305): eleven of these occur in the Catena of Oecumenius, and one in the *Pratum Spirituale* of John Moschus (died A.D. 620). The formula of quotation in the latter case is *Κλήμης ὁ Στρωματεύς ἐν τῷ πέμπτῳ τόμῳ τῶν Ὑποτυπώσεων*. . . τὸ ἀποστολικὸν ῥητὸν ἐξηγουμένους τὸ λέγον ἐὺχαριστῶ κ.τ.λ. (1 Co 1¹⁴). The references in Oecumenius are not merely marginal ascriptions of authorship, such as are given to other authors in this Catena, but are part of the text itself, and in every case but one are appended and not prefixed to the quotation: οὕτως ὁ Κλήμης ἐν τετάρτῳ* [once ἐν δ'], ἐν πέμπτῳ, ἐν ἐβδόμῳ [once ἐν ζ'] Ὑποτυπώσεων. It is natural to conclude from this that Oecumenius drew direct from Clement himself rather than through the agency of a Catena.

Five different epistles are represented in Oecumenius' quotations: 1 Corinthians (11¹⁰ διὰ τοῦς ἀγγέλους), 2 Corinthians (5¹⁶ 6¹¹⁻¹²), Galatians (5²⁴), 1 Timothy (2⁶ καιροῖς ἰδίοις, 3¹⁶ ὥφθη ἀγγέλοις, 5⁸ τῶν ἰδίων καὶ μάλιστα οἰκείων, 5¹⁰ ἐλ ἀγίων πῶδας ἐνίψε, 5²¹ χωρὶς προκρίματος, 6¹³ τοῦ μαρτυρήσαντος ἐπὶ Ποντίου Πιλάτου), and 2 Timothy (2² διὰ πολλῶν μαρτύρων). The comments on both Corinthian epistles are quoted from the 4th book; that on Galatians from the 5th book; those on 1 and 2 Timothy from the 7th book. Zahn points out (pp. 150, 156) that Clement, like the Muratorian Canon, appears to have drawn a marked line between the epistles to Churches, which he expounded in the 4th and 5th books of the *Hypotyposes*, and the personal epistles, which are dealt with in the 7th, the Pauline series being interrupted in the intermediate book by notes on the Acts and perhaps also on the Gospels.

To these twelve passages from Oecumenius and Moschus it is possible that several more should be added from other Catena. Neither Zahn nor Preuschen seems to mention the fact that Cramer's Munich Catena on Romans contains three citations (on Ro 8²⁹ 10²⁻³ 10⁵), and his Catena on 1 Corinthians two citations (on 1 Co 1²⁰ 1²¹), under the heading *Κλήμεντος*; while the Catena of Vat. gr. 692, so Dr. Mercati informs the present writer, contains at least five. It is probable that some of these came from the *Hypotyposes*.

As the example of the Latin *Adumbrationes* would lead us to expect, these comments of Clement on St. Paul are brief—for the most part very brief. The exegesis is of course predominantly allegorical. The ἀγγελοι of 1 Co 11¹⁰ are 'righteous and virtuous men': according to one interpretation (not, however, finally accepted) of Gal 5²⁴, Christians are the σὰρξ Χριστοῦ, and the whole verse means 'there is no law against such as have crucified the flesh of Christ,' i.e. their own body: in 2 Ti 2² the πολλοὶ μάρτυρες are the Law and the Prophets, cited regularly by the Apostle as 'witnesses' to the contents of his preaching. But the *Hypotyposes* also—in this again resembling the work of Papias—adduce traditions of Apostolic history in explanation of the sacred text: such matter was hardly to the purpose of catenists, but Eusebius has preserved a few bearing on other NT books, and the solitary quotation in John Moschus is of this character. Clement, he tells us, in expounding 1 Co 1¹⁴, 'relates that Christ is said to have baptized Peter only, Peter to have baptized Andrew, Andrew to have baptized John and James, and they the rest.'

* The comment on 1 Co 11¹⁰ is in the printed text of Oecumenius given as ἐν πρώτῳ; but Zahn points out that the Bodleian MS, Auct. T. 1. 7, cited on p. 465 of Cramer's Catena on the Corinthian epistles, reads ἐν τετάρτῳ, and this is doubtless right.

iv. SUMMARY OF UNPUBLISHED OR INADEQUATELY PUBLISHED MS MATERIAL.—The aim of the present section is to point out the lines along which it is likely that the labours of the next generation of scholars could be most profitably directed, with a view to our further knowledge of the Patristic writings enumerated in this article. The material groups itself naturally under four headings: A. Anonymous Catena; B. Catena of known authorship; C. Original commentators as preserved in the Catena; D. Commentators whose text is preserved independently of Catena. Thus three of the four headings of the section are concerned, directly or indirectly, with Catena; and that fact is enough of itself to foreshadow the predominant part which will belong in the immediate future to this branch of research. To a large extent the following paragraphs will do no more than focus the results of preceding sections, and bring into one comprehensive scheme the isolated points that have already been indicated at various stages of the inquiry: but fuller details will be given here than was possible above about the more important Catena MSS; and, in a few cases where for one reason or another there had been no previous opportunity for introducing it, the matter is entirely new (see A 4 and 5, p. 522^b, and B 1, p. 523^a).

A. Anonymous Catena.—

1. The most ancient of the Pauline Catena, to judge by the limitation of its sources, is the Paris MS, coislin 204, *saec.* x. (311 folios), from which Cramer published his Catena on the eleven epistles, Galatians-Hebrews (Karo and Lietzmann's No. iv.). The Fathers regularly cited are Origen (on the Ephesians), Eusebius of Emesa (on the Galatians), and, throughout, John Chrysostom, Severian, and Theodore of Mopsuestia: while Basil, Gregory Nazianzen, and Cyril are quoted once each on the Colossians. Putting aside the Epistle to the Hebrews—the Catena on which may perhaps have had a separate origin and history—there is nothing later than the first half of the 5th century, and, if we except the one passage from Cyril, nothing later than the first years of that century. Cramer employed a 'scriba Parisiensis' to copy out the MS for him, and expresses in his preface the fear that the copyist 'non semper codicis lectionem vere representaverit.' How well justified his fears were, the re-collation of the Origen comments on Ephesians for Mr. Gregg's edition in *JThS* iii. (1902) abundantly demonstrated. The Theodore, too, was re-collated for Dr. Swete's edition; but for the remaining Fathers, and especially for Severian, Cramer's edition is still our only authority, and for critical purposes it is quite valueless. See, for previous references to this Catena, pp. 487^a (Cramer); 488^b (Karo-Lietzmann); 493^b, 494^a, 495^b, 496^a (Origen); 498^b (Eusebius of Emesa); 499^a (Basil and Greg. Naz. on Col 1¹⁵); 507^b (Severian); 510^{a-b}, 511^a (Theodore of Mopsuestia); 515^b (Cyril); 518^a (absence of Theodoret and Gennadius).

2. Next perhaps in antiquity of origin, and not inferior in the importance of its contents, comes the Vatican Catena, gr. 762, *saec.* x., an enormous MS of 411 folios; the Catena for Romans commencing on fol. 1^a, that for 1 Corinthians on fol. 218^a, and for 2 Corinthians on fol. 340^a.* The handwriting is very fine: the blank spaces left, e.g., on fol. 343, 350, show that the exemplar of that part at any rate of the MS could no longer be deciphered, and was probably, therefore, already an old MS when it was being copied in the 10th century.

* For many new details about the Vatican Catena, and for an important reference in the case of Oecumenius, the writer is indebted to the unwearied kindness of his friend Dr. Mercati, of the Vatican Library.

In Karo-Lietzmann it is No. i.; their list of the authors cited is divided, according to their custom, into two classes: the first (at least 10 citations apiece) includes Apollinaris, Cyril, Didymus, Diodore, Gennadius, John Chrysostom, Oecumenius, Origen, Photius, Severus of Antioch,* Severian, Theodore, Theodoret; the second consists of Acacius of Caesarea (4 times on Romans), Basil (3 times on Romans), Clement (twice on 1 Corinthians), Dionysius the Areopagite (once on 1 Corinthians), Gregory Nyssen (once each on Romans and 1 Corinthians), Isidore (5 times), Methodius (once on 1 Corinthians), Theodulus chorepiscopus (once on Romans). This account is, however, not quite exhaustive, and omits, for instance, a *scholion* on fol. 403^b, written in smaller characters but by the original scribe, under the heading 'Ἀλεξάνδρου ἐπισκόπου Νικαίας. Alexander of Nicea lived in the first half of the 10th cent., and may conceivably have been the editor of the Catena in its present form. Both Oecumenius and Photius are laid under contribution: the passages taken from the latter are considerable both in number and length. Where both of them are cited together, Oecumenius always comes first.

Of the two late MSS of parts of this Catena which alone were at Cramer's disposal—Paris gr. 227 and Bodl. Auct. E. ii. 20 (=Miscell. gr. 48)—the latter, on the ground of its rather curious history, may claim a few words here.

MS Bodl. Auct. E. ii. 20, containing in a 16th century hand a Catena on Ro 1^a-9^a, was presented to the Library in 1659 by S. Cromleholme, master of St. Paul's School in London; at an earlier date, in 1601, it had been given to Dr. G. Ryves, warden of New College, by John Lloyd (Johannes Luidius), rector of Writtle in Essex. Lloyd's inscription on the fly-leaf is headed 'Ex manubiis Gaditanis,' indicating that the MS was part of the spoils of the Earl of Essex's Spanish expedition in 1596; but whether it was taken in the sack of Cadiz itself, or formed part of the library of bishop Osorio of Algarve, which is known to have fallen into Essex's hands on the homeward journey,† cannot be said for certain. At the end of the text on the last leaf is the word *λειπεί*; and on the following guard-leaf, in different ink but perhaps in the same handwriting as the body of the MS, are epitaphs by John Lascaris (see above, p. 485^b) on himself and on his wife Catherine. These two epitaphs were actually inscribed on Lascaris' tomb in the church of S. Agata dei Goti at Rome; and since, in the MS, they are separated by a floriated cross, such as one might expect on a tombstone, it looks as if they had been actually copied *in situ*. If so, the presumption is strong that the MS itself was written in Rome, and that Vat. gr. 762 was its direct exemplar.

See above, for these MSS, pp. 487 (Cramer and Mai); 488^b (Karo-Lietzmann); 492, 493^a (Origen); 499^b (Didymus); 501^a (Diodore); 510 (Theodore of Mopsuestia); 514^{a,b} (Isidore); 515^a (Cyril); 517^b (Gennadius); 520^a (Photius); 521^a (Clement).

3. More importance than the brief account in Karo-Lietzmann (No. iii., *op. cit.* p. 601) would suggest seems to attach to the Catena on the Corinthian, Galatian, and Ephesian epistles contained in Vat. gr. 692, foll. 1-93. These scholars attribute the MS to the 12th cent., and name Cyril, John Chrysostom, Oecumenius, Origen, Severus, Theodoret, Theodore, and (on 2 Corinthians) 'Δι,' as the writers more frequently cited;

Clement, Gennadius, Isidore, and Gregory Nyssen as cited respectively three times, twice, twice, and once. But the date should be moved back to sec. x.-xi.; the names of Nicolas, Methodius, Basil, Eusebius, Photius should be added to the list of Fathers cited; from Clement of Alexandria not three only, but at least five quotations are made; Di(dymus) is very common on 2 Corinthians; Severian is once named in full (fol. 59^a), and the substitution of this Father's name for Karo and Lietzmann's Sev(erus), proposed on p. 489^a above, is thus amply justified. On many occasions the catenist compares expressly the views of different authors—e.g. Clement, Eusebius of Caesarea, Gregory Nazianzen, Chrysostom, Severian, Theodoret, Cyril—and sometimes adds to his authors' names precise references to their books. On comparing this Catena with the last, Vat. gr. 762, for the Corinthian epistles, it results that the quotations common to both are briefer in 692 than in 762; and this is what the relative bulk of the two MSS would lead us to expect.

See above, pp. 489^a (Karo-Lietzmann); 507^b (Severian); 521^a (Clement); too little was known of this Catena for full use to be made of it in the foregoing pages.

4. The most important addition that has to be made to Karo-Lietzmann's list of Pauline Catenaë is a MS that has once been mentioned above (p. 515^b), in connexion with Pusey's edition of Cyril of Alexandria—Athos Pantocrator cod. 28. According to the catalogue of Sp. Lambros (i. 95), the MS is of the 9th cent., and contains the (Acts and) Pauline epistles, the names most frequently cited being Isidore of Pelusium, John Chrysostom, Severian, Diodore of Tarsus, Theodore of Mopsuestia, and Apollinaris. Photographs of eleven pages of this MS, covering 1 Co 7²⁴-11¹¹, were taken by Prof. Kirsopp Lake, and are now in the Bodleian (MS gr. th. f. 8); the principal authors in these pages are Chrysostom, Severian, Cyril, and Theodore of Mopsuestia. The absence of Theodoret is noticeable; and as all the eight writers known to be used in the Catena are earlier than Theodoret, it is possible that its origin goes back to the period anterior to the publication of his commentary. If that is so, it ranks with our earliest Catenaë; but a serious drawback to its value is that the evidence of its Cyril texts (see above, note on p. 515^b) seems to suggest that the catenist may have not only abbreviated but otherwise re-cast the passages he extracted from his sources.

5. Patmos σζγ' (=No. 263, p. 127 of Sakkellion's catalogue), sec. x., is described as containing, on foll. 1-119, not a continuous commentary, but a series of notes on the Acts and some of the Catholic and Pauline epistles (2 Cor., Eph., Phil., Col., 1 and 2 Thess., 1 and 2 Tim., Titus), with an unusually extensive range of authorities: Athanasius, Ambrose, Anastasius of Antioch, Apollinaris, Archelaus the bishop, Basil, Caesaris, Cyril of Alexandria and of Jerusalem, Eusebius, Gennadius, Gregory Nazianzen and Nyssen, Hyp(atius?), Irenæus, [Isidore] the Pelusiote, John Chrysostom, John [Damascene], Josephus, Leontius the Monk, Maximus the Monk, Methodius of Patara, Origen, Severian, Theodore, Theodoret. From the specimens given in the catalogue it would seem that the quotations are, for the most part, so brief as to promise little in the way of profitable result.

Of other anonymous Catenaë, the editing of Cramer's Munich Catena on Romans appears to be a much better piece of work than that of his Paris Catena on the shorter epistles: to Karo-Lietzmann's account of their No. vii. Catena, from Vienna, the present writer has nothing to add: of their No. viii. something will be said below, at the end of the account of Oecumenius, p. 524^a.

* If this is correct, and not really a confusion with Severian, the last note on p. 507^b above should be modified. But, in the case of the Catena next to be mentioned, Karo and Lietzmann have wrongly expanded Σν into Severus instead of Severian.

† Of the many books which came by gift from Essex to the Bodleian in A.D. 1600 a considerable number were printed in Spain and Portugal.

B. *Catenæ of known authorship.*—

1. Those who have followed down to this point the argument of the present article will have gathered that the origin of the *Catenæ* in general is to be looked for in a more remote age than it has been customary to ascribe to them. In particular, the *Catena* of Oecumenius (see pp. 485, 486*, 488*) is to be placed not, as hitherto, after the time of Photius, but before it. Recent investigations tend still further to accelerate this backward movement, and make it probable that the true date of Oecumenius is about 600 A.D.

In a 12th cent. MS at Messina, cod. S. Salvatore 99, a complete commentary on the Apocalypse under the name of Oecumenius has been lately found by a German scholar, Fr. Diekamp of Münster (see a paper by him in *Sitzungsberichte der k. preuss. Akademie der Wissenschaften*, Berlin, 1901, pp. 1046–1056); and the internal evidence of the commentary is sufficient to establish roughly both the date and the theological standpoint of the writer. The comment on 1¹ ἐν τάχει states that 'a period of more than 500 years had elapsed' since the date of St. John's vision. The Christology is Cyrilline or even Severianist rather than Chalcedonian: ἐν πρόσωπον καὶ μὴν ὑπόστασιν καὶ μὴν ἐνέργειαν is the nearest approach to a formulated doctrine of the Incarnation. The writer was therefore, if not actually a Monophysite, at any rate one of those who still sought for a common ground with Monophysitism.

Diekamp somewhat hastily concludes that his discovery is fatal to the genuineness of the Oecumenian *Catena* on St. Paul, in which he would see only the work of a later compiler excerpting Oecumenius in precisely the same way as he excerpted other ancient authorities. But neither of his reasons will stand examination.

a. 'Photius is used in the Oecumenian *Catena*; but Photius lived in the 9th cent., and the real Oecumenius cannot therefore have quoted him.' But it has been shown above (p. 488*), following Karo-Lietzmann, that it is not the original Oecumenius, but a later recension only, which makes use of Photius.

β. 'Oecumenius' work on the Apocalypse is a commentary, not a *Catena*; but the so-called Oecumenius on St. Paul is a *Catena*, not a commentary.' The argument is specious rather than sound. For, in the first place, Oecumenius on St. Paul is not quite a *Catena* on the ordinary model: see p. 485* above. In the second place, Diekamp sufficiently answers himself when he shows that Oecumenius is the earliest of the Greek commentators on the Apocalypse: if there were no commentators before him, it is difficult to see how he could have compiled a *Catena*. Of the two other ancient Greek commentators known to us, Arethas of Cappadocian Cæsarea wrote about A.D. 900, Andrew considerably earlier. That Arethas is found by Diekamp to make use of both Oecumenius and Andrew, is only what we should expect of a scholar as profoundly versed as Arethas in Patristic learning (cf. p. 492*, above); but Diekamp also makes it clear, first that Andrew and Oecumenius are not independent of one another, and secondly that it was Andrew who used Oecumenius, and not *vice versa*. In his comments on 4⁵ 6¹ 9⁵ 15 Andrew introduces the explanations of τινὲς or τιν τῶν πρὸ ἡμῶν; and in every case the explanation so introduced is found in Oecumenius. Especially cogent is the case of μῆρας πέντε in 9⁵, because there Oecumenius, after balancing the 'apocatastasis' doctrine of the Origenist Evagrius with the more rigid eschatology of other writers, compromises on a doctrine of punishment which should be eternal indeed in duration, but after the 'five months' modified in intensity (ὀφειλέτους). When,

then, we find Andrew quoting with the formula τινὲς ἔφησαν the very conclusion at which Oecumenius had painfully arrived by way of compromise, it would be unreasonable to doubt that Oecumenius is the source on which Andrew draws.

But if Oecumenius on the Apocalypse quotes no predecessors for the simple reason that he had no predecessors to quote, he does as a matter of fact approach the method of Oecumenius on St. Paul by not infrequent references to the Fathers generally. Cyril is quoted four times; Gregory Nazianzen and Eusebius, twice each; Aquila, Josephus, Clement (the *Stromateis*), Gregory Nyssen, and Evagrius, once each. The commentator on the Apocalypse and the commentator on St. Paul are equally versed in Patristic literature, and employ it equally in the measure appropriate to the two works. It may be added that, while the former is, as has been seen, rather Cyrilline than Chalcedonian in the expression of his Christology, the latter too appears to have worked on anti-Nestorian lines; for the *Catena* on St. Paul never once cites Theodore of Mopsuestia, and, considering the number of names adduced in it, this omission can hardly be accidental. On internal evidence, therefore, there is no reason at all to question their identity.

The external evidence to the commentary of Oecumenius on the Apocalypse is confined to a single quotation in a Syriac *Catena Patrum* of the 7th cent. (Brit. Mus. Add. 17214 = Wright cod. dccciv., fol. 72b). In this MS, which is a collection of explanations of Bible passages, the principal authority employed is Severus of Antioch, and Theodore of Mopsuestia is cited as 'Theodore the heretic': its Monophysite leanings are therefore clear, and we are not surprised to find that Oecumenius, in the phrase with which the quotation from him is introduced, is brought into close connexion with Severus: 'Of Oecumenius, a diligent man, and one who is very orthodox, as the letters of the patriarch Mar Severus which are written to him show: From the sixth book of those composed by him about the Revelation of John the Evangelist.' If the Syriac writer is correct, Oecumenius the commentator on the Apocalypse was a favoured correspondent of the great Monophysite, and must therefore have been of mature age before the death of Severus, *circa* A.D. 540: so that the internal evidence of the commentary, both as to date and as to the theological affinities of its author, would be carried somewhat further by the Syriac catenist. But among all the extant correspondence of Severus the only person bearing the name of Oecumenius is a Count to whom Severus addressed two dogmatic letters before A.D. 512: and it is probable, therefore, that the Syriac writer has blundered in identifying the commentator with the correspondent, for the interval of 'more than 500 years' since the vision of the Apocalypse is inconsistent with anything earlier than the second half of the 6th century. At the same time, the fact that the mistake could be made suggests that the commentary was not quite a new thing when the Syriac MS was written. We shall hardly err in placing the commentary on the Apocalypse about 600, and the *Catena* on St. Paul within the limits 560–640.

Of the original non-Photian form of the Oecumenian *Catena* on St. Paul the following MSS in Karo-Lietzmann's list (*op. cit.* p. 605) are attributed to the 10th century:

- i. Paris coislin 95, foll. 348.
- ii. Vatic. gr. 766, foll. 249.
- iii. Oxford Bodl. Roe 16, foll. 255.
- iv. Venice Marcianus 546, foll. 59–205 (but foll. 134–173, Gal 3²¹–1 Ti 4¹⁰, are a later insertion).

- v. Milan Ambros. C 295 inf., foll. 190.
- vi. Florence Laurent. plut. x. 6, foll. 286.
- vii. Paris gr. 224, foll. 1-222 (contains also the Apocalypse).
- viii. Paris coislin 224, foll. 151-328 (contains also Acts, Cath. Epp., Apoc.).
- ix. Vatic. gr. 1430, foll. 267.
- x. Vatic. Palat. gr. 10, foll. 268.
- xi. Athens 100, foll. 377 (1 Co 15²⁹-He 11³⁷).

Of these eleven MSS the first five are, so far as can be gathered, homogeneous in the matter which they contain. No data are given about the last two; the remaining four, Nos. vi.-ix. (save that No. viii. perhaps contains only excerpts), while agreeing with the first five for all the anonymous citations in Oecumenius, differ from them with regard to the (in number much fewer) named citations, which they either transpose or, more rarely, omit. Both classes of MSS give the anonymous citations in one and the same continuous series marked by Greek numerals; and the choice appears to lie between the hypothesis that the named citations, though they entered into the Catena long before the Photian matter, are yet no part of the original Oecumenius, and the more probable hypothesis that in the original form of the Catena the named citations were separated in some way from the continuous series of the anonymous citations,—perhaps by being written in the margin,—and so were exposed, in the course of the propagation of the text, to special danger of either transposition or omission.

Another Catena, Vatic. gr. 1270, which is treated as an independent Catena in Karo-Lietzmann's scheme (*op. cit.* No. viii. p. 610), should perhaps, as was suggested on p. 489^a, above, be treated as belonging to the Oecumenian group. This MS, which was written in southern Italy about A.D. 1100, contains the Acts and Catholic epistles, and on foll. 79-164 a Catena on Romans and 1 Corinthians. From Karo-Lietzmann it would not be possible to deduce more than that the names of Chrysostom, Severian, and Theodoret were found in it; but Acacius, Cyril, Gennadius, and Oecumenius also occur, and once at least Basil *ἐκ τοῦ πρὸς Σαῶζόπολιν ἐπιστολῆς* (*sic*). It is significant that a similar reference to this last appears in Oecumenius; see above, p. 499^a.

2. On the need for a new edition of the commentary on the Pauline epistles by John of Damascus, and on some of the MS material for it, enough has already been said on p. 519^a.

3. Cod. Vatic. gr. 1650, A.D. 1037, is a commentary on the Pauline epistles written by Nicolas, archbishop of Reggio in Calabria. Ehrhard (in Krumbacher's *Geschichte der byzantinische Literatur*², p. 133), who mentions the MS, gives no details of its contents, so that it is impossible to say whether it contains ancient elements.

C. *Original authorities as preserved in the Catena.*—

It is obvious that not much can be done under this head until the Catena themselves are made accessible in trustworthy texts; and how far that is from being the case at the present date it has been the business of the preceding paragraphs to demonstrate. But, as soon as this preliminary work has sufficiently advanced, it would be the turn of definitive collected editions of the more important writers. Since the Catena are mainly on the longer epistles (see especially p. 518^a above), the results to be anticipated from this line of research will be, in the case of the majority of writers, most marked on the Roman, or on the Roman and Corinthian, epistles.

Origen.—The work has already been done tentatively for the Ephesians (pp. 493-495, above); but it still remains to be done for the Romans, and for

the First at any rate of the Corinthian epistles (pp. 492, 493^a).

Didymus. p. 499.—It does not seem likely that much can be restored for any other epistle than 2 Corinthians; but Mai's text (from Vat. gr. 762) will need re-editing, and the Didymus material of Vat. gr. 692 (see pp. 489^a, 522) will need to be tested, though it may turn out to be not independent of the other MS.

Diodore. p. 501.—The evidence here rests wholly on Vat. 762, and a separate edition might probably wait for Harnack's promised undertaking of a 'Corpus operum Diodori' (see his 'Diodor von Tarsus,' *Texte und Untersuchungen*, N. F. vi. 4, 1901, p. 68).

Severian. p. 507.—Severian is perhaps the author for whom most is to be expected from a careful cross-examination of the Catena: on the Romans (unless Oecumenius should here come to the rescue) less has been preserved from him than from several other writers; but for 1 Corinthians, Ephesians, Philippians, Colossians, Philemon, and probably for the other shorter epistles as well, a rich harvest should be yielded.

Theodore of Mopsuestia.—For the shorter epistles the work has been done by Dr. Swete (p. 511^a): for the longer epistles the texts of Mai and Cramer (p. 510^a) would need revision, and for Theodore, as for Didymus, the Catena of Vat. 692 may or may not add new matter.

Cyril. p. 515.—The only source from which any additions to Pusey's collection could be hoped for would be a re-edited Oecumenius.

Gennadius. p. 518^a.—Oecumenius and the various Catena on Romans ought between them to add something, though perhaps it may not be much, to the fragments put together by Migne.

Photius. p. 520^a.—Here again a separate edition, for which the Photian recension of Oecumenius would supply the main material, is an imperative and probably a not really difficult task.

D. *Authors preserved independently of Catena.*—

In this department, as was to be expected, more work has already been done; but something still remains to do. The commentaries of Chrysostom (p. 506^b) and Theodoret (p. 516^b), and the Latin version of Theodore (p. 511^a), have been adequately edited by English scholars: Rufinus' version of Origen on the Romans is to be expected in the Berlin series of the Ante-Nicene Fathers: with regard to the letters of Isidore of Pelusium, the need for a new and better edition, and the material which would make such an edition feasible, were pointed out with sufficient emphasis on p. 513. And besides the many Fathers who expounded the Epistles there were some also who edited them. It will be seen in the course of the next (and concluding) section that patient investigation may hope ultimately to restore, with approximate correctness, the text and apparatus of these early editions of St. Paul.

V. PATRISTIC EDITORS OF THE PAULINE EPISTLES.—*Evagrius* and *Euthalius*.—The name Euthalius conjures up more questions than with the information at our disposal it is possible to answer. Of late a revolution in Euthalian criticism has been made every few years; and though material is accumulating rapidly, the time has not yet come for the last word to be said. But no estimate of Patristic labours on St. Paul would be adequate which did not try to give some account of the earliest attempts to produce what would now be called an edition, with Introduction and Prolegomena, of the sacred text.

(a) 'Euthalian matter' is a convenient term, of which use has already been made (p. 435^b) in this article, denoting a whole literature of documents,

'prologues, *argumenta*, *programmata*, lists of OT citations, lists of chapters, colophons, and scraps of all kinds,' found in part or in full in many Greek MSS of the Acts and Epistles, and first published with any approach to completeness by L. A. Zacagni, *Collectanea monumentorum veterum ecclesie Græcæ ac Latine quæ hactenus in Vaticana bibliotheca delituerunt* (Rome, 1698), pp. liv-lxxvii, 401-708. It falls into two parts—an edition of the Pauline epistles, and a subsequent edition of the Acts and Catholic epistles with which we are here concerned only in so far as it may throw light on its author's previous work on St. Paul. To each of the two editions is prefixed a prologue; and these prologues in some MSS are anonymous, and in others bear the name of Εὐθαλίου διακόνου or Εὐθαλίου ἐπισκόπου Σούλης. According to Zacagni, the proper title of the Pauline prologue is 'Euthalius the deacon,' and of the other prologue 'Euthalius bishop of Sulca,' the author having been raised to the episcopate in the interval between the composition of his two works. Zacagni printed the fullest collection of texts accessible to him; and though he was not prepared to claim the authorship of Euthalius for all his documents, he certainly attributed the great mass of them to him. On the strength of a note of time attached in some MSS to one of his Euthalian documents, the *Martyrium Pauli*, he fixed the date of the edition of the Pauline epistles at A.D. 458.

(b) For nearly two centuries no serious advance was made upon Zacagni's statement of the problem. The credit of the first contribution of new material belongs to a paper by Dr. A. Ehrhard in the *Centralblatt für Bibliothekswesen*, 1891, vol. viii. pp. 385-411. Ehrhard called attention to the occurrence of the name Evagrius in two MSS which contain Euthalian material: (i.) codex H of the Pauline epistles, a fragmentary MS of the 6th cent., written in *στίχοι* or sense lines,—'per cola et commata,' to use the more technical term,—the colophon of which is written in the first person, and in clearly 'Euthalian' language, by a certain Evagrius;* (ii.) codex Neapolitanus II. a 7 of the Acts and Epistles (in Gregory's notation = Ac. 83=Paul. 93), a later but completer MS, comprising much Euthalian matter without the name of Euthalius, together with the Evagrius colophon as in cod. H. No one had ever been able to identify Euthalius the deacon or Euthalius the bishop of Sulca with any known historical personage; and Ehrhard proposed to eject him altogether, and to substitute instead the name Evagrius. By moving back the date of the Pauline apparatus from Zacagni's 458 (a secondary date found in only a few MSS of the *Martyrium Pauli*) to 396 (a date found in all of them without exception), he brought the work of his Evagrius within the limits of the lifetime of the well-known Origenist writer, Evagrius Ponticus, who died in Egypt about 399.

(c) Dr. J. Armitage Robinson's *Euthaliana* ('Cambridge Texts and Studies,' iii. 3, A.D. 1895) was principally directed to the analysis of Zacagni's Euthalian collection, with a view of discriminating the original matter from that which had accrued at later stages. Accepting Dr. Ehrhard's connexion of the *Martyrium Pauli* with the year 396 and with the name Evagrius, Dr. Robinson maintained that the *Martyrium* is itself a secondary document, dependent on the Euthalian prologue to the Pauline epistles; and he argued back to an original Euthalius, to whom is due the prologue and whatever in the Euthalian collection is covered by the sketch which the prologue gives of its author's proposed edition. The table of

Old Testament quotations, the table of chapter-divisions, and the arrangement of the text by sense lines, constitute the sum, according to Dr. Robinson, of all that we can safely attribute (in addition to the prologue) to the pen of Euthalius himself. The date of Euthalius would then fall somewhere between the date of the *Chronicle* of Eusebius (which is cited in the prologue) and the date of the *Martyrium Pauli*. Dr. Robinson's tentative results have been superseded by the discovery next to be mentioned; but the value of his method is independent of it and unaffected by it.

(d) The first part (1902), which alone has yet appeared, of H. v. Soden's elaborate but far from lucid textual Introduction to the NT, *Die Schriften des NT in ihrer ältesten erreichbaren Textgestalt hergestellt auf Grund ihrer Textgeschichte*, has settled once for all, not indeed the whole problem of Euthalian criticism (as the author seems to suppose), but the vexed questions of Euthalius' place and date. In his discussion on Euthalius (pp. 637-682), von Soden prints from an Athos codex (Laura 149, sec. xi. foll. 1-4) a 'confession of Euthalius, bishop of Sulca, concerning the orthodox faith.' The document belongs to the days of the Monothelite controversy, after pope Martin's Lateran Council (A.D. 649), and after the death of Maximus Confessor 'of blessed memory' (A.D. 662), but presumably, since no mention is made of it, before the Sixth Council (A.D. 680). Latin theologians—Ambrose, Augustine, Leo—are cited in this Greek confession of faith on equal terms with Athanasius and Cyril; the mention of the 'Holy Catholic and Apostolic great church of Rome' is given precedence over the mention of the 'four Holy and Œcumenical Synods'; and Western origin is made quite certain, if further proof were needed, when the writer attributes his attack on Maximus, of which he is now making public retraction, to the instigation of John the 'exceptor' or official of the 'duchy,' ὁ ἐκσκέπτωρ τῆς δουκίανης ἀρχῆς, for the term 'ducat' or duchy points to the Western provinces of the Byzantine empire. Thus there can be no doubt that the see of Euthalius is, after all, the only known city bearing a name anything like Sulca—that is to say, Sulci in Sardinia. The difficulty which was naturally felt in making a Greek writer bishop in Sardinia in the 4th or 5th cent. vanishes when we transfer him to the 7th, a period when even Rome, through the closeness of its renewed relations with Constantinople, became for the time half-Greek again.*

What is the effect of von Soden's discovery upon the Euthalian question? Its main result is naturally to enhance the importance of Ehrhard's Evagian discoveries, since Evagrius, even if he was not the person who in 396 put together the *Martyrium Pauli*, is mentioned in the 6th cent. codex H, and is consequently earlier than Euthalius. Dr. Armitage Robinson aimed at rescuing out of the Euthalian congeries such documents as he thought could be attributed to Euthalius himself rather than to his successors, Evagrius or others: our present aim must be the exact converse of this, namely, to discriminate what can be attributed to Evagrius or other predecessors before Euthalius set his hand to the collection. With this view we proceed, firstly, to draw up a list of the Pauline documents contained in Zacagni's edition, and, secondly, to enumerate the sources earlier than the 7th cent. which include any of

* The name has been erased, but there appears to be now no doubt at all as to the original reading.

* It is perhaps worth while in this connexion to call attention to the Laudian MS of the Acts, which we know to have been in Sardinia at some date before 735. The third correcting hand, which is attributed to the 7th cent., added in the margin a series of chapter-divisions which appear to be either those of Euthalius' edition or at least closely related to them.

this Euthalian matter, since so much at least must be earlier than Euthalius himself.

1. *COMPLETE LIST OF EUTHALIAN DOCUMENTS* (with reference to the pages of Zacagni's edition).

(i.) p. 515: *πρόλογος προτασόμενος τῶν ἰδ' ἐπιστολῶν Παύλου*. A sketch of firstly the life, secondly the writings, thirdly the chronology of St. Paul: the latter is summarized, says the writer, from the *Χρονικοὶ Κανόνες* of Eusebius Pamphili, though in fact the *History* of the same author appears to be as largely employed. At the end of the second section of this prologue, the analysis of the Epistles, some indication is given of what the reader may expect to find in the sequel: τὰ μὲν κατ' ἐπιτομήν παρ' ἡμῶν εἰρήσθω περὶ αὐτῶν ἐπὶ τοσούτων καθ' ἑκάστην δὲ συντόμως ἐπιστολὴν ἐν τοῖς ἐξῆς προτάξομεν τὴν τῶν κεφαλαιῶν ἐκθεσὶν ἐν τῶν σοφωτάτων τινὶ καὶ φιλοχρίστῳ πατέρων ἡμῶν πεποιημένῃ· οὐ μὴν ἀλλὰ καὶ τὴν τῶν ἀναγνώσεων ἀκριβεστάτην τομὴν, τὴν τε [v.l. δέ] τῶν θείων μαρτυριῶν εὐαπόδεκτον εὔρεσιν ἡμεῖς τεχνολογήσαντες ἀνεκεφαλαιωσάμεθα ἐπιπορευόμενοι τῇ τῆς ὁφείας ἀναγνώσει· ἐκθησόμεθα δ' οὖν ταύτην εὐθὺς μετὰ τόνδε τὸν πρόλογον. That is to say, immediately after the prologue should come a convenient and summary conspectus of the quotations in the Epistles; while to each several epistle would be prefixed a list of its chapters, taken over from an earlier Father. What the 'exact division of the ἀναγνώσεις' means, whether it was taken over from the earlier Father or, like the list of quotations, was an original work, and in the latter case whether it too came immediately after the prologue, are more difficult questions, the consideration of which must for the moment be postponed.

(ii.) p. 535: *μαρτύριον Παύλου*. A brief statement of the Apostle's martyrdom at Rome, important as containing a note that the interval since the martyrdom was 330 years 'down to the present consulship, Arcadius iv. Honorius III.,' i.e. A.D. 396. One particular class of the MSS contains also the further note that 63 years had elapsed between the last mentioned consulship and 'this present consulship, Leo Augustus I.,' i.e. A.D. 458. In view both of the statements in the prologue (see just above) and of the order of the documents, e.g., in the Naples MS (see p. 528*, below), it is doubtful whether the *Martyrium* is in its proper place here—unless, indeed, it is to be treated (as perhaps it should be) as a mere appendix to the prologue.

(iii.) p. 537: *ἀνεκεφαλαιώσεις τῶν ἀναγνώσεων καὶ ὧν ἔχουσιν κεφάλαια καὶ μαρτυριῶν καθ' ἑκάστην ἐπιστολὴν τοῦ ἀποστόλου καὶ ὅσων ἐκάστη τούτων στίχων τυχάνει*. A summary of the 'lections' for each epistle of the Apostle; and how many chapters, how many quotations, how many verses each 'lection' contains. In this case there is no doubt that the ἀνάγνωσις or lection is a division of an epistle, containing several κεφάλαια or chapters. The στίχος is presumably the measured line of 16 syllables, equivalent to a hexameter verse.* Thus the Epistle to the Romans contained 5 lections, 19 chapters, 48 quotations, 820 verses. It may be added that the number of στίχοι is noted not only for the actual text of the Epistles, but for several of the accompanying documents,—for instance, the prologue is reckoned at 300 στίχοι, the *Martyrium* (not including the second date) at 16 στίχοι,† the summary with which we are now concerned at 60 στίχοι,—and it may be conjectured that their presence or absence is a criterion which distinguishes one stratum from another in the 'Euthalian' collection.

(iv.) p. 542: *πρόγραμμα*. Introduction (of 7 στίχοι) to No. v. (summary table of Scripture quotations), explaining the use of black and red numerals in

the following table [this will be best understood from a concrete case; see the next paragraph]: every red numeral would be found repeated in the margin of the text itself; the series of both red and black numerals would begin afresh for each epistle.

(v.) p. 542: *ἀνεκεφαλαιώσεις θείων μαρτυριῶν* (78 στίχοι). Carrying out the rules just given, the table begins as follows: 'In the Epistle to the Romans xlviii. [quotations]; Genesis vi., namely, 6, 8, 9, 11, 12, 13; Exodus iii., namely, 15, 16, 40,' and so on, meaning that the six quotations from Genesis are the 6th, 8th, 9th, 11th, 12th, and 13th in order among the 48 OT quotations in Romans. The numbers here represented in *roman* numerals would be black letters in the Greek, those in *arabic* numerals would be red, and the same red letters would be found opposite to the quotations in the body of the text: thus in the margin of Ro 4³ ἐπίστευσεν δὲ Ἀβραὰμ τῷ θεῷ, κ.τ.λ., we should expect ε' Γενέσεως, and of Ro 4¹² πατέρα πολλῶν ἐθνῶν τέθεικά σε, we should expect η' Γενέσεως (the numeral in each case in red), meaning that the quotations came from Genesis, and were respectively the sixth and eighth OT quotations made in the epistle.

(vi.) p. 546. List of the places from which the Epistles were written (12 στίχοι).

(vii.) p. 547. List of the names associated with St. Paul's in the headings to the Epistles (12 στίχοι).

(viii.) p. 548: *πρόγραμμα* (not reckoned by στίχοι). Introduction to No. ix. (second or fuller table of Scripture quotations), explaining that all St. Paul's quotations would be found written in full, with the name of the book from which each was taken, and with two numbers, red and black respectively: the red signified the place in the series of quotations contained *in* that particular epistle,—a fresh reckoning in red beginning with each epistle,—while the numeration in black was continuous throughout the Epistles, and signified the number in the series of quotations taken *from* that particular book of the OT. The same red number (but not the black) recurred in the margin of the text at the point where the quotation was made.

(ix.) p. 549: *ἀνεκεφαλαιώσεις θείων μαρτυριῶν* (not reckoned by στίχοι). To illustrate the above rule, let us turn to the table for 1 Corinthians, and we should find it begin somewhat thus: Α' Ἡσαίου προφήτου ΙΕ' ἀπολὼν τὴν σοφίαν τῶν σοφῶν καὶ τὴν σύνεσιν τῶν συνετῶν ἀθετήσω, where the Α' would be in red, signifying the first quotation in 1 Corinthians, and the ΙΕ' in black, signifying the fifteenth quotation from Isaiah, fourteen having been marked already in Romans.* Now it seems obvious that (viii.) (ix.) are not additional to, but a substitution for, the other table of Scripture quotations described above (iv.) (v.): the title is the same, πρόγραμμα: ἀνεκεφαλαιώσεις θείων μαρτυριῶν: the use of the red numbers in the summaries and in the margin of the text is the same, but the use of the black numbers is different and inconsistent: the στίχοι are reckoned for the first table, but not for the second. Either table is useful taken by itself, but the table of No. ix. gives more information than that of No. v.: its black numeration being continuous throughout the Epistles, it enables the reader to see at a glance the total amount of use which St. Paul's writings make of any particular OT book. Which of the two is the table promised in the prologue, is a question we need not yet finally answer; but we shall hardly be wrong in supposing that they represent different strata in the development of the collection, and the natural hypothesis to start from will be that the fuller and more elaborate one is the later.

* See, further, for the meaning of στίχος, p. 527b, below.

† But in the case of the prologue and the *Martyrium* the στίχοι are not given in all of Zacagni's MSS.

* Zacagni inserts a third numeration, which he admits is not in the MSS; he has misunderstood, as Robinson (*Euthaliana*, p. 19) points out, the language of the πρόγραμμα.

(x.) p. 569. List of the 14 epistles of St. Paul; probably connected with what follows.

(xi.) p. 570. 'Why the epistles of Paul are called 14?' This is taken from the same source as the next piece.

(xii.) p. 570: ὑπόθεσις πρώτης πρὸς Ῥωμαίους ἐπιστολῆς (ἡ ἀπὸ τοῦ ἁγίου Παύλου ἐπιστολὴς τῆς πρὸς Ῥωμαίους ἐπιστολῆς). This and the preceding come, as Matthæi and von Dobschütz have pointed out, from the pseudo-Athanasian *Synopsis sacre scripture*. But now that Euthalius is transferred to the 7th cent., there is no reason why matter which 'Euthalian' MSS have borrowed from the *Synopsis* should not have been borrowed by Euthalius himself. These pieces cannot have belonged to the collection in its original, or what we may without prejudice call the Evagrian, form: that they came to it through Euthalius himself is probable enough, but is one of the many things that cannot be decisively asserted until we have more knowledge of the MSS. None of the last three pieces are reckoned by στίχοι.

(xiii.) p. 573: ἐκθεσις κεφαλαίων καθολικῶν καθ' ἐκαστὴν ἐπιστολὴν τοῦ Ἀποστόλου, ἐχόντων τινῶν καὶ μερικὰς ὑποδιαίρεσεις τὰς διὰ τοῦ κινναβάρους. 'List of all the chapters in each epistle of the Apostle, some chapters having also subdivisions; and such subdivisions are marked in red.' Nothing follows this title in Zacagni's edition; and it is on the whole probable that nothing was meant to follow, but that the title serves as a general introduction to the chapter-lists which precede each individual epistle. That for the Romans immediately follows.

(xiv.) p. 573: κεφάλαια τῆς πρὸς Ῥωμαίους ἐπιστολῆς ιθ' (37 στίχοι). In the list which follows, one chapter, the 17th, has subdivisions: in other epistles—their κεφάλαια (together with the pseudo-Athanasian *argumenta*) are given later on in Zacagni—subdivisions are rather more frequent. There can be no doubt that these chapter-lists correspond exactly with the scheme outlined under No. xiii.

(xv.) p. 576: *variae lectiones* to the Epistles.—What ought to have appeared here is the text of the Epistles as contained in the Euthalian MSS: but, in order no doubt to save space, Zacagni only collated them with J. Morin's Paris NT (A.D. 1628). This list of various readings does not concern us, save in so far as we may note that every 50th στίχος is marked in the margin (Ro 1st στίχοι ν', 2nd στίχοι ρ', and so on), and that each epistle has a subscription signifying (a) its place of writing—cf. No. vi. above,—and (b) the number of στίχοι contained in it;* generally also (c) its bearer. Thus for 1 Corinthians, Ἰπρὸς Κορινθίους α' ἐγράφη ἀπὸ Φιλίππων διὰ Στεφανῆ καὶ Φορβονόαντον καὶ Ἀχάϊκον καὶ Τιμοθέου στίχοι ὡς (870): for Titus, Ἰπρὸς Τίτον τῆς Κρητῶν ἐκκλησίας πρῶτον ἐπίσκοπον χειροτονηθέντα ἐγράφη ἀπὸ Νικοπόλεως τῆς Μακεδονίας στίχοι ρς' (107).

2. SOURCES EARLIER THAN THE SEVENTH CENTURY WHICH INCLUDE ANY EUTHALIAN MATTER.—To show how much of all this matter is earlier than Euthalius we have the direct evidence of the fragmentary 6th century MS of the Pauline epistles known as H, reinforced up to a certain point by the Naples codex, and the less direct evidence of various Syrian MSS of the Epistles written between 400 and 625 A.D., as well as the dates contained in the *Martyrium Pauli*.

(a) Codex H was once a complete MS of the epistles of St. Paul, and belonged apparently before the end of the 10th cent. to the monastery of Athanasius on Mount Athos, where it was taken

to pieces, and the leaves, or many of them, were employed in the binding of other MSS. The leaves thus distributed accompanied of course the MSS with which they had been incorporated, and are now dispersed throughout Europe: of the 41 leaves known to exist, 8 are still at Athos, 22 are at Paris, 2 at Turin, and the remaining 9 in various Russian libraries. Portions of nine epistles are preserved, the only ones unrepresented being Romans, Ephesians, Philippians, 2 Thessalonians, Philemon. The signatures μς' and μθ' (46 and 49) have been deciphered at He 12¹² and 1 Ti 6¹¹ respectively: from which it may be reckoned that each gathering contained nearly three pages of Westcott and Hort's smaller edition; and that, as the whole matter down to He 12¹² occupies about 122 pages in that edition, while 46 gatherings would be equivalent to 130 pages, the MS must have originally contained enough in the way of additional or prefatory matter, other than κεφάλαια,* to account for the balance between the two figures. A complete transcription of all the 41 leaves was published in 1889 by M. Henri Omont (*Notices et Extraits*, xxxiii. 1); Dr. Robinson in his *Euthali-ana*, pp. 48–69, added parts of 16 more pages, which he restored from the 'set-off' or traces which these pages, before they were lost, had left of their text on the pages that were originally next to them. From these two sources, combined with Dr. Ehrhard's paper, it results that codex H is distinguished by the following characteristics:—

α. The manuscript is written in 'sense lines.' At a time when manuscripts were written without anything like a developed system of punctuation, some imitation of the arrangement that already existed for the poetical books of the OT was one obvious means of filling the gap; the end of each στίχος, or 'verse,' was made to correspond to some sort of break in the sense, and, so far, was more or less equivalent to a comma. But as the original στίχος was the hexameter line, and this always remained the standard by which in ordinary cases the size of books or chapters was calculated, the sense στίχος naturally aimed at something like the same average length, and was therefore often a good deal shorter than the modern interval between comma and comma. Conversely, it was much longer than the actual line of a MS written, as so many uncial MSS were written, in narrow columns. In codex H itself (to judge from Dr. Robinson's transcriptions) the line in the literal sense never contains more than 21 letters, and the στίχος—which is distinguished by beginning further out to the left than the lines in the middle of a στίχος do—covers one, two, three, or sometimes even four, lines: the average is a little over two lines, and apparently about 37 letters.

β. To each epistle of which the commencement is extant is prefixed a table of κεφάλαια: the whole of that for 1 Timothy (α'-ιη'), and part of those for Galatians (ι'-ιβ'), Hebrews (ζ'-ια'), and Titus (β'-ε'), are preserved. In two instances, chapters ζ' and θ' of Hebrews, subdivisions are also marked, α' β' γ' in the first case, β' only in the second: these subdivisions are marked in red (Robinson, p. 66). Thus we have here substantial equivalence between codex H and Zacagni, Nos. xiii., xiv.

γ. At Col 2¹ and 3⁵ the letters ε' and θ', at 2 Ti 2¹ and 2³† the letters γ' and δ', at Tit 2¹ the letter γ', are legible in the margin, indicating the commencement in the text of the chapters marked by the corresponding numbers in the list. It does not appear that Zacagni's apparatus anywhere

* The κεφάλαια are included in the reckoning just made, since the three gatherings on which that reckoning is based contain the κεφάλαια for 1 Timothy, reckoned at 22 στίχοι.

† See the supplementary notes to M. Omont's transcript in Robinson, p. 63.

* The following is the Euthalian stichometry for the text of the Epistles, as collected out of Zacagni: Romans, 920; 1 Corinthians, 870; 2 Corinthians, 690; Galatians, 293; Ephesians, 312; Philippians, 208; Colossians, 208; 1 Thessalonians, 193; 2 Thessalonians, 106; Hebrews, 703; 1 Timothy, 230; 2 Timothy, 172; Titus, 107 [but codex H gives 97]; Philemon, 47.

definitely promises that the chapters should be marked in the body of the text; but the analogy of the procedure with regard to the OT citations demands it; and the fact that Zacagni, in his Latin translations of the chapter-tables, inserts throughout the references to our own chapters and verses, seems to show that his MSS do actually mark the commencements in question.

δ. The OT quotations in the text are noted in the margin, and are clearly intended to be numbered through for each epistle. Thus at 1 Co 10²⁶ we have *α' ψαλμ. κγ'* (i.e. Ps 23, eleventh quotation in the epistle), and at He 2¹² *θ' ψαλμ. κα', 2¹³ ι' Ἡσαίου*, 2¹⁶ *α' Ἡσαίου* (i.e. Ps 21 supplies the ninth, Isaiah the tenth and eleventh quotations for the epistle); if at He 1⁵ 6⁷ 8 we have only *Βασιλ., Δευτερονομ., ψαλμ., ψαλμ. μδ'*, this shows that the system is not systematically carried out, and confirms what other indications suggest, namely, that codex H is not an original, but a copy, and that always an accurate copy. To which of Zacagni's two tables of OT quotations—Nos. iv., v., or Nos. viii., ix.—these marginal annotations correspond, there is so far nothing to decide.

ε. The number of *στίχοι* is noted at the end of each chapter-table, and at the end of the text of each epistle. Thus the *κεφάλαια* for 1 Timothy are 22 *στίχοι*, for Titus 8; the text of Hebrews contains 703, that of Titus 97. That every 50th *στίχος* was also noted in the margin our authorities do not apparently say; but the Naples codex (see immediately below) proves that Evagrius included that method in his system, and codex H is through its subscription connected clearly enough with Evagrius. In the case of the chapter-tables, as also of all documents such as the prologue, the *Martyrium*, and the like, there can be no doubt that the *στίχος* was the line of hexameter length (reckoned equivalent to 16 syllables or 36 letters): but it is possible that for the text of the epistles, arranged as it was in sense *στίχοι*, these latter were themselves taken as the basis of calculation. The practical difference would not be great, for we have seen (p. 527^b, above) that the sense *στίχος* in codex H averaged about 37 letters.

ζ. The subscriptions to the individual epistles contain, besides the number of *στίχοι*, similar historical data to those given in Zacagni. Thus for Titus: *Παύλου ἀποστόλου ἐπιστολὴ πρὸς Τίτον τῆς Κρήτῳ ἐκκλησίας πρῶτον ἐπίσκοπον χειροτονηθέντα ἐγράφη ἀπὸ Νικοπόλεως τῆς Μακεδονίας*, as in Zacagni (p. 527^a, above).

η. The subscription to the whole MS records that 'I [Evagrius*] wrote for public use this volume of Paul the Apostle in *στίχοι* to the best of my ability, with a view to making reading easier for our brethren . . . and the book was compared with the copy at Caesarea in the library, written by the hand of the holy Pamphilus.'

(b) We have seen that codex H, to judge from its size, must in all probability have contained prefatory matter before the text and *κεφάλαια* of the Epistles; and some light is thrown upon this question of the apparatus of Evagrian MSS by the only other MS yet known which contains Evagrius' name, Naples ii. a 7; though, as the MS is of later date than Euthalius, it must not be too hastily assumed that all its contents are Evagrian rather than Euthalian. Unfortunately, our knowledge of the details of its text is not yet complete; but the old Naples catalogue of 1826 (*Codices graeci MSS regiae bibliothecae Borbonici descripti atque illustrati a Salvatore Cyrrillo*, pp. 13-24) enumerates the following contents:—Fol. 1, prologue of Euthalius to the Acts, but without his name; fol. 3, second prologue to the Acts *πάσαι καὶ προσάλλαι . . . πεποίηται ταύτην*—this has now been published in

* As restored by Ehrhard, see above, p. 525^a.

the *American Journal of Theology* (ii. [1898] 353-387) by Dr. E. von Dobschütz, who assigns it, apparently on good grounds, to Theodore of Mopsuestia's commentary; fol. 7, list of chapters, and summary of OT citations, in Acts; fol. 11, text of Acts; fol. 41, [Euthalian] prologue to the Catholic epistles; fol. 42, *argumenta*, lists of chapters, and text of the Catholic epistles; fol. 56, [Euthalian] prologue to the Pauline epistles, followed by the summary of lections (Zacagni, Nos. i. and iii.); fol. 66, *argumenta*, lists of chapters (Zacagni, Nos. xii. and xiv.), and text of the Pauline epistles, followed by the *Martyrium Pauli* (Zacagni, No. ii.) and the note *Εὐάγγελος ἔγραψα* (as in codex H, save that the *Navigatio Pauli, ἐκατόνταρχος . . . ἀντιέχθησαν*, is intercalated into the middle of it); fol. 122, the opening chapters of the Apocalypse. Thus the name Euthalius seems not to appear anywhere in the MS, while the name Evagrius appears in the note which concludes the Pauline matter. But we further learn from other sources (see Robinson, p. 6) that yet a second note contains the name Evagrius, namely, that which is appended to the summary of lections: in Zacagni, p. 541, this is in the first person, but anonymous; in the Naples MS it runs, 'I, Evagrius, have distinguished the lections, and have made an accurate stichometry for the whole book of the Apostle by marking every 50th *στίχος*, and have set out the chapters of each lection and the citations contained in it, and also the number of *στίχοι* in the lection.'

Thus the testimony of the Naples MS, late as it is, definitely vindicates for Evagrius, and therefore for the pre-Euthalian edition of St. Paul, something more than codex H in its mutilated condition was able to do, namely Zacagni's No. iii. Putting the evidence of the two MSS together, we see that before the year 600—and if we are right in treating codex H as already a rather corrupt exemplar of the edition, we might say before the year 500—a certain Evagrius published an edition of the Pauline epistles, with the text arranged 'colometrically' in sense lines; with OT references marked in the margin, and numbered through for each epistle; with an elaborate arrangement of chapters and subdivisions of chapters in black and red; with calculation of the stichometry, not only of the text itself of the Epistles (guaranteed by a mark at every 50th *στίχος*), but even of the editor's chapter headings; with a subscription to each epistle giving geographical and personal information; and, finally, with some prefatory matter, including at least a continuous table of 'lections' for the whole series of Epistles, in which the number of chapters, citations, and *στίχοι* contained in each lection was separately enumerated.

(c) In attempting to fix with more precision the date of the edition of Evagrius, the evidence of the early Syriac MSS of the Pauline epistles will have to be taken into account. Wright's British Museum catalogue comprises several MSS anterior to the time of Euthalius, and three or four of them may possibly contain Euthalian matter. Cod. cxxxiii. (Add. 14476), saec. v.-vi., divides Romans into 21 sections by Greek letters, and has a further mark, found occasionally throughout the Epistles, consisting of a single Syriac letter; but no details are given which would make it possible to say whether or no these are Euthalian (Evagrian) chapters. Cod. cxxxiv. (Add. 14480), saec. v.-vi., has the same place-colophons as Evagrius,—including 1 Corinthians 'from Philippi of Macedonia,' and 1 Timothy 'from Laodicea,'—and also a reckoning of the *στίχοι* for each epistle. In cod. cxxxviii. (Add. 14477), saec. vi.-vii., the colophons give not only the place of writing and the number of *στίχοι*, but also in each case the bearers of the

epistle; * and for 2 Timothy, Titus, and Philemon the same personal details as in Zacagni's text (and therefore in the case of Titus, see p. 528^b, above, the same as in codex H). On the other hand, the stichometry of these MSS does not appear to coincide with that of Euthalius. Finally, cod. exli. (Add. 14478), A.D. 622, has marginal notes, indicating the sources of the Apostle's quotations, which would seem to be of 'Euthalian' (Evagrius) origin. Further investigation of this line of inquiry, which promises to be not without fruit, must be left to Syriac scholars; but even without Syriac evidence there is ground enough on the Greek side to push back the Evagrian nucleus of the Euthalian edition into the 5th century.

(d) This being so, the witness of the *Martyrium Pauli* to a precise dating at the end of the 4th cent. acquires enhanced importance. It has been seen that that document (Zacagni's No. ii.) is dated by its writer in 396, while one branch of the MS tradition adds the supplementary date of a redactor in 458. The document is so brief that it hardly seems likely to have been borrowed, rather than composed, for the edition of the Epistles; and if it was composed for it, the whole Evagrian edition is naturally brought into immediate connexion with that year. But, again, an Evagrius who was writing in 396 could surely be no other than the well-known theologian and writer who was trained by Basil and his brother Gregory, who, after varied experiences in Cappadocia, Constantinople, and Jerusalem, sought refuge among the ascetics of Nitria and Scetis, where he numbered Rufinus and Palladius among his pupils, and where he poured out book after book, for the benefit of his fellow ascetics, till his death in 398 or 399. One phrase in the Evagrian colophon of codex H, τῶν καθ' ἡμᾶς ἀδελφῶν, suggests that the writer was living the monastic life, and so far would bear out the hypothesis; but it remains a hypothesis still, and nothing is more necessary in threading our way through the mazes of the Euthalian labyrinth than to keep clear the distinction between hypothesis and ascertained fact. The value of such a hypothesis at this stage is rather to suggest lines of inquiry, and to give point and direction to the further investigation of manuscripts which must precede final judgment.

We have now enough material at our disposal to turn back to the list of Zacagni's Euthalian matter (p. 526^a), and to distinguish roughly how much of it is Evagrian, or, at any rate, pre-Euthalian. The true authorship of the first piece, the prologue, is the most difficult, as well as the most important, problem left for discussion, and cannot be settled off-hand. But for the rest a rapid summary will suffice. No. ii. is dated at 396 (458) A.D., and is therefore pre-Euthalian, whether or no it is Evagrian. No. iii. is vindicated for Evagrius by the Naples MS. Nos. iv. and v. go together, as do Nos. viii. and ix.: these two pairs of documents are alternative to one another, and therefore of different authorship; the probabilities are that the one pair is Evagrian, the other Euthalian, and, if so, the simpler method and briefer statement of Nos. iv. and v. indicate the earlier editor. Nos. vi. and vii. may be Evagrian, but are in any case less important. Nos. viii. and ix. are probably, as has just been said, Euthalian's development of Nos. iv. and v. Nos. x., xi., xii. are not Evagrian, and indeed are inconsistent with Evagrius: their source is in the pseudo-Athanasian synopsis; but if we regard Euthalius as a compiler, there is no reason why it should not have been he who engrafted upon the Evagrian stock material borrowed from pseudo-Athanasius. Nos. xiii. and

xiv. are again Evagrian, and so is the apparatus to the text in No. xv.

The time has perhaps hardly come for expressing even a hypothetical view about the authorship of the prologue. If it proceeds from Euthalius, then the 'Father' from whom the system of chapter divisions was taken over (p. 526^a, above) was no doubt Evagrius; if Evagrius himself wrote in these terms, the Father to whom he acknowledged himself indebted may well have been Pamphilus. If Euthalius was the author, then the ἀναγνώσεων royal will probably mean the colometrical arrangement of the text, since that is the sense of the parallel passages in the prologue to Acts; but if Evagrius, then the words most naturally refer to the arrangement by lections, summarized in Zacagni's No. iii., which, as we have seen, was certainly part of Evagrius' work. One would naturally prefer the alternative which would connect the prologue with the earlier Evagrian edition; but it is not impossible that it may prove to be of composite origin—an Evagrian nucleus worked up and developed by Euthalius.

Here, again, little advance can be made without more knowledge of MSS, and it is certainly strange that no attempt has been made to produce a more critical edition than Zacagni's of the Euthalian apparatus. This inquiry may therefore be fitly brought to a close by a tentative and doubtless very imperfect enumeration of early Euthalian MSS—

(1) *Oecumenian MSS with Euthalian apparatus*

INDEX OF THE WRITERS, ETC., DEALT WITH ABOVE.

Acacius of Caesarea, 484^a, b, 489^a, 497^a, 522^a, 524^a.

Acemetae, 513^a, b.

Aetius, 500^b.

Alexander, 'the ancient heretic,' 485^a, 489^b, *

Alexander of Nicea, 522^a.

Alexandrine school. See Clement, Origen, Didymus, Isidore,

Cyril.

Allegory: in relation to Origen, 495^a, 496^a; Diodore, 501^a;

Chrysostom, 501^b; Theodore, 509^a; Isidore, 514^b; Cyril,

516^a; Clement, 521^a.

Amalaris, 510^b.

Ambrose of Milan, 510^b, 511^b, 522^b, 525^b.

Ambrosiaster, 484^a, b, 491^b, 510^b, 511^a.

Anastasius, 489^a, 522^b.

Andrew, 523^a, b.

Antiochene school, 484^b, 497^b, 500^a, b, 501^a, 508^a, b, 512^a, b, 513^a,

516^a, 517^b, 518^b, 519^a. See Theodore of Heraclea, Eusebius

of Emesa, Apollinaris, Eunomius, Diodore, John Chry-

stom, Severian, Theodore of Mopsuestia, Isidore, Theo-

doret, Gennadius, Theodore the Monk.

Antiochus of Ptolemais, 507^a, b.

Apollinarianism, 491^a, 500^a.

Apollinaris of Laodicea, 484^b, 485^a, 487^a, 488^a, 494^a, 495^a, 497^a,

509^a, b, 522^a, b.

Apollonius, 484^b.

* Zacagni's text omits the bearers for Gal., 1 Thess., 2 Thess., 1 Tim., 2 Tim., Titus.

* Clarendon figures indicate that the passage referred to is devoted wholly to the subject in question.

- Aquila, 518^a, 523^b.
 Archelaus the bishop, 522^b.
 Arethas of Caesarea, 485^a, 492^a, 523^a.
 Arianism, 498^a, 500^a, 510^a.
 Asterius, 498^b, 518^a.
 Athanasius, 497^a, 498^b–499^a, 508^a, 522^b, 525^b.
 Athanasius, pseudo-, 527^a, 529^a.
 Augustine, 502^b, 525^b.
 Barsanuphius, 496^b.
 Basil, 486^a, 491^b, 497^a, 498^b–499^a, 500^b, 515^a, 521^b, 522^a, 524^a, 529^a.
 Basilides, 520^b.
 Cæsarius, 497^a, 522^b.
 Carterius, 497^a.
 Cassiodorus, 484^b, 490^b, 499^b, 504^b, 515^a, 520^b.
 Catena, origin, history, characteristics of, 485^a, 487^b–489^a, 495^b, 498^b, 499^a, 500^a, 515^b, 518^a, 521^b–524^a.
 Chrysostom, John, 484^a, 485^a, 486^a, 487^a, 489^a, 495^b, 496^a, 497^a, 498^a, 500^b, 501^b–507^a, 507^b, 508^a, 509^b, 512^a, 514^b, 515^a, 516^b, 517^a, 519^b, 521^b, 522^a, 524^a, 524^b.
 Claudius of Turin, 487^b.
 Clement of Alexandria, 484^b, 486^a, 489^b, 492^b, 497^a, 515^a, 520^a–521^a, 522^a, 523^b.
 Council of Chalcedon (451 A.D.) 503^b, 513^a, 516^a, 517^b, 523^a.

Parallela Sacra, 484^b.
 Paul of Samosata, 509^b.
 Pelagianism, 518^b.
 Pelagius, 484^a, 512^a.
 Pelagius II, pope, 510^a.
 Philip of Side, 497^b.
 Photius: *Myriobiblon*, 497^b, 501^a, 502^a, 503^b, 504^b, 508^b, 509^a, 513^a, 520^a, 521^a; *Commentary on St. Paul*, 485^b, 487^a, 488^b, 489^a, 497^a, 515^b, 519^a, 519^b–520^b, 522^a, 523^a, 524^a, 524^b.
 Pierius, 484^b, 497^b.
 Primasius, pseudo-, 512^a.
 Priscillian, 487^b.
 Rabanus Maurus, 510^b, 511^a.
 Rufinus of Aquileia, 490^b–491^b, 493^b, 494^a–495^b, 496^a, 499^b, 524^b, 529^a.
 Rusticus, 508^b.
 Sedulius Scotus, 510^b, 511^a.
 Severian of Gabala, 485^b, 487^a, 489^a, 495^b, 496^a, 497^a, 507^a–508^a, 512^a, 521^b, 522^a, 524^a, 524^b.
 Severus of Antioch, 489^a, 507^b, 508^a, 513^a, 516^a, 522^a, 523^a, 523^b.
 Shenoute the Copt, 508^a.
 Socrates, 491^b, 500^b, 501^a, 502^a.
 Sozomen, 501^a.
 Stephen Gobar, 513^a.
 Suidas, 501^a.
 Symeon Logothetes, 489^a.
 Syriac, see Translations into.
 Tertullian, 489^a, 510^b.
 Theodore of Alexandria, 510^b.
 Theodore of Heraclea, 484^b, 485^a, 488^a, 497^b–498^a, 498^b, 500^a, 518^a.
 Theodore of Mopsuestia, 484^a, 485^b, 487^a, 488^a, 489^a, 495^b, 496^a, 497^a, 500^a, 501^b, 507^b, 508^a–512^b, 516^b, 517^a, 518^a, 519^a, 521^b, 522^a, 523^b, 524^b, 524^b.
 Theodore the Monk, 487^a, 510^b, 518^b, 519^a.
 Theodore the Reader, 501^a.
 Theodoret, 485^b, 487^a, 489^a, 497^a, 498^a, 503^b, 507^a, 510^b, 512^a, 515^a, 516^a–517^b, 518^a, 519^a, 521^b, 522^a, 524^a, 524^b.
 Theodulus chorepiscopus, 522^a.
 Theophilus of Alexandria, 497^a, 514^b.
 Theophylact, 485^a, 486^a, 487^a, 506^b, 519^b.
 Translations into Latin: [Rufinus] Origen on Romans, 490^b–491^b; Pamphilus, *Apologia pro Origene*, 491^b, 493^b, 496^a, 518^a; [Jerome] passages from Origen on Galatians, 492^a; on Ephesians, 494^a–495^b; on 1 Thessalonians, 496^a; on Philimon, 496^a; from Theodore of Heraclea on 1 Corinthians, 498^a; from Didymus on 1 Corinthians, 499^b; from Apollinaris on Ephesians, 500^a; from Diodore on 1 Thessalonians, 501^a; [Facundus] passage from Theodore of Mopsuestia on Romans, 510^a; [anonymous] Theodore of Mopsuestia on Galatians–Philimon, 508^b, 510^b–511^b; [Cassiodorus] Clement of Alexandria on the Catholic epistles, 520^b.
 Translations into Syriac: Chrysostom, 505^a; Theodore of Mopsuestia, 508^a, 509^a, 518^a; letters of Isidore, 513^b; Cyril, 515^a, 516^a; passage from Occumenius, 523^b; 'Euthalian' apparatus to Pauline epistles, 528^b.
 Valentinians, 484^a, 489^b.
 Victorinus Afer, 484^b, 487^b.
 Victorinus of Pettau, 500^b.
 Vigilus, pope, 508^b, 510^a.

LITERATURE.—Books dealing only with individual writers have been mentioned in the text of the article, and are not named again here. Those of wider scope may be classified as (1) books on Patristic literature in general, and (2) books on Patristic exegesis in particular.

(1) For the ante-Nicene writers: Harnack's *Geschichte der altchristlichen Literatur bis Eusebius: Erster Theil, Die Ueberlieferung und der Bestand* (2 vols. Leipzig, 1893) is of course invaluable; the parts which touch most nearly the subject-matter of this article fell to the share of Harnack's assistant, Dr. E. Preuschen of Darmstadt. Smith and Wace's *Dictionary of Christian Biography* (4 vols. London, 1877–1887) has been of much service, though it is marred by some curious omissions and inequalities, and is often weakest just on the critical and bibliographical side; but the general level is high, and the articles on Origen and Theodore of Mopsuestia raise it higher still. Dr. O. Bardenheuer's *Patrologie* (ed. 2, Freiburg im Breisgau, 1901) is a most useful book: the reissue in a greatly enlarged form has not, unfortunately for the present purpose, advanced as yet beyond the second volume and the Council of Nicaea. Tillemont's *Mémoires pour servir à l'histoire ecclésiastique des six premiers siècles* (Paris, 1693–1712), two hundred years old as it is, has never been superseded for the post-Nicene period, and is still for many purposes the best authority.

(2) For the history of Patristic exegesis there is little to enumerate. The present writer is acquainted with nothing in English that goes further than the brief account appended by bishop Lightfoot to his commentary on the Galatians (ed. 5, pp. 227-236): in this, as in every contribution of Lightfoot's to Patristic studies, new ground was broken, but the material is more abundant now than when he wrote. Much more abundant, therefore, is it than it was when Richard Simon, priest of the Oratory and founder of the science of Biblical Criticism, gave to the world his *Histoire critique des principaux commentateurs du Nouveau Testament* (of which about half is devoted to the Patristic commentators, Greek and Latin), Rotterdam, 1693: nor is its age quite the only drawback to its usefulness, since its obvious interest in the Jansenist controversies of its day perhaps detracts something from its critical value. Yet it remains, and always must remain, worthy to be named with Tillemont's *Mémoires* as one of the noblest fruits of the rich harvest of French Patristic scholarship in the age of Louis the Great, and the present article owes not a little to its inspiration.

[Among the friends who have assisted him, the present writer renders his grateful thanks to Dr. Sanday, who has found time to read through the whole of the proofs; to Mr. E. W. Brooks, who has kindly verified several points in regard to Syriac MSS in the British Museum; and to the Rev. C. Jenkins, who has undertaken most of the thankless task of verifying references. He must make, however, further and special mention of his indebtedness to Dr. G. Mercati of the Vatican Library, to whom he owes not only more information about Vatican Catena than has yet appeared in print, but also a reference to the discovery of Oecumenius' commentary on the Apocalypse, which has an important bearing on the date of the Oecumenian Catena on St. Paul. The printing of the article had advanced too far for the new information about Oecumenius to be incorporated at its proper place; and to the same cause is due the insertion, on pp. 520, 521, of the section on Clement of Alexandria, it having been omitted by the writer's oversight on p. 459. For these and for any other unevennesses it is hoped that indulgence may be claimed in view of the difficulties attaching to labour in a field where the ground has been left so long untilled.]

C. H. TURNER.

CONCORDANCES.—When the minute verbal comparison of one passage of Holy Scripture with another was felt to play a necessary part in arriving at the proportion of faith, and, in later times, at a proper critical treatment of the text, and especially when the Bible was treated more as a whole than as a collection of books of varying dates and composition, the need for more or less exhaustive Concordances was immediately felt, and it was not long before attempts were made to provide for the need. This was rendered the more easy by the printing of the text divided into verses as well as chapters. Alphabetical lists of words occurring in the sacred books were drawn up, as well as lists of the passages in which they occurred, with the salient words of the context, such as are given in Cruden's *Concordance to the AV*. These lists of words varied in their degree of completeness; but no Concordance can reasonably be expected to contain every quotation of every word; e.g. in an English Concordance such words as 'and,' 'the,' etc., are omitted. The interest taken in this accumulation of evidence about the occurrence of words and phrases is testified to by the fact that, for instance, in the case of Concordances to the LXX there are not only several which have been published, but there is certainly one unprinted in the Library of Trinity College, Dublin,* by Dr. Ambrose Aungier, Chancellor of St. Patrick's Cathedral. There is also in existence a MS Hebrew Concordance by Elias Levita, compiled in the 16th century.

For the purposes of the present volume it will be useful to supply a list of Hebrew, Greek, Latin, and English Concordances to the Bible, giving the titles of those now most constantly in use, and of some of the earliest ones that seem to have been published.

i. HEBREW.—*Concordantiae sacrorum bibliorum Hebraicorum* . . . auctore Mario de Calasio (Rome, 1621) [this was based on Isaac Nathan's earlier work, which was first published at Venice in 1564, more than a hundred years after its compilation]; Fuerst, *Librorum Sacrorum Veteris Testam-*

menti Concordantiae Hebraicae atque Chaldaicae (Leipzig, 1840); Davidson, *Concordance of the Hebrew and Chaldaic Scriptures* (Bagster: London, 1876); Mandelkern, *Veteris Testamenti Concordantiae Hebraicae atque Chaldaicae* (Leipzig, 1896). A smaller edition of the last work, without quotations, was published at Leipzig in 1897.

ii. GREEK.—(1) *SEPTUAGINT*.—*Concordantie Veteris Testamenti Graecae Hebraeis vocibus respondentes* . . . auctore C. Kircheri (Frankfort, 1607); Trommius, *Concordantie Graecae versionis . . . LXX Interpretum* (Amsterdam); *Handy Concordance of the Septuagint*, without quotations (Bagster, 1887). All these are now more or less superseded by Hatch and Redpath's *Concordance to the Septuagint, and other Greek Versions of the OT* (Clarendon Press, 1892-1897), with its two supplemental fasciuli, of which one, containing the proper names, is already published, and the second is on the eve of publication.

(2) *NEW TESTAMENT*.—*Novi Testamenti Concordantie Graecae* . . . (Basle, 1546); Bruder, *Concordance* (2nd ed., Leipzig, 1853); Moulton and Geden, *Concordance to the Greek Testament*, according to the Texts of Westcott and Hort, Tischendorf and the English Revisers (Edinburgh, 1897).

iii. LATIN.—The Concordance of Hugo de Sancto Caro (1244; revised 1290); *Concordantie maiores biblicae tam dictionum declinabilium quam indeclinabilium* [by Sebastian Brant] (Basle, 1496); Dutripon, *Concordantie Bibliorum Sacrorum Vulgatae Editionis* (Paris, 1838); Cooraert, *Concordantie librorum Veteris et Novi Testamenti . . . juxta Vulgatae Editionem* (Bruges, 1892).

iv. ENGLISH.—*A Concordance, that is to say, a work wherein by the order of the letters of the A.B.C. ye may redely finde any word conteigned in the whole Bible* . . . [by J. Marbeck] [London] 1550; Cruden, *A Complete Concordance to the Holy Scriptures* (1st ed.), London, 1738. Upon this almost all later Concordances have been more or less based; T. Taylor, *A New Concordance to the Holy Scriptures* (1st ed., York, 1782); Eadie, *A New and Complete Concordance to the Holy Scriptures*, on the basis of Cruden's (1st ed., Glasgow, 1840); R. Young, *Analytical Concordance to the Bible . . . containing every word in alphabetical order, arranged under its Hebrew or Greek original* (Edinburgh, 1879 [-84]); Strong, *The Exhaustive Concordance of the Bible, together with a comparative Concordance of the AV and RV* (Hodder & Stoughton: London, 1894). In the *Comprehensive Concordance to the Holy Scriptures* (London, 1895) is to be found a 'Bibliography of Concordances,' by Dr. M. C. Hazard.

A Concordance to the NT in English was published by T. Gybson [London] in 1535. *A Complete Concordance to the Revised Version of the NT* . . . by J. A. Thoms, was issued by the S.P.C.K. (London) in 1884.

For a fuller account of Hebrew Concordances, see art. 'Concordance' in the *Jewish Encyclopedia*, to which the present writer is indebted for certain statements in this article. For further details concerning Greek Concordances, see *Expositor*, 5th series, vol. iii. (1896) p. 72; and for an account of Cruden and his labours, see the article 'Cruden' in the *Dictionary of National Biography*.

 - Literature, p. 583^a.

At the outset of an account of the religion of Babylonia and Assyria one is impressed by the circumstance that, with the single exception of the religion of the ancient Hebrews, there is no one of the religions of antiquity known to us that enables us to trace more satisfactorily the growth of religious ideas among a people, from a crude polytheism based on nature worship and accompanied by primitive rites, to a striking approach towards a monotheistic conception of the Universe, with a highly complicated priestly organization, and an elaborated theological system. There is also no other ancient religion—not even that of Egypt—which may lay claim to having exercised so large a measure of influence over surrounding nations, shaping as it did the myths and legends of the Hebrews, Phœnicians, and Greeks alike, showing its traces also in the religion of Egypt, and contributing in various ways to the systems of religious thought produced in the ancient East and West. Hardly less remarkable is the antiquity of the religion of Babylonia and Assyria, which became an important factor in the religious history of mankind as early at least as the third millennium B.C., and practically finished its rôle before Hebrew monotheism asserted itself.

These considerations fully justify the efforts put forth by the past two generations of scholars and continued by the present generation in the task of recovering for science the long-lost and forgotten sources for the study of this religion. And while we are not yet in a position to follow in detail the history of the movement, in connexion with the general culture that took its rise in the Euphrates Valley and subsequently spread northwards to the district more properly known as Assyria, more than enough material is forthcoming to furnish the basis for a satisfactory account of the pantheon, of the doctrines and rites, and of the literary productions that are an outcome of the spirit pervading the religion itself. More than this, we can with measurable certainty distinguish between certain periods in the history of the religion,

and can indicate political and intellectual factors that contributed to the gradual transformation of certain doctrines, while in a general way the literary process involved in the production of rituals, epics, myths, and legends can now be determined.

i. THE SOURCES.—Until the middle of the 19th cent. our sources for the religion of Babylonia and Assyria were a few scattered notices in a number of classical and other authors, notably Herodotus, Eusebius, and Syncellus, and in the compilation of the Jewish Rabbis known as the Talmud, and some incidental though valuable allusions in the historical and prophetic portions of the Old Testament. Through the excavations so successfully conducted by French, English, American, and German explorers in the mounds scattered along the banks of the Tigris and in the Euphrates Valley,* since the year 1842, these notices and allusions have been relegated to the rank of secondary sources, and, instead, we have now, as primary sources, the unearthed temples and palaces of Babylonia and Assyria, with their statues, furnishings, and inscriptions, and, above all, the abundant literary archives found in the mounds. The royal library, more particularly, collected by king Assurbanipal (668-625 B.C.) in his palace at Nineveh and unearthed by Layard and Rassam (1849-1854),† contained thousands of tablets with contents of a directly religious character—incantations, omens, myths, legends, hymns, prayers, and entire rituals, while the affiliation existing in Babylonia and Assyria between religion on the one hand, and astronomy, medicine, and even law, on the other, also renders other portions of the library, which ranges over numerous branches of literary activity, valuable as sources for the study of the Babyloano-Assyrian religion. The library at Nineveh, though dating—at least for the greater part—from the days of Assurbanipal, represents a considerably older literature; for, as the king frequently informs us in the subscriptions of the tablets, the collection was formed by having copies made through his scribes from originals that existed in Babylonian archives. This statement carries with it the important corollary that Assurbanipal's library represents the remains of a literature produced not in Assyria but in Babylonia; and, in confirmation of this, many tablets have been found in the course of excavations in mounds in Babylonia proper, which are either duplicates of those in the Nineveh collection, or supplement them. The character of the writing, apart from other evidence, on some of these Babylonian 'originals' would justify us in carrying the literary activity of the scribes of the south back to about two millennia before the days of Assurbanipal, while the discovery‡ of extensive literary archives in connexion with the American excavations at Nippur, the tablets of which are all said to be earlier than the third millennium before our era, warrants an even earlier date for the beginnings of Babylonian literature.

* See the bibliographical references attached to articles ASSYRIA and BABYLONIA in vol. I., to which must now be added (1) Rogers' *History of Babylonia and Assyria* (New York and London, 1900), which contains (vol. I. pp. 1-253) the best detailed account of the excavations; (2) Hilprecht's *Explorations in Bible Lands* (Phila. 1903), pp. 3-577, supplementing Rogers in some particulars, and containing a full though severely criticised account of the excavations at Nippur; and (3) the *Mittheilungen der Deutschen Orient. Gesellschaft* (1898 to date), furnishing regular reports of the German excavations in and around the city of Babylon, which are to be extended also to other mounds in Babylonia and Assyria.

† For an account of this library, see, e.g., Kaulen, *Assyrien und Babylonien* (5th ed., Freiburg, 1899, ch. vii.); Menant, *La Bibliothèque du Palais de Ninive* (Paris, 1880); and, above all, Bezold's invaluable catalogue of the Cuneiform Tablets in the Kouyunjik Collection (London, 1889-99, 5 vols.).

‡ See Hilprecht's *Explorations in Bible Lands* (Philadelphia and Edinburgh, 1903), pp. 511-532.

Roughly speaking, all the more important literary productions in Assurbanipal's library were in existence before the year 2000 B.C., while many are no doubt considerably older.

In the south, where the religious literature grew up in connexion with the activity of the Babylonian temples, the latter formed the natural depositories for these collections, just as in the temples, as the courts of justice and as the centres of astronomical and medical science, the official legal archives and the extensive scientific collections were kept. It is characteristic of the general relationship of Assyria to Babylonian culture that the Assyrian monarch was not only obliged to import his literature from the south, but in doing so made the palace the depository for this foreign product instead of the temple. The zeal which animated him in sending his scribes to ransack the libraries of the south was neither literary nor religious, but due to a political and in part also to a personal ambition to emphasize, by a transfer thither of the culture of the south, the complete ascendancy of Assyria as the dominant power, and as the legatee of the civilization that arose in Babylonia. Along with this civilization, the religion of the south was also carried to the north; and while, in so far as the pantheon is concerned, the Assyrians manifested a certain originality, and while the northern scribes also made contributions to the religious literature, in all but minor details the views and doctrines embodied in these productions are identical with those developed in the theological and religious centres of the south. Thus for all practical purposes the religion of Assyria may be regarded as identical with that of Babylonia. This identity extends to the cult, which naturally presented variations in each centre of both the south and the north, but which was everywhere based upon the same conceptions of the relationship between man and the higher Powers, and reflected the same general religious doctrines.

ii. EARLY HISTORY OF BABYLONIA AND ASSYRIA.—As a preliminary to an understanding of the religion of Babylonia and Assyria, it is essential to have clearly before us the general course taken by the history of these two countries.

1. The striking feature in the earliest period to which we can trace it, is the frequent change in the position of the political centres. We see the Euphrates Valley at this time divided into a varying number of States or principalities, at rivalry with one another, now the one, now the other exercising a certain supremacy over the whole district, without, however, bringing it into real subjection; while, on the other hand, for indefinite periods several of these States occupy an equal position of importance and prominence side by side, and even enter into compacts with one another. The various States centre each around a city, and the growth of the State is essentially the extension of that city. The political importance thus given to the leading towns of ancient Babylonia is further enhanced by the religious significance which is in close union with their political advance; for the deity presiding over a place shares, in accordance with the general view prevailing in antiquity, the fortunes of his subjects. The god, the place of his worship, and his worshippers, are in inseparable contact.

This state of affairs can now be traced back, thanks chiefly to the results of the excavations at Telloh and Nippur, to about 3500 B.C., though it should be added that the chronology beyond 2500 B.C. is still quite uncertain. Hence we can only deal in round numbers for the earlier periods, and indeed, according to some scholars, we are not

justified in passing much beyond 3000 B.C. for the date of the earliest inscriptions as yet found.* In this earliest period known to us we find Eridu, Shirkpurla (or Sirgulla), Ur, Gishban, Nippur, Erech, Larsa, and Isin (or Nisin) among the cities of southern Babylonia occupying a prominent position. In the northern portion, again, lay Kish, Cuthah, Agade, Sippar, and, youngest of all, Babylon. From the testimony of the inscriptions no certain conclusions can be drawn as to the relative age of these centres, for naturally the oldest written document presupposes a long anterior political history as well as a history of civilization, during which period an important rôle may have been played by cities that had disappeared from the horizon before monumental evidence begins; while others that appear to occupy an inferior position may have enjoyed a high degree of supremacy at a time for which no material is as yet at our disposal. Thus we have every reason to believe that a town Eridu, which lay on the Persian Gulf, must at one time have had control over a considerable section of southern Babylonia, since the cult of the patron deity of that place—the god Ea—survives all the vicissitudes of political fortunes. Down to the latest period of the Babylonian religion, Ea retains in the pantheon a place that is unique and almost inexplicable, except on the supposition that the political importance of the place gave the god his impregnable position. Similarly, while there are other cities in the oldest period that appear to be politically more powerful than Nippur, the chief god of the latter yields to none in the honours accorded to him. He is not only invoked by the rulers of other centres, but becomes known as Bel, 'the lord' *par excellence*; and, long after Nippur has passed into the background of Babylonian history, the old Bel retains his place as the second member in a triad that summed up for Babylonian theologians the quintessence of Divine control of the Universe in the largest sense. Unless totally different conditions prevailed in the period which is still beyond our ken, from those which characterize the relationship between political position and religious supremacy during the entire period for which we now have direct sources at our command, a political predominance of Nippur must likewise have preceded the fame and rank acquired by its patron deity.

The precise order of supremacy exercised by the various political centres has not yet been determined with that degree of certainty which would enable one to speak with perfect definiteness. It is still a matter of doubt whether the seat of the oldest Babylonian ruler at present known to us, En-shag-kush-anna, was Erech or Shirkpurla, though the probabilities are in favour of the latter. The few brief inscriptions that we have from him were found at Nippur, and give expression to the king's homage to En-lil or Bel, while his title 'lord of Kengi' points to control over a large district—perhaps the whole of southern Babylonia. The most serious rival to En-shag-kush-anna was the ruler of Kish in northern Babylonia, and it would appear that not long after the days of En-shag-kush-anna Shirkpurla enters upon a period of dependency upon Kish; its rulers no longer call themselves kings, but *patesis*, i.e. 'governors.' With some interruptions, during which the former conditions are for a time restored, this state of things continues until Kish is obliged to yield its supremacy in turn to other places, first to a centre Gishban, situated not far from Shirkpurla—one of whose rulers, Lugalgaggisi, calls himself 'king of the world,' and claims sovereignty from the Persian Gulf to the Mediter-

* See Winckler in Helmolt's *History of the World* (1903), vol. iii. pp. 8-10.

anean. The glory of Gishban, however, appears to have been of short duration, and we next hear of the kings of Agade, to the north of Kish, extending their rule far into the south, and including in their domain both Nippur and Shirkpura in the south. The most famous of these rulers of Agade were Sargon and his son Naram-Sin, the fame of whose exploits, involving military expeditions to the distant West, survived to a late period, and, becoming enveloped in myth, gave to Sargon more particularly a semi-legendary character.

Of the oldest history of Erech we as yet know little. The names of a few of her rulers whose date falls about or before 3000 B.C. are known, and some of their exploits, which show that this centre succeeded in maintaining its independence, without, however, attaining, within the period for which material is available, to a position of supremacy, except possibly for a short time. On the other hand, the prominence belonging to the chief goddess of the place, Nanâ, who retains an independent position down to the latest Assyrian period (despite the general tendency in both Babylonia and Assyria to consolidate the various goddesses worshipped at different centres in one great goddess, who becomes known as Ishtar), is again an important testimony to the part that Erech as a centre must have played in the political life of southern Babylonia at an early period—perhaps earlier even, as in the case of Eridu and Nippur, than the date of our oldest sources.

Much more satisfactory is our knowledge of another important centre of southern Babylonia, Ur, whose existence can also be traced back to about 3000 B.C. Its kings about this time secured control over Shirkpura. While the kingdom of Ur, with a frequent change of dynasties, maintains itself down to c. 2600 B.C., it was obliged at times to yield in rank to other cities—at one period to Isin, probably to the north of Erech—some of whose rulers (c. 2700–2500 B.C.) claim control over Ur, Nippur, Eridu, and Erech, and later to a centre, Larsa, which, for a short time at least (c. 2300 B.C.), succeeds in bringing the kingdom of Ur under its immediate control.

2. A new era of Babylonian history opens with the rise of a dynasty in the city of Babylon itself, of which until c. 2300 B.C. we hear nothing at all. Its position in the north is significant as pointing to the gradual shifting of the real centre of the entire Euphrates district in this direction. The sixth member of this dynasty, Hammurabi (c. 2250 B.C.), succeeded in accomplishing the great task of uniting northern and southern Babylonia under one sovereignty, and it is only from his time onwards that we can properly speak of a Babylonian empire. True, efforts were made from time to time by the southern districts—comprised under the term *Chaldaea*—to secure their independence, and the New Babylonian empire, which represents the last, and in some respects the greatest, effort of the Euphrates Valley to rise to a position as a world-empire, was founded by Chaldaeans; but, amidst all the vicissitudes of the seventeen centuries following Hammurabi, Babylon maintains its position as the capital of the country, while the old centres, Eridu, Nippur, Ur, Erech, Larsa, Sippar, retain their importance as religious centres merely, or, as in the case of Shirkpura, Kish, Gishban, Agade, and Isin, disappear from the foreground of history entirely. We are able to distinguish a large number of dynasties ruling with Babylon as a centre from c. 2400 to 539 B.C. Not all of these, however, are of Babylonian origin. Indeed, the very first dynasty to which the position of Babylon as the permanent centre of the Euphrates Valley is due, represents a foreign invasion of the country from the interior or the western coast of Arabia, and

marks the triumph of a migratory movement from this direction that had probably been going on for some time before the *dénouement* is reached under Hammurabi, c. 2250 B.C. The successors of Hammurabi maintain their supremacy till c. 2100 B.C., when they are forced to yield to invaders who appear to have come likewise from the south.

3. About 400 years later, foreigners from the east, who call themselves Kassites, obtain possession of the Babylonian throne, and maintain their supremacy for a period of 576 years (c. 1730 to c. 1150 B.C.); and, although the Kassite rulers manifest particular devotion to Nippur and its deity, Babylon still remains the political centre and the seat of government. At last the Kassites are driven out, and native Babylonians, hailing, as it would seem, from the ancient centre of Isin, mount the throne.

4. From this time onwards internal disturbances and the pressure from the north (where meanwhile a powerful kingdom had established itself, with its centre alternately at Ashur, Calah, and finally Nineveh) are the two factors that determine the changes that the south undergoes in its rulers. About the middle of the 13th cent. the relationship with Assyria,—as this northern kingdom was called,—which had at first been on the whole of a peaceable character, became hostile, and it was soon apparent that the more vigorous northern kingdom seriously threatened the older culture of the south. The steady advance of the Assyrian power, despite periods of retrogression, goes *pari passu* with the decline of Babylonia, until at the close of the 12th cent. an Assyrian ruler, Tiglath-pileser I., reduces Babylonia for a time to the rank of an Assyrian vassal, though it is significant that southern Babylonia or Chaldaea does not come under Assyrian sway. On the contrary, this latter district—divided once more into a number of States, loosely united to one another—maintains a large measure of independence, and at most is forced to pay tribute to Assyria during certain periods. On the whole, however, the political star of the south sinks behind the horizon, and only as the glory of Assyria herself is eclipsed by temporary discomfitures to her military ambitions or by internal dissensions, does Babylonia regain a portion of her former rank. If, despite this general condition of dependence upon the north, Babylonia at least enjoyed the privilege of having native rulers on the throne—with some exceptional periods, when it became a prey to invaders from the south or east, or when the Assyrian kings forced their choice (some favourite general, or their sons or brothers) upon the Babylonians, or in some cases themselves assumed the reins of government,—this was due, in the first instance, to the intellectual and commercial superiority of the south, which could not be set aside by mere force of arms; and, secondly, to the respect inspired by the religious sanctuaries of the south, to which the Assyrians were as fervently attached as the Babylonians, if for no other reason than because of the disasters that they dreaded in case of any offence offered to the great gods of the south,—whose position had in the course of millenniums become independent of the political kaleidoscope.

5. The union of the Babylonian States had definitely secured for the patron deity of the city of Babylon—the god Marduk—his position as the head of the pantheon; and, though attempts were made at times to set Marduk aside in favour of some other god,—Nebo, the god of Borsippa (opposite Babylon), or the old Bel of Nippur, or Shamash, the sun-god of Sippar,—they did not succeed in doing more than temporarily eclipsing the glory of Marduk, who on the whole maintained his position down to the fall of the New Babylonian empire. It is signifi-

cant that, when Cyrus entered Babylon in triumph in the autumn of B.C. 539, the first act of the conqueror was to pay his devotion to Marduk, as whose deputy he claims to act. This commanding position of Marduk in the pantheon is the most notable feature, from the religious point of view, of the period following upon Hammurabi. It opens a new era in the religious history of Babylonia, and forms a convenient dividing line between the oldest and the second period in this history. That it was brought about through a political act, is an illustration of the close relationship in Babylonia and Assyria between political and religious conditions, upon which we have dwelt. With Marduk as the head of the pantheon, it was necessary to regulate the position of the other gods of the great religious centres towards him. The older attempts of the theologians to systematize the pantheon had to be re-shaped in accordance with the state of affairs created by the acknowledgment of Babylon as the centre of government for the entire Euphrates Valley. The old myths and legends, which even before Hammurabi's days had been reduced to writing, were re-shaped so as to accord to Marduk the glory and rank due to him. Older gods, of whom stories were related, had to make way for Marduk, and this was done even at the risk of interfering with the original meaning of the myths.

The subsequent degradation of Babylonia to a position of greater or lesser dependence upon Assyria did not affect the position of Marduk, or the theological system based upon it. The kings of Assyria, when they came to Babylon, paid their homage to Marduk; they made no effort to put their chief deity—Ashur—in Marduk's place, and at most ventured to place the former by the side of the latter in their invocations; and, when the New Babylonian empire was founded by Chaldeans, the rulers, though the two most important representatives of them bore names compounded with the god Nebo (Nabopolassar, Nebuchadrezzar), vied with their predecessors in manifestations of devotion to the great Marduk. The new city of Babylon reared by them was essentially Marduk's metropolis.

6. Turning to the north, we encounter the same close bearing of the political development upon the cult. The rulers of Assyria, the earliest of whom known to us may be placed c. 1800 B.C., set out as *patesis* or 'governors' of the city of Ashur, situated on the Tigris; and it is the god of this place—likewise known as Ashur—who advances in rank with the progress of Assyrian arms. But, while Marduk remains attached to the place where his cult originated, Ashur follows the shifting of the capital of Assyria; and, whether the seat of government is at Calah or at Nineveh, it is Ashur who continues in the new capital his abode, as well as his guidance of the kings and of their armies. Parallel, therefore, to the supremacy of Marduk in the south, we have Ashur standing at the head of the pantheon in the north, from the earliest period to which Assyrian history can be traced back* down to the fall of Nineveh in 606 B.C.; and just as in the south the position of the other gods is regulated with reference to Marduk, so in the north the priests of Ashur engage in a work of systematization which results in establishing a court of deities grouped around Ashur as their king and leader.

iii. RELATION OF THE CULTURE AND RELIGION OF ASSYRIA TO THOSE OF BABYLONIA. — It will

* The existence of a city and district, *A-usar*, identical with Ashur, which represents a later designation of the god as well as of the city and of the district, can now be traced back to the days of Hammurabi. See Scheil, 'Code de Hammourabi,' col. iv. 55-64 (*Délégation en Perse, Mémoires*, iv. (*Textes Elamites-Sémitiques*, ii.)).

have become clear from the above sketch, that, corresponding to the greater age of Babylonia as compared with Assyria, it was in the south that culture was first developed, and from the south was carried to the north. As a matter of fact, despite some contributions to architecture, art, science, and literature made by the Assyrians, the civilization of Assyria is a direct importation from Babylonia, and continues to bear the impress of its southern origin. The temples and palaces of Assyria were modelled upon those in Babylonia, with the important exception, however, that stone was far more liberally employed as a building material in place of clay—which remained the standard material in the south. In sculptural decorations and in statues, more originality was displayed by the Assyrians than in their building constructions, and, as a great military power, it was natural that Assyria should likewise have developed her own methods of attack and defence; but, in all that pertains to the cult and to general religious doctrines, the originality of the Assyrians manifests itself only in the adaptation to their own conditions, of the modes of worship, of the ritual, and of the theology that were the outcome of the activity of a long series of generations of priests serving in the temples of the great religious centres of the south. When Assurbanipal, probably in imitation of an earlier example, resolved to collect a library in his palace, he was obliged to send his scribes to the temples of the south, in the archives of which the literary productions of the past—epics, myths, legends, collections of omens, rituals and magical incantations, hymns and prayers, as well as medical and astronomical compilations—were kept; and it does not appear that either his scribes or those of earlier days added much to this literary legacy, though, naturally, the Assyrian temples had their own rituals, prayers, and oracles specially adapted to Assyrian political and social conditions.

The relationship between the religion of Babylonia and that of Assyria thus resolves itself into an adoption of doctrines, cult, and rites of the south by the north, with such modifications as were called for by the different conditions prevailing in the north, and which led, in the case of the pantheon, to the assignment to Ashur of the place and rank occupied in the south by Marduk after the union of the States of the Euphrates Valley in the days of Hammurabi. We might also express this relationship in terms of a general extension northward of the religion of Babylonia, as a part of the culture that originated in the Euphrates Valley.

iv. ORIGIN OF BABYLONIAN CULTURE.—A question that suggests itself at this point, and which must be considered before we advance to a consideration of some of the details of the religion of Babylonia and Assyria, involves the problem as to the origin of Babylonian culture. At the earliest period to which we can now trace back Babylonian history we already find this culture in an advanced state, and it is safe to assume that its beginnings must be placed as early at least as 4000 B.C.—and it may turn out to be even considerably older. Scholarship is still divided on the question whether the culture is of Semitic or non-Semitic origin. The majority of scholars hold that the earliest settlers in the Valley were non-Semites, to whom the beginnings of the culture, including the invention and development of the earliest script—an essentially hieroglyphic system—are to be attributed. To this people the name Sumerian (or Sumerio-Akkadian) is given, and it is held that the Semites—the Babylonians in the later sense—upon entering the land from the south, adopted this culture, developed it still further, and adapted the script to the expression of ideas in their own Semitic

tongue. This view, however, is opposed by a small but powerful minority, led by the distinguished Prof. Joseph Halévy of Paris, which contends for the Semitic origin of the entire Babylonian culture, including, therefore, the script. The controversy which has raged for many years cannot be regarded as definitely settled,* nor is it likely to be until ethnology is in a position to reinforce or to controvert the arguments drawn by either side from the evidence of language and archaeology. Meanwhile, it may be said that while, on the one hand, it seems tolerably certain that the Euphrates Valley, admirably adapted as a meeting-ground for races of various origin, actually contained in early times a population of a mixed character; on the other hand, it is no less clear that the traits of the culture, including the religion, are essentially the same in the latest days as in the earliest of which we have cognizance. The gods in the earliest texts are the same as those found in the latest; nor do the methods of invoking them, or the conceptions formed of them, undergo any other changes than those due to natural development. Nowhere is there a *violent* break with the past, but only, and at the most, a gradual transition. If, therefore, the later culture is to be regarded as Semitic,—and on this point there is general agreement,—there is no substantial reason for denying this predicate to the earliest. Such a consideration naturally does not solve the question of origins, for it may properly be argued that the non-Semitic stratum was so thoroughly absorbed by the Semites at the period to which our material for the study of Babylonia belongs, as to obscure the original features. With this admission, those who occupy an intermediate position between the opposing camps are for the present content, since it justifies the contention that the Babylonian culture, so far as known to us, is of one cast, and that therefore, in a treatment of the Religion of Babylonia and Assyria it is neither necessary nor justifiable to separate Semitic from supposedly non-Semitic features. If, therefore, there is a non-Semitic stratum to the culture which we encounter in the earliest period of Babylonian history, it belongs to a period which is, for the present at least, beyond our historical ken, and as little affects our views as to the general Semitic character of the Babylono-Assyrian religion in its earliest and latest manifestations, as the probably non-Grecian elements existing in Greek culture affect the essential unity of what we have been taught to regard as Greek religion.

Moreover, the possibility of a non-Semitic stratum to Babylonian culture must not be confused with the question as to the existence of traces of a Sumerian language in the Babylonian script and literature. Granting the existence of such a language as Sumerian, the position to which the advocates of the Sumerian theory are led in order to account for the continued use of the 'Sumerian' method of writing thousands of years after a far more suitable one had been evolved by the Semitic or Semitized Babylonians, justifies an attitude of reserve towards the far-reaching conclusions that have been drawn from the supposed non-Semitic origin of the script employed by the Babylonians; and the fact that these conclusions are brought forward in a spirit of consistency, derived by logical processes from a certain starting-point, only accentuates the difficulty of accepting the correctness of that starting-point. Besides, the advocates of the Sumerian theory have not yet fulfilled the obligation which obviously rests

upon them of defining the character of the Sumerian language in a manner acceptable to philologists, and of indicating its position in the group of languages to which it belongs.*

Under these circumstances, the attitude of reserve is still further justified on the part of those who are content to wait for 'more light' before committing themselves to a position which involves such far-reaching consequences as the acceptance of the Sumerian theory in its *present* form carries with it. Without, therefore, encroaching upon doubtful territory, we are entitled in the treatment of our theme to assume a continued development of a religion which is to be regarded in its earliest form as Semitic, provided it be admitted that in its latest form it may be given this title.

The sketch furnished at the outset of this article as to the general development of the Babylono-Assyrian religion, so far as the relationship between religion and the political history of the two countries is concerned, suggests a threefold division in the History of the Religion: the first extending from the earliest period known to us (c. 3500 B.C.) to the union of the Babylonian States under Hammurabi (c. 2250 B.C.); the second embracing the period down to the rise of the New Babylonian or Chaldean empire under Nabopolassar (625 B.C.); the third covering the short existence of this empire down to the taking of Babylon by Cyrus in 539 B.C. The Assyrian religion, in so far as it entails a separate treatment, falls within the second period, although it extends into the third—from c. 1800 B.C. down to the fall of Nineveh, 606 B.C. A sharp separation is marked only between the first and second divisions, though the third division likewise shows traits of a special character.—The further division of the general subject into (a) the Pantheon, (b) the Religious Literature, and (c) the Cultus, results from the character of the material at our disposal for the study of the Babylono-Assyrian religion, which consists chiefly, as already intimated, of (1) the numerous historical and votive inscriptions of the rulers; (2) the extensive literary productions of Babylonia (as preserved chiefly in the copies of the royal library unearthed at Nineveh†); and (3) in the archaeological results—still rather meagre—of the excavations of Babylonian and Assyrian sanctuaries.

v. THE BABYLO-ASSYRIAN PANTHEON.—The religion of Babylonia in the earliest form known to us may be defined as a combination of local cults with animistic conceptions of the powers of nature, with which man was either brought into immediate contact, or which affected his aims and his welfare. Each centre had its special patron deity, and this deity—in most cases conceived as masculine—was brought into association with some natural phenomenon. The two powers most commonly chosen were the sun and the moon, and by the side of these we find streams and stones per-

* The view formerly held, that the Sumerian belongs to the Ural-Altaic group, has been emphatically set aside by Prof. O. Donner—an eminent authority on this group—in an appendix to Haupt's monograph, *Die Akkadische Sprache* (Berlin, 1881). It should also be stated that, since the appearance of Haupt's monograph, little has been done towards elucidating the character of the so-called Sumerian (or Sumero-Akkadian) speech. See Winckler's remarkable confession: 'All attempts to establish an affinity with any language of the ancient world, even with the various languages of the neighbouring nations or of those still living, must be abandoned' (in Helmolt's *History of the World* (1903), vol. iii. p. 6).

† The recent discovery by J. H. Haynes of an extensive literary archive at Nippur, justifies the hope that at no distant day we may be able to study the religious literature to a large extent from 'originals' instead of from the copies prepared by the scribes of Assurbanipal. See Hilprecht's account of the Nippur library in *Explorations in Bible Lands in the Nineteenth Century*, pp. 509-532.

* It will be sufficient to refer for details of this controversy to Weissbach's monograph, *Die Sumerische Frage* (Leipzig, 1898), admirable as a summary, but which leaves the question pretty much where it was.

sonified as gods. The independence of the States and, in still earlier days, no doubt, of the towns of the Euphrates Valley, is sufficient to account for the fact that there should thus arise a considerable number of sun- and moon-deities, and it was only as a result of political development that in time a sun-god worshipped in the most important centre came to be the sun-god *par excellence*, and, in the theological system, was regarded as having absorbed the attributes and prerogatives of his former associates or rivals. This process of concentration was not necessarily carried out with consistency; and when, as happened, two centres acquired equal significance and sanctity, the worship of the sun-god or of the moon-god was maintained in both, or a compromise was effected by distinguishing between the varying action of the sun at the different seasons of the year or in the division of the day, so that, in the developed theological system, we have one sun-deity particularly singled out as the sun of spring or of morning, and another as the midsummer or noonday sun. The former, as the conqueror of the winter storms, would be pictured as a beneficent element, a youthful hero displaying his strength; the latter, as bringing discomfort, drought, and disease, would be invested with violence and destructive force—a grim warrior in the thick of battle.

Such a division of functions, effected as a compromise between rival sun-deities, was the work of the priests and theologians rather than a popular process, and the example adduced will suffice for the present to illustrate the importance of what may be called the theoretical factor in the development of the Babylonian religion. One of the main problems involved in considering the functions and traits of any particular deity is thus to distinguish between original elements and such as have been imposed upon him (or her) by the attempts at systematization that begin at an early period, and that lead to the rise of various schools of theological thought, of which traces are revealed in a careful study of the religious literature. At times, naturally, it is not an easy task to differentiate the popular conceptions connected with a deity from those unfolded in the schools. So, when two gods are viewed as father and son—like Ea and Marduk—or as father and daughter—like Sin (the moon-god) and Ishtar—or as master and servant—like Shamash (the sun-god) and Ishum, or Marduk and Nusku (the fire-god)—the process involved is not the same in all. Such relationships, likewise, are expressive of compromises effected between rival deities; but in some instances, as in the case of Ea and Marduk, popular thought is involved in specifying the relationship between the two as that of father and son. In general, however, the traces of relationship between various gods indicate the absorption in some way or another by one god of the attributes of his former rivals, and may be regarded as the work of the schools in their endeavour to weave the manifold threads of the pantheon into a single pattern. While, therefore, in the development of the pantheon there may be noted a general tendency to reduce the number of deities by the recognition of those only who had acquired a relatively superior position, and which had its outcome in the Assyrian pantheon in fixing the number of really active deities at about eleven, the numerous local deities, ranging to hundreds, do not entirely disappear. They survive in invocations and incantations, the efficacy of which is supposed to be increased by the number of deities invoked: and also in proper names—particularly in Babylonia—where conservative influences, emanating from the popular phases of the religion, have freer play.

Turning by way of illustration to the historical

and votive inscriptions of the oldest period, one cannot help being impressed by the circumstance that, while the number of deities that may be regarded as belonging to the really active pantheon is not extraordinarily large—between twenty and thirty,—if we add to these the deities paraded by rulers on occasions when they wish to emphasize the extent of their sway, or when they desire to assure themselves of the protection and favour of as large a number of Divine forces as possible, the number is more than doubled. If, again, we take into account deities entering as elements into proper names occurring in inscriptions belonging to this period, the list reaches close to one hundred. So in a text dating from the days of Manishtusu, a king of Kish, who appears to be as early as any ruler of southern Babylonia as yet known to us,* we encounter about fifty names of deities which enter as elements into the four hundred and more names of individuals enumerated. Comparing this list with the deities introduced into the historical and votive inscriptions, it will be found that, while the five or six most prominent gods of the period are represented,—notably Sin, Ea, Ishtar, En-lil, or Bel,—by far the larger majority are such as are not found in these inscriptions at all. This may be due in part to the still limited historical material that we possess for this earliest period; and it is also true that a number of the gods in this text of Manishtusu, which was found at Susa, are foreign deities—notably such as were worshipped in Elam. But, making due allowance for the possible increase of the active Babylonian pantheon of the oldest period by further discoveries, it is still safe to assume that most of the gods that appear as elements of proper names in the text in question belong to a different category, and will not, with some possible exceptions, be encountered in historical inscriptions proper. It seems certain that the deities whom we thus encounter in proper names are the old local gods, who naturally survive in the designations of individuals hailing from places where their cult was carried on; and it is equally natural that the rulers in their inscriptions should ignore all these local deities, except such as had acquired a superior rank, rendering them worthy to be invoked by a powerful chief.

If we now turn to the incantation texts, of which several series are known, we encounter the same preponderance in the number of deities invoked, over those that play a part in the active pantheon, as revealed by the historical inscriptions of any period. To be sure, our copies of these incantation series are very late; but it is quite safe to assume, as already pointed out, that the originals belong to the second millennium before our era, if not to the third; and the circumstance that many of the deities enumerated are to be found in proper names of the *earliest* period, is an evidence of the antiquity of the substantial elements of the texts themselves. In the 'Shurpu' series, as published by Prof. Zimmern, about 150 deities are introduced, as compared with 20 or 30 in historical texts of the first period; and not only are a number of these identical with those occurring in proper names of Manishtusu's obelisk, but, what is more, even the foreign gods in this text have also found their place in the incantations. These incantation rituals continue in use during the Assyrian period, when 11 great gods constitute practically the entire pantheon, and this makes the contrast to the conditions revealed by these rituals all the more striking. The explanation is again to be sought in the distinction between purely local cults and

* See the evidence on the basis of which Scheil (*Textes Elamites-Sémitiques*, i. p. 2) places this ruler before 4500 B.C.—a date which scholars like Winckler would now reduce by about one thousand years.

the gods who, in consequence of political and other factors, rise to a superior position. The conservatism attaching to religious texts, added to the natural desire in the case of incantations to appeal to as large a number of gods as possible, in the hope that one or the other will grant the desired help or relief, leads to the retention of the old local deities; and this is done without reference to the selective process that has led to singling out a small number only of these deities as powers of first-rate importance.

In proper names, accordingly, and in incantation rituals, there are revealed to us some of the popular phases of the Babylonian-Assyrian religion, and, as elsewhere, these phases stand in a certain contrast to the attempts at systematization of the pantheon which are naturally the work of the priests and of the theologians. We are thus prepared, in the historical and votive inscriptions of the earliest period and of the succeeding ones, to distinguish, on the one hand, deities of merely local significance, and those added from the desire to parade a long list of protecting powers; and, on the other hand, the really active pantheon, produced by a process of selection due in part to the natural prominence acquired by certain gods and by certain sanctuaries over others, and in part due to the attempts at systematization of the pantheon, begun by the priests in their capacity as theologians at an early period, and continued as political and social circumstances demanded.

In time this systematization reacts on the popular beliefs, and modifies them considerably; but, for all that, the popular religion always lags more or less behind the 'official' form as revealed in the scientific literature, such as the astronomical and astrological texts, and in the official inscriptions of the rulers, which were naturally produced under the prevailing theological influences. It would be idle to discuss to which of these two phases of the religion the preference is to be given. Both must be studied if we would penetrate to the core of the religion, and in the case of the pantheon it is obvious that due consideration of its systematization by the priests must be our guide in an endeavour to obtain a clear view of its extent and of its general character.

(A) *THE CHIEF DEITIES.*—1. *Anu, Bel, and Ea.*—Perhaps the most striking feature of the theological system devised by the priests is the doctrine which places at the head of the pantheon a triad consisting of the god of heaven, the god of earth and of the atmosphere above the earth, and a god of the watery element. These three gods, corresponding to the three divisions of the Universe, thus cover the sum and substance of Divine government; and it is hardly necessary to advance further arguments for the view that such a triad does not represent a popular belief, but is the outcome of theological speculation. Of the three gods,—Anu representing heaven, Bel the earth, and Ea the water,—Bel and Ea we know were originally deities of a local character, whose worship was centred in a well-defined locality. Bel, written ideographically *En-lil*, was the chief god of Nippur in northern Babylonia, and the prominence at one time of Nippur is illustrated by the title *Bel*, i.e. 'lord,' which became the common designation of En-lil. Ea belongs to the extreme south of Babylonia, whose worship was originally centred in Eridu, an exceedingly old settlement that at one time lay at the mouth of the Persian Gulf. The name 'En-lil' merely describes the god as a powerful demon; but from other sources we know that he was conceived also as an atmospheric deity, who manifested himself in storms and other violent disturbances of nature. Ea, on the other hand, was a water spirit; and one

can readily understand how the character of the large body of water—the Persian Gulf, which was sacred to him, and which led directly to the shoreless ocean—should have led to making Ea the symbol of the watery element in general. As for Anu, while we find even as late as the 12th cent. B.C. that his cult was specifically associated with a definite centre,* the process which resulted in making him the personification of heaven in general, appears to have been a purely scholastic one, and independent of any traits that may originally have been ascribed to him. His worship in the south was never carried on at any of the large political or religious centres, and, whatever local associations he may have had, disappeared as early at least as the 4th millennium before our era, when we already find Anu generally written without the usual sign before deities, and designated simply as the 'heavenly' or 'exalted' one.† One is inclined, in view of this great antiquity of the symbolization of Anu, to regard the name, together with the conceptions associated with it, as due to scholastic speculation, and to suppose that the association of a god Anu with any particular locality is of later origin, due to the reaction of theoretical speculation in practical forms of belief.

However this may be, the parcelling out of Divine manifestations among a triad representing heaven, earth, and water, belongs distinctly to a theological system—is part and parcel of a *Weltanschauung* which could have arisen only in the schools, and which from the schools may have made its way to the people. The important feature of the triad is the symbolization underlying it: the choice of Bel and Ea to symbolize earth and water is secondary, as is the choice of Anu to symbolize heaven, whatever the origin of the name may have been. The Bel of the triad has in reality nothing but the name in common with the chief god of Nippur, and, similarly, when Ea of the triad was invoked there could have been only a remote association in the minds of the Babylonians with the water deity of Eridu. Still, such is the force of old conceptions that even the theologians could not entirely keep the double character thus resulting for Bel and Ea apart, and, accordingly, in the earliest occurrence of the triad dating from the days of Gudea‡ (c. 3000 B.C.) we have Nin-kharsag, the consort of Bel or En-lil, inserted between the latter and Ea. *Nin-kharsag* is a title of Belit as the wife of the chief god of Nippur, and the insertion of the name in connexion with the triad shows that the Babylonian scribes could not free themselves from the association of Bel with his original home at Nippur. In later periods this is rarely done, and it is interesting to compare the arrangement of the triad in Gudea's inscription with the one on a boundary stone from the 11th cent., where the goddess corresponding to the old Nin-kharsag, Belit, appears as *Nin-makh*, 'the great lady'—dissociated from the Belit of Nippur—and assigned a place behind Ea. Between these two dates we have the inscription of Agumkakrime (c. 1650 B.C.), in which we find at the beginning the usual order Anu, Bel, Ea, whereas towards the close there is associated with each one of the three a consort, thus furnishing the series Ann and Antum, Bel and Belit, Ea and Damkina. Of these consorts, Belit and Damkina represent the wives of the Bel of Nippur and Ea

* Dér—in southern Babylonia, Rawl. v. 55, col. i. 14.

† *An* = 'heaven' + the phonetic complement *na*. This is the usual form; but various others occur, e.g. *An* with the determinative for 'god,' and the phonetic writings *An-nu-un* with and without the determinative for 'god.' See Radau, *Creation Story of Genesis*, 17, note 2.

‡ Inscription B, col. viii. 45-48.

§ Signifying 'lady of the mountain.'

of Eridu respectively, whereas Antum is an artificial figure introduced into the pantheon under the influence of the doctrine which assigned to every male god a female companion. One must therefore pass down to a comparatively late period, before, in the invocation of the triad, all traces of the old association of Bel and Ea with local cults disappear, and in a certain sense the process was never entirely and consistently completed.

The assigning of the local deity of Nippur to a position in the triad served to maintain his cult long after Nippur had lost its political supremacy. His temple at Nippur, known as *E-kur*, 'the mountain house,' became a place of pilgrimage to which worshippers came from all sides. In a measure this was the case with the sanctuaries in all or in most of the places that once formed political centres, but there were certain features connected with the Bel cult of Nippur that lent to it an air of uniqueness. Invoked in one of the earliest inscriptions known to us, that of En-shag-kush-annu* (c. 3500 B.C.), En-lil, at this time already designated as 'king of the lands,' maintains his position as the head of the pantheon even in the case of a ruler like Lugalzaggisi, king of Erech (c. 3500 B.C.), whose capital is not at Nippur.† We do not encounter the triad at this early period, and it is all the more significant therefore to find the god of Nippur occupying a position which is not affected by the political status of the centre in which he was worshipped. Such a condition is an important step on the road towards the differentiation between the local storm-god and his symbolization as one of the three elements of the universe.‡ Even in those inscriptions of the first period of Babylonian history in which En-lil does not occupy the first place, as for example in the list found in an inscription of E-anna-tum,§ and in one of Gudea,§ his supremacy is still implied, for the preference given in these inscriptions to a god Nin-girsu, who is mentioned before En-lil, is simply due to the fact that the inscriptions in question are dedicated to Nin-girsu as the chief deity of the centre to which the rulers in question belong. Similarly, the rulers of other centres, like Agade, Ur, and Kish, present offerings and pay devotion to the Bel of Nippur; and it is not until the union of the Euphrates States under a dynasty which established its capital in the city of Babylon (c. 2300 B.C.) that we encounter an attempt to dethrone En-lil from his pre-eminent position, in favour of the chief deity of the city of Babylon, Marduk. The political union naturally brought in its wake the assignment of Marduk to a position at the head of the pantheon, and this was emphasized by transferring to Marduk the title *Bel* or 'lord,' and the old legends and traditions were likewise transformed under the influence of the priests of Babylon with a view of securing for the 'Bel' of Babylon the functions and deeds that properly belong to the 'Bel' of Nippur. The attempt, however, was not altogether successful, and, when in the 18th cent. B.C. the control of Babylonia passed into the hands of a people coming from Elam to the east, and known as the Kassites, the cult of Bel of Nippur enjoyed a renaissance.¶

There are good reasons for believing that the Kassites made a deliberate effort to reinstate En-lil as the head of the pantheon. For five centuries the

Kassites held sway; and, though at the end of this period the reaction begins, in the list of gods found in inscriptions of this period Marduk receives his place immediately behind the triad,* though not invariably so.†

The rise of a serious rival to Babylonia in the north, where shortly after the end of Kassite rule in the south the Assyrians acquired sufficient strength to threaten the independence of Babylonia, again leads to a shifting in the ranks of the gods. In the presence of a common foe, the union between the States in the south becomes closer, and this condition finds expression in a more loyal attachment to the patron deity of Babylon—Marduk,—who in virtue of this fact henceforward holds undisturbed sway as the head of the pantheon. No more attempts are made to shake his position by playing off other gods against him. His supremacy becomes so secure that it is not endangered by the devotion shown by the rulers of Babylonia to the cults of other gods, either in Babylon itself or in any one of the religious centres of the south. The temple of Bel of Nippur continued to be a goal of pilgrimage down to the latest days of the Babylonian empire, and the series of sacred edifices there were an object of care to Assyrian kings as well as to Babylonian rulers; but the reverence paid to Bel was merely that due to the local deity, who had, in consequence of the earlier phases of the development of the Babylonian religion, acquired a greater prominence than the other gods. At the same time, the position of Bel in the triad served as a factor in maintaining this reverence, and formed in a measure the justification for it, in the minds of those who had separated their conception of Bel almost entirely from his originally local limitations.

We know as yet too little of the earliest history of Eridu—the original seat of the Ea cult—to determine the course of development that led to Ea's being singled out from among other water gods that were worshipped in early days, to become the general symbol of the watery element in the distribution of the Universe among three chief deities or power. Analogy might suggest that Eridu,‡ at the time that it still lay directly at the head of the Persian Gulf, was once an important political centre like Nippur, and that its patron deity rose into prominence in connexion with the political fortunes of the place. There is, however, no evidence to justify the claim that Eridu ever occupied such a position; and, since our knowledge of the early history of Babylonia now goes back to a remote period, we ought at least to have encountered some traces of a once dominating State in the Euphrates Valley with Eridu as a centre. Such notices as we have in the old Babylonian inscriptions almost all point to the *religious*§ but not to the political significance of the place, and illustrate the devotion of the rulers to En-ki or Ea, who is called the king of Eridu.¶ In the religious literature, likewise, Eridu appears chiefly as a religious centre, though, culture and religious prominence proceeding hand in hand in ancient Babylonia, Eridu was no doubt one of the *oldest* of the cities of the south. To a late day the

§ Inscription D, col. i. 3.

¶ See the votive inscriptions of Kassite kings published by Hilprecht (*Old Babylonian Inscriptions*, i., Nos. 28-32), which with few exceptions are dedicated to En-lil or his consort Nin-lil or Belit. In the 'boundary' inscriptions dating from this period (see *Keilschriftliche Bibliothek*, iv, pp. 56-63), it is also significant that Marduk is mentioned after Shamash, and even the god Adad in one instance is given the preference over him.

* So in the inscription of the days of Marduknadinakhe (c. 1100), Rawlinson, *iii*, 43, col. iii. 31.

† e.g. Rawlinson, *iii*, 41, col. ii. 25, Marduk occupies the fourth place after the triad, being preceded by Sin, Shamash, and Ishtar.

‡ Now represented by the mound *Abu-Shahreïn*, situated at some distance from the mouth of the Euphrates.

§ Bur-Sin of the Isin dynasty, e.g. (c. 2500 B.C.), refers to the oracle-tree at Eridu (Hilprecht, *Old Babylonian Inscriptions*, i. 1, No. 19, 5), and among the titles of Ur-Ninib of the same dynasty we find one which designates him (*ib.* No. 18, 6-7) as 'fulfilling the commands of Eridu.'

¶ Inscription of Entemena (Thureau-Dangin in *Revue d'Assyriologie*, ii, p. 148, col. iv. 5-7).

tradition survived which attributed the beginnings of culture to the instruction furnished to mankind by the water deity* who personified the Persian Gulf; and since, as a matter of fact, the course of civilization in the Euphrates Valley is from south to north, we may conclude that the prominence in culture as well as the antiquity of Eridu were the factors which led to the sanctity of the place, and, along with this sanctity, to the prominent position attained by the chief god of the place, so that his worship spread far beyond its original confines.

There is no god who in certain portions of the religious literature of Babylonia—notably in the numerous incantation texts—plays a greater rôle than Ea. He is apt to be appealed to, first of all; and, where other deities fail, Ea by his superior wisdom, which is his most characteristic feature, is certain to succeed in discovering the cause of the disease that troubles a man, and in effecting a cure. He is essentially the god of mankind, who loves the children of men, who originally taught them wisdom, and who, according to at least one cosmological system current in Babylonia, was the creator of mankind. This prominence of Ea in portions of the religious literature suggests, indeed, that the compositions themselves originated at Eridu; and there is distinct evidence for this in the transformation which many of the incantation texts clearly underwent in order to adapt them to the standards of the priesthood of Babylon, which was naturally jealous of anything that seemed to affect the pre-eminence of Marduk. Just as the titles and attributes as well as the prerogatives of the old Bel of Nippur were transferred to Marduk, so the latter also assumed the rôle of Ea; but he is represented as doing this with the full consent of Ea, who became in the theological system of the Babylonian priesthood the father of Marduk, proud of the achievements of his son, and rejoicing in the latter's supremacy. Marduk's name is either associated in the religious texts with that of Ea, so that both are represented as performing in concert acts that were originally attributed to Ea alone; or Ea is depicted as asking his son to act for him. This re-editing and adaptation of the ancient literary productions of the Euphrates Valley thus furnishes a valuable aid in tracing the gradual development of a theological system. A reconciliation between the claims of Ea and Marduk, respectively, having thus been brought about, the cult of Ea could be carried on without endangering the position of Marduk, and a sanctuary to Ea was erected in the sacred area around Marduk's own temple in the city of Babylon.

Anu is practically entirely freed from local associations, and is viewed as a god for the gods rather than for men—a deity who exercises a general supervision over all the gods. In a sense, the conception of Anu represents the highest point reached in the spiritualization of the Babylonian religion. He is the 'lofty god,' and it is significant that as early as the days of Hammurabi† he is in fact designated simply *ilu* 'god.' At no subsequent period, either in Babylonian or Assyrian history, do we find a closer approach to a monotheistic belief than in this early conception of Anu, although it must be borne in mind that the actual step of regarding one god as embodying the essence of all others was not taken in Hammurabi's days, nor was it taken in later days despite certain appearances to the contrary.‡ While not entering to the same extent as did Bel and Ea into the popular religion, yet the concep-

tion of Anu as an outcome of the best speculative thought in Babylonia is a most important feature of the Babylonian religion, and must not be lost sight of in an estimate of the best that this religion stood for.

It will thus be seen that each one of the three gods embraced in the doctrine of the triad has his peculiar origin, and retains his peculiar place outside of the rank accorded to him in the triad itself. The local cult of Bel of Nippur proceeds undisturbed by the admission of Bel to the second place in the triad, while the transfer of Bel's attributes to Marduk marks the concession made to the new order of things which eventually gave the patron god of the city of Babylon his undisputed rank at the head of the active pantheon. Lastly, Ea, rising to a place of importance through the sacred associations connected with the old city of Eridu, is stripped of local limitations to a much greater extent than is the case with Bel, and outside of his rank as a third member of the triad is worshipped and appealed to throughout Babylonia as the god of humanity *par excellence*, whose chief trait is wisdom, and one of whose chief functions consists in his power of healing disease and of relieving suffering in general.

2. *Ishtar*.—We have already had occasion to point out that with the gods of the triad their consorts are occasionally associated, and that, even when this is not the case, the consort of En-lil or Bel, under the form of *Nin-kharsag*, appears occasionally as a fourth member associated with Anu, Bel, Ea. The association of consorts with the three gods is due merely to the influence of the general belief, which is a part both of the popular religion and of the system devised by the priests, according to which every male deity was supposed to have a partner—who, however, is generally merely his pale reflexion. The case is different, however, in the association of *Nin-kharsag* with the triad. Although bearing a name signifying 'lady of the mountain,' which belongs to the consort of En-lil, the chief god of Nippur, and whose chief sanctuary was known as *E-kur*, 'mountain-house,' the fact that this name is subsequently replaced by a more general one, *Nin-makh*, which has the force of 'great lady,' and is generally added as a fourth member of the triad after Ea, is sufficient to show that we are dealing here, not with the associate of a male deity, but with some more general principle recognized by the priests at least as a factor in the workings and divisions of the Universe. That factor may in a general way be defined as the life-producing power manifested in the world, without which heaven, earth, and water would be a desolate waste. The influence of this doctrine, which appears to have been formulated as early at least as the third millennium, leads to the phenomenon which, next to the constitution of the triad at the head of the pantheon, is the most characteristic feature of the Babylonian doctrine of the gods, according to which, from a certain time onwards, only one goddess occupying an independent position is recognized. The general name by which the goddess comes to be known is *Ishtar*. She is the great mother to whom vegetation, as well as fertility in the animal world, is due, and she is naturally viewed also as the mother of mankind. That in the triad she is designated as *Nin-kharsag*, may possibly point to the formulation of the doctrine at a time when the Bel cult of Nippur was still in the ascendancy, and when naturally the consort of this god—who was called Belit, 'lady' *par excellence*, as En-lil was called Bel—had the distinction of representing the life-giving principle assigned to her. However this may be, the choice of the later and specific

† 'Code de Hammourabi,' col. I. 45, etc. (ed. Scheil, *Textes Élamites-Sémitiques*, II. p. 16).

‡ See below, p. 550*, and Jastrow, *Die Religion Babylonien und Assyrien*, p. 203, note 1.

designation *Ishtar*, as the name of the great goddess, is due to influences emanating again from the city of Babylon, for it is there that down to the latest days we find *Nin-makh* used as one of the designations of the chief goddess.*

That the name *Ishtar*—conveying in all probability the force of 'leading,' 'overseeing,' from a stem *asûru*—also originated in the city of Babylon, cannot be definitely stated, but seems likely. The phonetic writing appears for the first time in the inscriptions of Hammurabi,† and it would be natural for the priests of Babylon to use the name of a goddess who was worshipped in the capital by the side of Marduk as the designation of the general life-producing power. That, at all events, they were anxious to regard the associate of Marduk as identical with *Ishtar*, follows from the etymology they proposed for the name of this consort, whose real name *Sarpanitum* (or *Sarpanit*), i.e., probably, the 'shining one,' they converted into *Zêr-bânitum*, 'the seed-producing' goddess.

Whatever the origin of *Ishtar* may have been, and wherever the cult of this goddess may originally have been centred, she gradually absorbs the rôles and the names of the other goddesses who as consorts of gods in important religious centres had acquired a certain, though restricted, importance. Thus at Erech, in the extreme south, there flourished the cult of a goddess known as *Nanâ*, who appears to have been conceived as a deity of a violent character, punishing severely those who disobey her—a war-goddess rather than a mother of life, but who in later texts is identified with *Ishtar*. Again, at another ancient centre, *Shirpurla*, we find the cult of a goddess *Ninâ*, who is regarded as the sister of the chief god of the place, *Nin-girsu*, and whose special function appears to have been the interpretation of dreams. She is called the great divining queen of the gods, and it is to her that Gudea, one of the most famous rulers of the place (c. 3000 B.C.), goes to ascertain the meaning of a dream which disturbs him.‡ *Ishtar* absorbs the rôle of both *Nanâ* and *Ninâ*, and hence, side by side with her character as the mother of all life, she is portrayed already in the inscriptions of Hammurabi as the great war-goddess who stands by the king's side in the midst of the fray, and to whose aid every victory is in a measure due. This phase of the character of the goddess is naturally emphasized even more prominently among a people like the Assyrians, whose thoughts and activities were so largely occupied with military pursuits, and among whom all gods take on a warlike and fierce character. While the conception of *Ishtar* as the great mother of mankind is also found among the Assyrians, the kings of the north more frequently speak of her as the companion of the chief god *Ashur*, and as co-operating with the latter to lead the Assyrian armies to victory. She is pictured as armed with bow and arrow, and it is likewise she who, like *Ninâ*, furnishes oracles and appears in dreams to encourage her favourites—the kings—by reassuring messages. Again, a goddess *Anunit*, who, as the name indicates, stood in some relationship to *Anu*, the god of heaven, becomes a form of *Ishtar*; and in the same way *Ishtar* absorbs the rôle of other of the chief goddesses of the religious and political centres of the ancient Babylonian cities, such as *Bau*, originally the consort of *Nin-girsu*, the chief

deity of *Shirpurla*, who at one time acquired an independent position of great prominence.

The extent to which this process of concentration was carried is illustrated by the common use of the term *ishtar*, particularly in religious texts, in the sense of 'goddess'; and from it a plural *ishtardê* is formed, with the signification 'goddesses.' While, therefore, the other goddesses who are merely the consorts of male deities—their pale reflexions—continue to preserve their identity, they are in reality merely so many *Ishtars*, with this distinction, however, that the name *Ishtar* as that of a specific deity is confined to the associate of the chief god—Marduk in the south and *Ashur* in the north.

A certain vagueness in the use of the name *Ishtar*, to be observed especially in Assyrian historical texts, followed from the attempt to concentrate the attributes of all the important goddesses—important by virtue of the part once played by the centres in which as consorts of male deities they were worshipped—in a single personage. *Ishtar* is not really the wife of *Ashur*, who indeed is essentially a god standing by himself without wife or offspring; but as the chief goddess she takes her place by the side of *Ashur*, just as she does by the side of Marduk, and hence she is addressed occasionally in terms which might be taken as representing the relationship of a wife to her husband. In the south, again, owing to Marduk's absorption of the rôle of the old *Bel* of *Nippur*, *Ishtar* naturally becomes the *Bêlit* of *Babylonia*, though *Belit* was originally the consort of the *Nippurian Bel*; and, in so far as she takes on the traits of the older *Belit*, she is associated with Marduk in the relationship of consort to the chief male deity. Yet the amalgamation is not complete until a relatively late period, and Marduk continues to have as a special consort *Sarpanit*, who is generally distinguished, albeit not sharply, from *Ishtar*. Confusing as this double character of *Ishtar*, as the one great mother-goddess, the source of life, and as the consort of the head of the pantheon, may appear to us, it probably occasioned no difficulty to the Babylonian theologians, to whom *Ishtar* was essentially the goddess of life and vegetation; nor to the Assyrian priests, among whom she took on the rôle of the great war-goddess, who in company with *Ashur* led the armies of the kings to victory.

3. *Sin*.—Next to the triad and the great mother-goddess, the worship of the two great orbs of light—the moon and the sun—is a feature of the Babylonian religion that clings to it from the earliest period of which we have any record, down to the latest. It is impossible to say definitely that the cult of the one is older than the other, but the greater prominence which, so far as the evidence goes, was enjoyed by the moon cult in the earliest forms of Semitic culture, justifies the preference given to it in the order of treatment. In a general way it may be said that the moon cult is coexistent with the nomadic grade of culture, while sun worship corresponds more to the frame of mind and to the conditions prevailing among a people that has reached the agricultural stage. This generalization, though open to the objections that attach to all generalizations, is nevertheless of value, provided it be not pushed to the extreme of denying the possibility of sun worship in the pre-agricultural period of the Semites. The movements of nomads in Arabia—the home *par excellence* of the Semites—taking place for a great part of the year at night, the moon naturally served as an important guide. The more regular changes in the orb of night and the briefer period in which these regular changes run their course, constituted further features that helped to emphasize the im-

* The temple erected in Babylon in honour of this goddess has recently been excavated by the German expedition. See *Mittheilungen der Deutschen Orient. Gesellschaft*, Nos. 4 and 5; and also Delitzsch, *Im Lande des einstigen Paradieses*, pp. 38, 39.

† See King, *Inscriptions of Hammurabi*, i., No. 34, 6. 9. 15. and 23, *ish-ta-ra-a-tim* already used in the general sense of 'goddesses.'

portance of the moon as a medium for the calculation of time. However this may be, two of the oldest religious centres in Babylonia were seats of moon worship—Ur and Harran (or Haran),—and the sanctuaries at both places retained their popularity until the days of the New Babylonian empire. Assyrian rulers vied with those in the south in paying homage to the god worshipped in these centres.

The common name given to the moon-god is *Sin*. The meaning and etymology of this name are not yet clear; but there were numerous epithets by which he was known. Among these is one *Nannar*, which, signifying 'the one who gives light' or 'place of light,'* appears to have been used at one time as a genuine name and not merely as an epithet. Possibly *Nannar* is even an older name than *Sin*, which appears to have originated at Harran. Besides the two places named, there were, no doubt, other places in Babylonia where the moon cult flourished, and it was merely the religious prominence of Ur and Harran that lent to their association with the moon-god a special significance. The moon-god is ordinarily designated ideographically *En-zu*, which describes him as the 'lord of wisdom,' and this attribute is perhaps the most important of the conceptions connected with him. This designation appears in one of the earliest inscriptions known to us. *Lugalzaggisi*† enumerates *En-zu* among the gods serving as his protectors, and from the sequence it is evident that this ruler has in mind the moon-god of the city of Ur. The cultivation of the science of astronomy by the Babylonian priests served to emphasize the association of wisdom with the moon, as the overseer of the starry heavens; and, since the motive predominating in the development of this science was the belief in the influence of the position and movements of the stars upon the fate of the individual, the wisdom of *Sin* was to a large extent coextensive with the giving of oracles and the interpretation of omens. Hence the prominence accorded to *Sin* in the omen literature. It is he who sends dreams. He is addressed as the lord of decisions, the god who gives counsel; and if in later times it is *Shamash*—the sun-god—rather than *Sin* who appears as the god of oracles, this is due to the greater prominence which *Shamash* acquired in the agricultural stage of culture, and which led to the relegating of *Sin* to a secondary position. *Sin*'s traits as the illuminator likewise continue to be dwelt upon both in historical texts and in the hymns composed in his honour; and, with the tendency to lay stress on the ethical phase of the natures of the gods, the light diffused by *Sin* becomes a symbol of his function in revealing to men the snares that are laid for them in the dark. As a protection against the workings of the mischievous spirits who ply their trade generally at night, the appeal is frequently made in the incantations to the moon-god; but here, again, there are other tendencies at work in the Babylonian religion that prevent the fullest development of the traits of wisdom and of protection ascribed to *Sin*. In the later periods the element of wisdom is so prominently associated with another god—*Ea*, who through various causes becomes the god of humanity *par excellence*—as to set the moon cult almost aside, while the greater attachment felt towards the sun by an agricultural population, added to the much more powerful character of the sun's light, leads not only to *Shamash* becoming an oracle god in the place of *Sin*, but exalts the sun-god to the position of chief protector of mankind against injustice,

the god who far above any other reveals wrongdoing and brings wickedness to light. *Sin*, in short, while his cult remains prominent, loses his touch, as it were, with his worshippers. The personal element is moved into the background. As he no longer entered into the daily life of a population that became agricultural and then commercial, the later hymns to him do not breathe that spirit of genuine attachment which characterizes the addresses to such gods as *Shamash*, *Ea*, and *Marduk*. He retains his supreme position among the gods; but, calm and cold as his light, he is not the deity to whom the people turn in their distress, and it was due chiefly to the reverence in which such ancient centres as Ur and Harran were held by virtue of their great antiquity that he continued to be a member of a second great triad, consisting of *Sin*, *Ishtar*, and the sun-god.

4. *Shamash, Ninib, Nergal*.—We have indicated the main reason for the steadily growing popularity of the sun cult, which is a feature of the development both of the popular religion and of the system of theology established by the influence of the priests. While the worship of the sun-god, as one of the great powers of nature, is no doubt much earlier among all nations than the period when the agricultural stage was reached, it is among agricultural communities that such a cult acquires a popularity corresponding to the importance of the sun in the life of the people. Hence the phenomenon, which at first sight may seem strange, that the majority of the local gods worshipped in the cities of ancient Babylonia are solar deities. Besides the two chief centres of sun worship—*Sippar* in northern Babylonia and *Larsa* in the southern portion—the patron deity of *Shirpurla* (known as *Nin-girsu*) is a solar deity; a god *Nergal*, worshipped in another important centre—*Cuthah*—is likewise a sun-god; similarly, *Za-mal-mal*, who belongs to an important city—*Kish*; while *Marduk*, originally merely the god of the city of Babylon, but destined, with the growing dignity of the city as the capital of the united Babylonian States, to become the official head of the pantheon, is also distinctly a solar god.

Besides these, we have a host of other deities belonging to cities and towns of minor importance that are distinctly solar in character. With that same tendency towards the systematization of beliefs which led to the concentration of the godesses of the more important centres in the person of a single goddess *Ishtar*, so in the course of time these various local sun-gods came to be looked upon as so many forms or manifestations of the one great orb, though the tendency never went so far as to concentrate all the solar deities into a single one. By the side of a god, symbolical of the sun in general, and who receives the name of *Shamash*, the official Babylonian pantheon continues to recognize two other solar deities—one whose name is provisionally read *Ninib*, and the other *Nergal*—exclusive of *Marduk*, who, although a sun-god, also acquires, as already intimated, a unique position. The real reason for the continued independent existence of *Ninib* and *Nergal* is, no doubt, to be sought again in the political and religious significance of the centres in which they were worshipped. That centre was, in the case of *Nergal*, the city of *Cuthah*, which is first referred to in an inscription of king *Dungi* of Ur (c. 2800 B.C.). As for *Ninib*, indications point to his identity with *Nin-girsu*, the chief god of *Shirpurla*, the capital of one of the oldest Babylonian States; though the origin of the writing *Ninib* and its precise relationship to the form *Nin-girsu* are as yet unknown to us. In the systematized Babylonian theology, however, the distinction between *Shamash*, *Ninib*, and

* So Lehmann, *Zeitschrift für Assyriologie*, xvi. p. 405.

† Hilprecht, *Old Bab. Inscriptions*, i. 2, No. 87, col. i. 21–22.

Nergal was interpreted in such a manner, that, while Shamash was regarded as the sun-god *par excellence* and in general, Ninib was looked upon as the personification of the morning and spring sun, and Nergal as the sun of noon and of the summer season.* This differentiation was suggested by the two aspects which the sun as a great power of nature presents in a climate like that of Babylonia. It is, on the one hand, a beneficent power which, in the spring, drives away the rain and storms, and restores the life and vegetation of nature; and, on the other hand, it is a destructive power which, during the hot season, by its too fierce and burning rays, brings about disease and suffering, and even causes ruin to the crops.

Confining ourselves for the moment to the personification of the sun in general, the name *Shamash*, having perhaps the force of 'servitor,' appears to go back to the very early period when the moon cult still enjoyed a supremacy over that of the sun. And if it be borne in mind that, both in the earlier and in the later inscriptions of Babylonia and Assyria,† the moon-god is, almost without exception, accorded the preference over Shamash in an enumeration of the pantheon, the conclusion appears to be warranted that the 'service' implied in the name had reference originally to the subservient relationship in which Shamash stood to Sin. We have, however, also had occasion to note the causes that led to the later predominance of the sun cult over that of the moon, at least in the popular phase of the religion, and the influence of this phase is to be seen in the absorption on the part of Shamash of attributes that once belonged to Sin.

The chief centres of the Babylonian Shamash cult were, as already indicated, Sippar and Larsa, both of them cities whose foundation reaches back to a high antiquity. Of the two, Larsa appears to have been politically the more important, whereas Sippar acquired greater religious sanctity, from which we may perhaps conclude that it was the older of the two. That there is some historical connexion between the two places, is indicated by the identity of the name borne by the chief temple in both Sippar and Larsa, viz. *E-barra* (or *E-babbara*), signifying 'resplendent house.' In the further development of the conceptions connected with Shamash it is important to note the introduction of ethical ideas. Represented ideographically as 'the god of day,' he is worshipped not merely as the symbol of light and as the beneficent power that drives away the winter storms and clothes the earth with verdure, but as the god who, among mankind, as in nature, brings about order and stability. As his light illumines all dark places, so he is regarded as the one who can drive evil, which was pictured as 'darkness,' out of the body of man. Shamash is therefore frequently appealed to in the incantation texts as the god who can provide healing, who can secure release from sufferings by driving away the demons and evil spirits. The symbolical rites prescribed in these texts to be carried out in connexion with the pronouncing of certain formulæ are generally to be performed at daybreak, when the rule of Shamash begins. But not only evil in the form of disease or bewitchment can be removed by Shamash, it is he likewise who brings hidden crimes to light, and it is he who punishes the evil-

doer. His light thus becomes a symbol also of justice, and perhaps the most frequent epithet by which he is addressed both in hymns and in historical texts is that of 'judge of heaven and earth.' He is pictured as sitting on a throne in a court of justice, receiving the petitions of those who have been injured, and rendering a just verdict. It is significant that Hammurabi (c. 2250 B.C.) places at the head of his famous Code of laws* a picture of Shamash, and in the body of the text the god is frequently introduced as the one who inspired Hammurabi with the project of gathering together the laws of the country for the purpose of ensuring justice and security to all the inhabitants of the land. Among the titles that the king bestows on himself he takes special pride in designating himself the 'king of righteousness,' which is precisely the rôle in which Shamash himself appears in the religious literature.

By the side of Shamash we not only find his consort *Ā* frequently referred to, but a group of minor deities (or spirits), who form, as it were, the court of the god. A god *Bunene* is pictured as his chariot driver, and *Kettu* ('Right') and *Mesharu* ('Justice') as his children who are in his service. It is likely that *Bunene* was originally the name of the sun-god in some locality, who was overshadowed by the great Shamash, and therefore accorded a place as an attendant; while *Kettu* and *Mesharu* are clearly designations of the sun-god as the lord of justice, that have been personified as independent beings.

Ninib.—As the sun-god associated more specifically with the spring and morning, it is natural to find Ninib regarded as essentially an agricultural deity, who presides over the fields, and who is appealed to, not merely to ensure fertility, but to protect the boundaries of the fields against unlawful invasion or wilful interference. A feature of Ninib which stands in close connexion with his position as an agricultural deity, is his absorption of the rôle of numerous other gods, who, originally local patrons of the fields, are viewed as merely so many manifestations of Ninib. Thus we find *Nin-gish-zida*, *Nin-shakh*, *Za-mal-mal*, *Dun-pa-uddu*, *Zizanu*, *Shedu*, all once worshipped as independent gods, assimilated to Ninib in accordance with the same tendency that led to a concentration of all the independent goddesses in the great Ishtar, and which led to making Shamash of Larsa and Sippar the representative of the sun-god in general, thus gradually obscuring the numerous local sun cults that must once have flourished. There is, however, another side to Ninib, due to his having been the chief deity in an important political centre—probably Shurpura. As the patron of rulers whose position was due to their force of arms, Ninib (or *Nin-girsu* ‡) was naturally also a god of war, who appeared in the midst of the fray as a warrior fully armed. In hymns composed in his honour, Ninib is very frequently addressed as the god of battle, whose strength is irresistible, and who leads the armies of the king to victory.

This violent character of the god also leads to his being invoked by the Assyrian rulers as the one who, with Nergal, presides over the sports—hunting of lions, bulls, and stags—to which the Assyrians were devoted. Indeed, some of the Assyrian kings, notably Ashurnasirpal (B.C. 885–860),§ are so devoted to Ninib that he becomes the god of war *par excellence*, and they fairly exhaust their vocabulary in extolling him as the strong

* See Jensen (*Kosmologie*, p. 457 f.), to whom the indication of this distinction is due, and whose views are more plausible than the opinion of Winckler (*Geschichte Israels*, ii. p. 79), who is inclined to look upon Ninib as the symbol of the summer season.

† An exception appears in the inscription of Lugalgaggisi (Hilprecht, *Old Bab. Inscr.* i. 2, No. 87, col. i. 20); but see the note on p. 67 of the present writer's *Religion Babyloniens und Assyriens*.

* English translation by Johns under the title, *The Oldest Code of Laws in the World* (Edinburgh, 1903).

† See above, p. 542b.

‡ See Rawlinson, i. 17, col. i. 1–17; Ninib as god of hunting with Nergal, Rawlinson, i. 28, col. i. 1.

and powerful hero who overthrows all opponents, whose victory is assured, who holds the sceptre in his hands; the lord of lords, who drives along like a raging storm. There is but little trace, in such a description, of the solar deity, though phrases are interspersed here and there which show the solar origin of the god in question. It is natural that among the warlike Assyrians, where all the gods assume a fierce and more violent aspect, this side of the deity should have been particularly emphasized; whereas, among the Babylonians, it is, on the whole, as an agricultural god that Ninib retains his position in the pantheon down to the latest period.*

The consort of Ninib is *Gula*, also designated as *Nin-karrak*, who, besides being very frequently associated with him, especially in the invocation of the gods at the close of the boundary inscriptions, appears in the magic tests chiefly as the 'great physician' who provides healing for the sick.

Nergal.—As the symbol of the great power of nature in its destructive phase, Nergal is consistently regarded as a violent deity, who alternately appears as a war-god and as a god of pestilence and fevers, dealing out death and suffering on every side. Dissociated from his originally local limitations as the god of Cuthah, he absorbs the rôle of other gods, who, likewise solar deities of the more violent type, were viewed as hostile to man. Such a figure was *Ira* (or *Gira*);† another was *Ishum*, more specifically a god of fire; a third was *Namtar*, the plague-god *par excellence*; though, instead of being directly identified with Nergal, the latter is regarded as his servitor, in which rôle *Ira*, also, appears at times.

We have seen that Nergal is also associated with Ninib as the god of war; but the most important function assigned to Nergal in the systematized pantheon is as the chief of the gods who preside over the world of the dead. The Babylonian priests, in further development of the current popular views in regard to the condition of the dead in the nether world (upon which we shall dwell in a subsequent section), set up two pantheons—one for the living, and one for the dead. In the course of time the differentiation between the two became so marked that it was commonly held that the gods, whom we have hitherto been considering, exercised control over the living only, who upon death passed out of their supervision. The dangers from hostile gods and demons, however, did not cease with the approach of death, and it was necessary to secure protection from the spirits that infested the graves, and that followed the dead to their abode in the subterranean cave in which they were popularly supposed to be housed. Such protection could be gained only by an appeal to deities more powerful than the demons; but the gods so addressed were quite different from those who protected the living. Nergal, as the god of fevers and pestilence—a prototype of the angel of death—was appropriately selected as the chief of this nether world pantheon. At his side was a consort, *Eresh-kigal* or *Allatu*. She is a kind of counterpart to Ishtar, and, originally ruling independently in the lower world, is represented as accepting Nergal as her mate.

Grouped around Nergal and Eresh-kigal are a series of gods forming the court of the Divine pair, who, besides doing their bidding, determine with them the condition of the dead. Besides Eresh-kigal, we encounter a consort, *Laz*, given to

Nergal in his position as a member of the pantheon of the living; and just as Nergal belongs to both pantheons, so there are other deities, like *Nin-gish-zida*, whom we encounter in the pantheon both of the upper and of the lower regions. Remembering that this latter pantheon represents largely a doctrine of the schools, we need not be surprised to find gods who belong to both pantheons; and, though there is no direct evidence for the fact, it seems likely that, as among the Greeks, most of the gods of the lower world were regarded as having their sojourn in that region for a part of the year only. In short, the popular element in this doctrine of a lower world pantheon is represented by the nature myth, which symbolizes the change of seasons by transferring the abodes of certain gods—more particularly gods of vegetation and of life in general—to the nether world during the season of rain and storms, when Nature herself seems to have succumbed to the powerful Nergal and his consort.

5. *Adad*.—Shamash, Ninib, and Nergal, as we have seen, symbolize the sun in general, and in its twofold aspects as a beneficial and a harmful power. But, besides the destruction brought about by the fierce rays of the summer sun, Babylonia and Assyria suffered from the even greater havoc wrought by the rainstorms, accompanied by destructive winds, during the wintry season, which lasted for almost six months. The god who, in the systematized pantheon, personifies these winter storms is Adad, who was also known, in Assyria at least, as *Ramman*, i.e. 'the thunderer.' He bears some resemblance to the old Bel of Nippur, who, as the god of the earth and of the atmosphere immediately above it, has also the traits of a storm-god.

Besides Adad and Ramman, there are various other names by which the god is known (apart from numerous epithets), such as *Martu*, *Mer*, and *Bur*, which may be taken as indications that he likewise, just as Ishtar, Ninib, and Shamash, has absorbed the rôles of other local deities who personified the wind and storm. On seals and in sculptured scenes he is depicted as armed with the thunderbolt and lightning; and, since many of the myths of Babylonia deal with the conflict of the powers of nature, Adad is rarely absent in them, being generally, indeed, assigned a prominent rôle. But even the destructive winter rains and storms have their favourable aspects, since they are essential to the fructification of the earth; hence Adad is viewed also as a god who brings blessings to the fields. It was essential, therefore, to propitiate him in order to secure oneself against his too great violence, which would result in havoc instead of blessing. His curse was particularly powerful; and, accordingly, at the close of their inscriptions, Babylonian and Assyrian rulers alike are found invoking Adad to bring famine and devastation upon their enemies by a failure of the crops. Instead of bringing forth plants, he can cause weeds and thistles to spring up. Woe, therefore, to him whom Adad desires to punish! The ethical element is also introduced into the conceptions concerning Adad, and he is very often associated with Shamash as the god who punishes the wrong-doer and secures justice for one who has been injured. Shamash and Adad appear, indeed, so frequently in hymns and in oracles as 'the lords of justice,' the Divine judges, that one is justified in interpreting this association in terms of a doctrine forming part of the Babylonian theology, according to which the specifically beneficial and specifically violent manifestations of nature were combined to give expression to the view that good and evil, blessings and curses, are dealt out on the basis of justice.

* A temple to Ninib, dating from the days of the New Babylonian period, has been unearthed by the German expedition at Babylon (*Mittheil. d. Deutschen Orient. Ges.*, No. 10).

† The former reading, *Dibbarra*, is to be abandoned. Although the correct reading is still uncertain, the probabilities are in favour of *Ira*, which is adopted by Zimmern, *Keilschriften u. d. Alte Testament*, p. 587.

The consort of Adad is *Shala*, who, however, is merely a pale reflexion of the male deity, and plays no independent part whatsoever. She is not even as frequently mentioned by the side of Adad as are the consorts of some of the other gods.

6. **Marduk.**—The political supremacy acquired by the city of Babylon c. 2250 B.C., and maintained with some interruptions, notably during the Kassite rule (c. 1730 to 1150 B.C.), when the attempt was made to reinstate Bel of Nippur as the head of the pantheon, brought about such important changes in the old Babylonian pantheon that one is tempted to divide the Babylonian religion into two periods—the one prior to the supremacy of Babylon, the other after this supremacy had been secured. With Babylon as the capital of the united States of the Euphrates Valley, the advance of the local deity, Marduk, to a position at the head of the pantheon naturally followed. Originally a solar deity, and symbolizing more specifically, like Ninib, the sun of the spring solstice, which triumphs over the storms of the winter season, Marduk becomes 'the lord' *par excellence*; and this supreme position is emphasized by his actually assuming the dignity and name of *Bel*—hitherto the designation of the chief deity of Nippur. Such a change involved a general shifting in the relationship of the gods of the old Babylonian pantheon to one another, with the result that under the influence of the priests of Babylon an entirely new theological system was evolved. Ancient myths were transformed so as to accord to Marduk the place due to him. Important acts, such as the regulation of the order of the Universe and the creation of mankind—hitherto ascribed to Bel of Nippur, to Ea of Eridu, or to a goddess Aruru—were transferred to Marduk. The incantation rituals were to a large extent altered with a view to establishing the position of Marduk as the ultimate source of healing, of protection, and of all blessings. The gods were represented as forming a court around their chief, hailing Marduk as their leader, and paying him homage. The hymns composed in his honour and the prayers addressed to him by the rulers embody sentiments that might be regarded as an index of a decided advance towards a monotheistic conception of the Universe, and unquestionably the steady growth of the Marduk cult had its outcome in giving to the Babylonian religion a far more spiritual character than it had hitherto acquired. While the cults of En-lil at Nippur, of Sin at Ur and Harran, of Shamash at Sippar and Larsa, and of Ea at Eridu, were maintained, and these places continued to be regarded as religious centres of the first rank, the temple of Marduk at Babylon, known as *E-sagila*, i.e. 'the lofty house,' became the central sanctuary of the land, and around the sacred area in which it stood chapels and sanctuaries were erected, as formerly at Nippur, to all the chief gods, who could thus be worshipped in one place. True, certain concessions were made to the traditions of the past, such as making Ea the father of Marduk; but the dependence of Marduk upon Ea involved in such a relationship was cancelled by the readiness and zeal with which Ea acknowledged the superiority of his son.

The Babylonian creation story in the final form in which it has come down to us may be taken as the typical illustration of the transformation of doctrines brought about through Marduk's advance to the head of the pantheon. Several old nature myths have been combined in this story to form a great 'Marduk' epic—a grand pœan sung in his honour. The overthrow of Tiamat, the monster symbolical of the chaos that rules during the

rainy season; was probably accomplished by Marduk, as the sun-god who drives away the storms. But there are evidences in the tale of the existence of a far more powerful being, *Apsu* ('the deep'), who has been conquered by Ea; and it was the latter, no doubt, to whom, in one form of the story, the creation of mankind was ascribed. So in other versions, originating in different centres, we find other gods invested with this distinction. But all rivals fall into the background by the side of Marduk, to whom everything is attributed; and the gods themselves bestow fifty glorious names upon him—and thus transfer their own attributes and powers to the chief god of the city of Babylon.* They resign, as it were, in his favour. Hence the interesting phenomenon that the originally solar character of the deity crops out only in the ideographic method of writing his name as 'child of the day,'† and in incidental references; whereas the side that is most strongly emphasized is his headship of the pantheon, concentrating in his person all the attributes and powers distributed among the gods.

His consort is generally *Sarpanit*—a name signifying originally the 'shining one,' but interpreted as though compounded of *zêr* 'seed' and *bânitu* 'producing,' so as to admit of identifying her with the mother-goddess Ishtar. This is actually done in hymns,‡ though the process is not, as a rule, completely carried out. *Sarpanit* appears merely as an associate of the powerful Marduk, sharing in his glory without materially contributing to it.

7. **Nebo.**—Opposite Babylon lay a city, Borsippa, which there are good reasons for believing to have been older than Babylon itself. Such a supposition best accounts for the fact that the god of the place, Nebo, holds a prominent position in the pantheon by the side of Marduk. True, Borsippa becomes, in course of time, merely a suburb of Babylon, and this dependence finds expression in making Nebo the son of Marduk; but, on the other hand, on the great festival of Marduk, which was the New Year's Day, Nebo takes a part; and even Marduk pays homage to Nebo, his son, by accompanying the image of the latter part of the way back to the sanctuary at Borsippa, after the formal visit of the son to his father. Moreover, there is one attribute assigned to Nebo which signals him out even from Marduk. He is the representative of wisdom; and to him the art of writing is ascribed even by the priests of Babylon, who in their astronomical reports do not hesitate to mention Nebo before Marduk—a custom that was adopted by the Assyrian scholars. In this respect he bears an affinity to Ea; and, like the latter, he appears to have been originally a water deity—perhaps the god who had his seat in the Euphrates river, as Ea was supposed to dwell in the Persian Gulf.

There is, clearly, some connexion between the Ea and Nebo cults, though its precise nature is still unknown to us. Nebo appears under the form *Dumu-zi-uaub*, which designates him as a son of the 'deep,' here used for Ea. Berosus is in accord with the evidence derived from the Babylonian literature in representing Ea—whose name appears in Syncellus' extract from Berosus as *Oannes*§—as the god who instructs mankind in various arts, including writing. Ea retains to the latest period the general attribute of wisdom, besides being regarded as the general protector of mankind; but the specific trait of

* See King, *Seven Tablets of Creation*, i. pp. 94–111.

† Delitzsch, *Beiträge zur Assyriologie*, ii. 623.

§ Cory's *Ancient Fragments*, p. 57.

being the god of writing is transferred to Nebo, though this is done to a much more decided extent by the Assyrian scribes than by the Babylonians. One is inclined to conjecture that the northward course of culture, which led to the founding of the city Borsippa and to the establishment of an important school there, with a more special cultivation of astronomy than elsewhere, led to the investing of Nebo with Ea's attributes; and, as the intellectual centre shifted from Eridu to Borsippa, Nebo assumes, in a measure, the rôle formerly assigned to Ea, without, however, overshadowing the latter. The priests of Babylon seek to effect a compromise between the present and the past, by making Marduk the son of Ea, while Nebo in turn becomes the son of Marduk, so that the ultimate source of wisdom under this system is still the god of Eridu, even though his activity is transferred in such large measure to Marduk and Nebo. It is a feature of an established priesthood that it never breaks entirely with the past, and in the systematized Babylonian pantheon the honour of Ea is protected by making him a member of the great triad, whereas the real head of the pantheon is Marduk, to whom Nebo is given as a kind of messenger, entrusted with carrying out his dictates. In Assyria, where the connexion with the remote past was less keenly felt, this process is still further developed, and the Nebo cult is laid hold of as an offset to the predominance of Marduk, who was felt to be a rival to the patron god of Assyria—Ashur, naturally placed at the head of the pantheon by the Assyrian priests. Hence some of the Assyrian rulers, while not altogether ignoring Marduk, preferred to manifest their homage to the gods of the south by the glorification of Nebo. They erected sanctuaries to this god in their capital, and proclaimed their confidence in him. Assurbanipal, in collecting the literature produced in the south, ascribes the inspiration of this policy to Nebo and his consort Tashmit (or Tashmitum), who, as he tells us in the subscription frequently attached to the copies, 'opened his ears' and instructed him to make the wisdom of ancient times accessible to his subjects. As originally a water god, Nebo is also an agricultural deity, who opens the subterranean sources and irrigates the fields. In religious as well as in historical texts he is invoked as the one who causes the corn to grow. His consort, generally termed *Tashmit*, but also known as *Nanâ*, plays an independent part. The name *Nanâ*, properly belonging to the chief goddess of Erech, indicates that this consort was regarded merely as a form of Ishtar—at least in the later periods—while Tashmit is a purely artificial creation. The name signifies 'revelation'; and *Tashmit* appears to have been originally merely a designation of Nebo himself, who is, in fact, spoken of as *ilu tashmêti*, i.e. 'god of revelation.' Under the influence of the doctrine which assumed that every god must have a female consort, Tashmit became the associate of the god of Borsippa.

8. Gırru-Nusku.—Another phase of solar worship in Babylonia is represented by the conception of a deity symbolizing the element of fire. In the Babylonian pantheon this fire-god commonly bears the name of *Gırru** (formerly read *Gibil*), whereas in Assyria he is generally known as *Nusku*.† Though decidedly to be classed among the great gods of the pantheon, Gırru plays a rôle in the incantation texts rather than in the historical inscriptions of Babylonia and Assyria. He is invoked in the incantation rituals compiled as a means of driving away the demons and evil spirits;

and this is due to the prominence held by fire in the ritual. Images of the demons—in wood, wax, and other materials—were made, and burned to the accompaniment of incantations; and, as the images were consumed, it was believed that the demons themselves were destroyed. Night being a favourite time for the exorcizing rites, Nusku was brought into association with the moon-god; although the fire symbolized by Nusku is, without much question, the heat of the sun. On the other hand, the possibility of differentiating Nusku from Gırru is furnished by the relationship which the former is made to bear to Nebo. Like Nebo, Nusku is called 'the bearer of the brilliant sceptre' and the 'wise god'; and, when ideographically written, the god is designated as 'the one wielding the sceptre and the stylus.' Gırru, on the other hand, is brought into connexion with Anu, the god of heaven, and with Ea, the god of the deep,—with Anu by virtue of the belief which identified fire with the heat of the sun, with Ea because of the part that fire plays in the development of civilization, and particularly of the arts, of which Ea is the patron. While, therefore, in both instances the fire which they symbolize is associated with wisdom, in the case of Nusku this wisdom is specialized, as it were, while Gırru is accorded more general and less definite traits. The ethical phases are also somewhat more emphasized in the case of Gırru, though, as the conqueror of demons, both Nusku and Gırru become forces that are hostile to wrong-doing and crime. While in this way we may still in a measure follow the process which led to the amalgamation of two fire-deities who once had an existence independent of one another, and belonged probably to two different localities, in the religious literature this process of amalgamation is complete. Nusku is viewed as the messenger of Marduk, who carries the words of Marduk to his father Ea, while Gırru acts in a similar capacity in association with Marduk and Ea.

9. Ashur.—The dependency of Assyria upon Babylonian culture extends into the domain of religious doctrines and rites. The contributions of the Assyrian *literati* to the religious literature preserved in the brick library of Assurbanipal were limited in number and of a minor character. They represented the adaptation of Babylonian models to conditions prevailing in Assyria, rather than original contributions; and, similarly, in the rites observed in the temples of Assyria we have Babylonian rituals modified so far as was needed, and still further elaborated. It is natural, therefore, to find the Assyrian pantheon practically identical in character with the one produced in the south. To be sure, local cults continued to exist in large numbers both in Babylonia and Assyria; but the movement which, as a result of various factors, led to the singling out among the large number of local cults of the group of deities set forth above, who formed what may be called the active pantheon of Babylonia, was extended to Assyria. There we meet with the doctrine of the triad, involving the recognition of three great powers controlling the Universe, as well as with the singling out of the forces of nature such as Sin, Shamash, Ninib, Nergal, Adad, Nusku, who, together with Ishtar, the symbol of fertility and vegetation, constitute the great gods invoked by the Assyrian kings in their official inscriptions. That less attention was paid to Marduk in Assyria than in Babylonia, is not surprising; for, although recognized as the head of the Babylonian pantheon, to Assyrian rulers Marduk was also the patron deity of the city of Babylon, which was the natural rival of the centre chosen as the seat of Assyrian rule. It was chiefly when the Assyrian

* See Zimmern, *Keilinschriften u. das Alte Testament*, p. 417.

† With various by-forms like *Nashuku*, *Nashku*, etc. See Johns, *An Assyrian Doomsday Book* pp. 12-14.

kings wished to emphasize their control over the affairs of Babylonia that they invoked the name of Marduk; and even in such a case they preferred the name of En-lil or Bel, which, though adopted as the designation of Marduk, disguised the close association of the god with the city of Babylon. In like manner, the consort of Marduk is generally called Nin-lil or Belit in the Assyrian inscriptions, instead of Sarpanit. There was less objection to paying homage to Nebo, and indeed there are indications that the Assyrian rulers at various periods endeavoured to play off Nebo against Marduk. It can hardly be accidental that one ruler Adad-nirari III. (812-783 B.C.) should go so far as to declare that Nebo is the only god whom mankind should trust; and one feels likewise that when Assurbanipal attributes his inspiration to collect the remains of Babylonian literature to Nebo and Tashmit, he is aiming a blow at the rival Marduk in thus implying that the wisdom of Babylonia is the work of the god of Borsippa and not of the god of Babylon.

Instead of Marduk, indeed, the Assyrians recognized as the practical head of their pantheon the deity who presided over the fortunes of the ancient city on the Tigris, known in earlier times as A-usar, and later on as Ashur; and the circumstance that in the north a powerful State developed by the extension of a city (precisely as in the south the Babylonian empire represented merely the extension of the city of Babylon) made it obligatory to assign to the god of A-usar the same position which was accorded in the south to the god of Babylon. We thus obtain one figure in the Assyrian pantheon who represents an original contribution, and who embodies, as it were, the genius of Assyria. That the Assyrians, in thus raising the god of A-usar to a position at the head of the pantheon, had in mind the creation of a rival to Marduk, is shown not only in their avoidance of the latter, as just pointed out, but in the choice of the name *Ashur*, a modification of *Ashir*,* which with the force of 'overseer' or 'protector' is one of the titles given to Marduk.† The assonance between *A-usar*, the name of the oldest capital of Assyria, and *Ashur*, helped to bring about the introduction of Ashur as the name of the patron deity of the place, and from the god the name was extended to the city and to the country; so that *A-usar* disappears almost completely, and we find in Assyrian inscriptions *Ashur* applied to the god, to the city, and to the country or district of Assyria alike and without distinction. The god Ashur becomes so thoroughly identified with the country of Assyria that the change of the capital from Ashur to Calah, and later to Nineveh, in no way affects the position of this deity, who sums up, as it were, the power and spirit of the Assyrian empire. The local deity of A-usar appears to have been originally regarded as a sun-god; but this phase is entirely obscured by the warlike traits given to Ashur in consequence of the prowess displayed by the Assyrian armies. War was the natural element of the Assyrians, who in this respect present a contrast to their more peacefully inclined cousins in the south; and to such an extent was this the case, that almost all the gods of the Assyrian pantheon take on a warlike aspect, becoming, as it were, minor Ashurs by the side of the great and chief god of war. It is Ashur

who, surrounded by the other gods acting as his guards and attendants, leads the Assyrian armies to victory. Instead of erecting statues to him, the Assyrians represented him by a standard surrounded by a winged disc, to which a picture of a warrior in the act of discharging an arrow was attached. This standard was carried into the camp, and the god was literally present in the thick of battle, guiding and encouraging his favourites—the kings and their generals. To Ashur, accordingly, all victories were ascribed; and so secure was his position that it was possible for Assyrian kings to recognize by the side of Ashur a special patron god—one choosing Nebo, another Ninib, a third Shamash—on whom they could shower honours and glorifying epithets without arousing the suspicion of disloyalty to the head of the Assyrian pantheon.

There was another aspect of Ashur which makes him the most characteristic figure in the Assyrian religion. He was not brought into direct association with any other god. Marduk, despite his position at the head of the Babylonian pantheon, had to yield to certain prerogatives possessed by Ea, as whose son therefore he was depicted. In turn he became the father of Nebo. Ashur, on the other hand, is childless, and acknowledges no other god as his father. What is even more noteworthy, although Ishtar is frequently named by the side of Ashur she is not his wife, and there is, in fact, no female reflexion or consort assigned to Ashur such as we find in the case of all other deities. He rules without a rival, and he stands virtually alone. Indeed, we gain the impression at times of his being the only god recognized by the Assyrians as exerting a real influence over his subjects. He reminds us in some respects of the national deity of the Hebrews, Jahweh, who without consort or offspring brooks no other god by His side. And just as in Babylonia the spiritualizing process, which accompanies the development of every religion, leads to the establishment of the doctrine of a *triad* of gods standing far above the gods of the active pantheon, so in Assyria this process has its outcome in the conception of a single deity who presides over the fate of the country, who marks the genius of the empire established by the Assyrian kings, and who seems to suffice for all the needs of his subjects. This unique position of Ashur was first recognized by Sayce,* who goes so far as to express the opinion that, under other circumstances, there might have developed as spiritualistic a faith as marked the growth in Israel of Jahweh from a national to a universal deity. However this may be, the conception of Ashur as expressed in the annals of Assyrian kings and in the hymns composed in his honour, represents the closest approach to a monotheistic conception of the Universe, despite certain well-marked limitations, to be found in the religion of ancient Mesopotamia.

(B) *MINOR DEITIES*.—Besides the chief deities to whom in a general sketch we must largely confine ourselves, the historical texts, the religious literature, and proper names, reveal the existence of a large number of gods that may in a general way be included under the term 'minor.' To a large extent, the cult of these deities is of a purely local character; and it is natural to find the names of these numerous local gods surviving in the thousands of proper names that we encounter in the legal and commercial documents from the age of Sargon I. to the end of the New Babylonian empire. In the historical texts, on the other

* In one of the oldest of Assyrian inscriptions—that of Irishum (c. 1730 B.C.)—the god of A-usar is called *Ashir*. See Meissner, *Assyriologische Studien*, i. p. 17.

† e.g. Rawlinson, iv. 2, 57, obv. 32; Delitzsch, *Weltschöpfungsepos*, p. 155; K 2107, obv. 2. For the full proof of the views here advanced, see an article by the present writer, 'The god Ashur,' in the 24th vol. of the *Journal of the American Oriental Society*, pp. 282-311.

hand, gods of merely local significance are introduced only in special instances, and generally when the rulers wish to parade their own prominence by invoking as large a number of gods as possible, who are represented as combining to shower their favours on their royal minions. Similarly, in the religious literature, and more particularly in incantations, the natural desire to secure the assistance of as many deities as possible in the struggle against evil demons and the mischief wrought by sorcerers would lead to the introduction of many other gods besides those recognized in the official pantheon as belonging to the first rank. We have already had occasion to refer to some of these minor gods and goddesses, whose rôles were gradually absorbed by some important god to whom they bore a resemblance. Thus we have seen that solar cults centring around Nin-gish-zida, Nin-girsu, Nin-shakh, Za-mal-mal, and others, are all represented in the official pantheon by Ninib. This, however, does not prevent the survival of these solar deities to a late period in proper names and in incantations. Again, as we have seen, Nanâ the goddess of Erech, Ninâ associated with a quarter of Shīrpurla known as Ninâ, and Anunit connected with Agade, became in the course of time merely names of the great Ishtar, though surviving likewise in the religious literature in myths and legends, as well as in incantations.

Among other gods who in the old Babylonian texts still enjoy an independent existence are Lugal-banda, signifying 'mighty king,' and his consort Nin-sun, 'the destructive lady,' who were worshipped in Erech. The latter may be identical with Nanâ; the former is a solar deity of the violent type, and is absorbed by Nergal.—A distinctively local goddess is Nin-mar, the 'lady of Mar,' whose seat of worship lay in or near the Persian Gulf; and the name of her temple, *Ish-gutur*, i.e. 'the court for all peoples,' testifies to the prominence given to her at one time by her worshippers.—A goddess of the agricultural type is Nidaba, invoked by several of the old Babylonian rulers, and her name survives to the days of Assurbanipal as a synonym of fertility.—Again, we encounter in the inscriptions of rulers, so far removed from one another as Gudea on the one side (c. 3000 B.C.) and Sennacherib on the other (B.C. 705–681), a god Ka-di (probably an ideographic designation), who appears to have been the patron of Dur-ilu, a town situated near the Elamitic frontier.

The consort of Nin-girsu, known as Bau, is one of the most prominent goddesses in the old Babylonian pantheon. She would have been included in the official pantheon as one of the great deities, but for the absorption of the rôle of Nin-girsu by Ninib, which led to the substitution of Gula for Bau. As Nin-girsu is more particularly connected with Girsu, one of the quarters of Shīrpurla, so Bau belongs to another quarter of the town (or district) known as *Uru-azaga*, 'the glorious city,' where her temple stood. As the 'mother of Shīrpurla' and 'the chief daughter of Anu,' she is pictured as presiding over the fates of her subjects. It is she who grants success to the labours of the tillers of the soil. The rulers of Shīrpurla ascribe to Bau the power and glory that they command; and one of the oldest of the Babylonian festivals, *Zag-muk*, celebrated as the New Year's Day, was instituted in her honour. In the oldest period Bau already absorbs the rôle of another goddess Ga-tum-dug, from whom, however, she is still distinguished in the inscriptions of Gudea.

A god of the solar type, Dumu-zi, 'child of life,' appears in various of the inscriptions of the Old Babylonian period; and, besides continuing to play

an important rôle in the eschatology of the Babylonians, survives in the name of the fourth Babylonian month.*

Owing to the peculiarity that in the Old Babylonian inscriptions and in the religious literature the names of the deities are written ideographically, we cannot be certain in all cases whether an ideographic form actually represents a new deity or is merely a designation of one already encountered; but the enumeration of lists of gods frequently attached by the rulers either at the beginning or at the end of their inscriptions, enables us to gather in a general way the extent of the pantheon in the various periods of Babylonian history; and the study of these lists justifies the distinction which we have emphasized between the period before Hammurabi and the period subsequent to this ruler, when, as we have seen, a shifting of the pantheon took place, and a new direction was given to the development of a theological system by the prominence assigned to Marduk as the chief god of the capital of the Babylonian empire. Two of the oldest lists are furnished by Lugalzaggisi, whose date may be as early as 3500 B.C., though according to other scholars we are not justified in going much beyond 3200 B.C., and by Gudea (c. 3000 B.C.). Lugalzaggisi† invokes the following ten deities: En-lil (Bel), Anu, Nidaba, Ea, Shamash, Sin, Innanna (or Ishtar), Nin-kharsag (or Belit), Shid, and Nin-agid-khadu. We have had occasion to refer to all of these except the two last named, who are both goddesses, and of whom nothing more can be said than that they belong to the immediate pantheon of Erech, and are probably purely local deities. Gudea's largest list‡ embraces eighteen deities: Anu, En-lil, Nin-kharsag, Ea, Sin, Nin-girsu, Ninâ, Nin-dara, Ga-tum-dug, Bau, Innanna (or Ishtar), Shamash, Ishum, Gal-alim, Dun-shagga, Nin-mar, Dumu-zi-zuab, and Nin-gish-zida. Of those not as yet referred to, namely Nin-dara, Ishum, Gal-alim, Dun-shagga, and Dumu-zi-zuab, it is sufficient to remark that they are all deities of a purely local character. The first named is a solar deity, whose rôle appears to have been absorbed by Nin-girsu. The same appears to have been the case with Gal-alim and Dun-shagga. Ishum is merely another designation of the fire-god Giru, while Dumu-zi-zuab, i.e. 'child of life of the deep,' is a water deity, associated with Borsippa, and apparently merely an older designation of the god Nebo, though in later times identified with Marduk.

Altogether, we encounter about thirty distinct deities in the historical and votive inscriptions of the rulers before Hammurabi; but that this number is far from exhausting the minor deities worshipped by the side of those holding the front rank as the greater gods, is demonstrated by the circumstance that the names of more than fifty gods entering as elements into proper names occur in one of the oldest Babylonian inscriptions, that of Manishtusu,§ whose date is certainly before 3000 B.C., and perhaps as early as 3500 B.C.¶ Some of the gods thus utilized in the formation of proper names are of foreign origin—Elamitic and Kassitic; but abstracting these, we still obtain quite an addition to those directly invoked in the inscriptions of this period. The number is still further increased by a study of the proper names in legal and commercial documents of the Hammurabi period, which furnishes

* i.e. *Tammuz*, according to the Hebrew form of the name of the month.

† Hilprecht, *Old Babylonian Inscriptions*, i. 2, No. 87, col. i. 1–35.

‡ Inscription B, col. viii. and ix. (de Sarzec, *Découvertes en Chaldée*, pls. 16–19).

§ Published by Scheil in *Textes Élamites-Sémitiques*, i. pp. 6–39.

¶ Scheil places this ruler at 4500 B.C., which is, however, too early a date. See above, p. 537^b.

more than seventy distinct deities;* and, when we turn to incantation texts and add the gods who are there invoked, the total ranges considerably over one hundred.

But even in this way we cannot be certain of obtaining even an approximate estimate of the minor deities worshipped in Babylonia and Assyria; and in view of the fact that our material is still scanty compared with the enormous extent of the Babylonian literature, taken together with the circumstance that almost every new publication of texts brings new gods to our notice, it is easier to err by too low than by too high an estimate.

More important, however, than the attempt to estimate the number of gods once worshipped in Babylonia, is the recognition of the distinction to be drawn in a study of the religion of Babylonia and Assyria between the popular phases of the religion as represented chiefly by the very numerous local cults, and the endeavours of the priests and theologians to systematize the current beliefs. The outcome of these endeavours was the distribution of the forces working in the Universe among a comparatively restricted number of deities, representing on the one hand the gods and goddesses worshipped in the chief religious centres of the Euphrates Valley and of Assyria, and, on the other, symbolizing the chief phenomena and great powers of nature—the whole being arranged according to certain guiding principles.

(C) *THE COMBINED INVOCATION OF DEITIES.*—To see these principles at their best, we must turn to the combined invocation of deities to be found in the inscriptions of the period subsequent to the days of Hammurabi. 1. For Babylonia, our best sources are the so-called boundary stones, which guarantee certain rights to owners of lands. These inscriptions almost invariably conclude with invoking the curse of the gods of the pantheon upon any who attempt to set aside these rights or to deface or destroy the monumental records on which they are inscribed. A sufficient number of such boundary stones—from the 14th to the 8th cents. B.C.—have now been found to enable us to draw definite conclusions.† The number of deities called upon varies from twelve to nineteen. The list usually begins with the triad Anu, Bel, and Ea, to which at times a female representative—Nin-makh or Nin-kharasag—is added; followed by the second group, consisting of Sin, Shamash, and Adad, or these three with Ishtar; followed by Ninib and Gula,—the latter also under the form Nin-karrak,—who, as the gods presiding over boundaries and boundary rights, are never wanting; but here the agreement among the monuments of this character ends. On many, but not on all, we find Marduk and Nebo. Occasionally Marduk occupies the first place, which of right belongs to him, but, inasmuch as many of these documents date from the Kassite period, when, as will be remembered, the attempt was made to reinstate Bel of Nippur in the rank formerly occupied by him, Marduk is more frequently placed after the second group of deities. Nergal is generally included, and also a serpent-god, Sir, who, besides being named, is invariably depicted among the symbols of the gods, which, in most cases, are attached to the inscription.‡ Girru and Nusku appear only in one instance, while the two chief Kassite deities, Shukamuna and Shumalia, corresponding to the Babylonian Ninib and Ishtar, are

added on several of the monuments dating from the Kassite period. Lastly, a series of local gods—Za-mal-mal, the chief god of Kish, and Dun-pa-uddu (both absorbed by Ninib), Pap-nigin-garra (merely again another form of Ninib) and his consort Belit-ekalli ('lady of the palace,' which is another designation of Gula), Shubu and Belit of Akkad (described along with Sin as the gods of a district, Bit-khabban), and, finally, the goddesses Naná, Ishkhara, and Anunit (absorbed by the great Ishtar)—are in several instances introduced, as well as Sarpanit, the consort of Marduk, who in one instance, on an Assyrian boundary stone of Marduk-baliddin's days (721–709 B.C.), appears as Erua.* In all, therefore, we have only about twenty-five distinct deities introduced on some twenty of these monuments, or, abstracting the two Kassite deities, we find the Babylonian pantheon restricted to about twenty-three.

Of course it must be borne in mind again that in some cases the place where the monument is erected leads to the introduction of specifically local deities, who are designated as such; and, since it is a matter of chance which local deities are invoked in this way, we ought properly to remove these from the total. Similarly, a god like Sir is introduced by virtue of the character of the monuments in question. There remain the following thirteen, who may be regarded as constituting the official pantheon during the second period of Babylonian history: the triad Anu, Bel, and Ea; the group Sin, Shamash, Adad, and Ishtar; the pairs Ninib and Gula, and Marduk and Nebo respectively; Nergal and Girru-Nusku. If we add to these the consorts who play an active part in the religious life, Belit and Damkina, the consorts of Bel and Ea respectively; Nin-gal, Á, and Shala, the consorts of Sin, Shamash, and Adad respectively; Sarpanit and Tashmit for Marduk and Nebo,—we have a total of twenty gods.

The general tendency to be observed in the invocation of deities on the boundary stones, as we pass from one century to another, is to reduce the number introduced; and this tendency is in accord with the general course taken by the development of the theological system as devised by the priests. In the days of the Assyrian empire the tendency becomes even more marked. So Assurbanipal (B.C. 668–626), who is fond of calling upon all the great gods, never extends the list beyond eleven, as follows: Ashur, Sin, Shamash, Adad, Bel (by whom he means Marduk), Nebo, the two Ishtars (the Ishtar of Nineveh and the Ishtar of Arbela), Ninib, Nergal, and Nusku. To these the triad, although less prominently dwelt upon in Assyrian inscriptions, is to be added, which again gives us fourteen: in adding the consorts of Bel, Ea, Sin, Shamash, Adad, Marduk, Nebo, and Ninib, we have twenty-two deities, the addition of two to the Babylonian pantheon being formed by the second Ishtar and by Ashur. In the New Babylonian period, so far as the testimony of the inscriptions goes, the actual cult is confined chiefly to Marduk, Nebo, Sin, Shamash, and Ishtar; and though kings like Nebuchadrezzar pride themselves upon erecting chapels and sanctuaries to many other deities, including some whose cult they appear to have revived, still these five deities receive such a large share of attention as to make the others quite subsidiary during the Assyrian period likewise, though in the earlier part of this period the cult of Anu is still prominent, and quite a number of other gods are occasionally introduced besides those that appear in Assurbanipal's ordinary list.†

† See, e.g., two inscriptions of Sennacherib (Meissner-Rost, *Bauinschriften Sennacherib*, pp. 99–102), where we find lists of

The actual cult, nevertheless, centres so largely around Ashur, Ishtar, Sin, Shamash, Adad, and Nebo (to which number, perhaps, Marduk might be added), that these constitute for all practical purposes the active pantheon during the greater part of the existence of the Assyrian empire.

2. To what extent local cults continued to flourish during the second and third Babylonian periods, and in the Assyrian period, it is quite impossible to say. No doubt, the little sanctuaries scattered throughout the country retained some of their popularity, though even places removed from the great centres of religious life could hardly have escaped the influence of the system that was developed, and that identified the various moon-deities as forms of one and the same god, and similarly distinguished only a limited number of distinct solar deities, so that many of the old local deities would represent in the later periods a survival largely in name. On the other hand, the process of concentration did not extend further than above indicated. The active pantheon was limited to five or six deities; and though occasionally Ashur is celebrated in terms which might lead one to suppose that he was recognized as the only god actually controlling the fate of mankind; and though there are indications in the religious literature and even texts* which point to Marduk's having been represented as having the qualities of all the other great gods,—Ninib, Nergal, Bel, Sin, Shamash, and Adad,—we must not be misled by such phenomena into supposing that the conception which regarded the Universe as the emanation of a single Power or Spirit ever obtained a decided foothold in the Euphrates Valley. It may be that to a few choice minds this view presented itself, but there are no traces of it either in the historical inscriptions of any period or in the religious literature, which are sufficiently definite to warrant us in assuming this to have been the case. At all events, the view never entered to any degree—even the slightest—into the religious life of the people or of the priests; and it is the religious life as *actually* lived that forms the only safe criterion, when dealing with an ancient civilization, for determining the beliefs and doctrines that prevailed. The testimony of the entire Babylonian literature, as of the historical texts of Babylonia and Assyria, is unmistakable in this respect.

We may indeed distinguish, as we have endeavoured to do, several periods in the development of the religious doctrines. We observe clearly the tendency to concentrate the cult on a selection of the numerous deities once worshipped, and we can trace the leading principles which led to the belief in a triad standing above all the gods, and to a group of deities, varying from about thirty in the oldest period to some twenty at a later time, subsidiary to this triad; and we may furthermore note the tendency to reduce the active pantheon to a still smaller number of deities, who absorb the largest share of attention to such an extent as to obscure the others almost completely: but here the process ends. Ashur in Assyria reminds one of the national Jahweh; and Marduk in Babylonia is given certain attributes which are associated by Hebrew writers with Jahweh at the time that the latter is on the verge

eighteen and twenty-five deities respectively; among them some like Gaga, Azag-shud, that occur again only in the religious literature; also the list of twelve and eleven deities respectively in inscriptions of Esarhaddon, dealing with building operations in Babylonia (Meissner-Rost in *Beiträge z. Assyriol.* lii. pp. 228 and 260).

* e.g. the text just published by T. G. Pinches, *Transactions of the Victoria Institute*, xxvii. (1896) p. 8, which has recently been used by Frdr. Delitzsch as a proof of his thesis that monotheistic beliefs were developed in Babylonia. See Johns' translation of Delitzsch's two lectures, *Babel and Bible* (London, 1903), pp. 75 and 144.

of becoming more than the god of a single people; but neither Ashur nor Marduk was ever conceived as a deity who brooks no others by his side, as a *logical* consequence of a belief that there can be only one Power presiding over the Universe, from whom all things emanate. That idea transcends the spiritual horizon of ancient Babylonia and Assyria, and was left to another people to evolve.

vi. THE RELIGIOUS LITERATURE OF BABYLONIA.—Corresponding to the long period covered by the history of Babylonia and Assyria, an exceedingly extensive and varied literature was produced in the Euphrates Valley, a great portion of which is distinctively religious in character, while the parts that cannot be so designated yet contain traces of the influence exerted both by the popular religion and by the theologians who systematized the popular doctrines. In Babylonia, perhaps more than in any other centre of ancient culture, religion was the mainspring of the intellectual activity that was developed. Not only are the religious divisions of the Babylonian literature its oldest constituents, but they represent likewise the most valuable contribution of Babylonia to posterity; and, apart from the value of this literature as a means of penetrating still closer to the core of the Babylonian-Assyrian religion, it contains much that is worthy of notice, and some of its productions can be matched in ancient times only by some of the finest writings contained in the Old Testament.

1. To what age the origin of this literature is to be traced is a question that in the present state of our knowledge cannot be answered. While, as already indicated, the bulk of our knowledge of the ancient Babylonian literature—using this word in the stricter sense—is gained from the tablets in the library of Assurbanipal, these represent merely the copies made in the 7th cent. from the originals that existed in the temple archives of the south; and a sufficient number of these originals have now been found to warrant full confidence in the assertion of Assurbanipal, that he actually sent his scribes to the temples in the old religious centres of Babylonia, for the purpose of having copies made. The script in some of these originals, and above all the dating of a number of them, leave no substantial doubt that at the time of Hammurabi (c. 2250 B.C.) a considerable literature had been produced, and, what is more, such notable productions as the great epic of a hero named Gilgamesh* were already in existence, though perhaps this epic had not yet the form in which it has come down to us in the tablets of Assurbanipal's library. Again, the character of some of the oldest Babylonian inscriptions, and more particularly the diction of the prayers embodied in them, confirm the general impression that the age of Hammurabi represents the culmination of the first period of Babylonian literature, which may thus be safely dated beyond 2500 B.C., and probably will be found to extend to a date close to 3000 B.C. Still, it is advisable to bear in mind that we are as yet without sufficient data to speak with any degree of positiveness as to the beginnings or the early phases of Babylonian literature. We do know, however, that this literature, as was to be expected, is largely religious; and if we exclude the historical and votive inscriptions, which can scarcely be called literature, in its beginnings this literature is *entirely* religious. It centres around the ancient temples; and since the priests attached to the temples remained for

* See, e.g., the fragment of a Deluge narrative (published by Scheil in *Recueil de Travaux relatifs à la Phil. et Arch. Égypt. et Assyriol.* xx. pp. 55-59; consult also Meissner, *Ein altbabylonisches Fragment des Gûlgamos-Epos* (Berlin, 1902).

all times not only the scribes, but the authors of all literary productions, and the exponents of the entire intellectual life, the literature never lost its association with the religion. Again, we are safe in assuming that this oldest religious literature arose from utilitarian motives, or at all events pursued the practical purpose of providing a suitable ritual, that had stood the test of experience in effectually securing the desired ends. It is therefore to the cult that we must look for the key to an understanding of the Babylonian literature in its largest extent, and particularly in its oldest portions.

2. It is not necessary for the purpose of this sketch to determine how far the old Babylonian religion was based on animistic conceptions, or what other features entered into it, since we are unable to trace it further back than the literary evidence, the very existence of which betokens a comparatively advanced stage of thought—certainly a stage far removed from a primitive state of religion. It is sufficient to recognize that the gods, however the belief in them arose, were approached mainly for two purposes—to secure the fulfilment of certain requests or hopes, and to ward off actual or threatened misfortunes. These purposes cover alike the occasions when the ordinary individual saw fit to approach the god, and those when the rulers sought out the ancient shrines; and, whatever the cause that prompted the approach, the favourable answer was dependent upon a single factor—the disposition of the god or gods invoked. But the gods, though each was all-powerful within the jurisdiction assigned to him or to her, were not supposed to control all occurrences in the life of the individual. Their protection extended only—except when specially appealed to—to a general surveillance of the affairs of the individual. The smaller mishaps and accidents incident to daily life were ascribed to the mischievous influence of a lower order of beings, whom, for want of a better name, we may designate demons or evil spirits. The current views with regard to such beings do not appear at any time to have been very definite, and it is therefore difficult to gather from the religious literature any adequate description of them. The demons were supposed to lurk everywhere. They could make themselves invisible, and indeed they generally acted in so mysterious a manner that their presence was perceived only when the consequences of their activity became manifest. They assumed at times the forms of animals, and the strange movements of serpents—their sudden appearance as though coming up out of the ground, and their gliding away as noiselessly as they came—led to a preference being given to this species of animal life, as the mould in which demons took up their being; but, besides serpents, we also have demons in the shape of birds, and in sculptured representations the demons are sometimes given a human shape with grotesque features or with heads of fantastic animals of terror-inspiring aspect.* At no time was one safe from the attacks of evil spirits, who lurked in the streets, and who could pass through walls, chinks, and crevices into the house. Some were supposed to inhabit groves, others had their hiding-places in fields or in ruins. The tops of the mountains, the rivers and seas, and the wilderness, were alike infested with them. To these demons all manner of evil was ascribed: a fall, a headache, a quarrel, an explosion of temper, were all due to them, as well as the more serious diseases to which mankind is heir; and it was generally believed in these cases that some evil spirit had taken up its abode

in the body of the afflicted individual, and was causing the pain or the wasting away from fever or the decay of a diseased organ.

3. **Incantation rituals.**—Against the demons appeal was made to the gods, and, through the medium of priests acting as exorcizers, an endeavour was made to get rid of their pernicious influence, or to drive them forcibly out of the body. The power thus vested in the hands of the priests lay in the use of the proper words which would serve as a check on the actions of the demons, accompanied by certain symbolical rites, such as ablution and purification, which would complete the work of overpowering the hostile powers. Prayer thus takes its rise in Babylonia as the utterance of certain appeals to the gods; and it is natural to find in the earlier stages of religious thought as much and perhaps more stress laid upon the words so used as on the motive which prompted the direct appeal to the intervention of the gods. To the body of the people the favourable response to the appeal was at all times directly associated with the words employed, and up to a certain stage in the development of the religious beliefs this view was, no doubt, shared by the priests. As a consequence, the greatest possible importance was attached to the use of the proper words or formulas in seeking relief from the baneful spirits; and, when the exorcizing priests failed in their task, the failure was consistently ascribed to the use of a wrong or unfortunate formula that was not applicable to the case in question. There thus arose in the temple service, on the basis of actual experience, fixed formulas varying for different emergencies, the efficiency of which had been tested by a sufficiently large number of instances to warrant complete confidence in them. These formulas, handed down from one generation to another, were given a permanent form so as to ensure their preservation; and it was a further natural step to collect these formulas into a series of greater or shorter extent that could properly be designated as 'incantation rituals.' Quite a number of such series have been found among the tablets of Assurbanipal's library, and the names given to them are themselves indicative of the ideas underlying the collection. Thus we have a series which embraced at least sixteen tablets, each one of which bore a number designating it as a part of a ritual known as 'the Evil Demons.' Another series, consisting of at least nine tablets, was called the 'Head-sickness,'* because a goodly portion of it was devoted to formulas for ridding individuals of various diseases that had their seat in the head, and were due to some demon that had taken up its abode in the human body. Again, two series bear the names 'Maklu' and 'Shurpu' respectively, both terms having the sense of 'burning,' and owing their designation to the prominence assigned in them to the burning of effigies of the demons or of the witches who controlled the demons, as a means of getting rid of their baneful influence. Corresponding to the distribution of functions among the gods, the attempt was made to specialize the powers of the demons, though it is doubtful whether this process of differentiation was ever fully carried out. Thus there was a female demon, or rather a class, called *Labartu*, supposed to be specially dangerous to children and their mothers; and we have an incantation series which was known as '*Labartu*,'† and which was

* These two series are published in *Cuneif, Texts from Tablets in the British Museum*, parts xvi. and xvii., and interpreted by Thompson, *Devils and Evil Spirits of Babylonia*, vols. i. and ii.
† See Myhrman, *Zeitschrift für Assyriologie*, xvi. pp. 141-200.

* See, e.g., the illustration in Thompson, *Devils and Evil Spirits of Babylonia* (1903), vol. i. pl. 2.

entirely taken up with formulas and directions against this special class of evil spirits.

These rituals thus form a distinct division of the religious literature, and we are probably justified in assuming that they represent the oldest division. In regard to their composition—more particularly as to time and place—we are dependent for the present on internal evidence alone, and that often of an unsatisfactory nature. The fact that the god Ea, as the protector of humanity, plays a prominent part in many of the series, taken in connexion with the sanctity that continued from the earliest to the latest days to be attached to Eridu, the seat of Ea worship, points to the temple of Eridu as one of the centres in which incantation rituals were compiled; and, on the other hand, the association of Marduk with Ea, introduced in some of the Ea rituals in a manner which betrays the intention of Marduk's priests to give their favourite a share in the privilege of driving off the evil spirits, is conclusive evidence that the older texts were subject to revision subsequent to the period when Marduk was recognized as standing at the head of the pantheon. Considerations such as these suggest that the rituals were subject to growth and modification. The priests in one religious centre would have no hesitation in embodying in their ritual formulas that had originated and that had been tested in another; but, in doing so, they would be led to introduce such modifications as were required to bring the latter into accord with other portions of the special ritual of the temple in question, and to combine them with formulas of their own. Even a superficial examination of the rituals reveals their composite character; and, upon closer investigation, it is possible to separate in many instances the older from the more recent parts. The mixture of primitive thought with utterances that belong to a much more advanced stage of religious belief is, in fact, a trait that marks all the rituals hitherto brought to light. The conservative instinct led to the retention of what is oldest in these texts, while the impressive hymns and the often strikingly beautiful prayers inserted amidst a jumble of incantation formulas, represent the attempt to give to the old beliefs a more spiritual interpretation.

Before entering upon a description of one of these rituals, which may serve as an example of this division of the religious literature of Babylonia, there is one feature connected with them that yet remains to be considered. Correlative to the belief in the power of the priest to exorcize the evil demons, we find among the Babylonians the belief in the power of certain individuals over the demons, with a view to bringing individuals under their influence; and, as among other nations, this power was more commonly ascribed to women than to men, though we find the belief in sorcerers prevalent as well as the belief in witches. The dividing line between the demons and spirits on the one hand and the witches and sorcerers on the other becomes at times faint; so that it would appear that the latter were also regarded as demons, and not merely as those who had control over them. Still, in general, it is possible to keep the two classes apart, except that, in course of time, the view which supposes the demons to be working at the instigation of the witches and sorcerers rather than independently becomes more marked. In the rituals themselves, however, both phases of the belief in question are found, now the one, now the other being more prominent; and, similarly, in the appeals to the gods, the petitioner sometimes asks relief from those who have bewitched him, as well as from the demons who have independently brought him into their power. Of the two phases, it is more natural to give the

preference in point of primitiveness to the independent power of the demons, who, being naturally hostile to man, would feel prompted to make their attack whenever the opportunity offered. The strange and weird impression made by individuals of deformed stature, like dwarfs, or with unusual features, unusually large or unusually small eyes, or otherwise presenting a grotesque appearance, would prompt the conclusion that such persons possessed unusual powers and were capable of working mischief. Evil being associated with demons, it was a logical conclusion that these strange individuals were in league with the demons, or were actually evil spirits that had assumed human shape. Consistency in anything connected with popular beliefs is never to be expected, and hence we find in the rituals a constant vacillation between the attributing of accidents, misfortunes, and disease to the direct activity of witches and sorcerers, and the tracing back of the ills to which human flesh is heir, to the demons acting independently or at the instigation of certain individuals who exercised a direct or indirect control over them. In this respect, therefore, the incantation texts likewise betray their composite character; and, corresponding to the older and later components in the formulas prescribed for the various cases involved, we have the mixture of exorcizing rites aimed at witches and sorcerers, with such as are clearly employed against the demons and evil spirits directly.

The symbolical rites prescribed in connexion with the recital of the formulas, to which we have already referred, similarly presuppose both phases of demonic possession; but some are more applicable to witches and sorcerers than to the demons. Thus a very common practice prescribed in the texts was to make an image of the witch or sorcerer of wax, honey, clay, pitch, or of metal, and to burn such images, while pronouncing the sacred formulas. As the image was thus being consumed, the witch or sorcerer was supposed to suffer the tortures of the fire, and to be gradually annihilated. Instead of burning the image, the plan was sometimes to throw it into the water, or to bury it in the ground; and the symbolical rite being supposed to have an effect on the witch, her evil influence was thus disposed of. Again, one of the favourite means resorted to by a witch in order to secure a hold on her victim was the tying of knots—each fresh knot thus tied, to the accompaniment of a powerful formula, representing symbolically the binding of the unfortunate victim. Hence the exorcizing priest would, by a species of 'sympathetic magic,' endeavour to undo the evil by taking a knotted rope and untying the knots one by one, pronouncing at the same time the counter formulas, and in this way seek to bring about the relief of the sufferer. But images of the demons were also made, and similar ceremonies gone through with them; so that, in connexion with the rites likewise, the dividing line between demons and witches is not always kept in view.

Taking up now a series known as the 'Maqlû,'* a brief analysis will show the method followed in the grouping of the formulas. It deals almost exclusively with methods for ridding oneself of the influence of witches and sorcerers, and derives its name, 'Burning,' from the prominent part played by the symbolical burning of the images of the witches. The opening incantation is an appeal of a general character to the gods, put into the mouth of the afflicted individual—

'Arise, ye great gods, hear my complaint;
Grant me justice, take cognizance of my condition.'

* Published by Tallqvist, *Die Assyrische Beschwörungsserie Maqlû* (Leipzig, 1895).

Not knowing whether the bewitchment is due to a sorcerer or a sorceress, the victim has made an image of each, and then, referring more particularly to the witch, he exclaims—

'May she die! Let me live!'

Cleansing potions concocted of various herbs are drunk by the victim, who hopes in this way to become 'as pure as water,' 'resplendent as fire.' As a specimen of a genuine incantation formula the following may serve—

'Earth, earth, earth!
Gilgamesh* is the master of your witchcraft;
What ye have done, I know;
What I do, you know not;
All the mischief wrought by my sorcerers is destroyed,
dissolved—is gone.'

What is here expressed as a fact is intended as a hope to be realized after the accomplishment of the incantation rites. A variety of symbolical rites are then prescribed, such as depositing the image of the witch in a boat placed on the waters, and surrounded by an enclosure so as to prevent her escape; while, in connexion with the burning of the images, hymns, at times most impressive in diction, are addressed to the fire-god Nusku or Girru. The purpose of thus furnishing a variety of rites is to afford a chance to the exorcizer to select the one appropriate to the case with which he is asked to deal. No fewer than ten different kinds of material are prescribed for the making of the images—wax, earth, bronze, honey, clay, pitch, sesame flour, pitch with clay, and two varieties of wood.† For each material a special incantation is prescribed, though the formulas do not differ very materially from one another. The thought, both in the mind of the exorcizer in prescribing and of the victim in carrying out the burning rite, is clearly brought out in the words uttered as the images are consumed—

'On this day, arise! to my judgment;
Suppress the mischief, overpower the evil.
As these images tremble, dissolve, and melt away,
So may the sorcerer and sorceress tremble, dissolve, and melt away.'

Just as the images of the sorcerer and the sorceress were made to be burnt in certain prescribed cases, so, in others, images of the demons were destroyed in a similar manner. An incantation in connexion with such a rite furnishes the names of the chief classes of demons—

'I raise the torch, their images I burn—
Of the *utukku*, the *shedû*, the *rabîsu*, the *ekimmu*,
The *labartu*, the *labasu*, the *akhlazû*.
Of the *lîlu*, *lîlîtu*, and *ardat lîli*,
And of every evil that seizes hold of men.
Tremble, melt away and disappear!
May your smoke rise to heaven!
May Shamash destroy your limbs!
May the son of Ea,‡ the chief exorcizer, restrain
your strength!'

Of these demons the two first appear to have been of a general character, both terms conveying the idea of strength. *Rabîsu*, signifying 'the one who lies in wait,' is a demon who springs upon his victim unawares; *ekimmu*, also used to describe the 'ghost' of a man, represents the class of demons that infest the graves. *Labartu* is the demon who is particularly dangerous to women and children; of *labasu*, 'the one who throws down,' and *akhlazû*, 'the seizer,' we only know that they have the power of securing their victims under their control; while *lîlu* ('night'), *lîlîtu* (feminine form of *lîlu*), and *ardat lîli* ('maid of night') are mischievous spirits who ply their trade at night under cover of darkness.

* The semi-mythical hero whose deeds are celebrated in the Gilgamesh epic, upon which we shall touch later on.

† One of them cedar; the other, called *binu*, has not been identified.

‡ The address is 'to the fire-god'

§ i.e. Marduk.

In regard to all these names, the remark applies that they represent general classes of demons rather than individual spirits, and that (excluding *shedû*) the first six named, moreover, are sometimes used to designate demons in general. Similarly, two other designations that frequently occur in the incantation texts—*abu*, signifying probably 'the strong one,' and *gallu*, 'the great one'—are used, though not always, in a very general way. This indicates that, if at one time a differentiation was attempted, that period was succeeded by one in which the various designations for demons represented, in the case of those most frequently used, merely the different forms of activity represented by the demons, and in the case of others the time and the various ways in which they attack and secure control of their victims.

Somewhat different is the use of the term *shedû*, which is applied both to a hostile demon and to the protecting spirit who stands by man's side and helps him in his endeavour to thwart the attack of the demons, or to rid himself of them. The latter use is the more usual, and in this sense the term is generally associated with *lamassu*, which likewise represents a protecting power. The two, *shedû* and *lamassu*, were symbolized by fantastic creatures—one with the features of a lion, the other with those of a bull—placed as guardians at the entrances of palace gates and doors. This symbolization, however, which is an outcome probably of the idea of strength connected with the demons, and recalled by the lion and the bull, appears to have belonged to a comparatively late period, for in the days of Hammurabi* we still find *lamassu* used to designate the chief protecting deity of a place. It is only, therefore, as the differentiation between god and spirit becomes sharply defined, that *lamassu*—represented ideographically by two signs with the force of 'strong god'—is confined in its application to a protecting and favourably inclined spirit or demon, while the double sense in which *shedû*, also embodying the idea of 'strength,' is used, testifies to the currency of the earlier conception whereby the demons were viewed as either favourable or unfavourable.

Corresponding to the tendency to differentiate gods from spirits, the view seems to have arisen that in general the gods were favourably inclined, or could be made so, by propitiation, appeals, and gifts; whereas the demons, as a rule, were hostile, and could be overcome only with the help of the gods. The *shedû* and *lamassu* were the exceptions, and could therefore be appealed to in the struggle against the hostile forces equally with the gods. Accordingly, we frequently find the hope expressed in the incantations that the bad demons may be driven out of the body, and that the *shedû* and *lamassu* may enter into the head or into the limbs of the unfortunate victim in place of the *utukku*, *gallu*, *abu*, etc., as the case may be.

Continuing our analysis of the 'Maḫlu' series, the third tablet is concerned largely with descriptions of the witches who, possessing the same power as the demons, have the additional quality of being able to select their victims, whereas the demons stumble upon them, as it were, and strike whomsoever they happen to encounter. The witches—and the same applies also to the male sorcerers—appear to have acted not only on their own initiative but when engaged by others to cast their spells on individuals against whom they harboured a grudge for some reason or other. In this connexion it is interesting to note that the laws of Hammurabi, in order to safeguard this means of punishing an enemy, provide that, if a spell be unjustly cast upon a man, the one who

* 'Code de Hammourabi' (ed. Scheil), obv. col. iv. 56.

induced the bewitchment shall be put to death.* The descriptions of the witches in the third tablet of the 'Maḫlu' series form an integral part of the incantations. Thus we read at the beginning of this tablet—

'The witch who goes about through the streets,
Enters into houses,
Glides into courts,
Treads the open places,
Turning forwards and backwards,
Plants herself in the streets and retraces her steps,†
Interposes herself on the highway,
Robs the good man of his strength,‡
Robs the good maid of her fruit.§
At her sight, desire seizes him:
She sees the man, and robs him of his strength;
She sees the maid, and robs her of her fruit.
With her witchcraft she barricaded the way;
With her spittle she blocked the road.
The witch saw me, and pursued me.'

But the sorceress is not always visible to her victim. She can work in silence and be unknown; and it would appear, indeed, that the invisible and unknown witch represents the more potent form of bewitchment. Hence the incantation is at times couched in the form of a question—

'Who art thou, witch,
Who carries the word of my misfortune in her heart,
Whose tongue brings about my destruction,
Through whose lips I am poisoned,
In whose footsteps death follows?
O witch, I seize thy mouth, I seize thy tongue,
I seize thy piercing eyes,
I seize thy restless feet,
I seize thy active knees,
I seize thy outstretched hands,
I tie thy hands behind thee.
May Sin! give thee a fatal blow!
May he cast thee into an abyss of water and fire!
O witch, like the setting of this seal ring,
May thy face glow and become pale!'¶

The witch has endless means at her disposal for securing control of the selected victim. Her spittle is poisonous, and can torture one on whom it falls or whoever treads on it; the words that she utters have a mystic power; and her eye is deadly, and can spellbind one on whom its glance is thrown. Ever active, moving about on the lookout for her victim, her hands can seize him at any time. Hence the victim, whether already caught, or in danger of falling into the witch's hands, is told to prepare an image of the sorceress, whoever she may be; and, suiting the action to the word, binds fast the mouth, tongue, lips, limbs, and hands of the image, and then casts the helpless figure into the fire; and, not satisfied with this, drowns it in water.

In other incantations in this tablet the witch is pictured as being imprisoned in a pit, and then drowned by having water poured over her; and, again, she is placed on a small ship and given over to the mercy of the elements. In all such cases we are justified in assuming that there was some symbolical act suited to the words, carried out in the hope that the symbol, fortified by the proper formulas, will be converted into a reality.

More common, however, appears to have been the burning of the images; and, in connexion therewith, we encounter a considerable number of addresses appropriately directed to the fire-god, Girru-Nusku, some of which merit the designation of hymns, embodying an imagery and conceptions that appear to transcend the intellectual horizon of belief in the efficacy of sacred formulas. As a

specimen—and this is perhaps the finest of this series of addresses—we may choose the one with which the second tablet of the series opens—

'O Nusku, great god, chief of the great gods,
Guardian of the offerings of all the *Igigi*,*
Founder of cities, restorer of sanctuaries;
Brilliant day, whose command is supreme;
Messenger of Anu,† obedient to the decrees of Bel;
Mighty in battle, whose attack is powerful.
Nusku, glowing, overthrower of enemies,
Without thee no sacrificial feast is held in E-kur;‡
Without thee Shamash the judge does not execute
any judgment.'

Fire being an element common to heaven—as shown by the lightning—and to earth, the god Nusku is appropriately figured as the messenger of the god of heaven, and as obedient to the dictates of Bel, who here represents the god of earth. The presence of fire in the sanctuaries, and its use in the sanctification of the sacrifices brought by the worshippers, suggest the references in the second and eighth lines of this hymn, while its power as an indispensable factor in all forms of civilization and its destructive force in war emphasize two other phases of the god's nature. Up to this point we appear to have before us a hymn composed in honour of Nusku that might appropriately have been sung in connexion with a sacrificial ritual in a temple erected in honour of the god in question. The following lines, however, reveal the real purpose of the invocation. The victim, about to burn the images of the evil powers that have brought about his misfortune, is represented as saying—

'I, thy servant *So and So*,§ son of *So and So*,
Whose god is *So and So*,|| whose goddess is *So and So*,
I turn to thee, I seek thee, I raise my hands, I prostrate
myself before thee:
Burn my sorcerer and my witch;
May the life of my sorcerer and my witch be taken hold
of and destroyed!
Let me live that I may praise thee, and in humility
extol thee.'

The images, as has already been pointed out, were made of various materials, and the second tablet of the 'Maḫlu' series contains no fewer than eight Nusku hymns, introduced as preludes to the formulas prescribed for the burning of the images of the sorcerers and witches. We are to assume, of course, that the officiating priest selects the one appropriate to the occasion and to the material employed for the making of the image, and gives the necessary instructions to the worshipper in regard to the ceremonies to be performed in connexion with the exorcizing rites. But the witch and the sorcerer also have recourse to making images of their proposed victims, and have the power of transferring to the individual the symbolical tortures and miseries that they inflict upon his counterpart. The fourth tablet of the series is largely taken up with a description of the various manipulations to which the witches submit the images as a means of adding to the tortures of those whom the images represent. To symbolize their victims and thus bring about their death, the witches place the images in coffins and bury them, or immure them, or conceal them under the thresholds of houses—both representing primitive modes of burial,—or they are thrown into wells, or placed on bridges where they would be exposed to being trampled upon, and more of the like. As a counter move, the same treatment was prescribed for the images of the witches, to which, likewise, poisonous plants would be symbolically adminis-

† i.e. moves in all directions, and passes to and fro.

‡ A reference apparently to sexual vigour.

§ i.e. prevents conception, or brings about a miscarriage.

|| i.e. the moon-god.

¶ i.e. 'May thy face glow with the heat of the fire like the metallic setting of a stone seal cylinder, and then lose its colour—like the heated metal when thrown into the water.'

* A designation for the throng of heavenly deities or spirits.

† The god of heaven.

‡ Name of the temple of Bel in Nippur, which, however, has become a generic designation for a sanctuary, and also for the earth in general.

§ Here the name of the victim is to be inserted.

|| Here the victim names the special patron god and goddess, whom each individual is supposed to possess. See Jastrow, *Religion Babylonians und Assyriens*, p. 194 f.

tered in order to counteract the poison that the witches had, in some way, introduced into the bodies of their victims; and the attempt, it would seem, was also made to find the hidden images made of the victims, and thus to release the unfortunate ones from the ills with which they were afflicted. An incantation at the beginning of the fifth tablet, to be used in connexion with such rites, reads—

'The witch and the sorceress—
She sits in the shadow of the wall,
Sits and brings about my bewitchment, makes my images.*
I will send thee *khattappan* plant and sesame,
To break up thy charm, to make thy words return to thee; †
The bewitchment prepared by thee,—may it be for thee!
The images that thou hast made,—may they represent thee!
The water that thou hast concealed,—may it be for thee!
May thy incantation not come nigh, may thy words have no effect!
By command of Ea, Shamash, Marduk, and the great mistress of the gods. §

This fifth tablet illustrates also the faintness of the demarcation between witch and demon, to which attention has already been directed, || for almost imperceptibly the incantations pass from denunciations of the witches to imprecations hurled against the demons. The last incantation of the tablet, applicable to the demons, furnishes a characteristic example of a direct formula intended to drive the demons out of a man's body—

'Away, away, far away, far away!
For shame, for shame, fly away, fly away!
Round about face, go away, far away!
Out of my body, away!
Out of my body, far away!
Out of my body, for shame!
Out of my body, fly away!
Out of my body, round about face!
Out of my body, go away!
Into my body do not return!
To my body draw not nigh!
To my body do not approach!
Into my body do not force your way!
My body torture not!
By Shamash, the mighty, be forsworn!
By Ea, the lord of everything, be forsworn!
By Marduk, the chief exorcizer of the gods, be forsworn!
From the fire-god, who consumes you, be forsworn!
From my body may you be restrained!'

The sixth tablet of the series is taken up with a series of addresses directed against the witches, and appeals to the fire-god, which furnish some further interesting portrayals of the partly hidden and wholly mischievous workings of the witches, without, however, adding anything of material value to our conception of these beings.

In the seventh tablet we pass from incantations used in connexion with the burning of images and with other treatment accorded to them, to the use of oil and water as means of purification. A reference in one of these incantations to the waters of Eridu, the old city sacred to Ea, at the head of the Persian Gulf, is a valuable indication of the place at which this part of the 'Maḫlu' ritual originated; and in general, when waters of purification are referred to in the incantation texts, the two chief streams of Babylonia—the Euphrates and the Tigris—both of which had a sacred character, are introduced or implied, though the conception of purification has, in the course of time, widened so as to include the efficacy of water in general as a symbol of purification. It will be sufficient to reproduce one of these incantations, which may serve as a specimen of their general character—

'I have washed my hands, cleansed my body,
With the pure waters of a source which arises in Eridu;
Whatever is evil, whatever is not good,
That is lodged in my body, in my flesh, in my limbs,—

The evil arising from bad dreams, omens, and unfavourable portents,
The evil of unfavourable omens for city and country,

Which I see by day,
Trample on in the street, cast aside,—
The evil *shedû*, the evil *utukku*;
Sickness, Pestilence, Fever,
Distress, Pain, Complaint, Weakness, Groaning,
Woe and Ache, severe bodily affliction,
Terror and extreme Misery, etc. etc.'

—all manner of distress, it is hoped, may be effectually removed by the purifying power of the sacred element.

The addition of such incantations, in which water plays the chief part of the ritual, points to the composite character of the 'Maḫlu' series, which, from dealing exclusively with the burning of images and with appeals to the fire-god, is thus enlarged into a general incantation ritual, to serve as a guide for the exorcizing priest in picking out such portions as are applicable to the case brought before him. Further light is thrown on the principles underlying the combination of incantations into a fixed and elaborate ritual by the eighth and last tablet of the series, which furnishes a summary of all the incantations contained in the previous seven, by repeating their opening words or lines in uninterrupted succession. One is tempted to conjecture that this arrangement, which is also found at the close of another incantation series,* was intended to serve the purposes of an index or table of contents, to enable the officiating functionary of the temple to obtain a rapid survey of the incantations comprised in the ritual, and then to turn to those chosen by him. However this may be, the 'Maḫlu' series, like the various other ones that have been put together from the tablets of Assurbanipal's library,† clearly points to an elaborate process of composition and editing of the hundreds of formulas produced in the course of time for the purpose of relieving those attacked by the demons, or bewitched by the sorcerers and sorceresses.

Besides the incantation series in the proper sense, the priests also compiled for their own use handbooks to serve as guides in the performance of incantation rites, in which specific directions of all kinds are given, detailing the manner in which the images of protecting spirits are to be grouped around the couch on which the man stricken with disease lies, so as to guard him against further harm from the demons; what sacrifices are to be offered in connexion with the recital of the incantations, where they are to be offered, what prayers or formulas should be spoken in connexion with these sacrifices, and more of the like. In the subdivision of priestly functions which followed with the growth of the temples of Babylonia and Assyria, a special class of priests arose, known as the *āshipu*,‡ into whose hands the carrying out of exorcizing rites was entrusted; just as another class, known as the *bārû*, took charge of the omen rituals. Indeed we are justified in concluding from the elaborate character of the incantation texts and the incantation rituals, that, throughout the duration of the Babylonian-Assyrian religion, the beliefs upon which

the incantations rested, and the ceremonies connected with the incantations, continued to exercise a strong hold on the people, and constituted, in fact, one of the main factors of the religion itself, viewed from the side of religious practice.

4. **Omens and oracles.**—Inseparably linked to the beliefs on which the incantation texts and rituals rest, is a second branch of the religious literature of the Babylonians and Assyrians. While, as we have seen, the view gradually arose which attributed the small ills and minor worries and misfortunes of existence to the mischievous workings of evilly disposed demons, whereas the gods were regarded as, on the whole, favourably inclined, it was the gods with whom the control of the fate of the individual, as of the nation, in the final instance rested. To the gods, therefore, the appeal was made for relief from the sufferings caused by demons or witches; and it was of vital importance, even when the skies seemed serene, to retain the favour and goodwill of the gods, so as to be sure of their assistance when clouds appeared on the horizon. Moreover, the faith in the goodness of the gods was not so strong as to engender a feeling of absolute security in their worshippers. On the contrary, it was felt that their favour could easily be turned into hostility, and their favourable disposition towards man did not prevent them from manifesting their displeasure at any slight provocation. Failure to bring the proper homage, entering upon an important undertaking without assuring oneself of the support of the deity, or without making certain that it was begun at the proper moment, or even choosing the wrong formulas in an incantation ritual,—these and other errors might be fraught with disastrous consequences. Again, even after the incantation rites had been performed, the prayers recited, the sacrifices brought, the symbolical ceremonies carried out, it was necessary to know whether the hoped-for relief would be forthcoming.

To keep the gods favourably disposed, and to determine if possible what help they would grant, were two goals that the worshipper in Babylonia and Assyria was ever compelled to hold before him. Preventive measures were therefore called for, as well as remedial efforts. Punctiliousness in carrying out prescribed rites was an important element in such measures, but by no means the only one; it was equally important to ascertain in some direct way the will of the gods and their future intentions. If happily one could forestall the future, then all fears might be dissipated, and, at all events, one would not be overwhelmed by an unexpected check to one's endeavours. Naturally, the occasions when, through the mediation of the priests, oracles were sought, were chiefly such as concerned the general weal. The individual came in for his share, but that share, judging from the specimens of the oracle literature that have been preserved, was a small one in comparison with the part played by matters of public concern. Most notable among these specimens is a group of prayers addressed to the sun-god,* dating from the reigns of Esarhaddon and Assurbanipal. They have reference to expeditions undertaken against a group of nations to the north-east of Assyria known as the Kashtariti, who at various times, abetted by other tribes and peoples settled in their vicinity, appear to have given the Assyrians considerable trouble. The interesting feature of these prayers is the pattern according to which they are arranged—a pattern which points to the development of a fixed ritual prescribed for such occasions. Each prayer may be subdivided into five

parts, consisting (1) of a question or a series of questions addressed to the sun-god; (2) an appeal to the god not to manifest anger, and to forgive errors unwittingly committed in the sacrificial rites that accompany the appeal; (3) a repetition of the question or questions, generally in a somewhat varying form; (4) a second appeal; and, finally, (5) an examination of the omens to be derived from the inspection of the sacrificed animals.

As in the case of the incantation rituals, the greatest possible care had to be observed in the performance of details. The sacrificial animal—generally a lamb—had to be guarded against all impurities. It must be physically sound, and before passing on to the inspection of the organs—upon the position, proportions, and character of which, together with any possible peculiarities, much depended—the priest was obliged to exercise almost innumerable precautions against interference with a trustworthy interpretation. He had to don the proper dress, guard himself against any kind of impurity; he had to assume the right position in making the inspection, which itself had to proceed in a certain order; he had to speak the proper words, and much more of the like. In the questions that he asks, likewise, all contingencies are to be taken into consideration, and the ritual indicates all the various marks and symptoms that should be sought for in the organs of the sacrificial animal. A few extracts from one of these prayers will serve as an illustration of the general character of these oracles. The priest, who throughout the ritual acts as mediator, addresses the sun-god—

'O Šbamaš, great lord, as I ask thee, do thou in thy mercy answer me.

'From this day, the 3rd day of this month of Iyyar (the 2nd month), to the 11th day of the month of Ab (the 5th month) of this year, a period of one hundred days and one hundred nights is the prescribed term for the oracular inquiry.'

The request is thus specified—for an oracle that should indicate what is to take place during the coming 100 days. The question itself, always unfolded in a most elaborate manner, concludes in one case as follows:—

'The capture of that city Kishassu, through any enemy whatsoever within the specified period—is it definitely ordained by thy great and divine will, O Šamaš? Will it actually come to pass?'

The phrases used to prevent any interference with the correct and proper inspection of the animal are generally as follows:—

'Prevent anything unclean from defiling the place of inspection. Prevent the lamb of thy divinity which is to be inspected from being imperfect and unfit.

'Guard him who takes hold of the body of the lamb, who is clothed in the proper sacrificial dress, from having eaten, drunk, or handled anything unclean. Make his hand firm; guard the diviner, thy servant, from speaking a word hastily.'

After the inspection has been made and all the various points noted, the priest prays—

'By virtue of this sacrificial lamb, arise and grant true mercy, favourable conditions of the parts of the animal; may a declaration favourable and beneficial be ordained by thy great divinity; grant that this may come to pass! To thy great divinity, O Šamaš, great lord, may it be pleasing, and may an oracle be sent as an answer!'

Following the same general model, a large number of questions regarding the outcome of military movements on the part of the Assyrian rulers are propounded through the priest, who, in his capacity as diviner, bears the specific designation of *bārā*.^{*} Subjects of a more personal character, connected with the royal household, are likewise introduced. So in one instance an oracle is sought of Šamaš to determine whether Nikā, the mother of Esarhaddon, will recover from a

* Published by J. A. Knudtzon, *Assyrische Gebete an den Sonnengott* (Leipzig, 1893).

* i.e. 'the seer,' from *bārā*, 'to see.'

sickness from which she is suffering; * and again, before giving his daughter in marriage to a foreigner, Bartatua, the king of Ishkuza,† Esarhaddon inquires whether he is to be trusted, 'whether he will fulfil the promises that he has made, and execute the decrees of the Assyrian king in good faith.' Another interesting illustration is furnished by an inquiry on the occasion when the same king proposes to associate his son with him in the affairs of government‡—

'O Shamash, great lord, as I ask thee, do thou in good faith answer me. Esarhaddon, the king of Assyria, may his purpose be pleasing and meet with success! Siniddinapal his son, whose name is written on this tablet and placed before thy great divinity, is it pleasing to thy great divinity, that he should enter into the government,§ is it acceptable in thine eyes? Thy great divinity knows it. Is the entry of Siniddinapal the son of Esarhaddon, whose name is written on this tablet by command of thy great divinity, is it ordained and fixed, O Shamash, great lord! Will it actually come to pass?'

In the oracle texts of the class published by Knudtzon the answers to the questions are not given, the purpose of the texts being to furnish and preserve the rituals observed for the occasions referred to, so that these might serve as models for future days, just as these rituals, no doubt, followed models that had been preserved from earlier days, reverting, in all probability, to the usages developed in the temples of Shamash in Babylonia. Other texts, however, furnish the answers. So we have a series of eight oracles delivered to the same Esarhaddon by the goddess Ishtar of Arbela.¶ An interesting feature of these oracles is that, in most cases, the medium of communication is a priestess, which recalls the prominent part played by women as sorceresses in incantation texts. The female soothsayer forms the natural complement to the priestess; it is the attachment to the service of a deity that changes the priestess from a messenger of evil into one who can fathom the Divine intention. But both functions rest on the belief in the mysterious power of women—a belief which is widespread among ancient nations, and survives among people who are still in the primitive stage of culture. A reassuring message given to the king by a priestess Baya, a native of Arbela, and uttered by her in the name of Ishtar and Nebo, reads as follows: ¶—

'Fear not, Esarhaddon, I, the Lord,** speak to thee. The beams of thy heart I strengthen as thy mother who gave thee life. Sixty†† great gods are with me, drawn up to protect thee. The god Sin is on thy right side, Shamash on thy left. Sixty great gods are round about thee, drawn up in battle array in the centre of the citadel. On men do not rely. Lift up thine eyes and look to me. I am Ishtar of Arbela, who has made Ashur gracious to thee. Thy weakness I will change to strength. Fear not! Glorify me! Is not the enemy subdued who has been handed over to thee? I proclaim it aloud. The future I will make glorious, as [I did] the past. I am Nebo, the lord of the writing tablet. Glorify me!'

Of a more definite character is a message sent to Esarhaddon from Ashur, who is, like Nebo and Ishtar, represented as addressing the king directly‡‡—

'As for those enemies that plot against thee, that force thee to march out, since thou didst open thy mouth [saying], "I implore Ashur!" I have heard thy cry. Out of the great gate of heaven I proclaim it aloud. Surely I will hasten to let fire devour them. Thou shalt stand among them. Before thee I shall appear. Into the mountains I shall bring them to rain

down upon them stones of destruction. Thy foes I shall cut down, filling the river with their blood. Let them behold and glorify me, for Ashur the lord of gods am I.'

Accompanying this message are instructions to pour out precious oil, and to offer sacrifices with sweet-smelling incense. The oil and the sacrifices at the delivery of an oracle may properly be regarded as prompted by the desire to retain the favour of the gods, and as a manifestation of grateful homage; but oil and the offering of animals also play an important part in securing the oracle itself. In the series of prayers addressed to the sun-god, of which we have above given a brief account, there are included indications of the features in the animals, the position of the organs, special marks and peculiarities to which the attention of the officiating priests is directed. These indications are of primal significance, for on the results of the inspection the answer to the questions depended. One is probably safe in asserting that no oracle was furnished without the interpretation of omens, so that, even when no reference to omens is expressly made, we may feel certain that it is implied. Indeed the study and interpretation of omens appear to have formed in Babylonia and Assyria the basis of oracular utterances. In the prayers in question the priest is instructed to observe whether there is a slit at the nape of the neck on the left side, whether there is some peculiarity at the bottom of the bladder on the left side, whether the viscera are sound. The size of the limbs and organs of the animal were likewise of importance; and indeed there is no feature of any special character that could be overlooked, before, as a result of the most careful study, the priest was in a position to reveal from the various omens the intention of the gods. A special significance appears to have been attached to the *liver*, due, apparently, to an association of ideas—found among many nations of antiquity—between the liver and the general disposition and character. Among the tablets in the British Museum* there is an interesting diagram of the liver of a sheep, divided off into small sections, with explanatory notes, to serve as a guide for the priests in their inspection.

Not only the omens derived from sacrifices, but the appearance, position, number, and size of the bubbles formed by oil poured into a goblet or bowl of water, constituted a means of determining the will or purpose of the gods. Here was a phase of the 'oracle' ritual that lent itself to an almost more detailed development than even the inspection of sacrificial animals. There were innumerable possibilities to be considered, and we are fortunate in possessing some texts† which furnish the proof of the care expended in taking all imaginable contingencies into consideration. From these texts, which served as handbooks to the *bārû* priests, it appears that, according as the oil bubbles appeared to the left or the right side of the goblet or bowl, separated into smaller bubbles or united into larger ones, it portended good or evil. The size and also the colour of the oil bubbles had a significance, as well as the action of the bubbles after their appearance on the surface. In short, an elaborate science of divination grew up in the course of time in Babylonia and Assyria, which embraced many more elements than the inspection of sacrificial animals, and the action of oil when mixed with water.

Before turning to some of these other phases of

the science, it is necessary to point out here the natural extension of oracles and omens from public affairs of the State, and from the semi-public interests of royalty to the affairs of the individual. The fact that, in such a large portion of the oracle and omen literature, the national welfare and conditions affecting the political situation form the subject, must not mislead us into underestimating the share that the individual had in benefiting from the prerogatives enjoyed by the priests as the mediators between the gods and their worshippers. The preponderance of public affairs over the concerns of the individual which appears in these texts, is due in part to the circumstance that most of them were drawn up at the instigation of the rulers, and in part to the natural desire of the priests to provide, first of all, for proper guides in carrying out the demands made upon them by their royal masters. The example of Assurbanipal in ordering his scribes to provide him with copies of the literary productions of the country, was probably merely a continuation of a much older custom of Babylonian rulers in ordering the rituals required for the various purposes of official exigencies, and for the various occasions of the year, to be perpetuated in writing. Furthermore, the welfare of the country was a natural preliminary condition to the happiness of the individual; for, unless the gods showed a favourable attitude towards the country as a whole, it was not to be assumed that the individual could hope for Divine favour. Next to the attitude of the gods towards the State, their goodwill towards the ruler was of primary importance, partly because of the close identification of the career of the ruler with the State, partly because of the continued strength of the belief that the ruler stood nearer to the gods than the ordinary individual, and that upon his conduct and upon the consequent disposition of the gods towards him a large share of the national welfare depended.* Hence even such an event as illness or misfortune in the royal family was of public significance, for it portended, or at all events might portend, that some deity was angry with the ruler himself, and had thus manifested his displeasure. The ordinary individual could hardly hope for consideration in approaching a deity who had plainly shown his ill-humour towards the most important personage in the land.

But such conditions represented, after all, the exceptional state of affairs. Unless the country was engaged in warfare, or unless some accident had befallen a member of the royal family, the supposition was that the gods were inclined to listen to petitions or to assist the individual in his appeals for help or advice; at all events, it was safe to make the attempt to approach the Divine throne through the mediation of the priest. Again, if some god had shown his anger by punishing an individual with sickness or by overwhelming him with disaster, it was perfectly reasonable to make the attempt to regain his goodwill, 'to set the deity's heart at rest,' as the religious phraseology expressed it.

The extension of the order of ideas which enabled the priests to ascertain the intention of the gods when affairs of State or of the royal household were in question, resulted in the preparation of more or less elaborate handbooks covering the interpretation of all unusual phenomena, whether occurring in the heavens or on earth. Eclipses, disturbances in the usual order of natural events, the movements of the moon and sun, as well as of the planets and stars, and the

appearance of the clouds, represent some of the main incidents to which the attention of the priests was directed for the purpose of determining their bearing on the general welfare, as well as on the fate of individuals. Coming to such terrestrial phenomena as enter more particularly into the life of the individual, we find that dreams, for instance, or unusual signs in the case of newborn children,—abnormally large or abnormally small features, monstrosities of all kinds,—were regarded as revealing the intentions of the deities, or were looked upon as portents of future events. The movements of certain animals,—more particularly of dogs,—the flight of birds, the appearance of snakes or of certain insects in the highways or in houses, as well as monstrosities among animals, were fraught with meaning, and, in general, it may be said that every incident that had any unusual feature connected with it called for an interpretation. In this way the omen literature representing the record of past experience, and embodying the wisdom of the past in the interpretation of signs of all kinds, assumed in the course of time enormous dimensions—so large that it is quite difficult to obtain an accurate survey of the field covered by the omen texts. For the purposes of this sketch, however, it will be sufficient to characterize briefly some of the chief classes of this branch of the religious literature of Babylonia and Assyria.

Taking as our first illustration *unusual occurrences in the movements of the heavenly bodies*, it is natural to find special significance attached to eclipses of the sun and moon; and it is also obvious that such occasions were interpreted as having a bearing chiefly on public affairs or on the fate of the royal household, because of the close relations between the gods and earthly rulers—their representatives, in a measure—to which reference has already been made. Calendars were drawn up with indications of what the obscuring of the sun or moon, through eclipses or through the movements of clouds, on any particular day of the month portended. Arranged in the order of the months, the days of the month are entered on which, according to past experience, eclipses occurred, and also those on which, according to calculation, they might occur, and then the interpretation is set forth for each of the days enumerated. Interchanging with the references to actual eclipses, a record is also made of what the concealment of the sun behind clouds on certain days portended. Selecting from a long text of this nature, covering many tablets, the section devoted to the month of Tishri, the 7th month, we find the following entries* recorded:—

- * If on the 1st day of the month of Tishri the sun is obscured, king against king will declare war.
- If on the 9th day, Adad † will raise his cry.
- If on the 11th day, a disaster will occur, the king of Mar dies.
- If on the 13th day, the king of Akkad ‡ dies, and, in the case of an eclipse, [the same fate] is portended for the king of Akkad.
- If on the 14th day there is an eclipse of the sun, there will be destructive rains, and the king of Amurru dies.
- If on the 15th day, the wealth of the sea perishes.§
- If on the 16th day, there will be food in plenty in the land, the canals will be full, or [it portends that] the *abkallu* will burst forth.||
- If on the 15th day, then will be peace for the king; Bel in the country [will proclaim ?] an oracle regarding the land of the enemy.
- If on the 20th day, the country will be diminished, the throne o Elam will be overthrown.

* Craig, *Astrological-Astronomical Texts*, pl. 25, obv. 1-17.

† Adad is the god of storms. The phrase is therefore to be taken as an indication that storms will sweep the land.

‡ i.e. Babylonia.

§ An expression which apparently refers to the destruction of animal life in the waters.

|| *Abkallu* is a title of a high officer. The sense of this prediction is obscure.

* On the position of the king as standing closer to the gods, and as originally viewed as the representative or even incarnation of a deity, see Frazer, *The Golden Bough*², i. 142 ff., 232, etc.

If on the 21st day, the obscuration portends destruction to the country.

If on the 28th day, Bel will cause destruction; the king of that land during that year will overrun the country or [it portends that] the king will be safe.

If on the 29th day, in that year the king will die, the country will suffer misfortune. . . .

If on the 30th day, the king will have a long reign . . . there will be food in plenty in the land.

If from the 1st to the 30th day the sun is obscured, the gods will overwhelm the whole country [with disaster].

If the day is dark, but the planets Dilbar* and Dapinu† are seen together, city, king, and people will be safe, canals will be full of water.

If, contrary to calculation, the sun is obscured, the king will be in distress . . .

If in the month of Tishri the sun is obscured, the king dies, the country will witness disaster or [it portends] joy.*

Obscure as some of the predictions are—due in part to the defective nature of the text—their general character is quite clear. The references to specific personages like the king of Amurru, of Elam, of Akkad, may be taken as indications that at some time or another the death of a ruler in one of these countries took place on the day in question, or that some disaster overtook him. This occurrence would then naturally be made the basis for determining the inauspicious character of the day. We are not therefore to suppose that the death of a particular ruler of the countries named is intended to be predicted; but, from the circumstance that a ruler died on that day in the past, the obscuration of the sun on such a day portends a misfortune for the country, or possibly for the ruler in question. Bearing in mind that these omen calendars are intended to serve as guides for the priests, one can also understand the contradictory notes recorded for one and the same day. Such statements must obviously be interpreted as embodying observations of various events that at some time in the past took place.

It is, accordingly, for the officiating priest to determine by additional resources—such, e.g., as the inspection of sacrificial animals, or an oil and water test, or the like—whether the favourable or unfavourable omen is to be depended upon. That, in general, the disappearance of the sun owing to heavy clouds, or an actual eclipse, portends some evil, is a conclusion suggested by the natural association of ideas between darkness and misfortune. Hence, at the close of the preceding and of the following omens dealing with the other months, it is stated as a general conclusion that an obscuration of the sun portends evil to the king, being a prediction of his death, and also indicating disaster to the country. But the text adds the possible alternative that on certain days and under certain conditions the phenomenon indicates 'joy'—i.e. is to be regarded as a favourable omen. Here, again, when the indications for such days, based on past experience, are either favourable or unfavourable, it lies with the priest to determine by other means at his disposal which of the alternatives will be likely to occur.

The omens derived from the second great heavenly body—the moon—were in some respects of even greater importance, because of the more definite character of its movements; or, as we ought perhaps to put it, because of the greater ease with which these movements could be followed. Completing its course as it does in 29 or 30 days, the most obvious point to which the attention of observers would be directed would be the appearance of the new moon as the period marking the beginning of a new course. In the second place, note would be taken on what day—whether 12th, 13th, 14th, 15th, or 16th day—the sun was to be seen together with the moon; for upon this phenomenon, as was ascertained by experience, depended the day at the end of the month when the moon and the sun would again be

in conjunction. Again, the varying appearance of the moon's horns, the character of the halo around the moon, and naturally such more extraordinary occurrences as the lunar eclipse, would serve as a basis for lunar omenology. Our knowledge of these omens is derived chiefly from reports from court astrologers to their royal masters.* These reports are at times brief, consisting of only a few lines, as, e.g., the following connected with the appearance of the new moon on the 1st day of the calculated lunar month—that is, when the preceding month had its full 30 days†—

'If the moon is seen on the 1st day, [it portends that] the country will be favoured with tranquility.‡ If the day according to its calculation is long, it portends a reign of long days.' [Report from Bulluṭu].

The same omen is furnished in the reports of quite a number of other astrologers that have been preserved to us, but in some cases further specifications are given. So in one report there is added that in the case of the months Nisan and Tishri—the 1st and 7th months—if the moon is full at the regular time, there will be good crops, and the king will be supreme.§ Somewhat different is a report from an astrologer Nebo-shum-ishkun, who announces||—

'If the moon appears covered with a headband,¶ the king will be supreme. If the moon is seen on the first day, the day being, in accordance with calculation, long, it portends a long rule. The month will have 30 days in full. If the moon appears on the first day, it is favourable to Akkad (i.e. Babylonia), unfavourable for Elam or Amurru. If this happens in the month of Ab, then for Akkad it portends something favourable to the king, my lord.'

Coming to reports that furnish omens according to the day on which the moon and sun are seen together, the following may serve as a specimen:**—

'If the moon appears out of season,†† traffic will be small; on the 12th day the moon was seen with the sun. If, contrary to calculation, the moon and sun are seen together, a powerful enemy will come to the land. The king of Akkad will defeat his enemy. On the 12th day the moon with the sun was seen. If the moon is seen on the 12th day, it portends evil for Akkad, good for Elam and Amurru, but is an unfavourable omen for Akkad.'

Comparing these two classes of reports, the guiding principle in both is apparent. A full month of 30 days suggests by association of ideas—fulness, plenty, and general success, while a premature conjunction of the sun with the moon, indicative of a curtailment of the moon's course, as against the calculated lunar month, portends shortness of crops, diminution of traffic, and loss of dominion. In accordance with this, the appearance of the moon and sun together on the 13th and on the 16th day of the month portends unfavourable events, while on the 14th and 15th days the indications, varying somewhat according to the months, are, on the whole, favourable. That the various reports do not always agree, and that even in one and the same report alternatives are offered, or an intentional ambiguity appears, are features that point to differences in the methods adopted by the astrologers, or to the natural differences in experience which enter so largely into the judgment of the foretellers of events. An evidence of the high antiquity of the custom of deriving

† Jupiter or Marduk.

omens from lunar phenomena is to be seen in the persistent use of the geographical terms so constantly recurring in the texts. Akkad is retained as the old designation of Babylonia; Amurru, later the designation of Northern Syria, is used, as in very ancient historical texts, for the West in general; while Elam, in a similar manner, is applied to the East in general. These same geographical designations occur in connexion with those most significant of all heavenly phenomena—the eclipses of the moon and sun; and it may be regarded as a noteworthy indication of the advance made in the interpretation of such phenomena, that under certain circumstances an eclipse which must have been startling to primitive nations, as a necessary omen of evil, might portend peace and prosperity. In a report from an astrologer,* the various sections of the moon are made to correspond to the chief districts—the right side being Akkad or Babylonia, the left Elam, the top Amurru, and the bottom Subartu; and according to the direction in which the shadow passes off from the moon is the eclipse to be interpreted. The moon drawing off from the shadow in a south-westerly direction portends evil for Elam and Amurru, while, if the eastern and northern parts are not affected by the eclipse but remain bright—the eclipse being therefore a partial one—it is a good sign for Subartu† and Akkad. In another report‡ we encounter the following more specific indications:—

* When an eclipse happens during the morning watch§ and is complete(?), it portends corpses,|| and the ruler will also die. When an eclipse takes place in the morning watch and lasts through that watch, and a north wind comes, the sick in Akkad will recover. When an eclipse begins in the first section and remains in the second (i.e. is partial), it portends disaster for Elam. Gutí¶ will not approach Akkad. If the eclipse begins at the first section and the second remains bright (i.e. even more partial), it portends that disaster will overtake Elam but not reach Akkad. If the eclipse takes place and stands on the second side, it portends mercy to the country. If the moon is obscured in the month of Siwan,** Adad will inundate (the land) at the end of the year; if there is an eclipse in the month of Siwan, there will be a flood, and the product of the waters will be carried to the land.†† If an eclipse happens at the morning watch during the month of Siwan, it portends disaster to the temples of the land, and Shamash will be hostile.‡‡ If an eclipse takes place in Siwan on the 14th day, the king will complete the year and then die, and his son will strive for the rulership and seize the throne, and there will be hostility and corpses. If an eclipse happens in Siwan at any time from the 1st to the 30th day, it is an eclipse that portends something to the king of Akkad. There will be a general flood, and Adad will inundate the product of the land, and disaster will overtake a large army. . . . If an eclipse happens in Siwan out of the calculated time, the king of legions will die, and Adad will inundate; a flood will come, Adad will diminish the product of the land, and the leader of the army will encounter disaster.'

In general, as will be seen, the eclipse, by a natural association of ideas, reinforced by the survival of the primitive sense of terror at the startling phenomenon of the moon passing into a shadow, was generally regarded as an evil omen, and it was merely a question which quarter of the world was to be affected. The frequency of inundations in a land like the Euphrates Valley made it safe to hazard a prediction of an overflow of the Tigris and Euphrates; and a single coincidence of an eclipse in the spring, with particularly heavy floods during the rainy season, would be sufficient to establish in the minds of the people a connexion

between the two events. Indeed, so unusual an occurrence as an eclipse would necessarily prompt a closer attention to events—such as poor crops, or the death of a king, or even a military expedition with its inevitable result of greater or lesser loss of life—that at other times would be taken for granted as perfectly normal occurrences, or, if not normal, at least not of an extraordinary character.

The principles underlying the omens derived from other conditions observed in connexion with the moon are of the same general character—natural association of ideas and conclusions drawn from past events coincident with the conditions in question. Thus, in an interesting series of reports regarding the significance of a halo around the moon, a favourable or unfavourable interpretation depends upon the character of the halo, whether bright or dark—the latter being regarded in general as an indication of rain—or whether the halo was continuous or interrupted, and what planets or stars were to be seen within the halo. One of these reports,* which begins with the omen to be derived from the conjunction of the moon and sun on the 16th day, passes on to halo omens, and furnishes the following data:—

'If the moon has a halo, and the sun† stands within the halo of the moon, throughout the land one will speak justice, the father with his son will speak justice, the hosts will be successful. If the moon has a halo, and Mars stands within it, there will be destruction of cattle throughout the land, the planting of dates will not prosper, or it portends that Amurru will be diminished. If the moon has a halo, and two stars stand within the moon's halo, it portends a long rule. If Mars and a planet stand facing each other [within it], it portends an attack on Elam. If Mars passes out (?) of the halo, the king of Elam will die.'

It thus appears that Mars, which bears a name (*Mushtabarru nutānu*, i.e. 'portending death') that suggests ill-luck, is an unfavourable planet, whereas the 'sun' planet, Saturn, carries with it associations of good fortune and prosperity. The presence of Mars with another planet suggests a conflict; while Mars leaving the halo, again by a natural association of ideas transfers the ill-omen to Elam, the hated rival of Babylonia. Likewise, from omens derived from observation of the movements of the planets, we learn that this distinction between favourable and unfavourable planets is maintained, though there are circumstances under which a favourable planet like Marduk-Jupiter may become a portender of evil, while Nergal-Mars may under certain conditions change his forbidding aspect to one of good fortune. Thus, when Marduk-Jupiter appears at the beginning of the year, it portends a good crop of corn;‡ whereas, if the moon casts his shadow on Marduk,§ it means that a king will die in that year, or that an eclipse of the sun or moon will take place, and a 'great king'¶ will die; and, again, it is interesting to observe the combination of favourable with unfavourable omens in the approach of a planet like Jupiter towards Mars, or in their position towards each other. We learn¶ that when Marduk stands in front of Nergal there will be prosperous crops, but also that it portends a slaughter of men. The approach of Nergal to Marduk means devastation, death among cattle, or that the king of Akkad will die in that year; but at the same time it indicates plentiful crops. The evil suggested by Nergal is therefore compensated in a measure by the favourable indications associated under

most circumstances with Marduk. Again, though the omens connected with Nergal-Mars are on the whole unfavourable, there are notable exceptions; as, *e.g.*, when a report* tells us that if Mars is visible in the month of Elul—the 6th month—the crops of the land will be plentiful, and everything in the land will be prosperous; but, on the other hand, if Nergal approaches the moon, the god Sin will cause evil to descend upon the land;† and in this report the ‘unlucky’ character associated with Mars compensates the generally favourable nature of the portents in the case of other stars being seen near the moon. After this omen with reference to Nergal and Sin, the report continues—

‘If any [other] planet stands on the left horn of the moon, the king will be powerful; or if a star appears in front of the moon on the left side, the king will also be powerful. If a star stands behind the moon on the left side, the king of Akkad will be powerful. If the star Dilgan (*i.e.* Virgo) stands at the left horn, the crops in Akkad will be plentiful; or if Dilgan stands above the moon, the crops will be plentiful.’

The report continues in this way with a further series of omens derived from stars appearing on the left side, which, while portending evil because of the association between ‘left’ and ‘unlucky,’ yet are in so far favourable as the evil—loss of territory, or floods—is predicted for an enemy and his land, and not for the king of Assyria, to whom the report is furnished.

Wind and thunderstorms as well as earthquakes are included within the scope of the natural phenomena on which the astrologers of Babylonia and Assyria render reports to their royal masters. In regard to both wind and thunderstorms, the season of the year is naturally the prime factor in the decision whether the omen is to be interpreted as favourable or unfavourable. The storms and rains forming in a land like Mesopotamia a natural season, upon which the fertility of the soil is dependent, are, in fact, under ordinary circumstances regarded as signs of the favour of the gods; and we may well suppose that the Babylonians, like the ancient Hebrews, included in their ritual, at the approach of the rainy season, prayers that the gods might send the rains and also the storms—since the former never came without the latter—over the land. In accordance with this view, a storm is ordinarily an omen of prosperity; and it is only when the excessive severity of the rains causes a flood, or when the rain comes at the wrong time—in the spring instead of in the autumn and winter—that the omen is naturally unfavourable. A report from Asharidu, the servant of the king, reads ‡—

‘If a rainstorm comes over the land, crops will flourish, prices will be steady. If a rainstorm continues in the land, there will be an increase of royal power. If a rainstorm bursts forth in Shebet,§ there will be a Kassite eclipse.’

A storm still later in the season, in Adar ¶ (12th month), when the rains ordinarily have ceased, portends blighted crops; and as with rainstorms, so, up to a certain point in regard to thunderstorms, the season of the year determines whether the omen is to be regarded as favourable or unfavourable. But apparently a new factor enters into consideration here, for the voice of the god Adad himself is heard in the thunder; and it is this voice that the astrologers are called upon to interpret. In consequence, as the priests were guided necessarily by observation of events that in the past had followed upon the sound of thunder at a particular season of the year or time of the

day, the reports manifest a greater degree of inconsistency than in the interpretation of omens from rainstorms, where normal conditions constituted a firm basis for calculations. Thus, in the case of several reports dealing with omens in regard to thunder in the month of Ab—the 5th month—one* informs us that the crops will be plentiful, while another† declares that the omen portends evil. A distinction is made between thunder accompanied by rain and thunder in a cloudless sky. The report says ‡—

‘If Adad sends forth his voice in the month of Ab, on a dark day, with rain and lightning, waters will be poured forth in the canals. If on a cloudless day Adad roars, there will be distress or famine in the land.’

Or again §—

‘If it lightens on a cloudless day, Adad will cause a flood.’

The association between a thunderstorm and a rainstorm out of season suggests the portent that ||—

‘If, in Tishri,¶ Adad sends forth his voice, there will be hostility in the land. If it rains in the month of Tishri, there will be disaster to the sick and to cattle, and disaster to the enemy.’

An earthquake naturally always portends some disaster, and the omens derived from this phenomenon appear in general to have reference to a national calamity. The trembling of the earth suggests invasion and ruin. We are told **—

‘If the earth quakes all day, it portends destruction of the land; if it quakes continually, (‡) there will be an invasion of the land.’

And again ††—

‘If in the month of Tishri the earth quakes, the country will rebel against the king; if the earth quakes during the night, the land will incur disaster or devastation.’

At the same time the evil omen is at times compensated by the assurance that the misfortune will not affect the crops, for we are told ‡‡—

‘If the earth quakes in Tishri, the crops will be plentiful, though it portends hostility in the land.’

We have seen that in the case of various phenomena of the heavens and of nature, which form the basis of the official reports of the astrologers, the omens deal chiefly with three subjects—war, crops, and internal disturbances in the country—while the affairs of the individual play no part whatsoever. But besides these phenomena there is an almost infinite number of occurrences in the life of mankind that by their more or less unusual character call for an explanation; and in the explanation offered the individual is involved, even if not exclusively so. Monstrosities among human beings and animals, peculiar actions of animals, extraordinary occurrences in one’s life, or even ordinary ones, like dreams, constitute some of the phenomena, to the study of which the priests were likewise obliged to devote themselves in order to answer inquiries as to their meaning. In the interpretations offered we may observe again the application of practically the same principles which guided the astrologers in their reports as to the meaning of phenomena in the heavens—association of ideas, and conclusions derived from observation and experience. For purposes of illustration, it will be sufficient to give some examples from what we may call birth portents, of which the tablets furnish a very large number.‡‡ In this division, even so common an occurrence as the birth of twins, merely because it deviates from

normal conditions, is subjected to an interpretation, and we are told *—

'If a woman gives birth to twins, one male and the other female, it is an unfavourable omen. The land is in favour, but the house † will be reduced.'

Here we have an example of a purely individual portent; but it is noticeable that the moment any unusual signs are observed in the case of the twins, they are interpreted as having a bearing on public affairs, though at times the family in which the occurrence has taken place is also involved. In accordance with this principle we are told that—

'If a woman gives birth to twins and both are brought forth alive, but neither of them have right hands, the produce of the land will be consumed by the enemy. . . . If a woman gives birth to twins and both are brought forth alive, but the right foot of one is missing, an enemy will for one year cause disturbances in the country.'

A monstrosity as such, however, does not portend evil, and distinctions are drawn, again based largely on association of ideas.

Thus, in the case of newborn babes with heads that suggest the features of certain animals, a lion's or a swine's head represents favourable omens, while a dog's or a bird's or a serpent's head portends some disaster to the country ‡—

'If a woman gives birth to a child with a lion's head, § a powerful king will rule in the land. If a woman gives birth to a child with a dog's head, the city (where the child is born) will be in distress, and evil will be in the country. If a woman gives birth to a child with a swine's head, offspring and wealth will increase in that house. If a woman gives birth to a child with a bird's head, the land will be destroyed. If a woman gives birth to a child with a serpent's head, there will be famine in the land.'

The monstrosities taken up in this same series of tablets include such phenomena as a babe with two heads, or two mouths, or a double pair of eyes, or with misplaced eyes, or peculiarly shaped ears, or with an organ or a limb missing, and much more of the like. If among human beings monstrosities have a bearing on the public and general weal, it is natural to find this principle adopted in the case of monstrosities occurring among animals. The anomalies introduced are almost endless. Among the examples we find the following :—

'If five young ones are born in the flock, one with a bull's head, one with a lion's head, one with a dog's head, one with a sheep's head, one with a swine's head, there will be a series of devastations in the land.

If in the flock young ones are born with five legs, it is a sign of distress for the country. The house of the man will perish, and his stalls will be swept away. If the young ones have six legs, the population will decrease, and devastation come over the land. . . . If the young one has its ears at its neck, the ruler will be without judgment. ¶ If a young one has its ears below the neck, the strength of the land will be weakened. If the young one has no right ear, the rule of the king will come to an end, his palace will be uprooted, and the population of the city will be swept away; the king will be devoid of judgment, the produce of the country will be small, the enemy will cut off the supply of water. If the young one has no left ear, the deity will hear the king's prayer, the king will capture his enemy's land, and the enemy's palace will be destroyed. The enemy will be deprived of judgment, the produce of the enemy's land will be taken away, and everything will be captured. If the right ear of the young one falls off, the stall ** will be destroyed. If the left ear of the young one falls off, the stall will be increased, the stall of the enemy will be destroyed.'

In this enumeration it will be observed that a defect in regard to a 'right' limb or organ portends evil to the owner or the country, or both, while the defect in a 'left' limb or organ is an omen of disaster to the enemy, but not to the owner or his country—a reversal, though a perfectly logical one,

** i.e. the herd.

of the usual association of ideas with reference to 'right' and 'left.' It is because 'right' is generally a good omen that the absence of a 'right' ear portends evil, whereas a defect in regard to a 'left' ear represents a bad sign for the 'other party.' The specific character of the omens may be taken as evidence that the tablets were drawn up on the basis of answers given in the past to inquiries made at a time when the monstrosities, or the unusual phenomena in question, actually occurred; though it also seems likely that these actual answers were supplemented by indications, furnished in accordance with the principle underlying the science of omen interpretation, in order to cover future and possible contingencies. The tablets themselves thus assume, in contradistinction to the astrological reports above discussed, the character of handbooks, and therefore resemble the incantation texts and rituals. Each large temple would be supplied with such a handbook, and it would be the natural endeavour of the priests of each generation to make additions to it, so as to be in a position to answer readily any question that might be put. As there were special omen collections for oxen, sheep, swine, colts, birds, insects, and the like, one can readily see how, in this way, the collections would in the course of time assume exceedingly large dimensions.*

It will also be clear that such collections could never be absolutely complete. Cases would arise not thought of or not provided for, and it would then devolve upon the priests to work out new decisions that might be depended upon as trustworthy. Besides monstrosities among animals, the actions of certain animals—dogs, oxen, ravens, and certain insects, etc.—were invested with significance; and the task of the priests would be increased by the endeavour to explain what it meant if one encountered a yellow, white, black, or speckled dog on the street; or if a dog entered a palace or temple or an ordinary house; or if a raven flew into a man's house; and even so trivial an occurrence as the dropping of a bit of meat into a man's house by a raven was regarded as fraught with some meaning. A tablet informs us that †—

'If a yellow dog enters a palace, it is a sign of an ominous fate for the palace. If a speckled dog enters the palace, the palace will secure peace from the enemy. If a dog enters the palace and some one kills him, the peace of the palace will be disturbed. If a dog enters a palace and crouches on a couch, no one will live in that palace in peace. If a dog enters a palace and crouches on the throne, the palace will encounter an ominous fate. If a dog enters a palace and lies on a bowl, the palace will secure peace from the enemy.'

As with dogs, so the appearance of locusts in a house was regarded as an omen of ill-luck; but here, again, distinctions were drawn according to the colour of the locusts, whether black, yellow, white, brown, or speckled. In short, these handbooks of omen interpretation endeavoured, though of course in vain, to cover all possible occurrences that in any way might arouse the attention of those who were directly or indirectly involved; and the task of the priests, constantly consulted as to the meaning of the purely trivial incidents which form a large proportion of the cases introduced, was no easy one. On the other hand, it was precisely their supposed power of being able to interpret 'signs,' and thus to aid the inquirers in preparing for the event prognosticated, and perhaps to forestall it, that enabled the priests to retain a firm hold on the people. It was of the utmost importance, therefore, for the priests to cultivate the science of omen interpretation, as representing, with the endeavour to free the subjects of the gods from ills and troubles, the practical side of

* The most complete collection as yet published, from which the above examples are taken, is that of Boissier, *Documents Assyriens relatifs aux présages*, Paris, 1894.

† Boissier, p. 104.

the prevailing religion; just as the doctrines represented the theoretical phase, and the cult the natural outcome of the desire to do homage to the gods, in order to retain the goodwill of the powers in whose hands the welfare of the country, the success of the rulers, and the fate of the individual lay. The large space occupied by the omen texts in the religious literature that was produced in Babylonia and Assyria, is a valuable testimony to the strength and persistence of the belief that the intention of the gods was revealed in the movements of the sun, moon, and planets, and the phenomena of heaven in general, or in the unusual happenings in nature, and in abnormal events among men and animals, as well as in all manner of incidents arousing special attention or calling for comment of whatever kind.

Before leaving this large subject, the importance of which for an understanding of the religion of Babylonia and Assyria justifies the rather elaborate treatment accorded to it here, it is necessary to consider briefly one more of its phases, which, because of its direct bearing on the fate of the individual, is of considerable importance. The mystery of *sleep*, with its most characteristic manifestation, the *dream*, profoundly impressed people in a primitive stage of culture, and continued to do so long after they had cast aside many of the beliefs belonging to the first attempts at the development of civilization. One could control, at least in large measure, one's thoughts and fancies while awake, but what one saw and heard while asleep appeared to be manifestations directly brought to one's attention through outside forces. The gods, who showed their power in storms and earthquakes, who made themselves heard in thunder, and who spoke indirectly to men by signs written in the heavens, gave a direct message in the dreams that they sent to those lying in the embrace of sleep. Every dream represented such a direct message; and, whether we turn to early Babylonian rulers like Gudea (c. 3000 B.C.), who receives instructions through a dream to build the temple E-ninnu to his favourite god Niniḫ,* or to a late Assyrian king like Assurbanipal, who is encouraged to go forth to battle by a vision at night of Ishtar clothed in battle array,† we find throughout the duration of the Babylonian-Assyrian religion the same profound significance attached to dreams.

Hence, in addition to the moon, sun, planet, and star portents, and handbooks for guidance in interpreting 'birth' and 'animal' portents, manuals were prepared that might serve the priests in interpreting for anxious inquirers the meaning of the visions that they saw during the hours of sleep. While here, again, the endeavour might be made to provide for all contingencies, the task would be even more hopeless than in the case of handbooks for 'birth' portents, and the priests would have to be content to collect as many instances as possible of dreams and the interpretations vouchsafed in the past, and to regard these as typical instances which might serve as guides for the new dreams that would constantly be brought to their notice. A careful study of these collections will enable us to understand the principles which in general controlled the interpretations; and, even though in many instances we shall fail to understand the basis for the interpretations, we gain the conviction that the dream interpreter proceeded in some methodical way, and did not follow caprice, or allow himself to be led by happy guesses. Thus, in the case of animals appearing to one in dreams, we note that certain animals

portend misfortune, while others represent a favourable omen. A dog portends sorrow, a lion success, a goat indicates the death of a son, a stag the death of a daughter, a jackal Divine favour, a fish power, and so on. One can also see the natural association of ideas which suggested that a mountain appearing in a dream was an indication of unrivalled strength, and that salt meant protection; while, on the other hand, the connexion between a date and distress is less conspicuous; but what appears arbitrary to us may properly be attributed to our ignorance of the ideas that the Babylonians and Assyrians associated with the objects in question, and furthermore one must bear in mind that association of ideas formed only one factor in the science of dream interpretation. Past experience of the supposed connexion between some occurrence and a dream formed a second factor; and besides these two there must have been a variety of considerations that served as guides in the development of this science. Over and above this, no doubt, a certain scope was allowed to the judgment of the individual priest, who was obliged, however, to exercise due precaution to make sure that his judgment was based upon solid ground, derived from his experience, and from his study of the manuals that were produced in connexion with the temple organization. To a far greater degree than in the case of other branches of the omen literature which we have considered, the dreams of an individual had a bearing on his own fate. It was a message meant primarily for him; and only when he to whom the gods communicated their purpose was also the occupant of the throne or belonged to the royal household, did the dream assume a wide significance, involving the general welfare. The dream portents thus bring us still closer to the circle of the direct and personal influence exerted by the prevailing religion upon worshippers in their private capacity.

5. *Prayers and hymns.*—Recourse to incantations and omens, we have seen, was perfectly compatible with the development of advanced conceptions regarding the chief gods recognized in the systematized pantheon; and the prominent part played by incantation rituals and by omen collections in religious practice down to the latest days in no way hindered the growth of other branches of religious literature in Babylonia, and the extension of these branches to Assyria. The belief that the ills and misfortunes of life were due to the mischievous influence of demons and spirits, either acting independently or at the instigation of those who had the power to control their actions, was too deeply ingrained in the flesh and blood of the people to be seriously affected by the view that the gods, so much more powerful than demons or witches, were on the whole favourably inclined towards mankind, and inflicted punishment upon them only for sufficient cause, chief among which, to be sure, was the neglect of proper homage and devotion to them. The theological system devised by the schools was forced to take cognizance of the popular beliefs, and indeed strengthened them by thus emphasizing the contrast that existed between gods and demons.

As a consequence, higher speculations regarding the manner of the Divine government of the Universe could be introduced into the incantations themselves, without seriously affecting the much more primitive conceptions on which the incantations rested. The 'Maḫlu' series furnishes examples of compositions worthy of the term 'hymns,' which were introduced as preludes to the recital of a jumble of formulas, the power of which rested in the combination of words employed; and through-

* See Thureau-Dangin's essay, 'Le Songe de Goudéa' (*Comptes rendus de l'Académie d'Inscriptions*, 1900, pp. 112-122).

† See Schrader's *Keilinschriftliche Bibliothek*, vol. ii. p. 251.

out the other series known to us similar compositions addressed to various deities are scattered. Nor did the belief, also deeply ingrained, that the study of heavenly phenomena offered an opportunity of ascertaining the intention of the gods, check the religious development which ascribed ethical motives and considerations of right and wrong to the gods in their dealings with their subjects. It might be that, through the movements of the stars, or the birth of monstrosities among mankind or animals, or through a dream, the Divine anger against the country, the ruler, or the individual, was revealed, yet it was generally possible by prayer and by sacrifice to alter the Divine will, and to avert the threatened catastrophe by securing the goodwill of the angry god, or even by fortifying oneself through the protection of one's special Divine protector against some hostile power, just as one could invoke a god against the mischievous devices of a demon or a witch. Nay, even when the blow fell upon one, the hope of averting its full force still remained. Oppressed by the fear of demons lurking everywhere, by the dread of witches and sorcerers who prepared their attacks in secret, and hampered by the multitudinous occurrences that were so full of significance, the outlook for the individual would indeed have been hopeless but for the outlet afforded, through prayers and hymns, for a direct appeal to the Divine powers, irrespective of what the stars declared or what the demons purposed. The prayers and hymns thus reveal the brighter side of the religion of Babylonia and Assyria, as well as its more spiritual phase and its higher aspirations. They tell us of the hopes that filled the breasts of the worshippers, enabling them to overcome the gloom that must have resulted from reflecting on the dangers that beset them at every turn, and the evils that were constantly staring them in the face. Even though a great majority of this class of compositions that have been preserved for us are royal prayers and hymns, placed in the mouth of royal personages or having reference to public events, the spirit embodied in them reflects the popular conceptions formed of the gods, and in a large measure at least they embody aspirations and hopes shared by the people at large.

For the study of the prayers and hymns we have, besides the tablets in the library of Assurbanipal, the votive and historical inscriptions of the rulers of Babylonia and Assyria, in which prayers are frequently introduced. Such prayers, embodying requests for a long life, a prosperous rule, victory over enemies, and abundant offspring, are more frequently encountered in the inscriptions of the rulers of the south than in those of the north. The Assyrian rulers contented themselves with an invocation addressed to some god, or to the chief gods of the pantheon, at the beginning of their inscriptions, and with curses and threats hurled at those who should destroy or deface their monuments; but the historical inscriptions of Assyria furnish us also with some specimens of genuine prayers.

Taking up, first, the prayers introduced in the inscriptions of Babylonian rulers, one of the best examples, though not in the form of a direct address, is to be found in the inscription of Lugal-zaggisi (c. 3500 B.C.). The king, after ascribing his success to the help of the gods, and more especially to Bel of Nippur, closes with a fervent appeal to Bel*—

'En-ili, king of the lords, my beloved father; may he grant me long life, and the land peace and tranquillity! May he cause the army to flourish, and guard the sanctuaries! May he regard the land with favour, and grant mercy to its inhabitants; and may I continue to rule as a powerful leader!'

* Hilprecht, *Old Babylonian Inscriptions*, i. 2, No. 87, col. i. 13-36.

Another southern ruler, Gudea (c. 3000 B.C.), wishing to assure himself of the support of Bau in his undertakings, addresses her as follows:—

'O my queen, lofty daughter of Anu,*
Who furnishes proper counsel, and holds the first rank
among the gods.
Thou who grantest life to the land.

Thou art the queen, the mother, who has founded
Shirpurla.

The nation upon which thou lookest in mercy prospers.
Long life is vouchsafed to the hero on whom thou dost
look with favour.

I have no mother—thou art my mother.
I have no father—thou art my father.'

The finest specimens of royal prayers, however, are to be found in the inscriptions of rulers of the New Babylonian period—Nabopolassar, Nebuchadrezzar, and Nabonidus.† Singling out those of Nebuchadrezzar as those possessing greater interest than the others, the prayer addressed to Marduk by the king upon his ascending the throne‡ may serve as a third example of this branch of religious literature—

'O eternal ruler, lord of everything, grant that the name of the king whom thou lovest, whose name thou hast proclaimed, may flourish, as seems pleasing to thee. Lead him in the right path. I am the prince who obeys thee, the creature of thy hand. Thou hast created me, and hast entrusted to me sovereignty over mankind. According to thy mercy, O lord, which thou bestowest upon all, may thy supreme rule be merciful! The fear of thy divinity implant in my heart! Grant me what seems good to thee, for thou art the one who hast given me my life.'

The prayer emphasizes in impressive diction the dignity which the ruler attaches to his royal post, and lays stress upon the responsibilities it involves rather than upon its pomp and glory. Hence the tone of humility which pervades the composition, and which is surprising in a ruler whom we have been accustomed to regard as representing the acme of mortal pride and arrogance. Still more impressive is the expressed hope and purpose to rule according to the dictates of justice and equity, embodied in a dedication prayer on the completion of the temple at Sippar in honour of Shamash, the Divine judge and oracle-god *par excellence* §—

'Shamash, great lord, on entering joyfully thy glorious temple E-barra, look with favour on my precious handiwork. May thy lips proclaim mercy for me! Through thy righteous order may I have abundant offspring! Long life and a firm throne grant me! May my rule be extended to eternity, with a righteous sceptre and beneficent authority. With a legitimate staff of authority bringing salvation to men adorn my kingdom for ever. With strong weapons protect my troops at the call of battle! O Shamash, through judicial decision and through dreams answer me aright. By thy lofty, unchangeable decree may my sharp weapons proceed to overthrow the weapons of the enemies!'

The repetition of such expressions as 'justice,' 'right,' 'legitimate,' is an interesting illustration of the emphasis which this king, contrary again to the current view, laid upon exalted principles in carrying out his policy, and of the high sense of duty by which he was swayed.

The occurrence in historical inscriptions of hymns giving expression to such worthy sentiments, furnishes the proof that the compositions found in the library of Assurbanipal are not to be regarded as literary exercises indicative of the intellectual ambitions cherished by the priests attached to the various temples, but as part of the ritual employed in obtaining oracles, in offering sacrifices,

|| i.e. my dynasty.

and in praying for relief from sufferings and from the attacks of demons, witches, and sorcerers, or for averting impending disaster.

Although a large number of the hymns and prayers in this library—most of them, unfortunately, mere fragments—still await publication,* yet enough are at our disposal to enable us to judge of the general character of this division of the religious literature of Babylonia and Assyria. All the great gods, Marduk, Ishtar, Sarpanit, Tashmit, Shamash, Sin, Adad, Ninib, Nergal, as well as Ea, Bel of Nippur, and Ashur, are represented in the library by hymns of a more or less extensive character. On the whole, the traits assigned to the gods in those hymns are the same as we encounter in the votive and historical inscriptions, though frequently the devotion of the composers leads them to address some favourite god in terms which might lead one to believe that this god embodied all the traits possessed by his fellow-deities,—a phenomenon that finds an interesting parallel in the hymns of the Rigveda, where so often the god addressed has heaped upon him the attributes of all the gods.

Taking up hymns to the heads of the southern and the northern pantheon respectively, Marduk and Ashur, it will be interesting to compare, by an example, the spirit in which each is appealed to. One of the Marduk hymns reads as follows: †—

'O strong, exalted strength of the city of ‡ . . .
Supreme ruler, offspring of Ea,
Marduk, mighty one, chief of E-turra, §
Lord of E-sagila, the strength of Babylon, lover of E-zida;
Preserver of life, prince of E-makhtila, restorer of life,
Protector of the land, taking care of distant peoples.
Mighty sovereign over all sanctuaries,
Thy name is ever good in the mouth of men,
O Marduk, great lord . . .
By thy exalted command let me live in tranquillity,
Let me behold thy divinity!
What I purpose may I secure!
Place justice in my mouth,
Implant mercy in my heart.
May my god † stand at my right side,
May my goddess stand on my left side,
May the god granting salvation stand firm at my side,
To be propitious, to hearken, and to be favourable!
Let the word that I speak be favourable as I speak it.
O Marduk, mighty ruler, command life, command my life!
Before thee have I most humbly bowed myself.
May Bel be thy light, Ea rejoice thee!
May the gods of the universe pay homage to thee!
May the great gods do what is pleasing to thee!'

While this hymn evidently forms part of an incantation text, or was originally composed as an incantation, yet it serves as a good example of the general character of the Babylonian hymns, and illustrates the current conceptions of Marduk as strong and mighty on the one hand, but also, on the other, as one who is inclined to listen to the appeals of sufferers, and from whom they may expect new life.

Hymns to Ashur are not numerous, and the best specimen that has been found ¶ is of interest chiefly as showing how completely the *literati* of Assyria are under the influence of the intellectual life unfolded in Babylonia. The hymn in question is made up of phrases that can be matched in Babylonian hymns addressed to various gods, and only incidentally are the traits that distinguish

the war-god of Assyria introduced. It begins as follows:—

'Mighty chief of the gods, omniscient;
Honoured, exalted lord of gods, fixer of destinies.
Ashur, mighty lord, omniscient;
Honoured, exalted lord of gods, fixer of destinies.
. . . Ashur, powerful chief of the gods, lord of countries.
[Let me proclaim] his greatness, celebrate his glory.
Ashur, let me glorify his being, exalt his name;
Dwelling in E-kharsag-gal-kur-kur-ra,* let me celebrate his glory.
[His strength] let me recall, his courage commemorate;
Dwelling in E-sherra, Ashur fixer of destinies.

Forever let me exalt his power,
Mightily wise leader of the gods, illustrious.
Creator of Shamash, maker of mountains;
Creator of the gods, progenitor of Ishtar.

. . . illustrious whose name is revered,
. . . Ashur whose command is extended,
[Firm?] like mountains whose base is not seen,
[Brilliant?] as the writing of the heavens,† of unlimited extent.
Let his name be celebrated, his command that stands firm.'

The frequent repetitions indicate that each two lines were to be sung or recited by a leader and a chorus respectively—an arrangement that we come across frequently in these compositions.

Decidedly superior in form, more particularly in tone, are the hymns to Shamash; and this may be accounted for through the influence of the conceptions of law and justice associated from early days with the sun-god. It is an image of Shamash that Hammurabi attaches as the headpiece to his famous Code,‡ as the symbol of the principles of justice on which he claims to base his ordinances. In almost all the Shamash hymns that we possess, whether forming part of incantations or representing independent compositions, this phase of his character as the protector of the oppressed, the liberator of those who dwell in gloom and darkness, and the destroyer of the wicked, is strongly emphasized. Taking, for example, a hymn intended for the morning service, Shamash is addressed as follows: §—

'O lord, illuminator of darkness, who reveals the face [of heaven?] . . .
Merciful god, who lifts up the lowly, protects the weak.
To thy light all the great gods look up.
All the Annunaki look up to thee.
All mankind thou guidest like a single being.
Expectantly with raised head they look up to the sunlight.
When thou dost appear, they rejoice and exult.
Thou art the light for the most distant ends of the heavens,
The standard for the wide earth.
The multitudes look up to thee with joy.'

The ethical traits of the god are even more effectively brought out in a section of one of the finest of the Shamash hymns, which is too long to be quoted in full ||—

'Who plans evil—his horn then thou dost destroy,
Who in fixing boundaries annuls rights.
The unjust judge thou restrainest with force.
Who accepts a bribe, who does not judge justly—on him thou imposest sin.
But he who does not accept a bribe, who has a care for the oppressed,
To him Shamash is gracious, his life he prolongs.
The judge who renders a just decision
Shall end in a palace, the place of princes shall be his dwelling.

The seed of those who act unjustly shall not flourish.
What their mouth declares in thy presence wilt thou destroy; what they purpose thou wilt annul.
Thou knowest their transgressions; the declaration of the wicked thou dost cast aside.
Every one wherever he may be is in thy care.
Thou directest their judgments, the imprisoned dost thou liberate.

* 'Great mountain of countries'—name of temple to Ashur.
† A frequent expression designating the stars.
‡ See the illustration in Scheil, *Textes Élamites-Sémitiques*, ii., frontispiece.
§ Rawlinson, iv. 2 19, No. 2.
|| See C. D. Gray, *Shamash Religious Texts* (Chicago, 1901), pp. 17–19.

† King, *Babylonian Magic and Sorcery*, No. 9.

‡ The name of the city is, according to King, Ashur, and the traces point to this reading. But if this be correct, then we must perforce assume that Assurbanipal's scribe intentionally substituted the capital of the northern kingdom for Babylon or some other southern town.

§ Temple at Eridu.

|| The special protecting god and goddess of the individual are meant.

¶ Craig, *Assyrian and Babylonian Religious Texts*, i. pl. 32–37.

Thou hearest, O Shamash, petition, prayer, and appeal,
Humility, prostration, petitioning, and reverence.
With loud voice the unfortunate one cries to thee.
The weak, the exhausted, the oppressed, the lowly,
Mother, wife, maid, appeal to thee.
The one removed from his family, the one dwelling afar
from his city.
The peasant when he gathers in his harvest appeals to
thee.'

In this way the hymn proceeds to enumerate the various classes of society—the merchant, the hunter, the shepherd, the learned; and the various conditions under which the appeal for help or recognition of assistance is addressed to the great sun-god.

6. **Penitential Psalms.**—There is only one other subdivision of the religious literature of Babylonia and Assyria in which a still higher ethical and spiritual level is reached, in a series of compositions, also known to us chiefly from the library of Assurbanipal, in which the central idea is the consciousness of guilt, and in which, in connexion with a confession of sins, the fervent appeal is made to some god or goddess, or to the gods in general, for forgiveness. To these compositions, of which a considerable number have been published, and which appear to have been collected into a series, like the Incantation texts and the somewhat similar collection of the Prayers, the name 'Penitential Psalms'* has been given by scholars because of the striking resemblance in the general tone, and to a certain extent even in phraseology, to certain of the Biblical Psalms in which confession of sins and shortcomings constitutes the keynote. In a general way, of course, these 'Penitential Psalms' belong to the division of 'Hymns and Prayers'† which so often touch upon the question of guilt and sin; and it is often difficult to determine whether a composition, in which glorification of a deity's power, the appeal to his or her assistance, and the consciousness of sin are about equally distributed, is to be placed in the special category of 'Penitential Psalms.' Bearing in mind that sharp divisions do not exist here any more than between prayers and incantations, appeals or formulas, let us pass on to some specimens which will illustrate the general character of these compositions. The adaptation of these 'Psalms' for the ritual is indicated by the alternating utterances of the penitent and the priest acting as mediator between the worshipper and his deity.

As an example of the penitent's appeal—in this case to the goddess Ishtar—the following may serve:‡—

'I, thy servant, full of sighs, call upon thee.
The fervent prayer of him who has sinned dost thou accept.
If thou lookest upon a man, that man lives,
O powerful mistress of all mankind,
Merciful one to whom it is good to turn, who accepts
sighs.'

The priest thereupon strengthens the appeal of the penitent—

'Since his god and his goddess§ are angry with him, he calls upon thee.
[Turn thy face towards] him, take hold of his hand.'

* See Reisner, *Sumerisch-Babylonische Hymnen* (Berlin, 1896), Introduction. In 1855 Zimmern published nine Penitential Psalms with full commentary, under the title *Babylonische Bußpsalmen*. Further specimens are to be found in Craig, *Assyrian and Babylonian Religious Texts* (Leipzig, 1895-1897), and a particularly fine one is given in King's *Seven Creation Tablets*, vol. i, pp. 222-237. See also Zimmern, *Keilschriften und Bibel*, pp. 35-38, for a German version.

† See the Introduction to King, *Babylonian Magic and Sorcery*, p. xv f.

‡ Rawlinson, iv, 2 29*, No. 5; Zimmern, *Bußpsalmen*, No. 1.

§ The special protecting god and goddess of the individual are meant. See above, p. 564b.

The penitent—

'Besides thee, there is no guiding deity.
Look in mercy on me, accept my supplication,
Proclaim pacification, and let thy liver be appeased.
How long, O my mistress, till thy countenance be turned
towards me?
Like doves I lament, I am satiated with sighs.'

The priest again appeals on behalf of the sinner—

'With distress and pain, his spirit is full of sighs;
Tears he weeps, [he pours forth] laments.'

Perhaps the finest specimen of these Penitential Psalms is one that has quite recently been published by Mr. L. W. King, and is likewise addressed to Ishtar.* Consisting of 106 lines with eight additional lines, containing ceremonial instructions, it is too long to quote in its entirety. It is pieced together, indeed, from three distinct hymns,† and the first two of these hymns may again be subdivided into two sections, namely the invocation, with the epithets of the goddess, followed by the appeal for appeasement of the goddess's anger. In the first hymn Ishtar is glorified under the names of *Irnina*‡ and of *Gushea*, representing goddesses, whose attributes and rôle the 'great goddess' has absorbed. It begins as follows:—

'I pray to thee, lady of ladies, goddess of goddesses,
Ishtar, queen of all peoples, guide of mankind.
Irnini,‡ exalted art thou, lady of the Igigi;
Mighty and sovereign art thou, supreme is thy name,
The light of heaven and earth, valiant daughter of Sin art
thou;
Bearer of weapons, arrayed for battle,
Controlling all laws, clothed with the crown of sovereignty.
O lady, exalted is thy rank, supreme over all the gods!
Thou causest lamentation, thou createst hostility among
friendly brothers,
Thou givest strength.
Strong art thou, lady of victory, who dost overthrow those
who oppose me.'

Addressing her as Gushea,§ the petitioner exclaims—

'Sacred chambers, shrines, temples, and sanctuaries look
to thee.
Where is thy name not (pronounced)? Where is thy
decree not (obeyed)?
Where are thine images not made? Where are thy sanc-
tuaries not founded?
Where art thou not great? Where art thou not supreme?'

In the second hymn the appeal begins—

'O goddess of men, O goddess of women, whose way
none can fathom!
Where thou lookest in mercy, the dead revives, the sick
is healed;
The afflicted one is redeemed who looks on thy coun-
tenance.
I, in humiliation and sorrow, thy servant racked with
pain, call on thee.
Look upon me, my lady, hear my supplication;
Look in mercy on me, hear my prayer;
Announce my release,|| and let thy liver be appeased.—
The release of my suffering body, which is full of distress
and pain;
The release of my sick heart, full of tears and sorrow;
The release of my suffering entrails, full of distress and
pain;
The release of my troubled house, shaken with grief;
The release of my liver,¶ which is satiated with tears and
sorrow.'

In the third hymn the penitent inquires—

'What have I done, O my god and my goddess?
As though I did not reverence my god and my goddess,
am I treated.
Sickness, disease,** ruin, and destruction have overwhelmed
me;
Misfortune, turning away of countenance, and fulness of
anger are my lot;

* King, *Creation Tablets*, i. 222-237 (transliteration and translation, ii, pl. 75-84 (text).

† (a) lines 1-34, (b) 35-50, (c) 51-106.

‡ In the incantation texts, e.g., 'Labartu' series (Myhrman, *Zeitschr. f. Assyriol.* xvi, p. 154), Ishtar is addressed as *Irnina*.

§ The name also occurs in incantation rituals, e.g. Zimmern, *Beiträge zur Kenntnis der Bab. Religion*, p. 130 (l. 73).

|| The word used here and in the following, *akhula(ia)*, signifying literally 'how long yet,' has become a conventional expression for the hoped-for release from suffering.

¶ i.e. spirit.

** Lit. 'head disease'—here a general term for lingering illness.

Anger, indignation, the fury of gods and men.
 I behold, O my lady, days of affliction, months of distress,
 and years of misfortune;
 I behold, O my mistress, slaughter, turmoil, and rebellion;
 Death and misery have made an end of me.*

Ishtar is his only hope, and to her accordingly he prays—

'Dissolve my sin, my iniquity, my transgression and sin.
 Forgive my transgression, accept my supplication.

Guide my steps that I may walk gloriously among men.
 Command, and at thy command may the angry god be
 appeased!
 And may the angry goddess turn towards me!
 May the dark smoking brazier flame up again!
 My extinguished torch be relit!'

There are sufficient signs in this beautiful composition to indicate a royal personage as the one who thus pours out his soul before the Divine throne; and the same is the case in most of the other 'Penitential Psalms' that have been preserved. While this is due in large measure to the circumstance that the rulers could more readily have their supplications committed to writing, their position, as those upon whose relationship to the gods the general welfare of the country depended, is also to be taken into consideration to explain why the priests were zealous in giving a permanent form to the proper phrases and expressions to be used in times of general distress ascribed to the displeasure of some god or goddess with him in whose hands the affairs of State lay. Despite the advanced religious sentiments expressed in those prayers for forgiveness, they still rest upon the primitive belief that the ruler must have in some way provoked the anger of some deity—through insufficient reverence, or by an unintentional disobedience to his dictates. Hence the appeal was accompanied with rites of an expiatory character; and it seems a sharp descent from a lofty eminence when we find attached to this fervent supplication to Ishtar, directions for symbolic purification by sprinkling water on a green bough, for a fire-offering and a libation, and for a recital of the prayer three times 'without looking behind,'*—precisely as we find such directions in incantation texts proper. The link between the incantations and the hymns, despite the differences in religious conceptions, is illustrated by the retention of the term *shiptu*, i.e. 'incantation,' even to designate the finest and purest appeals for Divine grace and mercy. The 'Penitential Psalms'—the flowering of the religious spirit of Babylonia and Assyria—form no exception; and the hymn to Ishtar, of which extracts have been furnished, is designated both at the beginning and in the colophon as '*shiptu*.'

The continuity of the development of religious thought in the Euphrates Valley is thus preserved, and finds an expression even in its literature. The 'new' sprout is grafted on to the 'old' branch, and is nurtured by the same roots; but the example of the rulers in publicly acknowledging their dependence upon the gods was made all the more impressive by the bond thus maintained between the higher flights of religious spirit and the primitive rites, which, in the minds of the masses, must have continued to represent the essence of the religion itself.

7. The Babylonian Cosmology.—It is natural to find in a country which developed such a remarkable culture as that of Babylonia and Assyria, that the popular and more or less crude speculations regarding the beginnings of things should in the

course of time have yielded to more consistent and systematic cosmological theories. Corresponding to the efforts of the priests attached to the temples in the great religious centres of Babylonia to systematize the pantheon, which, through the political supremacy acquired by the city of Babylon, led to making Marduk, the god of Babylon, the central figure of the Babylonian theology, we have a literary and intellectual process which had its outcome in the production of a poem or epic* of Creation, in which the chief rôle is assigned to this same god, Marduk. As constituting one of the main sources for our knowledge of Babylonian and Assyrian cosmology, it will be desirable to present an outline of this production, so far as the portions of it found in Assurbanipal's library and in New Babylonian copies from Babylonian temple archives enable us to do so. Although, since the discovery of the first fragments of the composition by George Smith in 1875, large portions of it have come to light, due chiefly to the activity and scholarship of Budge and King of the British Museum, even in the latest and most complete publication† there are many gaps which often seriously interfere with a satisfactory interpretation. We can also see in the composition itself evidences of considerable editing before it received its definite shape. Thus, while the poem embodies distinct traces of purely popular speculations and fancies which form, indeed, the basis upon which the main conceptions rest, an interpretation has been put upon these speculations and fancies that places them upon a much higher level of thought. What is, perhaps, even more significant, is the evidence which the composition affords of having been originally an 'epic' celebrating the deeds of En-lil or Bel—the god of Nippur—in his capacity as the creator, or, to speak more accurately, as the establisher of order and law in the Universe. We are thus led to Nippur as the source of the main features found in the composition, and it is furthermore safe to conclude that in connexion with the literary activity centring around the great temple E-kur, the seat of the worship of Bel, a Creation poem or epic arose which was remodelled by the priests of Marduk's temple E-sagila at Babylon. The rôle of Bel is transferred to Marduk, and additions were made to the old tale, partly intended to justify and illustrate this transfer, and in part prompted by the desire to glorify the chief god of Babylon, and to interpret old traditions in a manner in accordance with the theological system perfected in Babylon, and which became the dominant school of thought in the Euphrates Valley as well as in Assyria, albeit with certain modifications introduced by the Assyrian priests. The assigning of the chief rôle in the establishment of the Universe to En-lil or Bel, of course, reflects the attachment of the priests, and in a measure also of the populace of Nippur, to their own favourite deity; but from indications in the Creation poem itself, as well as from other sources, we know that traditions were also current in Babylonia which assigned the same rôle to Ea. Such a tradition would naturally arise in the ancient city

* The same direction is given, e.g., in the 'Labartu' series (Myhrman, *Zeitschr. f. Assyriol.* xvi. 160), and forms a parallel to similar directions among the Greeks in the case of offerings to Hecate, with whom Labartu has much in common, as Myhrman, *l.c.* p. 151f., points out.

* Our justification for speaking of this Babylonian Creation story as a 'poem' rests upon the character of the composition itself, which is distinctly poetical in its form. See King, *Creation Tablets*, i. pp. ccxii–ccxiii, and more fully Delitzsch, *Das Babylonische Welterschöpfungsepos* (Leipzig, 1896), pp. 60–68, and the references to the opinions of Budge, Zimmern, and Gunkel; it partakes of the character of an epic by virtue of the prominence assigned in it to a single personage, Marduk, whose glorification constitutes the main purpose of the composition in its present form.

† *Cuneiform Texts from Babylonian Tablets, etc., in the British Museum*, pt. xiii. (1901), with a volume of supplementary texts and transliterations and translations of all the fragments known, by L. W. King, *The Seven Tablets of Creation; or the Babylonian and Assyrian Legends concerning the Creation of the World and of Mankind* (2 vols., London, 1902).

of Eridu, the main and oldest seat of Ea worship; and there are reasons for believing that in other religious centres Ishtar and, perhaps also, Anu were accorded the distinction of having brought the Universe into existence. At all events, it is certain that the Creation story which we are about to analyze represents one only of several versions produced in the Euphrates Valley; and, in extracting from it the cosmological theories upon which it rests, we must make due allowance for those features which reflect the attitude of a specific body of priests or a special school of thought towards a favourite deity.

Bearing in mind that in its present form the most complete Babylonian Creation story known to us has assumed the character of a pæan in honour of the chief god Marduk, we find that it consisted of seven tablets, and contained, according to King's calculation, about one thousand lines.* The story itself, known from its opening words as the *Enuma elish* or 'When above' series, may be divided into six sections, representing the chief steps in the establishment of the Universe: (1) the conflict of Apsu and Mummu with the gods, ending with the overthrow of Apsu and the capture of Mummu, brought about largely through the instrumentality of Ea; (2) the revolt of Tiamat and her consort Kingu and their followers against the gods, and the discomfiture of the rebellious host by Marduk, who is sent against Tiamat by Anshar with the approval of the gods; (3) the establishment of the order of the Universe, involving the spreading of an expanse underneath the heavens, the creation of the earth, the establishment of the planets and stars in their courses and place, and the regular change of seasons and of day and night, through the determination of the movements of the moon, and of her relationship to the sun; (4) the creation of man by Marduk; (5) the glorification of Marduk by the gods and mankind, ending with the entrusting to him of the 'tablets of fate' and the assignment to him of fifty 'glorious' names; the whole concluding with (6) an epilogue embodying good counsel to men, with instructions to recall the deeds of Marduk, and to pay proper homage to him.

The composite character of the story in its present form is revealed by the introduction, at the beginning, of two conflicts which both symbolize the same process. *Apsu*, signifying the 'deep,' is a symbol of primeval chaos, figured as a time when the waters covered everything, and were filled with monstrous beings subject to no laws. By the side of Apsu are two other beings—*Mummu*, an obscure word, but also conveying the general idea of chaos and confusion, and *Tiamat*, which, equivalent to the Hebrew word *têhôm* (תִּהוֹם), occurring in the Creation story of Gn 1, likewise embodies the idea of 'the great deep.' That all three beings are identified with the primeval waters, follows from the description furnished by the opening lines of the poem, where 'their waters' are spoken of as being 'mingled together.' The three terms thus prove to be practically synonymous, and the most probable explanation of the existence of all three terms is that they represent the 'survival' of varying traditions current in regard to the primeval chaos, which have been combined in the tale that became the standard account of how the Universe, with its laws and phenomena, came into being.† A factor

that may also have been at work in leading to the retention of three terms for the primeval chaos is the desire to find, in primeval times, a triad corresponding to Anu, Bel, and Ea, who, in the later system of Babylonian theology, represent the quintessence of Divine control of the several divisions of the Universe. But however we are to account for the introduction of Apsu and Mummu by the side of Tiamat, the fact is clear that these beings, symbolizing the chaotic watery mass, were regarded as the original elements, the existence of which not only precedes that of heaven and earth, but which flourished before the gods were born. This theory is set forth at the beginning of the story—

'When above, the heavens were not named;* Below, the dry land did not bear a name.*'

Apsu, the primeval,† their progenitor, Mummu [and] Tiamat,‡ the mother of all of them, Their waters were mingled together.

No field was marked off, no marsh was to be seen When none of the gods had yet been produced.

No name was called, no fate decreed.

Then the gods were created in the midst [of heaven]‡

Lakhamu and Lakhamu were produced.

Time went by. . . .

Anshar and Kishar were created [over them]‡

Days passed and there came forth . . .

Anu their son. . . .'

In these lines the attempt is made to furnish a description of the time when 'nothing' was, with the inevitable result of such attempts, whether made in ancient times or in our own days, of involving us in a hopeless tangle of contradiction and obscurity. It is a gratuitous task to pick out the weak points in this endeavour to solve the hopeless but fascinating puzzle of beginnings; and it will be more useful to endeavour to grasp the theories embodied in it. The language is frequently obscure, due to the desire of the narrator to avoid definite terms that would be misleading by their very definiteness. He avoids the common word for earth, which is *iršutum*, but uses instead a rare term, *ammatum*, with the purpose, as it would seem, of conveying the idea of a measured-out expanse of dry land. To convey more vividly the conception that nothing grew in the primeval waters, it is added that 'fields were not marked off, and no marsh was seen'—expressions suggested by the appearance of the land in the Euphrates Valley, where fields were marked off by boundary stones, and vegetation often appeared where, during the rainy season, there was nought but water. The narrative wishes to emphasize the fact that, in the primeval days, there was water but no vegetation. The grammatical construction warrants and justifies the conclusion that the narrator places at the beginning of things—before the existence of heaven and earth or the gods—the three beings symbolized by Apsu, Mummu, and Tiamat, even though the conception of the second being has already become so obscure that no further specification of it is attempted. Another illustration of the obscurity unavoidable in any attempt to picture primeval chaos is to be seen in the expressions 'their progenitor' and 'the mother of all of them.' The narrator anticipates the conception subsequently set forth, that both Apsu and Tiamat are surrounded by a brood of monsters, and he clearly has these beings in mind when speaking of 'their

* i.e. called into being.

† *Rishtu*, literally 'first,' which is added to distinguish this Apsu from the ordinary use of the word as 'the watery deep,' which actually occurs in Tablet iv. line 142.

‡ It has been customary to regard *Mummu* here as an epithet of Tiamat in the sense of 'chaos,' 'raging,' and the like; but, since *Mummu* occurs in Tablet i. lines 30 and 31 as the 'messenger' of Apsu, it is clear that a separate personage is also intended in the opening lines. The omission of the conjunction is no objection, for the conjunction is omitted also between Apsu and Tiamat.

* King says 'some nine hundred and ninety-four lines' (*Seven Tablets of Creation*, vol. i. pp. iv, xxv). Almost exactly one half of it is complete; and if we add to this the incomplete lines, we have recovered up to the present almost three-fourths of the text.

† *Tohu* and *bohû*, mentioned in Gn 1² in connexion with *têhôm*, are perhaps to be regarded as a faint trace of the primeval triad, Apsu, Mummu, and Tiamat.

generator' and 'the mother of all of them.' The eighth line, with equal vagueness, dwells upon the fact that no name was called and no fate decided, to picture the time when nothing had as yet been created, since there were no gods. The first part of the line seems to be a reference to the animal world in general, the second part a more particular reference to man, whose fate is decreed by the gods. In a general way it is stated that the gods were created, though it is not said by whom, or how many there were. Along with the gods two beings, Lakhmu and Lakhamu, are specified as having been called into being;* and since, in the course of the narrative, they appear on the side of Tiamat, they are evidently introduced as types or symbols of the host of monsters in the wake of Apsu and Tiamat. It is difficult to know how the statement, that after the lapse of time the gods Anshar and Kishar were 'created,' is to be reconciled with the assertion in line 9, unless indeed we may fall back upon the hypothesis of a composite production, after the manner of the 'doublets' so frequently found in the composition of two versions of a story in the OT narratives. At all events, the Divine pair, Anshar and Kishar, represent, in the opinion of the Babylonian theologians, the oldest gods, from whom, indeed, by a doctrine closely akin to emanation, ten pairs of gods are descended.† These pairs are, with one exception, gods who do not play any part whatsoever in the active pantheon as we find it in the historical periods of Babylonia and Assyria; and since, furthermore, neither Anshar nor Kishar, the 'parents,' belong to the active pantheon, it is evident that, by the side of the gods actually worshipped and brought together into a system by the Babylonian theologians, we have a purely 'theoretical' pantheon devised in accordance with the theological speculations of the Babylonian schools of thought. Anshar, signifying the 'heavenly' (or upper) Universe (or 'totality'), and Kishar the earthly (or lower) Universe (or 'totality'), sum up the Divine power in control of all things; and one can follow the logical process which made them the progenitors of the various special powers into which this control was divided. In the Babylonian Creation story, as it lies before us, only two such special powers are introduced—Anu and Ea, the latter under the form Nudimmud; but since Anu and Ea represent two of the three personages constituting the triad which, according to a school of thought that became at one time the prevailing one, comprised the control of the Universe,‡ it is reasonable to suppose that in an older version the third figure, Bel, was also included. The omission of Bel, who in the narrative is identified with Marduk, is again an evidence of the transformation which the old traditions and speculations underwent in order to make them conform to the main purpose for which the entire tradition is preserved—the glorification of the favourite Marduk.

Anu, the god of heaven, and Nudimmud or Ea, who is described as without a rival in wisdom and strength, are the commanding figures in the conflict that now arises between the gods, as the representatives of order, and Apsu, Mummu, and Tiamat, as the representatives of chaos and chaotic anarchy, though the fragmentary state of the first tablet does not permit us to grasp clearly the part that Anu plays by the side of Ea, who is the principal contestant. The gods, it appears,

were unable for a long time to secure control of the three beings symbolical of primeval chaos. The latter, not content with a passive resistance, plot an attack upon the representatives of order. Apsu calls upon his 'messenger' Mummu for aid, and together they go to Tiamat to consult with her in regard to a plan for the destruction, or at all events for the crushing, of the independent spirit of the gods. From new fragments quite recently found* it is now certain that at this point of the narrative the gods are regarded as the offspring of Apsu and Tiamat. We may therefore, in view of this, venture to proceed a step further, and look upon Apsu and Tiamat as the 'male' and 'female' elements respectively of the primeval chaos, through whom not only Mummu and the brood of monsters, but also the gods, are produced. This, indeed, is implied, although not distinctly mentioned, in the opening lines of the first tablet above quoted. The Babylonian theologians would thus, with commendable consistency, trace both classes of beings—the monsters who form the army of Apsu and Tiamat as well as the 'great gods'—to primeval chaos. It is the gods, therefore, who organize a revolt against their progenitors, the purpose of which is to put an end to the chaos and confusion for which Apsu and Tiamat stand. Apsu presents his complaint against the gods to Tiamat. In rage he exclaims—

'By day I have no rest, at night I cannot lie down,
I will surely destroy their course, surely overthrow them.'

Tiamat shares Apsu's anger—

'She plotted evil in her heart.†
What shall we do? Let us indeed destroy.'

The text at this point becomes defective; but so much is clear that Ea, described as the 'one who knows everything,' takes up the conflict on behalf of the gods, and that Anu is in some way associated with him. It is also probable, though not certain, that the weapon with which Ea overcomes Apsu and his followers is the 'pure incantation,' which, presumably, he hurls against them. Such a procedure would be in perfect accord with the current conceptions about Ea, who is essentially a god acting by the power of the word.‡ At all events, Apsu is overthrown and Mummu is captured.

Thus ends the first episode in the symbolical conflict between chaos and order; and the second, which, as has been suggested, is merely a 'doublet,' or second version, is at once introduced.

Evidently, the version which assigned the conquest of Apsu and Mummu to Ea was the one which assigned to this god the distinction of having established the laws of the Universe. We may call it the 'Eridu' version of Creation; but, naturally, only so much of it could be introduced as would not interfere with Marduk's prerogatives. After the recital of Apsu's defeat, the 'Eridu' version disappears, and the 'Nippur' version, transformed by the substitution of Marduk for Bel into a 'Babylon' version, is taken up.

Tiamat, whose part in the Ea-Apsu conflict is not clearly defined, is represented as depressed; but her courage is revived by a deity called the 'bright god,' who is probably to be identified with Kingu,§ appointed by Tiamat to be the leader

* See King's *Seven Tablets of Creation*, i. pp. 183-184, settling the reading at the end of line 34 of the first tablet, 'the gods, their sons.'

† Literally, 'stomach.' See the restoration of these lines in King, vol. i. p. 184.

‡ Ea, it will be recalled, was one of the chief gods invoked in the incantation series, many of which originated at his seat of worship, Eridu. A special incantation known as the *Shipat Eridu*, 'Eridu incantation,' is frequently referred to, e.g. *Cuneiform Texts*, xvi. pl. 21, 205; 22, 250, etc.

§ See King, *Creation Tablets*, i. p. 14, n. 1.

* The verbal form used (so also in line 7) of the creation of the gods is *shupû*, which conveys the idea of coming forth and streaming forth.

† See the lists in Rawlinson, ii. 54, Nos. 3 and 4; and iii. 69, No. 1, obv.; and Radan's valuable commentary, 'Bel, the Christ of Ancient Times' (*Monist*, vol. xiv. 81-87).

‡ See above, p. 538.

of her hosts, and who occupies a position by the side of Tiamat somewhat similar to that of Mummu by the side of Apsu. Kingu urges Tiamat on to the fray, and encourages her to entrust the war of vengeance to be waged against the gods to her host of monsters, who, accordingly—

'Banded themselves together, advancing at the side of Tiamat;

Mighty in planning mischief night and day without respite,
They prepared for war, fuming and raging,
Uniting forces and preparing for the fray.'

Besides supplying her followers with invincible weapons, Tiamat gives birth to monster serpents, described in the following terms:—

'With sharp teeth and merciless fangs,
Their bodies filled with poison instead of blood;
Terrible dragons, clothed with terror,
Decked out with awful splendour, of lofty stature;
Whoever saw them was overcome with terror.
Their bodies rose up, and no one could resist their attack.
She * set up vipers and monster serpents and Lakhmu, Hurricanes (?), raging hounds, scorpion-men, Mighty tempests, fish-men, and rams, Bearing merciless weapons, fearless in battle, Mighty were her commands, irresistible.
In this fashion eleven huge monsters she made.
Since among the gods, her offspring, he had encouraged her, She raised Kingu among them to power,
To march in front of the host, to lead the forces,
To seize the standard, to advance to the attack,
To direct the battle, to regulate the fight.'

Tiamat still claims control over the gods, and, in investing Kingu with supreme power, declares—

'I have uttered thy incantation. In the assembly of the gods have I raised thee to power;
The dominion over all the gods have I entrusted to him.
Be thou exalted, my chosen consort art thou.'

To further emphasize her control, she hands Kingu the 'tablets of fate' to be hung on his breast. The meaning of the elaborate description of the monsters and monstrosities forming the army of Tiamat is quite clear—it is to emphasize the reign of terror and confusion which preceded the control of the Universe by the gods. Tiamat, the symbol of chaos, can give birth only to creatures of terror and destruction, to monstrous dragons, and to the hybrid beings, half men and half animals, with which, probably, popular fancy conceived the Universe to have been populated in primeval days, and of which the sculptured representations of human-headed lions and bulls with enormous wings—placed as guardians against evil spirits at the entrances to palaces and temples—represent the survival in historical times. Nor is it difficult to see how this picture of chaos, which agrees substantially with the account of Berossus,† arose. The climatic conditions prevailing in ancient Babylonia suggest the obvious explanation based on the long season of rains and storms, when the elements of nature seem to be set loose without control, when wind and rain sweep over the land, everywhere causing inundations, which, before the perfection of the canal system, must have regularly placed entire districts of the Valley under water for a period each year. This annual chaos would be regarded as typical of a permanent condition before the great gods, identified with the powers of nature—the sun and moon—and associated with the starry firmament, introduced the orderly process of events, of which the regular movements of sun, moon, and planets, and the fixed position of the other stars, were the natural symbols. The subsequent course of the narrative bears out this interpretation, and shows that the Babylonian cosmology rests upon the principle of the substitution of order and law for chaos and lawlessness. The thought of a *creatio ex nihilo* lay beyond the mental horizon of

the Babylonian and Assyrian theologians; and it is to be observed that even in the Biblical account, where the Universe, with all it contains, is conceived as coming into existence by the decree of one supreme Power, the chaos, represented by 'darkness resting upon the deep,' is regarded as a real substance. In short, ancient man no less than his modern successor was unable to conceive of a *real* beginning of things, and it is merely a question as to where the boundary line representing the limitation of human logic or of human fancy is to be placed. Beyond that border line we pass into the domain of faith, or of mystic speculation.

The second and third tablets of the Creation story are taken up with the preparation and preliminary stages of the great conflict about to ensue between Tiamat and the gods. The connecting link between this conflict and the previous one between Apsu and Ea is revealed at the beginning of the second tablet, where it is said that Tiamat formulated her evil plans in order to avenge the discomfiture of Apsu. Ea, who, it will be recalled, appears in the first conflict as the 'one who knows everything,' is also in the second conflict the god through whom the gods learn of the designs of Tiamat. He comes to Anshar, 'the father who begat him,' and says—

'Our mother, Tiamat, is full of hate towards us;
With gathered forces she hath waxed furious,—
All the gods have turned to her,
Even those whom ye created * are at her side;
Banded together they advance at the side of Tiamat,
Mighty in planning mischief night and day without respite.'

It would appear, therefore, that not merely the offspring of Tiamat, but also some of those beings sprung from the gods, are on the side of 'chaos.' Ea, unfortunately, does not specify which gods he has in mind, but we may perhaps assume that the Babylonian theologians thought of such forces as Adad,† the god of storms *par excellence*; Nergal and Namtar, associated with destruction and pestilence, who must have been conceived as, apparently at least, abetting the cause of Tiamat.

Anshar appeals in turn to his sons, Ea and Anu, to lead the attack against Tiamat. The details of Ea's endeavours to either conquer or pacify Tiamat are, unfortunately, missing;‡ but from a subsequent reference§ it follows that Ea was 'afraid,' and obliged to 'turn back'; nor is Anu more successful. He is sent out by Anshar, in the hope that Tiamat may be appeased by hearing the 'word' of Anshar—

'Go and stand before Tiamat,
That her liver may be appeased, her heart pacified;
But if she will not hearken to thy word,
Then speak to her our word, that she may be appeased.'

But as Anu approaches, Tiamat growls,|| and the god also turns back in terror. The third son is now appealed to by his father Anshar; and as one of many indications that by this son was originally meant the third member, Bel, of the triad Ea, Anu, and Bel, it is to be noted that he is referred to as *be-lum*, i.e. 'the lord,'¶ though subsequently the identification with Marduk is made without reservation by the writing *Amar-ud*,** the ordinary

* The plural is used because the address is evidently to Anshar and his consort Kishar, although only the former is specifically mentioned.

† Adad occurs, and apparently as one of the abettors of Tiamat, in a fragment (*Cuneiform Texts*, xiii. pl. 24, K 3445+Irm. 396, rev. v. 1) which represents a specifically 'Assyrian' version of Creation. See Zimmern, *l.c.* p. 496.

‡ The second tablet is very defective, though large portions may be restored through comparison with the third.

§ Tablet iii. 54. That Nudimmud or Ea was sent out first and Anu second, despite the fact that in the third tablet the order is reversed, has been shown by King, *Creation Tablets*, i. p. 188, n. 1.

|| See King, *ib.* i. p. 12, n. 2.

¶ Tablet ii. 113, 131.

** e.g. Tablet iii. 55, 113, 138, and *passim* in Tablet iv., and in the Epilogue, Tablet vii. 139, though, l. 129, he is called *En-il* (or *Bel*) *ilani*, Marduk.

* Tiamat.

† In Eusebius, *Chronicle* (ed. Schoene), vol. i. pp. 14, 15. See Zimmern, *Keilinschriften und das Alte Testament*, pp. 488-490.

designation of the chief god of Babylon. Bel turns out to be the real conqueror of Tiamat, and the introduction, therefore, of Ea and Anu is made partly with the intent to glorify the chief god of Nippur at the expense of his two companions, and partly as a consequence of the endeavour to combine in the story other existing versions, and to reconcile these various versions with one another. The Ea-Apsu conflict points clearly to the existence of an 'Eridu' version, which celebrated Ea as the creator of man and establisher of the laws of the Universe. In another centre Anu was accorded the distinction; and, when Nippur rose to political and religious supremacy, Bel was invested with the rôle of the conqueror of chaos. Our narrative, therefore, represents the 'Nippur' version; but, by the transfer of the title of Bel to Marduk, it was transformed into the 'Babylon' version, and there the process stopped, though we have traces, as already pointed out, of a distinctively 'Assyrian' version,* in which, by an identification of Anshar with Ashur, the chief god of the Assyrian pantheon, the step is taken which makes Anshar-Ashur the real creator. However, the version which, owing to the long-continued supremacy of Babylon as the centre of the empire, became the dominant—we might almost say 'orthodox'—one, was the narrative with which we are concerned. Anshar kisses Bel-Marduk, and thus dispels his fear. While still implying that Bel-Marduk is to pacify Tiamat by his pure incantation, as Ea overcame Apsu, this reference is merely introduced in order to show that Bel-Marduk possesses all the powers that may be ascribed to any other god. In reality, Bel-Marduk is a warrior, and Anshar also addresses him as such, urging him to proceed and 'trample the neck of Tiamat under foot.' Bel-Marduk accepts the challenge, but in a speech to Anshar, the lord of gods, who determines the destiny of the great gods, imposes the condition that, if he succeeds, he is to supplant Anshar as the chief of the gods—

'If I, your avenger,
Bind Tiamat and save your life,
Call an assembly, declare the pre-eminence of my fate.
In Upshukkinaku † gather together in joy,
Let my utterance, like yours, decree fates.
May whatever I do remain unalterable!
May my orders be unchangeable and irrevocable!'

In speeches like these the purpose of the priests of Nippur and Babylon to justify the position accorded in their system to Bel-Marduk as the decreer of fates is revealed.

The third tablet is taken up with the summoning of the gods by Gaga, the messenger of Anshar, in order to procure their consent to the condition exacted by Bel-Marduk. The vagueness and contradictions resulting from the attempt to combine in the narrative conflicting traditions are illustrated by the position accorded in this tablet to Lakhmu and Lakhmu as leaders of the hosts of gods sometimes referred to as Igigi, and again as Annunaki, though in the perfected theological system the former embody the group of 'heavenly' gods, while the Annunaki represent the group of 'earthly' or rather subterranean gods.‡ Elsewhere in the narrative Lakhmu is introduced along with the monsters who constitute the followers of Tiamat.§ The gods obey the summons, enter into the presence of Anshar, and sit down to a feast, in the course of which, as the narrative states, they fill themselves with wine, and then

* See above, p. 567b; and, further, King, *Creation Tablets*, pp. 197-200, and the authorities there referred to.

† The sacred chamber in which the gods assemble, originally localized in Bel's temple E-kur in Nippur, and afterwards transferred to Marduk's temple E-sagila in Babylon.

‡ See Zimmern, *Keilschriften u. d. Alte Testament*, p. 451 ff.

§ Tablet ii. 27, and parallel passages, iii. 31, 39.

formally do homage to Bel-Marduk. The fourth tablet begins—

'They fitted out for him a lordly chamber,
Before his fathers to reign supreme.
Thou art the honoured one among the great gods.
Thy fate is unrivalled, thy utterance—supreme.*
O Marduk! thou art the honoured one among the great gods;
Thy fate is unrivalled, thy utterance—supreme.*
From this day onward, thy order shall be irrevocable.
Lifting up and abasing shall be in thy hand;
Thy utterance is fixed, thy command unalterable.
None among the gods shall transgress thy boundary.

O Marduk, thou art our avenger.
We give thee sovereignty over the entire Universe.
Thou shalt preside in the assembly, thy word is supreme.
May thy weapon never become blunt; may it strike down thy foe!
O lord, spare the life of him who trusts in thee,
And pour out the life of the god who seized hold of evil.'

As a token of the power assigned to him, Marduk is asked to make a garment disappear and appear again by the mere force residing in his word—again an intimation that Marduk, like Ea, rules by the power of the word. Sceptre, throne, and ring are bestowed on him as symbols of royalty, and he is given the invincible weapon that strikes down the foe. They salute him, 'Marduk is king,' and encourage him for the attack—

'Go and cut off the life of Tiamat.
Let the wind carry her blood into secret places.'

An interesting description follows of the manner in which the god proceeds to equip himself for the fray. Bow, quiver, spear, and club are his weapons. He places the lightning in front of him, and fills his body with flaming fire. From his 'father Anu' he receives a net wherewith to entrap Tiamat. The four winds he assigns to their stations, so as to intercept the escape of Tiamat. Evil winds, tempests, and hurricanes are created by him—in all, seven kinds of winds—that follow behind his 'storm' chariot, on which, drawn by four swift and ferocious horses, he now mounts, brandishing the thunderbolt.

The picture thus drawn of the god making straight for Tiamat is most impressive, and admirably served the purpose of illustrating the terror which Bel-Marduk was supposed to inspire. The picture evidently fits an atmospheric 'storm' god, such as was the old En-lil of Nippur, but is hardly suitable for Marduk, who is distinctly a solar deity, though the transfer of Bel's rôle to Marduk appeared to be justified by the consideration that it is the sun which eventually triumphs over the storms of the rainy season, which, as we have seen, suggested the conceptions formed of Tiamat.

Kingu, the leader of the host of Tiamat, is utterly dumbfounded at the sight of the terrible Bel. His mental and physical paralysis is effectively portrayed, and his followers fall back in terror. Tiamat alone is not dismayed, and, enraged at the challenge—'Stand! I and thou, let us join battle'—which he utters, boldly meets Marduk. The narrative proceeds—

'When Tiamat heard those words,
She became like one possessed, bereft of reason.
Tiamat shrieked with piercing cries,
She trembled and shook to her very foundations.
She pronounced an incantation, she uttered her spell,
And the gods of the battle took to their weapons.
Then Tiamat and Marduk, the leader of the gods, stood up,
They advanced to the fray, drew nigh to the fight.
The lord spread out his net and caught her,
The evil wind behind him he let loose in her face.
As Tiamat opened her mouth to its full extent,
He drove in the evil wind before she closed her lips.
The mighty winds filled her stomach,
Her heart failed her, and she opened wide her mouth;

* Literally, *Anu*.

He seized the spear and pierced her stomach,
 He cut through her organs and slit open her heart.
 He bound her and cut off her life.
 He cast down her carcass and stood upon it.*

The followers of Tiamat, dismayed at the overthrow of their leader, take to flight; but Bel-Marduk surrounds them, and captures them all in the net. He takes from Kingu the 'tablets of fate' and hangs them around his own breast—thus establishing his prerogative as the decreer of destinies for all future times.

At this point the composite character of the narrative is again revealed, for Marduk is represented as returning to Tiamat to stand upon her, to smash her skull, and to drive her blood, carried away by the north wind to secret places, out of her body. It is evident that various traditions existed as to what Bel-Marduk did with Tiamat.

The close of the fourth tablet directs the current of the narrative into a new channel, and introduces us to Bel-Marduk as the creator of heaven, and as the establisher of law and order in the Universe. Out of one half of the carcass of Tiamat, flattened out by him 'like a flat fish,' he makes a covering for the heaven—a kind of door provided with a bolt—and with a watchman to stand guard against the pouring forth of the waters from above. Corresponding to the watchman placed over the waters of heaven, Nudimmud or Ea is assigned to the centre of 'Apsu'—here no longer used as 'chaos,' but as the watery deep, which is conceived as a structure, the limits of which are fixed by Bel-Marduk. Corresponding to this 'subterranean' mansion, a similar structure, which he calls E-sharra, is built in heaven, and Anu, Bel, and Ea are assigned to their respective districts.

The narrative thus leads us to the astrological system perfected by the Babylonian priests, and standing in close relation to their cosmology. According to this system, which rests on the identification of the gods with the sun, moon, and stars, the heavens constitute a structure provided for the gods. The regularity of the movements of the sun and moon and the course of the planets within defined limits, were accounted for by the theory which assigned to some god the distinction of having established the fixed order of events in the upper firmament. It is natural to suppose that Anshar should have been the one to do so; but, since he relinquishes his authority to Bel-Marduk, the latter is accorded the distinction; and, since Marduk is identified with the sun, a further change had to be introduced into the narrative by omitting all references to the creation of the sun. More important, however, than the assumption in the present form of the narrative, that it is the sun-god Marduk who creates the heavens and assigns to the gods their positions and functions, is the system itself, which is revealed at the close of the fourth tablet, and further developed at the beginning of the fifth tablet. The triad, Anu, Bel, and Ea, in this astrological system are not the old local deities who bear that name from the centres in which they were worshipped, nor do they sum up the control of the Universe, but they are simply certain sections of the ecliptic chosen as guides for determining the position and courses of the stars and planets respectively, Anu being the middle strip of the ecliptic, Bel the northern section, and Ea a star in the southern section.* With these as guiding points, the positions are assigned for the great gods; and the identification of the latter with the stars being specifically set forth, the seven *lumashi* stars or constellations of the zodiac are specially referred to, by means of which

the divisions of the year are determined. At each end of the great structure E-sharra gates are placed, through which the sun passes in and out on his daily march across the expanse; and to the moon-god the control of the night is entrusted, by means of which the days are to be calculated. Further details as to the manner in which this calculation is to be made are given, so that incidentally the basis of the Babylonian calendar is furnished as another feature of the cosmology. Indeed, the entire theology enters into the narrative of the creation—(a) the systematized pantheon; (b) the astrological system upon which was built up the science of determining the intentions of the gods by observing their movements as represented in the planets and stars with which they were identified; (c) the lunar calendar.

Unfortunately, that part of the work of creation which would be of special interest to us—the formation of the earth, with its vegetation—is lacking, though it was, in all probability, contained in the fifth tablet, which, like the second, is very defective. Whether this part of creation was also attributed to Bel-Marduk alone, or to the gods in common, must for the present remain an open question. We have a fragmentary tablet* in which, incidental to a story assigning a prominent rôle to a god Nin-igi-azag, a reference is introduced to the creation of 'living creatures,' 'cattle of the field,' 'beasts of the field, creatures of the city,' which are described as having been produced by the gods in their assembly; but this may represent another version, whereas in the Creation narrative under discussion Marduk probably appeared as the creator of the earth,† just as in the sixth tablet the creation of man is assigned to him. The reason given for the creation of man is that the gods desired worshippers; and this view is ascribed in the narrative to none other than Marduk himself, who, in an address to Ea, says—

'My blood will I take, and bone † . . .
 I will set up man, that man . . .
 I will create man to inhabit [the earth],
 To establish the service of the gods, and that shrines [may be built].'

From the 'blood' of Marduk himself man is thus formed—a remarkable doctrine, which illustrates the high position accorded to man in the theological system of Babylonia. The introduction of Ea as a kind of associate to Marduk is, again, a trace of the composite character of the narrative, and points to a version in which the creation of man was assigned to Ea, who, in the Babylonian pantheon, is the god of mankind *par excellence*. From certain allusions in Marduk's address to Ea, and from Ea's reply, it would appear that the creation of man was opposed by the gods, who perhaps feared his power; and it is likely, though by no means certain, that, after creating man, Marduk gave him instructions,‡ detailing religious and moral obligations.

The seventh tablet is taken up entirely with the glorification of Marduk by the gods and by mankind. First, the gods are represented as hailing him in their assembly as the avenger of their wrongs, and they bestow upon him fifty glorious names, enumerated in detail, emphasizing his power, his functions as the giver of life, the creator of vegetation, as the source of plenty; his righteousness, his mercy, his wisdom, his

* *Cuneiform Texts*, xiii. pl. 34; see King, *Creation Tablets*, i. pp. 122-125.

† See the reference, Tablet vii. 115, 'be (i.e. Marduk) created heaven and fashioned the earth.'

‡ King, *l.c.* i. p. 87, suggests the restoration, 'I will fashion.'

§ King has shown (*l.c.* i. p. 202 ff.) that the fragment which was supposed to contain the address does not belong to the series; but the possibility that Marduk gave some instructions to man must nevertheless be admitted.

* See Mahler, 'Die Wege des Anu, Bel, und Ea' (*Orientalistische Literaturzeitung*, vol. vi. No. 4 (pp. 155-160)).

power in removing evil, and more of the like. Mankind is called upon to join in paying homage to Marduk as the one who ordained the courses for the stars of heaven, shepherding the gods like a flock of sheep, as the conqueror of Tiamat, and as the creator of heaven and earth. Father Bel is represented as transferring to Marduk his own title, 'lord of the worlds,' and Ea declares that Marduk's name shall henceforth be Ea, as his own name. The epilogue to the narrative is an impressive appeal to the wise and the intelligent to ponder on Marduk's deeds, the memory of which the father should hand down to his son. All should rejoice in Marduk, from whom fertility and prosperity emanate, whose word is unchangeable, whose anger is irresistible, but who is merciful and compassionate to the repentant sinner.

There is little that need be added by way of comment to this analysis of this main narrative of Creation which has come down to us, and which may be taken as representing the matured cosmological theories of the Babylonians—the combination of primitive popular traditions with the scholastic astrological system, and the whole interpreted in accord with the theological doctrines developed in the schools of Babylonia. This main narrative, moreover, preserves traces of varying versions of Creation which were once current, but which differed chiefly in ascribing the work of creation to different deities, representing the gods worshipped in the various centres of religion in the Euphrates Valley. The principle underlying these versions, of which, outside of the traces in the main narrative, a number of fragments have been found,* is everywhere, so far as can be ascertained, the same—the overthrow of powers representing chaos and disorder by those standing for law and order. In place of a genuine theory of beginnings, the Babylonian and Assyrian cosmology thus furnishes a theory of emanation and of the evolution from chaos to order. Chaos is a primeval element, from which the gods emanate; the gods in turn produce gods, and, after the conquest of chaos, the laws of the Universe which the gods are forced to obey are imposed by the conquering god. The formation of 'deep' and the 'heavens' are the two chief factors in this work, to which, as a third factor, is added the earth proper, on which man is placed in order that he may pay the proper homage to the gods, and, above all, to Marduk.

8. Life after death.—Besides the Incantation texts, the Oracles, Omens, and Portents, the Hymns and Prayers, and the various versions of the Creation and unfolding of the Universe, we have quite a number of myths and legends in the literature of the Babylonians that bear more or less directly on the religion.

Among these, mention may be made (a) of a story of the ravages committed by a deity, Ira,† who is identified in the later literature with Nergal, the raging power of the summer solstice; (b) a series of myths, in which the solar deity, Ninib, plays the chief rôle;‡ (c) stories of the storm-bird, Zu,§ de-

tailoring an attempt of this bird, which symbolizes the clouds, to take away from En-lil or Bel, the conqueror of Tiamat, the 'tablets of fate,' which Bel himself had snatched away from Kingu, the chief of Tiamat's army. Zu succeeds, and flies away with the 'tablets of fate' to the mountains. As in the Creation story Anshar calls upon Anu, Ea, and Bel in turn to pacify Tiamat, so Anu, the god of heaven, calls upon Adad the storm-god, Ishtar, Bara, and Nin-igi-azag (Ea?), to pursue Zu; but they are kept back through fear, and it is left for Marduk* to recapture the tablets, though it is likely that, in the present form of the narrative, Marduk takes the place of some other deity—possibly Shamash—to whom, as the conqueror of the storms, the feat appears to have been originally ascribed. (d) We have a story of a king of Cuthah,† narrating how the gods had delivered him and his land from monsters which remind us of those in the army of Tiamat.

Interesting as it would be to give an analysis of these and other tales,‡ we must pass them by, and take up three myths,§ which all touch upon one of the most important phases in every religion—the views held of life after death. These three myths are, (i.) the story of Adapa, (ii.) the story of Nergal and Ersh-kigal, and (iii.) the story of the Descent of Ishtar to the world of the dead.

(i.) The purpose of the story of Adapa appears to be to offer an explanation of how man, although the offspring of the gods,—Bel-Marduk, it will be recalled, forms him of his own blood,—does not share the distinguishing trait of the gods—immortality. The story belongs to the 'Ea' cycle of myths, and points to Eridu as its source. Ea appears here as the god of humanity, the protector, and, one is inclined to add, the creator of man. The principal personage, a semi-Divine being, Adapa, is a son of Ea, distinguished, like the latter, by wisdom, and serving as a kind of priest at the Eridu sanctuary, which he provides with 'bread and water.' One day, while fishing in the waters of Eridu, i.e. the Persian Gulf, his ship is seized by the south wind and sunk in the waters. In his rage Adapa breaks the wings of the south wind, so that for seven days it is unable to blow across the land. News of this occurrence reaches the gods, whose dwelling is placed in heaven, and Anu, the chief god, orders Adapa to be brought before him. Ea intervenes, and gives his favourite, Adapa, instructions how to conduct himself before Anu. In order to arouse the sympathy of the two watchmen at the gate of heaven, Tammuz and Gish-zida, he is to put on a mourning garb, and, in reply to the question as to the meaning of this garb, he is to state that the mourning is for two gods of the earth who have disappeared. Tammuz and Gish-zida, who will know that they are meant, will then intercede in Adapa's behalf before Anu. But Ea, furthermore, warns Adapa not to touch

* In addition to the evidence for this view presented in the present writer's *Religion of Babylonia and Assyria*, p. 537 ff., see the passage in Craig's *Assyrian and Babylonian Religious Texts*, i. 29, obv. 15, where Marduk is referred to as the smiter of Zu.

† The latest translation by King, *Seven Tablets of Creation*, i. 140-155.

‡ A full analysis and discussion of these and other myths and legends will be found in the 24th chapter of the present writer's *Religion of Babylonia and Assyria* (Gießen, 1904). The story of Etana (Jensen, *Lc.* 100-115), of Ea and Atarkhasis (Jensen, *Lc.* 274-291), and portions of the Gilgamesh epic (Jensen, *Lc.* 116-273; Jeremias, *Isdubar-Nimrod*, Leipzig, 1891; and Zimmern, *Lc.* 566-582), also have a bearing on the religious beliefs and conceptions, though of a more indirect character than the other three referred to in the text.

§ For the transliteration and German translation with commentary, see Jensen, *Keilschriftl. Bibliothek*, vi. 1, pp. 92-101, 74-79, and 80-91 respectively; also Zimmern, *Keilschriften und das Alte Testament*, pp. 520-527, 553-554, and 561-564; and for the text, E. J. Harper, 'Babylonische Legenden von Etana, Zu, Adapa, and Dihbarra' in *Beiträge zur Assyriologie*, ii. 390-521, and the references further on.

* Thus we have (a) a version of the Tiamat myth, in which Marduk's name does not appear, but only that of Bel (King, *Lc.* i. p. 116 ff.); (b) a version in which the goddess Aruru is associated with Marduk in the creation of man and of animals and of vegetation, and in which the order of creation appears to be quite different from that found in the main narrative (King, *Lc.* 130 ff.). Moreover, from references to the conflict with Tiamat, and to other incidents of the cosmology introduced in incantations, astrological texts, hymns, legends, and myths, we see the numerous variations in details which marked the versions that were current.

† For the reading, see Zimmern, *Keilschriften und das Alte Testament*, p. 587; for a recent translation, see Jensen, *Keilschriftliche Bibliothek*, vi. 1, pp. 57-73.

§ Jensen, *Lc.* 47-57.

the food that Anu will place before him, nor to drink the water that will be offered—

'When thou steppest before Anu, they will offer thee food of death; do not eat! They will offer thee waters of death; do not drink! They will offer thee a garment; put it on! They will offer thee oil; anoint thyself! Carry out strictly the orders that I have given thee, cling to what I have commanded thee!'

It is evident from this speech, that Ea, who had given his favourite wisdom, but had not bestowed on him eternal life, presumably because it was not in his power, anticipates that Anu will punish Adapa with death; but the unexpected happened. At first Anu shows himself merciless, but the intercession of Tammuz and Gish-zida prompts him to reconsider his decision, and, instead of offering Adapa the food and water of death, he places before him the food and water of life—

'Fetch for him food of life, that he may eat thereof. They brought him food of life, but he did not eat. They brought him water of life, but he did not drink. They brought him a garment; he put it on. They brought him oil; he anointed himself therewith.'

Adapa, it will be observed, strictly carries out Ea's orders, and thus forfeits the boon of immortality, which was placed within his reach. The story presents parallels and contrasts with the Biblical story of the Fall. Adam's loss of immortality is due to *disobedience*; but in his case an *intentional* deception is practised on him by an evil spirit in the guise of a serpent, as against the unintentional deception of Adapa by Ea. It is evident that the story of Adapa is based on the common nature myth of the change of seasons, portrayed as a conflict between the storms of the rainy season and the vegetation symbolized by Adapa, who stands in some direct connexion with the solar deity, Marduk, the son of Ea. The story reflects the religious doctrine, developed in Babylonia, that man, though of Divine origin, does not share in the Divine trait of immortality, but the reference to the food and water of life may be taken as an indication that a contrary doctrine must also have had its advocates; and this view is confirmed by allusions to a 'life' plant and to 'life' waters in historical inscriptions and in literary productions. Marduk is addressed as the one who bestows this 'life' plant;* and if a king like Esarhaddon expresses the hope that his rule may be as beneficial as the 'life' plant,† it is evident that the conception of the existence of such a plant must have been a current one. So, again, whatever the purpose that Gilgamesh, the hero of the great Babylonian epic, has in mind in seeking for a plant bearing the remarkable name 'restorer of youth to old age,'‡ the incident would be unintelligible if it did not rest on the view that 'life' was a gift that could be given to man by the will of the gods, and that the life meant was not merely a limited existence but life without end. The same conclusion may be drawn from the occurrence of the phrase 'water of life' in the religious literature. In the story of Ishtar's descent to the lower world she is sprinkled with the 'waters of life' before she ascends to earth again,§ and on the idea that water is a symbol of life is based an entire series of rites practised in the Babylonian temples.||

The doctrine, thus combined in the story of Adapa with an old nature myth, furnishes the proof of the deep interest which the problem of

death awakened in the Babylonian schools. Along with the development of a systematized pantheon we find the attempt made to give some definite shape to the views regarding man's fate after death has touched his body. The mystery of death was deepened in the mind of primitive man by the difficulty of conceiving that life could come to an end; and the daily phenomenon of the awakening from sleep—which must have appeared to him as temporary death—strengthened in him the conviction that life does *not* come to an end, or perhaps it would be more correct to say, made it more difficult for him to persuade himself that death was equivalent to an annihilation of life. The problem that thus presented itself was how to reconcile the evident extinction of earthly activity in the case of death with the conviction or the instinct that life as such cannot come to an end. There thus arose, as a result of primitive and popular speculation on the mysterious theme, the idea that, corresponding to the surface of the earth as the scene of man's activity while life was in his body, there was an abode in which those whose earthly careers were over continued to enjoy the privilege of the spark of life. The prevailing custom of earth-burial, at least within the period for which historical documents are at our disposal, suggested, as a further natural conclusion, that the abode in question was situated below the surface of the earth. At this point, however, popular speculation appears to have stopped, and the theologians of the Euphrates Valley stepped in to develop the conception further, and to bring it into accord with the theological system devised by them. The sharp division between life and death led them to select out of the company of gods and goddesses a number that seemed fitted to be placed in control of the dead. A nether world pantheon thus, gradually, arose by the side of the group of great gods whose concern was with the living.

(ii.) A nature myth found among the Tel el-Amarna tablets,* based upon the phenomenon of the change of seasons, has been made the medium for giving expression to some of the doctrines of the priests regarding this pantheon for the dead. It appears from the story, that originally a goddess known as Eresh-kigal, signifying the 'lady of the nether world,' was placed at the head of this pantheon. Pictured as the sister of the gods, she is supposed to have her abode in the interior of the earth, and is the counterpart of the great goddess Ishtar, who, it will be recalled, is the great mother-goddess, the symbol of vegetation and fertility on the earth. The gods are represented as gathered together at a banquet, and they send a message to their sister Eresh-kigal, asking her, inasmuch as she cannot come up to the gods, whose seat, according to the astrology of the priests, is in heaven, at least to send a messenger to fetch some of the food for her. Eresh-kigal sends Namtar, the god of pestilence, who is welcomed by all the gods except Nergal. This god fails to pay proper respect to Eresh-kigal's messenger, and accordingly, on the demand of the 'lady of the lower world,' Nergal is handed over to her to receive the punishment of death. At this juncture Ea steps in, and reassures Nergal by giving him a bodyguard of fourteen demons, who will aid him in his encounter with Eresh-kigal. To judge from the names of these demons—Burning, Fever, Abyss, etc.—they seem to symbolize misfortunes, ills, and accidents, that bring death in their wake. Accompanied by these

demons, Nergal comes to the gates of the nether world. His presence is announced to his 'sister' Eresh-kigal. Placing his fourteen attendants at the various gates, he advances to Eresh-kigal, who is seated on her throne, seizes her, and pulls her to the ground. She appeals for mercy—

'Do not kill me, my brother. Let me speak to thee.'

Nergal, on hearing her, releases her. She weeps and cries—

'Thou shalt be my husband, and I will be thy wife;
Kingship over the wide earth I will bestow on thee;
The tablet of wisdom I will place in thy hand.
Thou shalt be lord; I will be lady.'

When Nergal heard these words, he took hold of her, kissed her, and wiped away her tears. The tablet, badly preserved at various points, breaks off with the beginning of Nergal's conciliatory reply. Whatever else the story may be intended to illustrate, it aims to account for the fact that at the head of the pantheon of the lower world stand two deities, Nergal and Eresh-kigal. The character of Nergal as the fierce and destructive power of the summer and the midday sun* made him the appropriate personage for this position, and, in accordance with the general principle pervading the theological system of Babylonia, it was proper that a male deity and not a goddess should be the supreme ruler. On the other hand, the story points to the existence of an earlier view—perhaps of popular origin—according to which a goddess occupies this position. The suggestion has already been thrown out, that Eresh-kigal, 'the lady of the nether world,' is the counterpart of Ishtar, 'the lady of the earth' as she is frequently termed. An element in the myth embodied in the story is therefore the view found among many nations, that the earth-goddess, during the period when vegetation ceases, has descended into the bowels of the earth—either voluntarily or carried off by force. At the time, however, that the myth received a definite literary form, the differentiation between the two Ishtars or the two aspects of the great goddess had taken place, and Eresh-kigal has become an independent figure, whose place is permanently fixed in the region below the surface of the earth.

(iii.) A more definite view of this region is furnished in another tale—likewise based on a myth symbolical of the change from the summer to the winter season, which incidentally strengthens the view here proposed that there were originally two forms of Ishtar, corresponding to the different aspects presented by the earth during the period of vegetation and during the equally long period of the year when nature seems to have perished. At the same time, the story, like that of Nergal and Eresh-kigal, already assumes the existence of an independent goddess ruling in the nether world, while antedating the association of a male deity at her side. Although the closing lines of the story, which probably indicated some occasion for which the composition was written, are very obscure, one of the purposes of the tale appears to have been to suggest the possibility of an escape from the region of the dead under certain conditions not easy of fulfilment. The more direct value of the story for us, however, lies in the picture it draws of the conditions prevailing in the place where the dead were supposed to be gathered together—a picture embodying in part popular conceptions, and in part the further elaboration of these conceptions by the theologians of Babylonia. The story opens as follows:—

'To the land without return, the earth . . .
Ishtar, the daughter of Sin directed her mind.*
The daughter of Sin directed her mind,*
To the dark house, the dwelling of Irkalla,
To the house whence those who enter do not return,
To the road from which there is no path leading back,
To the house in which those who enter are deprived of light,
Where dust is their nourishment, clay their food.
They do not see light, they dwell in darkness,
Clothed like a bird, with wings as a covering;
On door and lock dust has settled.'

Ishtar arrives at the gate of the land without return, and demands admission of the watchman, threatening to break the threshold and the doors and lock, and to bring up the dead and restore them to life unless her request is granted. Ishtar's hostile spirit indicates that she has in mind an attack upon Eresh-kigal, very much of the same order which prompts Nergal to seek admission to the lady of the lower world. Both stories accordingly illustrate the hostility existing between the upper and the lower pantheon; but it may be questioned whether in an earlier form of the story this hostility was introduced. From subsequent references it would rather appear that Ishtar is forced to descend into the nether world, to dwell there for a certain time; but with the introduction of Eresh-kigal as an independent figure permanently in control of the lower world the old myth underwent a transformation, and Ishtar is now represented as planning an invasion of the region presided over by Eresh-kigal. The latter regards the visit in this light, for, when the presence of Ishtar at the gate is announced, she is both enraged and grieved. The departure of Ishtar from the upper world inaugurates a season of lamentation for the dead, and Eresh-kigal resents the presence in her realm of Ishtar, who will arouse the dead to a realization of their sad fate—

'What has prompted her, what has induced her spirit?
Should I indeed sit with her,
Eat clay instead of food, drink water instead of wine?
Should I weep over the husbands who left their wives?
Over the women who were snatched away from the embrace of their consorts?
Over the young taken before their time should I weep?'

A motive had to be found for the hostile attitude of the two sisters towards each other. In the case of Ishtar, it is anger with Eresh-kigal, who now controls those who once belonged to her as the mother of mankind. Ishtar loves mankind, and in another tale—that of the Deluge—she is portrayed as actually weeping over the destruction of her offspring. Popular fancy, reinforced by theological speculation, accordingly pictured Ishtar as proceeding to the lower world once a year, in order to sit with the dead, share their food, and weep over their inexorable fate. Hence her violent hatred of Eresh-kigal. The watchman is ordered to admit the goddess, and to treat her according to the existing laws. That the story has been transformed by the introduction of new motives rendered necessary by the differentiation of Ishtar from Eresh-kigal, is shown by the welcome which the watchman gives Ishtar, and which is in glaring contradiction to the threats which Ishtar has uttered—

'Enter, my lady, Cuthah† greets thee.
The palace of the land without return rejoices at thy presence.'

As she passes through the seven gates of the nether world the various articles of her apparel are taken away. At the first gate her crown is corresponding to Rawlinson, iv.2 pl. 31; recent translations by Jensen, *Keilschriftl. Bibl.* vi. 1, pp. 80-91; and Jeremias in Roscher's *Lexikon der griech.-und römischen Mythologie*, article 'Nergal.' See also Zimmern, *Keilschriften u. d. Alte Testament*, pp. 561-563.

* Literally, 'placed her ear.'

† The name of an important centre in southern Babylonia which was the seat of Nergal worship, and hence becomes a poetical designation for the nether world.

* See above, p. 543a.

† The latest edition of the text is to be found in *Cuneiform Texts from Tablets in the British Museum*, etc., xv. pl. 45-47.

removed, at the second her earrings, at the third her necklace, at the fourth her breastplate, at the fifth her studded girdle, at the sixth the ornaments on her hands and feet, and at the seventh, finally, her loincloth, so that, when she enters the presence of Eresh-kigal, she is quite naked.

The symbolical significance of this gradual stripping of the goddess is quite evident; it marks the gradual decay of vegetation at the approach of the rainy and winter season, and incidentally may have furnished the priests with a doctrinal explanation why the images of Ishtar, which the people placed in the temples as votive offerings, frequently portrayed her as naked.*

The naked Ishtar, thus forced to obey laws not of her making, is clearly a different figure from the one portrayed at the opening of the story, intent upon forcing an entrance to Eresh-kigal with some evil intent. To adapt the old myth to the later conception, Ishtar is described as rushing towards Eresh-kigal, but, without a struggle, is overpowered by Namtar, who, at the command of the lady of the nether world, smites Ishtar with sixty diseases affecting all her organs and limbs. The symbolism of the original myth is once more apparent in the description of what followed upon the imprisonment—for such it is—of Ishtar in 'the palace of the land without return.'

* When the lady Ishtar had descended to the land without return,
The bull no longer mounted the cow, the ass did not mount the she-ass,
The man did not go to the maid to lie with her.'

These lines evidently describe in naïve language the cessation of fertility on earth with the departure of the great mother-goddess. The gods, also, bewail the departure of Ishtar from their midst, and plan for her release from the nether world. Sin and Ea are appealed to, and Ea creates a mysterious being, Asushu-namir, whose name, signifying 'his going forth is brilliant,' points to a solar deity—perhaps the god of the spring sun—who brings back vegetation and fertility to nature. Asushu-namir forces his entrance into the nether world despite the opposition of Eresh-kigal, who is enraged also at this new intruder. He besprinkles Ishtar with the water of life and takes her with him. At each gate the articles taken away from her at her entrance are restored to her, until she emerges in all her glory. The story closes with references, which are not altogether clear, to a festival in honour of Tammuz, a solar deity, symbolizing the spring, who is designated as the youthful lover of Ishtar.

We see, then, that we are to distinguish in the story the following elements—(1) the old nature myth symbolical of the change of seasons, representing Ishtar as forced at a certain season of the year to leave the earth, followed by her release in the spring; (2) the combination of this myth with the later view, representing Eresh-kigal as an independent goddess, permanently established as ruler in the nether world; leading to (3) the hostility between the two goddesses. It will be observed that references to two festivals celebrated in Babylonia have been introduced into the story—a lamentation at the time of Ishtar's descent, and a rejoicing on her return. Further, the story has been made the medium for illustrating the current views regarding the abode of the dead, and the hope at least is suggested that, through the gods, a release from the control of Eresh-kigal is possible. Beyond this, however, the theologians did not venture to go, and such epithets as 'restorer of the dead,' occasionally given to certain gods, have reference to the power

of the gods to save the desperately ill—those apparently already in the power of the gods of the nether world—from the dark abode; but they do not imply a real resurrection of the dead.

On the whole, the description given of 'the land without return,' at the opening of the story we have just considered, represents the prevailing doctrines in both Babylonia and Assyria. The name given to the abode of the dead is commonly *Aralû*, and the references to it in the religious literature show that it was pictured as a large dark cavern in the interior of the earth, with the entrance from the west, within which was situated the palace of Eresh-kigal. The approach to the great cavern is by means of a stream which must be crossed by the dead. Once in the great cavern, the dead are under the control of Nergal and Eresh-kigal, and around this pair we find a group of deities and demons who act as messengers and attendants, and constitute the pantheon of the nether world, which is almost as extensive in its scope as that which controls the world of the living. How far, according to the popular view, the dead were endowed with consciousness of their sad state, it is difficult to say. If the references to dust and earth as the food of the dead are more than poetical metaphors, they must have been conceived as being at least conscious of their misery; while references both in the historical and religious literature to libations and food-offerings for the dead and to the curse resulting from leaving the dead unburied, or from exposing them, after burial, to the sunlight, show that the dead were supposed to require the care and forethought of the survivors.* In this respect, a passage at the close of the Gilgamesh epic—perhaps the most notable literary achievement of Babylonia—is of significance. Eabani, housed in Aralû, appears to Gilgamesh at his solicitation, and reveals to him some of the secrets of the life in the dark abode†—

"He rests on a couch,
Drinking pure water,
Who died in battle, as you and I have seen.‡
His father and mother support his head,
His wife with him. . . .
But he whose body is thrown in the field,
As you and I have seen,
The leavings of the pot, remains of food,
What is thrown into the street, he eats.'

According to this passage, a distinction was made between the fate of those who died an honourable death, and by implication were properly taken care of, and those who were not accorded a fitting burial. Still, even the fate of those who were suitably provided for, to whom food and libation-offerings were regularly made, was sad enough; and Gilgamesh, in a lament over his dead friend Eabani, portrays with striking vividness the gloomy existence of those who are gathered together in Aralû.§ They lie there, inactive, deprived of the pleasures that this world offers, shorn of their strength and powers—prisoners without hope of release. Sadness is thus the prevailing note when the thoughts of the living turn to the fate in store for mankind after life has fled from the body. Only occasionally do we find the expression of a faint belief that all is not dark and gloomy for the dead, that at least some favoured individuals enjoy a better fortune. At one time the view appeared to have been held that the kings after their death were accorded a place among the gods.|| Statues of the

rulers were placed in the temples and accorded Divine honours, and even temples were erected bearing their names. But though this view may have had a strong hold upon the masses at one time, in connexion with the belief that the rulers, as standing close to the gods, were in some way descended from them, it soon lost its hold, and we learn little about it after the days of Hammurabi.

In the Gilgamesh epic, likewise, which want of space forbids us to treat at length,* there is a most important hint of an escape from the ordinary fate of mortals through the intercession of the gods. Gilgamesh, in the course of his wanderings, comes to Ut-napishtim† to seek release from the disease with which he has been smitten. Although a mortal, Ut-napishtim is placed with the gods, after Bel, the instigator of a flood which has destroyed mankind, has become reconciled, through the intervention of Ea—the god of humanity—to the preservation of Ut-napishtim and his family from the general destruction. There are also some further references,‡ though all more or less obscure, which admit of an interpretation pointing to the possibility of a renewal of real life after death. But these, while foreshadowing the rise of a doctrine of resurrection as taken up by later Judaism and by Christianity, do not counter-balance the gloomy view of Aralu, which seems to have remained for all times the prevailing one. Had this not been the case, we should not have found, as late as the days of Nebuchadnezzar II., pictorial representations of the life after death, which could have aroused only feelings of terror and fear on the part of those who beheld them.§

vii. TEMPLES AND CULT.—The existence of numerous temples, particularly in Babylonia, but also, though to a lesser degree, in Assyria, may be taken as an index of the firm hold which the religion we have been describing had upon the people. The political centres during the various periods of Babylono-Assyrian history are also the religious centres, and the rulers of Babylonia and Assyria vie with one another in manifesting their devotion to the gods, by rebuilding, restoring, enlarging, and beautifying the sacred edifices. These temples, unaffected by the political vicissitudes of the cities in which they stood, gained in sanctity as the years and centuries rolled on. Whether we turn to some of the oldest rulers known to us, like Naram-Sin and Gudea, or to the members of the New Babylonian dynasty, one of their chief concerns was the care of the temples. Gudea tells us in great detail of a dream which was sent to him, and which is interpreted as the order of Ninib to build his temple E-ninnu at Shirpurla.|| At the close of Babylonian history we find Nebuchadnezzar II. invariably adding to his titles 'the beautifier of E-sagila and E-zida,' the sacred edifices of Babylon and Borsippa respectively. Considerably over one hundred temples and sanctuaries are mentioned in the native and historical inscriptions known to us; and if we add to these the several hundred inci-

dentally mentioned in the religious literature, in the commercial tablets, and those occurring as elements in proper names, and in lists or syllabaries, it becomes evident that the Euphrates Valley was fairly studded with edifices of one kind or another dedicated to the gods and goddesses of the pantheon.

The names of these temples are both interesting and instructive, as reflecting the ideals and hopes by which their builders were swayed. Marduk's main edifice at Babylon is called *E-sagila*, 'the lofty house'; the temple of Nebo at Borsippa is *E-zida*, 'the true or legitimate house'; the temple of the sun-god at Sippar and Larsa is appropriately called *E-barra*, 'the brilliant house'; and in the same spirit the temple of the moon-god at Ur was designated as *E-gish-shir-gal*, 'house of the great luminary'; while his sanctuary at Harran was called *E-khul-khul*, 'the house of joys.' Bel's sanctuary at Nippur was known as *E-kur*, 'the mountain house'; Ishtar's temple at Erech as *E-anna*, 'house of heaven' or 'lofty house,' her sanctuary in Nineveh as *E-mash-mash*, signifying probably 'house of oracles'; a sanctuary of Nin-kharsag is known as *E-gal-makh*, 'the great palace.' Other names are *E-kharsag-kurkura*, 'the house of the mountain of all lands'; *E-kharsag-ella*, 'house of the shining mountain'; *E-dim-anna*, 'the house of heavenly construction'; *E-nun-makh*, 'house of the great lord'; *E-nin-makh*, 'house of the great lady'; *E-tila*, 'house of life,' and so on, *ad infinitum*. In the case of these names, it is to be observed that some of them designate a temple by an attribute or descriptive epithet of the god to whom it is dedicated, like *E-barra*, 'house of splendour,' for Shamash, or *E-nin-makh*, 'house of the great lady,' for Ishtar; others are expressive of a hope or ideal, as 'house of life,' or 'legitimate house.' Many of the names embody the idea of great height, as of a mountain. To this category belong not only those which contain the word 'mountain' as one of their parts, but such as convey the idea of reaching up to heaven. Such names are more than mere metaphors. They furnish, indeed, the keynote to the explanation of what is the most characteristic feature of sacred edifices in Babylonia. Besides the temple proper, in which the worshippers assembled, and in which there was an inner chamber for the reception of the sacred image of the god, every temple in an important centre had attached to it a tower, consisting of three to seven storeys, provided either with a sloping ascent leading around each storey till the top was reached, or having a staircase from one storey to another. The winding ascent described by Herodotus (i. 181) appears to have been the more characteristic form, and suggests a mountain road; while the main purpose served by these towers, namely, to erect something that would be impressive by its height, points likewise in the direction of their being, in fact, imitations of mountain peaks. To such towers the name *zik-kurat*, signifying a 'high' place or edifice, was given. If it were certain that the *zik-kurat* represented the oldest type of the Babylonian sanctuary, important conclusions might be drawn as to the origin of the race that laid the foundations of Babylonian culture. The proof, however, for such a view is not forthcoming, and all therefore that can be said is that the idea of erecting a sacred edifice in imitation of a mountain must have been introduced by some group which, before settling in the flat Euphrates Valley (which is absolutely devoid of hills, and where not even stone is found to serve as building material), must have lived in a mountainous country. One naturally thinks of Arabia, whence we know

* A full discussion of the various divisions of the epic, with an interpretation of its religious features, will be found in the 23rd chapter of the present writer's *Religion Babyloniens und Assyriens* (1905).

there was a steady stream of migration into the Euphrates Valley; and if it be borne in mind that among the ancient Arabs mountain tops were regarded as sacred, and that down to a very late date the favourite sanctuaries of the Semite population of Palestine and Syria were on eminences, we may perhaps go a step further, and regard the *zikkurat* as a distinctively Semitic product—an attempt on the part of the Semitic settlers in the Euphrates Valley to reproduce, by heaping up masses of clay (the only building material available), the mountain peaks, on the top of which they supposed their gods to dwell, and which their priests, acting as mediators, ascended when they wished to obtain an oracle or to secure aid from their gods.

The *zikkurats*, like the temples proper, have their names. These names, while frequently embodying the view that the *zikkurats* were intended to be built in imitation of mountains, are also of interest because of their testimony to the cosmological doctrines taught in the schools of Babylonian theology. Thus the *zikkurat* at Nippur bore the name *E-dur-an-ki*, 'the link of heaven and earth,' a name originally suggested by the ambition of the builders to raise the tower to a great height, but with which speculations were connected associating the *zikkurat* with the great mountain of the world where the gods dwell, which reaches from the confines of Apsu—'the deep,' as the seat of Ea—to the domain of Anu, 'the god of heaven.' The seven storeys, of which some of the most notable *zikkurats*—as, e.g., those in Babylon, Borsippa, and Erech—consisted, were associated with the seven zones into which the earth was divided by the Babylonians, or with the seven planets. Accordingly, the *zikkurat* of Borsippa was called *E-ur-imin-an-ki*, 'house of the seven planets (literally 'governors') of heaven and earth,' while that at Erech was *E-gipar-ur*, 'house of seven zones.' Similarly, *E-temen-an-ki*, 'the foundation stone of heaven and earth,' the name of Marduk's *zikkurat* at Babylon, conveys a cosmological conception of a more specific character, while *E-pa*, 'the summit house,' the name of the *zikkurat* at Shirpurla, embodies merely the idea of great height, and *E-gubba-an-ki*, 'the point of heaven and earth,' the name of a *zikkurat* in Dilbat, combines again the original idea of great height with speculations regarding 'the mountain of the world.'

If, now, we find temples, pure and simple, bearing names connected with the idea of mountain heights, it is evident that such nomenclature is dependent upon the names given to the *zikkurats*, and that, even though temples may be as old in the Euphrates Valley as *zikkurats*, it is the *zikkurat* which acquires predominant significance as the characteristic sanctuary. Whether every sanctuary contained at the top a shrine where the image of the god was placed—as described by Herodotus—is a question that cannot be answered definitely. If there was an ascent leading to the top, it is natural to conclude that the ascent was made, and that some symbol of sanctity was to be found there. But the evidence is overwhelming, that in later times it was to the temples—the large structures with courts and halls for worshippers—that the people repaired, while the *zikkurat* survived as a religious symbol,—rather than as the active expression of the desire for communion with the gods. The interesting suggestion has recently been thrown out,* that around the base of the *zikkurats* the Babylonians were accustomed to bury their dead. But it could only have been the privileged few, as in the case of the 'pyramid' burials of Egypt, to whom such a sacred site was assigned as their last resting-place; and the custom

could only have arisen at a time when the original purpose of the *zikkurats* was obscured by the greater and more active prominence assumed by the temples.

As yet the excavations conducted in Babylonia and Assyria have not succeeded in furnishing us with definite material for determining more than the general character of the Babylonian temples. In the case of large centres such as Nippur, Sippar, Babylon, and Nineveh, there developed an entire sacred area, or quarter, which took its name from the chief edifice. So at Nippur, *E-kur* is not merely the name for the temple of Bel or En-lil, but for a large quarter of the city, in which stood sanctuaries and chapels erected to various gods and goddesses. At Nippur and at Babylon all the great gods and goddesses were thus represented, forming, as it were, the court gathered around the chief deity. The sacred area of *E-kur* at Nippur is estimated to have covered eight acres, and that of *E-sagila* at Babylon, at which excavations are now being conducted, was probably much greater. Near the *zikkurat* stood the sanctuary of the chief god, surrounded by a large court, and, if one may draw a general conclusion from two small Assyrian temples excavated by Layard at Nimrod,[†] the main features of the temple proper were a long hall leading into a small room, and the 'holy of holies,' known as the *papakhu* or *parakku*, in which stood the image of the god or goddess, as the case might be. Into this sacred chamber none but the priests, or a worshipper accompanied by a priest, were permitted to enter.[‡] In front of the image stood the altar to the god; but it is likely that in the larger room, as well as in the open court around the sanctuary, altars were also placed for the regular and ordinary sacrifices, the penetration into the 'holy of holies' being restricted to special occasions, and probably also to privileged individuals, besides the priests, and absolutely forbidden to the general masses. At Nippur two large divisions appear to have existed within the sacred area—one devoted perhaps to the chapels and sanctuaries of the deities (according to a tablet, no fewer than 24 $\frac{1}{2}$) that were worshipped in Nippur; the other reserved for the *zikkurat*, the temple of Bel proper, and possibly for the dwellings of the priests, the temple treasury, and the like.

Apart from this feature of the temples of Babylonia and Assyria in the large centres, which made them gathering-places for the worship of other deities besides the one to whom the entire area was sacred, the position of the priests as judges and scribes led to the extension of the temple area for other than strictly religious purposes. Not only were the courts of justice established within the sacred place, but commercial agreements were drawn up there in the presence of priests acting as scribes; and all transactions involving money matters, such as marriage-settlements, registering of wills, agreements between landlord and tenant, sale of slaves, houses, fields and crops, building contracts, hiring of ships, workmen, and the like, came before the priests, in whose presence, likewise, all legal disputes and lawsuits were adjudicated. Within the temple area the legal archives of the country were kept, and the public treasury was under the control of the representatives of religion. More than this, the temple organizations acquired large holdings of lands and property, and themselves engaged in commercial transactions on a large scale. The legal archives, found in such

* Hilprecht, *Explorations in Bible Lands*, p. 465 f.

centres as Sippar, Shurpura, and Nippur, reveal indeed an astonishing activity of the temples in this direction. Large bodies of labourers were indentured to the temples, and slaves were owned or controlled by the priests acting as the accredited agents of some temple organization. These labourers and slaves were in turn hired out by the temples; banks were established in connexion with the temples, and hundreds of tablets have been found recording sums lent on interest, accounts of the temple in disposing of crops, in renting fields, selling and buying cattle, and dealing with all the branches of barter and exchange in which lay merchants were engaged.* Such a state of affairs aided materially, not only in promoting the importance of the temples, but in maintaining the influence of the priests, to whose more specifically religious functions we now turn.

The political growth of both Babylonia and Assyria contributed directly towards making the religious position of the priests more secure. Military enterprises were never undertaken without consulting the wish of the gods by means of omens and oracles. In like manner, the masses, imitating the example of their royal masters, repaired to the temples before setting out on a journey, or before building a house, or in order to secure relief from suffering, to avert impending disaster, or to seek for the interpretation of all strange and unusual occurrences. From being originally the guardians of small shrines and sanctuaries, erected as the dwelling-places of the gods represented by images placed in the most sacred part of the edifice, the priests thus became, and continued to be, the guides, physicians, and counsellors of the king and of his subjects.

The general term for 'priest' was *shangû*, the meaning of which is not certain,† but with the growth of the temples into large establishments a differentiation of priestly functions took place, and we can distinguish three chief classes: *bârû*, 'soothsayer or omen priest'; *âshipu*, 'exorcizer'; and *zammuru*, 'singer.' Each of these classes was probably further subdivided so as to provide for continuous attendance at the shrines. The special duties pertaining to each class are clearly indicated by their names, the *bârû* being the priest versed in the interpretation of omens, the *âshipu* the one by whom the demons and witches were exorcized, and the *zammuru* the designation for the body of priests who conducted the service proper at festivals and in connexion with the sacrifices. But besides these three general classes there must have been others to whom the other functions carried on by the priests were assigned. Such designations for 'priest,' as *munambû* = 'wailer,' *lallaru* = 'howler,' indicate that 'dirge-singers' formed a special subdivision, who chanted the lamentations for the dead.

The instruction of aspirants to the temple service was another important function. This led to the institution of schools, and the numerous tablets for exercise and practice, found in Assurbanipal's library, and in other collections of which fragments are now known to us, introduce us to the methods perfected in these schools. Beginning with the simple acquirements of reading and writing, the exercises led step by step to acquaintance with astrological, medical, and judicial lore, as well as to initiation into the interpretation of omens, methods of divination and exorcizing, sacrificial

details, the ritual to be observed on various occasions, and knowledge of the doctrines taught by the theologians.*

While as yet we know little of the details of the organization of the priesthood at the great temples, beyond the fact of its general divisions, and the existence of a 'high-priest' who exercised a measure of authority over all, it is interesting to note that, as among the Hebrews, certain qualifications were required on the part of those who wished to devote themselves to the priesthood. They had to be sound in mind and body, and well proportioned. The leper was excluded, as well as any one who had a bodily defect: a mutilated limb, defective eyesight, or even the lack of a full set of teeth, appears to have been sufficient to exclude one from the priesthood.† The chief classes among the priests formed a kind of guild composed of certain families. To this guild none but members of these families were admitted; but such restrictions do not seem to have applied to the large body of attendants who performed the menial duties in the great temples, or who were engaged in connexion with their business affairs.

A feature of the Babylonian priesthood which calls for some mention is the presence of women in the priestly service. Gudea refers to 'wailing women' in one of his inscriptions. We have had occasion to refer to oracles furnished by women,‡ and in historical and votive inscriptions of various periods women attached to the service of some god or other are not infrequently mentioned. While such priestesses are by no means limited to temples dedicated to goddesses, Shamash priestesses being particularly prominent, it would appear that as devotees to the service of the great goddess Ishtar in her temples in the south, as at Erech, Agade, and Babylon, as well as in the north, at Nineveh and Arbela, they retained positions of influence throughout all periods, though the general observation may be made, that this position is more prominent in the earlier than in the later periods. The names for 'priestesses' were: *Kadishtu*, 'holy one'; *kharimtu*, which embodies a similar idea of being 'set aside'; *shamkhatu*, 'pleasure maiden'; and *kizritu*, the meaning of which is not known.§ Priestesses appear also to have been employed in connexion with certain mysterious rites practised in the temples, to symbolize the fertility for which the goddess Ishtar stood, though it should be added that no references have as yet been found in the religious literature to justify Herodotus' statement (i. 199) that obscene rites formed part of the regular Ishtar cult.

Abundant as is the material now at our disposal for a study of the religious rites and ceremonies observed in Babylonia and Assyria, it is not sufficient to enable us to reconstruct in detail the ritual observed in the temples in connexion with the offering of sacrifices, the seeking of oracles, the interpretation of omens, and the homage to the gods on festive occasions. All that we can do at present is, by piecing together the references to the cult scattered through the historical literature, and by combining these references with data furnished by the religious texts, to present a general picture of the different phases of the cult carried on at the temples of Babylonia and Assyria.

As in other religions of antiquity which had

* See an article by the present writer, 'The Textbook Literature of the Babylonians' (*Biblical World*, 1897, pp. 248-268, and chap. 3 of Scheil's *Une Saison de Fouilles à Sippar*.

† See Zimmern's Introduction to part ii. of his *Beiträge zur Kenntnis der Babylonischen Religion*, p. 87.

‡ See above, p. 557*.

§ *Kadishtu* is of frequent occurrence; *kizritu* occurs as early as the days of Hammurabi (King, *Letters and Inscriptions of Hammurabi*, vol. i. No. 34); while the three last named in the list are found in the Gilgamesh epic (Tablet vi. ll. 184, 185).

* See Peiser's account of the financial side of the temple establishments, in the Introduction to his *Babylonische Verträge des Berliner Museums* (Berlin 1890), pp. xvii-xxix.

† Zimmern's suggestion (*Keilschriften u. d. Alte Test.* p. 590, note 7) of 'the raging or howling one' is not plausible. More probable is Jensen's view (*Zeitschr. f. Assyriol.* vii. 174) that it is a compound of *ša naḫi*, 'the one over the sacrifice'; but this theory also involves difficulties of a grammatical character.

reached an advanced stage of organization, sacrifices, both of animals and of vegetable products, played the most prominent part in the official cult. Gudea, in one of his inscriptions,* furnishes us with a long list of offerings made by him. These include oxen, sheep, goats, lambs, fish, birds (e.g. eagles, doves, etc.), and such products as dates, milk, and greens. From other sources we may add gazelles, wine, butter, honey, garlic, corn, herbs, oil, spices, and incense. The list itself shows that the conception of sacrifice had advanced from mere homage to the gods to providing an income for the needs of the temple service. While there are some traces in the Babylonian religion pointing to the existence, at one time, of the conception of sacrifice as a meal to be shared by the worshipper with his deity,† this stage had long been passed before the days of Gudea (c. 3000 B.C.). The organization of the priesthood, with the various functions of the priests above set forth, necessitated a system that might secure to the temples a regular income; and the frequent references to tithes in the tablets forming part of the temple archives, and even to monthly tributes, indicate a fixed system of taxes levied upon the people. The sacrifice, which invariably accompanies the act of consulting the priest for any particular purpose, falls likewise within the category of an assessment for the service rendered, and not a merely voluntary offering or a ritualistic observance, though such an observance is also a factor involved. The pure homage to the gods, by virtue of this development of the cult, was reserved largely for the priests, who, on their part, offered a daily sacrifice, as well as on stated occasions during the year, to ensure the goodwill of the gods in whose service they were. We have indeed reason to believe that, in the large temples, sacrifices of animals were brought twice every day—in the morning and in the evening; but in the case of these sacrifices, likewise, only certain portions were consumed on the altar, while the rest belonged to the priests.

Besides the tithes and the regular sacrifices, there were frequent occasions—as after a victory, or at the rebuilding of a sacred edifice, or the reinstitution of a temple cult, which, for some reason, had suffered interruption—when the rulers bestowed liberal gifts, or pledged themselves to a regular offering of animals, produce of the fields, garments, ornaments, and the like,—all of which helped to swell the income of the temples. Gifts of various kinds, and votive tablets of precious stone or of precious metals, are also frequently referred to as having been presented to the temples by State officials, and by individuals in their private capacity, so that the element of personal homage to the gods did not entirely disappear in the ever-increasing share taken by the official cult in the performance of religious rites.

There were also certain occasions of the year when the people repaired to the temples to join in the homage to be rendered to the gods. Indeed the religious calendars drawn up by the Babylonian priests‡ show that in the course of time every day of the year was invested with some significance; but, in addition to this, there were certain months and certain days set aside for special homage to some god or goddess. Thus the sixth and eleventh months—Elul and Shebat—appear to have been sacred to Ninib.§ This same sixth month was observed as a sacred period in honour of Ishtar. At the temple to Shamash in

Sippar we learn of six days in the year*—the 7th day of Nisan (first month), 10th of Iyyar (second month), 3rd of Elul (sixth month), 7th of Tishri (seventh month), 15th of Arakshamna (eighth month), and the 15th of Adar (twelfth month)—that were invested with a special significance. There are two festivals, however, that appear to have been particularly prominent from the oldest period down to the latest days—the New Year's festival, celebrated for a period of eleven days during the month of Nisan, which fell in the spring; and the festival of Tammuz, which occurred in the fourth month.

The New Year's Day, known as *Zagmuk*, is referred to in the inscriptions of Gudea, and is there declared to be in honour of the solar deity Nin-girsu and of his consort Bau, who occupies at this time, in the district controlled by Gudea, the position which afterwards was reserved for Ishtar. The spring, as the period when nature awakens to fresh life, when fertility, interrupted by the long season of rain and storms, once more manifests its power, would naturally be associated with a solar deity and with the mother-goddess; but when, at a subsequent period, Marduk was advanced to a position at the head of the pantheon, the honours of the New Year's celebration were transferred to him. The festival season in the month of Nisan was known as *Akitu*, whereas the term *Zagmuk* proper is applicable only to the first day. Gifts to Bau marked the day in Gudea's time, whereas, in the days of Marduk's supremacy, a formal procession of the gods, headed by Marduk, along the sacred street of Babylon,† was one of the chief features. In accordance with the views developed in the schools of Babylon, Marduk was supposed to hold an assembly of the chief gods extending from the 8th to the 11th day of the sacred month, for the purpose of deciding the fate of individuals during the coming year. In this way a more distinctively religious character was given to an occasion which was originally an agricultural festival, marking the beginning of seed-time in the spring.

Likewise of popular origin was the festival of Tammuz, the youthful consort of Ishtar, who is slain by the goddess. The death of Tammuz symbolizes the approaching end of the summer season. Ishtar, though the producer of fertility, cannot maintain it beyond a certain period, and the change of seasons was popularly interpreted as due to the cruelty of the goddess, who deceives the youthful Tammuz—a solar deity, symbolizing more particularly the sun-god of spring-time—and, after gaining his love, destroys his life. Tammuz disappears in the fourth month of the year, and in his place comes Nergal, the violent and raging summer sun, which consumes everything with his fiercely burning rays, and in whose wake follow disease and pestilence. To this festival a more distinctively religious turn was likewise given by the Babylonian theologians, through making it a kind of 'All Souls' Day' for the commemoration of the dead. Dirges were sung by the wailing women, to the accompaniment of musical instruments, and offerings were made to the dead. This Tammuz festival appears to have been common to several branches of the Semites, though its spread and continuance throughout the Semitic world may have been due directly to Babylonian influences. The Tammuz cult was maintained till a late day by the Phœnicians, among whom the youthful god was known as *Adonis*; and there is an interesting reference in Ezekiel (8¹⁴), showing that the Hebrews also continued to observe the Tammuz

festival, just as the Greek population of Asia Minor yielded to Semitic influences, and incorporated the Babylonian nature myth with their own mythology.

The frequent references to the sense of guilt, and the emphasis laid upon a penitent spirit, both in the Incantation texts and Hymns, and more particularly in that subdivision of the religious literature known as the Penitential Psalms,* show that the Babylono-Assyrian religion must have had its sombre aspects; and at times the impression is left, that constant fear of the gods and of the demons and evil spirits overshadowed confidence in the goodwill and favour of the superior powers. The chief festival of the year after the supremacy of Babylon as the capital of the country—the *Akitu*—was of a decidedly serious character; and in a religious calendar,† setting forth in detail the specific character of each day, whether unfavourable or favourable, the unfavourable days on the whole predominate. All the festivals of the Babylonians and Assyrians, so far as our knowledge goes, partake, to a greater or less extent, of the nature of 'penitential' occasions, appropriate for securing, by the manifestation of a contrite spirit and by expiatory rites, the favour of the gods. Even in the joyful words of the hymns sung on these occasions in honour of the gods there is an undertone of sadness, occasioned by the dread lest at any moment the gods may change their favour into wrath.

In keeping with this general character of the religion, we find that, at least in two months—the 6th and 8th—of the year, no fewer than five days in each‡—the 7th, 14th, 19th, 21st, and 28th—were set aside as 'evil days,' on which priests and rulers had to observe special precautions in order not to provoke the gods to anger. The priest was not to furnish oracles on those days, the physician (likewise a priest) was not to attempt a cure, while the ruler was not to put on his festive robes, nor to mount his chariot, nor to eat food prepared by fire, nor to announce any official decisions. Such days appear to have been known as 'days of pacification,'§ a designation expressing the hope of the worshippers rather than the real character of the occasions; and, while it is not certain that the term *shabattu* (or *shapattu*) was also applied to these days, it seems likely that this was the case.¶ At all events, we know that the Babylonians used the term *shabattu* to designate a 'day of pacification'; and there are good reasons for believing that the Sabbath of the Hebrews, which must stand in some relationship to the Babylonian rite, originally had a sombre and penitential character, and that it subsequently underwent a total transformation by making the *shabattu* in the literal sense 'a day of rest' for God, and then, in imitation of the Divine example, for mankind also.

Whether these same five days were observed in the other months of the Babylonian calendar, is again a question that cannot be answered definitely. It seems, likely, however, that such was the case, and, if not those days, there were at all events some days in each month that were designated as 'evil ones.'

Both for joyous and for sombre occasions sacrifices were enjoined, coupled with prayers, but the details as to the specific kind of sacrifices chosen for the various occasions are still unknown to us. Accompanying the sacrifice of animals there were libations and incense-offerings; and,

from the numerous terms found in Babylonian conveying the idea of sacrifices of one kind or another, it is evident that there were a variety of classes of sacrifice which must have corresponded, in a general way, to the subdivisions enumerated in the religious codes of the Hebrews.*

Summary and General Estimate.—If we judge the Babylono-Assyrian religion from the point of view of the general character of the civilizations developed in ancient times, it may fairly be said that, with one exception, it represents on its best side the high-water mark of ancient thought. That exception is the Hebrew religion, which, by reason of the supreme emphasis which, as a consequence of the teachings of the pre-exilic and exilic prophets, was laid upon the ethical conception of the Divine government of the Universe, took an entirely unique direction. The religious literature produced in Babylonia transcends in variety, extent, and depth that which arose in Babylonia's great rival—Egypt. The influence of this literature may be measured by the traces of Babylonian conceptions, Babylonian myths, and Babylonian customs and rites to be found in the pages of the Old Testament. For, while a protest must be entered on purely scientific grounds against endeavours to carry back specifically Jewish ideas and institutions to Babylonian prototypes, merely because of resemblances that may in part be accidental; yet the general thesis may be maintained, that an understanding of the Hebrew religion is impossible without a constant consideration of the religion and culture that were developed in the Euphrates Valley. The stories in Genesis embodying traditions of the creation of the world and of the early fortunes of mankind, contain fragments of Babylonian myths, the specifically Hebrew contribution consisting in the interpretations put upon traditions which, largely through Babylonian influence, became current throughout the Semitic world, and from the Semites spread to other nations. Again, in the Hebrew codes, both as regards the purely legal portions and those sections dealing with religious ritual, Babylonian methods of legal procedure and the ritual developed in the Babylonian temples must be taken into consideration as determining factors.† And when we come to New Testament times we have not yet passed beyond the sphere of Babylonian influence,‡ though here likewise caution must be exercised lest we vitiate the results of a legitimate comparative method by straining it beyond proper bounds.

We have seen throughout this article that a distinction must be made between popular conceptions and the attempts of the priests to systematize these conceptions, leading to the establishment of a more or less fixed body of doctrines regarding the relationship of the gods to one another and to their worshippers. As a result of the influence exerted by the theologians upon popular beliefs, the local cults, both in the large centres and in the smaller places, gradually lost their distinctive character; and the numerous gods, who once enjoyed an independent and individual character, came to be regarded as aspects or forms or specific manifestations of one or another of the limited number of great gods, who as a whole represent the deities worshipped in sanctuaries which for political or

* See, especially, Lv 1-7.

† For a sober and careful discussion of Babylonian influences in the legal portions of the Pentateuchal codes, S. A. Cook's *The Laws of Moses and the Code of Hammurabi* (London, 1903) is to be especially recommended.

¶ See the recent discussion of the question by Zimmern, *Keilschriften u. das Alte Test.* pp. 692-694.

other reasons acquired great prominence. A movement of this kind led to the identification of practically all the goddesses (except those who were merely the consorts of male gods) as forms of one great goddess, Ishtar. This process likewise gave rise to a large number of names, all representing some phase of the solar deity, and paved the way for the grouping of those great gods as a kind of court around one who was regarded as presiding over the assembly. At an early period, lying as yet beyond our ken, Ea, the chief deity of Eridu, appears to have occupied this position. Within historic times, we know that En-lil or Bel, the 'lord' of Nippur, enjoyed this distinction at a time when his centre of worship was also the seat of a powerful succession of rulers, who controlled a large portion of the Euphrates Valley. From En-lil this supremacy appears to have been passed on to Nibib, but after the union of the Babylonian States, and the transfer of the political centre to the city of Babylon, the local deity Marduk usurped the place once occupied by Ea and Bel, and retained it, despite sporadic attempts to restore the old Bel to power, until the end of the New Babylonian empire.

More important, however, for its influence upon the development of religious thought than the question which deity was to be regarded as the head, was the establishment, among the masses, of the view that one particular deity deserved to be regarded as superior to the rest; and it is reasonable to suppose that in the course of time such a view would lead to considering Marduk as concentrating in his person the powers and attributes possessed by the members of his court. In Assyria, less influenced by persistent traditions than Babylonia, this view gave to the chief of the northern pantheon, Ashur, a position entirely unique; and, even to a larger degree than Marduk in the south, Ashur was regarded as the one god with whom practically the fate of the country and of individuals rested. Had the Babylonian and Assyrian theologians been able to conceive of the head of the pantheon as a distinctively ethical power, governing the Universe by laws based upon justice and profound distinctions of right,—nay, as the very source of righteousness and of the moral order of the Universe,—Ashur or Marduk might have developed, as did the national Jahweh of the Hebrews, into the one universal Power. That step, however, was not taken either in Babylonia or in Assyria. The limitation of the religious thought of the leaders and of the masses is marked by the circumstance that, while the attributes of the chief gods are concentrated in one, who thus becomes stronger, more powerful than the others, he is not invested with any traits of a more spiritual character. Ashur, indeed, becomes nothing more than a great war-lord of irresistible force, who protects his lands and subjects, but whose mercy and interest are not extended to nations that do not come within his sphere. Marduk, again, though showing milder traits, remains merely the greatest among the gods of Babylonia, and gradually disappears as his great sanctuary E-sagila crumbles to pieces. The God of the Hebrew prophets alone survives the decline and destruction of His central seat of worship.

But, while these limitations in the Babylonian-Assyrian conception of Divine government are to be recognized, it must not be supposed that ethical traits were entirely wanting in the views formed of the gods, and more particularly of Marduk and Ashur. A great civilization can be produced only by a people imbued with an ethical as well as an intellectual spirit. It is no accidental circumstance that Hammurabi, the founder of the Babylonian empire in the full sense of the term, was also the

one to gather the laws of the country into a great Code,* and he bases his claim to the gratitude of posterity upon his desire to diffuse righteousness throughout his land. This Code itself, dating from c. 2250 B.C., is the most striking evidence of the ethical soundness and moral aspirations of the Babylonians; and, if it be borne in mind that the predecessors of Hammurabi also emphasize their ambition to promote the happiness of their subjects, it will be apparent that we cannot form too high an estimate of the ethical spirit pervading the population of the Euphrates Valley from the earliest historical period known to us.

Taking Hammurabi's Code as a basis, it is important to observe that it provides for the rights of women as well as of men, that throughout it seeks to protect the weak against the tyranny of the strong, that it not only provides for punishment of crimes according to certain principles of equity (even though these are different from those which a modern nation would adopt), but takes into consideration the motives that prompt to acts in themselves illegal. Thus illegal claims are punished with a fine, but, if it can be proved that the claimant had the intention to defraud, a severer punishment, and, as a general rule, the death penalty, was imposed. The rights of the father over his wife and children, and of the master over his slave, are so regulated as to prevent tyranny and cruelty. The *lex talionis* is applied with a logical severity which does not stop short at apparently absurd conclusions,—as when it is provided that a physician, who instead of curing brings about the death of a patient or the loss of an organ, is held responsible for the result, and punished according to the position occupied by the victim of his lack of skill. The thousands of commercial and legal tablets found in the archives of Babylonian and Assyrian temples, and dating from the days of Sargon and Gudea down to the era of the Greek occupation, prove that the provisions of the legal codes, of which that of Hammurabi is only one instance of several that were compiled, were also carried out. Those tablets show the great care exercised in drawing up agreements between parties, and the endeavours of the judges to decide disputed cases brought before them by a careful sifting of the evidence and by strict standards of equity. In the religious literature, likewise, stress is laid upon right conduct as a preliminary to securing the favour and help of the gods, and the 'Penitential Psalms' furnish a further proof, if such were needed, of the intensity of the sense and consciousness of guilt.

Even among the Assyrians, despite the martial spirit shown by their kings and the cruelties practised by them in their incessant warfare, the ethical spirit was not lacking. Such kings as Sargon, Sennacherib, and Assurbanipal, who stand forth as the exponents of Assyria's ambition to extend her dominion by force of arms over distant lands, pride themselves upon having instituted righteous enactments, and claim to be the establishers of law, order, and justice; and, while the desire for self-glorification may have been one of the factors prompting Assurbanipal to gather within his palace walls copies of the literary productions of the south, the fact that he did this for the benefit of his subjects, as he expressly tells us,

* See art. CODE OF HAMMURABI in present vol. p. 584 ff.; and cf. Schell, *Textes Elamites-Sémitiques*, ii. (Paris, 1902), with French translation; also in a revised edition, *La Loi de Hammurabi* (Paris, 1903); F. Mari, *Il Codice di Hammurabi e la Bibbia* (Rome, 1903); G. Cohn, *Die Gesetze Hammurabis* (Zürich, 1903); J. Jeremias, *Moses und Hammurabi* (Leipzig, 1903); Johns, *The Oldest Code of Laws in the World* (Edinburgh, 1903); R. F. Harper, *The Code of Hammurabi* (autograph text, transliteration, translation, glossary, etc.), 1904; and the German translations of Winckler, Peiser, and Müller, as well as Cook's discussion of the Code above referred to.

indicates that there were other factors at work of a higher order.

The Code of Hammurabi has its decided limitations. Many of its provisions are cruel, bordering almost upon barbarous viciousness. But it must be borne in mind that even the more humanitarian Pentateuchal codes are not free from enactments which, from the modern point of view, are reprehensible, as, e.g., the putting to death of the woman suspected of witchcraft. Again, in the provisions made by the courts for the settlement of disputes, methods are followed which do not commend themselves to us. But, down to a late period in European countries, debtors had but little mercy shown them when brought into court, and miscarriages of justice occur frequently in our own day. Moreover, it can hardly be urged, in view of the elaborate and ever-growing provisions made by modern legislative bodies against all manner of crimes, frauds, and encroachments on the rights of others, that the necessity for regulating all legal and commercial transactions by formal contracts—which is a characteristic feature of Babylonian and Assyrian civilization—points to the laxity of the moral sense in these ancient centres.

On the whole, it will be found that the Babylonian Assyrian religion exercised a wholesome influence upon the people, who at all times showed a marked devotion to their gods. It is perfectly true that the practices of the cult were, down to the latest days, linked to beliefs of a crude and primitive character, of which the Incantation texts and the Omen literature represent the natural outcome; but the speculations of the theologians, and the cosmological and astrological system perfected by them, must be taken as an evidence of the higher possibilities of the religion. Religious practices in all religions are apt to lag behind doctrines and speculations, and the test by which a religion should be tried is not so much what it was or even what it is, as what it aimed to be, or under more favourable circumstances might have become. Applying this test, the religion of Babylonia and Assyria stands out among ancient religions as the one that approaches nearest to that phase from which there eventually came forth three of the most important Faiths of mankind—Judaism, Christianity, and Islam.

LITERATURE.—1. GENERAL WORKS.—The writer begs to explain in mentioning his own work, *The Religion of Babylonia and Assyria* (Boston, 1898), first, he does so because it happens to be the only complete treatise on the subject that has as yet appeared. A German edition of this work, entirely revised, to a very large extent rewritten, and with copious additions and new translations of the religious literature, is now in course of publication under the title *Die Religion Babyloniens und Assyriens* (J. Ricker, Glessen). Up to the present (March 1904), six parts have been issued, and the work will be completed in about eleven parts, with an extra portfolio of appropriate illustrations. Professor Sayce's two works, *The Religion of the Ancient Babylonians* (Hibbert Lectures, London, 1887), and *The Religions of Ancient Egypt and Babylonia* (Gifford Lectures; Edinburgh, 1902), while containing many interesting suggestions, do not aim at covering the entire field. The former work, moreover, is now antiquated to a large extent, and the latter is concerned more with a speculative elucidation of the 'conception of the Divine' among the Babylonians than with the details of the religion. Among shorter sketches, those of C. P. Tiele, 'Die Religion in Babylonien und Assyrien' [being pages 127-216 of part i. of his *Geschichte der Religion im Alterthum* (Gotha, 1895), translated from the Dutch edition (Amsterdam, 1893)], and Friedrich Jeremias, 'Die Babylonier und Assyrier' in *Chantepie de la Saussaye's Lehrbuch der Religionsgeschichte* (2nd ed. Freiburg i. B. 1897), vol. i. pp. 163-221, are to be specially commended. Of a later date, and therefore replacing these earlier sketches to a certain extent, are L. W. King's little volume on *Babylonian Religion and Mythology* (London, 1899), and Domenico Bassi, *Mitologia Babilonico-Assira* (Milan, 1899). Alfred Jeremias' articles on the various gods of the Babylonian-Assyrian Pantheon (Marduk, Ninib, Nergal, Ea (Oannes), Nusku, etc.) in Roscher's *Ausführliches Lexikon der Griechischen und Römischen Mythologie* are also to be highly recommended.

2. RELIGIOUS TEXTS.—Besides the collections of religious texts in the publications of the British Museum, more particularly in the fourth volume of *A Selection from the Miscel-*

laneous Inscriptions of Western Asia, ed. by H. C. Rawlinson (2nd ed. London, 1891), and in parts 13 to 17 (last issued) of *Cuneiform Texts from Babylonian Tablets, etc. in the British Museum*, under the general editorship of E. A. Wallis Budge (London, 1901-1903), and the invaluable Catalogue of the Cuneiform Tablets in the Kouyunjik Collection of the British Museum by Carl Bezold, 5 vols. (London, 1889-1899), the following publications merit special mention:—H. Zimmern, *Babylonische Busspsalmen* (Leipzig, 1885), same author's *Beiträge zur Kenntnis der Babylonischen Religion: (a) Beschwörungstafeln Schurpu, (b) Ritualtafeln für den Wahrsager, Beschwörer, und Sänger* (Leipzig, 1901; texts with translation and commentary); K. L. Tallqvist, *Die Assyrische Beschwörungsserie Maqlû* (Leipzig, 1895); J. A. Knudtzon, *Assyrische Gebete an den Sonnengott für Staat und königliches Haus aus der Zeit Asarhaddons und Assurbanipals* (2 vols. Leipzig, 1893); J. A. Craig, *Assyrian and Babylonian Religious Texts* (2 vols. Leipzig, 1895-1897), of which transliterations and translations into French are furnished by François Martin, *Textes Religieux Assyriens et Babyloniens* (two publications, (a) Paris, 1900, (b) Paris, 1903, both under the same title—the former covering vol. ii, the latter vol. i, of Craig's texts); Geo. Reisner, *Sumerisch-Babylonische Hymnen nach Thontafeln Griechischer Zeit* (Berlin, 1896); L. W. King, *Babylonian Magic and Sorcery* (London, 1896); R. C. Thompson, *The Devils and Evil Spirits of Babylonia* (2 vols. London, 1903-1904), translations of incantation series in parts 16 and 17 of *Cuneiform Texts*, etc.; C. Fossey, *La Magie Assyrienne* (Paris, 1902), embodying translations of the greater portion of the fourth volume of the Rawlinson series above referred to, and other texts; A. Boissier, *Documents Assyriens relatifs aux présages* (Paris, 1894-1897, in course of publication); J. A. Craig, *Astrological-Astronomical Texts* (Leipzig, 1899); Ch. Vroilleaud, *L'Astrologie Chaldéenne* (Paris, 1903, in course of publication); R. C. Thompson, *The Reports of the Magicians and Astrologers of Nineveh and Babylon* (2 vols. London, 1900).

3. COSMOLOGY, LEGENDS, ETC.—L. W. King, *The Seven Tablets of Creation, or the Babylonian and Assyrian Legends concerning the Creation of the World and of Mankind* (2 vols. London, 1902), latest and best translation based on the most complete collection of fragments of the various versions; translations of the Creation story, and of all the important legends, and of the Gilgamesh epic, are given in P. Jensen's 'Mythen und Epen' (Schrader's *Keilschriftliche Bibliothek*, vol. vi. 1st part, Berlin, 1900; 2nd part not yet published). Of fundamental importance is the same author's *Kosmologie der Babylonier: Studien und Materialien* (Strassburg, 1890), which marked the beginning of the systematic study of Babylonian cosmology. Cf. Friedrich Delitzsch, *Das Babylonische Welterschöpfungsepos* (Leipzig, 1896); Paul Haupt, *Das Babylonische Nimrodepos* (2 vols. Leipzig, 1891); Edward T. Harper, 'Die Babylonische Legenden von Etana, Zu, Adapa, und Dilmun' in *Beiträge zur Assyriologie*, Bd. ii. pp. 300-521. See also the translations of selected texts (including Creation story, legends, etc.) in *Assyrian and Babylonian Literature*, ed. by R. F. Harper (New York, 1901), pp. 282-444.

4. LIFE AFTER DEATH.—Besides the chapters in the general works on the Babylonian-Assyrian religion, cf. Alfred Jeremias, *Die Babylonisch-Assyrischen Vorstellungen vom Leben nach dem Tode* (Leipzig, 1887, 2nd ed. announced); and the same author's 'Hölle und Paradies bei den Babylonern' (*Der Alte Orient*, i. 3, Leipzig, 1900; 2nd ed. 1903).

5. GENERAL CHARACTER AND BEARINGS ON THE OLD TESTAMENT.—Out of the mass of literature on the subject, the following are intended to represent merely a selection that will serve as an introduction to the main phases of the subject and of the problems involved:—Schrader's *Keilschriften und das Alte Testament* 2, 1883 [English translation by O. C. Whitehouse, *The Cuneiform Inscriptions and the Old Testament*, London, 1885-1888], is still of value as a collection of material, though superseded for the Creation story by King's work above referred to; the 3rd ed. of Schrader's work (Berlin, 1902-1903), by Hugo Winckler and H. Zimmern, is an entirely new work—the first part embodying Winckler's views of the bearings of Babylonian records on the Geography of Palestine and History of the Hebrews, which are based on theories and speculations that remain to be tested; the second part being a most careful and valuable survey of the material for the study of the Babylonian religion by H. Zimmern, with constant reference to the certain and possible bearings both on the Old and the New Testament. See also Zimmern's 'Babylonische und Biblische Urgeschichte' (*Der Alte Orient*, ii. 2 Leipzig, 3rd ed. 1903) [also in English translation, *The Babylonian and the Hebrew Genesis*, London, 1901]. In connexion with Professor Fried. Delitzsch's two lectures on *Babel und Bibel*, Leipzig, 1902-1903 [English translation by C. H. W. Johns, *Babel and Bible*, Edinburgh, 1903], cf. the monographs of Bezold, *Die Babylonisch-Assyrischen Keilschriften und ihre Bedeutung für das Alte Testament* (Tübingen, 1904); Zimmern, *Keilschriften und Bibel* (Berlin, 1903); C. F. Lehmann, *Babyloniens Kulturmission einst und jetzt* (Leipzig, 1903); Alfred Jeremias, *Im Kampfe um Babel und Bibel* (4th ed. Leipzig, 1903). For the literature on the Excavations conducted in Babylonia and Assyria, and for general and special works on the History and general Culture, see the articles ASSYRIA and BABYLONIA in vol. i. of this Dictionary; to the references there given should now be added; R. W. Rogers, *History of Babylonia and Assyria* (New York, 1901), the most complete as yet published; the shorter history of Geo. S. Goodspeed, *History of Babylonia and Assyria* (New York, 1902); and Winckler's sketch in vol. iii. of Helmholtz's *History of the World* [English translation, New York, 1902]. For a general

account of the Babylono-Assyrian culture, Bezold's admirably written and profusely illustrated work, *Ninive und Babylon* (2nd ed. Leipzig, 1903), is to be highly recommended as superseding Kaulen's *Assyrien und Babylonien*, the 5th edition of which (Freiburg, 1899) is not brought down to date, and is therefore of little use; while, for the general Babylono-Assyrian Literature, Telson's manual, *Letteratura Assira* (Milan, 1903), may be mentioned as the latest survey of the field.

13. Similarity to other ancient codes.

ii. VIEWS AS TO CHARACTER OF CONNEXION.

I. HISTORY AND ANALYSIS.

i. *DISCOVERY OF THE CODE.*—This body of ancient laws was first recovered to modern scholar-

ship by the discovery, in December 1901 and January 1902, of three enormous fragments of a block of black diorite, which, when fitted together, formed a stele 2·25 metres high and tapering from 1·90 to 1·65 metres. At the upper end of the front side was a sculptured bas-relief representing the king Hammurabi receiving his Code of Laws from the seated sun-god Shamash. The discovery was made by J. de Morgan at the Acropolis of Susa, the ancient Persepolis, once capital of an independent Elamite monarchy.

This bas-relief measures ·65 metres in height and ·60 metres across. Immediately below it commences the longest Semitic inscription in cuneiform hitherto discovered. It is arranged in parallel columns, but each column is written belt-wise across the curved surface of the stele. Hence a reader must have turned his head on one side—to the left—to read the inscription. On the front side there are sixteen of these columns preserved. There were once five more, of which scarcely a trace is preserved, the inscription having been chiselled out and the stone repolished. On the reverse, twenty-eight columns are completely preserved, with one or two breaks due to the surface being destroyed. The whole inscription may therefore be estimated to have contained forty-nine columns, four thousand lines, and about eight thousand words.

ii. *LITERATURE CALLED FORTH BY THE DISCOVERY.*—1. The inscription is most beautifully cut in the well-known style characteristic of the Hammurabi period. Careful rubbings or 'squeezes' were taken and sent to France. V. Scheil, with remarkable promptitude, published the text by photogravure in the fourth volume of the *Mémoires de la Délégation en Perse* (Leroux, Paris), under the direction of the French Minister of Public Instruction. This *editio princeps* was accompanied by an excellent transliteration into Roman characters, a good first translation, with a few useful footnotes, and a recapitulation of the legal enactments. This superb volume, in quarto, appeared in October 1902.

2. It at once attracted attention. In October the present writer gave a full account of it in a paper read before the Cambridge Theological Society, an abstract of which appeared in the *Journal of Theological Studies*, January 1903. In November, H. Winckler published an independent version in German under the title of *Die Gesetze Hammurabis, Königs von Babylon um 2250 v. Chr.: Das älteste Gesetzbuch der Welt* (Hinrichs, Leipzig; second edition in March, third in November, 1903). This was in some respects an improvement on Scheil's translation, and was accompanied by some ingenious footnotes. About the same time R. Daresté gave a full account of the Code, comparing it with other ancient codes, in the *Journal des Savants* for October and November. In December the *New York Independent* began a series of articles by W. H. Ward, called 'The most ancient Civil Code' (December 11, 18, January 8, 15, 22). This closely followed Winckler's translation, but introduced some parallels from the laws of Moses. In February the present writer published a translation which aimed at being as literal as possible. This was accompanied by an exhaustive index, and appeared as the *Oldest Code of Laws in the World* (T. & T. Clark, Edinburgh). In March appeared an article entitled 'The recently discovered Civil Code of Hammurabi,' by C. F. Kent, in the *Biblical World*. This gave a very readable account of the whole subject, and pointed out many Mosaic parallels. The translation followed Winckler. In August, F. Mari issued an Italian translation, *Il Codice di Hammurabi e la Bibbia* (Desclee & Co., Rome). In November,

D. H. Müller gave, in the *X Jahresbericht der Israelitisch-Theologischen Lehranstalt in Wien*, a very full account of the Code under the title 'Die Gesetze Hammurabis und die mosaische Gesetzgebung' (A. Holder, Vienna). This is specially noticeable for a beautiful Hebrew rendering, as well as an improved transcription and German translation. It has a very full commentary. About the same time appeared the first volume of *Hammurabi's Gesetz*, by J. Kohler and F. E. Peiser (Pfeiffer, Leipzig). It contains a new translation, juristic version, and some good explanatory matter.

A number of books have been devoted to the comparison of this Code with other ancient legislations: S. Oettli, *Das Gesetz Hammurabis und die Thora Israels* (Deichert, Leipzig); J. Jeremias, *Moses und Hammurabi* (Hinrichs, Leipzig [first edition in March, second in November, 1903]); R. Darest, 'Le Code Babylonien d'Hammourabi' (*Nouvelle Revue Historique de droit français et étranger*, xxvii. p. 5f., Larose, Paris); C. Stooss, 'Das babylonische Strafrecht Hammurabis' (*Schweizerische Zeitschrift für Strafrecht*, xvi. p. 1ff.); G. Cohn, *Die Gesetze Hammurabis*, a Rectorial address (Füssli, Zürich); H. Grimme, *Das Gesetz Hammurabis und Moses* (Bachem, Cologne); Père Lagrange, 'Le code de Hammourabi' (*Revue Biblique*, xii. p. 27, Lecoffre, Paris); S. A. Cook, *The Laws of Moses and the Code of Hammurabi* (A. & C. Black, London); W. St. C. Boscawen, *First of Empires* (Harper, London). Besides these, there have been a large number of reviews and notices. Most of the books just cited refer to other literature on cognate subjects. The comparisons with the Bible which they suggest will be given in square brackets at the end of the corresponding sections of the Code (below, p. 599 ff.).

iii. **IMPORTANCE OF THE INSCRIPTION.**—At Susa, where the monument was actually found, the French explorers have of late years been conducting a very scientific examination of the remains of the oldest strata. They have given to the world, along with many records of the native Elamite monarchs, a number of splendid monuments of Babylonian kings. These had been transported from Babylonia as trophies of conquest, as is shown by the fact that sundry specimens have had parts of their inscriptions erased, and replaced by the name and titles of some Elamite ruler. We can hardly doubt that this was to have been done in the space left vacant by the erased five columns of this stele, but the inscription was never cut in. Hence we do not know for certain when this monument was carried to Susa. That it was meant to be set up in Sippara is clear from the words *E-barra šuati*, 'this E-barra,' the name of the temple of Shamash at Sippara (line 76, rev. col. xxviii.).

The value of the inscription is enormously enhanced by its being the original autograph. Copies existed. There was found with it at Susa a large fragment of a duplicate. The scribes of Assurbanipal, king of Assyria (B.C. 668-626), made copies of it, or one of its duplicates, dividing the text into possibly fifteen books. They called the series, in their edition, *dināni (ša) Hammurabi*, either 'the judgments of Hammurabi,' or perhaps 'the image of Hammurabi.' A number of fragments of this Assyrian edition, preserved in the British Museum, were copied and edited, with attempted translation and notes, by B. Meissner, under the title 'Altbabylonische Gesetze' (*Beiträge zur Assyriologie*, iii. pp. 493-523). A fragment or two had been already published, noticed under the title 'Code d'Assurbanipal.' But Meissner, who had edited a large number of contracts of the time of Hammurabi in his 'Das alt-

babylonische Privatrecht' (*Assyriolog. Bibliothek*, xi.), recognized forms of expression, measures of capacity and area, which showed that the Assyrian scribes had copied from some ancient document of that period. Frdr. Delitzsch, in his article 'Zur juristischen Litteratur Babylonien's' (*Beiträge zur Assyriologie*, iv. pp. 78-87), again went over Meissner's texts, and, giving an improved translation, definitely named them the 'Code Hammurabi.' This deduction was amply verified in a few months by the discovery at Susa. The Assyrian copies are wonderfully faithful, and the few variants which occur in them may be due to their having been copied, not from this stele but from a contemporary duplicate. The credit of recognizing these copies in Meissner's edition is due to Professor Scheil, who also pointed out that they actually restore parts of the erased five columns. T. G. Pinches, in a paper entitled 'Hammurabi's Code of Laws' (*Proceedings of the Society of Biblical Archaeology*, 1902, p. 301 ff.), showed the existence of a further fragment, published in *Cuneiform Texts from Babylonian Tablets, etc.*, in the *British Museum* (xiii. pls. 46, 47). H. Winckler, in a review of Scheil's edition (in the *Orientalische Literaturzeitung*, January 1903), gives a long examination of these Assyrian copies. It is to be hoped that further fragments may now be recognized and published.

Not only did the Assyrian lawyers study this great Code, but the later Babylonians did the same. F. E. Peiser, in his *Jurisprudentie Babylonice quæ supersunt* (Cöthen, 1890), published the text of a number of fragments of late Babylonian copies preserved in the Berlin Museum (V.A. Th. 991, 1036). From these we learn that the scribes had edited the Code in a series of books, or tablets, under the title *Ninu ilu širum*, which are the first words of the Susa stele. As the seventh book ended with Scheil's § 154, we may fairly assume that this edition was in twelve books. It was the habit of the Assyrian and Babylonian scribes to write commentaries on the works they studied. Now that the text of the Code is known, we may expect that commentaries, like those published by L. W. King in his edition of the Creation Tablets, will be found and published.

The monument not only contains the Code, but Hammurabi devoted some seven hundred lines to a prologue and epilogue, which narrated his glory and that of the gods whom he worshipped, and blessed those who should respect his inscription, while they cursed the future vandals who should injure or deface it. This part of the inscription is either conventionally phrased or very difficult, and many editors have done wisely in ignoring it altogether. There are, however, several noteworthy points about these portions of the inscription which help to fix our views as to its date. We may first sketch briefly what is known as to the king's life and reign. Much fresh information has come to light since the article **BABYLONIA** (in vol. i.) was written.

iv. **HAMMURABI'S LIFE AND REIGN.**—1. The fresh sources for Hammurabi's reign are chiefly the *Letters and Inscriptions of Hammurabi*, published by L. W. King in three magnificent volumes (Luzac, London, 1898-1900). They consist of fifty-five letters written by Hammurabi to his vassal Sin-idinnam of Larsa; ten of his great inscriptions, besides a multitude of other letters and inscriptions relating to the other kings of his Dynasty. Most important of all is the Chronicle of the Kings of the First Dynasty of Babylon (pp. 212-252). In the *Cuneiform Texts from Babylonian Tablets, etc.*, in the *British Museum* (vols. ii. iv. vi. viii.) were also published a large number of contracts, lists, and letters from the same period. They

were copied by T. G. Pinches. Professor Scheil, in various numbers of the *Recueil de Travaux*, and more fully in *Une Saison de Fouilles à Sippar* (Cairo, 1902), has added many more contemporary documents (quoted as S). Dr. Pinches published a few in his *Babylonian Tablets in the possession of Sir H. Peck, Bart.* (London, 1888). Strassmaier had published a large collection of tablets, found by W. K. Loftus at Tell Sifr, in the *Verhandlungen des V internationalen Orientalisten Congresses* (Berlin, 1882) (quoted as B). Dr. Meissner in his 'Das altbabylonische Privatrecht' published the text of many more, chiefly from the collection brought home by E. A. W. Budge, and registered in the British Museum as Bu. 88-5-12 (quoted here as B¹), and the collection of J. Simon in the Berlin Museum (quoted as V.A.Th.). The collection made by Dr. Budge, registered in the British Museum as Bu. 91-5-9, is quoted as B²). Dr. E. Lindl in his article 'Die Datenliste der ersten Dynastie von Babylon' (*Beiträge zur Assyriologie*, iv. pp. 338-402), Dr. G. Nagel in 'Die Briefe Hammurabi's an Sinidinam' (*Beiträge zur Assyriologie*, iv. pp. 434-483), with remarks by Professor Delitzsch (pp. 483-500), Dr. Mary W. Montgomery's *Briefe aus der Zeit des babylonischen Königs Hammurabi* (A. Pries, Leipzig), Dr. S. Daiches, *Alt-babylonische Rechtsurkunden aus der Zeit der Hammurabi-Dynastie* (Hinrichs, Leipzig), all deal with the same period.

Important studies of the proper names of this period have been made by Hommel in *Ancient Hebrew Tradition*, and Ranke in *Die Personen-namen in den Urkunden der Hammurabidynastie* (Franz, Munich, 1902). Other literature is quoted in these works. T. G. Pinches' *Old Testament in the light of the Historical Records of Assyria and Babylonia* (S.P.C.K., London) is a mine of information for the period. The second edition has a fresh translation of the Code.

It will be seen from the above that we are exceptionally well informed about the times of the First Dynasty of Babylon. These very numerous documents illustrate by actual practical examples the working of Hammurabi's laws. They furnish innumerable parallels for the rare words and expressions.

2. According to the Babylonian King-Lists A and B (see Rogers, *Hist. Bab. Assy.* p. 312f.), Hammurabi was the sixth king of the First Dynasty of Babylon, being son of Sin-muballit, grandson of Apil-Sin, great-grandson of Zabum, who was son of Sumu-lailu and grandson(?) of Sumu-abi, founder of the Dynasty. In the Susa inscription (col. iv. ll. 68-70) the king names himself 'Hammurabi, son of Sin-muballit, descendant of Sumu-lailu.' There can therefore be no possible doubt as to his identity. His son Samsuiluna calls Sumu-lailu the 'fifth father of my father' (King, iii. p. 205). A later king (King, iii. p. 208), Ammiditana, calls himself 'descendant of Sumu-lailu,' so that it seems as if the family traced back descent only as far as Sumu-lailu. The King-Lists also do not say that Sumu-lailu was son of the founder Sumu-abi.

3. The nationality of the First Dynasty has been much discussed, and is of considerable importance in determining the origin of the Code itself; as, if the Dynasty was foreign, the Code may reflect non-Babylonian influence. There is no doubt that the names of the kings, except Apil-Sin and Sin-muballit, are not of the usual Babylonian type; though Jensen (*Zeitschrift für Assyriologie*, x. p. 342) maintains that they are. They, and other names of this period, exhibit many peculiarities: such as *Samsu* instead of the usual Babylonian *Samas*; the enigmatic *Sumu* perhaps for *Sumu*; imperfections like *iamlik* in place

of the Babylonian *imlik*; strange words like *zaduga*, *ditana*, *ammi* (if not a Divine name), *zimri*, besides strange gods like Elali, Wadd, Anat. But scholars are greatly divided as to the nationality indicated by such names. Hommel, Sayce, A. Jeremias, and Ranke favour Arabian, especially in its old forms as preserved in Minean and Sabæan inscriptions. Winckler and Delitzsch call these names West Semitic or North Semitic, as belonging to the group of Canaanite dialects—Phœnician, Moabite, Hebrew, Aramæan. S. A. Cook, after reviewing opinions, wisely says that we know too little of the earlier history of the languages of Arabia and Canaan. We may content ourselves with saying that these people were a freshly arrived Semitic race who retained, in Babylonia, names and words which they brought from a former home. In the 7th cent. B.C. the Harran census (*Assyriologische Bibliothek*, xvii.) shows many of these peculiarities in names borne by the serfs under Assyrian rule. They may, then, belong to a race recently transplanted by Assyrian conquests, or, if indigenous, may point to a nationality descended from those who raised the First Dynasty to empire. So far as cuneiform sources go, we find most affinity with the names of Canaanites in the time of the Tel el-Amarna tablets. But this distinctly foreign influence appears not only in names. The Code shows it in such words as *sittin* for 'two-thirds.'

4. The name Hammurabi has long been well known. In vol. i. of Rawlinson's *Cuneiform Inscriptions of Western Asia*, 1861 (p. 4, Nos. 1, 2, 3), three inscriptions of his were published. Inscriptions in the Louvre were given by Oppert in 1863 in his *Expédition scientifique en Mésopotamie*. The Babylonian scribes of a later period regarded the name as foreign, for they drew up a list of the names of the kings who reigned 'after the Flood,' with their explanations of those names. Some of the names are Sumerian, or Kassite; but among them is Hammurabi, whose name is translated *Kimtarapastum*. Another is Ammizaduga, whose name is translated *Kimtum-kittum*. Hence they regarded *hammu* as the same word as *ammi*, and equivalent to *kimtu*, 'family.' The variants of Hammurabi's name, such as Ammi-rabi, Ammurapi (late Assyrian), Hammum-rabi, etc., show that they were partly right (King, iii. p. lxxv, note 4). But it is doubtful if they were right in rendering it *kimtum*. *Ammu* or *hammu* may well be the name of a god. In compounds like Sumu-hammu, Jasdi-hammu, Zimri-hammu, it can hardly mean 'family,' unless this was deified. The element *rabi* is so very common in Babylonian that we can hardly be wrong in rendering it 'is great.' The name is like Sin-rabi, Samas-rabi, and may well mean 'Ammu is great.' The adjective *rapastu*, applied to the feminine *kimtu*, is 'wide' or 'great' also; and in that the old grammarians were right.

5. The date to be assigned to the First Dynasty of Babylon has been much disputed. The King-Lists, if taken in their integrity, would put the beginning of the Dynasty at B.C. 2454, and Hammurabi's accession at B.C. 2342. But many doubts attach to these figures. Nabonidus puts Hammurabi seven hundred years before Burnaburiash, who cannot be much before B.C. 1400. Rost reduces the length of the Kassite Dynasty by a hundred and eighty years, and so places the beginning of the Dynasty in B.C. 2232, which agrees with Berosus as explained by Peiser, and with Simplicius on one reading. The whole question is well discussed by Rogers in his *History of Babylonia and Assyria*, ch. xii.; but no definite result can be expected from present materials. Even the lengths of the reigns are in doubt now.

The Babylonians at this period gave each year a name. The year-name recorded some prominent event—the building of a shrine, or an expedition, for example. Now the Chronicles published by King give the year-names for the reigns of the kings, and assign forty-three years to Hammurabi, while the King-Lists give him fifty-five. The difference may be accounted for by the proved fact that the same year had sometimes two separate names. The King-Lists may have counted all year-names, and so have made the reigns too long. But this is not always the case: thus, in the King-List, Samsu-iluna has only thirty-five years, while the Chronicle gives him thirty-eight. Here, again, we must await further evidence.

But we can place the monument approximately in the reign. For, when we recall what we know from various sources, we find that Rim-Sin was reigning in Larsa till the 30th year of Hammurabi's reign. Then Hammurabi defeated Elam and overthrew Rim-Sin. The following year he conquered Iamutbal, a province of Elam. Now, Hammurabi boasts in the prologue (col. ii. ll. 32–36) that he had 'avenged Larsa and renovated Ebabbar,' the temple of Shamash there. This he could hardly have done while Rim-Sin was still ruling. We may therefore date the stele after the thirtieth year of his reign.

Of some interest is the usually received identification of Hammurabi with the Amraphel of Gn 14. With this is bound up the question whether Arioch of Ellasar is Rim-Sin of Larsa. For this view, which has the support of most Assyriologists, see especially Pinches (*Old Testament*, etc., ch. vi.); on the other side, see King (i. pp. xxv f., xlix f.). An ingenious method of disposing of the superfluous final *l* in Amraphel has been suggested by Hüsing, who would join it to the next word, and read, 'And it came to pass in the days of Amraph, as Arioch king of Ellasar was over Shinar, that Chedorlaomer,' etc. But Arioch is nearly as difficult, and the whole incident is quite inconsistent, unless the configuration of the country has entirely changed since. The same uncertainties remain as to date on both chronologies.

6. The Chronicle gives us the following skeleton outline of the events of this reign, being the list of year-names. (1) *The year in which Hammurabi became king.* (2) *The year in which Hammurabi established the heart of the land in righteousness.* This has been taken to refer to the initiation of legal reforms; but the same formula is used of Sumu-lailu (B² 2177 A), and may only mean religious reform. The Code was probably not promulgated this year. (3) *The year in which the throne of Nannar was made.* Nannar was god of Erech, but this throne was made in Babylon. We cannot, therefore, conclude that Hammurabi was already ruler in Erech. (4) *The year in which the wall of Malgā was destroyed.* Hammurabi also destroyed the fortress of Maer in this year. Malgā is probably not the same place as the frequently named Malgia, which was close to Sippara. Maer was an important shipping town. Weissbach thinks both were on the Euphrates, near its junction with the Habur (*Babylonische Miscellen*, p. 13). These fortresses were later repaired. The date of the fifth year is not preserved, but some god's temple was probably restored. The sixth year is noted for the restoration of some fortress. Some event at Isin marked the seventh year. (8) *The year in which . . . on the bank of the canal Nuhūš-niši.* The meaning of the name is 'the abundance of the people.' An inscription in the Louvre is devoted to the record of the completion of this canal. Hammurabi built on the banks of it a lofty fortress, which he called after his father, Dār-Sin-muballit-abim-walidia,

and the gap in the Chronicle here may have contained the name of this fortress. (9) *The year in which the canal Hammurabi was dug.* It is not clear whether this canal or the one called Tišid-Bēl was meant here. The latter ran from the Euphrates to Sippar. This event may have been used only to date Sippar documents. (10) *The year in which the . . . inhabitants of Malgi.* This probably refers to a reinstatement of the people, on the restoration, of Malgā and Maer. Some event connected with a city dated the next year. (12) *The year in which the throne of Šarpanitum was made.* This goddess was the consort of Marduk. The date of the next year is not made out clearly. (14) *The year in which the throne of Istar of Babylon was made.* (15) *The year in which the seven images were made.* (16) *The year in which the throne of Nabū was made.* Next year another image was made; the year following, something for Bēl. The next year something was said about 'the mountain'?. (20) *The year in which the throne of Adad was made.* (21) *The year in which the wall of Bazu was made.* The city Bazu was close to Sippara, and not far from Kish. Next year perhaps a canal was cut or an image of Hammurabi set up. Then something seems to have been done at Sippara. Then something was done for Bēl. (25) *The year in which the wall of Sippara was made.* It was the foundation that was laid this year, and it was 'the great wall,' probably an outer circle. The next year records a great flood. Then a great temple was built. (28) *The year in which the temple E-NAM-HE was built.* This was the temple called 'the house of abundance,' the temple of Adad at Babylon. (29) *The year in which the image of the goddess Šala was made.* Šala was the consort of Adad. (30) *The year in which the army of Elam was defeated.* (31) *The year in which the land of Iamutbal was annexed.* A fuller form of this date is, 'The year of Hammurabi the king, in which with the help of Anu and Bēl he established his good fortune, and his hand cast to the earth the land of Iamutbal and Rim-Sin the king.' A further conquest is recorded for the next year, perhaps of the land Dupliaš. (33) *The year in which the canal of Hammurabi . . .* This may refer to the completion of the work begun in the ninth year, or to a new canal whose name is not preserved. (34) *The year in which for Anu, Istar, and Nand (the temple E-TUR-KALAMA was restored).* This date is restored from contemporary documents. The next year perhaps the great wall named Kara-Samas was built. The dates of the next two years are lost. (38) *The year in which the city of Dupliaš was destroyed by flood.* This date is restored from contemporary documents. An alternative date for this year is, *The year of Hammurabi the king in which the people of Turukku, Kakmum, and Subē. . .* Whether they were destroyed by flood or conquered does not appear. The dates of the next five years are lost, but the Chronicle gives the total length of the reign as forty-three years. We know several other year-names for this reign, but are not able to place them yet. *The year in which Ibi-Adad captured the city of Rabiḫu.* Another date refers to the building of the walls of Rabiḫu and Kār-Samas. The latter was built on the banks of the Tigris. *The year of Hammurabi the king in which the goddess Tašmetum made favourable her word.* *The year of Hammurabi the king in which the temple E-ME-TE-UR-SAG was restored and the temple IGI-E-NIR-KIDUR-MAH was built for Zamama and Ninni, and its summit made high like the heavens.* (For further details, see King and Lindl).

7. This sketch we may fill out by the details

given in letters and contracts. There the king appears as an energetic benevolent ruler, who kept the chief business of importance under his own direction. Most of his letters are addressed to one Sin-idinnam, who, if not a vassal king of Larsa, was the governor of that city. If he was set in the place of Rim-Sin, who was independent king of Larsa for the first thirty years of Hammurabi's reign, we may suppose all these letters dated after that event. But, in any case, it is unlikely that Hammurabi could give such minute orders to Sin-idinnam as long as Rim-Sin reigned there. We find that Sin-idinnam exercised authority also over Erech and Ur. At one time Sin-idinnam had a military command, for the king ordered him to send certain Elamite goddesses, who had been captured, under escort to Babylon; and when the same goddesses were sent back to their temples, under the escort of Inuhsamar and his troops, Sin-idinnam was told to attack the Elamites first, lest it might seem to be a confession of weakness. The earliest known reference to Assyria occurs in these letters, when 240 men of the 'King's company' are said to have left Assyria. The Code also names Ashur, the city, and Nineveh (col. iv. ll. 55-63); but last among the list of subject-towns. The name of the god *Asur* already occurs in the reign of Sin-muballit (B³ 3, B¹ 14).

8. The king's piety and care for the worship of the gods appear not only in the prologue to the Code, where he boasts of having built, restored, or adorned the temples of the chief cities of the empire, but also in the above list of year-names. Further, in his letters we find him directing the collection of temple revenues and superintending their shepherds and herdsmen. He postponed the hearing of a trial because one of the parties was on duty at a festival in Ur. He controlled the calendar, sending Sin-idinnam notice that the month now beginning was to be a second Elul. He is, however, careful to add that this must not be taken as an excuse for postponing payments for a month.

The king also gave directions as to the canals. We have seen that he constructed several. In one letter he orders the dwellers on the banks of a certain canal to clear it out. In another case a canal was so badly dredged that ships could not come to Erech. Hammurabi orders the work to be done 'in three days.' Even the Euphrates (?) stream had to be cleared.

But it is in the administration of justice that this king is seen in the most favourable light. Apparently, he was accessible to all. Bribery he dealt with promptly; he enforced a merchant's claim for a debt against a city governor; he sent instructions as to how cases were to be treated. Against money-lenders he was severe, and several letters deal with loans or debts. He orders the parties concerned to be sent to Babylon, and gives instructions for their being guarded.

The collection of revenue, the due care of the royal flocks and herds, the audit of accounts, the regulation of food supplies, shipping and other transport, labour on public works, and the proper exemptions from duty, are all frequently dealt with in the letters. For fuller details and the parallels from other reigns of the First Dynasty, see King's *Letters of Hammurabi*.

The period of Hammurabi's Dynasty was one of great literary activity. Many of the tablets in Assurbanipal's library are ascribed to this period by their characteristic forms of expression; but no works are definitely ascribed by the documents themselves to this king. Still, the view is general among Assyriologists that this period produced most of the masterpieces which later generations chiefly reproduced.

The picture of monarchy which these sources and the Code reveal is by no means unpleasing. Like all Oriental despotisms, it is ideally a strong, energetic, benevolent monarchy. In the words of Hammurabi, he was indeed 'a father of his people' (col. xxv. 21 f.) and 'the sun of Babylon' (col. v. 4). His Code amply justifies his boast, if it was carried out. That is rendered probable by the host of contemporary documents, not only for his reign, but for those of his predecessors and successors. So far as they refer to the class of cases considered in the Code, they confirm its working. Of course a large number of cases, especially criminal cases, were not the subject of written records. We have no records of trials for murder, rape, incest, or the like grievous wrongs. But we have not only contracts of marriage, partnership, loans and commissions, and other commercial business, but also a number of legal decisions. These mostly relate to property disputes, but a few touch crime as well. So far as they go, they prove that the Code was literally carried out. Further, they show that it was no new invention, but codified the customary law of the country.

The king was a *quasi*-Divine person. This is shown not only by the invocation of his name along with those of the gods in solemn oaths, but by such names as *Hammurabi-ilu*, 'Hammurabi is god'; *Hammurabi-samšu*, 'Hammurabi is my sun.' Men swore by 'Šamaš, Aia (his consort), and Hammurabi the king,' as also by the name of Marduk or of Rim-Sin, other gods or other kings. See a list of these oaths in Kohler-Peiser, i. p. 107 f. The king was often accorded the title *i-lu* as a prefix to his name. This custom continued in use until late in the Kassite Dynasty. In the prologue to the Code (col. ii. 48), Hammurabi calls himself the 'Divine shelter,' *i-lu šululu*, of his land, (col. iii. 16) the 'Divine king of the city,' *i-lu šar ali*, (col. v. 4) the 'Divine sun' of Babylon, *i-lu Samšu*.

As one consequence of this sacred majesty of the king, he does not directly appear as party to any commercial or business transaction. This was not so in early times. In one of the oldest monuments of Babylonia which we possess, the stèle of Manishtusu, King of Kish (*Mémoires de la Délégation en Perse*, tom. ii. p. 1 ff.), we find the king buying lands, like any other person, to make up an estate for his son Mesalim, afterwards king of Kish also. But in all later times the rule holds good. The king's stewards, shepherds, and other officials buy and sell, obviously for their master, but his name does not come into the transaction.

9. The extent of Hammurabi's empire can be gathered only partly from the Code. He names in the prologue the cities of Babylon, Sippara, Nippur, Dūrlu, Eridu, Ur, Larsa, Erech, Isin, Kish, Cuthah, Borsippa, Dillbat, Shīrpūla, Hallab, Kar-kar, Maškan-šabri, Malkā, Agade, Ashur, Nineveh, but only as having done benefits to the temples there. The list covers all Assyria and Babylonia. He is called king of Martu in an inscription set up in his honour, and that is usually taken to mean the Westland or Palestine (King, *Letters*, iii. p. 195 f.).

v. SOCIAL GRADES RECOGNIZED IN THE CODE. —The Code recognizes three grades of society: the *amēlu*, the *muškēnu*, and the *ardu*.

1. The first grade were the men of gentle birth, men of family, and very likely were largely of the same race as the royal family. Winckler has compared them with the *amēlu* of the Tel el-Amarna tablets, where it is still a distinct title, and with early Arabic *ʾalā*, *ulāi* (*Altorientalische Forschungen*, ii. p. 313). The king himself seems to be addressed by the title *amēlu ša Marduk liballitsu*, 'the *amēlu* to whom may Marduk grant life.' He

thus held the position of the First Gentleman of Babylonia. In many passages *amēlu* is distinctly equivalent to 'officer.' By courtesy it was extended, like our 'Sir' or 'Esquire,' to mark every person of position not otherwise titled. Even in the Code it is usually applied to all free citizens, when no distinction from the *muškēnu* is necessary. It is also used as a determinative before names of trades and occupations. Thus the potter, the tailor, the stone-cutter, carpenter, builder, and other artisans, who are paid a daily wage but may have belonged to old trade guilds, are *amēlē*; but not the doctor, the veterinary surgeon, or the brander. In some cases this may be accidental, but must be remembered in case further evidence should come to light. He was an officer when performing military service. His residence appears to be called an *ēkallu*, which is best rendered 'mansion'; the usual rendering 'palace' is apt to suggest the royal residence. It seems probable that every town contained one or more such 'mansions.' They are named in contracts as being built for persons who were certainly not kings (B² 333, B² 381). Consequently the slave of the 'palace' is not necessarily a royal slave (§§ 175-176).

2. The *muškēnu*, whose name passed into Hebrew as מִשְׁכֵּן (*miškēn*), Ital. *meschino*, *meschinello*, Portug. *mesquinho*, French *mesquin*, etc., occupies a lower rank. His penalties are less, but so are his compensations for injury. He is specially legislated for (§§ 8, 140, 198, 201, 204, 208, 211, 216, 219, 222). The rendering of the name is difficult. The translation 'poor man' is not very good. For he was no pauper, certainly not a beggar. He had slaves (§ 15) and goods. Müller calls him an *Armenstiftler*; but there is no evidence of his receiving any pension. Kohler and Peiser give *Ministerial*; but there is no evidence of his having any special association with the court, or any special duties. The name itself may be taken to mean a 'subject,' originally 'suppliant.' We take it he was a 'commoner,' one of the *plebs*, perhaps of the conquered race. At any rate he was free, but apparently subject to the *corvée*, perhaps obliged to serve in the ranks of the army. We find that his offering in the temple was allowed to be less than others (Meissner, *Beiträge zur Kenntnis der Babylonischen Religion*, p. 176 f.). In Assyrian times the Babylonians complained that they were being treated as *muškēnu*, not so much 'poor men,' but subject to indignities. In the Tel el-Amarna tablets Amenophis quotes the letter of Kadašman-Bēl to him, inquiring after his daughter Šuharti. The Babylonian king says the Egyptian had his sister to wife; but no messenger of his had ever been able to see the princess, or know whether she was alive or dead. A certain lady they had seen, but *mindī martu isten muškēnu*, 'whether she was the daughter of some *muškēnu*,' they could not tell. In omen tablets it is a curse that a man *muškēnitu allak*, 'should come to poverty' (Bezold, *Catalogue*, p. 1566).

3. The slave (*ardu*) was treated very much as a chattel. He could be sold or pledged (§§ 118, 147); damage done to him had to be paid for, but the compensation went to his master (§§ 213, 214, 219, 220). A repudiation of servitude on his part was punished by mutilation (§ 282). The master is not said to have power of life and death; indeed his power seems expressly limited to mutilation. The slave could acquire wealth, and act in business as a free man, but his master had to be cognizant of his transactions. If he was living in his master's house he could not buy or sell, except by power of attorney, or written licence from his master (§ 7). But many slaves married and had homes of their own. Then the master acted as patron, and

recovered their debts for them. A slave who married one of his master's slave girls was able to acquire wealth, but his master was his sole heir, and his children were slaves. On the other hand, a slave, at any rate if in the service of a 'great house,' or of a *muškēnu*, could marry a free woman. In that case the children were free (§ 175), and the free woman's marriage portion remained hers, for her children, on her husband's death (§ 176). The property which the pair acquired after marriage was divided into two equal portions: the master, as his slave's heir, took one half, the wife and children the other half. A slave could buy his freedom with his savings. This must have been a free bargain between slave and master. The former had to choose between freedom and poverty on one side, and service and comfort on the other. The master accepted a present gain in lieu of a deferred reversion of the slave's property. The Code does not notice this point.

A female slave could become her master's concubine. Her children were free (§§ 170-171); and so was she, at her master's death. If her master chose he could acknowledge her children, and then they inherited equally with the children of his free wife; but these had first choice in the sharing of his property (§ 170). If she was the property of a free woman who was married, the slave girl might be given by her mistress to her husband to bear him children (§ 144). Her mistress retained the right to punish presumption and insolence by degradation to full slavery again; but the slave girl, if she had borne children to her master, could not be sold. At his death she was free (§§ 146, 147).

The slave was not always contented with his lot. He might run away. His captor was bound to bring him back to his master, and was then rewarded by statute with a payment of two shekels (§ 17). But if the captor kept him in his own house, and did not give him up on demand, he was punished with death (§ 19). So was any one who enticed a slave away from his master (§ 15). The slave seems to have had liberty to go about freely in the city where his master lived, but not to leave the city without his master's consent (§ 15). A slave usually had his owner's name, or some mark by which he could be recognized, branded or tattooed on his arm. If a captured fugitive slave would not name his owner, he had to be taken to the 'palace' or governor's residence, and there put to the question, and so restored to the owner (§ 18). We find from the letters that the officers over the levy claimed, for the *corvée*, unowned slaves (B² 419). The tattooing of the slave's mark was the business of the *gallabu*, who could also render it irrecognizable again. To do this without the consent of the owner, rendered the *gallabu* liable to have his hands cut off (§ 226). If he had been deceived into doing this by some one who was judged to have designs on that slave, the *gallabu* could swear to his innocence and be let off; but the fraudulent holder of the slave was treated as a slave stealer, and put to death (§ 227). To 'mark' a man was equivalent to reducing him to slavery. This might be done to a rebellious child by the Sumerian laws. Also it might be inflicted on a man for slander (§ 127), or on a rebellious or insolent slave (§ 146). A fugitive slave might be put in chains by his master. Harboursing a fugitive was punished with death (§ 16).

The slaves were probably recruited principally from captives taken in war. We see that certain persons might be bought abroad and brought back by merchants. These would, no doubt, be offered for sale as slaves. But, if they were natives of Babylonia, their relatives, their town temple, or,

in the last resort, the State, would ransom them (§ 32). If they had been slaves before, in Babylonia, it seems that they had to be set at liberty on being brought back (§ 280). But the Code may only mean that they returned to their former condition. Foreigners, once slaves in Babylonia, captured thence in war, bought abroad by a merchant and again offered for sale by him in Babylonia, if recognized by a former master, might be re-bought by him at the price the merchant gave for them abroad (§ 281). The Code apparently aims at excluding a profit on the transaction, but leaves the price to be settled by the merchant's oath as to the money paid by him.

There is no trace in the Code, or contemporary documents, of serfs, or *glebe adscripti*, such as were so common in Assyria and the district about Harran in the 7th cent. B.C. (see 'Harran census,' *Assyriologische Bibliothek*, xvii.). The serf seems to have held his lands by inheritance, and had property of his own. The class was largely recruited from slaves and town artisans. A serf's father is usually named. He was sold with the land, and subject apparently to military service. Many captives taken in war were settled as serfs, and the Assyrian kings usually assigned lands to the transported peoples.

The slave proper usually appears as fatherless; but a number of cases occur at all periods, when parents sell their children. Free men might be sold for debt, or reduced to slavery as punishment for crime. In the latter case they probably became public slaves. Slaves were subject to the *corvée*, as king's servants. Even female slaves owed service to the State—usually work, such as weaving or spinning. It was of great importance to a buyer of a slave whether this duty had been discharged, and he often demanded a guarantee that it was no longer due. It probably was confined to a number of years—six seems likely in the case of the Harran serfs. A great many slaves were skilled workmen; they were often apprenticed to learn a trade. But in early times the trades were in the hands of free men.

Slaves might be adopted as children by free men and women, usually to care for the old age of one whose own family had already grown up and left the home. Such adopted children became free, and usually inherited their adoptive parents' property. Further details on the status of slaves, especially in later times, will be found in Meissner, *de Servitute*, Pries, Leipzig; and S. A. Cook, *The Laws of Moses*, etc., ch. vii.

The value of a slave varied much with age, accomplishments, sex, etc. The Code avoids the question by awarding 'slave for slave' (§§ 219, 231), 'half his price' (§§ 199, 220). A maidservant was worth twenty shekels of silver (§ 214), her unborn babe two shekels (§ 213). In contemporary documents a male slave sold for as little as six shekels or as much as twenty. A female slave might fetch as little as four and a half, or, with a babe, as much as ninety-four shekels.

The reward for restoring a fugitive to his master (§ 17), or for curing a slave (§§ 217, 223), was two shekels of silver, evidently calculated as one-tenth of the ordinary value. This value of twenty shekels remained constant as the average to the times of the Second Babylonian Empire.

vi. **CLASS LEGISLATION A FEATURE OF THE CODE.**—A distinctive feature of the Code is its class legislation. Not only are the aristocrat, the commoner, and the slave treated separately, but the Code legislates separately for certain classes of the community.

1. The first class are feudal landowners. They hold lands of the crown by service. Their names, *rid šabbē* and *bā'iru*, are difficult to translate, be-

cause we have no modern officials whose functions exactly correspond to theirs. (a) For the first we propose 'levy-master.' The 'levy-master' was over the *corvée*. He had to make up the local quota for the army, or for forced labour. On the former side he might answer to the field-cornet, commandant, pressgang officer, *Feldwebel*, *Stattvertreter*; and, on the other, to the ganger on public works. He may have had other duties, such as the maintenance of local order, but these chiefly appear in the letters of the time (see King's *Letters of Hammurabi*, under '*ridā*,' iii. p. 290). To their gangs were condemned fugitive slaves, if unclaimed (B² 419).

The king in various letters orders the exemption of temple bakers, royal shepherds or herdsmen, and *patēsis* from the *illku*, or 'duty,' of these officers. Further, it is certain that on some occasions this duty was military service, on others public works. It is not, however, clear that we have always a class exemption.

The Code fixes their status very clearly in some respects. They might be sent on 'the king's way,' perhaps a term for a military expedition, but probably including any royal business. It was a capital offence not to go. To send a hired substitute involved death, and the substitute took over the appointment (§ 26). For a magistrate to allow such personation was punished by death also (§ 33). If such an officer was captured abroad, and there was bought by a Babylonian slave-dealer, he had, on his return, to be ransomed from his own means, failing that, by the temple treasury of his town, failing that, by the State (§ 32). But his holding could not be sold for the purpose. It consisted of land, house, garden, and stock given him by the king, as well as a salary, and could not be sold, pledged, or exchanged (§ 34). The penalty for its alienation was that it had to be returned, and the buyer, lender, or exchanger lost what he had given for it. The officer could not be oppressed by the governor, neither robbed, defrauded of salary, let out on hire, nor wronged in court, on pain of death (§ 34). The officer could not leave his holding to his wife or daughter, nor any part of it (§ 38). He had, of course, full power over his own acquired property (§ 39). He could name his son as *locum tenens* in his absence, if capable of discharging the duties of his office, which therefore were not solely military. If his son could not take the duty, being a child, one-third of the estate was sequestered to the child's mother for his maintenance, and a *locum tenens* put in by royal authority. To secure the estate from dilapidation, the *locum tenens* acquired a prescriptive right to it, if the absentee was away three years or more. This held good only if the absentee had been a neglectful holder. In any case, one year's absence did not invalidate his claim to resume it on his return.

(b) In nearly every case the *bā'iru* is associated with this officer. The term means simply 'catcher,' and is used of fishermen and hunters alike. In contemporary documents it seems always to be used of fishermen. Perhaps they, too, were a privileged class, as being necessary to the provision of food for the palace. It appears that they had their special fisheries reserved in each district, and were not allowed to poach on other fisheries (King, *Letters*, p. 121 f.). But it is not quite clear that the *bā'iru*, or 'catcher,' may not have been, like the old 'catchpole,' a sort of constable. He could, like the 'levy-master,' be sent 'on the king's way,' might be captured abroad, held the same sort of estate, could make the same arrangements as to his son's taking his duty. He is not expressly exempted from the governor's oppressions, but surely was not meant to be at his mercy. This rather goes to prove that *bā'iru* is almost a synonym for *rid šabbē*.

(c) So far as inalienability of holding was concerned, the *nās bilti*, or 'payer of tribute,' was in the same position as the *riḏ šabē* and the *bā'iru*. It seems, therefore, that land was held of the crown, as in other Oriental countries—notably Morocco now—on two forms of tenure. One carried an obligation to personal service, the other only a rent or tribute. Both were thus inalienable, but might be hereditary. Land could also be held by others, who might alienate: votaries, merchants, and foreign residents are named (§ 40); but the duty, whatever it was, went with the land, and must be discharged by the buyer. Some land was freehold (*zakā*); and it is expressly laid down as a special privilege that the estates of a Marduk votary were thus exempt from the 'duty.' There is no express mention of tithe, but that probably grew out of the 'duty.'

2. The votary was also the subject of special legislation. She might be devoted to the service of a god (Šamaš and Marduk are named in the Code; Sin, Anunit, and others elsewhere) by her parents; or she might herself elect to become a votary. She thus became a 'bride' of the god, and might be dowered by her father as for marriage (§ 178). Her father could give her complete power over her property, or not. In any case, she had the life interest in it (§ 179). If not absolutely at her own disposal,—on her father's death, her brethren, who had the reversion of it, might assume possession and maintain her. If they did not do this to her satisfaction, she had the power to appoint a steward, who would administer it as she wished. In any such case it reverted at her death, unless her father had granted her the disposal of it by a special deed of gift. If he gave her no allowance of this sort, she did not forfeit her rights as a daughter in his estate, but came in for one-third of a son's share at his death (§ 180). To all appearances, the votary was vowed to perpetual virginity; but she might marry, and give her husband a maid to bear him children (§ 146). If she broke her vow and had children, they were not recognized as in her power; they could be adopted by any one without her having power to claim them back (§ 193). From contemporary documents we find that votaries often adopted children, mostly other votaries, doubtless to care for their old age. Normally, the votaries lived in a convent (§ 110), or common home, called 'the bride chamber.' It was a very large establishment, and is often named as a neighbour in sales of lands. If they did not live there, they were expected to be staid in their behaviour. They might not open a beer-shop, nor enter one, on pain of being burned (§ 110). They were highly respected. No one might slander them, on pain of being branded on the forehead (§ 127). We read of Ittāni, daughter of king Ammizaduga, as a votary (V.A.Th. 630). They had a common scribe (B² 2175 A) and a 'lady superior' (B¹ 61). The votary of Marduk had special treatment, as was natural for a king who had made Babylon the capital of his empire, and Marduk supreme, even over Šamaš in Sippara. She was, even if not dowered by her father, able to claim one-third of a son's share in his property at his death, and had full testamentary powers over it. She had no 'duty' to discharge (§ 182). We continually meet with votaries in contemporary documents, chiefly devoted to Šamaš. They were clearly a wealthy body, and carry on business freely. They agree with brothers about their estates, put in stewards, leave property, and carry on ordinary contracts. Many marry. Nowhere in the Code or elsewhere is there any trace of the evil reputation which Greek writers assign to these ladies, and the translations which make them prostitutes, or unchaste, are not to be accepted.

Greek influence may later have corrupted their morals.

3. Men were also vowed to the service of a god, but the Code does not refer to them. The rather obscure *manzāz pāni*, who 'stood in the presence' of the king, were naturally celibates. Their wives could not be tolerated in the palace. Their children, if they had any, were treated as homeless (§ 192), and could be adopted by any one without the father's consent. There is no ground for assuming any vicious habits on their part, as the term included some of the highest officials of the State.

4. Special professions were also legislated for. The beer-shop was usually kept by women. Even as late as the Second Babylonian Empire we find a master setting up a female slave in a wine-shop. The price of beer was not to be dearer than corn, measure for measure (§ 108). Corn was legal tender, and silver was not to be demanded by the great weight. The beer-seller had to give information of all treasonable conspiracy she overheard in her shop (§ 109). She was severely dealt with: if she broke these rules, death was the penalty. There is no hint that her house was a brothel, though later custom suggests it.

5. The doctor does not seem to hold a high profession. He is not an *amēlu*. The fee for a successful operation, involving surgery (removal of a cataract with the bronze lancet is probably meant), is fixed and graded according to the position of the patient (§§ 215-217). An unsuccessful operation is penalized by loss of the hands, reparation, or a fine (§§ 218-220). A cure of an injured limb, or a rupture (?), is similarly treated (§§ 221-223). The veterinary surgeon is likewise dealt with (§§ 224, 225). The brander, who may also be a barber, and perhaps a shearer, naturally follows a surgeon. His special treatment concerns his attempting to efface a slave's tattooed mark. If he did this wittingly, he lost his hands. If he was deceived, he could get free on oath of innocence, but the procurer suffered death (§§ 226, 227).

6. Builders are treated much the same. The builder's fee is fixed according to the size of the house. His bad workmanship is punished if it leads to damage. He has to make good all loss, and repair at his own expense; and, further, suffer the same damage in his own person as he has brought on the house-owner (§§ 228-233). The boatman gets a fixed fee according to the size of the boat he builds. Damage due to bad workmanship appearing within a year's time has to be made good, or the boat replaced (§§ 234, 235). A boatman had to make good a boat lost through his carelessness, if hired to navigate it. He was responsible for the freight, if any. If he sank a boat, but raised it again, he paid half value. His hire was fixed (§§ 236-239).

vii. *AGRICULTURE*. — 1. Land was already private property, subject to its duty to the State. An impost was levied upon the crop, and was clearly proportional to its amount (*mīksu*). How men came into possession of waste or unreclaimed land, which might be expected to be common, does not appear. The reclamation may have constituted a title. At any rate, the Code contemplates land being given to a farmer to reclaim (§ 44), and the contracts show the practice to have been common (B¹ 186, etc.). The unreclaimed land was usually taken along with arable land (double in amount), and without rent for a time. Then, say in the fourth year, fixed rent was expected from all—that from the virgin soil being threefold the ordinary. The landlord further made an allowance of provisions towards the farmer's keep. The penalty fixed by the Code for neglect to reclaim is that the farmer should leave it in good tilth, and pay a fair rent (§ 44). Ordinary arable land was 1ct, usually

at fixed rents, so much corn per acre, six *GUR* per *GAN* being very usual. A deposit was expected, and it was ordinary debt not to pay the rent. The Code only enacts that, if the rent had been paid, no rebate could be claimed if a storm destroyed the crop afterwards (§ 45). But if the rent was not paid, or if the land was let on the share-profit system, the damage done by storm was borne by landlord and tenant equally, or in proportion to their shares (§ 46). This system of produce-rent, or share-profit, was very common, the landlord taking half the crop, or two-thirds, according to agreement. In such a case the tenant's neglect to do the proper work prejudiced the landlord as well as himself; in this case the Code enacts that he shall pay an average rent, 'like his neighbours,' or 'like right and left of him' (§ 42, B² 1031). He had to leave it in proper tilth. An important measure of precaution, often stipulated for in the contracts (B² 361, 460), especially when the field lay some way from the town, was the erection of a farmer's cottage on the field. He had to be present, as an old work on agriculture, often compared to Hesiod's *Works and Days*, tells us, 'to scare the birds, capture antelopes or wild goats, collect locusts.' The landlord might have a cottage already there, and charge for it, stipulating that it be vacated with the field; or he might stipulate that the tenant should put it up, and leave it at the end of the lease. The Code contemplates the neglect to put up this cottage, and the tenant subletting the field, probably to one who lived nearer. The landlord could not object, if he had his proper rent at harvest, and if his field was duly cultivated by some one (§ 47).

An important form of tenure was the *metayer* system, where the landlord found seed, implements, and oxen, besides paying a wage to the farmer. Here the farmer might embezzle the seed, or the provender, for which the Code enacts that his hands be cut off (§ 253). He might take the corn and starve the oxen (it was furnished partly for their food), for which he must restore from what he planted (§ 254). He might hire out the oxen to another, stealing their provender and not producing a crop, for which he had to pay a heavy fine, sixty *GUR* per *GAN* (§ 255). If he could not pay, he was to be torn to pieces by the oxen on the field (§ 256).

Gardens or plantations were usually let, if already planted, at a rent of two-thirds produce, as fixed by the Code (§ 64). Neglect which would diminish the crop was guarded against by enacting that an average yield should be returned (§ 65). Land was given to be planted as a garden, the owner often stipulating as to what plants he wished for. The terms were that the gardener paid no rent for four years, and in the fifth year he and his landlord divided the land equally (§ 60). If he left part uncultivated, that was reckoned in his share (§ 61). If he had failed to carry out his work, he was bound to do so before giving it up, and further fined an average year's rent for the time he held it, if it was corn land (§ 62), or ten *GUR* of corn per *GAN* for each year, if it had been unreclaimed land (§ 63).

2. The Babylonian landowner was often in want of ready money despite his magnificent harvests, which often yielded a hundredfold. He had to employ extra labourers to get in his harvest, find seed at seedtime, and was liable to destructive floods. If he had borrowed money and a storm destroyed his crops, he might post-date the bond, and not pay interest on the loan that year (§ 48). He frequently pledged his field to a money-lender; but, whatever the terms of his offer, the Code enacted that he should always reap the crop himself, and from the produce pay off the loan, and the expenses of the

lender, if he had to find a cultivator (§§ 49, 50). Speculation in 'futures' was forbidden to the money-lender. Further, this man could not demand money; corn or produce was legal tender in satisfaction of such loans (§ 51). It was a practice with money-lenders to stipulate for the return of a loan in the exact form in which it was borrowed. If the cultivator put in by the creditor does not produce a crop, as the owner had left the care of the field to the creditor, he must bear the loss; he can claim no rebate on that account (§ 52). Hence it was dangerous to mortgage for more than an average crop. Gardens or plantations were also protected from money-lenders' speculations in the same way (§ X). The owner, whatever his offer, must take the crop himself, and whatever is over and above his debt and interest is his. He was protected in other ways. No one could distrain upon a working ox, except under fine of one-third of a mina of silver (§ 241). The ox was not only used for ploughing, it was constantly employed to work the watering machines, which sometimes required as many as eight oxen. It was also needed for threshing.

3. Babylonian culture was dependent upon water supply. On the one side, floods were frequent, and had to be provided against by an elaborate system of ditches and canals; on the other, the summer heat turned all herbage to dust, unless watered. One chief claim to the gratitude of posterity on the part of kings and priests was the furnishing of new canals. Once made, these were expected to be kept in order by the riparian landowners. The work of repairs, dredging, and cleaning was always considerable, from the floods, silt, and rapid growth of water vegetation. Hammurabi's letters often deal with the needs of the canals (King, *Letters*, pp. 15, 16, 18, 64, lxiv f., xxxvi f.).

The ordinary repair of the bank was the duty of the man whose field adjoined it. If he neglected to strengthen it, a burst was likely. He was responsible for the damage done to the neighbours' crops (§ 53). He and all his possessions could be sold to pay the damage (§ 54). He had the right to open a runnel to water his field; but, if he left it running and swamped his neighbours' crops, he had to compensate (§ 55) according to the extent of the damage (§ 56). The theft of a watering machine, probably that consisting of a pole and bucket, was penalized by five shekels of silver. The bucket alone, or a harrow, was protected from theft by a fine of three shekels (§§ 259, 260).

4. Considerable attention is paid by the Code to fixing wages, or hire. The harvester had to be paid eight *GUR* of corn per year (§ 257). An ordinary labourer was paid six *SE* of silver per day for the first five months, five *SE* for the remaining seven (§ 273). This would be about twelve *GUR* of corn per year. A working ox could be hired for four *GUR* of corn per year (§ 242), a milch cow for three *GUR* (§ 243). An ox for threshing fetched twenty *KA* of corn per day, an ass ten *KA*, a calf 1 *KA* (§§ 268-270). A waggon, with its driver and oxen, cost one hundred and eighty *KA* of corn per day (§ 271). As the waggon alone cost forty *KA* (§ 272), and two oxen another forty *KA* (§ 268), we may take it that a man cost one hundred *KA* per day for carting. A cart might be hired for ten *KA* a day (§ 572). An ox-driver had six *GUR* of corn per year as wages (§ 258).

The care of the hired animals was strictly guarded. A lion might kill ox or ass, and the owner had to bear the loss (§ 244). But neglect or ill-treatment had to be paid for (§§ 245, 246). Partial injury was assessed (§§ 247, 248). The hand of God was the owner's loss (§ 249). The responsibility for a savage bull was decided. If the animal suddenly got out of hand and killed a man,

it was treated as an accident (§ 250). But if the animal was known to be vicious and his owner took no means to prevent his doing harm, the owner had to pay blood money (§§ 251, 252). The price of a three year old ox was twenty shekels (B² 448).

5. Vast herds and flocks were owned. Hundreds of sheep are named as under the care of one man. The king had occasion to call as many as forty-seven shepherds to account at one time (King, iii. p. 70). The sheep had to be taken some distance to pasture. The shepherd gave a receipt for the animals entrusted to him, and was bound to return them with reasonable increase in the amount by breeding. He was allowed to use a certain number for his keep and that of his underlings. He had to face perils from wild beasts and robbers. The Suti nomads were specially feared. We find a Sutu hired to protect the flocks from his clansmen (B¹ 532). The shepherd or herdsman was paid eight GUR of corn per year (§ 261). He had to restore ox for ox, sheep for sheep (§ 263). He had to see that the flock did not waste or prove unprofitable, or else make good the deficiency (§ 264). Wilful embezzlement was to be repaid tenfold (§ 265). Loss by the hand of God or wild beasts was the owner's loss (§ 266). But carelessness was to be made good (§ 267). When the sheep were taken out or brought home, they had to traverse the meadows, and must be kept from eating the growing crops. To let his flock eat the corn in a field without consent of the owner of the field, was punished by a fine of twenty GUR of corn per GAN. This was when the crop was green and the owner might expect the corn to recover and bear a crop (§ 57). It was worse if the crop was nearly ripe and the sheep had already reached the common fold within the city, where they were fed on corn by the shepherd. If he then allowed them to stray in a standing field of corn, he had to take entire responsibility for the field, and make what he could of it, but had to pay sixty GUR of corn per GAN (§ 58).

viii. SHIPPING, AND TRADE AND COMMERCE.—1. The shipping trade was considerable. We are not altogether in a position to say what the ships were like at this time, but freight boats of sixty GUR capacity were common, and one of seventy-five GUR is named (King, *Letters*, iii. p. 67). On the canals, at least, they seem to have been propelled with poles, which were also used to fasten them. They were numerous; as many as twenty-five together were anchored at the quay of Sanaš, in Sippara, at one time (§ 160). At all times there is evidence of considerable activity in commerce and fishing along these waterways. (For later times, see Meissner and Knudtzon, *Vienna Oriental Journal*, iv. p. 129 f.; Pinches, *Sir H. Peck's Tablets*, p. 82 f.). The temple ships are named in § 8. The same word was used for boatbuilder and boatman. If he had completed (literally 'caulked,' 'closed') a ship of sixty GUR for a man, he was entitled to two shekels of silver as a fee; the owner probably found the materials (§ 234). He had to give a year's guarantee with it, replacing it with a sound ship if it showed faults within that time (§ 235). The boatman who navigated the ship was paid six GUR of corn per year (§ 239). The hired boatman was responsible for the care of the ship, restoring ship for ship if lost (§ 236); also for the cargo, if lost by his carelessness (§ 237). But if he refloated a ship he had sunk, and it was sound, he only paid half value (§ 238). A ship which ran down another at anchor was held responsible for the damage (§ 240). The hire of a passenger or fast boat was two and a half ŠE of silver per day (§ 276), that of a freight ship of sixty GUR, a sixth of a shekel of silver per day (§ 277), twelve times as much.

EXTRA VOL.—38

2. A great deal of business was done by ship, or caravan, with foreign countries. The Code contemplates captives in war carried away from Babylonia being bought abroad by slave-dealers and brought back (§§ 132, 280, 281). Slaves might be sold and transported abroad by merchants (§ 118). We read of a free man who had been sold as a slave to Dupliaš, perhaps for debt (B² 419). The Code legislates for the case of consignments of gold, silver, jewels, or portable treasures sent by a man resident abroad. The carrier was bound to deliver, or pay fivefold (§ 112). In this period Carchemish wares were already to be found in Babylonian homes (B¹ 19).

Business was done on the *Commenda* system, as later in Islam. The principal, called 'merchant' in the Code, entrusted money or goods to his agent, who gave a receipt for them, and went off to seek a market. On his return he had to repay his commission and give a fair profit, or share with his principal. This profit was agreed on as a matter of free contract. If he was unlucky in his transactions, he yet had to pay cent. per cent. as profit (§ 101). But the merchant might merely speculate and not bargain for profit on a fixed scale. The agent must at least return the capital (§ 102). The trader has his risks. In the Tel el-Amarna period we find the king complaining of caravans being robbed (*KIB* v. p. 25). The Code contemplates this, and allows the agent to clear his liability by oath that the enemy robbed him (§ 103). All was to be done by written contract (§ 104); money or goods not sealed for could not be claimed in the reckoning (§ 105). Disputes were punished. False claims on the part of the agent were to be repaid threefold, on the part of the principal sixfold (§§ 106, 107). The contemporary documents abound with cases of partnership. The usual method was for each partner to take back his capital and interest, and then the partners divided the profit equally. The common stock was divided into two classes—property 'in town' and property 'on the road.' The reckoning was made yearly, unless the absent agent was detained beyond the year. It took the form of a dissolution of partnership; all the common stock was inventoried and a settlement made, usually in the temple, upon oath, and each party entered into compact not to dispute the settlement. The partnership might then be renewed.

Warehousing and deposit were frequently resorted to. It had to be a matter of written contract, the goods being deposited before witnesses, otherwise no claim for return could be made. The warehouseman took all responsibility. If he denied the deposit, he had to repay double (§§ 122-125). The storage of corn is specially dealt with; the warehouseman took all responsibility, even for loss by theft from his store. If he falsified his liability, he had to pay double (§ 120). He charged a fee of one-sixtieth per year (§ 121). It was common to hire a granary. The granary was protected from a distraint (§ 113). False claims on a warehouseman had to be repaid twofold (§ 126). We have noted the shipping business and the beer-shop above.

3. There is much said of interest on money. We miss any regulation in the Code on the point, save that interest had to be returned with borrowed money (§§ 49, 50, 100, X). It was usually about 40 per cent. or 33½ per cent. on corn loans. In the lapse of time it grew less—25 per cent. in Assyria, 20 per cent. in the Second Babylonian Empire. But there was never any fixed rate, it was matter of free contract. Loans of corn at seedtime are very frequent; a poor man was then often without corn. They were usually repaid at harvest without interest; but interest was set down to be paid if

the loan was kept longer. Loans were also frequent at harvest time to pay the harvesters. With pledges of crops we have already dealt under 'Agriculture.' A debtor could pay in corn, or sesame, according to the royal standard exchange value (§§ 51, 111). At harvest time, when corn was dearest and drink most needed, the beer-seller sold cheap (§ 108), otherwise she might not make drink cheaper than corn. The creditor could not refuse to take goods in liquidation of a debt (§ 88). Debt might be discharged by a written order to a third party to pay (B² 315).

4. Debt might lead to distraint. The debtor could 'name' a surety or *mancipium*, who had to enter the creditor's house and there work off the debt. But the hostage was protected from blows or starvation; he was still the debtor's property, and the creditor must restore him, if a free man, wife, or child, of debtor, at the end of three years (§§ 115-117). A hostage slave might be sold if the creditor wished to leave the city (§ 118). But if the slave was a maid who had borne her master children, he was bound to redeem her (§ 119). As a creditor was bound to accept goods in payment, it is clear these distraints were a last resource. They could not be made on the creditor's own responsibility. If he distrains upon the debtor's corn without the debtor's consent, he has to pay back what he takes and lose all claim for his debt (§ 113). If he distrains without having a debt owing him, he pays a fine of one-third of a mina (§ 114). He might not distrain a working ox (§ 241), under the same penalty. In fact, 'self-help' is forbidden; the debtor must name 'his' hostage.

The hostage was an antichretic pledge. We find many examples of this in later times. Land and crops might be pledged, as above. Goods were also pledged, or assigned in lieu of debt. As a summary proceeding we may note that, if a man incurred a public debt and could not pay, he was sold with all his goods, and the claimants shared the proceeds (§ 54).

5. The Code does not deal with sale, which was a matter of free contract, except to forbid the sale of benefices (§ 35), or to allow sale of estate subject to territorial liability. Sales of all sorts of property, especially estate, are very common in contemporary documents. The prices varied, of course, according to circumstances, and there is nothing remarkable about them, as a rule. But the transfer of ownership appears to have been made by the handing over of a stake or rod. There were certain rights of pre-emption or redemption on the part of the seller's family. They could even buy back sold property. In Assyrian times the district governors, city magistrates, captains of the seller's 'hundred,' creditors with a mortgage on the property, had similar rights. The sale is always professedly made outright. No credit was given. The buyer might, however, borrow money to pay, even of the seller, and execute a bond for the debt, or pledge the property back to the seller for it. Slave sales are especially frequent. The buyer could, however, return his purchase, if disease showed itself in a month (later, 100 days), and female slaves were often bought on trial for one to three days. An undisclosed defect in the slave, or a claim upon him for State service not discharged, might be grounds for demanding back his price at any time (§§ 278, 279). The seller usually gave a guarantee against these contingencies, as also against vices, like a tendency to run away. In the case of other purchases, such as houses, stipulations were made that all was in good order, the door and the lock sound, beams and sills in position, etc., and all breaches made good.

Exchanges were often made, and the balance of

value, if any, paid in money. These were free contracts. The Code refers to the practice (§ 41).

6. Hire is frequent. We have noticed estates and workmen. Houses were often hired. The term was generally for one year, but eight and even ten years are named. The usual stipulations as to sound condition are made. Further, the tenant binds himself to leave the house in good repair, and to vacate it at the end of the lease. Rent, of course, varies much. It is reckoned by the area occupied by the house, from one-third to two shekels per *SAR*. A *SAR* of house costs two shekels to build (§ 228). Rent was usually paid in advance, half-yearly. The lost part of the Code dealt with house leases, ordering that if a landlord turned out his tenant before the lease was out he should compensate him; but we do not know to what extent (§ Y). Many other buildings are named as hired, especially granaries.

ix. *THE TEMPLE*.—It is curious that the Code has so little to say of the temple. It was a very powerful factor in the life of the period. It possessed large estates, from which a constant revenue was derived. These were mostly endowments given by former kings, estates held on payment of certain dues. The temples and the administration of their revenues, herds and flocks, were a source of constant care to the king. Hammurabi's letters abound with references to them. There is no need to suppose that he derived any direct benefit from them. He had his own vast estates and property as well. The temples maintained a very large number of persons, wholly or in part. Many folk had the right of so many days' service there and the accruing profits. One of the most curious sorts of property consisted in these rights to so many days a year in a temple. The rights were hereditary, and could not be alienated; but were freely bought and sold, or pledged, subject to the reversions. The Code protects temple property (§§ 6, 8), putting it on a level with that of the 'palace.' The temple had its duties. It was bound to ransom its townsman, when captured in war (§ 32). To it men often went for loans, though at Hammurabi's time most of the money-lending was in the hands of so-called 'merchants.' These seem usually to have been foreigners. Later, most of the money-lending, at any rate when without interest, was done by the temple.

x. *JUSTICE*.—1. The temple was also the chief scene of justice. Here men went to take their oath, at the gate of the temple or before the censer. The object in dispute was taken there and resigned into the hands of the god, who was held to do judgment and restore it to the rightful owner. The judges were not necessarily priests, nor were they necessarily scribes. But the body of 'ancients,' who usually served as witnesses, and also assessors to the judge, were usually found there. Very little is expressly stated as to the procedure in the law courts. But we know that the pleas were conducted by the parties in person. They had to be put in writing. The judge 'saw' them, and, if there was a case, fixed a day for hearing. Then the parties had to bring their witnesses. The judge gave his decision, and it was embodied in an agreement to which both parties consented and swore to observe. This document was drawn up by the scribe and sealed by judge, witnesses, and parties concerned. It seems that in cases concerning money or goods a single judge might sit; the heavier cases were taken before a bench of judges. The first five sections of the Code deal with the process. The first two sections are peculiarly difficult. It seems that a man might accuse another of plotting his death, perhaps by magic spells; if he could prove this, the offender was put to death (§ 1).

But the sense of several words is doubtful, and we do not know either the nature of the spell, or the kind of evidence required. In the second case, the plaintiff appears to demand the ordeal from the defendant, throwing on him the burden of proof that he is not a wizard. The ordeal by water, in other cases known to us, demanded that the guilty should swim and the innocent sink, but be saved in time. This may be the meaning here also. In either case the guilty one was put to death, and his opponent took his estates. In the next two sections we have false witness dealt with. If it endangered the life of the accused, the penalty was death (§ 3). If it involved corn or money, the false witness had to bear the same injury as he sought to bring on the accused (§ 4). By 'slander' in the first case may be meant 'treason,' or such offence against the State as was capital. At any rate, it is the 'crime alleged.'

2. The judge is not very often named in the Code. If he had given a judgment and completed the business, it was irrevocable by him. He could not retry the case. Appeal to a higher court was allowed. If he retried the case, or altered his judgment, he was deposed from office, and had to repay twelvefold what he had given as the penalty of the case (§ 5). He had to examine into the depositions (§ 9), fix a time, within six months, for production of witnesses (§ 13), be present at the execution of sentences (§ 127), reconcile father and son (§ 168), inventory the property of a widow's children on her remarriage (§ 174), decide family quarrels (§ 172). But his presence and decision are elsewhere implied, and, from the numerous legal decisions preserved to us, we conclude that he was constantly employed.

He had a local jurisdiction. Suitors might be referred from one court to another, or summoned to a higher court. He was a professional man, keeping his title even when not acting in a judicial capacity. Most higher officials of the State act as judges on occasion, and cases were often referred on appeal to the king. No priest ever appears as holding the office; but that may be because 'judge' was the higher title. We often find several judges together on the bench, and the highest official in rank doubtless was 'chief judge' on that occasion. But there was an office of Chief Justice. There is no evidence that the judge had any fee. The king's judges are referred to, but it is not certain that the king appointed all. Certainly, the office was hereditary in some cases.

3. Witnesses played an important part in the law courts. The term applied to them, *šibu*, really means 'grey-headed,' and they were probably, therefore, the elders of the city. As such, they were expected to know the rights of the case as well as its facts. But the term gradually extended its area. Those who know (*mādu*) were not necessarily old, and they are called *šibi* (§ 9). We may distinguish three classes of witnesses who all bear the same name: (i.) the 'elders,' who appear as assessors with the judge, and form a sort of jury; (ii.) the 'deponents' in a court, who were put on oath, and whose false evidence is penalized (§§ 1-4); (iii.) the attesting witnesses to a document. In the case of legal decisions these included the whole of (i.), but also interested persons; in ordinary contracts, relatives of the principal parties, neighbours whose estates adjoined, and often persons who seem to have been regularly available at the court. In later times this class were called the *mukinnē*, or 'confirmers.' The parties, especially the plaintiff, were often called upon to 'justify' their plea. This was done by witness. Cases had to be adjourned for the production of witnesses (§ 13). Purchase from a minor (§ 7), deposit (§ 122), and even sale (§ 9), were invalid without witnesses.

4. The plaintiff pleaded his own case. There were no professional advocates. As a rule, in disputes the parties agreed to submit the case to judges, and together 'captured' a judge, who gave them a decision. They mutually swore not to reopen the case. Many cases were, so to speak, settled out of court. The parties mutually agreed, got an agreement drawn up by a scribe, and swore to observe it. There is no mention of a judge in such cases, but the oath was taken in the temple.

5. The death penalty may be regarded as simple or specific. In most cases it is enacted in the words 'he shall be killed' (*iddak*). In these cases we are quite in the dark as to how it was inflicted, or what was its nature. It may be noted that the penalty is permissive, not imperative. The verb is imperfect, the 'shall' of the version is future. That this was the case, is seen by the fact that a clause was introduced in one case allowing the husband to pardon his wife and the king to relieve his servant (§ 129). In another case death is only in default of multiple restitution (§ 8). We read of other cases where the plaintiff accepted a composition. In fact, the Code marks the transition from the period when blood-revenge ruled. There is no trace of this left. The Code, however, does not refer to deliberate murder at all. Whether, in that case, the avenger's right was too strong to be denied, or whether the law of retaliation was too well known, we cannot say. The Code does not regard the crime as one against the State, but against the individual, and he or his representatives plead for revenge rather than punishment. The Code, however, regulates this and assigns its bounds.

The unspecified death penalty is enacted against a man who alleges witchcraft, and so puts another in danger of death (§ 1) without justification: for endangering life by false witness in a capital suit (§ 3); for entry and theft from mansion or temple (§ 6); for kidnapping a free-born child (§ 14); for housebreaking (§ 21); for highway robbery (§ 22); for rape of a betrothed maiden living at home (§ 130); for building a house so badly as to bring about the death of its owner (§ 229); for striking a gentlewoman with child and causing her death (§ 209); certain forms of theft, taking on deposit or buying from a domestic inferior, without power of attorney on his part, or in secret (§ 7); receiving stolen goods (§ 6); appropriation of things found (§ 9); selling same (§ 10); vexatious claim of property (§ 11); procuring flight of slave (§ 15); harbouring fugitive slave (§ 16) or fugitive militiaman (§ 16); holding captured slave (§ 19); getting slave's brand erased (§ 227); neglect of duty on part of privileged classes, as a beer-seller who did not procure arrest of seditious brawlers (§ 109); evasion of service or substitution of hireling on part of levy-master or catchpole (§ 26),—were all punished in this way.

Death with specified accessories, or manner, is enacted thus: *burning*—for theft at a conflagration (§ 25); for votary, opening or entering beer-shop for drink (§ 110); for incest with mother (§ 157; cf. Gn 38³⁴, Lv 20¹⁴ 21⁹, Jos 7¹⁵); *drowning*—for selling beer too cheap (§ 109); adultery (§ 129); being a bad wife (§ 143); incest with daughter-in-law (§ 155); deserting husband's house in his enforced absence, if provided with maintenance (§ 133); *impalement*—for procuring husband's death (§ 153, cf. Est 7⁹); *dismemberment*—for fraud uncompensated under the *metayer* system (§ 256). These special forms either make the punishment peculiarly appropriate to the deed, or perhaps embody ancient custom. The penalty in § 21 may perhaps imply that a man who tunneled through the wall (built of sun-dried bricks) into

his neighbour's house might be killed 'on the spot,' and buried in the tunnel he had made; or it may mean that he could be buried in the opening from which his tunnel started, in his own house, assuming him to be a neighbour, and so desecrate that house for ever. In the case of an adulterous pair, the Code enacts that they shall be 'bound' (together?) and drowned (§ 129). A man who committed incest with his daughter-in-law was to be 'bound,' and she was to be drowned (§ 155). Some think there is an error in the text, but it is possible that 'bound' really means 'strangled.' It is very unlikely that the man would be only 'bound.' The ordeal by water, to which a man accused of witchcraft, or a woman suspected by her husband of infidelity, had to submit, was likely to end in death (§§ 2, 132).

The working of § 2, which describes the ordeal, has been misunderstood. It is well known that a wizard or witch ought to float. The Code shows that if the river 'conquers' him he is guilty; while, if he is saved, he is innocent. It is difficult to see how 'conquering' can mean 'rejecting.' Hence this ordeal is not in harmony with the ordinary ideas of witchcraft.

Mutilation as a penalty comes into the Code in two ways. First, as a mere retaliation for a mutilation. Eye for eye (§ 196), tooth for tooth (§ 198), limb for limb (§ 197), are examples. Second, the mutilation is the punishment of the offending member. A surgeon who, through want of skill or care, causes the death of a patient under operation, has his hands cut off (§ 218). So has a brander who erases a slave's brand (§ 226), or a son who strikes his father (§ 195). A wet-nurse, for substituting a changeling for the child committed to her charge, has her breasts cut off (§ 194). An ungrateful adopted son, who spies out the disgraceful origin of his existence, has his eye torn out (§ 193). A slave who repudiates his master's authority, or smites a gentleman on the cheek, has his ear—the organ of hearing and understanding, therefore of obedience—cut off (§§ 282, 205). An adopted child who used his tongue to repudiate his adoptive parents, had it cut out (§ 192). A man who used his hands to steal instead of to work, had them cut off (§ 253).

Scourging is only once named—sixty strokes with a cow-hide whip, laid on in the assembly, for smiting the cheek of a superior (§ 202). Branding on the forehead was the punishment for slander of a votary or married woman (§ 127). It is disputed whether this may not mean cutting off the forelock, as the mark of a freeman. But it is expressed by the same verb as is used to denote the putting of a slave mark on a presumptuous slave girl (§ 146). This mark was usually on the arm, and was visible (B² 419), and it could be eradicated by a brander. In later times we know that slaves had their owner's name on their arms. This points to a tattoo. The sentence was, evidently, equivalent to degradation to slavery. The levy-masters claimed all slaves who were not owned privately (B² 419). Hence the sentence meant 'hard labour for life.' These slaves were clothed and fed at the public expense, but had no wages.

Banishment from the city was the penalty of incest with a daughter (§ 154). Disinheritance was rather a family affair than a punishment. Confiscation does not occur. When a man takes the house of one who has bewitched him or falsely accuses him of witchcraft (§ 2), he is merely compensated for vexatious disturbance. Failure to attend to a holding, benefice of an office, led to forfeiture of office and the benefice (§ 30). Certain unrighteous actions led to forfeiture: thus, if a man bought part of a benefice from an official, he had to return his purchase and forfeit the price

(§ 37). The same penalty fell upon one who bought the property of wards in chancery (§ 177). If a man exchanged with an official part of his benefice, he had to restore it and lose his exchanged property (§ 41). If he lent corn and helped himself to his debtor's crop without the debtor's consent, he had to restore what he took, and lost all claim to repayment (§ 113).

Simple restitution occurs only when the holder came by the property innocently, as having bought property which the seller had no right to sell (§ 9). This is compensated for by the seller also returning the price.

Multiple restoration is very common. Fraudulent claim is punished by paying double. A warehouseman who falsifies the amount entrusted to him (§ 120), a receiver of deposit who denies it (§ 124), a man who takes presents from a suitor for his daughter and does not allow him to marry her (§§ 160, 161), pays double. The agent who did not succeed in business repaid the capital double (§ 101). If he cheated his principal, he paid threefold (§ 106); if the principal cheated his agent, he paid sixfold (§ 107). An innocent purchaser of goods illegally sold, having to give them up, could extract fivefold from the estate of the seller, if deceased (§ 12). A carrier who misappropriated goods entrusted to him to forward paid fivefold (§ 112). A judge who altered his judgment paid twelvefold what his sentence awarded (§ 5). A gentleman who stole from temple or mansion had to pay thirtyfold, a plebeian tenfold, or be put to death (§ 8).

Some of the penalties for breach of contract in agricultural matters have been misunderstood. They depend upon an estimate of average yield. The errors are due to misunderstanding of the scale of measures of area. G. Reisner long ago showed (*Sitzungsberichte der Berlin Akademie*, 1896, p. 417 f.) that the *GAN* contained 1800 *SAR*, the *SAR* had 60 *GIN*. Further, the *SAR* was equivalent in area to a square, each side being one *GAR-DU*, while the *GAR* was 12 *U* long. Taking the *U* to be a cubit, this gives the *SAR* to be about 18 feet square. The area of a house was usually about 1 *SAR* (§ 228), and we find even as little as $\frac{1}{3}$ rd *SAR* in contemporary documents. Now, the average rent of corn land was 6 to 8 *GUR* per *GAN*; of freshly opened land about 18 *GUR* per *GAN*. The penalty in § 44 would be not heavy at 10 *GUR* per *GAN*. Kohler, Müller, Peiser, Winckler, Boscawen, and Pinches follow Scheil in making the penalty 10 *GUR* per 10 *GAN*, or 1 *GUR* per *GAN*—an absurdly small amount. Besides, if that was meant, why did not the scribe write '1 *GUR* per *GAN*'? So (in §§ 56, 57, 58, 63) they all make the penalty $\frac{1}{15}$ th of the right amount. Further, in estimating other fines or wages it is well to remember that the *GUR* contained 300 *KA*, the *KA* had 60 *GIN*, and the *GIN* 180 *SE*. This *SE* must not be confounded with the *SE* of silver, of which 180 also went to the *GIN* or shekel, and 60 shekels to the mina. The *GUR* of corn was, from the time of Manishtusu down to the 5th cent. B.C., reckoned as worth 1 shekel of silver. Of course the price of corn varied in times of scarcity or plenty, and even during the year.

We are nowhere told how the sentence of the law was executed. Perhaps the judge and the elders carried it out; perhaps the whole adult population had a hand in it. At any rate, the deposition of a judge and the scourging of one who assaulted his superior in rank were carried out 'in the assembly' (*ina puhri*; §§ 5, 202). In contemporary documents the judges are said to 'assemble' the city (*daiane alum iphur*; B 74). The beer-seller was supposed to be able to hale brawlers and seditious persons to the palace

(§ 109). The highway robber might be arrested (§ 22). These references suppose a sort of police, perhaps the *bā'iru* above.

6. We may now turn to the crimes or misdemeanours considered in the Code. Theft was held to be the unlawful possession of property. The worst kind was that which involved entry—it may be styled burglary. There is no need to suppose that sacrilege was involved, for it was hardly less sacrilegious to steal the property of a temple from the open field (§ 6). Receiving was as bad as stealing (§ 6). The 'goods' referred to are any portable furniture, and are not confined to 'treasure.' Theft in the open is less guilty as less deliberate (§ 8). A minor, or a slave, had of course great opportunity to steal. To assist by buying of such, or receiving from such, was very heinous (§ 7). But such were often empowered by deed to act for the householder; the Code insists on such power being duly witnessed. If a man found property anywhere, he took possession of it at great peril. If the loser recognized it in his possession, he might be condemned as a thief (§ 9). He could not sell it; if that were proved against him, he would have to restore the price and suffer as a thief. The only thing to do was to make known his discovery as widely as possible, and restore it to its owner. If he did this with a runaway slave whom he caught in the open field, he was entitled to a reward of about one-tenth of the restored property (§ 17). In this he would be guided by the slave's brand, and the slave himself might name his master. If not, he must take the slave to the palace, there to be examined, and so restored to his owner. To harbour a runaway or keep a recaptured fugitive for his own service, was treated as theft (§§ 16, 19). Kidnaping, or inducing a slave to leave his master's service, was theft (§§ 14, 15). Theft at a fire was peculiarly heinous as a breach of good faith (§ 25). Brigandage, or highway robbery, was a capital offence (§ 22).

Some offences against property were assessed at a fair value, and simple or multiple restitution enacted (§§ 57-59). Minor thefts were fined (§§ 259, 260).

It is evident that offences against the rights of property were most severely repressed, perhaps on account of their frequency; cf. Gn 31³² 44⁹.

Offences against the person were graded, according to the rank of the injured person relatively to the offender. Murder is not expressly dealt with; but that the penalty was death, may be assumed from the treatment of manslaughter in a quarrel (§ 206 f.). Here, if there was no malice, a payment of the doctor covered any wound, and death resulting involved a fine only. If a pregnant woman was struck and abortion caused, the child's life was estimated at a fine on a graduated scale. If the woman died, the compensation was also graduated according to the woman's rank (§§ 209-214). A rash or careless operation was penalized according to the rank of the sufferer (§§ 218-220).

Assaults are treated much the same way. To strike a parent was very heinous (§ 195). Injuries by one gentleman to another were punished by retaliation (§§ 196, 197),—to a poor man by fines (§§ 198-201), to a slave by lower fines (§ 199). To strike a superior on the cheek involved scourging (§ 202); an equal, a fine (§§ 203, 204). A slave who struck a superior on the cheek was mutilated (§ 205).

Offences against morality were mostly capital: adultery (§ 129); rape of a daughter-in-law (§ 130); bad conduct on a wife's part (§ 143); procuring a husband's death (§ 153); incest (§§ 154-158). However, seduction of a betrothed virgin involved only a fine (§ 155), and incest with a mother-in-law, outlawry (§ 158).

Desertion of a wife dissolved marriage (§ 136); persistent worthlessness of a wife justified divorce (§ 141); mutual aversion also (§ 142). Persistent unfilial conduct justified disinheritance (§ 169). Ingratitude on the part of adopted sons was punished according to the status of the son, apart from his adoption (§§ 192, 193). Presumption on the part of a maid against her mistress earned degradation to slavery (§ 146). A maid was not necessarily a slave.

The principle of retaliation was extended to the intention of a crime. To put a man in danger of a damage was punished by the infliction of that damage on the offender. This elucidates several points. To accuse a man wrongfully of witchcraft (black magic?) put the accused in danger of death, for it was punished by death (§ 1). Similarly, to accuse a man of magical arts subjected him to the risk of death (§ 2), and, if not proved by the result of ordeal, was punished by death. It is clear that the Code did not mean to let a witch live.

False witness was brought under this principle. If it imperilled life, it was punished by death (§ 3); if it endangered property, it was punished by equivalent loss (§ 4). False claim to property, involving peril of life to accused, was capital (§ 5).

Slander against a respectable woman (§ 127) was punished by degradation to slavery. Overreaching (§ 126), unjustifiable distraint (§§ 114, 241), fraudulent claim, undisclosed defects of sale (§ 278), were fined. 'Self-help' was forbidden, even when most reasonable (§§ 49, 113).

Breach of contract had to be made good (§§ 42, 43, 62, 65, 125), and was further often penalized (§§ 44, 124). Evasion or falsification was strictly forbidden (§ 52). Denial of deposit (§ 124); substitution of a changeling (§ 194); breach of trust (§§ 253-256); neglect of entrusted flocks or herds (§§ 263-267); bad workmanship in building a house or ship (§§ 229, 235); neglect of hired animals (§ 45 ff.),—were all penalized.

Neglect of duty was severely punished, due regard being had to the degree of responsibility of the offender. Levy-masters, constables, beer-sellers, governors, magistrates, were severely punished for breach of duty. Riparian owners were held responsible for repairs to canals and for all damage due to neglect. Neglect of reasonable precautions was penalized (§§ 251, 252).

Oppression, bribery, misappropriation of public property, were capital offences in governors and magistrates (§§ 33, 34). Cruelty to or neglect of a hostage for debt was punished (§ 116).

All disputed cases were left at the decision of the king, or decided according to statutory tariffs (§ 51). All contracts were to be duly drawn up and attested, or were invalid (§§ 105, 122).

Extenuating circumstances were admitted in some cases. A woman left without provision by her husband might remarry (§ 134). A man who could not hold the slave he had caught was free (§ 20). Desertion excused bigamy (§ 136). Bearing children to her master, so far excused a maid's insolence to her mistress that she could not be sold as a slave (§ 146). Refloating a ship partly excused sinking it (§ 238). Deception excused a brander's illegally rebranding a slave (§ 227).

Accident, the stroke of God, a thunderstorm, the attack of wild beasts, robbery by the enemy (§§ 45, 48, 103, 244, 249, 266), relieved a man of responsibility for damage to trust, or debt. A sudden charge on the part of an ox did not involve his owner (§ 250). The natural death in a creditor's employ of a hostage for debt did not render the creditor liable (§ 115). But a depositary was liable for damage done to goods deposited with him, even if he could not help it, because he was under contract, and charged a fee for safe keeping

(§§ 120, 125). Want of malice excused manslaughter, partly (§ 207).

Suspicion of evil was not enough. The Code continually insists that the criminal must be caught in the act. If accused of harbouring a slave, the slave must be seized in his possession (§ 19). The adulterer, ravisher, etc. (§§ 129, 130, 131), must be caught in the act.

An injured party could condone the offence in some cases. A man might save the life of an adulterous wife (§ 129).

xi. *MARRIAGE, AND FAMILY LIFE.* — 1. The laws dealing with the family are very numerous. For the most part, the Code keeps them together. The foundation of the family is marriage. This was a contract, first on the part of the parents of the man and wife who seem to have arranged marriages quite young. The Code, however, treats the man as a free suitor; he comes himself to the house of the bride's father and brings him presents. The maid does not seem to be free. Her father gives her in marriage, accepts or rejects the suitor. Women who had been married, or were seduced, were free to marry the man of their choice (§§ 137, 156, 172).

Besides the presents, the suitor gave a bride-price (*terhatu*) to the father of the bride (*marhitu*). This was usually a mina of silver (§ 139), though we find much less in contemporary documents: one shekel, four, five, or ten shekels. These irregularities may be due to special circumstances; but even a princess, daughter of Anmiditana (B¹ 193), had only four shekels given for her. It might not be given at all. The father often gave this to the bride. If a suitor now retreated, he had to relinquish the presents and bride-price paid. If the father refused the girl to the suitor, he had to return double what he had received (§§ 159, 160). If the marriage was childless, the *terhatu* had to be returned to the husband on the wife's death, if it had not been returned before (§ 163; cf. Gn 24²² 29³⁴, 31¹⁵ 34¹², Ex 22¹⁶, Dt 22²³, 1 S 18²⁵).

The wife brought a dowry with her, the marriage portion (*šeriktu*), her share of her father's property. Though she brought this into her husband's house, it was tied to her for life. It had to be returned to her family, by her husband, if she died childless, but he might deduct the amount of the bride-price given by him, if this had not been paid back to him (§ 164). The *šeriktu* therefore was normally larger than the *terhatu*. We have several contemporary lists of these dowries. They included gold, silver, jewels, garments, household furniture, slaves even, if not also estates (B¹ 10, B¹ 33, B¹ 163). If her husband died before her, though his property might be divided up, she retained her *šeriktu* (§§ 171, 172); and, after her death, it fell to be divided among her children (§§ 162, 167, 173, 174). If she had no children, it went back to her father's house (§§ 163, 164). Even if she were divorced, she kept her *šeriktu* (§§ 137, 138, 142, 149). She of course forfeited it if she were an adulteress, or reduced to slavery for misconduct (§§ 141, 143; cf. Gn 16² 24⁵⁹, 61 29²⁴, 29, Jos 15¹⁸, Jg 14¹⁴).

If the marriage was dissolved without her fault, she took a child's share when her husband's property was divided. If she had children, the father had to allow her the usufruct of his estates till the children were grown up (§ 137). She was free to marry again when the children were grown up, and apparently not till her husband was dead. If she had no children when the marriage was dissolved, she got back her marriage portion and either her *terhatu*, or divorce price (*uzūbu*), of one mina, if her husband was a gentleman; or a third of a mina if he was a 'poor man' (§§ 138-140). When the husband died and she had a family, she

had a right to a son's share (§ 172), unless her husband had given her a settlement (*nudunnā*) by deed of gift in his lifetime. She might have power given her to leave this as she liked among her sons, but not outside her husband's children. Her family could not disturb her possession of these benefits as long as she lived and remained a widow; but, if she remarried, she gave them up to her family, to whom they came at her death (§ 172). She had a right to live in her husband's house, and the family could not turn her out.

The married pair formed a unit. Each was responsible for the debts of the other, even prenuptial debts. This shows that they were not always children when married, and that unmarried women could contract debt. The Code allowed a woman to get her husband to give her a bond that she should not be held responsible for his prenuptial debts, in which case his creditors could not touch her (§ 151). But it enacted that this should also exempt him from responsibility for her prenuptial debts. Further, it enacted that both together should be responsible for all debts contracted after marriage. This was a heavy responsibility for the wife. For she could be assigned by her husband to work off his debts as a *mancipium* (§ 117). Her contracting debt was one of the offences which might lead to divorce, or even death (§ 141 f.).

Marriage was a contract. There had to be a marriage deed drawn up, sealed, and witnessed. Without such *rikšati*, 'bonds' or 'marriage lines,' a woman was not a wife (§ 128). The marriage deed might contain some peculiar stipulations. Thus a man married a sister of his first wife, on condition that she was to be his wife, but wait on her sister, care for her, and carry her stool when she went to the temple of Marduk (B¹ 21, B² 2176 A). The children were to be reckoned children of the first wife, probably to inherit her property. Two contracts were drawn up—one between the husband and wife, one between the sisters. If the wife repudiated her husband, she was to be branded and sold as a slave. If the husband repudiated her, he was to pay her a mina of silver. In another case, a man marries a wife on condition that she treat his mother as mistress of the house, or be branded and sold for a slave. The mother then contracts to leave all her property to the pair, if they keep her as long as she lives (B² 707).

2. Divorce was allowed. The husband had it in his power to divorce his wife with the words, 'Thou art not my wife'; but he could not do so without a cause. He had to return what she brought with her, and either pay her a compensation or forfeit the bride-price he paid for her (§§ 137, 138; cf. Dt 24¹ 22¹⁵, 29, Hos 2¹, Mt 5³¹ 19⁷). She retained custody of the children until they were of age, and he had to make them and her an allowance. But, if the wife had so misconducted herself as to merit divorce, she lost her property, or the husband could degrade her to slavery. In the former case she was homeless, unless her family would take her back, and also penniless. In the latter case she had at least home, food, and clothing. If the wife sought the divorce herself, she could get it if she could prove cruelty (§ 142). She then took her marriage portion and went back to her family, but forfeited her bride-price. On the other hand, if in this case the fault was on her side, she lost her life (§ 143). The wife who was childless could not oppose her husband's taking a concubine, unless she chose to give him a maid to bear him children. If she was seized with incurable disease, her husband could not divorce her on that ground, but might marry again (§ 148). He was bound to let her stay in his house, and to maintain her as long as she lived (§ 148). But she was not bound to stay; she might

take back her marriage portion and go back to her father's house (§ 149). Desertion on the man's part dissolved marriage (§ 136); but mere absence did not, if the wife was provided for (§§ 133, 134). Otherwise, she might remarry to get maintenance, but she was then bound to return to her husband if he came back (§ 135).

3. It is clear that the Babylonian was a monogamist: he could have only one proper wife. But he could have a concubine, if his wife were childless (§ 145). The children by a concubine were legitimate, the concubine a real wife. He could not put her away except on the same terms as the first wife (§ 137).

4. It was not forbidden to votaries to marry (§§ 144-146). As the contemporary documents show, they frequently did so. But it was evidently contemplated that they would not have children.

5. Bars to marriage are enacted: when a comrade slanders a suitor so that he is rejected, he may not marry the girl himself (§ 137); when a widow has young children, she may not marry except by the judge's permission (§ 177). This was granted only when the first husband's goods had been inventoried, and given in trust for the children to the widow and her new husband.

6. Connexion with a maid was not marriage. But the children were free, and so was the maid at her master's death. He could acknowledge the children as his (§ 170); then they shared equally with the other children. A maid given by her mistress to her master to bear him children was still in the power of her mistress, who could degrade her to slavery again for insolence; but, if she had fulfilled her function, she could not be sold.

7. Special cases arose when a free woman married a slave. The wife kept her marriage portion, if any; and she, with her children, had a right to half what her husband left (§ 176).

8. A girl might be vowed to a temple. In this case she became the bride of a god, and, as such, might have a marriage portion given her. Of this she had the enjoyment for life. But her brothers had the reversion of it on her death. She could alienate nothing from it. If she did not receive this marriage portion from her father, she had the right to receive one-third of a son's share at his death (§§ 180-182). The votaries of Marduk had, further, the free disposal of their property at death, and exemption from duty (§ 182). The ladies might hand over their property at once to their brothers to administer and maintain them, or they could appoint a steward to do so.

Sons were also vowed to temples (B² 2183, 2480).

9. The father had power over his children. He could pledge or sell them for his debts (§ 119). He sought wives for his sons, and provided them with a proper bride-price. This was so important a duty, that, if he had not performed it for all his children before his death, the brethren at the division of the property, at his death, had to set aside a bride-price for the unmarried sons, and get them married. The father gave his daughters in marriage. After his death the mother took his place. She usually acted in concert with the grown-up children. In default of both parents, the elder brother acted.

Children were often hired out by their parents to work. It seems that, as long as a son lived in his father's house, the father had a right to his work or earnings.

Sonship could be dissolved; but only on grave grounds. The judge had to consent, and was bound to try to reconcile the father first. Only on a repetition of the offence was disinheritance allowed (§§ 168, 169).

10. Adoption was very common. An adopted son was as difficult to disinherit as a real son.

The adoption was usually made by contract; the father gave the son a 'deed of sonship' (*duppu aplûtišu*). This might lay down conditions. The most usual was that the adopted son should care for and maintain his adoptive father as long as he should live. Mothers often adopted daughters, to be cared for by them. The other members of the family were consenting parties. The arrangement disturbed their succession to their parents' property; but if married they might prefer, and even procure, this means of providing for old people.

Adoption could be rescinded for faults on either side. When an adopted child failed to keep his contract (§ 186), when the adopting parent did not treat the adopted child properly (§§ 189, 190), or when the adoptive parent chose to dissolve the contract (§ 191), it could be done. In the contracts, the right to break the bond was sometimes expressly reserved to both parties (B 27). Sometimes the right to dissolve the relation was reserved to the parents alone (B¹ 210). Sometimes it was laid down that, if they did that, they must give the child a son's share of the estate (B¹ 54).

In such cases we may regard the adopted child as a scion of a good family, whose real parents consented and saw after their child's interests. Such a consent was needed (§ 186). When a man adopted a foundling, or his own children by a maid, no one could make a stipulation (§§ 170, 185, 187). But, even when the real parents were alive, the adopted child might be severely punished for attempting to repudiate his adoptive parents. Usually he was to be made a slave, branded, and sold. The Code prescribes mutilation as punishment in specially ungrateful cases (§§ 192, 193). It is not unlikely that in these cases the real parents stipulated that they should not be known. We find that votaries often adopted daughters, and, whenever a child of a votary is named, this may be the explanation. Slaves were adopted (B¹ 322, V.A.Th. 847).

11. Sons inherited equally. Adopted sons were usually heirs to a residuary portion. A married and portioned daughter had no share. But if she was not portioned she had a share like a son (§ 180), but only a life interest in it. The brothers might give her a portion after her father's death (§ 184). When there were children of two mothers by the same father, they all shared equally in the father's property (§ 167); but each family shared only their own mother's portion.

On sharing, if there was an unmarried son, a bride-price had to be reserved for him over and above his share (§ 166). A girl's share was her *seriktu*, or marriage portion. If she had had that, she had no other share; if not, she had it now. A father's free gift to a favourite son did not come into the division, nor was his share less on that account (§ 165). Daughters, of course, inherited in default of sons. The widow took one son's share (§ 171) and her own property. The contemporary documents often show divisions of inheritance, or lawsuits about them.

II. THE CODE.

§ 1. If a man has accursed a man and laid (a charge of?) death [a deadly spell?] upon him and has not justified it, he that accused him shall * be put to death.

§ 2. If a man has laid (a charge of?) sorcery upon a man and has not justified it, he upon whom the sorcery is laid shall go to the holy river, he shall plunge into the holy river, and if the holy river overcome him, he who accused him shall take to himself his house. If the holy river has made out that man to be innocent and has saved him, he

* 'Shall' is future. In many cases it could be rendered 'may.' It fixes the extreme penalty.

who accused him shall be put to death. He who plunged into the holy river shall take to himself the house of him who wove the spell upon him. [Ex 22¹⁸, Dt 18¹⁰, Jer 27⁹].

§ 3. If a man in a case (pending judgment), as witness to slander has lied and has not justified the word that he has spoken, if that case be a capital suit, that man shall be put to death. [Dt 19^{16f.}].

§ 4. If as witness to corn or money he has lied, he shall himself bear the sentence of that case. [Ex 23⁸, Dt 16¹⁹].

§ 5. If a judge has judged a judgment, decided a decision, granted a sealed sentence, and afterwards has altered his judgment, they shall call that judge to account for the alteration of the judgment that he judged, and he shall pay twelvefold the penalty which was in the said judgment. Further, in the assembly they shall expel him from his judgment seat, and he shall not return and with the judges at a judgment he shall not take his seat.

§ 6. If a man has stolen the goods of temple or palace, that man shall be put to death. Further, he who has received the stolen thing from his hand shall be put to death. [Gn 31³², Jos 7¹⁴].

§ 7. If a man has bought silver, gold, manservant or maidservant, ox or sheep or ass or anything whatever its name, from the hand of a man's son, or of a man's slave, without witness or power of attorney, or has received the same on deposit, that man has acted the thief, he shall be put to death. [Gn 23¹⁰⁻¹⁸, Ru 4²⁴].

§ 8. If a man has stolen ox or sheep or ass or pig or ship, whether from the temple or the palace, he shall pay thirtyfold. If from a poor man, he shall render tenfold. If the thief has not wherewith to pay, he shall be put to death. [Gn 44⁹, Ex 21³⁷ 22¹¹⁻³, 2 S 12⁹].

§ 9. If a man who has lost something of his has seized something of his that was lost in the hand of a man, (while) the man in whose hand the lost thing has been seized has said, 'A giver gave it me,' or 'I bought it before witnesses'; and further, the owner of the thing that was lost has said, 'Verily, I will bring witnesses that know my lost property'; (if) the buyer has brought the giver who gave it him, or the witnesses before whom he bought it, and the owner of the lost property has brought the witnesses who know his lost property, the judge shall see their depositions, the witnesses before whom the purchase was made, and the witnesses knowing the lost property shall say out before God what they know; and if the giver has acted the thief he shall be put to death, the owner of the lost property shall take his lost property, the buyer shall take the money he paid from the house of the giver. ['to give' is often = 'to sell.']. [Ex 22⁷⁻⁹, Lv 6³].

§ 10. If the buyer has not brought the giver who gave it him or the witnesses before whom he bought, and the owner of the lost property has brought the witnesses knowing his lost property, the (professed) buyer has acted the thief, he shall be put to death. The owner of the lost property shall take his lost property.

§ 11. If the owner of the lost property has not brought witnesses knowing his lost property, he has slandered, he has stirred up strife, he shall be put to death. [Dt 19^{16f.}].

§ 12. If the seller has betaken himself to his fate (is dead), the buyer shall take from the house of the seller fivefold as the penalty of that case.

§ 13. If that man has not his witnesses near, the judge shall set him a fixed time, up to six months, and if within six months he has not brought in his witnesses, that man has slandered, he himself shall bear the penalty of that case.

§ 14. If a man has stolen the young son of a freeman, he shall be put to death. [Ex 21¹⁶, Dt 24⁷].

§ 15. If a man has caused either a palace slave or palace maid, or a slave of a poor man or a poor man's maid, to go out of the gate, he shall be put to death.

§ 16. If a man has harboured in his house a manservant or a maidservant, fugitive from the palace, or from a poor man, and has not produced them at the demand of the commandant, that householder shall be put to death. [Dt 23^{15f.}, 1 S 30¹⁵].

§ 17. If a man has captured either a manservant or a maidservant, a fugitive, in the open country and has driven him back to his master, the owner of the slave shall pay him two shekels of silver. [Gn 16⁷⁴, Dt 23¹⁶, 1 K 2³⁹].

§ 18. If that slave will not name his owner, he shall drive him to the palace, and one shall inquire into his past, and cause him to return to his owner.

§ 19. If he confine that slave in his house, and afterwards the slave has been seized in his hand, that man shall be put to death.

§ 20. If the slave has fled from the hand of his captor, that man shall swear by the name of God to the owner of the slave, and shall go free. [Ex 22¹⁻³, Jer 2³², Mt 6^{19f.}].

§ 21. If a man has broken into a house one shall kill him before the breach, and bury him in it (?).

§ 22. If a man has carried on brigandage and has been captured, that man shall be put to death.

§ 23. If the brigand has not been caught, the man who has been despoiled shall recount before God what he has lost, and the city and governor in whose land and district the brigandage took place shall render back to him whatever of his was lost. [Dt 21¹⁴].

§ 24. If it was life, the city and governor shall pay one mina of silver to his people. [Dt 21¹⁴].

§ 25. If in a man's house a fire has been kindled, and a man who has come to extinguish the fire has lifted up his eyes to the property of the owner of the house, and has taken the property of the owner of the house, that man shall be thrown into that fire.

§ 26. If either a ganger or a constable, whose going on an errand of the king has been ordered, has not gone, or has hired a hireling and sent him in place of himself, that ganger or constable shall be put to death, his hireling shall take to himself his house. ['ganger' = 'levy-master'].

§ 27. If a ganger or a constable has been assigned to the fortresses of the king, and after him one has given his field and his garden to another who has carried on his duty, if he has returned and regained his city, his field and his garden shall be returned to him, and he shall carry on his duty himself.

§ 28. If when a ganger or a constable has been assigned to the fortresses of the king, his son be able to carry on the duty, one shall give him field and garden, and he shall carry on his father's duty.

§ 29. If his son is young, and is not able to carry on his father's duty, one-third of the field and garden shall be given to his mother, and his mother shall bring him up.

§ 30. If a ganger or a constable has neglected his field, his garden, and his house, from the beginning of his duty, and has caused it to be waste, and another after him has taken his field, his garden, and his house, and has gone about his duty for three years, if he has returned and regained his city, and would cultivate his field, his garden, and his house, one shall not give them to him; he who has taken them and carried on his duty shall carry it on.

§ 31. If it is one year only and he had let it go

waste, and he has returned, one shall give him his field, his garden, and his house, and he himself shall carry on his duty.

§ 32. If a ganger or a constable has been assigned on an errand of the king's, and a merchant has ransomed him and caused him to regain his city, if in his house there is means for his ransom, he shall ransom himself; if in his house there is no means for his ransom, he shall be ransomed from the temple of his city; if in the temple of his city there is not means for his ransom, the palace shall ransom him. His field, his garden, and his house shall not be given for his ransom.

§ 33. If either a governor or a magistrate has taken to himself the men of the levy, or has accepted and sent on the king's errand a hired substitute, that governor or magistrate shall be put to death.

§ 34. If either a governor or a magistrate has taken to himself the property of a ganger, has plundered a ganger, has given a ganger on hire, has defrauded a ganger in a judgment by high-handedness, has taken to himself the gift the king has given the ganger, that governor or magistrate shall be put to death. [Lk 12²⁸].

§ 35. If a man has bought the cattle or sheep which the king has given to the ganger, at the hand of the ganger, he shall be deprived of his money.

§ 36. The field, garden, and house of a ganger, or constable, or a tributary, one shall not give for money.

§ 37. If a man has bought the field, garden, or house of a ganger, a constable, or a tributary, his tablet shall be broken, and he shall be deprived of his money. The field, garden, or house he shall return to its owner.

§ 38. The ganger, constable, or tributary shall not write off to his wife or his daughter, from the field, garden, or house of his benefice. Further, he shall not assign it for his debt.

§ 39. From the field, garden, and house which he has bought and acquired he may write off to his wife or his daughter, and give for his debt. [Ezk 46¹⁸].

§ 40. A votary, merchant, or foreign sojourner may sell his field, his garden, or his house; the buyer shall carry on the duty of the field, garden, or house which he has bought.

§ 41. If a man has bartered for the field, garden, or house of a ganger, constable, or tributary, and has given exchanges, the ganger, constable, or tributary shall return to his field, garden, or house, and further shall keep the exchanges given him.

§ 42. If a man has taken a field to cultivate and has not caused the corn to grow in the field and has not done the entrusted work on the field, they shall call him to account and he shall give a crop like its neighbour to the owner of the field.

§ 43. If he has not cultivated the field and has left it to itself, he shall give corn like its neighbour to the owner of the field. Further, the field he left he shall break up with hoes, and shall harrow it and return to the owner of the field.

§ 44. If a man has taken on hire an unreclaimed field for three years to open out, and has left it aside, has not opened the field, in the fourth year he shall break it up with hoes, he shall hoe it, and harrow it, and return to the owner of the field. Further, he shall measure out ten *GUR* of corn per *GAN*.

§ 45. If a man has given his field for produce to a cultivator, and has received the produce of his field, and afterwards a thunderstorm has ravaged the field or carried away the produce, the loss is the cultivator's.

§ 46. If he has not received the produce of his

field, or has given the field either for one-half or for one-third of the corn that is in the field, the cultivator and the owner of the field shall share according to the tenour of their contract. [Gn 47²⁴].

§ 47. If the cultivator, because in the former year he did not set up his dwelling, has assigned the field to cultivation, the owner of the field shall not interfere; he shall wait (?); his field has been cultivated, and at harvest time he shall take corn according to his bonds.

§ 48. If a man has a debt upon him and a thunderstorm ravaged his field or carried away the produce, or if the corn has not grown through lack of water, in that year he shall not return corn to the creditor, he shall alter (lit. moisten, so as to rewrite) his tablet. Further, he shall not give interest for that year.

§ 49. If a man has borrowed money from a merchant and has given to the merchant a field planted with corn or sesame, and said to him, 'Cultivate the field, reap and take for thyself the corn and sesame which there shall be,' if the cultivator has caused corn or sesame to grow in the field, at the time of harvest the owner of the field, forsooth, shall take the corn or sesame which is in the field, and shall give to the merchant corn for the money which he took from the merchant and for its interest and for the dwelling of the cultivator.

§ 50. If the field was cultivated or the field of sesame was cultivated when he gave it, the owner of the field, forsooth, shall take the corn or sesame which is in the field and shall return the money and its interest to the merchant.

§ 51. If he has not money to return, he shall give to the merchant the sesame, according to its market price, for the money and its interest which he took from the merchant, according to the standard fixed by the king.

§ 52. If the cultivator has not caused corn or sesame to grow in the field, his bonds shall not be altered.

§ 53. If a man has neglected to strengthen his bank of the canal, has not strengthened his bank, a breach has opened out itself in his bank, and the waters have carried away the meadow, the man in whose bank the breach has been opened shall render back the corn which he has caused to be lost.

§ 54. If he is not able to render back the corn, one shall give him and his goods for money, and the people of the meadow whose corn the water has carried away shall share it. [Ex 22³, Lv 25^{29f}].

§ 55. If a man has opened his runnel to water and has neglected it, and the waters have carried away the field of his neighbour, he shall pay corn like his neighbour.

§ 56. If a man has opened the waters, and the waters have carried away the plants of the field of his neighbour, he shall pay ten *GUR* of corn per *GAN*.

§ 57. If a shepherd has caused the sheep to feed on the green corn, has not come to an agreement with the owner of the field, without the consent of the owner of the field has made the sheep feed off the field, the owner shall reap his fields, the shepherd who without consent of the owner of the field has fed off the field with sheep shall give over and above twenty *GUR* of corn per *GAN* to the owner of the field. [Ex 22^{4f}].

§ 58. If from the time that the sheep have gone up from the meadow, and the whole flock has passed through the gate, the shepherd has laid his sheep on the field and has caused the sheep to feed off the field, the shepherd who has made them feed off the field shall keep it, and at harvest time he shall measure out sixty *GUR* of corn per *GAN* to the owner of the field.

§ 59. If a man without the consent of the owner of the orchard has cut down a tree in a man's orchard, he shall pay half a mina of silver. [2 K 3²⁵].

§ 60. If a man has given a field to a gardener to plant a garden, and the gardener has planted the garden, four years he shall rear the garden, in the fifth year the owner of the garden and the gardener shall share equally. The owner of the garden shall cut off his share and take it. [Lv 19²³⁻²⁵].

§ 61. If the gardener has not included all the field in the planting, has left a waste place, one shall set him the waste place in his share.

§ 62. If he has not planted the field which has been given him as a garden; if it was corn land, the gardener shall measure out to the owner of the field produce of the field, like its neighbour, for the years that are neglected. Further, he shall do the prescribed work on the field and return to the owner of the field.

§ 63. If the field was unreclaimed land, he shall do the prescribed work on the field and return it to the owner of the field. Further, he shall measure out ten *GUR* of corn per *GAN* for each year.

§ 64. If a man has given his garden to a gardener to farm, the gardener as long as he holds the garden shall give to the owner of the garden two-thirds from the produce of the garden, and he himself shall take one-third.

§ 65. If the gardener does not farm the garden and has diminished the yield, he shall measure out the yield of the garden like its neighbour.

Here five columns of the monument have been erased, only the commencing characters of column xvii. being visible. The subjects of this last part included the further enactments concerning the rights and duties of gardeners, the whole of the regulations concerning houses let to tenants, and the relationships of the merchant to his agents, which continue on the obverse of the monument. Scheil estimates the lost portion at 35 sections, and, following him, we recommence with—

§ 100. . . . the interests of the money, as much as he took, he shall write down, and when he has numbered his days he shall answer the merchant.

§ 101. If where he has gone he has not seen prosperity, the agent shall double the money he took and shall give to the merchant.

§ 102. If a merchant has given to the agent money as a favour, and where he has gone he has seen loss, the full amount of money he shall return to the merchant.

§ 103. If while he goes on his journey the enemy has made him quit whatever he was carrying, the agent shall swear by the name of God and shall go free.

§ 104. If the merchant has given to the agent corn, wool, oil, or any sort of goods, to traffic with, the agent shall write down the price and hand over to the merchant; the agent shall take a sealed memorandum of the price which he shall give to the merchant.

§ 105. If an agent has forgotten and has not taken a sealed memorandum of the money he has given to the merchant, money that is not sealed for he shall not put in his accounts.

§ 106. If an agent has taken money from a merchant, and has disputed with his merchant, that merchant shall put the agent to account before God and witnesses concerning the money taken, and the agent shall give to the merchant threefold the money he has taken.

§ 107. If a merchant has wronged an agent and the agent has returned to his merchant whatever the merchant gave him, but the merchant has disputed with the agent as to what the agent gave him, that agent shall put the merchant to account before God and witnesses, and the merchant be-

cause he disputed the agent shall give to the agent sixfold whatever he has taken.

§ 108. If a wine merchant has not received corn as the price of drink, has received silver by the great stone, further has made the price of drink less than the price of corn, that wine merchant one shall put to account and throw her into the water. [Jos 2⁴].

§ 109. If a wine merchant has collected a riotous assembly in her house, and has not seized those rioters and driven them to the palace, that wine merchant shall be put to death.

§ 110. If a votary, a lady, who is not living in the convent, has opened a wine-shop or has entered a wine-shop for drink, one shall burn that woman. [Gn 38²⁴, Lv 21⁹].

§ 111. If a wine merchant has given sixty *KA* of best beer at harvest time for thirst, she shall take fifty *KA* of corn.

§ 112. If a man stays away on a journey and has given silver, gold, precious stones, or portable treasures to a man, has caused him to take them for transport, and that man has not given whatever was given for transport, where he has transported it, but has taken it for himself, the owner of the transported object shall put that man to account concerning whatever he had to transport and gave not, and that man shall give to the owner of the transported object fivefold whatever was given him. [Ex 22⁷, Lv 6²⁻⁵].

§ 113. If a man has corn or money upon a man, and without consent of the owner of the corn has taken corn from the heap or from the store, one shall call that man to account for taking of the corn without consent of the owner of the corn from the heap or from the store, and he shall return the corn as much as he has taken. Further, he shall lose all that he gave whatever it be. [Dt 24¹⁸].

§ 114. If a man has not corn or money upon a man but levies a distraint, for every single distraint he shall pay one-third of a mina.

§ 115. If a man has corn or money upon a man and has levied a distraint, and the distress in the house of his distrainer dies a natural death, no case lies.

§ 116. If the distress has died in the house of his distrainer, of blows or of want, the owner of his distress shall put his merchant to account, and if he be the son of a freeman (that has died), one shall kill his son; if the slave of a freeman, he shall pay one-third of a mina of silver. Further, he shall lose all that he gave whatever it be. [Mt 18²⁸].

§ 117. If a debt has seized a man and he has given his wife, his son, or his daughter for the money, or has handed them over to work off the debt; for three years they shall work in the house of their buyer or exploiter, in the fourth year he shall set them at liberty. [Gn 31⁴¹ 47¹⁹, Ex 21²⁻⁷, Lv 25³⁹, Dt 15¹², 14¹⁸, 1 S 22², 2 K 4¹, Neh 5^{5f}, Is 16¹⁴ 21¹⁶ 50¹, Jer 34⁸, Am 2⁶, 8, Mt 5²⁵ 18²⁸, Lk 12⁵⁸].

§ 118. If he has handed over a manservant or a maidservant to work off a debt and the merchant shall go further and sell them for money, no one can object.

§ 119. If a debt has seized a man and he has handed over for the money a maidservant who has borne him children, the money the merchant paid him the owner of the maid shall repay, and he shall ransom his maid.

§ 120. If a man has heaped up his corn in a heap in the house of a man, and in the granary a disaster has taken place, or the owner of the house has opened the granary and taken the corn, or has disputed as to the total amount of the corn that was heaped up in his house, the owner of the corn shall

estimate his corn before God, the owner of the house shall double the corn which he took and shall give to the owner of the corn. [Ex 22⁵⁻¹¹].

§ 121. If a man has heaped up corn in the house of a man, he shall give as the price of storage five KA of corn per GUR of corn per year.

§ 122. If a man shall give silver, gold, or anything whatever to a man on deposit, all whatever he shall give he shall show to witnesses and fix bonds and shall give on deposit. [Ex 22⁷⁻¹¹].

§ 123. If without witness and bonds he has given on deposit, and where he has deposited they keep disputing him, no case lies.

§ 124. If a man has given silver, gold, or anything whatever to a man on deposit before witnesses and he has disputed with him, one shall call that man to account, and whatever he has disputed he shall make up and shall give double.

§ 125. If a man has given anything of his on deposit, and where he gave it, either by house-breaking or by rebellion, something of his has been lost, along with something of the owner of the house who has defaulted, all that was given him on deposit and he has lost he shall make good and render to the owner of the goods. The owner of the house shall seek out whatever of his is lost and take it from the thief. [Ex 22⁷].

§ 126. If a man has lost nothing of his, but has said that something of his is lost, has estimated his loss; since nothing of his is lost, his loss he shall estimate before God, and whatever he has claimed he shall double and shall give as his loss.

§ 127. If a man has caused the finger to be pointed against a votary or a man's wife and has not justified himself, that man they shall throw down before the judge and brand his forehead.

§ 128. If a man has married a wife and has not laid down her bonds, that woman is no wife.

§ 129. If the wife of a man has been caught in lying with another male, one shall bind (strangle?) them and throw them into the waters. If the owner of the wife would save his wife, the king may also save his servant. [Gn 38²⁴, Lv 20¹⁰, Dt 22²²⁻²⁷].

§ 130. If a man has forced the wife of a man who has not known the male and is dwelling in the house of her father, and has lain in her bosom and one has caught him, that man shall be put to death; the woman herself shall go free. [Ex 22¹⁶, Dt 22²³⁻²⁷].

§ 131. If the wife of a man has been accused by her husband, and she has not been caught in lying with another male, she shall swear by God and shall return to her house.

§ 132. If a wife of a man on account of another male has had the finger pointed at her and has not been caught in lying with another male, for her husband's sake she shall plunge into the holy river. [Nu 5^{22f.}].

§ 133. If a man has been taken captive and in his house there is maintenance, but his wife has gone out from her house and entered into the house of another; because that woman has not guarded her body and has entered into the house of another, one shall call that woman to account and throw her into the waters.

§ 134. If a man has been taken captive and in his house there is no maintenance, and his wife has entered into the house of another, that woman has no blame.

§ 135. If a man has been taken captive and in his house there is no maintenance before her, his wife has entered into the house of another and has borne children, afterwards her husband has returned and regained his city, that woman shall return to her bridegroom. The children shall go after their father.

§ 136. If a man has left his city and fled, and

after his departure his wife has entered the house of another, if that man shall return and seize his wife; because he hated his city and fled, the wife of the truant shall not return to her husband.

§ 137. If a man has set his face to put away his concubine who has borne him children or his wife who has granted him children, to that woman he shall return her marriage portion. Further, he shall give her the usufruct of field, garden, and goods, and she shall bring up her children. From the time that her children are grown up, from whatever is given to her children, they shall give her a share like that of one son and she shall marry the husband of her choice.

§ 138. If a man has put away his bride who has not borne him children, he shall give her money as much as her bride-price. Further, he shall pay her the marriage portion which she brought from her father's house, and shall put her away. [Dt 24¹, Mal 2¹⁵].

§ 139. If there was no bride-price he shall give one mina of silver for a divorcee.

§ 140. If he is a poor man he shall give her one-third of a mina of silver.

§ 141. If the wife of a man who is living in the house of her husband has set her face to go out and has acted the fool, has wasted her house, has belittled her husband, one shall call her to account, and if her husband has said, 'I put her away,' he shall put her away and she shall go her way, he shall not give her anything for her divorce. If her husband has said, 'I will not put her away,' and her husband shall marry another woman, that woman as a maidservant shall dwell in the house of her husband.

§ 142. If a woman hates her husband and has said, 'Thou shalt not possess me,' one shall inquire into her past as to what is her lack, and if she has been economical and has no vice, while her husband has gone out and greatly belittled her, that woman has no blame, she shall take her marriage portion and go off to her father's house.

§ 143. If she has not been economical but a goer about, has wasted her house, has belittled her husband, one shall throw that woman into the waters.

§ 144. If a man has espoused a votary and that votary has given a maid to her husband and has brought up children, but that man has set his face to take a concubine, one shall not countenance that man, he shall not take a concubine. [Gn 16^{1f.} 21^{10f.} 30^{2f.} 31^{1f.}].

§ 145. If a man has espoused a votary and she has not granted him children and he has set his face to take a concubine, that man shall take a concubine, he shall cause her to enter into his house. That concubine shall not put herself on an equality with the wife.

§ 146. If a man has espoused a votary and she has given a maid to her husband and the maid has borne children, and afterwards that maid has made herself equal with her mistress; because she has borne children her mistress shall not sell her for money, she shall put a mark upon her and count her among the maidservants. [Gn 16^{4f.} 21¹⁰, Dt 21¹⁴, 1 S 1^{4f.}].

§ 147. If she has not borne children her mistress may sell her for money.

§ 148. If a man has married a wife and a sickness has seized her, and he has set his face to marry a second wife, he may marry her, but his wife whom the sickness has seized he shall not put away, in the home she shall dwell, and as long as she lives he shall sustain her.

§ 149. If that woman is not content to dwell in the house of her husband, he shall pay her her marriage portion which she brought from her father's house and she shall go off.

§ 150. If a man has presented to his wife field, garden, house, or goods, has left her a sealed deed, after her husband's death her children shall not dispute with her. The mother shall give after her to the child whom she loves. To brothers she shall not give.

§ 151. If a woman, who is dwelling in the house of a man, has bound her husband that she shall not be seized on account of a creditor of her husband's, has got a deed granted her; if that man before he married that woman had a debt upon him, his creditor shall not seize his wife. Further, if that woman before she entered the man's house had a debt upon her, her creditor shall not seize her husband.

§ 152. If from the time that that woman entered into the house of the man a debt has come upon them, both together they shall answer the merchant.

§ 153. If a man's wife on account of another male has caused her husband to be killed, that woman shall be impaled. [Dt 21²¹⁻²³].

§ 154. If a man has known his daughter, that man one shall expel from the city.

§ 155. If a man has betrothed a bride to his son and his son has known her, and he afterwards has lain in her bosom and one has caught him, that man one shall bind (strangle?) and cast her into the waters. [Gn 24¹⁴].

§ 156. If a man has betrothed a bride to his son and his son has not known her, and he has lain in her bosom, he shall pay her half a mina of silver. Further, he shall pay to her whatever she brought from her father's house, and she shall marry the husband of her choice. [Ex 22¹⁶, Lv 20¹², Dt 22²³].

§ 157. If a man, after his father's death, has lain in the bosom of his mother, one shall burn them both together. [Lv 20¹⁴].

§ 158. If a man, after his father's death, has been caught in the bosom of his head wife who has borne children, that man shall be cut off from his father's house. [Lv 20¹¹, Dt 22³⁰].

§ 159. If a man, who has brought in a present to the house of his (prospective) father-in-law, has given a bride-price, has looked upon another woman, and has said to his father-in-law, 'Thy daughter I will not marry,' the father of the girl shall take to himself all that he brought him. [Gn 24^{53f}, 31¹⁵].

§ 160. If a man has brought in a present to the house of his father-in-law, has given a bride-price, and the father of the girl has said, 'My daughter I will not give thee,' he shall return double everything that he brought him.

§ 161. If a man has brought in a present to the house of his father-in-law, has given a bride-price, and a comrade of his has slandered him, (so that) his father-in-law has said to the claimant of the wife, 'My daughter thou shalt not espouse,' he shall return double all that he brought him. Further, his comrade shall not marry his wife.

§ 162. If a man has married a wife and she has borne him children and that woman has gone to her fate, her father shall have no claim on her marriage portion, her marriage portion is her children's forsooth. [Gn 31¹⁶].

§ 163. If a man has married a wife and she has not granted him children, (and) that woman has gone to her fate, if his father-in-law has returned him the bride-price that that man brought to the house of his father-in-law, her husband shall have no claim on the marriage portion of that woman, her marriage portion belongs to the house of her father forsooth.

§ 164. If his father-in-law has not returned to him the bride-price, he shall deduct all her bride-price from her marriage portion and shall return her marriage portion to the house of her father.

§ 165. If a man has apportioned to his son, the first in his eyes, field, garden, and house, has written him a sealed deed, after the father has gone to his fate, when the brothers divide, the present his father gave him he shall take and over and above he shall share equally in the goods of the father's house. [Gn 24³⁶ 25⁵ 27^{29, 37} 48²², Lk 15³¹].

§ 166. If a man has taken wives for the sons whom he has possessed, but has not taken a wife for his young son, after the father has gone to his fate, when the brothers divide, from the goods of the father's house to their young brother who has not taken a wife, beside his share, they shall assign him money as a bride-price and shall cause him to take a wife.

§ 167. If a man has taken a wife and she has borne him sons, (and) that woman has gone to her fate, (and) after her he has taken to himself another woman and she has borne children, after the father has gone to his fate, the children shall not share according to their mothers, they shall take the marriage portions of their mothers and shall share the goods of their father's house equally. [Gn 31¹⁶].

§ 168. If a man has set his face to cut off his son, has said to the judge, 'I will cut off my son,' the judge shall inquire into his reasons, and if the son has not committed a heavy crime which cuts off from sonship, the father shall not cut off his son from sonship. [Dt 21^{18f}].

§ 169. If he has committed against his father a heavy crime which cuts off from sonship, for the first time the judge shall reconcile them; if he has committed a heavy crime for the second time, the father shall cut off his son from sonship. [Dt 21²¹].

§ 170. If there be a man, whose wife has borne him sons, and his maidservant has borne him sons, (and) the father in his lifetime has said to the sons which the maidservant has borne him 'my sons,' has numbered them with the sons of his wife, after the father has gone to his fate, the sons of the wife and the sons of the maidservant shall share equally in the goods of the father's house; the sons that are sons of the wife at the sharing shall choose and take. [Gn 16^{15, 23, 26} 21¹⁰ 25⁹, Jg 11²⁷].

§ 171. However, if the father in his lifetime, to the sons which the maidservant bore him has not said 'my sons,' after the father has gone to his fate, the sons of the maid shall not share with the sons of the wife in the goods of the father's house. One shall assign the maidservant and her sons freedom, the sons of the wife shall have no claim on the sons of the maidservant for service. The wife shall take her marriage portion and the settlement which her husband gave her and wrote in a deed for her and shall dwell in the dwelling of her husband; as long as she lives she shall enjoy it, for money she shall not give it, after her it is her sons' forsooth. [Gn 27³⁷ 31¹⁶, Ex 21^{10f}, Dt 21^{16f}].

§ 172. If her husband did not give her a settlement, one shall pay her her marriage portion, and from the goods of her husband's house she shall take a share like one son. If her sons worry her to leave the house, the judge shall inquire into her wishes and shall lay the blame on the sons; that woman shall not go out of her husband's house. If that woman has set her face to leave, the settlement which her husband gave her she shall leave to her sons, the marriage portion from her father's house she shall take and she shall marry the husband of her choice. [Ex 21⁹].

§ 173. If that woman where she has entered shall have borne children to her later husband, after that woman has died, the former and later sons shall share her marriage portion.

§ 174. If she has not borne children to her later

husband, the sons of her bridegroom shall take her marriage portion.

§ 175. If either a slave of the palace or a slave of a poor man has taken to wife the daughter of a gentleman and she has borne sons, the owner of the slave shall have no claim on the sons of the daughter of a gentleman for service. [2 K 22¹², Jer 38⁷ 39¹⁶].

§ 176. However, if a slave of the palace or a slave of a poor man has taken to wife the daughter of a gentleman, and, when he married her, with a marriage portion from her father's house she entered into the house of the slave of the palace, or of the slave of the poor man, and from that time they started to keep house and acquired property, after either the slave of the palace or the slave of the poor man has gone to his fate, the daughter of the gentleman shall take her marriage portion, and whatever her husband and she had acquired from the time they started one shall divide in two parts, and the owner of the slave shall take one-half, the gentleman's daughter shall take one-half for her children. If the gentleman's daughter had no marriage portion, whatever her husband and she from the time they started have acquired one shall divide into two parts and the owner of the slave shall take half, the gentleman's daughter shall take half for her sons.

§ 177. If a widow whose children are young has set her face to enter into the house of another, without consent of a judge she shall not enter. When she enters into the house of another, the judge shall inquire into what is left of her former husband's house, and he shall entrust the house of her former husband to her later husband and that woman and cause them to receive a deed. They shall keep the house and rear the little ones. Not a utensil shall they give for money. The buyer that has bought a utensil of a widow's sons shall lose his money and shall return the property to its owners.

§ 178. If a lady, a votary, or a vowed woman whose father has granted her a marriage portion, has written her a deed, in the deed that he has written her has not, however, written for her 'after her wherever is good to her to give,' has not permitted her full choice, after the father has gone to his fate, her brothers shall take her field and her garden and according to the value of her share shall give her corn, oil, and wool, and shall content her heart. If her brothers have not given her corn, oil, and wool according to the value of her share, and have not contented her heart, she shall give her field or her garden to a cultivator, whoever pleases her, and her cultivator shall maintain her. The field, garden, or whatever her father has given her she shall enjoy as long as she lives, she shall not give it for money, she shall not answer with it to another. Her sonship is her brothers' forsooth. [Hos 2⁶⁴].

§ 179. If a lady, a votary, or a vowed woman whose father has granted her a marriage portion, has written her a deed, in the deed he wrote her has written for her 'after her wherever is good to her to give,' has allowed to her all her choice, after the father has gone to his fate, after her she shall give wherever is good to her, her brothers have no claim on her.

§ 180. If a father to his daughter, a votary, bride, or vowed woman, has not granted a marriage portion, after the father has gone to his fate, she shall take in the goods of the father's house a share like one son, as long as she lives she shall enjoy it, after her it is her brothers' forsooth.

§ 181. If a father has vowed to God a votary, hierodule, or virgin, and has not granted her a marriage portion, after the father has gone to his

fate, she shall take in the goods of the father's house one-third of a son's share and shall enjoy it as long as she lives, after her it is her brothers' forsooth.

§ 182. If a father, to his daughter, a votary of Marduk of Babylon, has not granted a marriage portion, has not written her a deed, after the father has gone to his fate, she shall share with her brothers in the goods of the father's house, one-third of a son's share, and shall pay no tax. A votary of Marduk, after her, shall give wherever it is good to her.

§ 183. If a father to his daughter by a concubine, has granted her a marriage portion, has given her to a husband, has written her a deed, after the father has gone to his fate, she shall not share in the goods of the father's house. [Gn 25⁶, Jg 11²].

§ 184. If a man to his daughter by a concubine has not granted a marriage portion, has not given her to a husband, after the father has gone to his fate, her brothers, according to the capacity of the father's house, shall grant her a marriage portion and shall give her to a husband. [Gn 25⁶, Dt 21¹⁵⁻¹⁷].

§ 185. If a man has taken a young child 'from his waters' to sonship and has reared him up, no one has any claim against that nursing. [Gn 48⁹].

§ 186. If a man has taken a young child to sonship, and when he took him his father and mother rebelled, that nursing shall return to his father's house.

§ 187. The son of a *NER-SE-GA*, a palace warder, or the son of a vowed woman no one has any claim upon.

§ 188. If an artisan has taken a son to bring up and has caused him to learn his handicraft, no one has any claim.

§ 189. If he has not caused him to learn his handicraft, that nursing shall return to his father's house.

§ 190. If a man has not numbered with his sons the child whom he took to his sonship and brought up, that nursing shall return to his father's house.

§ 191. If a man, after he has taken a young child to his sonship and brought him up, has made a house for himself and acquired children and has set his face to cut off the nursing, that child shall not go his way, the father that brought him up shall give to him from his goods one-third of his sonship and he shall go off; from field, garden, and house he shall not give him.

§ 192. If a son of a palace warder or of a vowed woman to the father that brought him up and the mother that brought him up has said, 'Thou art not my father, thou art not my mother,' one shall cut out his tongue.

§ 193. If a son of a palace warder or of a vowed woman has known his father's house, and has hated the father that brought him up or the mother that brought him up, and has gone off to the house of his father, one shall tear out his eye. [Pr 30¹⁷].

§ 194. If a man has given his son to a wet-nurse, (and) that son has died in the hand of the wet-nurse, (and) the wet-nurse without consent of his father and his mother has procured another child, one shall call her to account, and because without consent of his father and his mother she has procured another child, one shall cut off her breasts.

§ 195. If a man has struck his father, one shall cut off his hands. [Ex 21^{15, 17}, Lv 20⁹, Dt 21^{15, 25}, Pr 30¹⁷].

§ 196. If a man has caused the loss of a gentleman's eye, one shall cause his eye to be lost. [Ex 21²⁴, Lv 24¹⁹, Dt 19²¹, Mt 5³⁸].

§ 197. If he has shattered a gentleman's limb, one shall shatter his limb.

§ 198. If he has caused a poor man to lose his

eye or shattered a poor man's limb, he shall pay one mina of silver.

§ 199. If he has caused the loss of the eye of a gentleman's servant or has shattered the limb of a gentleman's servant, he shall pay half his price. [Ex 21²⁶.]

§ 200. If a man has made the tooth of a man that is his equal to fall out, one shall make his tooth fall out. [Ex 21²⁴.]

§ 201. If he has made the tooth of a poor man to fall out, he shall pay one-third of a mina of silver.

§ 202. If a man has struck the cheek of a man who is his superior, he shall be struck in the assembly with sixty strokes of a cow-hide whip.

§ 203. If a man of gentle birth has struck the cheek of a man of gentle birth who is his equal, he shall pay one mina of silver. [Lv 24¹⁷⁻²¹.]

§ 204. If a poor man has struck the cheek of a poor man, he shall pay ten shekels of silver.

§ 205. If a gentleman's servant has struck the cheek of a freeman, one shall cut off his ear.

§ 206. If a man has struck a man in a quarrel and has caused him a wound, that man shall swear, 'I did not strike him knowingly,' and shall answer for the doctor. [Ex 21¹⁸, Nu 35¹⁶, Dt 19⁴.]

§ 207. If he has died of his blows, he shall swear, and if he be of gentle birth he shall pay half a mina of silver. [Ex 21²⁰.]

§ 208. If he be the son of a poor man, he shall pay one-third of a mina of silver.

§ 209. If a man has struck a gentleman's daughter and caused her to drop what is in her womb, he shall pay ten shekels of silver for what was in her womb. [Ex 21²²⁻²⁷.]

§ 210. If that woman has died, one shall put to death his daughter. [Ex 21²³, Dt 24¹⁶.]

§ 211. If through his blows he has caused the daughter of a poor man to drop that which is in her womb, he shall pay five shekels of silver.

§ 212. If that woman has died, he shall pay half a mina of silver.

§ 213. If he has struck a gentleman's maid-servant and caused her to drop that which is in her womb, he shall pay two shekels of silver. [Ex 21²⁰.]

§ 214. If that maid-servant has died, he shall pay one-third of a mina of silver. [Ex 21²².]

§ 215. If a doctor has treated a gentleman for a severe wound with a bronze lancet and has cured the man, or has removed a cataract of the eye for a gentleman with the bronze lancet and has cured the eye of the gentleman, he shall take ten shekels of silver.

§ 216. If he (the patient) be the son of a poor man, he shall take five shekels of silver.

§ 217. If he be a gentleman's servant, the master of the servant shall give two shekels of silver to the doctor.

§ 218. If the doctor has treated a gentleman for a severe wound with a lancet of bronze and has caused the gentleman to die, or has removed a cataract of the eye for a gentleman with the bronze lancet and has caused the loss of the gentleman's eye, one shall cut off his hands.

§ 219. If a doctor has treated the severe wound of a slave of a poor man with a bronze lancet and has caused his death, he shall render slave for slave. [Ex 21²².]

§ 220. If he has removed a cataract with a bronze lancet and has made him lose his eye, he shall pay in money half his price.

§ 221. If a doctor has cured the shattered limb of a gentleman, or has cured a diseased bowel, the patient shall give five shekels of silver to the doctor.

§ 222. If he is the son of a poor man, he shall give three shekels of silver.

§ 223. If a gentleman's servant, the master of the slave shall give two shekels of silver to the doctor.

§ 224. If a cow doctor or an ass doctor has treated a cow or an ass for a severe wound and cured it, the owner of the cow or ass shall give one-sixth of a shekel of silver to the doctor as his fee.

§ 225. If he has treated a cow or an ass for a severe wound and has caused it to die, he shall give a quarter of its price to the owner of the ox or ass. [Lv 21⁶.]

§ 226. If a brander without consent of the owner of the slave has made a slave's mark irrecognizable, one shall cut off the hands of that brander.

§ 227. If a man has deceived the brander, and has caused him to make a slave's mark irrecognizable, that man one shall kill him and bury him in his house; the brander shall swear, 'Not knowing I branded him,' and shall go free.

§ 228. If a builder has built a house for a man and has completed it, he shall give him as his fee two shekels of silver per SAR of house.

§ 229. If a builder has built a house for a man and has not made strong his work and the house he built has fallen and he has caused the death of the owner of the house, that builder shall be put to death.

§ 230. If he has caused the son of the owner of the house to die, one shall put to death the son of that builder. [Dt 24¹⁶.]

§ 231. If he has caused the slave of the owner of the house to die, he shall give slave for slave to the owner of the house.

§ 232. If he has caused the loss of goods, he shall render back whatever he has caused the loss of. Further, because he did not make strong the house he built and it fell, from his own goods he shall rebuild the house that fell.

§ 233. If a builder has built a house for a man and has not jointed his work and the wall has fallen, that builder at his own cost shall make good that wall.

§ 234. If a boatman has completed a ship of sixty GUR for a man, he shall give him two shekels of silver for his fee.

§ 235. If a boatman has completed a ship for a man and has not made his work trustworthy, and in that same year that he built that ship it has suffered an injury, the boatman shall exchange that ship or shall make it strong at his own expense and shall give a strong ship to the owner of the ship.

§ 236. If a man has given his ship to a boatman on hire, and the boatman has been careless, has grounded the ship, or has caused it to be lost, the boatman shall render ship for ship to the owner.

§ 237. If a man has hired a boatman and ship, and with corn, wool, oil, dates, or whatever it be as freight, has freighted her, (and) that boatman has been careless and grounded the ship, or has caused what is in her to be lost, the boatman shall render back the ship which he has grounded and whatever in her he has caused to be lost.

§ 238. If a boatman has grounded the ship of a man and has refloated her, he shall give money to half her price.

§ 239. If a man has hired a boatman, he shall give him six GUR of corn per year.

§ 240. If a ship that is going forward has struck a ship at anchor and has sunk her, the owner of the ship that has been sunk shall recount before God whatever he has lost in his ship, and that of the ship going forward which sunk the ship at anchor shall render to him his ship and whatever of his was lost.

§ 241. If a man has taken an ox on distraint, he

shall pay one-third of a mina of silver. [Ex 22²⁵, Dt 24^{8,17}].

§ 242. If a man has hired a working ox for one year, he shall pay four *GUR* of corn as its hire. [Ex 22²⁴].

§ 243. If a milch cow, he shall give three *GUR* of corn to its owner. [Gn 31³⁹, Ex 22²³].

§ 244. If a man has hired an ox or ass, and a lion has killed it in the open field, that loss is for its owner forsooth.

§ 245. If a man has hired an ox and through neglect or by blows has caused it to die, ox for ox to the owner of the ox he shall render. [Ex 22¹⁰⁻¹⁵, Lv 24^{15, 21}].

§ 246. If a man has hired an ox and has crushed its foot or has cut its nape, ox for ox to the owner of the ox he shall render. [Ex 22¹⁰⁻¹⁵].

§ 247. If a man has hired an ox and has caused it to lose its eye, he shall pay half its price to the owner of the ox. [Ex 22¹⁰⁻¹⁵].

§ 248. If a man has hired an ox and has broken its horn, cut off its tail, or pierced its nostrils, he shall pay a quarter of its price. [Ex 22¹⁰⁻¹⁵].

§ 249. If a man has hired an ox and God has struck it and it has died, the man who has hired the ox shall swear before God and shall go free. [Ex 22¹⁰⁻¹⁵].

§ 250. If a savage bull in his charge has gored a man and caused him to die, that case has no remedy. [Ex 21²⁸].

§ 251. If the ox has pushed a man, by pushing has made known his vice, and he has not blunted his horn, has not shut up his ox, and that ox has gored a man of gentle birth and caused him to die, he shall pay half a mina of silver. [Ex 21²⁸].

§ 252. If a gentleman's servant, he shall pay one-third of a mina of silver. [Ex 21³²].

§ 253. If a man has hired a man to reside in his field and has furnished him implements, has entrusted him oxen and furnished harness for them for cultivating the field, if that man has stolen the seed or provender and they have been seized in his hands, one shall cut off his hands.

§ 254. If he has taken the implements, starved the oxen, from the seed which he has hoed he shall restore.

§ 255. If he has hired out the man's oxen or has stolen the seed and has not caused it to grow in the field, one shall call that man to account and he shall measure out sixty *GUR* of corn per *GAN* of land.

§ 256. If he is not able to pay his compensation, one shall cause him to be torn in pieces by the oxen on that field.

§ 257. If a man has hired a harvester, he shall give him eight *GUR* of corn per year.

§ 258. If a man has hired an ox-driver, he shall give him six *GUR* of corn per year.

§ 259. If a man has stolen a watering machine from the meadow, he shall give five shekels of silver to the owner of the watering machine.

§ 260. If he has stolen a watering bucket or a harrow, he shall pay three shekels of silver.

§ 261. If a man has hired a herdsman for the cows or a shepherd for the sheep, he shall give him eight *GUR* of corn per year.

§ 262. If a man, ox, or sheep to [this section is defaced]. [Ex 22¹].

§ 263. If he has caused an ox or sheep which was given him to be lost, ox for ox, sheep for sheep, he shall render to their owner. [Lv 24^{18, 24}].

§ 264. If a herdsman who has had cows or sheep given him to shepherd, has received his hire, whatever was agreed, and his heart has been contented, yet has diminished the cows, diminished the sheep, lessened the offspring, he shall give offspring and produce according to the tenour of his bonds.

§ 265. If a shepherd to whom cows and sheep have

been given him to breed, has falsified and changed their price, or has sold them, one shall call him to account, and he shall render cows and sheep to their owner tenfold what he has stolen.

§ 266. If in a sheepfold a stroke of God has taken place or a lion has killed, the shepherd shall purge himself before God, and the owner of the fold shall face the accident to the fold. [Ex 22¹⁰⁻¹⁵, Jn 10¹²].

§ 267. If a shepherd has been careless and in a sheepfold caused a loss to take place, the shepherd shall make good the fault of the loss which he has caused to be in the fold and shall pay cows or sheep and shall give to their owner.

§ 268. If a man has hired an ox for threshing, twenty *KA* of corn is its hire.

§ 269. If he has hired an ass for threshing, ten *KA* of corn is its hire.

§ 270. If he has hired a calf (goat?) for threshing, one *KA* of corn is its hire.

§ 271. If a man has hired oxen, a waggon, and its driver, he shall give one hundred and eighty *KA* of corn per day.

§ 272. If a man has hired a waggon by itself, he shall give forty *KA* of corn per day.

§ 273. If a man has hired a labourer, from the beginning of the year till the fifth month, he shall give six *SE* of silver per day; from the sixth month to the end of the year he shall give five *SE* of silver per day.

§ 274. If a man shall hire an artisan—

(a) the hire of a . . . five *SE* of silver

(b) the hire of a brickmaker . . . five *SE* of silver

(c) the hire of a tailor . . . five *SE* of silver

(d) the hire of a stone-cutter . . . *SE* of silver

(e) the hire of a . . . *SE* of silver

(f) the hire of a . . . *SE* of silver

(g) the hire of a carpenter . . . four *SE* of silver

(h) the hire of a . . . four *SE* of silver

(i) the hire of a . . . *SE* of silver

(j) the hire of a builder . . . *SE* of silver

per day he shall give.

§ 275. If a man has hired a (boat?) per day, her hire is three *SE* of silver.

§ 276. If a man has hired a fast ship, he shall give two and a half *SE* of silver per day as her hire.

§ 277. If a man has hired a ship of sixty *GUR*, he shall give one-sixth of a shekel of silver per day as her hire.

§ 278. If a man has bought a manservant or a maidservant, and he has not fulfilled his month and the *bennu* sickness has fallen upon him, he shall return him to the seller, and the buyer shall take the money he paid.

§ 279. If a man has bought a manservant or a maidservant and has a complaint, his seller shall answer the complaint.

§ 280. If a man has bought in a foreign land the manservant or the maidservant of a man, when he has come into the land and the owner of the manservant or the maidservant has recognized his manservant or his maidservant, if the manservant or maidservant are natives, without price he shall grant them their former condition. [Ex 21⁸].

§ 281. If they are natives of another land the buyer shall tell out before God the money he paid, and the owner of the manservant or the maidservant shall give to the merchant the money he paid, and shall recover his manservant or his maidservant.

§ 282. If a slave has said to his master, 'Thou art not my master,' as his slave one shall call him to account and his master shall cut off his ear.

The judgments of righteousness which Hammurabi the mighty king confirmed and caused the land to take a sure guidance and a gracious rule.

[There are three sections of the Code which have been recovered to us from the fragments of the copies made by Assyrian scribes. They were once to be found in the five columns which are now erased from the stele. They may be given here, for the sake of completeness.—

§ X. If a man has borrowed of a merchant and has assigned him a plantation of dates and said, 'Take the dates that are in my plantation for thy money,' the merchant shall not consent. The owner of the plantation shall take the dates that are in the plantation and he shall answer to the merchant for the loan and its interest according to the tenour of his bond. The dates that are over, which are produced in the plantation, the owner of the plantation shall take for himself.

§ Y. If a house tenant has paid the year's rent for the house in full to the landlord, but the landlord has ordered the tenant to go out before the time is up, the landlord because he has ordered the tenant to leave before his time is up, shall give back . . . of the rent.

§ Z. If a man has to pay, in money or corn, but has not the money or corn to pay with, but has goods, he shall give to the merchant whatever he has, before witnesses. The merchant shall not object, he shall receive it].

III. COMPARISON OF THE CODE WITH EARLY HEBREW LEGISLATION.

The comparison of such a Code with the Mosaic Laws is not one to be dismissed in a few paragraphs. Its obvious likenesses are not more remarkable than the contrasts which exist. The whole question of common origin may depend on how these are regarded. In some cases a conscious deviation is as strong proof of influence as an agreement.

1. *THE QUESTION STATED, AND THE DATA AVAILABLE FOR ANSWERING IT.*—1. We may begin by stating, as concisely as may be, what we understand by the influence of the Code of Hammurabi on Mosaic legislation. There need be no discussion as to whether Moses knew cuneiform. Such a proposition could be maintained only by insisting, firstly, on the literal truth of the statement that Moses was learned in all the wisdom of the Egyptians (Ac 7²²); secondly, that such learning must have included cuneiform. The latter proposition is not very safe. The evidence of the Tel el-Amarna tablets can only establish the existence of some scribes at the courts of Amenophis III. and IV. who could read and write Babylonian. The current opinion of critics does not ascribe much of the Hebrew Law to Moses. So his personality may be set aside.

Nor do we need to discuss exactly how far Babylonian influence had modified the life of the inhabitants of Palestine before the incursion of the Hebrews. Some men doubt whether that incursion did not find a widely spread Hebrew population already in possession. Whoever was in Palestine then, of whatever nationality, there is evidence that the chief rulers of the settled districts wrote in Babylonian to the kings of Egypt, and, presumably, also to the kings of Mitanni, Assyria, and Babylonia. Whether they used any other form of writing besides cuneiform we do not know. They did use words which were not pure Babylonian, but are at least Semitic, if not Hebrew. These words they glossed by a more or less accurate Babylonian. That the whole population of Palestine was Semitic or Hebrew, or read Babylonian literature at that time, are not propositions that we need trouble about. All that we need is that the people who drew up the Hebrew legislation, whenever that was done, should have

embodied the laws observed in Palestine at their own date, and that those laws should have there remained unchanged from the time when they were the same as were to be found in Babylonia at the time when Hammurabi codified them. Indirect influence is then proved.

2. The laws may have once been common to all the Semitic races, or to the populations they displaced or overran. The greater part of the common ideas of the two legislations may be due to this source. It may not even be Semitic at all, only human, such as man, anywhere and everywhere, under similar conditions would and did agree upon. Such a common stock, including many most striking things, is no proof of Babylonian influence, either upon the Hebrews or upon the inhabitants of Palestine before the Exodus. Thus the principle of retaliation, the making a punishment as far as possible an exact reproduction of the injury, was a primitive view. It might well be Sumerian in Babylonia, and pre-Israelitish in Palestine. It omits the consideration that such a punishment only gratifies revenge, does not benefit either the offender or the injured. It is characteristic of very inadequate justice. Now, in the Code we find that already a system of compensation to the injured was growing up. But the aristocracy, the *amēli*, would not accept money for their bodily injuries, they insisted upon the primitive 'eye for eye, tooth for tooth, limb for limb' (§§ 196, 200, 197), and so did the Hebrews (Ex 21²⁴, etc.). If this had been a peculiar or abnormal form of carrying out the principle, we might argue for a racial connexion between the Babylonian aristocrats of Hammurabi's time and the Hebrews. This has been done on the ground of linguistic affinities. But there is no reason to doubt that if retaliation, pure and simple, were the rule anywhere, it would be expressed in this way. All we can say is, that, whether from pride, conservatism, or racial peculiarity, the aristocrat of Babylon clung to the primitive method of punishing bodily injuries. The acceptance by the commoner, or *muškēnu*, of compensation may well point to a different race and a subject position. It would be interesting if we could show that the conquered races in Palestine used to accept compensation in a similar way.

Whatever view be taken of the similarities between the legislations, the greatest difficulty in asserting Babylonian influence is that the Israelitish law as we know it is a composite affair, of uncertain date, and combining new with old in a most perplexing manner. If we could be satisfied that the Mosaic Laws still existed in their original order, or that any one stratum of them had preserved its original features, we might better institute a comparison.

3. As it is, if any law should turn out to be very like the Babylonian, in wording or idea, it is open to say that it was foisted in after the Captivity, when the Jews had become acquainted with that law in Babylonia itself. On the other hand, it is open to say that Abraham became acquainted with it in Ur of the Chaldees, and its memory never died out. Others may maintain that it only embodies a common Semitic idea, which is thus proved to have the widest extent in place and time. Each of these views will continue to have its advocates, and there is no evidence to decide between them. To speak of Babylonian influence is not so to decide.

4. It may be well to set out first the material which seems to be equally conclusive for all views. (a) The following common practices or ideas are pointed out by S. A. Cook. The appeal to the decision of God, the resort to the gate of the city as a place of justice, the declaration on oath before God, the oath for purgation, warnings

against injustice, bribery, false witness, the need of witness for proof, are all common to the judicial systems of Hammurabi and Moses. In both, the woman was in the hand of her husband, who was her *bēl* or *bā'al*; marriage was arranged by parents, or relatives, on both sides, the girl's consent not being asked. A purchase price was paid for the wife (*terḥatu*, Heb. *mōhar*), returned in her dowry, and other marriage customs are similar. The customs as to divorce, concubines, and maidservants are in thorough harmony, allowing for the greater explicitness on one side or the other.

(b) The punishment for false witness, that the false witness should suffer what he had put the accused in danger of suffering, is the same in both (§§ 3, 4; Dt 19¹⁹). The punishments of slander (§ 127; Lv 19¹⁶, Dt 22¹³⁻²¹), and accusation of infidelity, though unlike in details, both recognize the nature of the offence. Ordeal was the purification for suspected wives (§ 132; Nu 5¹¹⁻³¹). The regulations as to the shepherd's responsibility for his flock are similar (§ 266; Ex 22^{10c}). The eating of the fruit of newly planted land is deferred to the fifth year (§ 60; Lv 19^{23d}). Kidnapping was a capital offence in both legislations (§ 14; Ex 21¹⁶). Both contemplate the extirpation of wizards (§§ 1, 2; Ex 22¹⁸). Assaults upon a woman, leading to miscarriage and death (§§ 209-214), are similar to Ex 21^{22d}, but with characteristic variations.

5. Supposing that there had been a knowledge of the Babylonian law and custom in Palestine, we should not expect that it would be adopted at once into the Code of Israel. The treatment of the slave in Dt 24⁷ or Dt 23¹⁶ is certainly a contrast to Hammurabi's law forbidding the harbouring of a slave (§ 17), and ordering his restoration to his owner. But we are not without indication that such was the custom, at any rate, among the Amalekites (1 S 30¹⁵). The older law in Palestine may not have been so considerate. Nor is it all pure humanity, later. Fugitive slaves from other lands may not have been an unwelcome addition to the population. The sentimental reason that Israel had once been a slave was in accordance with current ideas.

6. There is a close parallelism between the laws of deposit in §§ 124-126 and those in Ex 22⁶⁻¹¹ [Heb.]. Further, there is a striking similarity in the treatment of the three parties in Ex 22 and the three in §§ 9-11. We may here note a parallelism of method, which may once have characterized a great deal that did not survive in either code. Both make selections, sometimes fuller, sometimes less full, one than the other. We could suppose that in a common source both the cases of illegal holding or sale of lost property, or of treasure trove, and the fraudulent retention or loss by theft, of deposit, were treated exactly alike, viz. that the fraudulent person should restore twofold. Hammurabi leaves the full treatment as a norm in §§ 9-11, and later condenses his source, for deposit, assuming the method. The Exodus legislator gives a full abstract in Ex 22⁶⁻¹¹, and a condensed form in Ex 22¹. The procedure in the cases differs, but only as a common source so treated might be expected to differ, under different social organizations.

7. Of considerable importance is it to notice that these ancient codes do not lay down general principles, but select cases which exemplify them. Thus, while Hammurabi (§§ 57, 58) takes only the cases where a shepherd feeds his flock off a field of corn, and Ex 22⁵ deals with a field or vineyard, we may be sure that Hammurabi's Code would have been interpreted by the judges as applying to vineyards as well, if they came in question.*

* The vine was rare, if not quite unknown, in Babylonia.

8. In Exodus the transition to damage by fire is natural. In Babylonia, damage by careless management of water was more characteristic. It might have come next, only the order of ideas led to its being put first, as § 56. Here the differences of legislation are quite such as any legislator might introduce if he were using a foreign code as a source. The votary was forbidden to open a wine-shop (§ 110). At first sight there is nothing at all like this in the Hebrew legislation. But Lv 21⁹ forbids the daughter of a priest to commit folly in Israel, on pain of being burnt. Josephus understands that to mean 'open a wine-shop.' The penalty is the same in both codes. It may well have been that one law was adapted from the other. So while a hostage for debt was freed after six years' service in Israel, but after only three in Babylonia, it has to be excused on the ground that such had already served a *double* term (Dt 15¹⁸). The custom was clearly to release at the end of three years—a custom which seemed hard to the recently settled Israelite; and so concession was made to his prejudices, fixing it at six years instead. Thus we may account for the absence of other humane laws in Hebrew codes. They were too advanced to adopt, unmodified. The fact, then, that more of the Babylonian Code does not find parallels in the Hebrew, even when its regulations would be quite acceptable, may be due to the fact that custom had already adopted them. Law is needed, not to enact custom, but to modify it. It may legalize it, but usually seeks either to unify varieties or to sanction growing changes, and so to decide between competing views of right. Hammurabi saw no cause to promulgate any law about murder; the Hebrew codes leave some other things unsettled. Some of these may have been settled by Hammurabi or his fore-runners, and already been in force in Canaan. In many other cases we may plausibly argue that the legislations show a common source, treated differently in adoption.

9. The absence of law courts, the persistent blood-revenge,—though subjected to a series of regulations,—the severer treatment of some offences, the milder treatment of others, are held to be strong proofs of a more primitive state of civilization in Israel. The differences from the Code of Hammurabi are therefore important to notice. The treatment of theft is less severe in Hebrew than in Babylonian law, except perhaps in the case of the nocturnal burglar (§ 21; Ex 22³). The severer penalty against a son who struck his father (§ 195; Ex 21¹⁵), which Hebrew law also enacted for cursing parents (Ex 21¹⁷ etc.), the treatment of the rebellious son (Dt 21¹⁸⁻²¹), are traces of a more primitive state. The rights of the firstborn, so marked in Hebrew, show no trace in the Code. They were earlier in Babylonia. The Code was much more favourable to widows than early Israelite custom; but the later law (in Israel) is more considerate. In Babylonia daughters had rights of inheritance, which appear only late in Israel. The position of the slave is quite distinct. The laws as to hired animals show no resemblance. The penalty for allowing a vicious ox to gore a man was death in the Hebrew Code, but a fine in Babylonia (§§ 251, 252; Ex 21^{28f}).

10. Of course, whole groups of laws in the Code concern matters which were purely Babylonian. The position of the feudal tenants, levy-masters, etc., and the regulations relating to shipping, caravans, the laws for the builders, doctors, surgeons, branders, artisans, etc., cannot be expected to reappear even in a copied legislation.

The names of the articles in use are often alike in Hebrew and Babylonian, but the technical terms differ. This would be very important, as

showing an independent growth of similar institutions, but for one consideration. There is no ground to suppose that on either side the terms compared were the only terms in use. Thus, while the Babylonian verb 'to marry' is *ahāzu*, and the Hebrew *lākah*, the Assyrian is *līkū*. The Hebrew *ērās*, 'to betroth,' has a parallel in Babylonian *ērīšu*, 'bridegroom.' The itinerant trader, *samallū*, was explained by *ša nās mašak ša abni*, 'he who carries the bag (*kīsu*) of weights'; compare the Hebrew *kīš* and *ābānīm*. In the directions as to the inquiry into the conduct of the alleged idolaters (Dt 13¹⁴ and 17⁴) the same verb is used, *kūn*, as in the Code, for establishing an accusation, *uktin*; the *kussū daianuti* of § 5 is the *kīšē dīn* of Pr 20³; the phrase 'to cause the finger to be pointed at' as a technical term for 'slander' is paralleled by Is 58⁹ 'the putting forth of the finger.' The list of linguistic parallels could, doubtless, be much extended. There was, however, no reason why a Hebrew legislator, even if a copy of the Code lay before him in cuneiform, should transliterate its words. He might equally well translate them into his own language.

11. Of much more importance, as a proof of dependence, would be the preservation of the order of ideas, especially where this is not due merely to their logical sequence. Of such a transfer of arrangement we can hardly expect to find much trace. Whatever trace can be found is therefore all the more significant. A comparison of the order of the Book of the Covenant (vol. iii. p. 67) shows as much difference as likeness in the order. Yet who can say that the present order does not exhibit rearrangement and interpolation? For example, in ii. (l.c. p. 67^b), why are § 7 and § 9 separated by § 8?

12. Some things are very suggestive of a deliberate change. The Code has a slanderer thrown down before the judge and branded. In Dt 25² we get directions for scourging. The judge shall cause him to lie down and be beaten before his face. The 'certain number' of stripes in Israel was not to exceed forty; Hammurabi ordered sixty for some cases. We are told that scourging was a late introduction into Israel. This may be true of the bastinado, but there seems no reason to regard scourging as a late form of punishment. It is curious that Dt 25¹¹, which may be a parallel to §§ 202-205, should come so close to the mention of scourging in Dt 25²⁻³, separated from it by clauses which seem to have no possible connexion with either. If v.¹¹ followed v.⁸ in the source, that would seem to have been a distinct reminiscence of §§ 202-205. Authorities differ as to the sense of *lētu*, usually 'strength'; some take it to mean 'head,' but the *genitalia* may be meant: compare *littūtu*, 'progeny.'

(a) A case that must have occurred to the mind of both lawgivers, though not perhaps very practical, was what should be done if a man had intercourse with mother and daughter, or a woman with father and son. The case where the daughter was his own child, or the son her own son, was especially bad. Now Hammurabi takes one case in § 157, and enacts that, if a man has intercourse with his own mother, both shall be burned. He does not touch the case of a woman and her mother with the same man. In Lv 20¹⁴ that is taken as the test case, and both are to be burned. The Mosaic Law does not touch Hammurabi's case. It may well be that the actual text of the Code was known to the later legislator; and either to show the further application of the same principle, or because the former case was now so well known as to need no further legislation, he takes the new example. One can hardly suppose that in one society the one crime was known and the other

unknown, while the reverse held in the other society. In both Codes the penalty for this sort of thing was burning. That is awarded only once again in either Code, and there also for what may well be the same crime in both, described in different terms. Of course we may refer both back to a common Semitic primitive law; but a younger lawgiver would naturally prefer to select a different example if he could. Taken in this way, we can arrange a very remarkable parallel, due to Müller—

HAMMURABI.	LEVITICUS 20.
Man with daughter-in-law (§ 155).	Man with daughter-in-law (v. ¹²).
Man with father's wife (§ 158).	Man with father's wife (v. ¹¹).
Man and son with one woman (§ 157).	Mother and daughter with one man (v. ¹⁴).

(b) Again, we may note that Hammurabi (§ 210) ordains that if a man caused the death of a pregnant woman by his blows, then not he, but his daughter, should be put to death. Now this is retaliation pure and simple, and can only be meant as a limit to which the compensation might be pushed by a revengeful father. The accused might have no daughter at all; he might have several. The old discussions as to the relative value to the accused and accuser of the damage inflicted by exact retaliation must come up. Now Ex 21²³ solves this question by the phrase 'soul for soul.' That may be the result of reflexion on this very crude law. It is a convenient phrase for laying down, that as a woman's life was worth less than that of a man, the compensation exacted must not exceed the damage done.

(c) Further, when we read in Lv 24²² that there shall be one law for 'foreigner and native' set at the end of a passage which otherwise literally repeats §§ 196-201, where careful distinction of rank is made in awarding penalties, one may well be tempted to suspect a reminiscence. That differences of treatment should be expressly excluded, surely points to knowledge that they existed somewhere. Where else was this than in the Code? The common Semitic source hardly had these gradations. That cattle are included in Lv 24^{18, 21} may be due to a desire to get together all that fell under the same rule.

13. It is not a little instructive to notice that the Code of Hammurabi shows marked similarities to other ancient codes. Professor Müller has worked out a number of striking parallels with the Roman XII Tables. Professor Cohn compared the Laws of the West Goths. Incidental comparisons with the Laws of Manu are noted by Mr. Cook. The Code receives illustration from a variety of other sources in the books named above for the bibliography. Whether a knowledge of this Code can really have spread to Rome and India, depends upon the results of much further research than has yet been made.

ii. VIEWS AS TO THE CHARACTER OF THE CONNEXION.—Opinions are divided as to the reality of the connexion between the Code of Hammurabi and Mosaic legislation. The positive view has been well stated thus: 'The Babylonian and Mosaic Codes are conceived in the same literary form; they contain a considerable number of practically identical laws; they present not a few cases of actual verbal agreement, and both are designed for the regulation of a civilized community. The parallels are too close to be explained upon a somewhat vague theory of common tradition. . . . It has been shown that, in Palestine, Israel learned and appropriated the ancient Babylonian myths. Why should they not learn Babylonian law as well? . . . The foundation of the Babylonian law

was the Code of Hammurabi, and thus the enactments of the old Babylonian king, formulated about B.C. 2250, passed more than a thousand years later into the Book of the Covenant, and so became the heritage of Israel and the world' (Professor C. Johnston, *Johns Hopkins University Circular*, June 1903).

Mr. Cook minimizes the extent to which Palestine was permeated by the other elements of Babylonian culture. The discovery of cuneiform tablets at Taanach by Professor Sellin may now be added to the evidence of the Tel el-Amarna letters. Documentary evidence may any day be found of the existence in Palestine of all sorts of Babylonian literature. That will not of itself prove that the Hebrew legislators read the Code in cuneiform. What is needed is proof from the Hebrew monuments of such similarities as can be explained only by a knowledge of the Code as we now know it. There is small likelihood of such a proof being found. For no one can suppose that any one of the documents into which the Hebrew law is resolved on critical grounds was put forward at any period as a complete code. We have fragments of several codes at different dates, but not one that can really be trusted for a comparison. Such fragments as are left are very valuable as showing what was at one time considered to be law in Israel, but after the composition they have undergone it is impossible to say whether they really are ancient or not. The words 'primitive' and 'ancient' are not synonymous in the history of law. Nor is it quite clear that 'savage' penalties are always more primitive. The Hebrew law treats unfilial conduct more severely than Hammurabi does. This is not a proof of age, nor of primitive ideas, for the normal Arabs show little trace of parental authority. The intrusion of priestly power into the law courts, while definitely dated as late, is a recrudescence under changed conditions of a state of things from which Hammurabi shows an emancipation nearly complete. If any signs of a Babylonian influence can be made out anywhere now, the presumption is that it was once enormously powerful. For the whole history of Israel appears to consist in reformation, a readjusting of old material in faith and practice to new conditions. The old Babylonian stuff must have taken a most powerful root to survive at all. Professor D. H. Müller has done great service in pointing out the significance of any traces of similarity of order which can be found. Professor Kohler insists on the presence or absence of the theocratic idea as a test of primitive stages. The Indian law is purely theocratic, making no distinction between right and morality. The Israelite laws vary; some are theocratic, and the prohibitive commands ancient in type. Hammurabi's Code is very modern, almost purely legal. This puts it on a level with the Gortyn Laws and the XII Tables, while it is even more advanced than they are. In Israel the religious idea received its highest development in pre-Christian times, and that dominated law, morals, and history alike. In Babylonia law reached its highest development, and largely in independence of religion. The common life was Semitic, the likenesses are due to racial affinity. The social order was widely different. There can be no question of actual borrowing, at any rate until post-exilic times.

This view leaves out of consideration the evident fact that the Code of Hammurabi does not reflect the result of any continuous evolution of law in a homogeneous and progressive people, but an adaptation of widely distinct systems. An aristocracy which clung to primitive ideas, presumably a recent infusion of a wilder Semitic race, amalga-

mated with a long settled, even if mixed and already partly Semitic, people. Some of its laws may be a recrudescence of primitive views already long modified among the Babylonians. The advent of the First Dynasty of Babylon had a close parallel in the settlement of Israel in Palestine. May not the settled population there have been in much the same stage of civilization as the native Babylonians, with local variations? May not the more primitive stamp of the Israelite laws as we have them be due to the greater predominance of the newcomers? Then the common features would be of two separate origins: one, the civilization that had once been common to Babylonia and Palestine, juristically the more advanced; the other, a system common to the two Semitic peoples, who in Babylonia conquered the land, founded the First Dynasty, formed the new aristocracy, or in Palestine conquered the land and are known to us as Israel. This would furnish the politically dominant, characteristically Semitic, primitive features. Which of the two systems should impose itself on the other, depended in either land on the relative power of the invaders and the invaded. This would be largely conditioned by the suitability of the competing races to the conditions of the country. In Babylonia the larger settled population, the necessary conditions of life, made the invaders rather become absorbed in the people they politically ruled. In Palestine the conditions worked in the opposite direction. Whether by greater preponderance of numbers, or less modifying power in their new environment, the invaders to a greater extent imposed themselves on the previous inhabitants. We need not speak of borrowing as an act on the part of the Israelite legislators. What they preserved of existing law was already centuries before influenced by Babylonia. What they imposed as their national contribution was common property with the legislators who imposed part of it on Babylonian law. That these did not make Babylonian law as primitive as the Book of the Covenant, was due to their more complete absorption by the settled civilization. Hammurabi's Code crystallized the law at a later stage of the process than did the Book of the Covenant. The process was more rapid there. Hence also the greater stability of his work. It lasted practically unchanged some fifteen hundred years. The subsequent developments in Israel show perpetual progress. The progress was on totally different lines, till Israel came once more in contact with Babylonian culture. Then it had made contributions of its own, some of which it modified, some it emphasized as a result of the contrast.

We may say that the Israelite legislation shows strong traces of Babylonian influence, and yet not destroy the independence of its origin. We cannot suppose that the author of any code set to work to draw up a comprehensive scheme of law. Each built upon the already prevailing custom. His attention would be directed chiefly to what was not matter of uniform treatment. The most characteristically Babylonian things in the current custom of the day in Israel may be just those which are not legislated for. The new legislation did not require to touch what was so firmly established. Other things of Babylonian origin may have been abrogated by the new laws—it would not be necessary to say what they had been, but merely by stating the new law to say they should be no longer. That any Israelite code shows marked differences from the Code of Hammurabi is enough to show an independent origin. The absence of any difference would show complete dependence. The coexisting likenesses and differences argue for an independent recension of

ancient custom deeply influenced by Babylonian law. The actual Code of Hammurabi is a witness to what that influence might accomplish. It cannot be held to be a creative source. The Code may only be itself a proof of the same influences. These may be called Semitic in preference to Babylonian. But that view calls for overwhelming proof that there was any source of civilization powerful enough to have this influence on both Israel and Babylonia. The presumption that Babylonia had a prominent influence on Palestine long before Israelite codes were drawn up, is one that grows stronger as time goes on.

C. H. W. JOHNS.

RELIGION OF ISRAEL.*—Introduction.—The origin of the religion of Israel is treated in greater or less detail by all the four sources—or, more correctly, strata of sources—of which the present Pentateuch is made up: the Jahwistic stratum (which originated between 900 and 700 B.C.), the Elohist (between 750 and 650), the Deuteronomistic (650–550), and the Priestly (550–400). Their respective statements exhibit numerous differences, and even discrepancies. But on one point they are in absolute agreement: namely, that the founding of the religion of Israel was the work of Moses, of the tribe of Levi; that it took place in connexion with the leading of the people out of Egypt; and that it consisted pre-eminently in the proclamation of Jahweh as the national God of Israel. The strength and the uniformity of this tradition leave no doubt of its correctness, however much the details of the process may be the proper subject of criticism.

We are thus entitled to commence the history of the religion of Israel with Moses. It is another question whether we can also attain to any certainty regarding the religion of Israel, or, perhaps more correctly, of the Israelitish tribes in pre-Mosaic times. This question could at once be answered in the affirmative, if it were possible to regard the whole contents of the Book of Genesis as history in the strict sense of the term. According to this account, the self-revelation of the one true God began at the very outset, i.e. with the first human being created, and was then reproduced from generation to generation—always, indeed, only through the instrumentality of the firstborn of each family—until, finally, in the families of the three patriarchs proper, Abraham, Isaac, and Jacob, it developed into a religion which is hardly distinguished in any way from the future religion of the nation of Israel as this is presented to us in the earlier traditions. Abel and Cain already bring offerings to Jahweh—the one, of the firstlings of the flock and of their fat; the other, of the fruits of the field (Gn 4^{3ff.}). Noah sacrifices to Jahweh upon an altar burnt-offerings of all clean beasts and all clean birds (8²⁰). In like manner we hear not infrequently of the patriarchs building altars and offering sacrifices, as well as of their calling upon Jahweh, especially at those spots where He had appeared to them, or which were hallowed by previous appearances of God (12⁷ 13¹⁸ 22⁹ 26²⁵ 35⁷). Further, the erection of monumental stones or pillars (*mazzēbōth*, 28^{18ff.} 33²⁰ [where for *mizbēah* ‘altar’ we should certainly read *mazzēbāh* ‘pillar’] 35¹⁴. 20) corresponds to a custom which was practised even by Moses (Ex 24⁴), and came only at the end of the pre-exilic period to be prohibited as heathenish. When, again, Rebekah goes to consult Jahweh, and actually obtains an oracle from Him (Gn 25^{22f.}), this manifestly implies not only the existence of a sanctuary of Jahweh, but also the presence of priests or other mediums of the oracle. In short, the cult of Jahweh as practised by the people of

Israel after their conquest of Canaan is presented to us as simply the continuation of the worship already rendered by the patriarchs to the same God, and, indeed, almost in every instance at the same sanctuaries. Israel, in other words, simply entered by the conquest of the land into the heritage of which they had been assured long ago by the promises of Jahweh to the patriarchs, and, above all, by the solemnly ratified ‘covenant’ of God with Abraham (Gn 15).

It must be confessed, however, that a proper critical examination of the religious history of Israel has shown incontrovertibly that the above view of the primeval and the patriarchal religion became possible only by carrying back unreservedly to the centuries prior to Moses, up to the very commencement of all, the conceptions and the conditions of the Jahweh religion as these present themselves somewhere about the 9th cent. B.C. The picture thus drawn of the early history is therefore an extremely valuable authority for the period from which it emanates; but for the pre-Mosaic period we can make use of it only with the utmost caution and with strict observance of complicated critical principles. We then discover that in various traditions found in Genesis as well as in those of many other books of the Bible a recollection has been preserved of the pre-Mosaic religious stage of Israel. It is true that this recollection is not infrequently so faint and so unintelligible to the narrators themselves that they take no offence at it, nay, believe it to be in perfect accord with the religion of Jahweh. In such instances the correct interpretation of the tradition may be confirmed or even discovered in two ways: (1) from other traces of the same tradition in the OT, even outside Genesis; (2) from the analogies found in other, especially Semitic, religions,* which will be found not infrequently to supply a surprising amount of information about ritual customs which are strange, and which were no longer understood by Israel itself. There is a repetition here of a phenomenon whose occurrence may be noted almost all over the world: namely, the tendency of religious usages to maintain themselves with the greatest tenacity even after they have come, in consequence of altered religious conceptions, to lose all real meaning. Their retention is generally justified by giving them some new interpretation which renders them tolerable to the new religion (so, for instance, with circumcision in Israel), or they may continue to be practised simply through force of habit, without any attempt at explanation at all. The latter principle may be found to hold good, for instance, of all or at least the majority of mourning usages. In all probability, the whole of these had their root in religious motives; but that this was understood we cannot assume except in those instances in which they were expressly prohibited by the Jahweh religion. For the most part they represent simply petrified custom, whose original meaning it is often very difficult to determine. At all events, the *symbolical* interpretations (for instance, that of the rending of the garments as an expression of utter indifference to one's outward appearance, or even as a symbol of the rending of the heart with grief), which we meet with fre-

* On the subject of Semitic religion we possess such extremely valuable contributions as J. Wellhausen's *Reste arabischen Heidentums* (Berlin, 1887; 2nd ed. 1897), and W. Robertson Smith's *Lectures on the Religion of the Semites* (London, 1889; 2nd ed. 1894; Germ. tr. by R. Stübe, Freiburg i. B. 1899). Much valuable material is contained also in B. Stade's *Gesch. des Volkes Israel*, Berlin, 1887 (Buch 7: ‘Israels Glaube und Sitte in vorprophetischer Zeit’), Bd. i. p. 358 ff. Cf. also Ch. Piepenbring, ‘La religion primitive des Hébreux’ (*Rev. de l'Hist. des Religions*, 1889, pp. 171–202); and C. G. Montefiore, *Lectures on the Origin and Growth of Religion as Illustrated by the Religion of the ancient Hebrews*, London, 1892.

* See ‘Table of Contents’ at end of article, p. 732 ff.

quently even in Christian exegesis and theology, are foredoomed to rejection.

I. TRACES OF A PRE-MOSAIC RELIGION OF ISRAEL.

Before we attempt now to collect the possible traces of a pre-Mosaic religion of Israel, there are two points that we must emphasize very strongly: (1) that in almost every instance we have here to deal with hypotheses and not with facts, so that our task will be in reality to determine the greater or smaller degree of probability attaching to any hypothesis; (2) that everything which survived in Israel merely as a custom that was *not understood*, may claim an interest from the point of view of Archaeology and the History of Religion in general, but has, strictly speaking, none so far as the Religion and Theology of the Bible are concerned. It appears to us that the effect is simply to lead one astray as to the correct understanding of the religion of Israel, when certain recent descriptions leave the reader in doubt whether all kinds of primeval customs were not practised in Israel with full consciousness of their original signification, and, when introduced into the framework of the Jahweh religion, so continued down to the latest times. The truth is that anything which was recognized by the Jahweh religion as of heathen origin, and whose meaning was understood by it, was declared unclean and accordingly prohibited absolutely, as, for instance, necromancy. Any one who notwithstanding addicted himself to such practices, set himself deliberately in opposition to the requirements of his religion. The fact that this happened again and again gives us no more right to saddle the religion of Israel with these derelictions than we have to hold Christianity responsible for all the heathen superstition which still continues to prevail even in Christian nations.

i. *CONCEPTION OF THE DEITY, ETC.*—The most important question which has to be dealt with by any one who undertakes to give an account of a particular stage of religion is that relating to the *nature of the god or gods recognized*.

1. Amongst the lowest forms of religious veneration, the more recent authorities on Comparative Religion reckon not only the common Fetichism (which elevates an arbitrarily chosen object to the rank of its gods, and again, it may be, deposes it), but also the so-called Totemism.* The following may suffice by way of definition of this widely diffused phenomenon. In the vocabulary of modern Comparative Religion the term *totem*† stands for some natural object—generally an animal—with which a tribe considers itself to have blood relationship, and which accordingly in the person of all its representatives is treated by the tribe with the utmost consideration and indulgence, or may actually receive Divine worship. Such Totemism may be recognized most frequently in the name by which the particular tribe is designated, although it may happen, indeed, that names long in existence come only subsequently to have a totemistic sense attached to them.

* Out of the copious literature on this question the following may be noted as of importance for our present purpose: W. Robertson Smith, 'Animal Worship and Animal Tribes among the Arabs and in the Old Testament' in *Journal of Philology*, ix. (1880), cf. the same writer's *Kinship and Marriage in Early Arabia* (1903), p. 217 ff.; J. G. Frazer, *Totemism*, Edinburgh, 1887; Jos. Jacobs, 'Are there Totem-clans in the Old Testament?' in *Archæol. Review*, iii. (1889) 3, p. 145 ff.; F. V. Zapletal, *Der Totemismus und die Religion Israels*, Freiburg i. B. 1901 [denies any existence of Totemism in Israel]; S. A. Cook, 'Israel and Totemism' in *JQR*, xiv. No. 55; L. Germain Lévy, 'Du totémisme chez les Hébreux' in *REJ* xlv. (1902), No. 89, p. 13 ff. (likewise with wholly negative results).

† This term, borrowed from the Ojibway Indians of N. America and brought into vogue especially by Lubbock, denotes originally the family or tribe itself.

In searching for indications that Totemism once prevailed in Israel, we must leave out of consideration one practice, namely the worship of Jahweh in the form of a molten bull, as practised in the Northern kingdom from the time of Jeroboam I. onwards (1 K 12²⁸). It is probable that, in this, Jeroboam simply revived a form of the Jahweh cult that had been long familiar; but it was beyond doubt of Canaanite origin, and had nothing to do with Totemism. The molten bull is nothing but a symbol of the strength and creative power of Jahweh, who in the earliest times—as far back as we can trace the matter—was never thought of as appearing on earth except in human form.

On the other hand, among the names of Israelitish tribes there are a few which, upon certain conditions, might testify that Totemism once prevailed: for instance SIMEON (שִׁמְעוֹן *Shim'on*), if this name, like the Arabic *sim'u*, stands for a hybrid of wolf and hyæna; LEAH, if this = 'wild cow'; and LEVI, if this is really a gentile name from *Leah*; and, finally, RACHEL (= *rāḥēl*, 'ewe'). With reference to the two female names in this list, it is true also that it must first be proved that wives in the patriarchal narratives always stand for certain weaker tribes which became amalgamated with other stronger ones into a single whole. It is clear that here we have many difficulties in the way, and at most we can speak only of the possibility that Totemism once prevailed in particular tribes. Nor are we carried much further by another argument, to which it has been sought to attach the strongest evidential value. We refer to the so-called 'food taboos,' by which the flesh of certain animals is to be scrupulously avoided as unclean. It sounds very plausible, no doubt, to interpret this as meaning that each tribe regarded it as strictly forbidden to kill and eat the totem animal with which it believed itself to have blood affinity. When smaller tribes became amalgamated with larger, and when these finally combined to form one nation, the totems of all the different clans would be recognized by the whole body, and the eating of them avoided, and the Jahweh religion would sanction and retain this practice, only altering the motive for it. At the totemistic stage these animals were forbidden because they were *holy*; the Jahweh religion, on the other hand, declared them, as relics of a foreign cultus, *unclean*. Now, in reply to this it may be remarked that certainly the long list of unclean animals enumerated in Lv 11^{4ff.} and Dt 14^{3ff.} cannot possibly be all explained on the ground of a previous Totemism. On the contrary, it is quite clear in these passages that the prohibition of certain animals which were expressly regarded as unclean was afterwards extended to the whole class which exhibited the same characteristics. Thus originated that *system* of food taboos in virtue of which uncleanness attached to all four-footed animals which do not chew the cud and have not completely divided hoofs, and to all water-animals which have not fins and scales, as well as to all four-legged winged creatures. It is vain to seek to explain this supplementary schematizing by religious motives, as if, for instance, all creatures to which any imperfection attaches had been forbidden as food. All that it is correct to hold is that in very ancient times the eating of *particular* animals was disallowed on religious grounds. But it is quite another question whether these grounds were connected with Totemism. It is quite possible that when such customs arose the determining factors were wholly different forms of superstition, such in particular as some form of belief in demons (see below). In this way the impulse would be given less by religious veneration than by simple fear. Upon the whole we must conclude once more that,

while it is certainly possible that Totemism once prevailed in Israel, its prevalence cannot be proved; and, above all, we must hold that the religion of Israel as it presents itself in the OT has not retained the very slightest recollection of such a state of things.

2. It is different with another of the preliminary steps towards real religion which is still more widely illustrated amongst primitive peoples, namely Animism. In its pure form this is the belief in the activity of the spirits of recently deceased relatives. From the nature of the case, however, it is not always possible here to draw the lines sharply. Even those who have been long dead may appear to their surviving relatives in bodily form in dreams. Hence the animistic belief produces the conviction that the spirit of the dead man either still lingers in the neighbourhood, or may temporarily leave the place of sojourn of the dead (called by the Hebrews probably even in pre-Mosaic times *She'ol*; see below). On the other hand, the appearances that present themselves in dreams are not confined to actual relatives; hence Animism readily includes all the members of the tribe, or creates a still wider realm. But it is always of the essence of original Animism that the activity of the spirits of the dead is thought of as ill-disposed, and even harmful, so that the survivors' interest is to keep them at as far a distance as possible, and to omit nothing that will conduce to the satisfying of their legitimate wishes, which have respect, above all, to the proper treatment and burial of the corpse.

It is evident that Animism of this kind cannot, strictly speaking, yet be called religion, but is at most only a preliminary step towards it. For it wants the element of *veneration* of powers regarded as superhuman. This comes to associate itself with Animism only when the latter concentrates its interest especially upon the spirits of ancestors, and passes into a formal veneration for them, when, in short, it becomes **Ancestor Worship**.*

With reference to the pre-Mosaic religion of Israel, the question is generally raised in the form whether in the later religion traces are demonstrable of a former Animism and Ancestor Worship. At present it is the fashion to pronounce unhesitatingly in favour of the presence of both these elements. But in the opinion of the present writer, while there are undoubted traces that Animism once prevailed, the alleged indications of Ancestor Worship are all exposed to more or less serious objections.

As might have been expected, the traces of Animism are most marked in connexion with certain *mourning customs*. Not that *all* mourning customs can be explained, as has been attempted, from one and the same point of view; on the contrary, they clearly belong to different grades of religious thought, and some of them have hitherto defied all efforts at interpretation. Most of them, however, may be most simply explained as due to the naïve attempt, by means of a variety of bodily

alterations (e.g. the cropping or shaving of the head and beard, the wounding of the body by bloody incisions, etc., the covering of the face, or at least of the hair on the upper lip), to render oneself *unrecognizable* by the spirit of the dead, and thus to escape its malign influence. Also the rending of the garments, like the going barefoot and other partial uncoverings of the person, is in all probability simply a relic of an entire laying aside of one's clothes; only that absolute nakedness already in very early times assumed the mitigated form of putting on sackcloth, which was originally a coarse cloth thrown around the loins. Such a complete alteration of the outward appearance seemed best fitted to deceive the spirit of the dead, and to divert its attention from the survivors. But the same purpose was already served by going about in a filthy condition, by neglecting all attention to the hair, and by sprinkling oneself with ashes; or, on the other hand, by sitting on the ground, in dust and ashes if possible—in the place, in short, where one does not usually sit, and hence is not likely to be looked for.

Part of these mourning practices were retained without scruple even within the pale of the Jahweh religion—a proof that their original intention was no longer understood. Others, like the cutting of a bald spot on the head, the disfiguring of the beard, and the wounding of the person, were strictly forbidden by the later legislation (Lv 19²⁸ 21⁵). The circumstance that the Jahweh religion regarded all contact with a dead body, nay, even the proximity of one (Nu 19¹⁴), as defiling, is sufficiently explained by the consciousness that at least part of the mourning and burial customs had their root in another religion. At the same time, however, it is noteworthy that the Law itself still retains a manifest trace of animistic beliefs when it enacts (Nu 19¹⁵) that any open vessel without a cover fastened with a string is defiled by the proximity of a dead body. Here we have evidently the reminiscence of a very ancient practice whereby it was sought to prevent the spirit of the dead from taking up its quarters in the house—the practice, namely, before or at the moment of a death, of carefully closing all open vessels that happened to be in the neighbourhood.

The question whether Animism underwent in pre-Mosaic Israel, as in some other instances, the further development into Ancestor Worship, cannot be decided by such peremptory declarations as that Animism, in virtue of an inward necessity and hence *always*, is coupled with Ancestor Worship. Not theories but only facts must decide here; and it is simply not true that, thanks to invariable laws of evolution, the process of development has always, and in the case of all peoples, been from Animism to Ancestor Worship, and from the latter to Polytheism, and finally to Monotheism. Let us proceed now to examine the facts which have been held to prove that Ancestor Worship once prevailed among the Israelites.

Here, again, the principal rôle is played by *mourning customs*. Almost everything in this department is held to have the intention of declaring the mourner to be the slave of the deified ancestor. So, for instance, with the uncovering of the person,* the putting on of sackcloth as what was once the servile garb, and every other act by which expression is given to a humiliation of the person; and, finally, even the wounding of oneself by bodily incisions as a rite of dedication to the spirit of the dead. But these explanations

* Of the very extensive literature on Animism and Ancestor Worship (in addition to the works of Stade and W. R. Smith cited in note on p. 612b), the following may be noted: F. Schwally, *Das Leben nach dem Tode nach den Vorstellungen des alten Israel u. des Judenthums*, Giessen, 1892; J. Frey, *Tod, Seelenglaube und Seelenkult im alten Israel*, Leipzig, 1898 (denies spirit-worship, and explains mourning customs as due to fear of death or of its author); K. Grüneisen, *Der Ahnenkultus und die Urreligion Israels*, Halle, 1899 (finds indubitable traces of Animism in the OT, but none that are positively convincing of Ancestor Worship; explains (with Frazer) mourning customs in great measure as *averruncatio*; cf. also the instructive review of Grüneisen's book by Wellhausen in the *Deutsche Literaturzeitung*, 1900, No. 20); J. C. Matthes, 'Rouw en doodenverering in Israël' in *Theol. Tijdschr.* 1900, pp. 97 ff., 193 ff. (especially directed against Frey's (see above) rejection of Ancestor Worship), also 'De doodenverering bij Israël,' *ib.* 1901, p. 320 ff. [against Grüneisen].

* According to Büchler (art. 'Das Entblößen der Schulter und des Armes als Zeichen der Trauer' in *ZATW*, 1901, p. 81 ff.), by the practice in question the mourner submits himself to the dead, and declares himself his subject, by showing himself prepared to perform the hardest tasks on his behalf. The forced character of this explanation strikes one at once.

of the mourning customs appear to us far less natural than the above proposal to trace them back to an effort to render oneself unrecognizable by the spirit.

A stronger argument would be found in the custom of *funeral repasts*, if it were really beyond doubt that we have to do here with a sacrificial meal in honour of the dead. But the few passages to which appeal is made in this connexion prove no such thing. That 'mourning bread' (Hos 9⁴) is unclean is sufficiently explained by the circumstance that it is eaten by one who is defiled by a dead body. This is all that appears to be spoken of in Dt 26¹⁴, and not the use of bread for a sacrificial offering to the dead. The latter might, indeed, seem to be alluded to in the addition 'nor have I given thereof for the dead.' But a funeral repast may very readily bear a different sense from one in honour of a now deified ancestor. It may be an expression of a determination to maintain with the deceased the same fellowship in worship that subsisted when he was alive, this purpose being indicated by holding a repast once more in presence of the corpse. Still more probable appears to us to be the other explanation, according to which the special object is to provide the spirit of the dead with what it requires during its journey to the realm of death. The same purpose (and not that of a sacrificial gift proper) might be served also by the placing of food on or in the grave, if it is this and not the use of bread at the funeral repast that is alluded to in Dt 26¹⁴. In the case of Jer 16⁷, again, it is only by perfectly arbitrary alteration of the text that the passage can be converted into a testimony to sacrificial meals in honour of the dead. All that the prophet really says is that, after the coming of the Divine judgment, no one will seek to force men to take food to strengthen themselves, or to drink of the 'cup of consolation,' and thus bring the mourning fast to an end. As we see from 2 S 3³⁵ 12¹⁷, it was the custom to employ pressure of this kind; but in this whole matter we have nothing to do with Ancestor Worship, especially as there is no question of ancestors in connexion with the mourning fasts in either of these two passages any more than in 1 S 31¹³ or 2 S 1¹².

A further evidence that Ancestor Worship once prevailed in Israel has been discovered in the great importance attached to the mention of *tombs*. This, we are told, is explicable only on the ground that these graves were places of worship. Now it is a fact that the patriarchs' place of burial in a cave at Hebron is repeatedly mentioned. Abraham purchased it as a hereditary tomb from the Hittites (Gn 23^{3ff.}); and he himself (25⁹) as well as Isaac (35²⁹) and Jacob (cf. 49^{29ff.}), according to which it was the resting-place also of Rebekah and Leah, and 50^{12f.}) were buried there. But all these passages (as well as in all probability the mention of the burial-place of Aaron in Dt 10⁶) belong to the so-called Priests' Code, which cannot surely be supposed in mentioning them to have had any thought of Ancestor Worship, but only to have intended to establish the title of the Israelites, when they returned from Egypt, to a portion of the soil of Canaan. According to the Jahwistic narrative, also, Jacob desires to be buried with his fathers (47^{29f.}); but here it is not Hebron but Goren-ha'atad, on the east side of Jordan (50^{10ff.}), that is the burial-place. Besides, among the earlier sources E mentions the tomb of Deborah, Rebekah's nurse (35⁸), and J or E that of Rachel (35^{9ff.}) and of Miriam, the sister of Moses (Nu 20¹). But there is not a word anywhere of any of these tombs being a place of worship. For to attempt to discover such an allusion in the *mazzebah* set up on Rachel's tomb (Gn 35²⁰) is to forget the fact that Ancestor

Worship was paid only to *male* ancestors, rarely, if ever, to the mother of the tribe, not to speak of the impossibility of supposing the practice of Ancestor Worship at the tomb of the *nurse* of Rebekah. The object of the *mazzebah* on Rachel's grave must accordingly have been originally something other than to mark it as a place of worship.

Finally, on the theory we are discussing, it must strike us as very surprising that of all the sons of Jacob who, as ancestors of the various tribes, had the strongest claim to veneration, it is Joseph alone whose place of burial is mentioned (Jos 24³²; cf. also Gn 50²⁵, Ex 13¹⁹ [all E]). Now we do not mean to suggest any doubt that the tomb of Joseph at Shechem, that of Joshua at Timnath-serah (Jos 24³⁰), and no less those of Gideon (Jg 8³²), Jephthah (12⁷), Samson (16³¹), and the so-called 'minor judges' (10², 5 12¹⁰, 12, 15), may have had the reputation of 'heroes' graves, although we hear nothing of any cult being practised at them. But, even if Hero Worship could be proved, this would not necessarily be equivalent to Ancestor Worship. Even 1 S 20²⁸, where the practice of an (? annual) family sacrifice is presupposed, does not justify the conclusion that it was offered to ancestors.

Of all the arguments in favour of the former prevalence of Ancestor Worship, the most plausible is that based upon the injunction of the so-called *levirate marriage* (Dt 25^{5ff.}). The original aim of this practice is held to have been to provide the childless deceased with a successor and thus with a cult, since the want of the latter was counted a serious misfortune. The custom in question is already presupposed in Gn 38^{8ff.}, where indeed it appears as unconditionally binding, whereas in Dt 25^{5ff.} it has more the character of a simply moral obligation on the part of the surviving brother. But, even if levirate marriage had actually a connexion with Ancestor Worship, the Deuteronomist is certainly unconscious of this, and hence there is also little probability in the supposition that Lv 18¹⁶ 20²¹, in prohibiting marriage with a brother's wife, meant to raise a protest against Ancestor Worship.

A certain evidence of Ancestor Worship has been supposed to lie in 2 S 18¹⁸. This, however, is a mistake. For the meaning of the words there is not 'I have no son to invoke my name with veneration in the cult of the dead,' but simply 'I have no son to keep my name in remembrance,' as would be the case if there were any one who was called 'So and So, the son of Absalom.' In default of a son, the *mazzebah* must keep his name from being forgotten. Hence we are unable in this instance to discover the slightest trace of Ancestor Worship.

From 1 S 28¹³, again, where the spirit of Samuel called up by the witch is called an '*elohim*, i.e. a superhuman being, the most that can be inferred is that the spirits of the dead were one and all included in the category of '*elohim* or *bēnē elohim*'; there is no proof here of a worship of the dead, not to speak of a worship of ancestors.

To sum up the results of this whole discussion. If Ancestor Worship ever prevailed in the pre-Mosaic period—and it is psychologically quite conceivable that respect for the dead bodies and the tombs of parents inspired at least tendencies to a kind of Ancestor Worship,—no consciousness of this survived to historical times, and the whole question, as was remarked before, has at best an interest from the point of view of Archæology but not of Biblical Theology.

3. Real worship, however, was rendered by Israel in the pre-Mosaic period to the many *numina* ('*elim* [sing. '*el*, 'deity', 'god']'), which were believed to be the inhabitants and possessors of certain places, and which were venerated as such. These make their appearance most frequently in

connexion with trees, stones, and springs, which thereby assume a sacred character. Whether there ever was a time when a local *numen* of this kind (answering to the *dryads*, *oreads*, *hyads* of the Greeks) was believed to be connected with every tree, is a question that cannot be decided.* We should probably, however, find a trace of *numina loci* in every instance where, in spite of what was for Jahwism a matter of course, namely, the identification of the *numen* with Jahweh, the original sacredness of the particular tree, etc., has survived. This comes out most distinctly in Gn 28¹¹⁻¹⁶ (E, except vv. 13-16), where Jacob sets up the stone, by which he had lain and had a remarkable dream, as a *mazzēbāh* and anoints it with oil, vowing at the same time that upon his return he will make this *mazzēbāh* a *bēth-ēl* or 'god's house.' As a matter of fact, after his return and the erection of an altar, he calls the place 'Ēl-bēth-ēl, 'God of Bethel' (35⁷ [also E]). It is plain that the anointing with oil (28¹⁸) was intended originally for the deity connected with the stone, and that the object of the whole narrative is to give a sanctity in the sense of Jahwism to the time-hallowed *mazzēbāh* of Bethel. A similar instance of Jahwism superseding an ancient view-point that had been taken over from the pre-Mosaic period, is present perhaps also in Jos 24²⁶ (E), where the setting up of the sacred stone under the oak in the sanctuary of Jahweh is attributed to Joshua, whereas, according to Gn 12⁶, the sacred tree was in existence as early as the arrival of Abraham, appearing as 'the soothsayer's (*Mōreh*) terebinth'; that is to say, in all probability it was a spot where the *numen* connected with the tree gave oracles through a priest or prophet. But the sacred stone probably stood from the first in connexion with the tree, to which circumstance, no doubt, the designation of the latter as 'terebinth of the *mazzēbāh*' [read in Jg 9⁶ *mazzēbāh* for *muzzāb*] is due. Pre-Jahwistic in all probability is also the sacred stone-circle near the Jordan at Jericho, from which a frequently named sanctuary (*hag-Gūlgāl*, 'the [stone] circle') derives its name. According to Jos 4²⁻⁸ and v. 20st, these stones, twelve in number after the number of the tribes, were set up by Joshua at Gilgal in memory of the miraculous passage through the dry bed of the Jordan; according to v. 9 (J), on the other hand, they were erected in the midst of the river itself. Both statements are manifestly attempts to give to the originally heathen character of this stone-circle a stamp that would be unobjectionable to Jahwism.—An ancient sanctuary is, doubtless, to be discovered also in 'the serpent's stone' ('*eben haz-zōheleth*') beside 'the fuller's spring' ('*Ēn-rōgāl*') to the south of Jerusalem, for in 1 K 1⁹ it serves as a place of sacrifice.—Of other sacred stones we hear nothing, there being no mention even of meteoric stones, although these played their part elsewhere on Semitic soil. The notion that the sacred Ark (see below, p. 628^b) contained meteoric stones, rests upon pure conjecture. On the employment of *mazzēbōth* in the cult of Jahweh, see below, p. 620.

Amongst sacred trees we have already made mention of 'the soothsayer's terebinth' at Shechem, which is in all probability identical with the terebinth under which, according to Gn 35⁴ (E), Jacob buried the foreign idols, as well as with 'the augurs' or prognosticators' (*Mēōnēnim*) terebinth' of Jg 9³⁷. To the same category belongs the 'terebinth of Mamre' at Hebron, which is constantly brought into connexion with Abraham (Gn 13¹⁸

14¹³ 18¹. The circumstance that in all these passages we find the plural, 'terebinths of Mamre,' is due to a correction made in dogmatic interests, namely, to get rid of the single sacred tree: this is clear from 18¹ as well as from the LXX, which has uniformly the singular). We may compare, further, the tamarisk of Abraham at Beersheba (Gn 21³³); 'the oak of weeping' ('*allōn-Bāchūth*') named after Deborah at Bethel (35⁵); the palm of the female judge Deborah, between Ramah and Bethel (Jg 4⁵); the terebinth at Ophrah, beside which the angel of Jahweh appeared to Gideon (6¹¹); the pomegranate (1 S 14²), and the tamarisk on the height of Gibeah (22⁹), under which Saul executed judgment; and, finally, the tamarisk [in 1 Ch 10¹² 'terebinth'] at Jabesh, beneath which the bones of Saul and his sons were interred.

In all the above instances we have to do presumably with trees which, as the abode of local *numina*, were already sacred to the Canaanites, and which for the same reason were so regarded by the Israelites as well, only that the process early began of bringing them into relation to the patriarchs, and thus to the cult of Jahweh, thereby removing all ground of offence connected with them. Nearly all of them now make their appearance as hallowed by the building of altars to Jahweh and by His worship in proximity to them. It is quite true that in the beliefs of the people the old conception of a special *ēl* of the particular tree may have maintained itself tenaciously, even if without a clear consciousness, till far into the monarchical period.—Of the trees and tree-stumps or poles ('*āsherīm*'), which till towards the end of the pre-exilic period were reckoned amongst the necessary apparatus of a place for the worship of Jahweh, we shall have to speak later on (see p. 620).

Finally, in regard to sacred springs, we must first of all infer from the analogy of Semitism elsewhere, that in primitive times the most important, if not all, springs were regarded as the abode of a local *numen*. Express testimony to the sacredness of particular springs—whether on their own account or owing to a sanctuary erected near them—is forthcoming, indeed, in only a few instances. Thus, according to Gn 14⁷, Qadesh (i.e. 'sanctuary') in the desert was known also as 'Ēn-mishpāt, 'spring of judgment.' This name might indeed have been bestowed upon it in allusion to the judicial decisions given by Moses at Qadesh during the wilderness wanderings, but it may also point, above all, to the presence of an oracle in the sanctuary by the sacred spring. In Gn 16¹⁴ the (assuredly long established) sacredness of the spring *Lahai-roi* in the desert is traced back to an appearance of Jahweh to Hagar; and in 21²⁸ that of the spring at Beersheba to a compact by oath between Abraham and Abimelech. Adonijah, according to 1 K 1⁹, holds a sacrificial meal at 'the serpent's stone' (see above) beside 'the fuller's spring' (the modern Job's Well); and v. 38 tells how Solomon was anointed king at Gihon (the modern Virgin's Spring). The latter circumstance would be inexplicable unless a high degree of sanctity attached to Gihon.

The above described preliminary step towards a religion, which consisted in the belief in numerous *ēlim*, and probably also in the presenting of offerings to them, has been designated Polydemonism, as distinguished from Polytheism. No exception need be taken to the name, provided it be understood that in this instance 'demon' stands for a Divine being of an inferior order and not simply for an evil spirit.

4. It is another question when we ask whether traces are to be discovered in Israel of a once prevailing Polytheism alongside of the traces of

* That this was the case with 'ēlāh and 'ēlōn, 'terebinth,' might be certainly assumed if these Hebrew names were really connected with 'ēl, 'deity,' and did not rather mean 'the strong tree.'

Polydemonism. This question is generally answered in the negative by the adherents of the Ancestor Worship hypothesis. They tell us that Jahwism, with its toleration of the worship of *one* God only, had the effect of suddenly interrupting the natural transition from the Ancestor Worship of the family to Hero Worship as the cult of the progenitors of the tribe, and finally to Polytheism as the cult of tribal heroes exalted to Divine rank or of what were once merely local *numina*. Others, however, discover traces of actual gods, and thus of a once prevailing Polytheism in Israel.*

In dealing with this question we leave entirely out of account the numerous attempts to trace all the Scripture characters in primeval and patriarchal times to astral myths, or at all events to explain the majority of them (notably Abraham and Sarah, but also Isaac and Jacob, and, from the primeval period, at least the wives and the sons of Lamech [Gn 4^{19a}], as well as Samson in the period of the Judges) as depotentiated forms of what once were gods. We fail to see in any of these attempts anything more than unprovable fancies. As little can we consent to regard the use of the plural form 'Elohim for 'God' as a relic of former Polytheism; it is much more likely that it is a so-called *pluralis majestatis*. At the very most it might be asked whether, perhaps, in certain tribal and personal names we have not a shortened form of originally theophorous names. Thus it has been proposed to find in *Gad* (Gn 30¹¹, Is 65¹¹) a god of Fortune, and in *Asher* (Gn 30¹³) the male counterpart to the goddess Asherah. But, even supposing that *Gad* were shortened for 'Obēd Gad, 'worshipper of Gad,' or some similar form, the name of this mixed tribe (sprung from a concubine of Jacob) would prove nothing as to a specifically Israelitish god of Fortune. Moreover, if such an idea had been conveyed by the name, it is hardly likely that it would have been borne by a prophet of Jahweh living in the time of David (1 S 22⁵ *et al.*). And as to *Asher* there is no trace elsewhere of a god of this name, while the explanation of the name as 'the happy one' is perfectly satisfactory. On the other hand, 'Anāth in Jg 3³¹ 5⁶ should decidedly be regarded as abbreviated from 'Obēd Anāth, 'worshipper of (the Canaanite goddess) Anāth.' But no one can prove that Shamgar the son of Anāth is rightly spoken of in the redactory gloss of Jg 3³¹ as an Israelite. The name is there evidently borrowed from 5⁶, where, according to Moore (*Journal of American Oriental Society*, XIX. ii. p. 159 f.), he is meant to be taken as the father of Sisera. In the opinion of the present writer, no weight at all can be attached to the somewhat numerous names from the periods of the Judges and the monarchy, compounded with *Ba'al*, 'lord,' or *Melekh*, 'king.' For in the most of these it is simply Jahweh Himself that is meant by *Ba'al* or *Melekh*. So it is, for instance, with *Jerubba'al* (i.e. 'he who contends for Ba'al,' notwithstanding the opposite interpretation of the name in Jg 6³²); 'Eshba'al, 'man of Ba'al,' the son of Saul (1 Ch 8³³ 9³⁰); *Meriba'al*, 'man of Ba'al,' the son of Jonathan (8³⁴ 9⁴⁰); *Bēliada'*, 'Ba'al knoweth,' the son of David (14⁷). The preservation of the original form of the last three names only in Chronicles, *-ba'al* having its place taken in Samuel by *-bōsheth*, 'shame' (2 S 2²⁵ 10 *et al.*, 4¹ *et al.*; except that 2 S 5¹⁶ substitutes 'Eliada', 'El knoweth,' for *Bēliada'*), proves simply the eagerness of later generations to eliminate as far as possible the hated name of Ba'al, as is already enjoined in Hos 2¹⁸. But, granting that in certain names from that period it is actually

the *heathen* Ba'al or Melekh that is meant, this would be simply an evidence of Israelitish *idolatry* due to foreign influences. That Israel had at all times tendencies to such idolatry has not as yet been disputed; but this cannot, of course, be counted amongst the relics of a once prevalent *Israelitish* Polytheism.

Further, if it should be objected that the OT tradition itself quite unambiguously attributes to the people in primitive times the worship of heathen gods, we reply that this is so, but that the passages in question are much in need of closer examination. Gn 31^{30a} drops out of consideration. If Rachel stole the god (in v. 34^c called *tērāphim*) of her father Laban, this would at the most be an indication that the Teraphim cult was introduced from the Aramæan sphere, for Laban is regarded by the narrator as an Aramæan. We shall see afterwards, however, that upon *Hebrew* soil the Teraphim cannot have had the significance of a foreign god.—On the other hand, in Jos 24² 15 (E) it is really assumed that the forefathers of the Israelites on the other side of the Euphrates (i.e. before the time of Abraham) as well as in Egypt (v. 14) served 'other gods.' That does not mean that from the first they had their own specifically Israelitish gods, but that they abandoned themselves to the worship of the foreign gods in whose country and sphere they sojourned. In this matter the narrator simply follows the theory to which even David gives drastic expression (1 S 26¹⁹) when he speaks of expulsion from Jahweh's own land as amounting to a compulsion to serve foreign gods.—But Am 5²⁶ cannot, in view of the whole context, be understood as alluding to idolatry on the part of Israel during the period of the wilderness wanderings, but only as containing a threat of something to come.—In Ezk 20⁷ 24 Israel is charged with having defiled itself with the idols of *Egypt*, and with refusing to abandon these even in the wilderness. Thus we have here again to do with *foreign* gods, and not with a native Israelitish Polytheism.

Finally, the possibility might remain that in certain beings of 'demon' order, occasionally mentioned, a reminiscence has survived of actual gods that were once worshipped. In favour of this view might be urged the analogy of other monotheistic religions, in which the gods of past heathen times are not straightway declared to be mere figments of the imagination, but (at least in the beliefs of the people) are degraded to 'demons' or spook forms. Thus lived on the once mighty gods of Greece among the early Christians; and so did the Arab tribal gods even after the conquest of Islam, just as the ancient German gods still survive in various superstitions that prevail amongst Christianized Germanic peoples. As a matter of fact, we find in some late passages of Scripture what may be pronounced certain, or at least very probable, examples of this depotentiating of former popular gods: e.g. Dt 32¹⁷, where they are spoken of as *shēdim*, 'demons,' to which at one time sacrifices were offered (cf. also Ps 106³⁷, where the once existing practice of offering children is thought of as having these 'demons' for its object); 2 Ch 11¹⁵, where by the term שְׁדִים (*šē'irim*, 'goats' or 'goatlike forms'), the Chronicler evidently understands, above all, the heathen popular gods, for whom Jeroboam I. is said to have appointed priests. But in all these instances we have to do expressly with idolatrous worship of foreign gods, and not with relics of an Israelitish Polytheism. And when in Lv 17⁷ it is forbidden to offer the usual sacrifices any more to the *šē'irim*, what comes here once more to the front is the belief in local *numina*, field spirits, with which there was an unwillingness, in spite of the uncontested

* Cf. the thorough discussion of all the controverted questions dealt with in what follows, in Baethgen's *Beiträge zur semit. Religionsgeschichte* (Berlin, 1888), p. 131 ff.

sole legitimacy of the Jahweh cult, to break completely, seeing that these beings could so readily injure man. But these field spirits are not, properly speaking, 'gods' any more than the spirits that make their abode in sacred trees and stones. Elsewhere, too, the *sē'irim* are nothing more than 'demon' forms, akin to the fauns and satyrs of classic mythology. In Is 13²¹ they perform their dances in the destroyed palaces of Babylon, in 34¹⁴ they hold their gatherings amongst the ruins of Edom.

Like the *sē'irim*, *Lilith* (i.e. 'the nightly one'), who, according to Is 34¹⁴, dwells in the ruined palaces of Edom, belongs in all probability to the category of monstrosities to which the popular belief gave birth. The same is the case with the *Alākāh* of Pr 30¹⁵, the mention of whose two daughters is sufficient to show that it is not the common leech that is meant, but that the name, like the Arabic '*Alāk*' or '*Aulāk*', stands for a blood-sucking 'demon.' In another connexion we shall come upon still further remnants of a belief in and fear of 'demons.'* '*Azazel*', again, to whom on the Great Day of Atonement the goat laden with the sins of the people was sent forth (Lv 16^{8, 10, 21ff.}), is evidently an unclean 'demon' who inhabits the desert. At the same time it is very questionable whether this figure can be regarded as a survival from the pre-Mosaic belief in 'demons,' and was not rather first borrowed from a foreign source during the Exile.—Of the *Cherubim* and *Seraphim* we shall not speak till later on, because these, although certainly a product of non-Israelite soil, attained to something of an independent significance in Jahwism. The *Satan*, on the contrary, viewed as an individual, is not met with till the post-exilic period.

ii. **FORMS OF WORSHIP, AND OTHER RITES AND USAGES.**—The essential character of every ancient religion reveals itself pre-eminently in the *worship* it offers to the Deity. That such worship formed an element also in the pre-Mosaic stage of the religion of Israel is to be assumed, and various traces of it survived for long even in the cultus of Jahweh. These are recognizable by their great resemblance to, or even complete identity with, the ritual usages of the heathen Semites. As in the case of mourning customs, the original meaning, it is true, is often difficult to recognize, or the features of the custom have been so toned down or completely transformed as to make identification impossible.

1. By far the most important ritual transaction in the primitive stage of religion is *sacrifice*. To the later Israelitish conceptions this appeared almost exclusively from the point of view of a *gift*, and, above all, as an offering of food to the Deity; even fat and blood are expressly named in Ezk 44⁷⁻¹⁵ as food of Jahweh. It cannot be doubted that this aspect of the matter was not wholly wanting even in the pre-Mosaic period, and that offerings of fruit in particular were presented to the local *numina*, by being deposited within the sacred precincts (as was done afterwards with the shewbread), or being thrown into the sacred wells.

* Cf. E. Ferrière, *Paganisme des Hébreux jusqu'à la captivité de Babylone*, Paris, 1884; C. H. Toy, 'Evil Spirits in the Bible' in *JBL* ix. pt. i. p. 17 ff.; J. van der Veen, 'Daemonologie van het Juidisme' in *Theol. Studiën*, 1890, p. 301 ff. There is the closest connexion between the belief in 'demons' (as also, indeed, the worship of local *numina*) and the great majority of the manifold forms of magic and soothsaying. Much of the latter may have been first taken over by Israel on Canaanite soil, but not a little must have belonged to the pre-Mosaic stage. Cf. on this point the classical article of W. R. Smith, 'On the Forms of Divination and Magic enumerated in Deut. xviii. 10 f.' in *Journal of Philology*, xiii. p. 273 ff., and xiv. p. 113 ff.; also T. W. Davies, *Magic, Divination, and Demonology among the Hebrews and their Neighbours*, etc., London, 1898 (also as Dissertation, Leipzig, 1901).

Also the ordinary burnt-offering, which was *all* assigned to the Deity (hence called also *kālil*, 'whole-offering'), can scarcely be regarded otherwise than as an offering of food, i.e. as a gift. But, on the other hand, it is impossible to explain all sacrificial rites from this point of view. The extraordinary importance which is manifestly attributed to the blood of the sacrificial victim carries us forward to another idea, namely, that of the *sacramental communion* established between the god and his worshippers through their common eating of the (*eo ipso* sacred) body of the sacrificial victim. And, since from the earliest times the blood is regarded as pre-eminently the seat of the life, the sacramental communion was undoubtedly reached in the most primitive stage by drinking the sacrificial blood, the same blood as was assigned in some way (it might be by smearing the image or the altar, or by pouring out the blood within the sacred precincts) to the Deity. A clear trace of this notion—although in a form that has been very much toned down—has survived in Ex 24^{5ff.}. When we read here of Moses sprinkling the altar with one portion of the blood and the people with the other, and thus sealing the covenant between Jahweh and the people, the main feature of the rite is the common share in the blood which establishes a communion, and which is hence called by Moses 'the blood of the covenant.'

It could not have been long till the advance of culture gave rise to repugnance to the drinking of blood. Hence arose naturally a partition of the sacred food; the portion of the Deity being the blood along with the fat (the latter in all probability on account of the facility with which it could be made over to the Deity by letting it go up in smoke), the portion of the worshippers being the flesh. The sacramental communion, however, finds expression in late as well as in early times in the consumption of the sacrificial meal at a sacred spot, in eating and drinking 'before Jahweh' (in early times, no doubt, in the actual presence of the image). That the flesh even in these so-called meal-offerings bore a sacred character, is evident from the circumstance that the mingling of sacred and common food in the body was sought to be avoided by fasting previous to the sacrificial meal. The record of this undoubtedly very ancient practice has come down to us only in connexion with war (Jg 20²⁶, 1 S 7⁶) and mourning (1 S 31¹³, 2 S 3³⁵ [the case is different in 12¹⁶]). The strict command to avoid the use of blood for food, which was afterwards extended to the case of animals that could not be offered in sacrifice, may have been originally due not simply to the fact that the blood was reserved for the Deity, but also to the fear of absorbing a second soul along with the blood, the seat of life.

It cannot be determined whether, in addition to what were afterwards the usual victims, other animals were used for sacrifice by the tribes of Israel in pre-Mosaic times. On the other hand, it may be asserted with confidence that in special cases *human sacrifice* was practised in order to propitiate the Deity or gain His favour.* This is witnessed to by the persistency with which, down to the 7th cent. B.C., the sacrifice of the first-born is regarded as the highest act of service, in spite of the clear protest uttered against this notion in Gn 22 (E). The teaching of the latter narrative plainly is that Jahweh is satisfied with the disposition which is prepared to offer to Him one's dearest, and that He has appointed the substitutionary offering of an animal in place of the

* Cf. on this point the exhaustive discussion of A. Kamp-hausen, *Das Verhältniss des Menschenopfers zur israelit. Religion*, Bonn, 1896.

actual sacrifice of a child. Nevertheless, Ahaz (2 K 16³, very probably during the straits to which he was reduced by the attack of the allied Aramaeans and Ephraimites) and Manasseh (21⁶) both caused a son to pass through the fire; and in Mic 6^{7b} the question is evidently submitted to very serious consideration whether the sacrifice of the firstborn is not to be offered as the surest expiation of guilt.

From passages like Dt 12³¹, 2 K 17¹⁷ 23¹⁰, Ezk 16^{20f}, 20³¹ 23^{37ff} (on Jer 19⁵ see below) it would appear as if these burnt-offerings of human victims were presented not to Jahweh, but to Melekh (LXX Moloch), i.e. 'king [of heaven]' as a heathen god. Apart, however, from Gn 22, this is expressly opposed by Jg 11^{30f},³⁶ according to which Jephthah, in terms of his vow, sacrificed his daughter to Jahweh. In 2 K 3²⁷ we read of how Mesha, king of Moab, offered his firstborn, naturally to Chemosh, the god of the land; but the now mutilated close of the narrative plainly shows that the writer was firmly convinced of the efficacy of such an offering, and would no doubt have expected that a similar sacrifice to Jahweh on Israelitish soil would be equally efficacious. Jer 7³¹ 19⁶ [delete in the latter the gloss 'as burnt-offerings to Baal,' which is wanting in the LXX] 32³⁵ plainly show that the sacrifice of children was popularly supposed to be well-pleasing to Jahweh. And even Ezekiel, to whom such offerings, like every other form of cultus in pre-exilic times, appear as simple idolatry, reckons the sacrifice of all the firstborn among the statutes 'that were not good' (20^{25f}), which Jahweh Himself gave to the people as a punishment for their backsliding. This strange assertion is in all probability to be understood as meaning that the command to offer the firstlings of cattle gave rise to the erroneous notion that human sacrifice was well-pleasing to God.

If human sacrifices were, in the nature of things, burnt-offerings or whole-offerings, thus constituting pre-eminently valuable *gifts*, yet in the earliest times the use made of the blood must have held an important place in the same connexion. And, seeing that in the case of the offering of children the blood in question was closely related to that of the offerer, this species of sacrifice also must unquestionably be regarded from the point of view of the establishing of a sacramental communion between the offerer and the Deity.

A somewhat different character belongs, on the other hand, to other two rites, which are certainly also pre-Mosaic, namely the ratifying of a covenant by cutting one or more animals in pieces, so that the contracting parties might pass between the pieces laid opposite one another; and the *hërem* or ban.

In Gn 15^{9ff}, 17 (J), in the case of the 'covenant' of Jahweh with Abraham, the first named of these rites is enjoined and performed by God alone; but here we have to do not with a covenant in the ordinary human sense, but with a *religious* 'bërith', whose essence lies in the Divine institution, demand, and promise. God accommodates Himself here to human custom by passing between the pieces of the dismembered animal, just as in Jer 34^{18f}, the contracting parties pass between the parts of the calf cut in twain. The whole transaction in so far resembles a sacrificial one, as the kinds of animals enumerated in Gn 15⁹, as well as the calf of Jer 34¹⁸, all belong to the class usually employed for sacrifice; nor is it impossible that the blood of these animals was in some way utilized as sacrificial blood. The kernel of the rite is manifestly the invoking of a curse upon oneself in case of a breach of the obligation undertaken.* This is clearly alluded to in 1 S 11⁷ (as

well as in the incident of Jg 19²⁹, which must be interpreted in the same way), only that the curse invoked must have originally concerned not the cattle, but the person of the man who was false to his obligation.

The ban (Heb. ערם) * was, without doubt, originally a war custom, and consists in the devoting † (even before the actual battle, Nu 21², Jos 6¹⁷, 1 S 15^{3ff}) of the enemy and all their belongings to destruction—in Israel, in the post-Mosaic period, naturally in honour of Jahweh as the God of war. Schwally rightly denies that the *hërem* has the character of an offering or present. To 'ban' means to give over to destruction; the religious element is found in the complete renunciation of any profit from the victory, and this renunciation is an expression of gratitude for the fact that the war-God has delivered the enemy, who is His enemy also, and all his substance into the hands of the conqueror. The earliest practice appears to have required the massacre of everything living, whether man or beast, and the burning or destroying in some other way of houses and property; cf. Jos 6²¹, 24 (after the capture of Jericho) 8^{24ff}, 10²⁸, 1 S 15^{3ff} (where the sparing of the best of the cattle for a future offering, and the failure to put to death the Amalekite king Agag, are held up by Samuel as a transgression on the part of Saul) 22¹⁹ (although in this instance the expression *hërem* is not employed); so in Mic 4¹³ in an eschatological prophecy the 'devoting' of all the substance of the peoples that besiege Jerusalem is announced. The original rigour of the *hërem* appears in a somewhat milder form in Dt 2^{34f}, 3^{6f}, Jos 8², 27 11¹⁴, where human beings, indeed, are all to be put to death, but the cattle and other possessions of the enemy are to fall as spoil to the Israelites. According to Dt 20^{16ff}, the ban is to be enforced with unsparring severity in the case of Canaanite cities, whereas, according to v. 13^{ff}, in far distant non-Canaanite cities only the males are to be slaughtered; the women and children, the cattle and other property, are to be regarded as spoil. This rule is followed in the case of the Midianites, according to Nu 31^{7ff}, but Moses afterwards (v. 17^{ff}) demands the slaughter also of all the female prisoners except those that were still virgins. A further mitigation of the practice is found, finally, in the possibility of making some of the prisoners slaves of the sanctuary; cf. Jos 9²³ and the *Nëthinim* or 'given ones' amongst the *personnel* of the post-exilic temple.

The *hërem*, as a solemn devoting to destruction, might, however, include in its scope even Israelites, and not only individuals but communities. Thus Dt 13^{16ff} requires the putting to death of *all* the inhabitants of any Israelitish city that fell into idolatry, and the burning of *all* their property as 'a whole-offering to Jahweh.' ‡ According to Jg 20⁴⁸ all the members of the tribe of Benjamin were slaughtered and their cities burned on account of the outrage at Gibeah; according to 21^{10ff}, the ban was executed on all the inhabitants of Jabesh-gilead with the exception of 400 virgins who were

action of Saul in 1 S 11⁷ as a 'Schwur- oder Bundesritus'; the dismembered bodies have in all the instances above cited the significance of an 'Eidopfer', to which numerous analogies are found in other religions as well.

* Cf. Schwally, *l.c.* p. 29 ff.

† In Jer 12³ the expression 'dedicate (lit. hallow) them for the day of slaughter' answers exactly to the elsewhere employed 'ban.'

‡ In view of what has been said above, this cannot be taken to mean that the destruction in consequence of the *hërem* actually represents a whole- or burnt-offering, but that it has this force *comparatively*, being as well-pleasing as a burnt-offering. Schwally very appropriately refers to the statement of Mesha on the Moabite Stone, l. 11 f.: 'and I slew all the people of the city, a pleasing spectacle for Chemosh and for Moab.' In the same way is explained why the touching of the 'devoted' thing roused the anger of the Deity (Jos 7²⁶).

* F. Schwally (*Semit. Kriegsaltertümer*, Heft 1, 'Der heilige Krieg im alten Israel,' Leipzig, 1901, p. 54) well describes the

urgently required. That the man who stole anything of what had been 'devoted' came himself under the ban, because he had broken the 'taboo' caused by the *hērem*, is shown by the case of Achan (Jos 7^{1st}). The 'holy indignation of Jahweh,' which burns at first against the whole people (v. 12st), is appeased only when Achan is stoned to death (v. 26). Nor is it easy to understand 1 S 14⁴⁵ except to mean that the curse resting upon Jonathan (cf. v. 24), in which he had involved himself by disregard of Saul's prohibition, as of a kind of *hērem*, was removed by drawing lots for and putting to death a substitute. In 2 S 21^{3st} Israel is delivered from the consequences of the curse of the Gibeonites by the giving up and putting to death of seven members of the family of Saul, whose action was responsible for the curse.

A unique character belongs to the case supposed in Lv 27^{28st}, that an Israelite might 'devote' any possession of his, including human beings (slaves or captives taken in war?) and cattle. Everything so 'devoted' is most holy to Jahweh: if human beings, they must be put to death.

The circumstance that in the earliest times there is no trace of drink-offerings of wine, is explicable very simply on the ground that these were possible only after Israel had become used to vine-culture in Canaan. On the other hand, the libations of water mentioned as prayer-offerings before battle (1 S 7⁶, cf. also 2 S 23^{5st}) are in all probability a survival from a time when water (in the desert) was considered an article of value. Extraordinary occasions such as war (see below) led to a revival of the primitive ritual practice.

Regarding the usual sacrificial transaction we have information in the very word for altar, namely *mizbēah*, i.e. 'place of slaughter.' This shows that the victims, as is presupposed also in Gn 22⁹, were slain upon the altar itself. The horns of the altar, which afterwards played a rôle in connexion with the application of the blood (Lv 4⁷ et al.) and the function of the altar as an asylum (1 K 15^{6st}, 2²⁸), should in all probability be traced back to the custom of spreading the skin of the victim, horns and all, over the altar. This custom can be proved also in the case of heathen cults, and is thus presumably older than Jahwism. Apart from other considerations, the latter supposition is favoured by the circumstance that in the earliest times altars were composed either of large flat stones (Jg 6²⁰ 13¹⁸, 1 S 6¹⁴ 14^{38st}) or of piles of turf or unhewn stones (Ex 20^{24st}). The introduction of artificial horns would follow after altars came to be constructed of different materials. The explanation of the horns as symbols of strength in connexion with the worship of Jahweh as a bull-God could thus, in any case, have been introduced only at a later period. The circumstance that the number of horns required by the Priests' Code (Ex 27², cf. Ezk 43¹⁵, 20), which no doubt embodies here a long-established usage, is four (one on each corner of the altar), proves nothing against the view that the horns were originally only two in number.

2. The essentials of a place of worship in the earliest times probably always included a *mazzēbāh* (מִזְבֵּחַ) and a sacred tree, or, in default of the latter, a sacred tree-stump or pole. It is true that Ex 23²⁴ 34¹³ and Dt 7⁵ 12⁶ convey the impression that in Israel the *mazzēbāh* was first introduced in imitation of Canaanite modes of worship; but such a notion is contradicted by the prevailing belief (see above, p. 616*) that the *mazzēbāh* was the abode of the *numen loci*. This belief had its origin as far back as the period of Polydemonism, and Jahwism retained it to this extent, that even in this religion the *mazzēbāh* was viewed as the symbol and pledge of the nearness of Jahweh. It

is thus all the more readily comprehensible that down even to the late monarchical period no offence was taken at the *mazzēbāh*. In Gn 31⁴⁵, 51st, the *mazzēbāh* serves as a witness of the agreement between Jacob and Laban. Moses himself erects at Sinai not only an altar to Jahweh but twelve *mazzēbōth*, 'according to the number of the tribes of Israel' (Ex 24⁴). These stones cannot possibly have possessed for this narrator the same significance as the sacred stone of Bethel had for the narrator of Gn 28^{17st}. The two brazen pillars at the entrance to Solomon's temple (1 K 7^{15st}) should also, no doubt, be regarded as representing a form of *mazzēbāh*. According to 2 K 12¹⁰ (9) [read, with the LXX, 'by the *mazzēbāh*' instead of 'by the altar'] a *mazzēbāh* stood in the forecourt of the temple; in Hos 3⁴ the *mazzēbāh* is taken for granted as part of the *materia sacra* of the regular worship of Jahweh; and in Is 19¹⁹ the *mazzēbāh* spoken of is not an obelisk, but a stone which serves along with the altar to mark a spot consecrated to the worship of Jahweh. We are told in 2 K 18⁴ that the *mazzēbōth* had already been destroyed by Hezekiah, but this should probably be set down as an antedating of the cultus reform of Josiah (2 K 23¹⁴); for the first [unless Mic 5¹² (13) is as early as the time of Manasseh] prohibition of the *mazzēbāh* appears in Deuteronomy (16²²; cf. also Jer 2²⁷ [if the mockery of the prophet has for its objects '*āshērīm* (see below) and *mazzēbōth*] and Lv 26³). As with the worship on high places, the erecting of '*āshērīm* and *mazzēbōth* by the kings prior to Josiah is imputed to them as a fault by the Deuteronomistic redactors of the Book of Kings (1 K 14²³, 2 K 17¹⁰).

Like the *mazzēbāh*, the '*āshērāh* (אֲשֵׁרָה, plur. אֲשֵׁרִים), i.e. the sacred tree-stump or pole, must also be reckoned among the survivals of the pre-Jahwistic cultus, although it likewise held its place for centuries unopposed beside the altars of Jahweh (as in Jg 6^{26st} it appears beside an altar of Baal). It is, without doubt, a substitute for the sacred tree (see above), which was not available everywhere (especially, for instance, in the case of hastily erected altars in the desert). But, as the regular sanctuaries on the high places would always have green trees in their neighbourhood, there was less occasion for the mention of the '*āshērīm* [in 1 K 14²³ and 2 K 17¹⁰ they are a superfluity, due probably to the eagerness of the Deuteronomist to condemn alike the trees and the '*āshērīm*]. That the '*āshērāh* said to have been cut down by Hezekiah (2 K 18⁴) and restored by Manasseh (21³) stood in the temple down to the time of Josiah, is shown by its removal and burning in the Kidron Valley (2 K 23⁶). In like manner an '*āshērāh* (according to 1 K 16³³, first set up by Ahab) stood in Samaria (2 K 13⁶; cf. also 1 K 14¹⁵, 2 K 17¹⁶). The command to cut down (Ex 34¹³, Dt 7⁵) or to burn (Dt 12³) heathen '*āshērīm* implies at the same time, of course, a repudiation of their use in Israel. They are expressly forbidden in Dt 16²¹ (cf. also Mic 5¹³ (12), where it is predicted that they are to be plucked up; Jer 17², Is 27⁹, and the late addition to Is 17⁹). With the exception perhaps of Mic 5¹³, none of these passages goes further back than the time of Josiah. There is, of course, a complete distinction between the '*āshērāh* as the sacred pole, and the goddess Asherah, whose existence appears to be now placed beyond doubt by the Tel el-Amarna letters. Her worship (1 K 15¹³, 2 K 21⁷ 23⁴) wears the aspect of pure idolatry, and hence does not come under the category of the religion of Israel.

The use of other figures besides the *mazzēbāh* and the '*āshērāh* to represent the nearness of the Deity cannot be proved, to say the least of it, for the pre-Mosaic period. In favour of such a view may

be urged the tenacity with which the Jahweh cultus clung for a very long period to the use of images of Jahweh; and it is not impossible that in these the form of the *ēlīm* that were once worshipped had been handed down. On the other hand, the notion cannot be admitted that any but images of Jahweh were ever tolerated within the pale of the Jahweh worship. This must hold good also of the *Tērāphīm*, even if these were originally derived from the realm of heathendom; and the whole question must accordingly be left for discussion in connexion with the pre-Prophetic cultus of Israel.

3. But, again, the worship of Jahweh retained a number of *ritual practices* which may be held with all the more certainty to have been derived from the pre-Mosaic period, since they one and all have their analogues in the practices of the heathen Semites. This category includes *walking barefoot in sacred places* (Ex 3⁵, Jos 5¹⁵; even the going barefoot in token of mourning, 2 S 15³⁰, 1 S 20²⁴, like other forms of uncovering, has to be looked at, as explained above, from the religious point of view); *washing the person and the clothes* (Ex 19¹⁰ and often) *before approaching the presence of the Deity* (cf. the changing of the clothes, Gn 35²). When we find in the Priests' Code constant injunctions to wash the person and the clothes in order to recover lost Levitical purity, no doubt the primary intention of these is that outward physical purity is to be the symbol and representation of inward. But, all the same, there is here a relic of those conceptions which led to the attempt, by means of external cleansing, to escape direct injury from demons or even from an angry god. And if in Ex 28⁴³ and Lv 6⁴ (19) 16²³ the priests are enjoined to wear their official garments only when they are conducting Divine service, the older passage, Ezk 44¹⁹, shows that there was a further intention in this than simply to guard against a profanation of the holy garments. The danger was rather that by touching these garments the people would be 'hallowed,' i.e. become forfeit to the sanctuary, and thus require a ransom to be paid for them. Here, again, we make acquaintance with the primitive notion that all close contact with the Deity or with anything consecrated to Him was, if not fatal, at least dangerous. But amongst forms of close contact was included the act of *looking upon*; hence the covering of the head in presence of the Deity, as is done by Moses in Ex 3⁶ and Elijah in 1 K 19¹³. The same idea, that the beholding of the Deity is fatal, meets us in Gn 16¹³ 32³⁰, Ex 19²¹ 33²⁰. In all these instances it is true it is Jahweh that is in question, but it may be regarded as certain that the idea is an inheritance from the pre-Jahwistic era.

4. Of *priests* in pre-Jahwistic times no recollection has been preserved. In any case there was no need of their services for offering sacrifice, seeing that this office could be performed equally well, even in the worship of Jahweh, by any head of a household. The more menial services were discharged, as still continued to be the case under Moses (Ex 24⁵), by the young men. On the other hand, designations like 'Oracle-terebinth' (see above, p. 616*) point to the existence of Oracle priests at particular sanctuaries, just as Gn 25²² naively assumes the existence of a Jahweh-oracle in the time of Rebekah.

5. There are various passages from which (in combination with the hypothesis of Ancestor Worship) the inference has been drawn that at first only the family or the tribe was regarded as the *sacral body*. Thus in Ex 21⁶ the slave who does not wish to go free is to be pinned by the ear to the doorpost 'before God,' and thus incorporated with the sacral body belonging to this God. The Passover ceremony (see below) likewise

assumes the family to be the sacral body. In 1 S 20⁶ we read of an annual offering by the family of David; but this does not prevent David's being at the same time missed at a sacrificial meal (for in ancient times this character belongs to all eating of the flesh of an animal that was lawful for sacrifice) at the New Moon; and there were many other occasions when the sacral fellowship could not possibly be confined to a family or even to a tribe. Thus in war, which from the ancient Semitic point of view always came under the category of religious transactions, it is evident that all comrades in arms formed *one* sacral fellowship, whose members collectively 'hallow the war,' i.e. consecrate themselves for battle by abstinence from sexual intercourse (cf. 1 S 21⁵, where David pretends to be on military duty; 2 S 11¹¹), as well as by inaugural offerings (1 S 7⁹ 13¹², where the sacrifices are intended to propitiate Jahweh), just as in Ex 19¹⁵ the people prepare themselves by continence for drawing near to God. Also the prescriptions of Dt 20⁵⁻⁷ 23¹⁰⁻¹⁴, so strange to our notions, are explicable as survivals from a time when certain bodily functions, and in particular sexual relations, were believed to involve danger from demons.*

6. Whether in pre-Mosaic times there was a sacrificial cultus practised at *fixed, frequently recurring periods*, cannot be determined. An observance of the Sabbath is extremely improbable, although its sacred character is carried back in Gn 2³ (P) to the very beginning of the world. More conceivable—and here again combined with the fear of demonic influences—is it that there should have been a celebration of the New Moon, seeing that there are the clearest traces of this (see below, p. 662*) till far down in the monarchical period, without any recognizable connexion with Jahwism. As to the later annual festivals, it is self-evident that those which depend upon agriculture and vine-growing cannot be taken into account for the nomad period of Israel's history; they are one and all of Canaanite origin. On the other hand, the ancient tradition clearly assumes that the Passover festival (of course with its original significance, and quite independent of the Feast of Unleavened Bread) was already kept in pre-Mosaic times. When Moses and Aaron (Ex 5³) make the demand of Pharaoh, 'Let us go three days' journey into the wilderness, to offer sacrifice to Jahweh, our God,' and repeat this demand before each plague (7¹⁶ 8¹ etc.), it is assumed that they wish to celebrate in the wilderness a long-established sacrificial festival. For Moses (8²⁶) assigns as motive for going outside the land of Egypt that they are accustomed to offer sacrifices that are an abomination to the Egyptians, and in 10⁹ he says expressly, 'We have to keep the feast of Jahweh.' Again in 12²¹ (J) the direction runs, 'Kill the Passover.' Here, too, accordingly, it is assumed (as even in 12¹¹ [P] 'It is a Passover for Jahweh') as something that has been long familiar,—in opposition to the directions of v. 22ff., which make the ritual to have first taken its

* Cf. the very instructive remarks of Schwally in the above-cited 'Der heilige Krieg im alten Israel,' esp. p. 45 ff., on the hallowing of war (Jos 3⁶, Mic 3⁵, Jer 6⁴ et al.) also by anointing the shield (2 S 12) and consecrating the weapons (Jer 227), as well as by burnt-offerings which in the earliest times represented also the most solemn form of guilt-offering (1 S 7⁹ 13¹²). Again, the allowing of the hair to grow long (if Jg 5² is to be rendered 'with long streaming locks,' etc. [see Moore, *ad loc.*]), and if this implies a general warlike custom) marked the warrior as *nāzir* or 'consecrated.' Schwally appears to the present writer to go too far when (p. 74 ff.) he discovers the peril to the newly married man in the circumstance that by taking part in war he was guilty of turning aside to another cultus. The explanation rather commends itself that by such conduct he would expose himself to the curses of his wife, or that the consecration of a new house appeared indispensable for the expulsion of hostile demons.

rise upon the occasion of the Exodus, and to the derivation of the name *pesah* (פֶּסַח) from *pāsaḥ* 'to pass over.' This explanation of the word from the sparing action of Jahweh in passing by the houses of the Israelites when He smote the firstborn of the Egyptians (so Ex 12⁷), cannot be reconciled with the circumstance that in the oldest usage of language *pesah* appears to stand for the so-called Paschal lamb or (Dt 16²) other animals used for the sacrifice (cf. the expressions 'kill or burn or eat the Passover'). This fact shatters also the derivation of the name from *pāsaḥ*, 'to limp' * (cf. the limping of the prophets of Baal around the altar, 1 K 18²⁸, and the limping—undoubtedly a custom derived from very early times—of the Mecca pilgrims around the sacred stone of the Ka'aba), although in itself it is favoured by the analogy of *hagag*, prop. 'to dance or circle round,' then 'to celebrate a festival.' Even if the attempt to fix the etymology of the word must be given up, there are still sufficient starting-points to enable us to get at the original character of the Passover. † Ex 34¹⁹ shows that in the month Abib, in which the Exodus fell, the firstlings of cattle, or, more strictly, the first male offspring of sheep and cows, were offered. According to 5³ these sacrifices are to be offered in the wilderness, lest Jahweh visit the people with pestilence or the sword. That is to say, they are guilt- or propitiatory-offerings. But quite the same is the character of the Paschal meal, however later theological motives may have transformed its original meaning, or the Priests' Code have entirely given up its sacrificial character. ‡ The eating of the Paschal lamb (whether originally one of the firstlings used for this purpose, while the rest were sacrificed as burnt- or whole-offerings, or no) is, beyond question, a sacrificial meal celebrated by the family as the sacrificial body; for the flesh is holy, and none of it is to be left till the morning, while the blood is to be smeared on the lintel and the doorposts to guard those within from pestilence. From the later point of view this part of the ritual amounts to nothing more than a memorial of a former deliverance from a particular danger. But originally, as is shown by numerous primitive heathen analogies, it was sought by an annual smearing with blood to protect house and herd from demonic influences, in particular from the plague or other diseases.

The *Mazzōth* festival, which immediately followed the Passover, might be brought into close connexion with the latter, only if, with Beer (*Theol. Ltztg.* 1901, col. 588), following Holzinger, we could see in the *mazzōth* simply a memorial of the nomad period, during which Israel in Bedawin fashion ate unleavened bread. When the nomad life was given up (Gn 4¹⁴), the *mazzōth*, on Beer's theory, became 'bread of affliction' (Dt 16³). The view that the *mazzōth* represented the bread

baked from the new corn (and thus implied an agrarian festival) is held to be contradicted, especially by their use in connexion with sacrifices all the year through, and no less by their being used as common food. The only objection to Beer's explanation is the difficulty of supposing that the memory of an obsolete manner of life was solemnly celebrated by a return to it, and that for a period of six days. Moreover, the agrarian character of the spring festival appears to be assured by Dt 16⁹ and by the presentation of the so-called wave-sheaf (Lv 23^{10ff.}).

The festival character of the *Sheep-shearing* is still witnessed to by 1 S 25^{11ff.} and 2 S 13^{23ff.} (cf. also Gn 31¹⁹ 38^{12ff.}). It is, however, quite intelligible that this festival, so important for nomads, afterwards fell more into the background as compared with the agrarian festivals that were celebrated in common.

7. As to the *course of procedure* at a festival we have information in Ex 32⁶ which no doubt applies also to the pre-Mosaic period: sacrifice, sacrificial meals, amusements (chiefly, in all probability, dancing). Many a practice, which afterwards aroused the righteous indignation of the prophets, may have had its roots in the ritual customs of pre-Mosaic times instead of being derived from the evil example of the Canaanites.

8. A religious character belongs, finally, to other two customs whose origin in like manner goes, without doubt, back to the pre-Mosaic era: circumcision and blood-revenge.

Circumcision.—All attempts to explain this practice as due to purely sanitary considerations are now rightly regarded as exploded. As little weight can be attached to such explanations as that it is a milder symbolic form of the once prevalent sacrifice of children, or of self-emasculation in honour of a deity. On the contrary, circumcision has, amongst numerous (including Semitic) tribes, an evident connexion with a boy's reaching puberty; it is the sign of maturity, and thus of full admittance to the number of capable warriors of the tribe. But, since it has at the same time a religious meaning (for 'ārēl 'uncircumcised' is equivalent to '[religiously] unclean,' and hence a strongly disparaging word), it can be viewed only as an act of consecration for the benefit of a tribal god or some particular demon. It thus serves at once as a tribal mark † and as a defence against the harmful influence of other demons. Even for Jahwism circumcision is primarily a sign that a man belongs to the people and the worship of Jahweh, although the specifically theological interpretation of it as a sign of the covenant (Gn 17^{10ff.}) belongs only to the latest stage (P).

The oldest tradition as to the origin of child circumcision meets us in Ex 4^{24ff.} (J). In this now mutilated passage it is implied that Moses aroused the indignation of the Deity (here of course already Jahweh) because at the time of his marriage with Zipporah he was not circumcised as religious custom required (cf. also Gn 34^{22ff.} [J]). Zipporah

* Toy ('The Meaning of Pesach,' in *JBL*, 1898, p. 178 ff.) thinks otherwise, holding that the *pesah* was originally a ritual dance, accompanied by the sacrifice of a lamb, and that it was only afterwards that the name was transferred to the sacrifice.

† Cf. on the most recent explanations of the term (including its comparison with the Assyr. *pašḫu*, 'calm oneself,' so that *pesah* would = 'calming or appeasing [the anger of the Deity]') Riedel in *ZATW*, 1900, p. 319 ff. He holds *pesah* to be the Egypt. *pōseh*, 'harvest.' Schäfer, again (*Das Passah-Mazzoth-Fest nach seinem Ursprunge, seiner Bedeutung, und seiner innerperenteuschischen Entwicklung*, Gütersloh, 1900), holds the Passover to have been a purificatory offering of very early origin, common to all the Semites, and designed to appease the Deity. At the same time he denies the pre-Mosaic origin of the OT Passover, declaring it to have been, along with its pendant the *Mazzōth* feast (which was meant to recall the baste of the Exodus), from first to last a historic-theocratic festival. His argument is manifestly under the spell of tradition.

‡ The view that the Passover and the offering of firstlings were not originally connected (so Volz in *Theol. Ltztg.* 1901, col. 635 f.) appears to the present writer to be at least incapable of demonstration.

* Cf., on this subject, H. Ploss, 'Geschichtliches und Ethnologisches über Knabenbeschneidung' in *Deutsches Archiv für Geschichte der Medizin und medicinischen Geographie*, viii. 3, p. 312 ff.; P. Lafargue, 'La circoncision, sa signification sociale et religieuse' in *Bulletins de la soc. d'Anthropologie de Paris*, ser. iii. tome x. 3, p. 420 ff.; P. C. Remondino, *History of Circumcision from the Earliest Times to the Present*, Philadelphia, 1891; A. Glassberg, *Die Beschneidung*, etc., Berlin, 1896; S. Kohn, *Die Geschichte der Beschneidung bei den Juden von den ältesten Zeiten bis auf die Gegenwart*, Frankfurt a. M., 1902 (Hebrew).

† As such, it appears to go back to a time when the men still went naked; cf. Gunkel, 'Ueber die Beschneidung im AT' in *Archiv für Papyrusforschung*, ii. 1, p. 13 ff. (against Reitzenstein, *Zwei religionsgeschichtliche Fragen*, Strassburg, 1901, according to whom Israel borrowed circumcision from the priestly aristocracy of Egypt, whereas Gunkel holds correctly that all Egyptians were circumcised).

rescues him from the attack of Jahweh by circumcising her son with a (sharp) stone (cf. also the stone knives of Jos 5³, a proof of the high antiquity of the practice), and touching the *puenda* of Moses with the severed (and still bleeding) foreskin, while she exclaims, 'Thou art to me a bridegroom of blood.' This can mean only that she transfers the efficacy of the child's circumcision symbolically to the husband, and declares him to be what he ought to have been at marriage, namely a bridegroom consecrated by the blood of circumcision, and thus safe from the anger of the tribal god. Whether, perhaps in very early times, the blood shed in circumcision was employed in any other sacred transaction, is a question that must be left unsettled.

Another account of the origin of circumcision is found in the original text of Jos 5^{2ff.}, namely v. 2 without the harmonistic additions 'again' and 'the second time,' and vv. 8, 9. We are told that Joshua circumcised the Israelites with stone knives at the Hill of Foreskins, and that the place was hence called *Gilgal*, i.e. 'rolling away' of the reproach which arose from the impurity of the uncircumcised condition, and which called forth the contempt of the Egyptians. As Stade (*ZATW*, 1886, p. 132 ff.) has shown, we have here an etymological legend intended to explain the name *Gilgal*; in reality the 'Hill of Foreskins' derived its name from the circumstance that there, beside the ancient sanctuary of *Gilgal*, was the common place of circumcision for the neighbouring (Benjamite) youths, and that their foreskins were buried in that hill.

When, finally, the Priests' Code (Gn 17^{10ff.}) makes the introduction of circumcision as a sign of the covenant rest upon a command of God to Abraham, an explanation is thus offered of the circumstance that all Abraham's descendants—the Arabs, Edomites, Moabites, and Ammonites—were circumcised (a condition of things that applied also, it is true, to the Egyptians and the Phœnicians, although not to the Philistines).

Blood-revenge.—That this custom, which is assumed in Gn 4^{14, 23ff.}, as already existing amongst the earliest generations of men, actually took its rise in the pre-Mosaic period, is proved by its wide diffusion also among the heathen Semites and elsewhere. The originally religious character of the practice is supported, apart from other considerations, by the extraordinary tenacity with which it maintained itself—a tenacity which would be scarcely conceivable without religious motives. It is true that the precise bond of connexion is not now discoverable. In view of the above-discussed narrative, 2 S 21^{1ff.} (cf. esp. v. 9 'before Jahweh'), it would appear as if the putting of the murderer to death was originally regarded as a sacrifice by which the anger of the tribal god was appeased. According to the earliest notions, this anger is due less to moral causes (as came afterwards to be the established view, cf. e.g. Gn 9⁶) than to the damage sustained by the god through the loss of a life belonging to him; and, as the members of the tribe, in the first instance the family, are responsible for preserving the lives that are the property of the god, blood-guiltiness attaches to them until the guilt is atoned for by the death of the murderer. The original absence of an ethical viewpoint is evident from the simple fact that no distinction is made between murder and unintentional manslaughter; even in Dt 4^{17ff.} (a probable addition by P) and Nu 35^{22ff.} the right of blood-revenge in the latter case is still ideally recognized, although care is taken to make this right ineffective by providing an asylum for the manslayer in one of the Cities of Refuge. Jahwism was thus able to give a milder form to this

deeply-rooted custom, but not to abolish it entirely. From the narrative of 2 S 14^{3ff.} (which is fictitious, indeed, but no doubt reflects the conditions of real life), where 'the whole family' demands that the fratricide be given up, we learn that occasionally the execution of blood-revenge might be prevented by the intervention of the king. At the same time, the language of the woman of Tekoa (v. 9) contains the suggestion that by such intervention the king might bring guilt upon himself. Here, again, we see the mechanical way in which the matter was viewed by primitive rigid custom.

Summary.—Looking back now on the results which we have reached by examination of the pre-Mosaic period of the religion of Israel, we have been able in not a few instances to point to phenomena which contain the germ of similar appearances on the soil of Jahwism, and which are of the utmost importance for the understanding of the latter.

In the first place, as to the *notion of God* which prevailed in that period, it is only in a very restricted sense that we can speak of such a notion at all. The principal constituent of the yet rudimentary religious sense was fear of the constantly threatening but always incalculable influence of demonic powers. These powers are of very varied kinds, and it would be vain to try to reduce them to any system, or to assume that any reflexions regarding their nature and treatment passed through the minds of men in the state of nature that then prevailed. Men believed in them upon the ground of custom inherited from birth, and acted towards them according to the ancient sacred usage followed by all members of the family and the tribe. These 'demons' are partly spirits of the dead, and, above all, the spirits of the nearest kin of the family. Besides measures adopted to keep them off or to avert injury at their hands, there were acts prompted by dutiful affection towards them, but we have no perfectly clear traces that Animism in the narrower sense had already developed into Ancestor Worship.—A very important rôle is played, again, by all the local *numina* (*ēlīm*), whose presence appears as attached to sacred trees, stones, and springs. They are not identical with the latter in such a sense that we could speak here of a deification of nature, but they are locally so inseparable from these objects that they can be found and worshipped only at the particular spots in question.—This 'Polydemonism' advances a stage when such a *numen loci* comes to be regarded as the tutelary god of a family or clan, or even of a whole tribe. In place of simple gifts of homage or for propitiation, rites are now introduced whose object is to witness or to establish a close connexion, nay a blood relationship, with the Deity. Even if *Totemism* cannot be proved to have once prevailed among the tribes of Israel, yet we certainly meet with a conception of sacrifice which regards sacramental communion between the Deity and the offerer as the principal feature—a communion which is established by their jointly partaking of the sacrificial blood (afterwards by the god receiving the blood and the fat, while the offerer has the flesh for his portion).

As to the manifold other rites and usages (mourning customs, the *hērem* and other warlike practices, human sacrifice, circumcision, celebration of festivals), the original motive has not always been discoverable with certainty; but in most instances the connexion with Animism or some other form of belief in demons is clear enough.

iii. *MORAL CONDITIONS.*—Not without interest, finally, is the question, What were the *moral con-*

ditions which Moses found amongst the Israelitish tribes of his time? It was long the fashion (especially as the result of Schiller's essay on 'Die Sendung Mose's') to represent the contemporaries of Moses as utterly uncivilized and at the same time—upon the ground of an Egyptian narrative handed down by Josephus (*c. Apion. i. 26*)—as a people quite permeated with leprosy. All the brighter was the halo of glory about the name of Moses, who was believed to have so quickly transformed this half-brutalized horde into a religious community that stood so high, both intellectually and morally. As a matter of fact, however, the moral conditions in Israel must have been quite the same as we still find existing among the genuine Bedawin at the present day. There is no such thing as acting upon conscious moral principles; and hence there is no thought of *morality* properly so called, but *custom* exercises a powerful influence, which no one can disregard with impunity. 'No such thing is wont to be done in Israel' (2 S 13¹², cf. also Gn 20⁹ 29²⁸ 34⁷),—this is the strongest condemnation of an act of wrong-doing. Custom allows even a married man the freest intercourse with concubines and female slaves, but it guards most strictly the honour of the virgin and the married woman; custom demands, unconditionally, the execution of blood-revenge, but (at least for a time) subordinates even this duty to the sacredness of a guest's rights; custom requires honesty and uprightness towards one's fellow-tribesmen, but has no scruple about allowing deceit and cheating to be practised on a stranger.—As in social life, so also in matters of cultus it is custom that is the ruling factor. Fear to violate custom, fear of the consequences of such violation—in particular, dread of ceremonial uncleanness,—all this is deeply ingrained; but of 'sin,' in the moral sense attached by us to the term, it is impossible to speak.

The condition of things above described was not all at once changed by the proclamation of Jahwism. The force of custom asserted itself even in retaining practices which could never be reconciled with any true morality, just as Islam has succeeded only to a very limited extent in transforming the character of the genuine Bedawin. Nevertheless, it will be found that, at the very commencement of the religion of Israel, the fruitful germs must have been sown from which—although only very gradually, and at first only among a few—conscious morality sprang up. Without such a germinating power Israel's triumph over the undoubtedly superior culture of the Canaanites would be inconceivable.

II. FOUNDING OF THE RELIGION OF ISRAEL (JAHWISM) BY MOSES AT SINAI.

Regarding the work of Moses, and especially regarding the extent and content of the laws promulgated by him, we have very varied accounts in the different sources of the Pentateuch. But there are certain points which they all take for granted as firmly established by tradition: namely, that Moses, of the tribe of Levi, was the first to proclaim Jahweh as the God of the whole people of Israel, and as their Deliverer from the bondage of Egypt; that at Sinai he brought about the conclusion of a 'covenant' (see below) between Jahweh and Israel; that he at least laid the foundation of the judicial and ceremonial ordinances in Israel, and that he left behind him more or less copious notes on all this.

The supposition that the Pentateuch still contains passages from Moses' own hand is not to be unconditionally set aside. But its scientific proof is now absolutely impossible. Hence the only ques-

tion can be, Is the correctness of the above propositions, which we noted as fixed elements of tradition, demonstrable by backward inferences from later historical facts? Our answer is that to a large extent—all hypercriticism notwithstanding—this proof is possible, and that especially in regard to the main points. Amongst the latter we include—

i. *THE PERSON OF MOSES AS THE FOUNDER OF THE JAHWEH RELIGION.*—1. All attempts to relegate the person of Moses to the realm of myth have quite properly been abandoned. It is another question how far the traditions concerning him rest on pure legend. As points that are quite beyond suspicion may be noted: his descent from the tribe of Levi; his name *Mosheh* (prob. = *Egypt. mesu* 'son,' possibly combined originally with the name of a god); his flight to Sinai on account of a homicide, and his marriage with a Midianite priest's daughter, Zipporah, who became the mother of two sons; his return to Egypt, and deliverance of the Israelite serfs from Pharaoh; further, his strife with his brother Aaron (whose historicity has been denied on insufficient grounds) and his sister Miriam on account of a Cushite woman; and, finally, his prolonged sojourn in Kadesh, and his death on the east side of Jordan. All these data are derived from the early sources, and their invention is either inconceivable or at least extremely improbable. On the other hand, the legend of his birth and exposure may have been woven about the (linguistically impossible) interpretation of his name in Ex 2¹⁰; the names of his parents, Amram and Jochebed, are first known to the Priests' Code. The assumption that he was 'instructed in all the wisdom of the Egyptians' (Ac 7²²) is connected, of course, with his being brought up by Pharaoh's daughter, but it finds no real support in Ex 2¹⁰. In any case there is no justification for finding in Moses' acquaintance with Egyptian mysteries the explanation not only of his intellectual superiority to his fellow-countrymen, but even of the Divine name *Jahweh* and of certain institutions (for example, the sacred Ark) connected with worship, if not, indeed, of the whole activity of Moses as a founder of religion.* Such borrowing on his part is not only incapable of proof, it is extremely improbable; for it is not the way of one ancient people to adopt the gods of another, or even elements of their cultus, at a time when it sees this other people and its gods overcome by another god. Whether Moses was moved to his work by other influences, such as that of the Kenites about Mt. Sinai, will have to be afterwards considered. The ancient tradition of Israel knows of nothing except that he was directly called by Jahweh at Sinai, and, in spite of his refusal at first, sent to deliver his people. The work of Moses is thus traced to Divine revelation. How this produced its effect on the mind of Moses, remains a secret to us as much as in all similar cases when God reveals Himself to His chosen instruments. But the *fact* is not on that account any the less certain to us, for it is witnessed to by its results. However many of the features of that Pandemonism which was common to the Semites may have continued to adhere to the religion of Israel after the time of Moses, it exhibits, even as early as the period of the Judges, features which raise it far above the popular religions of the neighbouring peoples, and which can be explained only as due to the continued influence of a highly endowed spiritual personality.

* So esp. Schiller in his brilliant essay, 'Die Sendung Mose's' (first published in Heft 10 of *Thalia*). We leave quite out of account the fables cited by Josephus (*c. Apion. i. 26, 28*) from Manetho's *Egyptiaca* about the identity of Moses with the priest Osarsiph of Heliopolis.

It is true that elsewhere we frequently meet in history with similar instances where a far-reaching influence is very palpable, and yet we do not feel compelled on that account to postulate a special Divine revelation. But in the case of Moses it is the peculiar character of the new ideas promulgated by him that forbids us to derive these from his own reflexions or to ascribe them to shrewd calculations for selfish ends. Upon the foundation laid by him there has arisen in the course of three thousand years the building which includes also the Christian nations. But the laying of a foundation like this is beyond a man's power; the capacity must have been given him by God. And on this very account the importance of the personality of Moses can hardly be exaggerated. Such is the conviction of the Deuteronomistic author of Dt 34¹⁰ when he remarks: 'There hath not arisen a prophet since in Israel like unto Moses, whom the LORD knew face to face.'

2. It is true, indeed, that it has been felt to be very surprising that in the Old Testament, and especially in the Prophets, the references to Moses are so few in number and so late in date. Apart from the interpolation added in Hos 12¹⁴ (29) ('By a prophet the LORD brought Israel up out of Egypt, and by a prophet was he preserved'), we find allusions to Moses and Aaron as the deliverers of the people in Mic 6⁴ (along with Miriam; although, it is true, the attributing of this passage to Micah is strongly contested), 1 S 12⁶⁻⁸ (in a Deuteronomistic address), Ps 105²⁶ 106¹⁶. Moses alone as leader of the people is referred to in Is 63¹², Ps 106²²; the power of his intercession with God is mentioned in Ps 106²³ and Jer 15¹. The last-cited passage shows clearly in what light the importance of Moses appeared even to a Jeremiah, and that it is thus evidently a mere accident that he is not more frequently mentioned elsewhere.

It might appear even more strange that Moses as the founder of a religion appears to be practically unknown to the Prophets and the Psalms (apart from Ps 99⁸, where Moses and Aaron are called 'priests,' and 103⁷). But over against this must be set the fact that throughout the OT all the various legislations (except, of course, that contained in the vision of Ezekiel, chs. 40-48) are said to have been introduced, and in part even written down, by him. This would be quite unintelligible unless there had been an indelible recollection which demanded his recognition as the real author of religious traditions and institutions, so that later codifications could obtain authority only if they were carried back to his weighty name. If any one feels compelled to call this last course of procedure by the name of *forgery* (and therefore to repudiate it with indignation), he is radically mistaken as to the notions that prevailed in ancient Israel with respect to literary property. So far from being looked upon as forgery, it was regarded as a sacred duty to give as Moses' own words anything that had to be promulgated for the good of the people in continuation of his work and in the sense and spirit of his laws (for instance, and very specially, the legislation of Deuteronomy). The idea of forgery, however natural it may be to us, is quite out of the question here.

ii. JAHWEH PROCLAIMED BY MOSES AS THE GOD OF ISRAEL.*—1. All the sources of the Pentateuch are at one in pointing out as the fundamental act of Moses his proclamation of Jahweh as the God of Israel, i.e. as the God who means certainly to deliver Israel from the slavery

of Egypt, and who on that account has sole claim to the worship and obedience of this people. But this proclamation did not imply that Jahweh is to be regarded as the only God that has any real existence; such 'absolute monotheism' was undoubtedly as yet far below the horizon even of Moses as well as of all his contemporaries. Jahweh is one God among many, although mightier and more terrible than the rest. Upon the whole, however, there is not much consideration of what is His relation to other gods. The main thing from the very first is to know no other god besides Him, to worship none but this One whose name is Jahweh. The demand of Moses is thus not for real or absolute monotheism, but for '*henotheism*,' i.e. the recognition of only one God, or '*monolatry*,' the worship of one alone. But the more distinctly 'Jahweh' makes its appearance as a personal name (quite like 'Zeus,' 'Poseidon,' etc.), the more naturally does the question arise, Whence did Moses derive this name and proclaim it as that of Israel's God?*

2. The most natural course is to seek to explain the name 'Jahweh' (יהוה) from itself, that is, from the etymology underlying the form of the word. This seems all the more proper, because in at least one of the sources of the Pentateuch (E) we meet with an actual interpretation of the name (Ex 3^{13ff.}). When Moses asks what name he is to give to the people as that of his Divine sender, God replies: '(Say) the I AM THAT I AM (or, again, the 'I AM') hath sent me unto you. Where 'Jahweh' is plainly understood as the 3rd pers. sing. Imperf. of the old verb *hāwāh* 'to be.' But in Hebrew the Imperfect is the mood of continuance as well as of ever renewed activity. Upon this interpretation 'Jahweh' denotes at once the *Eternal* (the form in which modern Jews reproduce the name) and the One who ever remains the same, the *Constant*.

Against this explanation, however, the strongest objections have been brought. From the time of Ewald it has been set down as a mere attempt at an artificial interpretation of an ancient name whose meaning had been long forgotten. But the root-idea of this name, we are told, just because it is so ancient, must have been a *material* one, and cannot have been derived from abstract reflexion and metaphysical speculation. But this last objection, while it would apply to explanations which make *Jahweh* = 'the truly Existing' or 'the absolute Being,' etc., do not apply (or at least not to the same extent) to the simple view of the name as that of the Eternal and Constant,

* We take it for granted that our readers are aware that the form 'Jehovah,' which has the appearance of being handed down by tradition in the OT, is based upon a Christian misunderstanding, the vowels of the word *Adonai* 'Lord' being taken (first in the year A.D. 1513) to be the real vowels of the Divine name, whereas they were attached by the Jews to the consonants *JHWH* (which are alone original) in order to warn the reader to avoid the actual pronunciation of the word and to substitute *Adonai* for it. This treatment of the name 'Jahweh' as 'unutterable' sprang from an exaggerated dread of transgressing the commandment in Ex 20⁷. The traces of this aversion to the utterance of the name can be carried back to about B.C. 300, although its utterance was for long after that regarded as allowable in the sacred domain, e.g. in the mouth of priests pronouncing the benediction. Neither in the Septuagint (whether in the Canonical or in the Apocryphal books) nor in the whole of the NT is the name 'Jahweh' once used; it is always *ὁ Κύριος* 'the Lord.'

Of the four possible ways of pronouncing the consonants *JHWH* (the so-called Tetragrammaton), namely, *Jahweh*, *Jahveh*, or *Jahāweh*, *Jahwāh*, or *Jahāwāh*, the form *Jahweh* has rightly come to be prevailingly accepted. The following considerations tell in its favour: (1) that, according to Epiphanius (*Her.* i. iii. 20), a Jewish-Christian sect (according to Theodoret [*Quaest.* 15 in *Ex.*], the Samaritans) pronounced the name *Jaēh*; (2) that in Jewish-Samaritan poems the end-vowel of *JHWH* rhymes with *ē*, not *ā*; (3) that the shortening of the Divine name to *Jēhō* [*Jō*] and *Jahū* in personal names like *Jēhōnāthan* [*Jonathan*] and *Jēshājāha* [*Isaiah*] are linguistically explicable only by assuming as the basal form *Jahweh*. See, further, art. *JEHOVAH* in vol. ii.

* Cf. Hunnius, *Natur und Charakter Jahwehs nach den deuteronomischen Quellen der Bücher Genesis-Könige*, Strassburg, 1902.

the God whose living activity is always in exercise. Besides, the rejection of the interpretation offered in Ex 3¹⁵ involves the conclusion that even the early sources of the Pentateuch were in error as to the true meaning of the most important and most sacred Divine name in Israel. But can it be supposed that at the time of E (c. 750 B.C.) the living apprehension of the genius of the Hebrew language was no longer adequate to interpret correctly a name like 'Jahweh'? We cannot help thinking that this question has been answered in the affirmative far too hastily by those who follow the prevailing current of opinion on this subject. And we are only strengthened in our conviction when we note the extremely varied interpretations which have been proposed as substitutes for that adopted in Ex 3¹⁵.^{*} These fall into two categories according as they start likewise from the verb *hāwāh* in the sense of 'to be,' or assume another meaning for this verb.

(a) The first of these two schools of interpreters takes 'Jahweh' to be the Imperfect of the Hiphil or Causative conjugation, and thus obtains the meaning 'He who causes to be,' 'the Creator.' But, apart from the circumstance that early Semitic languages want the Causative of the verb *hāwāh*, the idea of 'the Creator' is precisely what is quite foreign to the name 'Jahweh' as we find it employed. No doubt, in later times, after the triumph of absolute monotheism, Jahweh is naturally brought into connexion with the work of creation. But at first He has to do almost exclusively with the deeds and fortunes of the people of Israel. This flows from His nature as a national God, and it is plain that it was in this latter capacity and not as the Creator that Moses at first proclaimed Him.—Absolutely to be rejected is the theory of an interchange of sound between *hāyāh* (*hāwāh*) and *hāyāh* 'to live,' so that *Jahweh* (here again Causative) would be='He who gives life,' 'He who produces true (spiritual) life.' However attractive this interpretation may be for its contents, it is shattered by the laws of the interchange of sound. These laws forbid an exchange between *h* and *h* at the beginning of a word.

(b) Among the explanations which start from a different meaning of the root *hāwāh*, special favour has been accorded to that which finds it in *hāwāh* 'to fall' (so esp. de Lagarde and Stade). Upon this view *Jahweh* may be explained either as='the falling One'; i.e. the name originally stood for a meteoric stone that fell from heaven and was hence the object of worship (a so-called *βασιλειον*; see below, in the discussion of the sacred Ark, p. 628); or, again Causative, as='He who falls or causes to fall (by lightning),' i.e. as the storm-God. This last explanation would seem to be favoured at least by a number of features which from the first appear to be bound up with the representation of Jahweh. It is, above all, as a God of the desert that Jahweh appears, for Moses is in the first instance to lead the people into the wilderness, there to serve God by offering sacrifice (Ex 3¹⁸ 5³ *et al.*). But it is in the desert that the most imposing effects are produced by storm; hence the natural abode of the storm-God is a desert range like Sinai with frequent lightning playing about its peaks. It may be added that thunder and lightning and storm-clouds play a prominent part not only at Jahweh's appearances in connexion with the giving of the Law at Sinai (Ex 19¹⁶⁻¹⁹ 20¹⁸ *et al.*), but upon the occasion of

almost all the later theophanies, whether these present themselves as historical events (e.g. Jg 5⁴⁴, 1 K 19^{11a}), or as prophetic visions (e.g. Is 30²⁷, Mic 1³, Nah 1^{3a}, Hab 3^{3a}), or merely as poetical descriptions (Ps 18^{5a}, 77^{18a}, 97^{2a}). But these arguments are not sufficient to prove that Jahweh was originally thought of as the storm-God only. In all ages thunder and lightning have been regarded as the special accompaniments and principal marks of Divine majesty and glory, and nothing is more natural than that these should have been associated also with the God of Israel, especially upon occasions when He appeared for extraordinary ends, whether to fight with and chastise His people's enemies, or solemnly to conclude a covenant with the people themselves.

Upon the whole, then, the above attempts to find another explanation of the name 'Jahweh' than that offered in Ex 3¹⁵ must be regarded as doubtful. And the same remark also applies, in the judgment of the present writer, to the explanation of Wellhausen, who falls back upon the onomatopoeic root *hāwāh* 'to breathe,' and thus makes *Jahweh*='the Breather' (which comes again in the end to the same thing as the storm-God).

3. But, even if the attempt to arrive by the way of etymology at the original conception underlying the name 'Jahweh' must be abandoned, there may be another possibility, namely, to assign the home of the God proclaimed by Moses. Moses fled from Egypt to Sinai, where he became son-in-law to the priest of a Midianite (according to another, more specialized, tradition, a Kenite) tribe. There the God who dwelt enthroned on Sinai appeared to him and called him to be His instrument. Thither he led the rescued tribes of Israel, and there the will of the God of Sinai was solemnly announced to them and the covenant with Him concluded. What does all this mean, it is asked, but that Moses made acquaintance at Sinai with Jahweh, the god of the Kenites, and proclaimed him thenceforward as the God of Israel? As a matter of fact, Jahweh would thus have been a foreign god so far as Israel was concerned, and it is nothing but a naïve anachronism when the Jahwistic source employs the name 'Jahweh' even in its narrative of the Creation (Gn 2^{4a}), and represents the worship of God under this name as beginning as early as the time of Enosh, the grandson of Adam.

This 'Kenite hypothesis,' since the example was set by Stade, has found favour with many, and it cannot be denied that it contains much that is worthy of notice. It appears to be supported, above all, by the circumstance that Sinai (evidently identical with the Horeb of other sources)* is regarded as the proper dwelling-place of Jahweh not only at the time of the Exodus, but till far into the monarchical period (cf. Jg 5⁹, and the passages dependent upon it, namely Dt 33^{2c}, Hab 3³, Ps 68⁸ (6); and esp. 1 K 19⁹, where Elijah journeys to Horeb to obtain an oracle from his God). But this was possible only on the ground of a general conviction of the people that He was enthroned there prior to the call of Moses. Then, again, very great stress is laid upon the narrative of Ex 18,[†] which is interpreted as describing the admittance of Israel to the Jahweh cult of the Kenites. Jethro rejoices (v. 9^a) in the evidences of power displayed by his god, Jahweh, on behalf of Israel; he finds an evidence therein that this god of his is mightier than all gods;

* We purposely leave out of account the latest attempts to discover the name 'Jahweh' (as presumably introduced into Babylonia by Canaanites) in very ancient cuneiform texts (so, e.g., Frdr. Delitzsch in his much discussed lecture *Babel und Bibel*, Leipzig, 1902, p. 461.), because the reading as well as the interpretation of the names in question still form the subject of controversy amongst Assyriologists.

* We here leave out of account, of course, the controversy as to whether in the oldest tradition Sinai and Horeb were already identified, as well as the question where the Sinai or Horeb of our present narratives is to be found. See art. SINAI in vol. IV.

† So esp. Budde, *Die Religion des Volkes Israel*, Giessen, 1900, p. 17 ff.

whereupon he organizes a sacrificial meal in honour of him, and admits Aaron and all the nobles of Israel to take part in it. In other words, he, the Kenite priest, opens for them at Sinai, the dwelling-place of his god, an approach to the cult of the latter. And this is the very reason why the religion of Israel became, according to Budde,* an ethical one, because it was a religion adopted by choice and not a nature religion.

Now we do not mean to deny the *possibility* of such an order of events. Yet there is no lack of weighty considerations of an opposite kind. It is true, indeed, that the argument that Sinai is the proper dwelling-place of Jahweh is not weakened by the circumstance of His presence with the people in Egypt and during the Exodus (as also afterwards in the wilderness), since passing appearances for special ends are not inconsistent with the possession of a fixed abode. But might not Sinai (or Horeb) have been for long the 'mount of God' also to certain Israelitish tribes, as appears to be implied in Ex 42? This supposition would be all the more plausible if it is true, as many have recently come to hold, that the whole of the tribes of Israel did not undergo serfdom in Egypt, but that part of them led the life of nomads in the neighbourhood of Sinai, and had long continued to worship the god that was established there. The work of Moses would thus have consisted in proclaiming and securing recognition for the special god of certain tribes as the God of the whole nation. These are, indeed, mere conjectures, but they tally with a circumstance which appears to us to be far too readily ignored by the defenders of the Kenite hypothesis: this, namely, that even in the oldest sources of the Pentateuch it is always implied that Jahweh was not proclaimed to Israel as an absolutely new and therefore unknown god.

We have already remarked that the Jahwist uses the name 'Jahweh' from the first, and regards it as known and honoured by the ancestors of Moses and his contemporaries. On the other hand, E (Ex 3^{13ff.}) and P (6^{2ff.}) assume that it was first revealed to Moses and through him to the people. At the same time it is not at all the idea of these sources that the God Himself was unknown to the people. We are not thinking of the frequent designation of Jahweh as the God of Abraham, Isaac, and Jacob (Ex 3^{6, 15f., 45}), for such allusions to the God of the patriarchs might quite conceivably have been in every instance inserted in order afterwards to give to the Canaanite places of worship, supposed to have been taken over from the patriarchs, a legitimate standing as sanctuaries of the same God. But even the assumption of interpolation of this kind would not destroy the fact that even the early sources of the Pentateuch see in Jahweh the God of the ancestors of Israel. At the very first mention of Him (Ex 3⁶) He is called 'the God of thy (Moses') father'; He has seen the oppression of *His people* in Egypt, and means now to deliver them (v. 7^{ff.}); face to face with Pharaoh the appeal of Moses is to be to 'the God of the Hebrews' (v. 18, cf. also 5^{3, 7, 16, 9, 13, 103}). Even if the term 'Hebrews' here be an anachronism, in none of the passages cited is it implied that Jahweh first became 'the God of the Hebrews' after the call of Moses; on the contrary, He has long held this position. If, all the same, Moses is regarded as the *founder* of the Jahweh religion, this can be understood only in the sense that the god of one or more tribes, or perhaps the god of one particular family, was proclaimed by him as the God of the whole body. Jahweh would thus not have been an absolutely strange and new god, but one whose power and help had already been experienced by part of the confederated tribes;

whereas, on the other hand, the proclamation of the yet untried god of the Kenites could hardly have met with such rapid acceptance. Beyond this we can fall back only upon conjectures. It will always remain the most plausible supposition that Jahweh had a connexion with Moses' own tribe, the tribe of Levi. This hypothesis has at least as good a claim as that which makes Him the god of the Rachel-tribes.

As to the argument in support of the Kenite hypothesis drawn from Ex 18, we are at one with its defenders in holding that there we have a testimony to the community of worship of the Israelites and the Kenites. But this is quite different from 'the admittance of the Israelites to the Jahweh cult of the Kenites' (see above, p. 626^b f.). The community of worship of Israel and the Kenites was a fact; Ex 18 recounts its historical origin; but the question of the origin of Jahwism among the two peoples is not considered. The circumstance that it is Jethro who organizes the sacrificial meal is sufficiently accounted for by his residence on the spot, which imposes upon him the duty of showing hospitality to the strangers.

4. The beliefs cherished by Moses and his contemporaries regarding the mental and moral character of Jahweh will form the subject of discussion presently (see p. 629 ff.). But we must here say a word about the conceptions of His *bodily* personality. For there are quite a number of the strongest testimonies which place it beyond doubt that a bodily—and indeed a *human*—form was then and for centuries afterwards attributed to Him; and, even if in Ex 20⁴ and Dt 5⁸ the making of any figure representing Jahweh was forbidden, this would not amount to an absolute denial that He possessed the bodily form of a man. But in any case the making of images of Jahweh was regarded as unobjectionable till about the 8th cent. B.C., although in all probability a distinction was drawn between the images carved in wood and stone, which had come down from very early times, and molten images of metal. The latter were undoubtedly of Canaanitish origin, and hence were prohibited in the worship of Jahweh (Ex 34¹⁷; this certainly ancient passage has nothing to say against carved images).* And, although narratives like Gn 3⁸ and the older form of Gn 18 had not their origin till the settlement in Canaan, the human form of Jahweh is assumed by them as so much a matter of course that it is impossible to see here anything but the reflexion of a very widely diffused notion. Again, the numerous ascriptions of human organs (eyes, ears, nose, hands, feet, etc.) to Jahweh may have been in the latest times regarded as conscious anthropomorphisms, i.e. shifts to which language is reduced when it would describe the action of a purely spiritual personality; but at first they were certainly meant as the literal expression of the prevailing conception of the *bodily* personality of Jahweh.†

5. It is quite true that no notice has been preserved in the early sources of the Pentateuch of images of Jahweh in human form in the time of Moses; the mention even of the *ephod* (Jg 8^{26f.}

* Ed. König in his art. 'Die Bildlosigkeit des legitimen Jahwehcultus' (*Ztschr. f. kirchl. Wissenschaft und kirchl. Leben*, 1886, Heft 5, 6; also publ. separately under the title *Beiträge zum positiven Aufbau der Religionsgeschichte Israels*, i., Leipzig, 1886) denies that images of Jahweh were at any period allowed in His legitimate worship; but this is opposed to facts, as has been shown above and will be further demonstrated presently.

† It is another question whether the *theologoumenon* of the 'Angel of Jahweh' as a passing appearance of Jahweh is to be placed so early as the Mosaic period. This and other forms of manifestation of Jahweh (face, name, glory) will be discussed by us in connexion with the framework of Jahwism as we find it at the close of the time of the Judges and the commencement of the monarchical period. See p. 635 ff.

17⁴⁴. 18¹⁴. 17¹. 20¹, 1 S 21⁹ etc.), which is most probably to be regarded as an image of Jahweh, does not occur till the following period. On the other hand, in 2 K 18¹ there is the strange piece of information that Hezekiah broke in pieces a brazen serpent which was made by Moses, and to which up till then incense had been burnt by the Israelites, who called it *Nēhushtān* (i.e. 'the brazen one'). The language plainly implies the paying of Divine honours in the form of sacrifice. Was the *Nēhushtān*, then, an image of Jahweh? This is scarcely conceivable, and finds no analogy elsewhere. If, on the other hand, it represented some demon, how could its construction have been traced back to Moses, and how could it have received Divine worship down to the time of Hezekiah? The enigma is not solved by pointing to Nu 21⁹, for there can be little doubt that in this passage we have simply a later attempt to account for (and justify) the presence of the well-known brazen serpent in Jerusalem. It is most probable that the deriving of this idol from Moses is to be set down to some misunderstanding of the popular belief. See, further, art. *NEHUSHTAN* in vol. iii.

6. There are, however, the clearest traces of another visible representation of Jahweh, which goes back to the time of Moses—in connexion with the history of the sacred Ark. The ancient and original designation of this object is 'the Ark of Jahweh' or 'the Ark of God.' The Deuteronomistic writers are the first who know of the Ark as the receptacle of the two stone tables of the Law which Moses received from God at Horeb; and on this account they call it 'the Ark with the Law of Jahweh' (Dt 10¹⁵. 31²⁶, 1 K 8⁹).^{*} Wherever this designation occurs in ancient narratives (e.g. 1 S 4³⁻⁵, but not vv. 11, 17, 19, 22), *bē'ith* is a later addition by Deuteronomistic hands; it is still unknown to the LXX in the passages cited.

Seeing that both the early sources of the Pentateuch in their account of the wilderness journeyings give prominence to the Ark as a most sacred object, they must have somewhere given an account of its origin. And indeed this narrative, which has now (on account of its proximity to the entirely different account given by P in Ex 25¹⁰⁻¹⁸) dropped out, must have stood before Ex 33⁷⁻⁹. Here we are told all at once about the tent which Moses regularly pitched before the camp and called 'the Tent of Meeting.' This is the same name as is applied (in a different sense, indeed) by the Priests' Code to the tent in which the sacred Ark was lodged. Prior to Ex 33⁷, then, it must have been told how Moses used the ornaments stripped off by the people at Horeb (v. 6) for the construction of the Ark and the tent that sheltered it, the Ark (as must be inferred from v. 6) being intended as a substitute for the personal presence of Jahweh, which would have been fatal to so stiff-necked a people.

How this substitute for Jahweh's own presence is to be understood comes out unmistakably in two very ancient verses preserved in Nu 10³³⁻⁵. (prob. J). There we read: 'When the ark [which, according to v. 33, went before the people to search out a camping-place for them] set forward, Moses said—

Rise up, Jahweh, and let thine enemies be scattered;
And let thine adversaries flee before thee!

And when it rested, he said—

Return, Jahweh, to the myriads of the thousands of Israel!'

^{*} The usual translation 'Ark of the Covenant' fails to recognize that *bē'ith* here cannot mean 'covenant,' but only the *Law* on which the covenant was based. Instead of *bē'ith* the Priests' Code uses '*edūth* 'testimony' in the same sense (Ex 26¹⁶⁻¹⁷ and often).

Jahweh and the Ark, that is to say, appear here as practically identical. Not as though this wooden chest represented Jahweh. But His presence appeared inseparably connected with the Ark; wherever it was seen there Jahweh was, and showed Himself active. This notion has frequent and express testimony borne to it down to the time of Solomon. In Nu 14⁴²⁻⁵ Israel's defeat by the Amalekites is explained by the absence of the Ark. According to 1 S 3³ the youthful Samuel slept in the temple of Jahweh at Shiloh where the Ark of God was, and this is used to account for the revelation given him by Jahweh at night. When the sons of Eli bring the Ark of Jahweh to the camp, 'that it may come among us and save us out of the hands of our enemies' (1 S 4⁸), the Philistines—quite in the spirit of the Hebrew narrator—exclaim, 'God is come into their camp . . . Who will deliver us out of the hand of this mighty God?' etc. (v. 7¹⁴). With the Ark the 'glory,' i.e. the presence of Jahweh, is departed from Israel (v. 22). And, even when the Ark is captured, the Dagon of the Philistines falls upon his face before Jahweh the more powerful God present in it, and tumbles down as if dead when he is set up in his place again (1 S 5¹⁻⁷). The Ark of Jahweh brings pestilence upon the other cities of the Philistines (v. 9¹⁷). Nay, even the Israelites of Beth-shemesh look with fatal results upon the Ark when it is sent back by the Philistines (6¹⁹⁻²¹), so that the survivors exclaim, 'Who is able to stand before Jahweh, this exalted God?' And when David went to bring up to Jerusalem 'the ark of God which is called by the name of Jahweh of hosts' (2 S 6¹⁷), we read that he and all the house of Israel danced 'before Jahweh' (v. 5, cf. also vv. 14, 16, 21), but that Uzzah was struck dead on the spot by Jahweh for having, with the best of intentions, laid hold of the swaying Ark to steady it (v. 6).

It need hardly be remarked that all the above statements would be meaningless if the Ark had been simply the receptacle of the tables of the Law, and not a symbol and pledge of the presence of Jahweh. With all the more force does the question urge itself upon us, What can account for so high a place being assigned to the Ark? Unfortunately, we are here again thrown back upon mere conjectures. The most probable explanation, however, appears to be that the Ark of Israel, like the sacred arks of other religions,^{*} contained stones—in point of fact, one or more meteoric stones (*βαρύνια*); but it can hardly be supposed to have had in it a stone image of the Deity.[†] But,

^{*} Cf. Schwally, *Semit. Kriegeralttümer*, i. p. 9 ff.

[†] From the copious recent literature on the Ark we select the following as deserving of special notice: F. Seyring, 'Der alttest. Sprachgebrauch in betreff des Namens der sogen. "Bundeslade"' (*ZATW* xi. [1891] 114 ff.); L. Couard, 'Die religiös-nationale Bedeutung der Lade Jahwes' (*ib.* xii. [1892] 53 ff.). According to the latter, the Ark contained stone fetiches in which Jahweh was believed to be present, whence the Ark and its contents were in the earliest times identified with Jahweh Himself. Kraetzschmar, again (*Die Bundesvorstellung im AT*, Marburg, 1896, p. 208 ff.), thinks that the Ark most likely contained the stones used in forming the alliance of the Rachel-tribes; while Budde ('Bücher Sam.' [in *Kurzer Idom.*] p. 31) makes these stones to have been taken from Sinai as a representation of this abode of Jahweh. W. Reichel (*Ueber vorhellenische Götterculte*, Vienna, 1897, p. 23 ff.) explains the Ark as a portable throne of Jahweh—a view opposed by Budde (*Expository Times*, ix. [1898] 398 f.) but strongly reaffirmed by Meinhold (*Die Lade Jahwes*, Tübingen and Leipzig, 1900; cf. also the 'Nachtrag' to this in *SK*, 1901, p. 593 ff.). Meinhold holds that the Ark was originally the moving rocky throne of the god enthroned on Sinai, and that the charge of this one pre-Canaanite common sanctuary of the Hebrews became hereditary in the family of Moses. The view of Meinhold appears to be favoured by the circumstance that once (*Jer* 31⁷) the whole of Jerusalem takes the place of the Ark as the throne of Jahweh; while even the Priests' Code appears (e.g. in Nu 78⁹) to look upon the lid of the Ark as Jahweh's seat, from which He reveals Himself to Moses. But all this does not refute the argument reasserted by Budde (*ZATW*, 1901, p. 193 ff.), that the Heb. word '*arōn*' means nothing but a *box* or *chest*, and that

again, there are numerous indications that the Ark primarily represented Jahweh as *the war-God*. On the one hand, there is the fact that down to the time of David the Ark (cf. 2 S 7^{2, 6}) was as a rule kept in a tent, the natural place of abode in war [even in the temple at Shiloh it may have stood in a tent, as, according to 2 S 6¹⁷, it did in the citadel of David]; and, on the other hand, the fact that in the historical books it is brought with remarkable frequency into connexion with the name *Jahweh Zēbā'ōth*, the designation of the war-God (see the following section, p. 636 f.). Moreover, we have direct evidence of this sense being attributed to the Ark in Nu 10^{35f.} (see above, p. 628³⁰) 14^{42f.} (see above, p. 628³⁰), Jos 6^{6f.} (where the Ark brings about the downfall of the walls of Jericho), 1 S 4^{3f.} (see above, p. 628³⁰), 2 S 11¹¹ (where the Ark has its place in the camp at Rabbath-ammon) 15²⁴ (where the priests imagine that the presence of the Ark will ensure victory over Absalom).

It cannot be decided with certainty whether the Ark was from the first the sacred shrine of *all* the tribes, or only (so Stade, *Gesch. des Volkes Israel*, i. 458) the war *palladium* of the Josephites or the Josephite tribe of Ephraim [in 1 S 1 ff. we meet with it as giving its character to the tribal sanctuary of Shiloh]. Its original connexion with *all* the tribes is favoured, however, not only by its construction being attributed to Moses—a tradition which it is very difficult to set aside—but by the narrative of 1 S 4, and very specially by the evident importance which David attaches to the introduction of the Ark into his newly captured residence, Jerusalem (2 S 6). Had the Ark been the *palladium* of an alien tribe, would he not have been afraid of giving them the most serious offence by appropriating it? On the other hand, if the Ark was well known to have been the representative of the God of Israel in the 'wars of Jahweh,' it was pre-eminently suited to be established at the residence of the monarch as the symbol of the now closely united tribes.

It may be as well to note here once for all what is necessary regarding the subsequent fortunes of the Ark. After its transference to the dark inner sanctuary of Solomon's temple (1 K 8^{4, 6f.}) there is no mention of its ever again leaving this place, down to the destruction of the temple in B.C. 586. [In Ps 24^{7f.}, then, where the doors of the temple are already addressed as 'primeval gates,' there must be preserved an allusion to the war-God *Jahweh Zēbā'ōth*, v. 10, returning in the company of the Ark from a campaign]. That the Ark even in Solomon's temple continued for a long time to be regarded as representing the presence of Jahweh, is shown not only by the ancient verses contained in 1 K 8¹², which can refer only to the place of the Ark in the dark inner sanctuary of the temple, but by the Ark's being placed under the wings of two huge cherub forms (1 K 8^{6f.}). Here, as elsewhere, the cherubim denote the near presence of Deity. But, as the conception of God came to be increasingly spiritualized in the Prophetic period, it became impossible to hold to the ancient, grossly material view of the Ark. In place of an actual representation of the presence of Jahweh it came to be a mere symbol of His presence. Nay, in the Deuteronomistic statements on the subject we see the Ark almost robbed of any special significance of its own. As the receptacle of the tables of the Law it is only a

means to an end, and its place might have been taken equally well by any other vessel; for its only claim to veneration and sanctity rests upon its contents. The question may now be asked, Are we to assume that at some time or other the old stone fetishes, of which people were now ashamed, were really displaced by stone tables with a copy of the Decalogue? This would be conceivable only if we could assume that there was a periodical opening of the Ark: for instance, upon the occasion of a particular festival. But even Dt 31²⁶ speaks merely of a depositing of the Book of the Law *beside* the Ark. Or, again, do the Deuteronomistic statements involve the recollection that, at any rate, stones were originally kept in the Ark? This is a question we cannot answer.

On the other hand, the closest attention is due to the circumstance that in the theories of the Priests' Code so important a rôle is assigned to the Ark both as a centre of revelation (Ex 25²², Lv 16², Nu 7⁸⁹) and in connexion with the process of sacrifice (Lv 16^{14a}), although even according to this source (Ex 25^{16, 21}) the Ark is, properly speaking, nothing more than the receptacle of the 'testimony,' which means the tables of the Law. But, as in so many other instances, even the Priests' Code cannot shake off entirely the old conception of the Ark. It is no longer, indeed, identical with Jahweh, but it is a very holy centre of revelations from Him. This is still indicated by the cherub forms, only that these no longer stand, as in Solomon's temple, on each side of the Ark, but, made of pure gold, are placed (Ex 25^{17a}) on the ends of the lid (the *kappōreth*). Here, according to Lev 16¹⁴, the blood of the most important guilt-offerings of the whole year had to be sprinkled in order to bring Jahweh as near as possible.

These statements and requirements of the Priests' Code are all the more surprising, as there can be no doubt that the Ark perished in the destruction of the temple in B.C. 586.* This agrees with the circumstance that Ezekiel, in his sketch of the new order of the theocracy, has no mention of the Ark, and the Holy of Holies of the second temple was, according to unimpeachable Jewish tradition, completely empty. Hence those expressions in the Priests' Code which take the Ark for granted must have emanated from priestly circles which looked upon its restoration as necessary, *but did not succeed in carrying out this aim*. To the eagerness with which at one time the restoration or non-restoration of the Ark was discussed we have an instructive witness in Jer 3¹⁶ (which is a later insertion in the Book of Jeremiah). Here we have the heart's desire of a man of the prophetic spirit; and it is to the effect that, when the exiles are brought home again and tended by shepherds after God's own heart, when Jerusalem has become a place of true worship even for the heathen, there shall be no need of an *outward* sign of the presence of Jahweh, and thus no need even of the Ark.

iii. *THE ESSENTIAL CHARACTER OF JAHWISM AS THE RELIGION OF ISRAEL.*—1. Ever since Josephus† defined the constitution of Israel as a

* No importance attaches, of course, to the statements of 2 Mac 2^{5f.} about Jeremiah's concealing of the Tabernacle (!), the Ark, and the Altar of Incense in a cave of Mt. Nebo.

† *c. Apion*, ii. 16 [Niese, *Fl. Josephi Opera*, v. p. 75, § 164 f.]: 'Some entrusted the government of the State to a single person, others to a few, others to the whole body of the people; whereas our lawgiver turned his thoughts to none of those methods, but, if we might use a somewhat bold expression, drew up a political constitution in the form of a *theocracy*, assigning the rule and power to God.' The whole manner of expression adopted by Josephus shows that in using the word 'theocracy' he is conscious of having coined a *new* term. See also art. *THEOCRACY*, above, p. 337.

such a name would not have been given to a *throne*. Even Reichel's further exposition of his hypothesis (in *Theologische Arbeiten aus dem wissenschaftlichen Rheinischen Prediger-verein*, Tübingen, 1902, p. 28 f.) has made no difference on this point. On the other hand, the strict defence of the Deuteronomistic tradition by Lotz (*Die Bundeslade*, Erlangen and Leipzig, 1901 [from the 'Festschrift' for the 80th birthday of the Prince Regent of Bavaria]) is a piece of wasted labour.

'theocracy,' or 'rule by God,' this term has been repeated over and over, and its use has been extended even to the political and religious system introduced by Moses. As a 'theocracy' the religion founded by him has been represented as distinguished from all others; that is to say, the constitution was so arranged that all the organs of government were without any independent powers, and had simply to announce and to execute the will of God as declared by priests and prophets or reduced to writing as a code of Laws. This ideal was illustrated by the action of Gideon when (Jg 8^{22f.}) he refused the monarchical dignity for himself and his son on the ground that 'Jahweh shall rule over you.' On the other hand, according to the view represented in 1 S 8^{10, 17ff.} and ch. 12, the people wickedly ignored the idea of the theocracy when they demanded a king from Samuel: 'It is not *thee* that they have rejected,' says God to Samuel (1 S 8⁷), 'but they have rejected *me*, that I should no longer be king over them.' Is there not here a perfectly serious claim put forward on behalf of the theocracy, and is not this form of government put forward as the only legitimate one? That is so. But this does not represent the view taken in the earlier monarchical period,—which sees in the monarchy a beneficent institution for the deliverance of the people (1 S 9¹⁶),—but that of the later centuries, after people had had unhappy experiences of the monarchy, and especially after they had come to lay upon it the blame for the religious and moral degeneration of the nation, even for the destruction of the State. But for the time of Moses the conception 'theocracy' cannot be taken account of, for the sufficient reason that at that time it is impossible to speak of any *constitution* at all as in existence. All through the period of the Judges, and in part even under Saul, the tribes lived each their own life; it was at most only for the settling of processes of law that they needed a kind of supreme authority, and this latter function was discharged by the heads of clans and families—of course not, however, upon the basis of written laws, but of usage and custom. It is true that common pressure by foes had at times the effect of bringing about a coalition, not perhaps of all, but of a number of tribes; but even then human leaders could not be dispensed with. That in all this an important rôle was played by religion we shall see presently (see p. 635^{f.}). But for a 'theocracy' in the form defined by Josephus there is no room here. Scope was found for it only when, after the loss of political independence, national interests receded into the background and the interests of the cultus assumed on that account all the more prominence. So it was in the programme for the future sketched by Ezekiel (chs. 40–48), where the partition of the soil of the country is moulded upon the sacredness of the temple and its surroundings, and where the 'prince' (*nāsi*; not 'king') has scarcely any more important duty than to make careful provision for the public sacrifices. The complete realization of the 'theocracy' was next undertaken by the Priests' Code. Here everything, even civil and criminal law, is looked at from the *religious* standpoint. The outward sway is in the hands of the foreigner, but what is left of the ancient national life presents itself in the form of a priestly State; the insignia of royalty—diadem and purple—are now assigned to the spiritual head, the high priest.

In carrying back the theocracy to Moses, Josephus has accordingly been guilty of a glaring anachronism. But those go to the opposite extreme who admit that Moses proclaimed Jahweh as the God of Israel, but deny anything beyond this, and cast doubt in particular upon any funda-

mental act of his which could be spoken of as a real founding of the religion of Israel. Everything of this kind related in the middle books of the Pentateuch is regarded by them at best as a late theological misunderstanding of something quite different, but most frequently as pure invention in the interests of religious ideas which had not their development till centuries afterwards. Here, again, we shall do well first of all to look at the tradition itself.

2. In all the Pentateuchal sources, without exception, there is a uniform tradition to the effect that the central place amongst the incidents at Sinai is occupied by the concluding of a *bērith* (ברית, commonly rendered 'covenant'). What this means may be readily learned from a brief examination of the usage of the word *bērith*. After the thoroughgoing investigations of J. P. Valetton* and R. Kraetzschmar,† there can be no doubt that *bērith* belongs primarily to the secular vocabulary, and means 'cutting in pieces,' namely, of one or more sacrificial victims (cf. Gn 15^{9ff.}, where God, according to the narrative of the Jahwist in v. 17, accommodates Himself to this practice; and Jer 34^{18f.}), that the parties to an agreement might pass between the pieces and invoke upon themselves the fate of the animals in the event of their being guilty of a breach of their oath. For every *bērith* consisted partly of an oath which defined the obligation taken upon oneself, partly of a curse invoked on oneself as the penalty of violating this oath.‡

The religious is naturally distinguished from the secular use of the word *bērith* by the fact that God cannot be thought of in the same way as a man who enters into an agreement or covenant with other men, the two parties having exactly the same standing, with their mutual rights and obligations strictly defined. Hence the religious *bērith* always stands primarily for a Divine order or arrangement§ which takes its rise without the co-operation of man or, to be more precise, of the people of Israel, and yet is unconditionally binding upon the latter. The duties of the people have, it is true, promises—that is, so to speak, a self-pledging of Himself by God—corresponding to them, and thus there exists so far a mutual relationship. But, however the statements contained in the different sources of the Pentateuch may vary in laying stress now upon the Divine promises and now upon the duties resting on men, it is always the will and determination of God that accounts for the origin and the character of the *bērith*. Hence the usual rendering of *bērith*, namely 'covenant,' ought to be avoided as incorrect and misleading.

It has already been remarked that *all* the sources of the Pentateuch assume that at Sinai a *bērith* in the sense just described was solemnly enacted by God, and that henceforward it was upon this *bērith* that the intimate relation between Jahweh, as the God of Israel, and His people was based. According to the Jahwist, the sacramental com-

* 'Bedeutung und Stellung des Wortes *bērith* im Priester-codex' (ZATW xii. 1ff.); 'in den jahwistischen und deuteronomistischen Stücken des Hexateuchs sowie in den verwandten historischen Büchern' (ib. 224 ff.); 'bei den Propheten und in den Ketubim' (ib. xiii. 245 ff.).

† Die Bundesvorstellung im Alten Testament, Marburg, 1896.

‡ akin to this are the certainly ancient forms in which a curse is conditionally invoked, namely, by sending round pieces of a corpse (Jg 19²⁹) or of some sacrificial animal (1 S 11⁷). In every instance these pieces have the significance of an 'oath-offering.' The formula 'so shall it be done to his cattle' in the latter passage is in all probability a toning down of an original 'so shall it be done to him.' Whether the blood of the animals in question was used for the performance of sacred rites on the occasion of concluding a *bērith* (as, for instance, among the Arabs it is sprinkled on seven stones), is doubtful; it is expressly witnessed to only in Ex 24⁸.

§ The LXX gives proper expression to this condition of things by rendering the Heb. *bērith* not by συνθήκη ('agreement,' 'covenant'), but by διαθήκη ('arrangement').

munion was established by sprinkling with blood both the altar and the people, the 'book of laws of the covenant' [this is the meaning here of *bērith*] being read by Moses to the people between these two acts (Ex 24⁸). In v. 9st there comes next an account [probably by E] of a meal* partaken of by the representatives of the people before God. This meal can be understood only as a sacrificial one, such as, for instance, we read of again in the case of Jacob and Laban (Gn 31⁵⁴) after their compact at Mount Gilead. So also the Deuteronomist and the Priests' Code speak very frequently of the *bērith* which God through Moses gave to the people at Horeb (or Sinai). Even if they do not refer expressly to a covenantal ceremony, they certainly presuppose what is related in the older sources. It is an established fact for them that there was a solemn proclamation of the Divine will by God to Moses, and through him to the people.

Is all this now to be set down as fiction—a carrying back of much later theological conceptions and terminology to a time for which no real tradition was any longer extant? This is a view to which the present writer cannot assent, having regard to either external or internal evidence.

Under the head of *external* evidence we must reckon not only the strength and unanimity of the tradition, which it would need the very strongest reasons to set aside, but also the narrative of Ex 24^{1st}. The deviation here from the traditional rites at sacrifices and covenants, which meet us elsewhere, testifies at least to the high antiquity of the record.

But, even if the attempt to prove its historicity should have to be abandoned, there remain weighty *internal* reasons for holding that it is impossible to set aside as pure fiction the assumption of a *bērith* at Sinai as a historical incident.

It was undoubtedly with very heterogeneous elements that Moses had to set to work in accomplishing his mission. The familiar genealogy of the tribes of Israel makes an emphatic—no doubt, historically justified—distinction between tribes of full and of half blood, the latter being represented as descended from female slaves (Bilhah and Zilpah, Gn 30^{5ff.}). Moreover, Ex 12³⁸ (cf. also Nu 11⁴) speaks of a non-Israelite 'mixed multitude' which attached itself to Israel at the Exodus. Yet Moses must have succeeded in imparting a certain unity to all these diverse elements, in controlling them by his will, and in planting amongst them a variety of fruitful germs of religious and legal ordinances. And although even after the immigration into Canaan it is still far from possible (see above, p. 630^a) to speak of an Israelitish *State*, yet a historical document of the first rank, like the Song of Deborah, shows how in the beginning of the period of the Judges the majority of the tribes were permeated with a strong feeling of their unity under the leadership of the God of Israel. Particularly worthy of notice is the express manner in which war (which, as was pointed out above [p. 621^b], even in the pre-Mosaic stage of religion had the closest connexion with the cultus) is now placed in relation to Jahwism. After the defeat of the Amalekites, Moses is commanded to write down a formula expressive of the Divine curse on Amalek (Ex 17^{14ff.} [E]). Thereupon he erects an altar and calls it *Jahweh-nissi* ('Jahweh is my banner'), 'for Jahweh hath war with the Amalekites to all generations.' Primarily, then, this war

is not the affair of the people but of their God. The battles which led to the conquest of Canaan (Nu 21¹⁴), like those which had still to be fought by David in the struggle which freed the land from the yoke of the Philistines (1 S 18¹⁷ 25²⁸), are included under the title 'wars of Jahweh.' See vol. iv. p. 896^b.

Would all this be conceivable if the proclamation of Jahweh as the God of Israel—the founding of the Jahweh religion—had taken place, so to speak, fortuitously, by the incidental passing of the name 'Jahweh' from mouth to mouth? Instead of anything of this kind, we get the strongest impression that the further development of the religion of Israel during the period of the Judges and of the monarchy was the result of some occurrence of a fundamental kind of whose solemnity and binding force and character the whole nation retained a lively recollection. And this occurrence can have been nothing but the solemn proclaiming of the God *who had just manifested Himself in wondrous wise as the Helper and Deliverer of the people* upon a definite occasion, and in the binding of the people to do His will and to worship Him alone. Every one of the numerous allusions (whether in the Pentateuchal sources, the Prophets, or the Psalms) to the mighty acts of Jahweh at the Exodus, how with a strong hand and a stretched-out arm He brought the hosts of Israel out of the house of bondage, held back the waves of the Red Sea from Israel but plunged the chariots and the horsemen of Pharaoh into the waters,—every one of these allusions is at the same time an allusion to the days of Sinai, when for the first time these mighty acts of Jahweh were brought to the consciousness of the people in their true greatness, and extolled accordingly, and made the occasion of a solemn confession of Jahweh as the God of Israel and a solemn binding of the people to do His will.*

The foregoing observations have at the same time furnished the answer to the question as to the essential character of *Jahwism* as a name for the special relation between Jahweh and Israel. If we had to do with nothing more than the mutual relations between a particular god and a particular people, we should be standing simply upon the soil of a national religion such as prevailed amongst heathen peoples as well. Moab is called 'the people of Chemosh' (Nu 21²⁹) just as Israel is 'the people of Jahweh'; Moab likewise felt itself bound to the worship of this its national god, and expected powerful aid from Chemosh in return, particularly in matters of war. And if such aid was not rendered, this was ascribed not to inadequate power on the part of the god, but to the fact that 'Chemosh was angry with his land' (Mesa's inscription, l. 5 f.). The presuppositions appear thus to be precisely the same in Moab as in Israel. And yet is it possible to conceive of a Moabite reflecting on the origin of the worship of Chemosh or tracing it back to a *bērith* between that god and the Moabites? On the contrary, none of them dreamt of anything but that the special relation between god and people had subsisted from the first, nor did any one doubt that between the two there was a blood relationship in virtue of which the god would as a matter of course take the part of his people, without any necessary regard to ethical considerations. He upon whom, according to

* It cannot, indeed, be denied that it is hard to think of 74 people sitting down to a meal on the top of the mountain, and that all difficulty is removed if we accept the suggestion of Riedel (*SK*, 1903, p. 161 ff.), that וַיִּשְׁתּוּ ('and they drank') is corrupted from וַיִּשְׁתּוּ ('and they cast themselves down'), and that וַיִּשְׁתּוּ ('and they ate') was interpolated after וַיִּשְׁתּוּ had found its way into the text.

* Cf., on the above, the admirable discussion by F. Giesebrecht in *Die Geschichtlichkeit des Sinaibundes*, Königsberg, 1900; on 'Jahweh's relation to the people of Israel according to the ancient Israelitish conception' in general, see Sellin in the *Neue Kirchliche Zeitschrift*, 1894, pp. 316 ff., 376 ff. [also published separately under the title *Beiträge zur israel. und jüdischen Religionsgeschichte*, Heft 1, Leipzig, 1896]; Wildeboer, *Jahvedienst und Volksreligie in Israel*, Groningen, 1898 [German tr., Freiburg, 1899].

primitive Semitic notions, the duty of blood-revenge lay, did not first inquire whether the bloody expiation was justifiable on moral grounds as well. Blood demands blood: this principle held good for the god as much as for every individual among the people.

From all this it is clear that from the very first there was a far-reaching difference between the national religion of Israel and other national religions. At its very foundation the religion of Israel made a notable advance beyond the naive, purely naturalistic basis which we have just noted in the religion of Moab. *It was not Israel that first chose Jahweh, but Jahweh that chose Israel.* Their mutual relation does not therefore rest upon blood relationship,—such a notion is sufficiently contradicted by the circumstance that at the time of the Exodus a community of the same blood, or a nation, was not yet in existence,—but upon the free determination of a mighty God. This determination, however, was no arbitrary one; it sprang from the fundamental attributes of this God, namely righteousness and mercy. He saw the misery of the people as they pined under cruel and yet wholly undeserved oppression, and was filled with compassion for them; He determined to deliver them, and with a strong hand He carried this purpose to a victorious issue. The religious ideas which flow from this did not first originate, as some in recent times never weary of asserting, as a product of the 'ethical monotheism' of the prophets; they already lay to hand for the Israel of Mosaic times. Righteousness and mercy are essentially moral qualities. If they were the motive for the choice and the deliverance of Israel, the religion derived from them bore from the first an ethical stamp in quite a different sense from anything that had ever been conceivable in a purely national religion. It is thoroughly appropriate that the Deuteronomist* in a number of passages should urge *gratitude* as the leading motive for love to God and obedience to His commandments. But this, again, is no naturalistic but a specifically ethical motive, and, as such, could be appreciated even by the contemporaries of Moses. —And, finally, it was self-evident that the God who in His very choice and deliverance of Israel had exhibited moral attributes, would require from the people the same qualities on which His relation to them was based. Hence we are quite entitled to claim—not ethical monotheism in the strict sense of the term, but—*ethical henotheism* for the time of Moses.

And so at last the way in which this God fulfils His promise, putting the mighty host of Egypt to shame before a petty people of shepherds, gave occasion for the triumphant question: 'Who is like thee, O Jahweh, among the gods; who is like thee, glorious in loftiness, fearful in praises, doing wonders?' But this power of His is not thought of as mere brute force arbitrarily exercised, but once more as serving moral ends. In this lies the pledge of its final triumph over all unrighteousness and impiety, whether within or outside the people of Israel. It may be that this idea was not yet realized with perfect clearness in the time of Moses, that all its consequences were not yet deduced. But in germ it was already there as certainly as faith in the power of right, or desire that it should always prevail, is implanted by nature in the hearts of men in general. The religion of Israel was able from the first to supply nourishment to this faith as no other national religion could. Those who deny this, and who recognize everywhere simply development in a straight line from crude or at least naive naturalism to more and more purified moral conceptions, quite

* So also Ezk 16^{5ff.} in a striking comparison.

overlook the circumstance that their contention is opposed by demonstrably historical facts. Epoch-making religious ideas generally come upon the scene in full strength and purity; it is only in course of further development that these products of religious creative genius, or, better, of Divine impulse, are corrupted and disfigured by the intrusion of vulgar human ideas and selfish interests. Such was the fate of the religion of Jesus Christ in the Roman Church with its popes and monks; and the same thing happened to many of the great fundamental ideas of the Reformation at the hands of Protestant scholasticism. And we are quite safe to assume something of the same kind in the process of the development of Jahwism. The great fundamental ideas upon which its institution rests were often forced into the background during the wandering period of the people's history and in the time of endless struggles for national existence under the Judges. Besides, as was pointed out already (see p. 615 f.), these ideas still continued for long to be supplemented by powerful remnants of the Polydemonism common to the Semites. But they did not die out for all this, and, when in the 8th cent. B.C. they were put forward by Amos and others with the greatest clearness and precision and urged upon the conscience of the people, these prophets had a perfect right to claim that they were making no new and unheard-of demands, but only proclaiming what from Sinai downwards had been recognized as a fact: 'A God of right is Jahweh; blessed are all they that wait on him' (Is 30¹⁸).

We insist, then, upon a *bêrith* between Jahweh and the people of Israel as the starting-point of Jahwism, and at the same time as the source of its peculiar character. This of itself sets aside the view recently maintained* that there was actually a *bêrith* concluded at Sinai—not, however, between Jahweh and Israel, but between the various Israelitish tribes. It was only the later theologians, we are told, that misunderstood this, or arbitrarily transformed its meaning to suit their purposes. This hypothesis might perhaps be sufficient to account for the coalition of heterogeneous elements so as to form a nation. But it is wholly inadequate to explain how it came about that their common religion imparted to this new confederation a wholly peculiar stamp, so that this people of nomads afterwards completely absorbed the advanced civilization of Canaan, instead of being subdued by it.

iv. *THE STAMP OF JAHWISM ON OUTWARD ORDINANCES IN THE TIME OF MOSES.*—By 'outward ordinances' we understand not only usages connected with worship in the widest sense, but also the form given by religion to the life of the people in all its aspects. As to both these points, the materials for arriving at a certain conclusion are very meagre, since no account can be taken of the elaborate priestly and ritual enactments of the Priests' Code, which are merely the theories of later centuries.

1. Even the question whether Moses instituted

* For instance by Schwally, who writes (*Semit. Kriegsaltertümer*, i. p. 2): 'Probably some Israelitish tribes entered into a covenant relation with Midian, in connexion with which the national god of the more powerful of the contracting parties was called to watch over the oath.' Afterwards, however, we are told (p. 3): 'The actual course of things faded gradually from men's memory, and the notion could establish itself that at Sinai what was concluded was not a covenant between Israel and Midian under the protection of Jahweh, but simply a covenant of Jahweh with His chosen people.'—Different, again, is the judgment of Eerdmans (in *Theol. Tijdschrift*, xxxvii. p. 19 ff.). According to him, the *bêrith* at Sinai consisted in the union of a number of nomadic clans into a tribal confederation, accompanied by the invoking of Jahweh as the god to whom part of those tribes considered that they owed their deliverance from Egypt.

a *priestly order* at all is one which cannot be answered offhand from the early sources. He himself exercises priestly functions on the occasion of the concluding of the *berith* (Ex 24^{1st}), and as a medium of oracles in the Tent of Meeting (33^{7th}). This is in harmony with the general presupposition that the founder and mediator of the Sinai religion was the prototype of both of what were afterwards the most important organs of this religion—the priests and the prophets (cf., for the latter, Dt 18^{1st} 34¹⁰ and Hos 12¹⁴ 13). Indeed it is only thus that the habit can be explained of tracing back to his personality *all* codifications of law, even those affecting the ritual. But the early sources know nothing of Moses having further entrusted to his brother Aaron alone the discharge of priestly functions.* Aaron is indeed called in Ex 4¹⁴ 'the Levite,' which means in all probability 'the priest' (for, so far as the *tribe* was concerned, Moses was also a 'Levite'), but it is extremely questionable whether this designation really emanates from an early source. In any case, nothing is there related of him except that he served Moses as speaker in dealing with the people and with Pharaoh (Ex 4^{1st} 27. 30 51st etc.), and that he supported him during the battle with the Amalekites (17^{12th}). Even in connexion with the idolatrous worship of the golden calf (Ex 32^{1st}) there is no mention of priestly functions or prerogatives belonging to Aaron. On the contrary, the assistants of Moses at the covenantal sacrifices of Ex 24⁵ are simply young men of the children of Israel, while the guardian of the Tent of Meeting is the *Ephraimite* Joshua (Ex 33¹¹), who frequently appears elsewhere also as servant and attendant of Moses.

Leaving Aaron, then, out of the question, we have still, indeed, one passage from E (Ex 32²⁹) in which, although the text in its present form is plainly mutilated, it is related that Moses awarded the priesthood to *the tribe of Levi* in recognition of their fidelity on the occasion of a revolt of the people. But, seeing that in the same chapter we have a parallel narrative to quite a different effect from the pen of the Jahwist, it is impossible to say whether in Ex 32²⁹ we have a strictly historical narrative or merely an attempt to supply a historical explanation of the origin of the Levitical priesthood.

The story of the covenantal sacrifices (Ex 24^{1st}) quite gives the impression that Moses simply followed long-established usage. And this will be true to the condition of things then as well as during the whole of the subsequent period. Not legal prescriptions, but old familiar custom, decided the practice followed in matters affecting the cultus. Even in the monarchical period priests were still unneeded for the offering of sacrifice; the same usage as had been followed for other gods or 'demons' was equally capable of application to the cult of Jahweh. This does not forbid us to hold that certain ceremonial enactments emanated from Moses, and were orally handed down under his name. But what was their precise character we are unable to decide, any more than the question whether he is to be regarded as the originator of a particular form of oracular communication. At all events, it is worthy of note that in Am 5²⁵ (perhaps also Jer 7²²) the existence of the practice of sacrifice during the wilderness wanderings is flatly denied. This passage can hardly be explained, with Marti (*Gesch. der israel. Religion*⁴, p. 71), to mean that, while sacrifices to Jahweh were abandoned, those were perhaps offered which were peculiar to families and clans, but were not meant for the God of the whole body. Marti urges that the different tribes and clans

might have retained their tribal and household gods without seeing in this any repudiation of the claims of Jahweh. But, while it is not impossible that a syncretism of this kind still continued to prevail for a considerable time, it must always have appeared to the chosen representatives of Jahwism as a culpable abuse.

2. As to religious *festivals*, the only one that can be taken into account for the Mosaic period is the Passover (see above, p. 621^b f.). The other principal festivals, in the form in which we make their acquaintance in OT tradition, point by their agrarian character to a Canaanite origin.

3. As in the cultus of the Mosaic age, so also in the *social life* of Israel the controlling factor was not a body of definite prescriptions, but the power of custom—custom, it is true, upon which from the first an ever-increasing influence was exerted by the religious uniqueness of Jahwism. When any shameful act was condemned by the formula 'It is not wont so to be done' (Gn 34⁷, 2 S 13¹²), there was assuredly in the background the thought 'because it is unworthy of Israel and their God, because it is an abomination in the sight of Jahweh which He will not let go unpunished.' Here again the possibility must be recognized that Moses himself, in the course of his long-continued judicial activity (cf., on this point, the very instructive narrative of Ex 18^{13th}. [E]), especially at Qadesh or 'En-mishpat, laid the foundation of many usages both in civil and criminal law, nay, that not a few of the enactments afterwards codified in the Book of the Covenant go back directly to him. But in this matter, again, we are without any precise knowledge of details.

4. There is *one* question, however, which we cannot pass by in silence. If none of the rest of the legal contents of the Pentateuch can be with certainty traced back to Moses, must not at least some form of the Decalogue be attributed to him—having regard to the strength and the unanimity of the tradition which require this assumption?

Now, the 'unanimity' of the tradition must be left out of the question so long as it is still disputed whether in addition to the two Elohist [E] or, according to others, Deuteronomistic recensions of the Decalogue in Ex 20 and Dt 5, we have not a Jahwistic one in Ex 34¹⁴⁻²⁶.* The greater antiquity of the latter appears to be supported by the fact that it contains almost exclusively ceremonial, not yet ethical enactments; these last, it is alleged, could not have originated in *this* form except as a deposit of the Prophetic current of ideas. But this Jahwistic Decalogue is perhaps nothing more than an appearance. If the Jahwist had essentially the same Decalogue as the Elohist, the redactor could not possibly, after it had been given in Ex 20, have introduced it once more in Ex 34, and so he filled up the consequent gap with ceremonial prescriptions which can be recognized at the first glance as parallels to the laws of the Book of the Covenant. Hence the question still remains whether some form of *the* Decalogue may not be traced back to Moses.

That this form was extremely brief and concise

* This, as is well known, was already maintained by Goethe in his essay 'Das Zweitafelgesetz' (1773), and is held at present by the majority of critics. Regarding the Decalogue of Ex 20 and Dt 5, the view has come to prevail, thanks to Kuenen, Stade, Cornill, etc., that it belonged to the Judæan recension of the Elohist [E²]; so also Staerk (*Das Deuteronomium*, Leipzig, 1894), who maintains, further, that the Decalogue of E¹ is dispersed throughout the so-called Book of the Covenant. On the other hand, according to Meisner (*Der Dekalog*, Halle, 1893) and Baentsch ('Exodus u. Leviticus' in Nowack's *Hdtkom.*, Göttingen, 1900), the present form of the Decalogue emanates from the Deuteronomic pen (D), and was only subsequently transferred from Deuteronomy to Ex 20. Likewise Marti (*Gesch. der israel. Religion*⁴, p. 174) holds that the Decalogue was 'in any case drawn up in the 7th cent., perhaps in the circles influenced by Isaiah.'

* According to Stade and others, the figure of Aaron is utterly unknown to the older stratum of J.

may be at once assumed. This conclusion is favoured even by the very striking difference in extent between the two tables of the Law: the first (namely the five Commandments, according to the method of reckoning adopted by the Reformed Churches, down to and including that of respect to parents) containing 146 words, the second only 26. Accordingly, the whole of the reasons assigned for obedience in the first five Commandments may be pronounced later additions. In this way two very considerable difficulties are removed in a very simple fashion. These are (1) the great difference in regard to the motives urged for obedience to the Sabbath-command, and (2) the Deuteronomistic colouring which, as we have seen, has led many to ascribe the whole to the 7th century. For this colouring does not affect the brief enunciations, but, above all, the motives assigned.

But it may still be asked, Does not so fully-developed an ethical system underlie even the Commandments themselves that one must hesitate to give the Decalogue its place at the head of the whole development? We should allow full weight to this objection if the standpoint of the Ten Commandments were beyond doubt and exclusively an ethical one. That this is the case, appears self-evident to us who from our infancy are taught and accustomed to apply a purely ethical standard, and to discover in the Commandments a guide to true piety and morality. But it is not difficult to show that originally it was not the question of morals but of regard to *rights* that occupied the foreground.* All the Commandments may readily be subsumed under the prohibition: '*Thou shalt not do violence* to (1) what belongs to God (His sole right to worship, His superiority to any earthly form, His name, His day [as the type of all His other 'holy ordinances'], His representatives); (2) what belongs to thy neighbour (his life [as his most precious possession], his wife [as next in preciousness], his goods and chattels, his honour).' It is only in the last of the Commandments that another point of view makes its appearance, namely, in the prohibition to touch even in thought the property of one's neighbour. Thus the climax is reached of the ascending scale which presents itself in the arrangement of the Commandments of the second table—in the advance from sins of act to sins of word, and finally to sins of thought. The correctness of the view which emphasizes the non-ethical aspect of the Decalogue is specially evident in connexion with the prohibition of adultery. The object is not to keep the youth or the married man from immorality in general, as our catechisms are wont to explain the matter,† but to ward off attack from one of the most important of a neighbour's rights of property. It is only in this sense that the notion of adultery is known to the ancient Hebrew mind; while, on the other hand, no limits are placed upon a married man's sexual intercourse with female slaves. In like manner, the seduction or violation of a virgin was plainly regarded in the earliest times more as a damage to one's rights (notably, for instance, in the way of lowering the selling price of a daughter) than as a moral transgression.

In view of all this there would be no valid reason for refusing to attribute to Moses himself a primitive concise form of the Decalogue, were it not

* Noteworthy indications pointing to this view are already supplied by A. Menzies (*Sermons on the Ten Commandments*, London, 1888), according to whom the Decalogue belongs to the age of the Prophets, and contains the fundamental principles of social life.

† So, e.g., Luther: 'Wir sollen Gott fürchten und lieben, dass wir keusch und züchtig leben in Worten und Werken, und ein jeglicher sein Gemahl liebe und ehre' ('We are to fear and love God by living chaste and modest in words and deeds, and every man is to love and honour his wife').

for the formidable difficulty presented by *the prohibition of the use of images*. Down to the 8th cent. no one appears to be acquainted with so categorical a command that images of Jahweh are not to be made. Are we to hold that originally another commandment stood in the place of this one, or that Moses promulgated not ten but seven Commandments? The latter position has recently been maintained by Eerdmans.* He refers the command against images to the 7th cent., but seven of the commands of the Decalogue to the time of Moses, the first of these being 'I, Jahweh, am your God.' We are largely in accord with Eerdmans when he discovers no such affinity between the Decalogue and the great Prophets that it *must* be regarded as a product of the current of ideas initiated by them; we are at one with him also in holding that the different commands and prohibitions have not an absolute but only a relative scope. In this last respect, however, he goes too far when he maintains that the *only* obligations meant to be enjoined (e.g. in the matter of the prohibition of killing) are towards fellow-countrymen, and when he transforms the 'coveting' of the tenth Commandment into appropriating of ownerless property, alleging that in the OT it is only the act and not the disposition that constitutes sin. It has been rightly urged by Wildeboer† against Eerdmans that in this way the deeper moral sense of the Decalogue is degraded, and the whole reduced to a mere scheme ministering to the utilitarian necessities of the common life of Bedawin.

The result of the above discussion is that the Mosaic origin of some rudimentary form of the Decalogue (apart from the command against images) does not appear to be absolutely excluded, but that here again we must be content to refrain from pronouncing a more definite judgment. In any case, the religious and moral significance and the germinal power—we might almost say the power of expansion—of the ideas of the Decalogue are not lessened if we must place it, not at the first beginnings but in the later stages of development of the religion of Israel. Even then, in view of its aims, and above all in view of its structure, which in the first table shows an advance from the general and more spiritual to the more concrete and external duties, while in the second table the opposite course is followed, it remains a religious document which has a good title to be regarded, even by the Christian Church at the present day, as a kind of *Magna Charta* for the guidance of the religious life.

III. THE RELIGION OF ISRAEL IN CANAAN DURING THE PRE-PROPHETIC PERIOD.‡

i. *THE SOURCES*.—For the periods with which we have hitherto been dealing we have had to content ourselves with backward inferences from later sources, but now we have at our command records of considerable compass, which enable us to take a reliable glance at the religious and moral conditions of the period of the judges and of the early monarchy. The circumstance is immaterial that the records in question, apart from the very ancient Song of Deborah, did not assume their present form till a considerable time after the events (somewhere from about the 10th to the middle of the 8th cent. B.C.). For, in the first

* 'Oorsprong en beteekenis van de tien woorden' (in *Theol. Tijdschrift*, xxxvii. p. 18 ff.).

† 'De Dekalog' (in *Theol. Studiën*, 1903, p. 109 ff.).

‡ Cf. Ch. Piepenbring, 'La religion des Hébreux à l'époque des juges' in *Revue de l'Histoire des Religions*, t. xxvii. 1; F. Seyring, *Die altisrael. Religion in den 'Heldengeschichten' des Richterbuchs*, Hamburg, 1892; C. H. Toy, 'The pre-Prophetic Religion of Israel' in *New World*, 1896, p. 123 ff.

place, all the evidence is in favour of the supposition that during the whole of this period the moral and religious viewpoint was a fixed one; and, secondly, the date when the traditions were finally committed to writing must not be confounded with the date when the oral tradition became fixed. Thus the conditions underlying the patriarchal narratives as presented by the Jahvist cannot be brought down at latest beyond the time of Saul, even although the main part of the Jahwistic *written* source was not composed till about B.C. 850. The same remark applies to the so-called hero-narratives of the Book of Judges, which occupy themselves with the six 'great judges' (Ehud, Deborah, Barak, Gideon, Jephthah, Samson), and to the same category with which belong also the very ancient and important narratives contained in Jg 9 and in the Appendix, chs. 17-21 (although it is true that chs. 19-21 have been subjected to a very late revision). All these written sources—after various more recent components have been sifted out—give us a true picture of the conditions that prevailed during the period prior to the advent of written prophecy.

As a source of the first rank must be reckoned the ancient biography of Saul and David, which, now interwoven with many later—notably even Deuteronomistic—elements, is incorporated in the Books of Samuel. But what we have said is true in quite a special sense of the so-called 'Jerusalem source' in 2 S 9-20, which reveals so intimate an acquaintance with the course of events, and shows at the same time so delicate a psychological estimate of David, that in all probability it should be placed as early as the time of Solomon. So also the older components of the biography of Solomon in 1 K 1-11 contain a great variety of valuable material. And finally, from the earliest of the writing prophets, Amos and Hosea, important backward inferences may be drawn as to the conceptions that prevailed before their day.

ii. *THE CONCEPTION OF GOD*.—1. That even in this period we can speak at most of henotheism (see above, p. 625^b f.) but not of absolute monotheism, would be sufficiently proved by the constant inclination of the people to Baal worship (on which see below, § iii.). This tendency assumes, of course, a belief in the existence of Baal (or the baals). If it should be contended that this belief ought to be treated as a delusion, not shared by the proper representatives of Jahwism, but at all times strenuously combated by them, this contention would be opposed to a number of clear statements. What was combated at all times was the *worship* of Baal and of other gods, but not the belief in their existence. When in Jg 11²⁴ Jephthah bids his messengers say to the king of the Ammonites, 'Wilt not thou possess that which Chemosh * thy god giveth thee to possess?' he only gives expression to a notion which was self-evident to his contemporaries and to the narrator. A similar notion underlies the language of 1 S 26¹⁹, where David regards banishment from the ancestral domain of Jahweh as necessitating the worship of other gods. The idea of a national god involves that the sphere of influence as well as the sphere of worship of the particular god extends only to the land of his people. Outside this other gods rule, and the man who has been driven within their sphere does well to accommodate himself to their service.

It is true that the worship of a god upon foreign soil is not absolutely excluded. According to 1 K 11⁷ Solomon erected upon the Mount of Olives a place of sacrifice for Chemosh, the god of the

Moabites.* The narrative in its present form sees in this (v. 1^a) a lapse on the part of Solomon into idolatry, into which he was seduced by his heathen wives. But, in all probability, what is in view here is—what to the original narrator was quite an unobjectionable procedure—the erection by Solomon of a sanctuary for a Moabite wife, where even in the land of Judah she might render worship to her ancestral god. Such a desire on her part would appear to Solomon quite fair and reasonable, without its ever entering his mind to take part himself in this cult. Moreover, such an aberration on the part of the builder of a splendid temple for the God of the land would be absolutely inconceivable. In this connexion it may be remarked that there is scarcely room for doubt that even then a method had been discovered whereby the worship of a national god upon foreign soil was rendered possible. Earth was brought from *his* land to the foreign country, in order thus to be able to offer sacrifice to him on his own soil. Thus Naaman the Syrian (2 K 5¹⁷) asks from Elisha two mules' burden of (Israelitish) earth, because he is resolved henceforward to offer neither burnt-offering nor sacrifice to any other god but to Jahweh alone. It is quite clear that Naaman's idea was quite in harmony with the belief of the Israelitish narrator. But, on the other hand, the conviction that the power of a national god in his own land is irresistible when it has been properly invoked, has very drastic testimony borne to it in 2 K 3²⁷. The 'fierce anger' which comes upon Israel after Mesha has sacrificed his firstborn son upon the wall (thus in the view of the besiegers) is the anger of the god of the land, Chemosh, who after such an offering cannot remain inactive, but drives the enemy out of his country. It is possible for *us* to explain this result very naturally on the ground that the besiegers lost all courage through fear of the supposed anger of Chemosh; but this is by no means the view of the narrator and his contemporaries.

2. But if, in view of all this, the question for this whole period is not whether Jahweh, the God of Israel, is the only God, the question arises all the more, what special significance He had for His people. As we have already (p. 631^b f.) pointed out, the full meaning of the fundamental propositions, 'Jahweh is the God of Israel, and Israel is the people of Jahweh,' always comes out when we have to deal with action on the part of a number of the tribes, if not the whole of them.

(a) This is the case almost exclusively in *war*. There the name of Jahweh is the connecting link which brings the otherwise heterogeneous elements into the closest union with one another, inspires them with enthusiasm, and leads them to victory. He is the *war-God*, Jahweh, whose commander-in-chief appears to Joshua in Gilgal (Jos 5^{13b}); † who, represented by the sacred Ark (see above, p. 628 f.), causes the walls of Jericho to fall down (Jos 6); and after the battle of Gibeon rains great stones upon the fleeing Canaanites (10¹¹). With peculiar energy the joyful confidence in Jahweh as the real leader in battle meets us in the Song of Deborah. The whole Song is meant, above all, to celebrate the praises of Jahweh (Jg 5^{21.9.11}), who left His dwelling-place on Sinai to hasten by Mt. Seir to the battlefield. He was the true leader in the fight, for the inhabitants of Meroz are cursed 'because they came not to the help of Jahweh, to the help of Jahweh among the

* This statement alone probably belongs to the original text; the rest here, as in 2 K 23¹³, is Deuteronomistic or still later expansion. The LXX has in part a different text.

† The narrative now breaks off in the middle of a sentence. The close may have been deliberately suppressed because it contained a different explanation of the name 'Gilgal' from that given shortly before in 5⁹.

* Probably, by a confusion, for *Milcom*, for everywhere else Chemosh appears as the god of the *Moabites*.

heroes' (v.²³); on the other hand, 'from heaven fought the stars, in their courses they fought against Sisera' (v.²⁰). It is specially worth noting with what force expression is given also in other passages in the Song to the thought that on such an occasion it is the unconditional duty of the different tribes to take the field with Jahweh against the common foe. Hence the panegyric on the valiant tribes which showed their willingness for this service (vv.^{13-15, 18}); and, on the other hand, the bitter scorn poured upon the dilatory ones (vv.^{16b-17}). And the concluding verse once more lays the strongest emphasis upon the fact that the enemies of Israel are on that very account the enemies of Jahweh, but that glory and happiness attend on those who choose Him—

'So must all thine enemies perish, O Jahweh :
But those that love him are as the rising of the sun in his strength.'

The belief in a personal presence of Jahweh in decisive battles does not present itself, however, merely in highly strung poetry like the Song of Deborah. Apart from passages according to which He accompanies Israel into battle in the train of the Ark (see above, p. 623 f.), David still declares, after his first decisive victory over the Philistines: 'Jahweh hath broken mine enemies before me as waters break through (the dam),' 2 S 5²⁰; and before the second battle he receives from Jahweh this oracle: 'When thou hearest the noise of marching in the tops of the *baka* trees, set out; for then is Jahweh gone forth to make a slaughter in the camp of the Philistines' (v.²⁴).

Even if many usages which Israel practised in war, and which gave to war the appearance of an uninterrupted exercise of a religious function, date from the times of Polydemonism, and were originally evoked by regard to the 'demons' (see above, p. 621^b), there is manifestly no longer any consciousness of this in the period with which we are now dealing. Israel's wars are the 'wars of Jahweh' (Nu 21¹⁴). The acts of consecration and the restraints to which warriors submit themselves have regard to Jahweh. Very instructive from this point of view is the very ancient narrative of 1 S 21^{4ff.}. The priest is prepared to give the sacred bread (the so-called shewbread) to David only in case his pretended followers have kept themselves from women. David professes that it is so, and that his company set out with sacred 'vessels' (i.e., probably, clothes and weapons). David thus puts aside the fear that he and his companions are wanting in the purity required *towards Jahweh*. It was to Him then expressly that the consecration of the warrior was due. Even in Deuteronomy (23⁹ (10) ff.) the prescriptions about maintaining cleanliness in the camp, which in all probability have a Polydemonist motive, are in v.¹⁴ (15) based simply on the ground that 'Jahweh thy God walketh in the midst of thy camp to deliver thee and to give up thine enemies before thee; therefore shall thy camp be holy.'

(b) Again, as regards the frequent mention of the execution of the 'ban' (cf. above, p. 619^b f.), we find all through this period no other supposition than that the devoting of human beings and of spoil is purely for the honour of Jahweh. So in Jos 6²⁴ 7^{1ff., 23}, and especially 1 S 15³³ where Samuel in the sequel executed the 'ban' upon the Amalekite king Agag by heaving him to pieces 'before Jahweh' (as one devoted to Jahweh) in Gilgal.

(c) The circumstance that during this period the character of Jahweh as the war-God is so prominent a feature in the conception of God, explains why now, for the first time, we make acquaintance with a designation of Jahweh which, beyond doubt, is originally connected with this side of His character, namely *Jahweh Zēbā'ōth* (יְהוָה צְבָאוֹת).

That *Zēbā'ōth* is the plural of *zābā*, 'host,' and thus signifies 'hosts' or 'armies,' is generally admitted. It is equally recognized that '*Jahweh Zēbā'ōth*' is simply an abbreviation for the complete formula '*Jahweh 'Ēlōhē Zēbā'ōth*,' or, with the article, '*Jahweh 'Ēlōhē ha-Zēbā'ōth*,' i.e. 'Jahweh, the God of Hosts.'† But now, what species of hosts is meant? Or, to be more accurate, let us ask, What was *originally* meant? For there is the strongest initial probability that this name of God assumed in the usage of the Prophets a more comprehensive sense than originally belonged to it. The controversy now turns upon the question whether the primary reference in the 'hosts' is to hosts of 'demons,'‡ or to the heavenly hosts (i.e. the angels),§ or, finally, to the earthly hosts of Israel.||

(a) It is probable enough, in the light of what has been formerly said, that even in the post-Mosaic period an important rôle was more or less consciously attributed to the 'demons' in war as well as elsewhere. But that, after the adoption of Jahwism, Jahweh should have been treated simply as the leader of the 'demons,' and that the title 'Jahweh of Hosts' in this sense should have been employed even by the prophets without scruple, nay, even by preference, is inconceivable. For genuine Jahwism occupies a position of natural opposition to the faith in 'demons,' and hence we have nowhere any certain trace of such a quasi-official recognition of the latter as would be implied if the explanation we are examining were correct.

(β) On the other hand, a number of witnesses, some of them ancient, can be called in favour of the conception of an angelic host surrounding Jahweh. In this category we must not, indeed, include passages like 1 K 22¹⁹. For 'the whole host of heaven' which the prophet Micaiah beheld on the right and the left of Jahweh is no more a war host than is 'the host of the height' in the very late passage Is 24²¹. But in Gn 32³ (2) (E) the angels of God are probably thought of as belonging to a camp of war; the 'leader of Jahweh's host' in Jos 5^{13f.} can only mean the leader of a host of angels; and the horses and chariots of fire round about Elisha (2 K 6¹⁷) are plainly driven by warrior angels.

(γ) All this, however, does not weaken the force of the circumstance that the plural *zēbā'ōth*, in all the 26 passages where it occurs outside the Divine title, never stands for the host of heaven,¶ but always for the earthly battalions of Israel (Ex 7⁴ 12^{17, 41} etc., down to the late Ps 44²⁰ (9) 'Thou goest not forth with our armies'); and it would surely be strange if *zēbā'ōth* had a different meaning only in the collocation '*Jahweh Zēbā'ōth*.'

* Cf., on the different collocations of the word in the Divine name (including its reproductions in the LXX), the exhaustive synopsis of Löhr in his *Untersuchungen zum Buch Amos* (Giessen, 1901), p. 37 ff.

† Such a shortening must be assumed even if the fuller formula, as Löhr holds, took its rise only a short time before the Exile (upon the analogy of 'Jahweh, the God of Israel').

‡ So already Wellhausen ('Skizzen und Vorarbeiten,' v. 77) and recently again Schwally ('Der heilige Krieg im alten Israel,' p. 5), only that the latter will have it that the special reference is to the 'demons' of war (the 'wild host which rages in war along with Jahweh').

§ So most, following the example of Ewald (*Die Lehre der Bibel von Gott*, ii. 339), who supposed the new name to have been once proclaimed by a great prophet upon the battlefield after a sudden victory had been gained. The same interpretation has been recently upheld afresh by Borchert in *SK*, 1896, p. 619 ff.

|| So already J. G. Herder (in *Geist der hebräischen Poesie*) and others; then, after the view which refers the expression to the hosts of angels had long been the prevailing one, E. Schrader in *Jahrbücher für prot. Theologie*, 1875, p. 316 ff.; and, recently, esp. Kautzsch in art. 'Zebaoth' in *PRE²* xvii. p. 423 ff., and in *ZATW*, 1886, p. 17 ff.

¶ This, on the contrary, is everywhere represented by the singular *zābā*; even in Ps 103¹ and 148² the plural form is demonstrably due to error.

But why—as Delitzsch asked years ago*—is it that the Divine name *Jahweh Zēbā'ōth* is not found in the very period when we should most naturally look for it, namely, at the time of the Exodus and of the conflicts with the Canaanites? Instead of this, the title first meets us in 1 S 1⁸ as an appellation of the God who dwells in Shiloh! Now, it is quite true that the complete absence of the name in the Hexateuch and the Book of Judges would be very surprising. But Klostermann (*Geschichte Israels*, p. 76) has made it in the highest degree probable that the name *Jahweh Zēbā'ōth* was, at least in the case of the Hexateuch, removed from the text by the hand of a late redactor (perhaps from the fear of its being misunderstood in the sense of the prohibited star-worship). Thus in Jos 3^{11, 13}, in place of the strange expression 'the ark with the law of the Lord of the whole earth,' surely there must have stood originally the usual formula 'the ark of Jahweh of Hosts'; and in 6¹⁷ the LXX (Κυρίω σαβαώθ) expressly witnesses to the reading *Jahweh Zēbā'ōth*.

Another objection to our interpretation is raised by Borchert, who argues that all the passages in which *zēbā'ōth* means the hosts of Israel belong to the latest elements in the Canon (20 of them to the latest source of the Pentateuch), and, moreover, that they speak, not of military hosts but of multitudes of people in general. But the latter assertion (even apart from 1 K 2³, where *zēb'ōth* in the present Deuteronom. narrative belongs in all probability to an earlier source) is not to the point. For the latest source of the Pentateuch always thinks of the people as a military body, whether on the march or in camp, ranged in fixed order about the sanctuary (cf. especially Nu 2). And the circumstance that in the older linguistic usage the earthly army (like the heavenly, Jos 5¹⁴) is designated *zābā* in the singular, does not prevent the conclusion that the plural likewise served originally as a designation of *earthly* hosts. This view finds a very strong support in 1 S 17⁴⁵. When David there says to the Philistine giant, 'I come in the name of Jahweh of Hosts, the God of the armies of Israel,' he plainly intends by the latter addition to give his heathen opponent an authentic interpretation of the name *Jahweh Zēbā'ōth*, which, without this, must have remained unintelligible to him.

But, if we abide accordingly by the interpretation of the title as referring to the hosts of Israel who are to put their trust in battle in Jahweh (as in Jg 5²³, 2 S 5^{20, 24}) as their true leader and champion, an additional remark requires to be made. *Jahweh Zēbā'ōth* is originally the war-God as represented by the sacred Ark.† That the ark itself was a warlike shrine was shown above (p. 628 f.). But now, when we find that, of the 11 passages in the Books of Samuel where the title *Jahweh Zēbā'ōth* occurs, no fewer than 5 stand in a direct or indirect relation to the sacred Ark, this cannot be accidental. Cf. 1 S 1^{3, 11} *Jahweh Zēbā'ōth* at Shiloh, where the Ark was then located; 4⁴ 'the ark of *Jahweh Zēbā'ōth*.' But one of the strongest evidences may be found in 2 S 6². It is true that the *original* text of this passage has suffered corruption, as is shown by the different form in the parallel 1 Ch 13^{6, 7}. But to strike out the *whole* sentence after *Zēbā'ōth* is quite an un-

justifiably violent procedure. Rather may we conclude that here in any case it was stated that 'over the ark the name of Jahweh of Hosts was named,' i.e. that the Ark stood in the closest relation to Jahweh as the *war-God*, being the representation and the pledge of His presence. And when, in 2 S 6¹⁸, David blesses the people in the name of Jahweh of Hosts, this is the solemn termination of all the arrangements for the conveying of the sacred Ark to Zion, which had thus for their objective Jahweh of Hosts, the war-God. Again, in Ps 24¹⁰, the designation of God as 'Jahweh of Hosts' (|| v. 8, where He is called a mighty one and a war-hero) is most simply explained by supposing that in this Psalm-fragment the subject is the return of the Ark to the temple from a campaign.

(δ) While convinced that the above is the true interpretation of *Jahweh Zēbā'ōth* as an original appellation of the war-God represented by the sacred Ark, we do not mean to deny that another conception gradually established itself in the linguistic usage, to such an extent that in many passages the original conception appears to be quite forgotten. This is shown even by the statistics of the employment of the expression. Of the 278 passages in which *Jahweh Zēbā'ōth* (so 234 times) or another combination with *Zēbā'ōth* occur, there are 19 in the Historical books (11 in Samuel, 5 in Kings, but only in the mouth of prophets; 3 in Chronicles in parallels to Samuel); 15 in the Psalms (in the first book only Ps 24¹⁰; 14 in the second and third books); while all the other instances are in the Prophetic books. Even if amongst the last named there are a few which might point to *Jahweh Zēbā'ōth* as the war-God, such an interpretation is quite impossible in the vast majority of instances. On the contrary, the addition *Zēbā'ōth* has plainly attached to it the notion of the *supramundane* power and glory of Jahweh. It is manifestly so in those passages in which this Divine name stands in parallelism with the notion of the 'holiness,' i.e. (in accordance with the Prophetic use of the term) the absolutely exalted being of Jahweh, as in Is 5^{16, 24} 6³. How this change of signification is to be understood is not possible to say with certainty. Only so much is clear, that, after the permanent establishment of the Ark in the mysterious darkness of the *adytum* of the temple, its former connexion with the war-God, *Jahweh Zēbā'ōth*, must have vanished from the popular consciousness, and that in place of this the awe-inspiring majesty of this God must have come into the foreground. It remains, however, the most plausible supposition that now the hosts of angels and perhaps also (at least in later times) of stars came involuntarily to be substituted for the earthly hosts, so that, finally, the idea of Ruler of the Universe connected itself *per se* with the title *Jahweh Zēbā'ōth*. In this way we could explain most simply the surprising circumstance that there is no instance of the occurrence of *Jahweh Zēbā'ōth* in the Book of Ezekiel, although it is met with very frequently in Jeremiah and immediately after the Exile. Ezekiel may have purposely avoided it because it was capable of being misinterpreted as a justification of star-worship.

3. Another weighty question connected with the conception of the Deity is this: Are there to be discovered, even in the pre-Prophetic period, tendencies towards overcoming the initial crass conception of the bodily form of God, or, in other words, a disposition to free the Divine being from the realm of the visible and sensible, and thus to spiritualize it? Now, it is an undeniable fact that the clothing of Jahweh with a body is a practice that still extends into this period. This is proved by the Jahwistic passages Gn 3^{8ff.} and

* In Rudelbach's *Zeitschrift für die gesamte lutherische Theologie und Kirche*, 1874, p. 217 ff.

† This connexion was already suggested by Vuilleumier (art. 'Le nom de Dieu Jahvé-ébaoth' in *Revue de Théol. et de Philos.*, April 1877, p. 302); it was established in detail by Kautzsch (loc. cit. above, p. 636a note 1).

‡ On the difficulties presented by the present text, and the numerous attempts that have been made to amend it, cf. Giesebrecht, *Die alttest. Schätzung des Gottesnamens* (Königsberg, 1901), p. 132 ff.

18^{1st}. * Nevertheless, the answer to the above question must be a decided affirmative, and there are even various methods of distinguishing between the transcendent, unapproachable, real being of Jahweh and the passing appearances which do not completely exhaust His being.

(a) To this category certainly belongs the *mal'akh Jahweh* or 'angel of Jahweh'† in the original sense of that term. This sense could never have been mistaken if men had not obstinately persisted in demanding that this *theologoumenon* should have the same sense throughout the whole of the Old Testament—a course to which they were driven on the ground of a mechanical doctrine of inspiration. Since, now, in certain late passages the 'angel of Jahweh' is undoubtedly, as a creature angel, clearly distinguished from Jahweh, it was thought that he could be also so distinguished in all the earlier passages.‡ In reality the 'angel of Jahweh' is originally a *form of appearance* of Jahweh Himself, 'a temporary descent of the latter to visibility,' distinguishable from Himself only in so far as it does not represent the full and complete majesty of His being. The circumstance, which has been felt to be very strange, that the expression 'angel of Jahweh' is not infrequently suddenly exchanged for the simple 'Jahweh,' is very simply explained. The designation 'angel of Jahweh' is necessary wherever he comes (particularly in conversation) into direct contact with men, whereas the simple 'Jahweh' is sufficient when God is to be thought of as if by Himself, separate from men or at least unseen by them. Although in some passages this condition of things is obscured by touches of the redactor's hand, there are others where it is readily recognizable.§ So in Jg 5²³ 'Curse Meroz, said the angel of Jahweh [addressing Israel], because they came not to the help of [the invisibly present] Jahweh.' In like manner, in Gn 16^{7th} the God who speaks to Hagar is always called *mal'akh Jahweh*, whereas, according to v. 11, Jahweh Himself has heard her affliction, this being a function for which He did not require a personal meeting with her. In any case, it is quite in the spirit of the narrator when in v. 13 Hagar discovers in Him who has spoken with her Jahweh Himself. Again, in Gn 21^{7th} (the Elohist parallel to the Jahwistic narrative of ch. 16) it is God that hears the voice of the lad, but the *angel of God* that calls to Hagar out of heaven, etc. And if in v. 19 it is God that opens her eyes, so that she sees the well of water, this required no *personal, mechanical* operation. On the contrary, it might be accomplished by an act of the Divine will working from afar, and this is plainly the meaning of the narrator. But it is to be observed how here in E a marked spiritualizing of the

ancient *theologoumenon* has already taken place. In J the angel of Jahweh evidently meets Hagar at the well personally and in human form; in E, on the other hand, he calls to her 'from heaven.' The thought of a human body pertaining to Jahweh is thus, if not exactly dropped, forced into the background. The same is true of Gn 22¹¹ [where *mal'akh Jahweh*, occurring in what is otherwise an uninterrupted Elohist narrative, can be only a variant for *mal'akh 'Elohim*, due to a redactor, and occasioned perhaps by the redactory addition in v. 16, which also speaks of the angel of Jahweh]. In Gn 31¹¹ (E) the angel of God calls to Jacob 'in a dream,' so that here too any allusion to direct personal intercourse is avoided. But the angel of Jahweh expressly identifies himself with the God of Bethel. In this instance, then, there is no possibility of denying a self-revelation of Jahweh in the form of the angel. In the story of Jacob's wrestling (32^{25th}) only a 'man' is spoken of; but the latter appears to be thought of also as *mal'akh Jahweh*, for he blesses Jacob, who declares (v. 31), 'God have I seen face to face, and yet have escaped with my life.'—We encounter the *mal'akh Jahweh* again in Ex 3². Here he *appears* to Moses as a flame of fire, and thus comes into the realm of the visible. Hence it must be due to a redactor that in v. 4b, the Elohist addition to the Jahwistic v. 4a ('Jahweh saw'—analogous to Gn 21¹⁷ 'Jahweh heard'), it is God Himself and not the angel of God that calls to Moses from the bush. By the way, in the whole of the further transaction (v. 6^{ff.}) there is not the slightest whisper of doubt that it is God Himself and not some messenger of God that speaks.

In precisely the same way as in Gn 16 and 21 may be explained the remarkable interchange of 'Jahweh' or 'God' and 'angel of Jahweh' in Nu 22²²⁻²⁵. The latter opposes the progress of Balaam (vv. 22-24, 26); he is seen by the ass (vv. 23, 25, 27), and at last by Balaam himself (v. 31); it is *he* that speaks to Balaam (vv. 32, 33), and the latter replies to him (v. 34). On the other hand, 'Jahweh' gives the ass the faculty of speech (v. 23); He opens the eyes of Balaam (v. 30, cf. the precisely similar case in Gn 21¹⁹)—both examples of far-working effects of the power of Jahweh.

In Jg 6^{11th}, again, we have, according to v. 14, a personal manifestation of Jahweh. This is called *mal'akh Jahweh* everywhere except in vv. 14, 16, 23; but even in vv. 14, 16 the LXX read *mal'akh Jahweh*, and no doubt this was the original reading, and not an intentional change introduced for the sake of harmony with the text elsewhere. Finally, in Jg 13^{3rd} the angel of Jahweh, whom the parents of Samson took at first for a man of God, is intended to be an appearance of Jahweh Himself, as is shown not only by v. 18, but quite expressly by v. 22nd. The last passage to which we may claim to appeal in this connexion is Hos 12^{4th}. 'Jacob contended with God, he contended against a Divine manifestation (*mal'akh*),' etc. The prophet evidently avoids naming Jahweh Himself, but his meaning is clearly the same as is intended in the passage which underlies his reference (see above). Other witnesses to this sense of the expression *mal'akh Jahweh* are to be found in the statements, summary as they are, of Gn 48¹⁶ (E), Jg 2⁴, 2 K 1^{8, 15}, and in the mention of the angel of God (in E parallel with the pillar of cloud in J) in Ex 14¹⁹. On Mal 3¹ see below.

It is intelligible how, as the conception of God grew more profound, the above described pale manifestation, although only temporary and not exhausting the complete being of Jahweh, must have given offence to the religious sense. But this offence was not summarily removed by transforming the *mal'akh Jahweh* into a created angel; on

* In Gn 18^{1st} there are now, indeed, as has been shown by Kraetzschmar (*ZATW*, 1897, p. 81 ff.), two recensions of the same narrative combined. According to the earlier of these, Jahweh Himself appears, accompanied by two angels; according to the later (the 'plural source') three angels are sent by Jahweh, who Himself abides in heaven (cf. esp. 1924).

† The E source of the Pentateuch remains even here true to its principle of avoiding the name 'Jahweh,' and says (but in quite the same sense) *mal'akh 'Elohim* (Gn 21¹⁷) or *mal'akh ha-'Elohim*, 'angel of God' (Gn 31¹¹, Ex 14¹⁹).

‡ The monographs on the *mal'akh Jahweh* from this standpoint have, of course, now ceased to possess interest. The correct view is represented especially by Koster (art. 'De mal'ach Jahve' in *Theol. Tijdschrift*, 1876, p. 367 ff.). Only, he goes too far in seeking to explain all appearances of angels (even in the plural, as Gn 28¹² 32²¹) in pre-exilic passages as self-manifestations of God.

§ This frequent interchange of 'Jahweh' and '*mal'akh Jahweh*' shatters the (at first sight very plausible) theory that the motion of the 'angel of Jahweh' is the necessary consequence of Jahweh Himself being supposed to have His dwelling-place at Sinai. Enthroned there, He might be supposed incapable of appearing elsewhere at the same time. But this is a false assumption. On the contrary, where the angel of Jahweh appears, there is Jahweh also active, but it is only His form of manifestation that is *visible and audible*.

the contrary, men still held fast to a representation of Jahweh, although with a stronger emphasis laid upon the distinction between this and Jahweh Himself. Under this head fall certain passages in which it is sometimes hard to say whether we are still to think of a *mal'akh Jahweh* in the form described above, or simply of a created angel. So in Ex 23^{20f.} 'Truly I will send my * angel before thee, to keep thee by the way, and to bring thee into the place which I have prepared. Take ye heed of him, and hearken unto his voice; be not rebellious against him, for he will not forgive your transgression; for my name is in him.' This last expression means nothing else than 'for he is a representation of my being' (see below, p. 640^b f.), and is not to be weakened, with Ewald and others, as if it meant only that the angel represents God as the ambassador does the king, and has power to speak in His name; on the contrary, he is himself essentially Divine. We shall presently see, however, that the 'name' of God is not so directly identical with God as could be said of the *mal'akh Jahweh*. In the same sense as we have just established for 23²⁰ we are to understand also 32³⁴ and 33³ [read again, with Luc., 'my angel']. For in 33³,⁵ it is said of God Himself that He cannot go up in the midst of the Israelites, for He should have to destroy such a stiff-necked people. Perhaps we ought, finally, to include in this category the passages where David is compared to the angel of God (2 S 14¹⁷, 20 19²⁸; on the other hand, 1 S 29⁹ has 'like an angel of God'). The expression is too general to permit of a certain interpretation. But, seeing that the woman of Tekoa would hardly have ventured to treat David's wisdom as equal to the wisdom of God Himself, it is not unlikely that we are here also to think of a representation of Jahweh which is not absolutely identical with Him. On the other hand, 'the angel of Jahweh' in 2 S 24¹⁶ is a creature angel, for Jahweh commands him to leave off his work of destruction. The case is similar in 1 K 19⁷ (cf. v. 5) and 2 K 19³⁵ (Is 37³⁶). Finally, in Ps 34⁸⁽⁷⁾ 35^{5f.} we have perhaps simply the idea of a guardian angel (appointed by God).

The *theologumenon* of the 'angel of Jahweh' is wholly wanting in the pre-exilic prophets; and in Zec 1^{14f.} 3^{1-6f.}, where it reappears after a long interval, there can be no doubt as to the creaturely character of this 'angel of Jahweh.' For he prays to Jahweh, and Jahweh answers him in comforting words. He delivers the Divine commission (1¹⁴); he is met by 'another angel' (2⁷⁽⁹⁾); and again in 3² [where, in view of v. 1, read 'and the angel of Jahweh said'] he is once more expressly distinguished from Jahweh. In the considerably later passage, Zec 12⁸, 'the angel of Jahweh' stands in parallelism with 'Elohim'; but the latter term is here manifestly not simply the equivalent of *Jahweh*, but stands for 'a supramundane, Divine being'; so that even here 'the angel of Jahweh' is kept quite distinct from Jahweh Himself. One might rather be tempted to think of a self-revelation of Jahweh in the 'angel of the covenant' of Mal 3¹, seeing that he is named immediately after 'the Lord,' i.e. Jahweh. In reality, however, he is coupled with Jahweh only as His attendant and instrument, and thus at the same time distinguished from Him.

(b) Closely akin to the 'angel of Jahweh,' in its original sense, we have sometimes the 'face (פָּנִים *pānim* †) of Jahweh,' i.e. simply Jahweh Himself

as personally present, although (like the *mal'akh Jahweh*) in a form of manifestation which does not exhaust His full being. Unfortunately, the principal passage which treats of this *theologumenon*, namely Ex 33, has not been preserved entire, and hence its interpretation is difficult. In the text (v. 3^{af.}), which is a combination of various sources and strata of sources, God declares that He cannot [personally] go up in the midst of the people, else He should have to consume them. Israel is much disturbed at this announcement; but at God's command the people put off their ornaments, while He announces His intention of considering how He may provide a substitute for His personal presence. After v. 6 there must have been (from the pen of E) an account of the constructing of the tent and the sacred Ark from the ornaments of the people, for the existence of the tent is all at once assumed in v. 7. The Ark, in fact, which represents Jahweh, is the substitute for His personal presence. When, now, in J's parallel (v. 12^d) God, in answer to Moses' question whom He means to send with the people, replies (v. 14), 'My face shall go [with you],' this cannot, in flat opposition to E, mean 'I in my own person.' That is to say, J, as well as E, must have had in view something secondary, some partial representation of the full being of Jahweh, whether he, too, thought of the sacred Ark, or the self-manifestation of God in the form of the *mal'akh Jahweh* was before his mind's eye. It is to Ex 33¹⁴, beyond doubt, that allusion is made in Dt 4³⁷ and Is 63⁹. In the latter passage the present text speaks of 'the angel of his face (*pānim*).' That would mean the angel in whom His *pānim*, the manifestation of His presence, was found. But we should certainly read, with the LXX, 'No messenger or angel [read וְלֹא מַלְאָךְ, but his face, saved them.' Here, plainly, *pānim*, as the proper manifestation of Jahweh, is opposed to messengers and angels, who are quite distinct from Him. Yet even the author of Is 63⁹ cannot have regarded the *pānim* of Jahweh as absolutely identical with Him, else he would surely have said simply 'Jahweh, he saved them,' and not 'his face saved them.' In three other passages the *pānim* of Jahweh denotes His appearing to execute judgment upon the foes of Israel (Ps 21¹⁰⁽⁹⁾), or upon Israel itself (Ps 80¹⁷⁽¹⁶⁾, La 4¹⁶ 'The angry glance of Jahweh hath scattered them').

(c) To the category of forms of Divine manifestation belongs, further, the 'glory (כְּבוֹד *kābōd*) of Jahweh.'* It is true that no perfectly certain evidence can be adduced of the currency of this *theologumenon* as early as the pre-Prophetic period. For in the very ancient passage, 1 S 4²², *kābōd* appears to be a designation of Jahweh who dwells in the sacred Ark, and hence belongs to quite a different category from the *kābōd* in all other pre-exilic passages. In the latter the *kābōd* is the manifestation-form in which Jahweh on solemn occasions shows Himself to Israel; it stands, above all, for the brightness which streams from the cloud surrounding Him. It may be that here, too, there was originally a connexion with the thought of the storm-God who appears in dark lightning-flashing clouds (so, probably, still in Ex 33¹⁸ and Dt 5²¹⁽²⁰⁾), but the *kābōd* may exhibit itself apart from storms (so especially in 1 K 8¹¹ || 2 Ch 7¹, where the *kābōd* of Jahweh in the form of a [bright] cloud fills the newly built temple). On

by the circumstance that in Carthaginian inscriptions the goddess Tanit very frequently receives the honorific title 'Face of Baal' (*pēnē Bā'al*), i.e. personal (as it were, incarnate) representation of the Deity in general.

* A very thorough examination of the history of this notion will be found in von Gall's *Die Herrlichkeit Gottes: eine biblisch-theologische Untersuchung ausgedehnt über das Alte Testament, die Targume, Apokryphen, Apokalypsen und das Neue Testament*, Giessen, 1900.

* The Massoretic text has 'an angel' (as in Nu 20¹⁶); but doubtless we should read, with the Samaritan text and Lucian's recension of the LXX, 'my angel' (*mal'ākhi*). Cf. even the MT of v. 23 'For mine angel shall go before thee,' etc.; and Gn 24⁷⁻⁴⁰, where we already read, 'He shall send his angel before thee.'

† A remarkable light is thrown upon this peculiar designation

the other hand, in Is 6³ (and so also in Nu 14^{21f}, Hab 2⁴, and often in the Psalms, e.g. 19²⁽¹⁾ 72¹⁹) *kābōd* appears to stand in a much wider sense for the manifestations of the Divine majesty and omnipotence which are displayed in all parts of the earth.

Quite a different sense attaches to the *kābōd* of Jahweh in Ezekiel as well as in Is 40-66 and in the so-called Priests' Code. Here it is plainly the form itself in which Jahweh becomes visible, and not simply the temporarily assumed veiling of His real being. This *kābōd* shines like *hashmal** (Ezk 1^{27f}); it rises from its place with a noise like that of a great earthquake (3¹²), leaves the cherubim-chariot, and approaches the threshold of the temple, so that the temple is filled with the cloud [which veils the *kābōd*], and the fore-court with the brightness of the *kābōd* of Jahweh (9³ 10⁴). Then, once more mounting the chariot (10^{18f}, cf. also 3³ 8⁴), it leaves the city and fixes its abode on the Mount of Olives during the period of judgment and desecration (11^{22f}). Thence, when the day of deliverance dawns, it returns by the east door to the temple, and the latter as well as the whole land shines anew in its reflexion.

The same conception of the *kābōd* as a figure shooting out rays afar is found, although in a somewhat different form, in the Messianic glimpses of Is 40-66. According to 40⁵ it is to show itself as soon as the preparations for the return of the exiles are undertaken; here, in all probability, it is thought of as the guide at the head of the returning band. On the other hand, in 60^{1f} the *kābōd* of Jahweh streams over them (thus apparently in heaven); in 59¹⁹ (|| the 'name of Jahweh,' see below), again, and in 66^{18f} *kābōd* may stand, as in Is 6³ etc., for the glorifying of the majesty and omnipotence of Jahweh, which is visible to the whole world.

The conception of the *kābōd* of Jahweh present in Ezk 1-11 and in ch. 43 recurs quite clearly in the Priests' Code, naturally without the connected notion of the cherubim-chariot. It is enthroned upon Sinai, enveloped in the cloud; but to the eyes of Israel it presents itself as devouring fire (Ex 24^{16f}; cf. also Lv 9^{23f}, Nu 14¹⁰ 16¹⁹ 20^{6, 8}). In Ex 40^{34f} and Nu 17⁷ [16¹²] the cloud appears, as it were, as the herald and signal of the *kābōd* of Jahweh which appears immediately after it, and fills the Tent of Meeting. Cf. also the discussion of the 'Glory of Jahweh' in vol. ii. p. 184 ff.

All the *theologumena* we have just described are attempts to bridge the gulf between the real being of Jahweh, which eludes human sight and comprehension, and the realm of the visible, which is alone accessible and intelligible to man. One perceives the inadequacy of all comparisons, and yet these cannot be dispensed with so long as the human mind cannot conceive of *personal* action and influence proceeding except from a bodily form (this bodily form, moreover, being always primarily human). Hence it marks a considerable advance on the old notion of the *mal'akh Jahweh* when in the *theologumena* of the *pānīm* and the *kābōd* of Jahweh the thought of a human form is kept as much as possible in the background. Even if Ezekiel (12^{6f}) still ventures—in a supplementary sort of fashion—on a comparison of the *kābōd* of Jahweh with the human form ('a likeness as the appearance of a man,' v. 26; 'from that which appeared as his loins,' v. 27), in Deutero-Isaiah and the Priests' Code there is no allusion whatever to the form of a man. The only images that are considered worthy to represent the supra-mundane and mysterious being of God are fire (which is, as it were, the least material element)

and the more than earthly brightness which proceeds from it, and which is rendered tolerable to the human eye only by an enveloping cloud.

(d) We have still, however, in this connexion, to speak of a *theologumena*, which likewise aims at distinguishing between the immanent Jahweh and His manifestations and acts, avoiding at the same time all introduction of a bodily form. We refer to the remarkable expressions regarding the 'name of Jahweh.'* The modern mind finds it hard to realize the profound meaning which a person's name possessed in the eyes of men, including the Israelites, in ancient times. Giesebrecht (l.c. p. 94) rightly defines a name as meaning, according to the ancient conception, 'a something parallel to the man, relatively independent of its bearer, but of great importance for his weal or his woe, a something which at once describes and influences its bearer.' He supports this definition (ib. p. 68 ff.) by very numerous and striking testimonies, derived from the conceptions of other peoples and religions. But what is true of a human name is true also, *mutatis mutandis*, of the Divine name. To know it is of vital importance, for this is the condition of being able to use it in invocation; and invocation has, according to primitive notions, a real efficacy, giving to the invoking party a kind of power over the name invoked, so that he can compel its aid. This explains why, in heathen cults, the name of a particular god was studiously kept secret, lest it might be abused through being invoked by an improper party.†

Now it is self-evident that in the OT, in the numerous passages, particularly in the Prophets and the Psalms, where the 'name of Jahweh' is introduced in various connexions, such crass and superstitious notions as underlie heathen magical formulas are entirely absent. The conception of God found in the Prophets (including Deuteronomy, as the specifically Prophetical law-book) and the Psalms permits of no other view than that all those manifold expressions are used from a thoroughly purified religious and ethical standpoint. But, on the other hand, Giesebrecht is certainly right in declaring the (almost universally) current explanation of these expressions to be inadequate, and, in attributing to the 'name of Jahweh,' in at least a great number of instances, a far deeper meaning. Most are content to explain the 'name' as the expression of the character, the connotation of the Divine attributes, in so far as these have become known to the Israelites, or have manifested themselves for

* Cf. Giesebrecht's monograph, *Die älteste Schätzung des Gottesnamens und ihre religionsgeschichtliche Grundlage* (Königsberg, 1901), which is at once thorough-going, and opens up a number of new points of view.

† A trace of this notion may be discovered with certainty in Gn 32³⁰ and Jg 13¹⁸. In both passages the manifestation of Jahweh (for such is originally meant) declines to give its name, thus escaping, as it were, any further annoyance. It may be, again, that in the Decalogue the commandment not to take Jahweh's name 'in vain' meant originally that men were not to compel action on the part of the sacred name by invoking it. So, too, Am 6¹⁰ is best explained, with Giesebrecht (p. 128), as expressing a dread of provoking the fiercely enraged Deity still further by uttering His name (cf. also 8³). Consideration is due, finally, to the remark of Giesebrecht (*Friede für Babel und Bibel*, Königsberg, 1903, p. 41), that the abstract notion 'deity,' is employed so frequently in personal names because, like the terms expressing relationship, this served as a protection to the Divine name, which might not be uttered. Cf. the numerous examples of such name-taboo's collected from all quarters by Giesebrecht, l.c. p. 33, note 1; see also Frazer, *Golden Bough*², i. 403 ff.

With the magical and at the same time irresistible efficacy of the solemnly invoked Divine name is plainly connected the firm belief in the terrible power of the *curse*. Thus Abimelech succumbs to the curse of Jotham (Jg 9^{20, 57}); Micah escapes the effects of his mother's curse by prompt restitution of the money he had stolen from her; and his mother at once removes the curse by pronouncing a formula of blessing, in which the name of Jahweh is invoked (Jg 17^{1f}); the curse of Elisha 'in the name of Jahweh' brings summary destruction upon forty-two children (2 K 2²⁴).

* According to the LXX and the Vulgate, this word (כֶּסֶף) stands for *electron*, that is, an amalgam of gold and silver.

their protection or deliverance. In point of fact, a number of frequently employed expressions are more or less satisfactorily explained in this way (e.g. when we read of proclaiming, praising, celebrating, glorying in, the name of God); there are even others where the name appears to be intended only in the sense familiar to us—as a combination of particular sounds (so in all connexions where a pronouncing of the Divine name is spoken of, such as calling upon, profaning, blaspheming the name, or putting it [in blessing] upon any one, Nu 6²⁷, Ps 129⁸). But there remains a very large number of passages in which these two methods of interpretation, so far from being satisfactory, yield no sense at all—passages in which the name, in short, appears to be identical with the person of God. This applies where such expressions as 'fear,' 'love,' 'honour,' 'confess,' 'trust in,' 'wait for,' are prefixed to the name of God. That a manifestation-form of Jahweh as *present* to *help* is here thought of, is evident from such instances as Ps 20²⁽⁴⁾ ('the name of the God of Jacob defend thee!') 44⁶⁽⁹⁾ ('through thy name we tread down our foes,' cf. 118¹⁰⁻¹²) 54³⁽⁴⁾ ('help me, O God, through thy name,' cf. 124⁸), Pr 18¹⁰ ('a strong tower is the name of Jahweh').*

If in the above passages the 'name' is really a personified 'power placed side by side with the proper person of Jahweh' (Giesebrecht, *l.c.* p. 66), this throws a clear light not only upon the above (p. 639³) cited passage Ex 23²¹ ('My name is in him'), but also upon the expressions just noticed, such as 'call upon, praise, thank, the name of Jahweh.' They refer not to the name 'Jahweh' as the pronunciation of certain sounds, but to the 'power' which has become hypostasized in it; otherwise, passages like Ps 54³⁽⁴⁾ ('I will declare to the praise of thy name, Jahweh, that it is good, that it hath delivered me out of all trouble') would be quite unintelligible.

All the more intelligible, on the other hand, become the very numerous passages which speak of a localizing of the name at particular sanctuaries, notably at the temple in Jerusalem. Favourite forms of expression with Deuteronomy and with the Deuteronomic redactors of the Historical books are, that Jahweh 'causes' His name 'to dwell' in the temple, or 'sets' it in the place chosen by Him, or that 'a house is built for his name,' so that now He is to dwell for ever at Jerusalem (2 K 23²⁷, 2 Ch 33⁴). It might be supposed that this application of the 'name of Jahweh' took its rise in the age of Deuteronomy, perhaps because the purified Prophetic conception of God urgently demanded such a distinction between the unapproachable, immanent Jahweh and His earthly forms of manifestation. But that this was not so is shown by Ex 20²⁴, which stands at the very head of the Book of the Covenant: 'In every spot [more exactly, 'at every place of worship'] where I will cause my name to be remembered [*i.e.* simply, 'where I will cause my "name" to be honoured as a manifestation of my being localized there'], will I come to thee and bless thee.' We are thus entitled not only to regard the *theologoumenon* of the 'name of Jahweh' as one of the most significant attempts at distinguishing between the real essential being of Jahweh and His more or less perfect manifestation-forms—analogue to the angel, the face, and the glory, of Jahweh—but to carry it back even to the pre-Prophetic period of the religion of Israel. Nay, in this very period the belief in a magical efficacy of the name must have played a more important rôle than later, when men, while laying emphasis upon the 'name' in expressions

that had become quite current, had no longer any clear consciousness of its once deeper signification.

4. All the above-described attempts to distinguish between the real being of Jahweh and His forms of manifestation* did not prevent men from seeking, even during this period, to realize a concrete presence of the God of Israel by having recourse to images of Jahweh. A proof of this lies in the circumstance that presenting oneself at the sanctuary is spoken of as 'beholding the face of Jahweh.'† Although this expression may have come afterwards to be employed in quite a weakened sense (as, for instance, in Is 1¹²), it certainly referred *originally* (like the extremely frequent 'before Jahweh') to looking upon the image of the Deity. Exactly in the same way the expression 'stroke the face of Jahweh or of God,' which had at first a literal sense, was afterwards weakened to the general meaning of 'propitiate God or beg His favour.' As images of God we must reckon not only the very ancient *pesel* (פֶּסֶל) or carved image and the bull-figures (prohibited in Judah), but also the *'ephôd* and the *tērāphim*.

(a) The *pesel* was a Divine figure, originally carved from wood or hewn in stone, for the most part probably in the form of a man, or at least with a human head. At first distinguished from the molten image (מַסֶּכֶּה *massēkhāh*), the word comes at last to be used also of the latter (Is 40¹⁹ 44¹⁰, etc.). Of course, for our present purpose, we leave out of account all those passages in which *pesel* [*pēsîlîm*, with the same meaning, serves as plural] stands for the image of a heathen god (Nah 1¹⁴ *et al.*). There are many passages, however, in which *pesel* means an image of Jahweh; and such a carved image appears to have been for long regarded as unobjectionable, whereas the molten image (probably with allusion to Israel's bull worship) is already prohibited in the Jahwistic section of which Ex 34¹⁷ forms a part. Even if the prohibition of the *pesel* in the Decalogue (Ex 20⁴, Dt 5⁸) extends to images of Jahweh, this would be simply a proof that the Decalogue (or at least the prohibition of images) originated later than J—a conclusion which is favoured by the circumstance that there were also other species (see below) of images of Jahweh which, till far into the monarchical period, continued to be revered without opposition, or at least to be employed as a means of obtaining Divine oracles. No doubt, it is an image of Jahweh that we are to understand by the *pesel* ‡ of Micah (Jg 17²⁴), seeing that it was procured with a sum of money that had been dedicated to Jahweh. The original narrative is not intended to convey any censure of Micah's action, but simply to give an account of the origin of the cult of the Jahweh-image at Dan (cf. 18³⁰⁴).

(b) The *'ephôd* (אֶפֶד) appears exclusively as an image of Jahweh, and more than once is clearly connected with the obtaining of oracles. The word means primarily 'something thrown over' (as applied to a garment it answers to the German *Überwurf*

* Among these may also be included in a certain sense the 'spirit of Jahweh or of God'; on which see below, pp. 653, 656^b f.

† It is simply a correction made in dogmatic interests (in view of Ex 33²⁰), when already in the LXX, and consequently in the MT, by means of a pointing which is linguistically hardly conceivable, the beholding of the face of God is transformed into an 'appearing before the face of God.' In Ex 34²³ and Dt 16¹⁶ (and hence also Ex 23¹⁷, where the Samaritan text still offers correctly the accusative sign אֶת instead of אֵל) read אֶתְּ (‘let him behold’) for אֵתְּ (‘let him appear’); and in Ex 34²⁴, Dt 31¹¹, Is 11² read אֶתְּ (‘to behold’) for אֵתְּ (‘to appear’). Even in Ex 23¹⁵ 34²⁰, where the passive אֵתְּ (in the sense of ‘my face shall not be seen’) might be possible, we should probably read the active אֶתְּ (‘they shall behold’).

‡ The 'molten image' named along with the *pesel* is, in all probability, a mistaken addition, and so is the *tērāphim* coupled with the *'ephôd* in v. 5 (in the other recension of the narrative). In 18³⁰⁴ only a *pesel* is spoken of.

* The most striking instance of this usage would be found in Is 30²⁷ ('The name of Jahweh cometh from afar, glowing is his anger,' etc.), if the text has come down to us correct.

or *Überzug*); coupled with *bad*, 'linen,' it stands for the 'waistcoat' (see vol. i. p. 725^a) worn by the priests or by people in general on ritual occasions (1 S 2¹⁸ worn by the youthful Samuel, 2 S 6¹⁴ by David before the sacred Ark). In the Priests' Code, finally, the *'ephod* (without *bad*) is the ornamental 'waistcoat' of the high priest, in which is the pocket with the sacred lots, the Urim and Thummim (Ex 25⁷, and esp. 28^{4ff.}). The attempt made, on the ground of these passages, to explain *'ephod* in every instance as = 'waistcoat' or the like, and thus to get over the mention of an image of God, is shattered by a number of ancient passages, about whose true meaning no doubt can arise. When Gideon, according to Jg 8^{26f.}, expended 1700 shekels of gold on the making of an *'ephod*, and 'set' [it is the same word, *נָשָׂא*, that is used elsewhere of the erecting of *mazzēbōth* or monuments] it in Ophrah, it cannot be a 'waistcoat' that is in view; on the contrary, the writer means to record to the credit of Gideon how, out of the spoil, he had an image of Jahweh constructed. The redactor of the Book of Judges, it is true, views his conduct differently (v. 27^b): 'All Israel went a whoring after it,' i.e. practised idolatry with it. But this very expression clearly indicates that the redactor, too, thinks of the *'ephod* as a Divine image, only that to him such an image is absolutely forbidden, under any circumstances, by the principles of the Deuteronomic legislation. Again, in Jg 17⁵ the *'ephod*, being parallel to the *pesel* of the other recension of the narrative (see above, p. 641^b, note †), is nothing other than an image of Jahweh. The same holds good of 1 S 21^{10 (9)}, where everything becomes clear if we think of the sword of Goliath, wrapped in a garment 'behind the ephod,' as hanging upon the wall behind the image of Jahweh standing on a pedestal in the apse of the sanctuary. In like manner the *'ephod* of 1 S 23²⁸ 14³⁻¹⁸ [here correcting the text by the LXX] 23³⁶⁻⁹ 30⁷ is the portable image of Jahweh, which the priest brings forward at the command of Saul or of David, because it was required for the obtaining of an oracle from Jahweh. It is nowhere indicated that the *'ephod* itself contained any mechanism for casting lots. On the contrary, the lots would appear simply to have been cast in presence of the image, and thus as it were before the face of Jahweh, and the result was accordingly regarded as having His sanction. That such an employment of the image of Jahweh was still viewed as quite unobjectionable, is shown by Hos 3⁴, where the prophet simply means that Israel (in exile) will have to dispense with all the requisites for a normal political and religious life, including *'ephod* and *tērāphim*.

Now, it may naturally be asked how the Divine image and the priestly 'waistcoat' could be designated by one and the same name.* The view that *'ephod* stands properly for the gold or silver overlaying or casing of an image of wood, clay, or even brass, can appeal for support to Is 30²², where the certainly equivalent feminine form *'āphuddāh*

stands parallel with *zippāi*, the metal casing of carved images. Yet it is a question whether *'ephod* did not primarily denote simply the garment used to clothe the Divine image (cf. Jer 10⁹, Ezk 16¹⁸). From this, as the most precious part and that which most struck the eye, the whole image might soon come to take its name. If we might assume that this ephod already had attached to it a pocket with the sacred lots, this would explain very simply how in the Priests' Code (Ex 28^{6ff.}) the objectionable *'ephod* could be wholly ignored as an image of the Deity, but retained without prejudice in the form of a garment with the oracle-pocket.*

(c) Not only the *'ephod* but also the *tērāphim* (תְּרָפִים) should doubtless be understood as images of the Deity—for the most part (see below), images of Jahweh. With the exception of 2 K 23²⁴ and Zec 10², the word *tērāphim*, in spite of the plural form, should probably be everywhere (quite certainly so in 1 S 19¹⁸⁻¹⁶) taken as the designation of only one image; that is to say, it is an example of the so-called *pluralis majestatis*, as happens frequently with such words as *'ādōnīm*, *bē'ālīm*, and usually *'ēlōhīm*. The etymology is still quite obscure. The connexion with the *rēphā'im*, or shades, favoured by many, is extremely improbable. All that is clear is that the *tērāphim* is related to the *'ephod* in the same way as the image of a household god is to the more official image set up in a 'god's house' and attended to by a priest. That the *tērāphim* is not necessarily an image of Jahweh is proved by the case of the *tērāphim* stolen by Rachel from Laban (Gn 31^{19-34f.}), which the latter calls 'my god' (vv. 30, 32); and by Ezk 21^{26 (21)}, where the king of Babylon consults the *tērāphim* at the crossing of the roads. In all other passages it is quite possible to understand *tērāphim* to mean an image of Jahweh. So [probably, indeed, by a later and mistaken expansion], along with the *'ephod*, in Jg 17⁵ 18^{14-17f. 20}, 1 S 19¹⁸⁻¹⁶ (which passages speak plainly in favour of a human-like form), and Hos 3⁴ (again coupled with the *'ephod*; see above). The circumstance that in 1 S 15²³, 2 K 23²⁴, and Zec 10² (where the *tērāphim* appear just as in Ezk 21²⁶, as giving oracles) the possession and use of a *tērāphim* is branded as a species of idolatry, proves nothing against its character as an image of Jahweh. From the Prophetic point of view, which is that represented in all the above passages, there is little difference between *images* of Jahweh and *images* of actual *idols*. The hypothesis that the *tērāphim* represented a survival of images of ancestors or stood for former tribal and family gods, would indeed suit well their character as household gods, but lacks all probability. Apart from the fact that no certain evidence can be adduced in favour of the prevalence of Ancestor Worship in Israel (see above, p. 614 ff.), it is hard to suppose that in the house of so zealous a Jahweh-worshipper as David there should have been found any image but one of Jahweh. Of the existence of the latter kind of image we have proof, above all, in Ex 21⁶. There we read that the slave who has no desire to go free in the seventh year is to be pinned by the ear to the doorpost before [the image of] God, which is evidently assumed as set up by the entrance. In view of the whole spirit and standpoint of the Book of the Covenant, this can refer only to an image of Jahweh as the witness of this symbolical transaction.† In like manner 'God' in 22^{7 (8)}

* Th. U. Foote, in what is in itself a very thorough and ingenious monograph, *The Ephod: its Form and Use* (Baltimore, 1902), denies that there is any distinction between *'ephod* and *'ephod bad*. The latter expression, since *נָשָׂא* in the sense of 'linen' is unproved, he explains as = '*'ephod partis* [virilis],' and the *'ephod* itself as the container of the sacred lots, a kind of pocket which may have been developed from the primitive loin-cloth. Foote arrives at this result (although he himself recognizes *images* in the *tērāphim* so often associated with the *'ephod*) by a quite artificial and untenable exegesis of Jg 8²⁷, 1 S 21¹⁰, and other passages. Moreover, if the *'ephod* was nothing but a pocket for the sacred lots, whence its sharp condemnation in Jg 8^{27b}, and the hold alteration of the text in 1 S 14¹⁸, where, in place of the objectionable *'ephod* [so still the LXX], the Ark—wholly impossible here—is inserted in the MT? The only explanation of this is that even at a very late date the true meaning of the *'ephod* in those passages was still well known, and on that account gave offence.

* Mention should be made here of the suggestion of Schwally (*Semīt. Kriegeraltertümer*, i. 15) that the priest, when giving oracles, himself put on the *'ephod*, the clothing of the idol, that the knowledge of the god might thus be transmitted to him.

† That *'ēlōhīm* in this passage cannot be understood, according to the usual interpretation, as meaning 'judges' (as representatives of God), is proved by Dt 15¹⁷, where, in the otherwise

might also be understood of a *tērāphīm*; but there, as well as in v. 8⁽⁹⁾, the reference is more likely to a Divine image in a public sanctuary.

From the above we conclude, then, that the *'ēphōd* and (at least from the monarchical period) the *tērāphīm* as well were images of Jahweh, which as such were regarded as quite unobjectionable in the pre-Prophetic period, nay, even as late as Hosea (3¹), until at last they were involved in the same condemnation as images of idols proper (cf. below, p. 679^b ff.).

(d) Finally, the *golden bulls* set up by Jeroboam at Bethel and Dan were intended as images of Jahweh, and not as heathen images. It might appear otherwise from the language of the Chronicler (2 Ch 13⁸ *et al.*), but the truth was still quite evident to the Deuteronomic redactor of the Books of Kings (cf. 1 K 12^{28f.}). In like manner the narrative of Ex 32^{1ff.}, which belongs to the older sources of the Pentateuch, is quite aware that Aaron meant to represent Jahweh by the golden calf which had brought Israel out of Egypt, for he makes him in v. 5⁶ proclaim a feast to Jahweh. But even here as the giving of this form to Jahweh is looked upon as a grievous offence on the part of Aaron; and the Deuteronomist is never weary in the Books of Kings of denouncing this cult as 'the sin of Jeroboam,' and of discovering in it one of the principal causes of the downfall of the Northern kingdom (cf. especially 2 K 17^{21ff.}).

The question whether in the pre-Prophetic period all those different kinds of images were actually identified with Jahweh, and were thus venerated as *fetishes*, cannot be answered right off by a Yes or a No. The plurality of images (so in particular also the *two* official bull-figures at Bethel and Dan) would naturally lead of itself to a distinguishing between Jahweh enthroned in heaven or upon Sinai and His numerous pictorial representations. But only too frequently, at least amongst the lower orders, there would be a tendency to fall into the error of confounding the Deity with His image, just as in the Roman Catholic Church distinctions are made by the people between different images of the Mother of God in regard to their miraculous virtues, although all these images are meant to represent one and the same person. The reproach so frequently addressed by the pre-exilic Prophets to their contemporaries, that they 'bowed down to the work of their hands,' must have been no less applicable in the pre-Prophetic period. Half unconsciously men changed, like the heathen (Ro 1²³), the glory of the immortal God into the image of perishable men and beasts.

5. Before closing our discussion of the conception of God, it may be fitting here to touch briefly upon the few passages that speak of *angels* as intermediate beings betwixt God and man, and of certain *half-mythological figures* which had already taken their place in Jahwism in the pre-Prophetic period.*

(a) The belief in supramundane and at the same time almost independent powers shows itself in the most surprising fashion in Gn 6¹⁻⁴, a passage with a strong mythological colouring, which belongs to the older stratum of J. The *bēnē 'ēlōhīm* [lit. 'sons of the gods,' but really a designation of those who belong to the category of *'ēlōhīm* or *numina* (just as *bēnē nēbī'im* does not mean 'sons almost identical text, the reference to *'ēlōhīm* is omitted. The Deuteronomist, in fact, quite correctly understood the reference to be to an image of Jahweh, and suppressed it on that account. Again, in Ex 22^{28, 27} (9, 28) and 1 S 2²⁰ *'ēlōhīm* has no other sense than that of 'Deity.'

* Cf. Koster, art. 'Het ontstaan en de ontwikkeling der angelologie onder Israel' in *Theol. Tijdschr.* 1876, pp. 34 ff., 113 ff.; A. Aeberhard, art. 'Gottes Umgebung nach den vorerlischen Schriften' in *Schweizer Theol. Zeitschrift*, 1902, p. 193 ff.

of the prophets,' but members of the guild of *nēbī'im*] appear here, if not as full-blooded popular gods in the sense of polytheism, yet as standing outside the realm of Jahwism as a kind of demi-gods. In all probability the original text meant simply to record that from their union with the daughters of men there sprang up on earth a hybrid race similar to the Titans and giants of Greek mythology. But it must be added that Gn 6^{1ff.} is the only passage of this kind. The *bēnē 'ēlōhīm* are mentioned elsewhere only in Job 1⁶ 2¹ 38⁷, where they are simply angelic beings in the service and train of God.

A more frequent designation of these intermediate beings is *mal'āk*, 'messenger,' 'angel.' Of course we here leave out of account the above (p. 638 f.) described *theologumenon* of the 'angel of Jahweh or of God.' To the category of creature angels serving or surrounding Jahweh may have belonged, according to the pre-Prophetic popular belief, the 'men' who accompany Jahweh on His visit to Abraham [in Gn 19¹⁻¹⁵, after parting from Jahweh, they are first called 'angels'] and are entertained by the latter.* So also the guardian-angel sent by Jahweh in Gn 24^{7, 40}, Nu 20¹⁶ (although in these passages the idea of the *mal'āk* Jahweh is not remote), and 1 K 19⁵; further, the angels of Gn 28¹² (E) whom Jacob in a dream sees ascending and descending a ladder (namely, in order to facilitate communication between heaven and earth at Bethel, a principal centre of revelation [the mention of the ladder in this passage shows that angels are still thought of as unwinged]); and the troop of angels of God (Gn 32²³ (2) [E]) whose appearance led Jacob to give the city of *Mahanaim* ('camp') its name. In the very doubtful text, Dt 33², the 'holy myriads' may probably refer originally to the attendants of God at theophanies. In addition to these few passages from the Pentateuch there are in the older strata of the Historical books: Jos 5¹³ (J?), where the leader of the [heavenly] army of Jahweh meets Joshua; and 2 K 6¹⁷, where the fiery horses and chariots are to be thought of as driven by angels. The 'destroying angel' of 2 S 24¹⁶, who at the command of Jahweh smites the people with pestilence, is evidently thought of, not as a professional 'executioner angel,' but as one appointed by God to carry out His judgment in this particular instance. In 1 K 22¹⁹, again, in the vision of the prophet Micaiah the whole host of heaven on the right and the left of Jahweh represents a celestial deliberative assembly. Quite a peculiar position is occupied here by 'the spirit,' who, in the light of the whole context, can be only the personified spirit of prophecy. Nothing is said in any of these passages about the moral quality of the angels, for even in Dt 33² [if the text be correct] 'holiness' refers not to their moral perfection, but only to their exaltation above this world and their belonging to God. So also the comparison of David to an angel of God (1 S 29⁹) has in view only the trust and reverence due to angels.—Our whole survey shows, however, that in early Israel statements about angels play only a subordinate part, and belong rather to the popular beliefs than to Jahwism proper. It is to be noted, moreover, that the most characteristic expressions are connected either with a dream (Gn 28¹²) or a vision (1 K 22¹⁹, 2 K 6¹⁷ may also be included in this category).

(b) To the realm of angels belong, beyond doubt, the *serāphīm* (סְרָפִיִּם). Although mentioned only in

* According to the oldest form of this narrative, as comes out plainly in 131-3.10-15, Jahweh alone appears to Abraham. Offence is naturally taken at this by a later recension, which is now skillfully interwoven with the earlier one, and which introduces three men or angels in place of Jahweh.

the vision of Isaiah (6²), they appear there as well-known beings, so that the belief in them may certainly be assumed for the pre-Prophetic period. Furnished with six wings, they offer around God's throne antiphonal praise in the Trisagion; one of them purges the lips of the prophet, and announces to him the forgiveness of his sins. They are thus, in fact, intelligent beings, angels. Of the numerous explanations of the name, the only one that can be taken in earnest is that which traces it back to the singular *sārāph*. This word means properly 'serpent' (Nu 21⁹, Dt 8¹⁵), and the seraphim must accordingly have been originally serpent-formed creatures—embodiments, indeed, of the serpent-like lightning-flashes that play around Jahweh. But, in the case of the seraphim of Isaiah, the six wings may be regarded as all that has survived of this somewhat mythological form. Moreover (probably long before the time of Isaiah), they have assumed human form, as is evident not only from the song of praise (v.³), which would be inconceivable in a serpent's mouth, but from the hand (v.⁶) and the speech of the *sārāph* (v.⁷). It may be noted, finally, that here again in Is 6 it is a vision that is recorded.

(c) Even more clearly than the seraphim, the *cherubim* (*kērūbim*, כְּרֻבִים, כְּרֻבִים, sing. *kērūb*) belong originally to the realm of mythology.* The etymology of the word is still disputed. According to some, *kērūb* is from the same root (Sanskrit *grībh*, 'grip') as the Greek γρύψ, 'griffin'; according to others, it is due to a transposition of the consonants of *rēkūb*, 'chariot' (cf. Ps 104³), from the root *rākab*, 'ride' or 'drive' (see below). The most probable derivation would be from the Assyrian *kurūbu* (plur. *kurūbi*), 'great,' 'strong,' if it could be proved with certainty that the winged bull-colossi with human heads, found at the entrance of Assyrian palaces, bore the name *kurūbi*.

All the various references to the cherubim have this in common, that they always imply the nearness of God, or at least indicate a sacred spot. But there are evidently two quite distinct underlying conceptions, which were only at a late period combined into one [hence even the name *kērūb* might have a double etymology]. According to Ps 18¹¹ (cf. also Is 19⁴) the cherub is a pale form of the wind-driven storm-cloud which serves Jahweh as His chariot [for which, originally, He rides as a horse?].† The other sense of the word *kērūb* is that of a guardian of sacred spots. To this category belong the cherubim of Gn 3²⁴, who, after the expulsion of our first parents, guard the entrance to the Garden of Eden [i.e. according to the original intention of the narrative, the dwelling-

* Cf., for the special literature, Kisters, art. 'De Cherubim' in *Theol. Tijdschr.* 1879, p. 445 ff.; Triebis, *Veteris Testamenti de Cherubim doctrina*, Berlin, 1888; J. Nikel, *Die Lehre des AT über die Cherubim und Seraphim* (Würzburg dissertation; full of dogmatic prejudices), Breslau, 1890; J. Petersen, *Cherubim*, Gütersloh, 1898 (account of the various interpretations from the time of Luther downwards).

† Instead of one cherub, a number of cherubim appear in 1 S 4⁴, 2 S 6², 2 K 19¹⁵ as bearers of God or of the Divine throne. Of these passages the last cited can scarcely have any other meaning, especially as there Hezekiah prays for a judicial intervention of Jahweh against Assyria, and thus, as it were, for an appearance of Jahweh. In a similar connexion 'He that sitteth upon the cherubim' is still mentioned in such late passages as Ps 80² (l) 99¹. On the other hand, it is scarcely to be doubted that in 1 S 4⁴ and in 2 S 6² the same expression is due to a subsequent interpolation, and is intended of the golden cherubim upon the lid of the sacred Ark, which are first mentioned in the Priests' Code (Ex 25^{18ff.}). According to the latter (Nu 7⁸⁹), Jahweh speaks to Moses from this lid, 'from between the two cherubim,' i.e. He has His proper dwelling-place there. The above interpolation was very natural on the part of a late redactor of 1 S 4⁴ and 2 S 6², because in both these passages there is express mention of Jahweh's relation to the sacred Ark. It is impossible that any of the above passages can refer to the two great cherubim which Solomon (see text above) set up beside the sacred Ark.

place of God]; and also the huge cherub forms, carved in olive wood, which Solomon set up in the temple to the right and the left of the sacred Ark, in such a way that with their outstretched wings they filled the whole space (1 K 6^{29ff.}, 8^{6f.}). So also the carved figures of cherubim on the walls and doors (1 K 6²⁹, 32, 35) and vessels (7²⁹, 36) of the temple indicate the near presence of God. Hence they appear also in the visionary temple of Ezekiel (Ezk 41^{18ff.}), as well as in the sanctuary which the Priests' Code assumes for the period of the wilderness wanderings. In the latter they present themselves, partly as worked on the curtains and the veil (Ex 26¹, 31), partly as two golden figures, with their faces turned towards each other, placed on the lid of the sacred Ark (25^{18ff.}; cf. preced. col., note †).

It is hard to say what form we ought to attribute to the cherubim with which we are dealing. In Ex 25²⁰ they have only one face each, whereas in Ezk 41^{18ff.} each has a man's and also a lion's face. Still more complicated is the description of them in the first vision of Ezekiel (1^{5ff.}). Here each of the four cherubim has four faces (a man's, a lion's, an ox's, and an eagle's) and four wings, besides human hands. Besides this, they are, according to 10¹², quite covered with eyes, symbols of the Divine omniscience. That they are creatures endowed with reason might be inferred at least from 10⁷, if the cherub there belongs to the original text; but not from 3¹², where for *cherub* we should read *gōrō* ('when the glory of Jahweh lifted itself up'). A comparison of all the above data leads to the conclusion that the cherub was indeed thought of all along as a hybrid being, but originally as probably composed of only two different bodies.* At the same time it can hardly be doubted that the Biblical cherubim are of Babylonian-Assyrian origin, although they need not have been first borrowed in the age of Solomon. But it is impossible to decide whether the ordinary cherub form corresponded to the Assyrian winged bulls or lions with a human head or the human forms with a bird's head. All that appears to be certain is that the complicated cherub forms in Ezk 1 and 10 (with all their additions) owed their initiation to the imagination of this prophet, only that he has perhaps united in one what the popular belief attributed to a number of hybrid beings. The most important point to notice is that Ezekiel, in his description, is the first to unite the conception of a griffin form with the other in which we found a pale form of the storm-cloud as the bearer of Jahweh. For the cherubim of Ezekiel, as is plain from 12²², 26^{ff.}, 9³ (where the whole appearance is included in the singular 'cherub') 10⁴, 18¹, are the bearers of the crystal plane on which the throne of Jahweh rests; by means of the wheels, which are inseparable from them, they move the chariot-throne of Jahweh. Of quite a different kind is the cherub of Ezk 28^{15ff.}, who, all covered with precious stones, walks upon the sacred mount of the gods amongst stones of fire. Here a direct borrowing from a *mythologumenon* of the East, as well as a partial affinity with Gn 3²⁴, is unmistakable. It should be remarked, however, that this cherub serves only the purpose of comparison (with the king of Tyre), while the cherubim of chapters 1 and 10 belong simply to a vision, and those of the temple and the tabernacle are merely symbolical ornaments. Hence they can in no case be reckoned amongst the necessary elements of Jahwism.

iii. SYNCRETISM BETWEEN JAHWEH AND THE CANAANITE BAAL. DEFEAT OF BAAL THROUGH JAHWEH'S BEING FINALLY LOCALIZED IN

* This conclusion is favoured also by the circumstance that they are compared by Philo and Josephus with the sphinxes.

CANAAN AND COMING TO BE CONCEIVED OF AS GOD OF HEAVEN.—1. Israel on entering Canaan found itself in presence of a pretty highly civilized people, which had long ago adopted the settled form of life, was skilled in agriculture, gardening, and vine-culture, and in consequence enjoyed great material prosperity. Nothing was more natural than that Israel should seek to compete with the Canaanites in the above-named industries. True, the transition from the purely nomadic to the agricultural state was accomplished but slowly. The patriarchal narratives, which may be regarded as a faithful picture of the conditions that prevailed during the earlier part of the period of the Judges, still exhibit a mingling of the settled with the nomadic life; and even in the so-called Book of the Covenant (Ex 21-23) the pasturing of flocks evidently still plays an important rôle along with the cultivating of the soil. The necessity of learning the finer arts of field- and vine-culture from the Canaanites—and that in constant association with them—would of itself suffice to explain numerous Canaanite influences upon the conduct and the habits of thought of the Israelites. But there are other two very powerful factors that come into view in this connexion.

(a) In the first place, the land into which Israel penetrated had belonged from times remote to another god who, in various forms, was worshipped at the different sanctuaries of the country, and whose rights as owner no one at first dreamt of contesting. To Israel, as to every other people of those days, it was self-evident that every nation and country had its own god. The latter may indeed be temporarily overcome by the more powerful god (or gods) of a foreign nation, but his existence is not therewith ended. The thought, however, of a defeat of Baal (or the baals) of Canaan could not take its rise among the Israelites so long as they were able only with difficulty (as is shown by Jg 1³ 18^{1ff.} etc.) to maintain their position in the land *side by side with* the Canaanites. In view of all this, it was *per se* self-evident that Baal, the god of the land, was to be regarded as the bestower of the fruits of the land, and was entitled to thanks accordingly.

(b) But, in the second place, according to the conceptions of antiquity, agriculture itself was viewed as a branch of the cult of the god of the land, or at least as part of the religious customs and usages which are traced back to him, and on that account are observed and handed down with superstitious care. This view finds an instructive exposition in Is 28^{23ff.}

When we take all the above considerations into account, the conclusion we inevitably draw is that it was almost impossible that Israel should escape being involved in the cult of Baal if it desired to maintain its existence on *his* soil, in the midst of *his* people, who were ill affected towards Israel. The only question is whether this way of looking at the matter was—at least for a length of time—shared by all classes of the people without exception, or whether, at least amongst the intellectual and religious leaders there were those who even then put forward in downright earnest the supreme plea of the Sinai religion: 'Jahweh—and Jahweh alone—is the God of Israel.' We may infer that there were, judging from the energy with which the struggle against Baal was afterwards undertaken, and which implies a continuous maintenance of exclusive Jahwism. There are, however, no *direct* testimonies to a struggle maintained at every period with the worship of Baal. It might perhaps be supposed that a distinction should be drawn between the Canaanite Baal, who was quite early superseded, and of whom there is no further trace even in the *ancient* records of the

opening monarchical period, and the Tyrian Baal imported by Jezebel and Athaliah, against whom a violent storm of opposition at once arose. But this would be to disregard a very trustworthy witness, whose testimony is to quite a different effect, namely Hos 27⁽⁹⁾ ¹¹. When the prophet here reproaches his countrymen with going after their lovers [the baals], who were supposed to have bestowed upon them bread and water, wool and flax, oil and 'drinks' (v. 14⁽¹²⁾ vines and fig-trees), he is thinking not of times long gone by, nor of the cult of the Tyrian Baal, but of an ineradicable delusion of the people which can be traced down to the time of Hosea—that is, till the closing days of the Northern kingdom: 'she knoweth not that it is I [Jahweh] who have bestowed upon her the corn and the must and the oil, and have given her silver and gold in abundance—upon Baal hath she expended it' (Hos 2⁽¹⁰⁾ ⁽⁸⁾). It may be that the complaint of Hosea applied in a much larger measure to the kingdom of Israel than to that of Judah. But, in any case, it furnishes a very notable testimony to the tenacity with which the belief in Baal as the god of the land and the dispenser of its fruits persisted amongst a portion of the people.*

2. From all the above considerations it follows that the picture which the Deuteronomic redactor of the Book of Judges (cf. esp. 2^{11ff.}) sketches of the religious conditions of the period of the Judges is not true to the historical reality. To him—from the standpoint of the 7th or 6th cent. B.C.—no other view is possible except that any inclination to the cult of other gods is at the same time complete apostasy from Jahweh, the God of the fathers (Jg 2¹¹). It is the anger of Jahweh, occasioned by their conduct, and the oppression at the hands of their foes to which He gives them over, that (according to this view) first bring Israel to reflexion and a return to Jahweh. But the truth is that in these early times men considered it quite an intelligible position that, on the one hand, they should hold fast to Jahweh in all matters affecting the people as a whole (so, for instance, especially in war; cf. above, p. 636²); while, on the other hand, they did not break with Baal, the god of the land and the bestower of fruits, but rendered to him the thanks and the offerings that were his due. Such conduct is not to be viewed as pure idolatry, and still less as polytheism; it is simply a species of syncretism which aims at satisfying, each in its own way, all the varieties of religious needs. In like manner, among the Arabs, long after the victory of Islam, the local cult of the pre-Islamic gods persisted, partly in the popular usages (forbidden by Islam), partly in some usages incorporated with Islam itself.

3. In the long run, however, this double cult of quite heterogeneous gods became impossible: one or other must yield. And, as a matter of fact, by aid of the ancient sources we can still trace pretty accurately the long process which led to the complete conquest and suppression of the

* Surviving traces of this notion are discovered by Schwally (*Semil. Kriegsaltertümer*, I. 81 ff.) in such legal prescriptions as that newly planted fruit trees were to be left untouched for three years, but in the fourth year their fruits were to be dedicated to Jahweh (Lv 19^{23ff.}; cf. Dt 20⁶, where a similar rule is supposed to hold of vineyards); that a field was not to be reaped to its very edges (Lv 19^{12ff.}); that a forgotten sheaf was not to be fetched from the field, and that in general all gleanings were to be dispensed with (Dt 24^{19ff.}). In all these usages it is supposed that there was an intention of propitiating the 'demons' and baals (cf. what was said above, p. 617^b f., about the sacrifices offered to the *se'irim*). But here again, as elsewhere, it is very questionable whether Deuteronomy (not to speak of Leviticus) has still any consciousness of this meaning of customs inherited from olden times; at all events, the ancient custom is now grounded *only* on considerations of humanity (the care of widows, orphans, and *gêrim*).

baals by Jahweh, at least so far as the better portion of the people were concerned.

(a) One of the most essential factors in achieving this result was unquestionably the *localizing of Jahweh in Canaan*, especially at certain primeval and much frequented sanctuaries. Such a localizing process was by no means a matter of course from the most ancient point of view. True, even from the earliest times we hear of appearances of Jahweh on Canaanite soil in the form of the *mal'akh Jahweh* (see above, p. 638 ff.). But the latter came and went without its being possible to speak of any fixed dwelling-place. The sacred Ark, again, guaranteed, nay represented (cf. above, p. 628 f., the presence of Jahweh. But the Ark was, above all, the shrine of *Jahweh Zēbā'ōth*, the war-God, who had nothing to do with the cultivating of the soil or the training of vines. The proper seat of Jahweh continued to be, as before, Sinai. It is from there that Jahweh comes to aid the tribes of Israel in their struggle with Sisera (Jg 5⁴). We may perhaps leave out of account Dt 33²⁴, Hab 3⁸, and Ps 68⁸ as merely poetical reminiscences of Jg 5⁴, while Dt 33¹⁶ ('the dweller in the bush') suffers from uncertainty of interpretation. But there is still left 1 K 19^{8a} as a positive proof that in the time of Elijah the seat of Jahweh was found at 'Horeb the mount of God.'

But it cannot be pronounced that the above was the only way of looking at the matter that prevailed in the time of the Judges, not to speak of the monarchical period. The gradual subjugation of the Canaanites, which was completed by the entire subjection of their surviving representatives by Solomon, and the signal proof of the might of Jahweh afforded by David's victories, naturally involved a lowering of the prestige of Baal more and more—nay, in many places its complete annihilation. To this was added the erecting of new sanctuaries, dedicated to Jahweh exclusively: like that of Gideon at Ophrah (Jg 6²⁴ 8²⁷), the temple for the sacred Ark at Shiloh, then the tent for it in the city of David, and, above all, the temple of Solomon, which no doubt surpassed in splendour and in art all the hitherto existing sanctuaries of Canaan (with the possible exception of the Phœnician ones). All these spots, where Jahweh alone was venerated, could not fail to familiarize men's minds with the notion of His personal dwelling in Canaan. And thus it was only the last step towards the complete localizing of Him there, when even the former Canaanite sacred places, which, as such, had long given an advantage to the Baal worship, were expressly brought into relation with Jahweh. Jahweh thus becomes simply identified with Baal, steps into possession of all the property and functions of the latter. This could be done all the more readily that Baal is not, like Jahweh, a real proper name, but an appellative='lord' or 'owner,' so that it could serve equally well as a designation of Jahweh.

The surest evidence that Jahweh thus took the place of Baal is to be found in the employment of *Baal* in the composition of Israelitish personal names (possibly also in a number of place-names [so certainly in 2 S 5²⁰]) as quite the equivalent in meaning of *Jahweh*.^{*} Thus we find *Jerubba'al*

(the real name of Gideon), *Eshba'al*, *Meriba'al* (descendants of Saul), *Be'eliada'* (one of David's sons); cf. also 1 Ch 12⁵ *Be'eliah*, 'Jah[weh] is Baal.'

With the transference of the cult of Jahweh to the spots where Baal worship had been practised is certainly connected a circumstance which by itself appears very strange to us, but which finds its analogies in all popular religions which have images of gods (or even of saints). The Canaanite Baal was originally *one* particular god; but, as his images became localized in different lands and sanctuaries, he was correspondingly broken up as it were into different deities. This is proved by the numerous discriminating appellations, where the name of a place is added to that of Baal (e.g. *Baal-Peor*, *Baal-Hermon*, etc.), or where we have some other distinguishing mark (e.g. *Baal-bērith*, 'Baal of the covenant'; *Baal-zēbub*, 'the fly-Baal,' etc.). So also Milcom the god of the Ammonites, Chemosh the god of the Moabites, and Melkart the city-god of Tyre, are manifestly examples of such localizing of the *one* Canaanite Baal. It is thus intelligible that in Jg 21¹¹ 3⁷ 10⁶ etc., and even in Hos 21⁵ 19 13¹⁷ 11², a worship of 'the baals' is spoken of. But the same differentiating process was applied also to Jahweh when He (or His images) stepped into the place of Baal, or had even new places of worship assigned to Him. The proof of this is supplied once more by the special names given to particular altars or places of worship of Jahweh; this special name serving to distinguish, as it were, the local God of *this* place from other local gods. The Jahweh who was worshipped at the sacred tamarisk of Beersheba (Gn 21³³) is called *Jahweh 'El 'ōlām* ('the God of primeval time' or 'the eternal God'?), He who appears to Jacob at Luz is called '*El Bēthēl*, 'the God of Bethel' (31¹³ 35⁷); the altar erected by Jacob at Shechem is called '*El 'Ēlōhē Israel*, 'El, God of Israel' (33²⁰); that which Jerubbaal built at Ophrah receives the name *Jahweh shālōm*, 'Jahweh is safety' (Jg 6²⁴). When, finally, Absalom declares (2 S 15^{7a}) that he must go to Hebron to discharge a vow to Jahweh, he evidently means to distinguish the Jahweh of Hebron from the Jahweh of Jerusalem. Presumably, a sacrifice offered at the far older place of worship at Hebron was believed to have greater efficacy than one presented at the more recent sanctuary at Jerusalem.

The whole process of localizing Jahweh in Canaan, and the consequent destruction of the syncretism between Jahweh and Baal, presents itself to us as already accomplished in the patriarchal narratives of Gn 12 ff. These have not a word to say about any places of worship of Baal in the land; *all* the future Israelitish sanctuaries are already consecrated by the patriarchs (for the most part in consequence of manifestations of Jahweh) by the building of altars (Gn 12⁷ 8 13¹⁸ 26²⁵ 33²⁰) or the planting of a sacred tree (21³³). In two instances (12⁵ 23^{17a}), indeed, there can still be clearly detected a recollection that the sacredness of these spots dates really from an earlier, Canaanite, period; but for Israel it dates from the occasion when Jahweh came upon the scene as the *numen loci*, and manifested Himself to Israel's ancestors.

(b) In all this we have not as yet mentioned one prime factor which explains very simply the permanent triumph of Jahweh over Baal in the

* Later generations were so unable to comprehend this that (probably with reference to Hos 21^{7a}) for *Baal* they substituted either *El*, 'God' (so in the family of David, 2 S 51⁶, 1 Ch 3⁸ *El'ada* for *Be'el'ada* of 1 Ch 14⁷), or *bōsheth*, 'shame.' So, in the family of Saul, *Eshba'al*, 'man of Baal' (so still in 1 Ch 8³³ 9³⁹), becomes *Ishbosheth* (2 S 2^{8a}); *Meriba'al*, 'man of Baal' (so still in 1 Ch 9⁴⁰, whereas in 1 Ch 8³⁴ the objection is removed by the form *Meribba'al*, 'opponent of Baal'), becomes *Mephibosheth*, (?) 'despiser of Baal' (2 S 4⁴ 9^{8a} 21⁸). On the other hand, *Jerubba'al* (prob. = 'he who contends for the lord' [i.e. Jahweh]) was retained unchanged, with the same signification as *Israel* (the very artificial interpretation in Jg 6^{25a} takes it as a surname afterwards given to Gideon, whereas the pro-

bability is rather that it is the latter name itself that should be regarded as a surname), Jg 71 82³ 35 91⁴; but cf. also 2 S 11²¹, where we have the form *Jerubbesheth* for Jerubbosheth. The LXX retains *Baal* in the text, but means this to be read *αἰσχρὴν* (= *bōsheth*, 'shame'). In no other way can we explain the presence of the feminine article in τῇ Βαάλ of Ro 11⁴ (= 1 K 19¹⁸).

capacity of the latter as god of the land—namely, the introduction of the conception of Jahweh as a God enthroned *in heaven*. This implies of itself the idea of His supramundane elevation, not only above all earthly powers, but above all local divinities. From heaven Jahweh looks down and directs the actions and fortunes of men, or at least, in the first instance, of His people; from heaven He sends or withholds rain and dew and all the associated blessings of the soil; but from heaven also He rains down fire and brimstone upon Sodom and Gomorrah (Gn 19²⁴), and thus shows Himself to be the almighty supramundane Lord over all the elements.

According to the view just presented, this conception of Jahweh did not make its way all at once, and still less did it penetrate the *whole body* of the people; side by side with it there continued to prevail for long an ill-defined mingling of the notions which localized Jahweh at Sinai (see above, p. 626⁹) or at Canaanite places of worship. But, on the other hand, traces of the conception of Jahweh as a God of heaven can be discovered comparatively early. We must not allow ourselves to be misled by passages where a different view appears to be presented, simply because the narrative form of the myth is adopted. In Gn 3⁸, for instance, the Garden of Eden is still God's dwelling-place, but, according to the same source (J), Jahweh comes down from heaven [the context permits of no other meaning] to see the Tower of Babel (11⁵⁻⁷). He sends down destruction from heaven from Jahweh (19²⁴, see above); He is called 'the God of heaven' (24⁷, v.³ 'the God of heaven and earth'). In the E source the idea of Jahweh as the God of heaven has so completely gained the ascendancy that even the *mal'ach 'Elohim* (cf. above, p. 638 ff.) calls from heaven (21¹⁷ 22¹¹, where 'Jahweh' instead of 'Elohim' is due to the redactor who inserted vv. 15-18). In 28¹² (E) the ladder upon which the angels ascend and descend establishes the connexion between earth and heaven, the dwelling-place of God. Hence Jacob (v. 17) calls the place at once the house of God (corresponding to the earlier conception) and the gate of heaven.

4. The above assertion, that the cult of Baal was gradually superseded through the localizing of Jahweh at the Canaanite sanctuaries and the growing conception of Him as the God of heaven, appears at first to be violently contradicted by the circumstance that even in the reign of Ahab of Israel (*i.e.* in the first half of the 9th cent. B.C.) the worship of Baal comes upon the scene once more, and in such force that we almost receive the impression that Jahwism had then to engage in a life-and-death struggle, and was brought to the verge of extinction. Elijah complains (1 K 19¹⁴) that the altars of Jahweh had been thrown down and His prophets put to death, that he himself alone was left, and that they sought his life to destroy it. But apart from the answer of God (v. 18), that the number of those who had remained loyal to Jahweh amounted to 7000, there are other points on which our judgment must be considerably modified with respect to the degree and the universality of the apostasy from Jahweh, particularly so far as Ahab is concerned (1 K 16^{30ff.}). The names of Ahab's children (Ahaziah, Joram, Athaliah) are one and all compounds with the name of Jahweh. The fact that he built for his Tyrian consort Jezebel a Baal temple and altar at Samaria may be explained in the same way as Solomon's building of a Chemosh sanctuary upon the Mount of Olives (see above, p. 635). The bloody persecution of the prophets of Jahweh is expressly (1 K 18¹ 19²) laid to the charge of Jezebel alone; it is at *her* table that the 450 prophets of

Baal * eat (18¹⁹). Ahab chides Elijah as the author of a famine, but he does not seek his life. On the contrary, he did sincere penance (21^{27ff.}) when Jahweh's decree of rejection on account of the judicial murder of Naboth had been announced to him by Elijah. From 1 K 22^{20ff.} (the closing period of Ahab's reign) it is evident that a very large number of Jahweh's prophets as well as Micaiah ben-Imlah had been left unmolested. Noteworthy, further, is the judgment of Ahab put in the mouth of Jehu in 2 K 10¹⁸. All this, indeed, does not imply that Ahab was not seriously blameworthy in conniving too much at the conduct of his unscrupulous wife, but the principal guilt plainly lies at the door of Jezebel.

All the more on that account we must ask what was the real aim of Jezebel's conduct. In view of the complaint of Elijah (19¹⁴) about the throwing down of Jahweh's altars, it looks as if she sought to destroy the cult of Jahweh root and branch and to put that of Baal in its place—in short, to introduce a change of religion. But this appears impossible in face of the attitude of Ahab to Elijah (see above), and especially in view of 2 K 10²³. In the latter passage (in the last days of Jezebel) the presence of a very large number of Jahweh worshippers is assumed alongside of the worshippers of Baal, otherwise Jehu would have had to extirpate not only the dynasty but almost the whole nation. According to v. 21, however, the worshippers of Baal throughout the whole land were not more than could be assembled by Jehu in the temple of Baal at Samaria. Hence the bloody persecution of the prophets of Jahweh is doubtless to be explained on the ground that they, with Elijah at their head, offered the most violent opposition not only to the according to Baal of equal rights with Jahweh, but even to the introduction and spread of his cult at all. Their acting in this way is an evidence that, at least on the part of thinking representatives of Jahwism, the syncretism that formerly prevailed had been completely overcome, and that their conscience had been sufficiently quickened to apprehend the full meaning of the principle, 'Jahweh alone is the God of Israel.' And they rightly recognized, in *that* form in which syncretism was sought to be revived by Jezebel, a doubly serious danger. Now it was no longer a question of long-established local divinities, in whose place Jahweh could be put without difficulty, but of a foreign god—the same god who had made Tyre the proud mistress of the seas, and the possessor of dazzling wealth. The danger that thus threatened was not simply that Jahweh would be held in less esteem, but that He would be absolutely rejected as weak in comparison with *this* Baal. Jezebel herself doubtless wished devoutly for this consummation, and many a one, to gain her favour, or in dread of her wrath, may have displayed such an excess of zeal for Baal as to have gone the length of tearing down altars of Jahweh (1 K 18³⁹ 19¹⁴). We shall have to show presently that Jehu's destruction of the work of Jezebel was actuated, if not exclusively, yet mainly by religious motives.

If Jezebel's zeal for the Tyrian Baal occasioned a serious danger and led to a bitter conflict in the Northern kingdom, the cult of Baal is only a quickly passing episode in the kingdom of Judah. From 2 K 11 we do not at all derive the impression that Athaliah, the daughter of Ahab and Jezebel, after her attempt to extirpate the Davidic dynasty, took any measures to prevent the continuance of the worship of Jahweh in Solomon's

* The 400 prophets of the *'āshērāh* named along with them are a later (perhaps in allusion to the Deuteronom. note in 16²⁰) addition to the text, as is plain from v. 30, where they could not possibly have failed to be mentioned.

temple. On the contrary, the high priest Joiada is so notable a personage that he has no difficulty in enlisting the royal bodyguard in a conspiracy against 'Athaliah. It is only at the close of the narrative (v.¹⁸) that we first learn that there was then, even in Jerusalem, a temple of Baal under the charge of a priest named Mattan. The zeal with which 'all the people of the land' tear down this temple, destroy Baal's altars and images, and slay the priest, proves how hateful to the Judahites was the cult imported by 'Athaliah.

iv. *THE ORGANS OF GENUINE JAHWISM: PRIESTS, PROPHETS, NAZIRITES AND RECHABITES, 'JUDGES' AND KINGS.*—In the foregoing section the conflict between Jahweh and Baal is described as primarily one of different religious ideas and needs. As a matter of fact, the latter may gather such strength that they lay hold of wide circles of people and make them their half-unconscious instruments. But this excludes the existence neither of regular, official representatives of particular religious interests, nor the appointment of extraordinary instruments called and equipped by God. Examples of both these are found in considerable numbers in Israel in the period prior to the rise of written prophecy. The official character belongs to priests and kings; the extraordinary mission is represented by the various species of prophets, in which category may be included also the Nazirites and Rechabites, and in a certain sense even the so-called 'judges.'

1. *Priests.*—1. We have already (p. 633*) pointed out how few and uncertain are the traditions of the Mosaic period regarding the founding of the Jahweh priesthood.* Even in the period with which we are now dealing, the stream of tradition is a tiny one. This is simply explained on the ground that priests were not required for the most important transaction of the cultus, namely sacrifice, but only for bearing the sacred Ark (so, according to J and E, Jos 3^{3ff.} 4^{9ff.} 6^{5ff.}),† for taking charge of a 'God's house,' i.e. the container of an image of Jahweh, and for consulting the sacred lot, which was connected in some way with this image. In the whole Book of Judges there is no mention of priests except in the first appendix (chs. 17 and 18); but that narrative, when rightly interpreted, is extremely instructive in regard to the conditions prevailing under the Judges. The Ephraimite Micah constructs a 'God's house' containing a Divine image [on the plurality of images, which owe their origin to the welding together of two parallel accounts and to a process of glossing, see above, p. 641^b], and appoints one of his sons to be priest. But when a young Levite, i.e. a member of the tribe of Levi, who has hitherto sojourned in Bethlehem-judah as a *gēr*, passes by, he engages him, for a yearly salary of ten shekels of silver and the cost of food and clothing, to serve as 'father' and priest; and he now feels sure that Jahweh will bless him because he has a Levite for priest. The very designation of a young man as 'father' (17¹⁰ 18¹⁵) shows that this honorific title (used especially, no doubt, as a mode of address) was regularly given to priests as it was, according to 2 K 2¹² 6²¹ 13¹⁴, to prophets.

* Cf. Baudissin's art. *PRIESTS AND LEVITES* in vol. iv. p. 67 ff., and the same author's *Geschichte des alttest. Priesterthums*, Leipzig, 1889. Unfortunately, this exhaustive monograph is not unimpaired by the author's untenable hypothesis that the source P originated as early as the 7th cent. B.C., much about the same time as Deuteronomy.

† Everywhere in these passages only 'the priests' are spoken of except on the first mention of them in 3³, where, in harmony with the usage of Deuteronomy, we have the addition 'the Levites,' the two designations combined being 'the Levitical priests.' The glossator meant to leave no possibility of doubt that even then the only priests that could be held legitimate were those sprung from Levi.

A counterpart to this is found in Jg 5⁷, where Deborah is called a 'mother in Israel.'

We see from the above, that, even for attending to a 'God's house' and an oracle-image, a Levite was not indispensable, but that particular value was attached to him when his services could be obtained. For, as a descendant of the tribe of Moses, he was supposed, on the ground of the family tradition, to have the best acquaintance with ritual affairs, and, above all, with the method of obtaining oracles. And Micah had all the more ground for this assumption, seeing that his Levite, as we first learn from 18³⁰, was a son of Gershom and a grandson of Moses,* named Jonathan. Thus there was a priesthood known then, which traced its origin direct to Moses, and there is no reason to doubt the historicity of the statement (18³⁰) that in particular the priests of the oracle-image at Dan, which evidently stood in high repute down to B.C. 734, sprang from the family of the above-named Jonathan, and thus of Moses. The circumstance that the image, along with the priest, was originally stolen by the Danites (18^{14ff.}), would certainly not damage its character in the least, from the naïve point of view of these early times.

2. It is not till the end of the period of the Judges that we encounter once more a priesthood in Israel, in the person of Eli, with his sons Hophni and Phinehas, in attendance on the sacred Ark at Shiloh (1 S 1³ 9^{ff.} 21^{1ff.} 4^{1ff.}). According to the Deuteronomistic addition, 22^{27ff.}, Eli and his sons are the descendants of a priestly family to whom, in Egypt, Jahweh had already entrusted all fire-offerings of the Israelites. By this is meant, of course, the priestly tribe of Levi, the 'chosen of all the tribes' (v.²⁸). The earlier accounts of Eli and his family say nothing of their having belonged to Levi, and the indifference of the ancient sources to any such connexion is shown by the frank statement about the priestly functions discharged by the young Samuel, who was of the tribe of Ephraim (1 S 2¹⁸ 3^{1ff.}), according to which he slept beside the Ark). The Deuteronom. prediction put in the mouth of an unnamed man of God (22^{27ff.}) contains what might be called a programme of the subsequent history of the priesthood, the meaning of which is perfectly transparent to us. The destruction of the house of Eli with the sword (v.³³) refers to Saul's massacre of the priests of Nob (22^{18ff.}).† The transference of the sanctuary to Nob (without the Ark, which had been carried off by the Philistines, and was ultimately stationed at Kiriath-jearim, 4¹¹ 5¹⁻⁷) was, without doubt, due to the destruction of the Shiloh temple by the Philistines (cf. Jer 7^{12ff.}), Ahimelech the son of Ahitub, who, in Saul's time, officiated there as priest (1 S 21^{2ff.}).

* The subsequent correction of *Moses* to *Manasseh* by a super-linear *n* was due simply to a desire to save Moses the shame of having a descendant who held an illegitimate (because not derived from Aaron) priesthood, and, in addition, practised the worship of images. In the estimation of the original narrator, both these things were quite justifiable and praiseworthy.

† If 85 men 'who wore the linen ephod' (i.e. officiating priests) were slain by Doeg, this is a surprisingly large number. At Shiloh only three priests are mentioned; at Jerusalem under David, only two (apart from David's sons, 2 S 8¹⁸, and 'Ira the Jairite, 20²⁶), as was the case also under Solomon, according to the original text of 1 K 4²⁵ (Azariah the son of Zadok, and Zabud the son of Nathan). It is true that *hak-kōhēn* denotes 'the priest' *ḥw* *ḥōyāh*, in old times the chief priest (as is still the case in 2 K 11^{1ff.}, 1 S 8², and 2 K 22^{4ff.} where Hilkiah first becomes 'high priest,' thanks to a later redactor), so that the existence of other priests along with the above named is by no means excluded (cf. e.g. 2 K 12^{1ff.}). But, while a considerable number is supposable in the case of the splendid temple of Solomon, it is not so with the more modest sanctuaries of the early monarchical period. Now, it is a possibility that in 1 S 21¹⁸ the number 85 may originally have stood for the whole of Ahimelech's descendants and relations (cf. v.¹⁹). But, seeing that the LXX gives 305 (Luc. 350) in place of 85, it is evident that the number was a later insertion, based upon diverse guesses. Is it accident that 85 is the numerical value of the consonants of 'kōhānē [Jahweh]' in v. 17?

etc.), was, according to 1 S 14³, a grandson of Eli. The sole survivor of the massacre at Nob was Abiathar the son of Ahimelech (1 S 23^{22,29}), who fled with the 'ephōd' (see above) to David. The 'trustworthy priest,' however, for whom Jahweh, according to 23²⁵, is to build an enduring house, i.e. to whom He is to give an unbroken line of successors who shall go out and in continually before the anointed of Jahweh—the king—is Zadok, who already, in the time of David, had been priest along with Abiathar (2 S 15^{24, 29} etc.). Under Solomon he continued alone in office when the curse on the house of Eli was fulfilled in the deposition of Abiathar (1 K 2²⁷). It is not stated that Zadok was of Levitical descent; even the name of his father is not given.* Nevertheless, the prediction of the 'enduring house' was fulfilled. Towards the end of the pre-exilic period all priests at Jerusalem passed for 'sons of Zadok,' and in the programme for the future sketched by Ezekiel (44^{15ff.}) it is to them alone out of all the existing 'priests of Levi' that the priestly prerogatives are accorded. Deuteronomy had at least left open the possibility that the priests of the high places might discharge priestly functions at Jerusalem after the concentration of the cultus in the temple there. We see, however, from 1 S 23²⁶ that it was difficult for them to obtain this privilege. The man of God there predicts to Eli that his descendants (i.e. the priests of the high places in the time of Josiah and down to B.C. 586) would have to humble themselves very low before Zadok (i.e. the legitimate priestly family at Jerusalem) and to beg from them the necessary maintenance.

3. Let us now ask,—and this is the main question,—What was the spiritual and religious significance of the priesthood during the whole period prior to the advent of written prophecy? Unfortunately, here again we have to rest content with very meagre sources of information. Essentially, all that we learn is that the priests guarded the Ark, and, if necessary, carried it. Moreover, it is no inferior priests or *Levites*† in the sense of P that carry it, but the priests proper, as is plain from 2 S 15^{24, 29} (and even from 1 S 4³). But there is specially frequent mention of a function of the priests which consisted in guarding or carrying and consulting the 'ephōd' (see above): 1 S 14³ 21¹⁰ (9) 22¹⁵ [according to the LXX, also v. 18] 23⁹ [where David asks Abiathar to produce the 'ephōd' which he (v. 9) had brought with him from Nob] 30⁷ [where, however, it is David himself that consults Jahweh]. Further, in 1 S 14¹⁸, we are to read, with the LXX, 'the 'ephōd' instead of 'the ark,' and then 'for he bore then the 'ephōd,' etc.‡ There is no mention of any participation of the priests in the offering of sacrifice. Even at the head sanctuary at Shiloh all that is presupposed in 1 S 21^{1ff.} is at most an ordinance hallowed by custom in connexion with the handing over of the sacrificial dues to the priests; the heinous sin of the sons of Eli consisted, not in their transgressing the requirements of a written law (such as that of P), but in treating with contempt the ancient hallowed sacrificial customs, and demanding their portion before the fat had been burned to Jahweh (v. 16). But it is not clear whether the presenting of the

fat was an act that could be performed by priests alone. And even if statements like those of 1 S 13^{9f.}, 2 S 6^{13, 17f.}, 1 K 3⁴ etc., might readily be interpreted as meaning that the kings offered sacrifice through the medium of the priests, on the other hand there are passages, such as 2 S 6¹⁸ and 1 K 8¹⁴, which show that in ancient times even a ritual act like blessing (which in Dt 10⁸ [probably from P] is reserved for the priests) could be performed without offence by the kings.

Of what, according to the statements of the prophets, was the most important official duty of the priests, namely, the giving of *tōrah* or 'direction' in ritual and legal questions (even without the employment of the sacred lot), we do not hear till towards the close of our period, in the so-called Blessing of Moses (see below, p. 650^a). For the earlier period it is significant that in the whole of the so-called Book of the Covenant, although it deals for the most part with questions of law, priests are not mentioned at all. This does not, indeed, prove that the above function was wholly wanting to them. When a fitting occasion arose, in the case of Eli we find indeed a kind of pastoral office discharged: 1 S 19^{18, 26ff.} 22⁹ (towards Hannah and Elkana) 22^{2ff.} (towards his own sons); but even this bears no specifically priestly character.

As to other, especially political, influence exercised by the priests, it was to all appearance small throughout this whole period. This admits of a simple explanation on the ground that there were as yet no priestly *guilds* to give support to the individual. As we saw above, connexion with the tribe of Levi was not as yet a condition of attaining the dignity of priest. The Deuteronomie redactor of the Books of Kings is the first to reckon it a sin on the part of Jeroboam that he appointed all and sundry, who were not descended from the tribe of Levi, to be priests of the high places (1 K 12³¹ 13^{33b}). How little advantage, however, even the Levitical priests had over the others, is sufficiently plain from the story of the wayfaring Levite, Jonathan (Jg 17^{7ff.}), and in quite a special way from Gn 49⁷. Here (probably as late as the time of David) a curse is pronounced on the *tribe* of Levi, without any allusion to the prerogatives attributed and actually continued to that tribe owing to its connexion with Moses (cf. above, p. 648^b). This shows clearly that these very prerogatives were, at least in the time of the poetical author of Gn 49⁷, very lightly esteemed. The tribe of Levi was accounted accursed; only a portion of its members, who had had the good fortune (Jg 17⁸), discharged priestly functions. But even in this instance the Levite with his family occupied an isolated position at some sanctuary, and enjoyed no special consideration there. But the same was the case also with the priests who were not of Levitical descent. It is true that as early as the end of the period of the Judges and the opening of the monarchical period we meet with a tendency towards a hereditary, settled, and therefore more respected, priesthood, in the family of Eli. The prestige he enjoyed is explicable, above all, from the circumstance that he attended to the sacred Ark in the temple at Shiloh, the sanctuary most highly esteemed by the people. His descendants continued to live upon this reputation, as we find them doing under Saul at Nob, evidently the principal sanctuary after the destruction of Shiloh (1 S 22¹⁹ 'the city of the priests'), and as Abiathar did at the court of David.

With all this, however, there is no word of any sovereignty exercised by the priests alongside that of the king. Ahimelech assumes the attitude of an inferior towards even the subject of Saul (1 S 21²), and most unreservedly towards Saul

* It is true that in 2 S 8¹⁷ (1 Ch 18¹⁶ 216. 21) Zadok is called 'the son of Ahitub.' But the MT here has certainly been corrected in dogmatic interests, with the object of inserting Zadok in a genealogy and, at the same time, of setting aside Abiathar (in contradiction to 2 S 15²⁴ etc.) in advance. With Wellhausen and others we should read 'Zadok and Abiathar, the son of Ahimelech, the son of Ahitub.'

† The mention of these in 1 S 6¹⁵, 2 S 15²⁴ (but not v. 29), and 1 K 8⁴ (contradicting v. 3), is due to a late interpolation.

‡ It is doubtful, on the other hand, whether, with Thenius and others, we should substitute 'the 'ephōd' for 'the ark' also in 1 K 2²⁶.

himself (22^{12a}). The bodyguard of Saul hesitate, it is true, to slaughter the priests of Jahweh (v.¹⁷), plainly because the bloody command of the king appeared to them so unjust and monstrous; but no one interposed in defence of the priests when they and their families fell victims to the blind fury of the king, using as its instrument Doeg the Edomite. The sole survivor, Abiathar, was indeed taken by David under his protection (v.²³), but only as a servant whom he could order about as he pleased; and the same position was held by Abiathar under David when the latter became king. In 2 S 8¹⁷ 20^{25a}, 1 K 4¹⁻⁵, the priests are named amongst the principal officials in Judah, mostly, however, *after* these, or at least after a portion of them. The circumstance that the punishment inflicted by Solomon upon Abiathar for his participation in Adonijah's attempt was only banishment, was due not to his peculiar standing, but simply to the services he had personally rendered to David. It is quite intelligible that the settled priesthood at so splendid a sanctuary as Solomon's temple should have been the first to attain to wealth and higher culture, and on that account to great consideration, that at an early period these priests came even to form a species of temple aristocracy, united in a close society, and allied themselves in marriage with the most powerful families, even up to the royal house.* All the same, the chief priests are nothing but officials of the king, and the circumstances are quite exceptional that determine Joiada the priest (2 K 11^{4a}) to play a great political part in the conspiracy against Athaliah. Moreover, his action was in favour of the only legitimate heir of the Davidic dynasty, and thus in the service of the same. But the regard which king Jehoash owed him in return did not prevent that monarch from showing towards him and the priests (12^{7a}) not merely annoyance but distrust, when he deprived them of the free control of the temple dues and handed this over to the Secretary of State.

We cannot wonder that in the Northern kingdom, where a central sanctuary was wanting, it took far longer than in Judah to form reputable and, in a certain measure, politically powerful priestly societies. But that this point was reached is testified to us by the saying regarding Levi in the (Ephraimite) Blessing of Moses, Dt 33^{9a}, (probably dating from the time of Jeroboam II. or not much earlier). The interpretation of some expressions is not, indeed, without difficulty. According to Wellhausen and others, v.⁹ alludes to those who, renouncing their tribe and their family, have attached themselves to a guild of Levites. But probably we should rather find an allusion to the narrative of Ex 32²⁹ (cf. above, p. 633^a), where the priesthood is assigned to the tribe of Levi as a recompense for the courageous way in which it stood up for Jahweh. With this accords the circumstance that the whole saying is spoken of Levi as of a *tribe* standing on the same footing as Benjamin, Joseph, etc. Here, then, the belonging to Levi is already a condition of priesthood, although this, of course, does not exclude isolated instances of members of other tribes (particularly, it may be presumed, those who had married the daughters of priests) obtaining the office. The whole saying betrays in lofty language a legitimate pride in the importance and the power of the priesthood, and an assured confidence (v.^{11b}) that Jahweh will annihilate its foes, of whom there is no lack. Amongst its official functions the first place is still held by the manipulating of the sacred lot (Urim and Thummim), but in addition

to this (v.¹⁰) the priests teach the people the statutes and the *tôrâh* of Jahweh and attend to the sacrificial service.

Just as in the above passage the priests sprung from Levi appear as zealous upholders of the service of Jahweh, so it may have been true of the Jahweh priesthood in general in the Northern kingdom that its members were entitled to be counted among the organs of genuine Jahwism. It is surprising, indeed, that in the struggle against the Tyrian Baal we never hear of the priests, but only of the prophets, being persecuted for their fidelity to Jahweh. But, on the other hand, nowhere during this period are the priests reproached as favouring the service of Baal. An express reference, however, to priestly zeal for Jahweh is found nowhere but in the case of Eli. The latter feels it a grievous scandal that his sons give occasion to evil reports among 'the people of Jahweh'; he dreads the heavy judgment of Jahweh which tolerates no opposition; he submits most humbly to the sentence of rejection (1 S 3¹³ 'it is Jahweh, let him do what seemeth good to him'). And during the battle with the Philistines he trembles, above all, for the Ark of Jahweh (4¹³); and it is when he hears that *it* is taken that he sinks down and dies (v.¹⁸). In like manner, the last thought of the dying wife of Phinehas is grief at the carrying away of the Ark, for 'the glory is departed from Israel' (v.²¹). All these are features which may lay claim to being historical. They prove that Jahwism, amidst all amalgamation with relics of ancient Semitic nature religions, was even then a power which struck deep into the life and thought of its adherents, and was capable of awakening in them genuine piety.

2. Prophets.—1. By far the most prominent place among the organs of genuine Jahwism is occupied by the prophets.* It is usual in this connexion, to bring together quite heterogeneous phenomena, and to couple the representatives of heathen Semitic mantic and sorcery with the genuine Hebrew prophetism which stood in the service of Jahwism. It cannot be denied that in the traditions of ancient Israel traces even of the former category are to be found, and such as plainly appear not to be inconsistent, in the mind of the narrators, with genuine Jahwism. This was rendered possible when the moving force was no longer found in demonic powers, but in Jahweh Himself. Thanks to the gifts with which Jahweh endows him, Moses surpasses the achievements of the Egyptian magicians (Ex 4^{2a} 7^{8a}), making at the same time frequent use of his staff as of a magician's wand (Ex 7²⁰ 9²³ 17⁵ 8^a, Nu 20^{7a}). The same efficacy that is attributed to the stretching forth of Moses' staff is produced by the spear stretched forth by Joshua (Jos 8¹⁸ 26); it procures victory for Israel and the complete destruction of the inhabitants of Ai. Even in 2 K 13^{15a}, a relic has been rightly discovered of the belief in divining by arrows.† It is not merely a symbolical action when king Joash, with his hands covered by the hands of Elisha, shoots an arrow in the direction of the Syrians, and then, at the prophet's command, smites with the arrows upon the ground. These actions are rather a curse, ex-

* Of monographs on Israelitish prophetism in general [see § IV. for the literature on the writing prophets] we would note specially: A. Knobel, *Der Prophetismus der Hebräer*, 2 Theile, Breslau, 1837 [antiquated in many respects, but a thorough-going work, and one that is still useful]; A. Kuenen, *De profeten en de profetie onder Israel*, 2 vols., Leiden, 1875 (Eng. tr., London, 1877); C. H. Cornill, *Der Israelitische Prophetismus: in 6 Vorträgen für gebildete Laien geschildert*, Strassburg, 1894 u. ö.; R. Kraetzschmar, *Prophet und Seher im alten Israel*, Tübingen, 1901; cf. also A. E. Davidson's article PROPHET and PROPHETS in vol. iv., and his posthumous work, *Old Testament Prophecy*, Edinburgh, 1903.

† So Schwally, *Semit. Kriegsaltertümer*, i. 22.

* Thus, according to the certainly historical note in 2 Ch 22¹¹, Jehosheba, a sister of king Ahaziah, was wife of the chief priest Joiada. Except for this, even 2 K 11² would be unintelligible.

pressed by deeds, which cannot fail to accomplish its purpose on the Syrians. Balaam, to whom (Nu 22^b) the magical power of effectually blessing or cursing an entire nation is attributed, appears, nevertheless, in the whole passage (Nu 22-24) as a genuine prophet of Jahweh. All these are instances of the survival of a primitive system of magic, which, however, it was found possible to reconcile with Jahwism. So, according to Gn 44^{5, 15}, Joseph practised the so-called *hydromancy*, a method of divining by means of a liquid in a bowl; and in Nu 17^{16 (1) ff.} we have simply a peculiar form of *rhabdomancy*, or divining by means of a number of rods. Other forms of magic, such as *necromancy*, the art of the *mē'ōnēnīm*,* etc., were at all times regarded by the representatives of genuine Jahwism as illegitimate.† But all the zeal of the prophets did not avail to prevent sorcery and divining from continuing in vogue down to the Exile and even beyond it, as outgrowths of superstition for which the Jahweh religion can no more be held responsible than can Christianity for the countless forms of superstition which continue to hold sway within its pale down to the present day.

The prophetism which is called up to us by names like Amos, Hosea, Isaiah, etc., has its roots in two altogether different phenomena, which finally became one, and consequently both received the same designation. On the one hand, there are the 'seers' of ancient times, on the other the ecstatic figures of the *nēbī'im*. The latter name became in the 8th cent. the collective title for the proper prophets of Jahweh; hence it is usual—although less appropriate—to render the word *nēbī'im*, when it occurs in the time of Samuel and Saul, by 'prophets.'

2. The 'seer' (סֹרֵךְ *sōrēk*, or סֹרֵךְ *sōrēk*) derives his name, not from *foreseeing* the future, although this is not, upon occasion, outside his rôle, but because, with spiritual eye opened for him by his God, he sees what is hidden, and is able to announce it. A condition of ecstasy is not necessary for this,—we never hear of such, for instance, in the case of Samuel,—but it may be connected with the act of vision. Thus Balaam, who is nowhere, indeed, called 'seer' or 'prophet,' but who belongs all the same to this category, speaks of himself as a man 'whose [outward] eye is closed,‡ who heareth the words of God, who seeth visions of the Almighty, sunk down and with unveiled eye' (Nu 24^{34, 15a}). In the case of all in this period who are entitled to be regarded as 'seers' there is an unmistakable connexion with mantic and sorcery, and that in the belief not only of the people but of the ancient narrator. We have spoken of Moses as an expert in magic. True, he is never called 'seer,' while the name 'prophet' (in its later sense) is first given to him in Deuteronomy (18¹⁵ 34¹⁰). The earlier view (Nu 12^a [prob. E]) distinguishes him, as one with whom God speaks face to face, from prophets elsewhere, to whom God reveals Himself by visions and dreams. The people of Israel must, however, in all ages have seen in Moses not only the 'man of God,' the powerful instrument of Jahweh in the establishing of the covenant at Sinai, the leader filled with the spirit of Jahweh (Nu 11^{17, 25}), but also the 'seer' ac-

quainted with the future. This is plain from the circumstance that two notable predictions of the future are put in his mouth: the Blessing of Moses, Dt 33 (see above, p. 650^a), although in v.⁴ it speaks of him in the third person; and the much later Song, Dt 32, although in v.⁷ it looks back to the time of Moses as the days of old, and in v.^{13a} describes the experiences of Israel in Palestine as historical facts that belong to a far distant past.

In the case of Balaam a mantic element emerges in so far as, while he repeatedly insists that he can speak only what Jahweh gives him to say (Nu 22^{8, 18a, 35, 38}), he yet has recourse to external measures (23^{1a}), and actually goes out for a vision, i.e. a revelation of Jahweh by outward signs (23^{3a} [where in v.⁴ after the word 'Balaam' a more precise statement about the kind of revelation has in all probability dropped out] 13^{a, 27a}), until, finally, (24^{1a}) he abandons the rôle of soothsayer, and utters his oracles simply at the impulse of the Divine spirit.

In the time of the Judges we should doubtless assign Deborah to the same category. She is called in Jg 4^a 'a prophetess,' i.e., in this instance, a woman capable of magical possession by the spirit of Jahweh, and able when in this condition to pronounce judicial decisions (v.⁵). The really original account of her may, however, be expected to have survived in the Song of Deborah, although the attributing of this song to herself (in spite of her being addressed in v.¹²) may be based on an erroneous interpretation of v.⁷ (where we ought to render 'till thou didst arise,' etc.). She is called in v.⁷ 'a mother in Israel.' This implies the possession of the dignity of a highly esteemed priestess (cf. above on Jg 17¹⁰ 18¹⁹), who watches over the welfare of the people, and can in times of oppression indicate beforehand the way of escape and the successful issue (46^a). But, above all, it is true of her that (like the God-inspired battle maidens of Germanic antiquity) she can bewitch the people by her song, and inflame their courage to the highest degree. That the whole activity of Deborah is only in the spirit and service of Jahweh, is manifestly presupposed throughout its description. She rouses the wretchedly broken-up tribes to the consciousness that they form one body as the people of Jahweh, and inspires them with courage to fight, and confidence in the war-God who hastens from Sinai to their help.

Still more, however, does this rôle of an organ of Jahweh—nay, of a deliverer of the people from sore straits—belong to the man who for the first time expressly receives the honourable name of 'seer' (1 S 9^{11, 18, 19}). In 9^a a prefatory gloss explains that in ancient times those who are now called 'prophets' (*nēbī'im*) were called 'seers.' According to the narrative of 1 S 11^{a, 27a, 28a, 31a} (which is somewhat later than 1 S 9-10¹⁶), Samuel was even before his birth dedicated to Jahweh; at a tender age he was brought to Shiloh to enter upon Jahweh's service, and there also he was honoured with a nocturnal revelation from Jahweh. We thus meet here with the same combination of the functions of priest (cf. also 9¹³) and seer (or prophet in the later sense of the term) as in the case of Moses. It may be noted, however, that the different sources present quite different pictures of Samuel. According to the later ones (1 S 7. 8. 10^{17a, 12, 13a, 15}) he is the last 'judge,' which means here not only temporary leader in a struggle, as in the 'hero-stories' of the Book of Judges, but simply 'ruler,' one who wants only the title in order to be king. He recalls the people from idolatry (7^{3a}), and procures for them, by prayer and sacrifice (v.^{8a}), lasting victory over the Philistines. In his old age he appoints his sons to be judges, lays before Jahweh the people's demand

* That is, either 'cloud-gazers' (weather makers?) or those who deliver their oracles in a nasal or murmuring tone. In general, necromancers and other sorcerers have attributed to them a *whispering, chirping, sighing, or murmuring*.

† The locus classicus for the various forms of sorcery is Dt 18^{10a}, which is admirably expounded by W. Robertson Smith in his art. 'On the Forms of Divination and Magic enumerated in Deut. xviii. 10f.' in *Journal of Philol.* xiii. 273 ff., xiv. 113 ff. Cf. also T. Winton Davies, *Magic, Divination, and Demonology among the Hebrews and their Neighbours*, London, 1893.

‡ This meaning of the word is, indeed, uncertain; others prefer to interpret 'whose [spiritual] eye is opened.'

for a king (8^{1st}), calls together an assembly of the people at Mizpah, where Saul is chosen by lot out of all the tribes of Israel as king. This does not, however, prevent Samuel from continuing to act as before as the real ruler. He dismisses the people (10²⁵); on the occasion of another popular assembly, at the urgent request of the people he promises his powerful intercession, and that he will instruct them in the good and right way (12¹⁹, 23^{ff.}). But, above all, in the rejection of Saul (13^{3ff.}; far milder is his conduct in 15^{10ff.}, a passage of a highly prophetic strain) he appears to display a caprice and a lust for rule which have long caused this passage to be regarded as containing the original type of hierarchical demands in opposition to the secular power.

A very different picture of Samuel is sketched for us in the far older source, 1 S 9-10¹⁶. As he searches for the lost asses of his father, Saul with his servant passes by the house of Samuel. The servant draws Saul's attention to the presence of the 'man of God' in this city, 9⁶ 'The man is famous; all that he says comes to pass. Perhaps he may tell us the way by which we have come' [not 'the way we should go.' The servant means first to test Samuel's knowledge of their previous journey, and, if that proves correct, his further counsel may be trusted]. Their only difficulty is about the customary present to the man of God, for their bread is exhausted. Luckily, however, the servant has a quarter shekel, and this they propose to give him. Samuel brilliantly justifies their confidence in him. He knows that the asses are already found (v. 20). But he knows also something quite different regarding the high destiny of Saul, secretly anoints him king next morning, and gives him exact details of three experiences he is to have the same day; and all these turn out as he has said.

The high antiquity of this narrative as compared with that of the more recent sources strikes one at the first glance. The circumstance that the seer is applied to for information even in such secular and everyday matters as is the case here, betrays a very early date; and still more the circumstance that some bread or a quarter shekel should be considered sufficient remuneration for him. We see very clearly, further, that this function of seer is combined with mantic. Even the later source, no doubt, attributes to Samuel extraordinary powers, as when (12¹⁷⁻¹⁸) in the time of the wheat harvest (and therefore contrary to the usual course of nature) he can cause Jahweh to send thunder and rain. Still this magical power of prayer is something different from the magical knowledge of the past and the future of which we are told in 9²⁰ and 10^{27ff.}

If we were to be guided merely by appearances, we should have to conclude that in ch. 9, in the most glaring opposition to the later record, Samuel is represented as a personage of purely local importance, a something betwixt seer and priest, such as was probably to be found then in every country town of Israel. For Saul himself knows nothing of him, but needs to have his attention drawn to him by his servant. It can easily be shown, however, that such an impression is due to an illusion purposely created by the narrator in order to heighten the dramatic effect of his description. But all the while even he makes no concealment of the fact that Samuel is in quite a special manner the confidant and the instrument of Jahweh. The day before Saul's arrival Jahweh has already (9^{15ff.}) announced him to Samuel as His chosen deliverer of His people, and Samuel feels himself thus authorized to anoint Saul in the name of Jahweh to be prince over His people Israel. This last act, in particular, implies a very

high sense of the importance of the man and his relation to Jahweh. Then, again, Saul's cousin (10^{14ff.}), at the mention of Samuel, who is evidently named here as a well-known personage, is at once curious to know what he said, which shows that Saul must have known him as well, so that a merely local importance of the man in his own place of abode is out of the question. Rather must we still admit that in the later narrative a correct estimate is given, not indeed of the political rôle of the seer, but of his high spiritual and religious importance. The latter he evidently possessed as the maintainer and protector of pure Jahwism against all attempts to seduce the people to idolatry or at least to syncretism. But pure Jahwism was in those days synonymous with patriotism, for it was only from their own national God that the people could look for deliverance from the cruel oppression of the Philistines. And so he was honoured by later generations not only as the man of action, who, to carry out the strict command of Jahweh, hewed the Amalekite king Agag to pieces with his own hand 'before Jahweh' (1 S 15^{32ff.}, an undoubtedly good historical narrative), but also as the man powerful in prayer, whose intercession for his people can be compared for efficacy to that of Moses (Jer 15¹).*

The last † who in the early sources receives the designation 'seer' (*hōzeh*) is Gad, 'the prophet' (*nābī*), the seer of David' (2 S 24¹¹). This is manifestly to be understood as meaning, on the one hand, that Gad is to be reckoned among the prophets (in the later sense; and so we find him giving counsel to David, 1 S 22⁵, and conveying to him an oracle from Jahweh, 2 S 24^{12ff.}); and, on the other hand, that Gad filled the special office of 'seer' to David. In the latter capacity he would probably obtain oracles in the traditional fashion by mantic machinery. It is not difficult to understand why later generations, to whom this kind of official seership had a heathen smack about it, preferred to ignore it and to put in its place a prophetic activity, which appeared to them far more intelligible and—in the case of a David—far more fitting. For this very reason, however, 'the seer of David' may be considered to be an older and more correct designation of Gad than 'the prophet.'

3. We have learned from the above discussion that the seers and 'men of God' of ancient times—Moses, Deborah, Gad (partly)—received even at an early date the further designation of נָבִי *nābī*, †

* It was customary at one time to infer from 1 S 19^{18ff.} that Samuel, especially in his capacity of head of a guild of prophets at Ramah, developed an activity which wrought in favour of the theocracy, and probably promoted also the growth of religious literature. But, apart from the fact that these *nēbīm* (see below) are not to be offhand identified with the 'prophets' in the later sense of the term, there are the strongest objections to the historical character of this whole passage. The manifest contradiction with 15^{35a} is alone sufficient to show that in 19^{18ff.} we have to do with a very late *midraš*, after the manner of 16^{1ff.}

† We leave out of account the circumstance that the Chronicler is acquainted with a 'seer' named Je'do (2 Ch 9²⁹) or 'Ido (12¹⁵) in the reigns of Solomon, Rehoboam, and Abijah, whereas in 13²² he is called 'prophet'; and with a 'seer' Jehu in the reign of Jehoshaphat (19²). When, again, the Chronicler gives the name of 'seer' even to the music masters of David, namely Asaph (2 Ch 29³⁰), Heman (1 Ch 25²), Jeduthun (2 Ch 35¹⁵), he follows a usage of language unknown elsewhere.

‡ Here we may give all that is most essential regarding the etymology and the history of the usage of this term. The root *nābā'* has not survived in Hebrew, for the verbal forms *nābā'* and *hithnabbē'* ('to show oneself a *nābī'*') are derived from the substantive *nābī'*. But the Arabic and the cognate Heb. roots *nabāh* ('bark') and *nābā'* ('bubble forth') show that *nābā'* means originally to throw out words or particular sounds with violence, as happens in mantic rapture or holy frenzy. (On the corresponding Assyr. root= 'to carry off', 'to tear away violently' [carried away by a supernatural power], cf. J. Bewer, *Amer. Journ. of Semit. Lang. and Lit.* xviii. 2, p. 120). Hence the howling derisives of Islam have been rightly compared with the *nēbīm* of ancient Israel. *Nābī'* then denotes [actively] properly one who professionally [this is implied in the

'prophet' (or *nēbī'āh*, 'prophetess'). This, however, may safely be pronounced an anachronism. In earlier times, down at least to the middle of the 9th cent. and even later, *nābī'* (plur. *nēbī'im*) meant something so different that this name could not have been given to Moses or Samuel. Hence, it may be added, the rendering of *nēbī'im* in the time of Samuel by 'prophets' is misleading, and had better be avoided. The descriptions contained in 1 S 10^{5f}, 10^f, taken along with the etymology of the word, show that we have to do with bands of enthusiasts, of whom the spirit of God has laid hold with overpowering force, and who, stimulated by loud music to greater frenzy, readily carry along others to participate in their conduct. This last feature is prominent not only in 1 S 10^{6, 10}, but in the late *midraš* 19^{18f}, and it reflects truly the character of such phenomena, as does also the statement that Saul stripped off his clothes, and lay naked for a day and a night in holy frenzy.*

Analogous phenomena are reported alike from the ancient religions, from the Christian Middle Ages, and from the sphere of heathen peoples at the present day; and it would be complete perversity to set them all down simply to deceit and hypocritical pretensions. The only question that arises for us is: What is the special significance of this phenomenon upon ancient Hebrew soil, and how far has it a religious significance in the realm of Jahwism? Unfortunately, owing to the scanty traditions at our disposal, we must here have recourse to pure conjectures. These, however, are such as may claim a high degree of probability. In the first place, it will not admit of doubt that these *nēbī'im* were originally a Canaanite growth, and were adopted by the Hebrews from that quarter. This conclusion is favoured by the fact that the other forms of mantic, possession, and sorcery, also took their rise in all probability upon Canaanite soil. But the 'spirit of God,' which, according to the word of Samuel, passes from the *nēbī'im* at Gibeah to Saul, is expressly called in 1 S 10⁶ 'the spirit of Jahweh,' and nothing else could be thought of in view of the whole context. The moving cause, again, that led to whole companies being inflamed by the spirit of Jahweh to holy frenzy was doubtless the sore straits of the time, the heavy yoke of the Philistine domination. It can hardly be an accident that Saul (10⁵) is seized with holy frenzy at the very spot where the pillar (צִיָּה), or, according to another interpretation, the administrator of the Philistines, was located. As in the Middle Ages the ravages of the plague gave rise to troops of flagellants, so, in the period of which we are speaking, subjection to a people hated and esteemed unclean produced a condition of great excitement, and led to frequent gatherings of those who were seized with a violent desire to procure the intervention of the national God of Israel, who was regarded, above all, as the war-

God. This purpose was served chiefly by the ecstatic cries from which the *nēbī'im* originally derived their name. Hence Schwally (*Semit. Kriegsaltertümer*, i. 110) may be right in assigning a warlike origin to the whole appearance of these *nēbī'im* (as well as the Nazirites; see below). We are reminded how, in the case of Samson, his being seized with the spirit of Jahweh is repeatedly connected with acts of vengeance on the Philistines (Jg 14²⁹ 15^{14f}). In a certain sense, then, these *nēbī'im* may be regarded as organs of Jahweh; but they belonged to quite a different species, and followed a different calling from the so called organs of Jahweh of later times.

4. Notwithstanding, there was not wanting even at the court of David some representation of genuine prophetism in the later sense of the term. Apart from Gad, who announced to David a coming punishment at the hands of Jahweh (2 S 24^{11f}), we meet with a representative of it in the remarkable personality of Nathan. Nowhere, indeed, do we read of his special endowment with the spirit of Jahweh. After David's sin in the matter of Uriah, we read in 2 S 12¹ simply: 'And Jahweh sent Nathan to David.' But the combination of skill and courage in the way in which Nathan awakens the conscience of the king and pronounces the judgment of Jahweh upon him, and then follows this up by announcing the forgiveness of his sin, reminds us of the way in which Isaiah afterwards faced Ahaz (Is 7) and Hezekiah (39). It is nowhere stated that Nathan held any official position, and the usual comparison with a court preacher has no support in the early source. The rôle, not quite free from danger, which he plays in 1 K 1 in the palace intrigue, in favour of Solomon and against Adonijah, is sufficiently explained by the position he had held as the tutor of Solomon (2 S 12²⁵). Besides, it may be questioned (as in the case of Gad) whether the title *nābī'* as applied to Nathan is as early as the time of David (which would contradict 1 S 9⁹, where this signification of the word is plainly reserved for a much later date), or whether it is due to a readily intelligible expansion at a redactor's hand. In 7² it may belong to the Deuteronomic revision of the older narrative. Strangely enough, however, it is wanting in 12¹ in the MT on the occasion of the first mention of his name in the early source, and throughout the whole of this narrative. In 1 K 1 the title is almost always attached to the name, yet there are certain indications* that make it at least possible that its presence is due to a late insertion. If it is original, we must conclude that it stands for an official position, that indeed of a 'seer' like Gad, and in the interposition of Nathan in 2 S 12 we should have to see an unusual evidence of that position.

The same difficulty recurs in the case of Ahijah of Shiloh (1 K 11^{29f}, 14^{2, 18}, but not 15²⁹). Ahijah's symbolical action in tearing his mantle to pieces and giving ten of these to Jeroboam, as well as his conduct towards Jeroboam's wife and his utterances in the name of Jahweh, place him quite in line with the Jahweh prophets of the 8th cent.; but the question remains whether the title *nābī'* is not to be set down to the account of the Deuteronom. recension, in which the original story about Ahijah is unquestionably now presented to us. The same remark applies to Jehu, the son

formation of the word] gives utterance to ecstatic cries, or exhibits other tokens of holy frenzy. True, this original sense of the word became more and more weakened. Even the *nēbī'im* of the time of Elijah and Elisha (see above) have already become only pale reflexions of the *nēbī'im* of Samuel's day. But when *nābī'* had been fully adopted as the honorific appellation of the true prophets of Jahweh (so already in Am 2¹, Is 8³ [where the wife of Isaiah is called by himself, in conformity with his official name, 'the prophetess']), the recollection of its original meaning was all the more forgotten. Otherwise, Abraham could not have been in Gn 20⁷ (E) called a *nābī'*, to whom one could look for effectual intercession. Nay, in Ps 105¹⁵ the same title is given to the patriarchs in general, with their families. Evidently, all that still attaches to the word here is the notion of confidants and favourites of God.

* A trace of the bearing of these *nēbī'im* has very probably survived down to a late date in the verb הִטְיִף *hit'ip'h*, 'prophesy,' which means primarily 'to let drop,' sc. slaver, as is usual with epileptics and madmen.

* In v. 10 the MT but not Luc. has the addition. In v. 34 the LXX has certainly preserved the original text ('and anoint him,' etc., without any subjects following); in the MT there has been inserted from v. 39 first 'Zadok the priest' (hence 'shall [sing.] anoint him,' etc.), and then, further, 'Nathan the prophet.' In v. 45 Luc. still betrays the original text 'and there anointed [sing.] him the priest Zadok'; yet here too, as we see in MT and LXX (both 'and there anointed' [plur.] etc.), there was inserted after 'Zadok,' although this in contradiction of v. 34, 'Nathan the prophet.'

of Hanani, who announced an oracle of Jahweh against Baasha, king of Israel (1 K 16^{1ff.}).

But, even if in all the above instances *nābî* should be an anachronism, the important fact remains that at no period were there wanting in Israel suitable organs for giving expression at the Divine command to the pleasure and, in a remarkable degree, the displeasure of Jahweh. We are reminded of the old naïve seership of a Samuel, when the wife of Jeroboam I. goes to consult Ahijah about the illness of her son, and proposes to recompense him with ten loaves and cakes and a jar of honey (1 K 14³). But, just as Samuel was informed beforehand of the coming of Saul (1 S 9¹⁵), the approach of Jeroboam's wife is made known to the blind Ahijah. This serves also to authenticate him as an instrument of Jahweh; and the importance of his message to the whole Northern kingdom raises him (and Jehu) far above a 'seer' of the olden time, and gives him the appearance of a worthy forerunner of the true Jahweh prophets.

5. Of ecstasies such as meet us in 1 S 10^{5ff.} 19^{18ff.} we have encountered none since the time of Samuel; of 'seers' in the ancient sense only a few names have come under our notice. All the more is our interest aroused by the manifold and strong evidences of the presence of prophetism in the Northern kingdom in the 9th cent., from the time of Ahab (c. 876 ff.) down to the death of Elisha under king Joash (2 K 13^{14ff.}). For the copious stream of tradition regarding this period we are indebted to the circumstance that the compiler of the present Books of Kings has largely incorporated in his work the special (written) accounts of Elijah and Elisha, the so-called 'Mirror of the Prophets' (1 K 17-19, 21^{1-20a} 27-29, 2 K 2-8¹⁵ 9¹⁻¹³ 13¹⁴⁻²¹). It is true that even here we must be on our guard against understanding the narrative absolutely from the standpoint of a later age. Elijah and Elisha, like the *nēbî'im* who surround them, are not to be summarily identified with the Jahweh prophets of the following century. These *nēbî'im*, on the contrary, remind us in many respects of the *nēbî'im* of the time of Saul, except that their zeal for Jahweh is directed against a different foe.

(a) To begin with Elijah, it is noteworthy here once more that in the original text he is only once reckoned amongst the *nēbî'im*, namely in 1 K 18²², in words put into his own mouth, but in a context where no other designation was possible. In 18³⁶, on the other hand, the original text, according to the LXX, was simply, 'And Elijah called to heaven and said,' etc. Now, it is surely no accident that the narrator himself avoids giving the name *nābî* to Elijah, who, in spite of some cognate features (see below), is not to be placed on the same platform as the *nēbî'im* of his *entourage*, but holds a higher place than they. The widow of Zarephath (1 K 17^{18, 24}) calls him (as the servant of Saul does Samuel in 1 S 9^{6ff.}) a 'man of God' in whose mouth is the true word of Jahweh.*

The circumstance that the imposing figure of Elijah the Tishbite now (1 K 17¹) steps quite abruptly upon the stage, may be due to the compiler of the present Books of Kings having suppressed something that went before. But elsewhere, too, the sudden appearances and disappearances of Elijah are remarkable (cf. 1 K 18^{7ff.} and 2 K 2¹⁶). The very commencement of his activity exhibits him as quite an extraordinary personality. He does not announce it as a message from Jahweh that the next years shall see neither

dew nor rain till he shall intimate the contrary, but swears by Jahweh, in whose service he is, that it shall be so. This conveys the impression that Jahweh has given him full powers over the forces of nature. Yet he himself (v. 14) ascribes the miracle of the widow's cruse of oil to the command of Jahweh, and the return of the rain to His sending it. By his prayers he wins back from Jahweh the newly deceased son of the widow (v. 17^a), and shows himself, finally, at Jahweh's command, to Ahab (18^{1ff.}). Now at last, when we make acquaintance with 'Obadiah, Ahab's *major-domo* (18^{2ff.}), we learn what has been the real cause of the years of drought. These are manifestly traced to Jezebel's bloody persecution of the *nēbî'im* because they had opposed the spread of the cult of the Tyrian Baal (see above, p. 647^b). 'Obadiah himself, in harmony with his name, a true 'worshipper of Jahweh,' had hid a hundred *nēbî'im* by fifties in a cave, and supplied them with food—a proof this of the bloody earnestness of the persecution. 'Obadiah shows such deference to Elijah (v. 7^{ff.}) that the impression of the latter as a magical personality is once more left upon us. Elijah, however, exhibits himself in his true greatness in his meeting with Ahab on the occasion of the Divine judgment at Carmel (18^{19ff.}), for which he compels the king to make the necessary preparations. There he stands alone, over against the 450 *nēbî'im* of Baal.* His words to the people (v. 21) show that his aim is, at any cost, to put an end to the prevailing syncretism between Jahweh and Baal. The ridicule which he pours (v. 27) upon the vain efforts of the prophets of Baal goes essentially beyond the sphere of mere henotheism, and is equivalent to a complete denial, not only of the power but of the very existence of Baal. And, when Jahweh by a heightened (v. 34^c) miraculous display has brilliantly evinced His claim to be the true God, Elijah is content with no half measures. The complete reversal of the sentiments of the people leads them to consent, at his command, to slaughter the 450 prophets of Baal at the Kishon.

In the appendix to this narrative (18^{41ff.}) we meet with several features which again remove Elijah from the purely spiritual sphere and set him—even physically—in a kind of magical light. He hears in advance the rushing of the rain. The whole of the strange attitude he assumes in v. 42 can scarcely be otherwise explained than as a performance (rain-charming?) borrowed from the sphere of magic. But in v. 46 the 'hand of Jahweh' (i.e., in view of the linguistic usage elsewhere, an ecstatic condition produced by Jahweh) is expressly called in to account for Elijah's running before Ahab's chariot from Carmel to Jezreel (at least a five hours' journey). To the same category belongs the statement of 19⁵⁻⁸, that, in the strength of the food brought him by an angel, he was able to travel 40 days and 40 nights till he came to Horeb, the mount of God.

It may be noted that even ch. 19 is still dominated by the one great idea at the root of Elijah's ministry, namely, his struggle on behalf of Jahweh against Baal. His complaint to Jahweh (v. 14) relates to the fruitlessness of his zeal for Jahweh, the throwing down of His altars and the slaying of His prophets. In Jahweh's reply (v. 15^{ff.}) it is well worthy of note that Elijah receives commissions—the anointing of Hazael to be king of Syria, and Jehu to be king of Israel—which involve his taking part in a political upheaval, nay, in a rebellion against the regularly constituted ruler. The further 'Histories of the Prophets' know nothing of any executing of the latter commission by Elijah; at most it might be conjectured from

* 2 K 19^{6, 13}, where likewise Elijah is called 'man of God,' is a late *midrash*. Again, 1 K 20²³, where one of the *nēbî'im* (cf. v. 22) is spoken of as a 'man of God,' does not belong to the 'Histories of the Prophets.'

* On the 400 prophets of the *ʾāshērāh* afterwards introduced into v. 19, see above, p. 647^b, note.

2 K 8^{12f.} and 9^{1f.} that he handed over to Elisha those commissions which it was impracticable for himself to carry out. All that he attended to personally was the call of Elisha (1 K 19^{16f.}) by casting his mantle over him. This might be interpreted as simply a symbolical transaction—an investiture with the prophetic office by means of what had become even then the usual official garb of the prophets, the mantle [of hair]. In reality, however, a feature of the ancient mantic once more presents itself here. As we see from 2 K 2^{8. 13f.}, miraculous virtues belong to this mantle: through its possession Elisha becomes heir also of the spirit of Elijah. It is in the light of this that we must understand 1 K 19¹⁹. The mantle of Elijah, cast upon Elisha, exerts a magical power over him, compelling him to attach himself to Elisha.

The ministry of Elijah finds a fitting conclusion in the courageous front he offers to Ahab on account of the judicial murder of Naboth (1 K 21^{17f.}). As Nathan had once done to David, and Ahijah to the wife of Jeroboam I., so here Elijah comes forward, at Jahweh's command, as the embodied conscience of the theocracy to face the king. And so overwhelming is the power of his word, that Ahab, although at first defiant (v. 20), ends by submitting as a humble penitent.

To sum up the results of our investigation, we gather, on the one hand, that the tradition regarding Elijah has not remained uninfluenced by legend; and, on the other hand, that prophetism even in his person still exhibits a connexion with various survivals of the most ancient conceptions—nay, even with magic. All this is said quite apart from his altogether extraordinary end—his translation to heaven in a fiery chariot with fiery horses. Whether this story (2 K 2) belongs to the original Elijah-narratives, or whether it has not rather displaced an older narrative of his end, is open to dispute. But, in any case, it is strong evidence of the estimate formed of the imposing figure of Elijah by his countrymen. Even if the legend of Elijah's translation be connected with the honorific appellation 'Israel's chariot and horsemen' (2 K 2¹²; used also of Elisha in 13¹⁴), i.e. equal in importance to, or taking the place of, chariots and horsemen to Israel, it remains true that such a legend could have taken its rise only about one whose activity could not be thought of but as enduring, and whose fellowship with his God was known to have been so close that its interruption seemed inconceivable. Viewed in this way, even the legend becomes a witness of the first rank to the fact that, in the times of greatest peril to the continuance of Jahwism, the God of Israel did not lack chosen vessels for His service—figures such as one would look for in vain in the whole realm of heathen religions.

(b) Elijah's servant and successor Elisha, who fell heir not only to his mantle but (according to 2 K 2^{2f.}) to a double portion of his spirit, is notably inferior in significance to him. This is partly explained by the circumstance that, after the bloody extirpation of the worship of Baal by Jehu, whose revolt against Jehoram was instigated by Elisha himself (2 K 9^{1f.}), there was no longer much occasion for vigorous activity in the religious sphere. Elisha's last interview with Joash (13^{14f.}) shows clearly the high consideration which he received from the dynasty of Jehu. But even in the passages which record incidents in the reign of Jehoram, though Elisha expresses his strong disapproval of this king (3^{12f.}; 6³² probably has to do still with Ahab), we never (except in 9^{1f.}) hear of his bearding the monarch after the manner of Elijah. In the forefront of the Elisha-narratives stands the sore oppression of Israel by

the Syrians, and here Elisha interposes actively more than once. By the way, these Elisha-narratives, when compared with those regarding Elijah, which are not indeed without *lacunæ*, but are far more of a unity, exhibit a somewhat motley mixture of separate anecdotes, as these were supplied by the varying popular tradition. It is a vain effort to seek for a chronological thread running through them. (The unnamed king of 6^{21f.} evidently belongs to the dynasty of Jehu, whereas the 'son of a murderer' of v. 32 is in all probability Ahab). Some narratives may be plainly recognized as imitations of the stories about Elijah (so certainly 2 K 4^{2f.} compared with 1 K 17^{14f.}, and 2 K 4^{32f.} compared with 1 K 17^{19f.}), and thereby betray at the same time the secondary character of the whole figure of Elisha in comparison with that of Elijah. There prevails in the Elisha-narratives an unmistakable tendency to lay special emphasis not only on his wonder-working power, but also on his high prestige and the inviolability of his person (2 K 2^{23f.}). A recommendation from him is of great weight with the king and the commander-in-chief (2 K 4¹³); the king readily follows his counsel and yields to his demand (6^{21f.} 13^{15f.}), and is anxious to hear from Elisha's servant Gehazi of the great deeds of his master (8⁴). The fame of Elisha extends far beyond the borders of the Northern kingdom. Jehoshaphat of Judah knows that the word of God is to be found with him (3¹²). The Syrian king Benhadad has scarcely heard of his arrival in Damascus (8^{7f.}) when he sends Hazael to consult him about the issue of his sickness; and Hazael takes with him 40 camels' burden of the precious things of Damascus as a present for Elisha. Elsewhere (5¹⁰) the absolute disinterestedness of the prophet is emphasized, as are his magnanimity and mildness in 6^{22f.}.

In regard to the activity of Elisha it is noteworthy that, while he is called by preference (23 times) 'man of God,' he also appears in the Elisha-narratives as *nābī*, and that in the later sense of the term. So in 1 K 19¹⁶, where Elijah is directed to anoint * him to be a *nābī*; 2 K 3^{11f.}, where Jehoshaphat recognizes him as a true prophet, through whom Jahweh may be consulted; cf. also 5⁸, where Elisha classes himself amongst the *nēbī'im*. In the mouth of others he is called without qualification 'the prophet' (5⁸ 9¹), receiving this title even from heathen speakers (5¹³ 6¹²).

The methods by which Elisha works are partly the usual ones, which are recorded also of Samuel and Elijah—namely, the proclaiming of a word that has come to him from Jahweh (2 K 3^{16f.} 4⁴³ 7¹), and prayer (4³³ 6^{17f.}). Along with these, however, we meet in his case again with a variety of features which have been already described in speaking of Elijah, and which recall the ecstatic conditions and magical methods of the ancient *nēbī'im*. He needs the services of a harper if 'the hand of Jahweh' (see above, on 1 K 18¹⁶) is to come upon him. Quite peculiar to him is the gift which we nowadays call telepathic sight and hearing (2 K 5²⁶ 6^{12. 32} 7² 8¹³; cf. also 6^{16f.}, where Elisha and, at his prayer, his servant also see the heavenly horses and fiery chariots on the mountain). But with special frequency miraculous acts are attributed to him. Even if stories like the purifying of the spring at Jericho by using salt (2^{19f.}), the making of bitter fruits palatable through meal (4^{38f.}), or the causing of the axe to spring to the surface of the water (6⁹) are not

* Since we never hear elsewhere of prophets being anointed, and as it is not even performed by Elijah in this instance (cf. v. 19), 'anoint' must here be used in the weakened sense of 'install.'

meant to be taken as recording miracles, but merely prove what a fondness there was for handing down the memory even of less important incidents of his life, there remain a number of others which, to say the least, place him alongside of Elijah. The wonder wrought on the widow's cruse of oil (2 K 4^{23f}) exhibits a heightened form as compared with the general promise of 1 K 17^{14ff}; and the same is the case with the raising from the dead recorded in 2 K 4^{29ff}, seeing that a much longer time had elapsed since the death than in 1 K 17^{19ff}. At the same time 2 K 4^{29ff}, expressly teaches that magical weapons are not efficacious in every hand: in vain Gehazi lays the staff of Elisha upon the face of the dead—it is only the prayer and the personal *physical* influence of the man of God that can call back to life. The fulfilment of Elisha's promise to the Shunammite (4¹⁶) and of that to Naaman the leper (in the latter instance the promise being carried by a messenger) might also be attributed to the intercession of the prophet. In reality, however, the narrative may be intended to be understood to mean that the promise of the prophet is as certain to be inevitably fulfilled as was his curse (2^{23f}). In 6^{18, 20} it is the prayer of Elisha that strikes the Syrians blind and restores them to sight; and in both these cases (as already in 6¹⁷) the efficacy of the prayer is instantaneous. The feeding of 100 men with 20 barley loaves (4^{22ff}) is the counterpart of the miracle of the widow's oil-cruse; the transferring of the leprosy of Naaman to Gehazi (5²⁷) corresponds to the instantaneous effect of the curse in 2²⁴.

All this may be regarded as furnishing sufficient evidence that even Elisha is still closely allied to the *nēbī'im* in the old sense, but at the same time also that, like Elijah, he is distinguished from them, and forms along with him a connecting link between the old seers and the prophets proper. That his political activity, too, as exercised in the interest of pure Jahwism, was no slight one, would be sufficiently evidenced even by 9^{1ff}, and it is not without reason that he too received from king Joash the honourable appellation of 'chariot and horsemen of Israel.' Regarding what was perhaps his most important activity, the direction of the guilds of *nēbī'im*, we shall have to speak below.

(c) But we have still to notice one Israelitish prophet who in the reign of Ahab holds as peculiar a place as Elijah himself, namely Micaiah ben-Imlah, the subject of the narrative of 1 K 22^{8ff}. Ahab cannot endure him, because it is his wont always to prophesy evil to him. Jehoshaphat deprecates Ahab's remark; evidently he sees, in the very fact that Micaiah is mostly a prophet of ill, the evidence of true inspiration, whereas the unbroken harmony with which the numerous other prophets promise good fortune had awakened his distrust. In fact, Micaiah will speak only what Jahweh bids him (v. 14). It is thus the intention of Jahweh that he, like the others, should at first hold out deceitful promises (v. 15). Ahab, however, sees through this conduct, and Micaiah, when the king presses him, delivers Jahweh's message of woe, explaining at the same time, by relating his remarkable vision, why all the rest of the prophets had become victims of the 'lying spirit': Jahweh Himself has ordered it to be so. The circumstance that Micaiah himself does not share their fate, but is informed in his vision as to the real course of Jahweh's purpose, shows sufficiently the height at which he stands above the ordinary *nēbī'im*; and his threat against Ahab finds speedy realization at Ramoth-gilead. Hence we may say that Micaiah ben-Imlah is the first who bears all the marks of the true prophet of Jahweh, without

anything to remind us of a connexion with the *nēbī'im* in the old sense.

6. With the *nēbī'im* of the latter class, as these belong to the time of Elijah and Elisha, we have still to occupy our attention here. Their affinity with the *nēbī'im* of the time of Saul consists, above all, in the circumstance that, like the latter, they make their appearance in whole groups—nay, in guilds. This is implied by the very designation so frequently applied to them—*bēnē han-nēbī'im* (lit. 'sons of the prophets'). This does not mean 'pupils or disciples of the prophets,' but 'those who belong to the prophetic order'* (or, at times, evidently to prophetic guilds; so, e.g., in 2 K 2^{3, 5, 7, 15} 4^{1, 38} 6¹), and in so far they are the same as the simple *nēbī'im* (1 K 18^{4, 13} 20⁴¹ 22^{26-15, 22ff}). An individual is called *nābī* (1 K 20^{13, 22, 38}) or 'one of the *bēnē han-nēbī'im*' (v. 35). The existence of a guild is pointed to also in 20⁴¹. This passage can be understood to mean only that the prophet there spoken of put the covering above his eyes to conceal a tattooing or some other characteristic mark† by which the *nēbī'im* in general were recognized as belonging to the service of Jahweh.

There are a number of passages which indicate that groups of these *nēbī'im* lived together: so at Bethel (2 K 2³) and at Jericho (v. 5; 4³⁸ 'in Gilgal'). Such a settlement is pointed to plainly by the story about an enlargement of a building (6^{1ff}). That Elisha lived with them is nowhere said; even 4³⁸ implies no more than that once, when on a visit to Gilgal, he set about providing a meal for them. But it is very noteworthy that we twice (4³⁸ and 6¹) meet with an expression which supplies us with unexpected information regarding the nature of these guilds: 'they sit before Elisha.' This means not simply that they group themselves around him or rejoice in his company, but that (after the manner of the NT expression 'to sit at the feet of some one') they sit before him as disciples before the master or pupils before the teacher. It is true that even here the current term 'schools of the prophets' is justified only to a very limited extent. For, in the first place, according to 4¹ there are amongst the *bēnē han-nēbī'im* even married men; and, secondly, they already exercise to a large extent (see below) a public activity. Nor do we read anywhere of any founding of these 'schools' by Elijah or Elisha. Still it appears to admit of no doubt that in 4³⁸ and 6¹ we have to do with occasional instruction of the members by Elisha, or with didactic conversations with them; nay, even the idea of their occupying themselves with religious literature is not a far-fetched one, although there is no direct allusion to it. That the relation between them and Elisha was that of disciples to a master, is favoured by the affection and reverence so evidently shown by the *nēbī'im* in addressing him as 'man of God.'

It might appear from the majority of the Elisha-narratives as if the *nēbī'im*, with him at their head, led a life wholly retired and devoted to the worship of Jahweh; but there are other passages which testify to a public activity, and that—in harmony with the main postulate of genuine prophetism—at the impulse of the spirit of Jahweh. In 1 K 20⁶⁵ one of the *bēnē han-nēbī'im* asks his companion, by the direction of Jahweh, to wound him; and, when he refuses, he tells him that for disobedience to the command of Jahweh he shall be torn by a lion. His message to Ahab, again, he announces as a word from Jahweh (v. 42), and so already in vv. 13, 28 [where this prophet is even called a 'man of God']. And in 22^{5ff}, the spirit

* Cf. above, p. 643, regarding an analogous expression, *bēnē ha-'elohim*.

† So Kraetzschmar, *Prophet und Seher im alten Israel*, p. 9.

of Jahweh is expressly spoken of in connexion with the *nēbī'im*. The same Zedekiah, the son of Chenaanah, who in 1 K 22¹¹ supports his promise to Ahab by the symbol of iron horns, asks (v. 24) Micaiah in anger: 'In what way is the spirit of Jahweh passed from me to speak with thee?' He cannot believe that he has now become the victim of a lying spirit when he knew himself formerly to be inspired by the true spirit of Jahweh. So also in 2 K 23⁵ the question of the *bēnē han-nēbī'im* to Elisha is to be understood as meaning that they too have had it revealed to them by the spirit that the translation of Elijah is impending.

Like the true Jahweh prophets, these *nēbī'im* sometimes answer inquiries (1 K 22²⁸); at other times, acting on their own initiative, they proclaim the word of Jahweh in the public interest (20^{34, 28, 39}). In this connexion we are struck with their great numbers. 'Obadiah rescues 100 of them from the fury of Jezebel; some 400 are assembled by Ahab (22⁶); more than 50 live together at Gilgal (2 K 27¹⁶). These numbers are surely evidence of the intensity of the excitement and the zeal for the God of Israel when His worship appeared to be endangered by Baal (to whom, in 1 K 18¹⁹, so many as 450 *nēbī'im* are attributed).

Now, it has been argued that none of the passages which speak of any public activity on the part of the *nēbī'im* belong to the Elijah- and Elisha-narratives, but to the very valuable ancient 'Ahab-source' (1 K 20. 22). The latter, it is pointed out, knows nothing of guilds of *nēbī'im* or of their being directed by Elijah or Elisha, as, conversely, the Elisha-narratives know nothing of a public activity on the part of their *bēnē han-nēbī'im*. The difference between the two sources must at once be acknowledged. But their accounts are not mutually exclusive, although their historical viewpoint is different, and the period involved in the Elisha-narratives is somewhat later than the other. A very notable evidence of the continuance of the old view of the *nēbī'im* is found in 2 K 9¹¹. The officers of Jehu roundly call Elisha's messenger, who in v. 1 is expressly reckoned among the *bēnē han-nēbī'im*, a 'mad enthusiast' (עֲזָזִיזִים). This implies that there was expected of him, and certainly not of him alone but also of his comrades, an ecstatic condition, and even utterances due to a kind of possession; which shows that, in spite of the milder character of the later *nēbī'im*, there were still occasional outbursts of their old nature, as we make its acquaintance in 1 S 10⁵, and 19²⁰.

7. A final trace of the old notion of the prophetic spirit as a mysterious agency which hurries a whole crowd along is found in the narrative of Nu 11^{17, 25}. The latter belongs in all probability to the E source, and hence falls within the period with which we are dealing, namely, prior to the rise of written prophecy. A portion of the spirit of Jahweh, which rests upon Moses, suffices to throw 70 of the elders of Israel into a condition of rapture. Two who remained behind in the camp, Eldad and Medad, are seized even *there* by the spirit of Jahweh because they also are marked out as amongst those destined to share in the leadership of the people (cf. v. 17). This endowment with the spirit for more secular ends is indeed foreign to the oldest point of view; but, on the other hand, the seizure of whole groups by the spirit of Jahweh finds its only analogy in the old *nēbī'im*, so that we could not deal with this case except by way of appendix to our account of the latter.

3. Nazirites.—1. Amongst those who served as express organs of genuine Jahwism we must, further, include the Nazirites. The name (נָזִיר) is generally explained to mean 'the consecrated one.' But

it is questionable if the verbal forms to which appeal is made in favour of this sense are not derived from the substantive *nāzīr*, and this again from *nēzer*, the [consecrated] head-ornament (frequently used of a diadem, but also of the unshorn hair of the head). In that case *nāzīr* would denote originally one whose head is graced with unshorn hair—a view which is supported by the circumstance that in Lv 25^{5, 11} the unpruned vine, which is still decked with its full quota of leaves, is likewise called *nāzīr*. All the same, we do not mean to deny that the notion of 'consecrated' one came, at an early period, to be connected with *nāzīr*; so especially in the collocation 'a *nāzīr* of God,' Jg 13^{5, 7, 16}.

2. The few OT passages which inform us as to the Nazirate are all at one as to its being a condition of consecration to God which shows itself in submitting to certain restrictions. Three of these are specified: the leaving of the hair of the head unshorn, abstinence from wine and intoxicating drink, and the avoiding of defilement by a corpse. It is questionable, however, whether these restrictions were always in force at the same time, and especially is there doubt as to the relation between the obligation for life and the obligation for a fixed period. We must first, therefore, examine the various statements separately.

3. The only historical instance of a Nazirite is Samson. As to Samuel, who is also usually included among the Nazirites, all that is said in 1 S 11 is that his mother vowed before his birth to give him over to Jahweh for life, and that no razor was to come upon his head. But his not being shorn did not suffice to constitute him a Nazirite; according to Ezk 44²⁰ this was no unusual practice with priests, and it may have meant no more in the case of Samuel; at all events, he is never called a Nazirite.

The Nazirate of Samson is spoken of in Jg 13¹⁴ and, indirectly, in 16¹⁷. According to ch. 13 he was, even before his birth, expressly marked out by the angel of Jahweh as 'consecrated to God.' At the same time his mother is bound over—evidently prior to, and during, pregnancy—to abstain from wine* and intoxicating drink, and from unclean food; while no razor is to come upon the head of her child, who, from his mother's womb down to the day of his death, is to be consecrated to God. Now, it is surely very surprising that the obligation to abstain from wine and what is unclean is imposed, not upon the son, for whom such abstinence would have been equally possible, but upon the mother. Everywhere else it is taken for granted that the Nazirite himself abstains from wine. Hence we are forced to the conclusion that the abstinence from wine enjoined upon the mother in vv. 4, 7, 13¹ was afterwards† inserted by some one who could not conceive of a Nazirate without any such prohibition. Seeing that, in the story of Samson (ch. 14 f.; cf. esp. 14^{10, 12, 17}) the practice of the hero himself gave no countenance to such a theory, recourse was had to the expedient adopted in ch. 13.

Accordingly, the Nazirate of Samson is based exclusively upon his unshorn hair, and, as a matter of fact, the greatest stress is laid upon the latter in 16¹⁷. His enormous strength is bound up with his hair remaining inviolate, and that simply because the presence of Jahweh is, in some mysterious way, connected with the hair. After the seven locks have been cut off his head, he becomes weaker and weaker (v. 19); he strives in vain to free

* In v. 14 the prohibition is extended to 'all that comes from the vine' (as in Nu 64); but this is probably a later addition, as is indicated even by its position, *before* the main prohibition.

† That it is so in v. 4 is clear from the fact that in v. 5^a the closing words of v. 3 are repeated.

himself, 'for he knew not that Jahweh was departed from him' (v.²⁰). On the other hand, when his hair had grown again, he recovered the strength for his last achievement in the destruction of the Philistines.

All this shows that the Nazirate of Samson is a condition in which he is under the influence of the spirit of Jahweh, and that this condition is connected with the hair of his head being unshorn. The spirit appears, indeed, to be often latent, breaking into action only on special occasions (cf. Jg 13²⁵). Violently seized by the spirit of Jahweh, he tears asunder the lion (14⁹), slaughters 30 Philistines at Ashkelon (v.¹⁹), bursts his bonds and kills 1000 Philistines with the jawbone of an ass (15^{14ff.}). It is therefore, above all, displays of strength against the foes of his people for which the spirit of Jahweh endows him, and his Nazirate recalls certain phenomena that present themselves elsewhere, in which we have to do with vows and forms of abstinence for warlike ends.* An analogy is presented, in particular, by the Arab warriors, who vow to leave the hair of their head unshorn during the whole period of a war of revenge, and to make a fire-offering of it after revenge has been achieved. The only difference would be that in the case of Samson it was no vow for a fixed period, but a 'perpetual warlike consecration' (Schwally). For his proposal to enter into friendly relations with the Philistines by marriage (14^{1ff.}) is expressly traced (v.⁴) to a providential dispensation of Jahweh, 'because he sought an occasion [for hostilities] against the Philistines.' This, his life-work, is pointed to from the first (v.^{6b}). As a matter of fact, all that is related of him in ch. 15 resolves itself into a series of single combats with the Philistines. We have already noted that in this warlike Nazirate no regard is paid to abstinence from wine. And it is sufficiently evident from 14^{8f.} that there can be as little question of avoiding unclean food.

4. We receive quite a different impression of the Nazirites from Am 2^{1ff.} 'And I raised up of your sons for prophets, and of your young men for Nazirites. . . . But ye gave the Nazirites wine to drink, and commanded the prophets, saying, Prophecy not.' Here it is evident that the Nazirate is based essentially upon the prohibition of wine, and it is not easy to hold that the prohibition of cutting the hair is passed over simply because it is taken for granted. We must conclude rather that in Amos we have to do with a different form of Nazirate, which reminds us strongly of the vow of the Rechabites (see below). Regarding the nature and aim of this Nazirate, we must indeed have recourse to pure conjecture. Only this much is clear from the words of Amos—since he places the Nazirites in parallelism with the prophets—that the Nazirate is a condition approved by Jahweh and consecrated to His service. To induce the Nazirite to break his vow to abstain from wine is as great a religious enormity as to prevent the prophet from delivering the message with which Jahweh has charged him. Further, the Nazirate here spoken of is probably thought of as life-long, as is the case with the prophetic office which appears in parallelism with it. As to the purpose, however, for which Nazirites were raised up we are quite in the dark. May it be that here again we are to think of unwearied service of Jahweh in war against the foes of His people (as, for instance, the Aramæans)? Or, was the abstaining from wine meant (as in the case of the Rechabites) to be a silent protest against the seductive products of the culture of Baal's land, and thus, at the same time, a standing allusion to Jahweh as the God of Israel?

* Cf., on this subject, above all, W. R. Smith, *RS* 2 333f., and Schwally, *Semit. Kriegsaltertümer*, I. 101 ff.

In any case, we must assume that the Nazirite, prior to and during the time of Amos, had certain positive services to render in order to justify his title of 'one consecrated to God.'

5. In connexion with these scanty testimonies to a historical Nazirate we must look also at the legal Nazirate of Nu 6. The oldest part* of this code (vv. 2-8) requires, in the case of every man or woman who desires to pay the vow of a *nāzīr*, that there shall be, for the whole period of duration of the vow, a strict abstinence from wine and everything that comes from the vine, as well as a careful guarding against defilement by a corpse—even that of one's nearest relation. But, in addition to this, the Nazirite must, during the period of his vow, leave the hair of his head unshorn, for in this, above all, according to v. 7, is represented the consecration to his God. The difference between this Nazirate and that which meets us in history is at once apparent. The characteristics encountered separately in Jg 13 and Am 2¹¹ are here combined, and a new requirement is added, namely, that of avoiding defilement by a corpse. Another new and very surprising feature is the extending of the Nazirate to women, whereas elsewhere the only place allowed to women in the cultus appears to be participation in the sacrificial meals. But in every instance we have to do only with a temporary vow, not (as in the case of Samson and probably also Am 2¹¹) with a life-long obligation.

About the significance of the Nazirate, so far as the Priests' Code is concerned, we are not left in doubt. The only other class that are commanded to avoid defilement by a corpse are the priests. But an exception is allowed, even in their case (Lv 21²), when it is the corpse of their nearest blood relation. On the other hand the prohibition is absolute for the high priest (v.¹¹). Now, when the same demand is made on the Nazirites, a kind of enhanced priestly dignity is accorded them, a lay priesthood, indeed, and one without official functions (which would be *per se* inconceivable in the case of a woman), but yet allied to the actual priesthood as a condition of high consecration to God. In all probability, the Priests' Code has in this way discovered the desired expedient whereby the ancestral and highly esteemed institution of the Nazirate, which, as life-long, had no proper place in the priestly State, might yet be conserved and worthily incorporated among the institutions of the post-exilic theocracy. As always happens in such instances, everything is stripped off in this process which could possibly be regarded as a survival of ancient naturalistic or even heathen notions. The unshorn hair is no longer, as in the case of Samson, the medium of mysterious powers and a pledge of the immediate nearness of Jahweh. Rather is it inviolable because it forms part of the body which, as a whole, is consecrated to God, and the hair is a principal sign of this consecration. Again, the prohibition of wine, which, as we found above, had quite a peculiar significance for the ancient Nazirite, is probably, in Nu 6, to be thought of as finding its motive in the similar prohibition laid upon priests during the exercise of their official functions (Lv 10⁹).

Somewhat later than Nu 6²⁻⁸ are the prescriptions in vv. 13-21 regarding the release of a Nazirite after the expiry of the period of his consecration. In addition to various animal offerings he has to take his hair, which has been cut off before the door of the sanctuary, and cast it into the fire which is under the peace-offering. This enactment is not, however, to lead us to see in the hair-offering the kernel and purpose of the Nazirate as a whole (as if, for instance, it were a symbolical offering of

* Cf., for the above analysis, Wurster in *ZATW* iv. (1884) p. 126.

the body in the form of the representative offering of a part of it). It is quite possible that the hair-offering elsewhere, especially on Semitic soil, has an independent significance of this kind. But it has certainly no such significance in Nu 6^{18f.}. Rather is the burning in the fire of the altar the simplest way of getting rid of what had once been consecrated to God, and hence could not be treated as a common thing. Similarly, the parts of the sin-offering victim which cannot be presented on the altar are required (Ex 29¹⁴, Lv 4^{11f.}, 21 6²³) to be burned elsewhere. The burning of the Nazirite's hair in the altar-fire may be a feature corresponding to the ancient usage, which was retained by the Priests' Code without the hair having on that account a sacrificial character conferred upon it. The latest component in Nu 6 is undoubtedly vv. 9-12, containing prescriptions for the case of a Nazirite who has been rendered Levitically unclean by a death occurring suddenly beside him. In that event the consecrated hair is to be cut off, and, after certain guilt-offerings have been presented, the period of consecration is to begin *de novo*.

4. **Rechabites.**—We have already called attention to the close affinity subsisting between the prohibition of wine to the Nazirites and the corresponding vow of the Rechabites.* But, even apart from this, the latter must be dealt with here, because their founding as a religious sect falls, at latest, in the time of Jehoram the son of Ahab, i.e. before B.C. 842.

1. We read in 2 K 10^{18f.} that the usurper Jehu, while driving along the road from Jezreel to Samaria, met Jonadab the son (or descendant of the family) of Rechab, and gave him his hand in token of his regard, and took him up into his chariot that he might enjoy the spectacle of Jehu's zeal for Jahweh. From this summary notice we can only suppose that Jonadab was an influential man upon whose adherence Jehu must have laid weight, and that he was inspired with the same zeal for Jahweh as Jehu himself.

2. Fortunately, a much later passage, Jer 35, has preserved for us more exact details regarding the significance of this Jonadab. During the reign of Jehoiaķim, after the Chaldeans had moved into Judah (i.e. in B.C. 602 or shortly thereafter), Jeremiah is directed by Jahweh to bring the guild of the Rechabites into a chamber of the temple and to set wine before them. But the Rechabites [whose names one and all end with *Jah* (Jahweh)] flatly refuse to drink wine, and appeal to the prohibition of their ancestor Jonadab the son of Rechab, who had enjoined them not only to abstain from the use of wine, but to neglect the building of houses and every species of agriculture. They had always remained true to this prohibition, and only the invasion of Nebuchadrezzar had compelled them to take refuge in Jerusalem. Thereupon Jeremiah reproaches the Judahites, pointing out how this example of fidelity to a human command puts to shame those who are constantly disobedient to their God. To the Rechabites, on the other hand, he announces as a recompense that they shall never want descendants in the service of Jahweh.

3. This last expression shows that their manner of life amounts to a kind of service of Jahweh. For it is a protest against the whole system of culture connected with the settled mode of life, with the tilling of the soil, and, above all, with vine-culture. The life of the nomads in the steppes knew nothing of all this; it was exclusively devoted to the service of Jahweh, the God of the desert, who manifested Himself, above all, in storm and in battle, against the foes of His people. But,

since Israel had forsaken their tents and appropriated all the benefits of Canaanite culture, they had fallen a prey to the seductive influences which accompanied these, including not only luxury and intemperance, but even idolatry. The only way of escape from this lay in a resolute return to the pre-Canaanite manner, a renunciation of the false benefits of culture. And it cannot be doubted that this return was coupled at the same time with the rigid observance of the oldest ritual usages in the service of Jahweh, although, unfortunately, no information on this point has come down to us. In any case, this oldest type of anchoritism, on the part of a whole tribe, from religious motives, is something very peculiar, and demanding of appraisement: these Rechabites have as good a claim to be reckoned organs of genuine Jahwism as the *nēbī'im*. The explanation of the circumstance that it was *this* particular family that felt called on to protest against the cultivating of the fruit-land is perhaps to be found in 1 Ch 2⁵⁵, where Hammath, the [tribal] father of the house of Rechab, is reckoned among the Kenites. The latter are, according to Jg 4¹¹, the descendants of Hobab, the father-in-law of Moses. The Kenites who attached themselves to Israel at the Exodus (Jg 1⁶) continued even at a later period to live a nomadic life, partly in the Plain of Jezreel (Jg 5²⁴), partly in the extreme south of the country among the Amalekites (1 S 15⁶). The action of Jonadab may thus have consisted in recalling to the ancient nomad life that portion of his tribe which had adopted settled habits. True, before accepting this explanation it must first be proved that by the 'house of Rechab' in 1 Ch 2⁵⁵ is meant exactly the same family as in Jer 35². According to Neh 3¹⁴ one Malchijah the son of Rechab helped to rebuild the walls of Jerusalem. This seems to prove the continued existence of the guild in post-exilic times. But how can this Malchijah be called at the same time 'the ruler of the district of Beth-haccherem,' if he adhered to the tent-life enjoined by Jonadab?

5. **'Judges' and kings.**—If we include, finally, the 'judges' and kings of ancient Israel among the organs of genuine Jahwism, this is justifiable not only on the ground that all of them (down at least to David) were expressly chosen and called by Jahweh to be leaders and saviours of the people, but, above all, because they too were filled with the 'spirit of Jahweh' as a mysterious agency, and thereby were fitted for the performance of extraordinary deeds.

1. It is true that P is the first to tell us that Joshua, as a man in whom the spirit is, is consecrated by Moses to be his successor, by the laying on of his hands (Nu 27^{18f.}). On the other hand, the early 'hero-narratives' (and not merely the author of the present scheme to which the book is adjusted, e.g. 3¹⁰) in the Book of Judges are already aware that the spirit of Jahweh was powerfully at work in those heroes: so in Gideon (6³⁴), Jephthah (11²⁹), and frequently Samson (see above, p. 657^b f.).

2. In the case of the kings, however, the spirit is imparted by means of *anointing*.* This is expressly recorded for Saul (1 S 10¹), David (2 S 2⁴; the story of the anointing of David by Samuel in 1 S 16¹³ is a late *midraš*), Solomon (by Zadok, 1 K 1³⁹), and Jehu (2 K 9⁶). From the passage last cited, as well as from 1 S 10¹, it is evident that the anointing consisted of no mere smearing process, but of a pouring of oil upon the head. Of all the manifold interpretations of this symbolical action, that one has most in its favour which starts from the oil-libation. This, too, consisted in *pouring oil over* (e.g. the stone of Bethel, Gn 28¹⁵ 31¹³), and

* Cf. L. Gautier's art. 'À propos des Récabites' in *Liberté Chrétienne*, 15th June 1901.

* Cf. on this subject Weinl's art. 'Mashah [salben] und seine Derivate' in *ZATW* xviii. (1898) p. 1 ff.

imparted to the anointed object the character of something consecrated and sacrosanct. Both these features come out clearly in connexion with the anointing of kings. As one consecrated to Jahweh the king is called frequently 'my anointed,' or 'his [Jahweh's] anointed,' or even 'the anointed of Jahweh,' i.e. one who by anointing has been in a special manner assigned or consecrated to Him. On that very account the king is sacred, and hence it is a heinous sin 'to put forth one's hand on the anointed of Jahweh' (1 S 26^{9, 11, 23} of Saul, 2 S 19^{22 (21)} of David). A consecration rite, analogous to the oil-libation, is favoured, further, by the circumstance that the anointing is performed with 'holy' (i.e. used in the cultus for other purposes as well) oil; cf. e.g. Ps 89^{21 (20)}, with reference to David. Zadok in 1 K 1³⁹ takes not a but the oil-horn (filled with holy oil) out of the tent (of the sacred Ark) for the anointing of Solomon; and in 2 K 9¹ Elisha hands over a vessel of oil to the prophet who is to anoint Jehu, so that here again the use of any ordinary vessel appears to be excluded. In P, finally, the anointing of the sacred fittings and utensils (Ex 30^{26ff.}) is plainly an act of consecration, while in the case of the priests the terms 'anoint' and 'consecrate' frequently appear in parallelism (Lv 8^{10f. et al.}).

The efficacy of the anointing of kings is not, however, exhausted by the notions of consecration and the imparting of a sacrosanct character. The spirit of Jahweh is also communicated. This is plain already from the story of the anointing of Saul. Directly after it had been performed, Samuel announced to Saul (1 S 10^{5ff.}) that, when he should meet with the *nēbī'im* at Gibeah, the spirit of Jahweh would come upon him, and he would be changed into another man. And, when this comes to pass, it is not merely that Saul is infected by the example of the *nēbī'im*; for the spirit of Jahweh has been in him ever since his anointing,* and only waits for an external occasion to reveal itself. In 11⁶ the occasion is different, but the effect is the same. The melancholy of Saul is attributed in 16⁴ to the spirit of Jahweh (which had been imparted to him at his anointing) having departed from him, and an 'evil spirit'—likewise proceeding from Jahweh—having come in its place to trouble him.

In favour of the great antiquity of anointing, and its having been taken over by Israel from the Canaanites, is its mention in the Tel el-Amarna letters.† But it is a question whether on the soil of Jahwism it did not assume another, deeper religious significance. It is true that even here the efficacy of the oil is still thought of as not merely symbolical, but direct and physical—nay, as establishing a sacramental fellowship between the Deity to whom the holy oil is consecrated and the man who is anointed with it.‡ This view of the matter may have been borrowed from the Canaanites, but a specifically Israelitish origin may be confidently claimed for the connecting of the anointing with the bestowal of the spirit of Jahweh. This answers best to the idea of the spirit of Jahweh as the principle which shows its creative activity on all sides, and which gives birth to special powers—an idea whose many-sided development and application we owe undoubtedly to Jahwism alone.

* The author of the *midraš* in 16^{1ff.} understands this rightly when in v. 13 he makes the spirit of Jahweh come upon David 'from that day forward.'

† Cf. H. Winckler, *Die Thontafeln von Tell-el-Amarna*, Berlin, 1896, p. 99 (Letter 37 of Ramman-nirari to the Pharaoh), line 4: 'Behold, when Manahib(r)ja, king of Egypt . . . installed my grandfather in Nuhasši as king, and poured oil upon his head,' etc.

‡ Weinel, *loc. cit.* p. 54: 'When the priest at the holy place pours consecrated oil on the king's head, he conveys the material and character of holiness to him, and makes him a participator in Jahweh's superior life.'

3. It is clear that such a conception and religious estimate of the anointing of the king could not have taken root unless—at least at the outset—the monarchy had been considered a blessing, a gracious gift of Jahweh.* And this is, in point of fact, the standpoint of the early sources. Even if the 'shout of a king' in Nu 23¹ should be referred rather to Jahweh than to the earthly king, there is still left the weighty testimony of 1 S 9^{16f.}. According to this passage, Jahweh Himself commanded Samuel to anoint Saul: 'he shall deliver my people from the power of the Philistines, for I have looked upon the oppression of my people, since their cry for help has reached me.' A long course of unhappy experiences of the monarchy must have intervened before this conception could be expelled by the wholly different one which meets us in the later source (1 S 8, 10^{17ff.} 12). Here the earthly kingship is regarded as implying a denial of Jahweh, the true King—a falling away from the principle once laid down, according to Jg 8^{22f.}, by Gideon. It was said to have been with the utmost reluctance that Samuel at last yielded to the people's improper demand for a king. He did so at Jahweh's command, but not without warning the people that one day they would cry out in vain because of the king whom they had themselves chosen. The early conception knew of no such scruples. It was Jahweh Himself, according to it, that designed the monarchy; true, it was He also that brought about the unhappy disruption of the kingdom. For it was in His name that the prophet Ahijah of Shiloh foretold to Jeroboam I. the breaking off of the ten Northern tribes from Judah. Ahijah, as an Ephraimite, naturally represents here the standpoint which afterwards prevailed in the Northern kingdom: the real heir of the kingdom of David and Solomon is the kingdom of the Ten Tribes, which accordingly even retained the collective name 'Israel.' It is Judah that has broken off from it; hence the prayer in the Ephraimite Blessing of Moses (Dt 33⁷): 'Hear, O Jahweh, the cry of Judah, and bring him back to his people.' On the other hand, the Judahite view of the disruption of the kingdom is presented to us in Is 7¹⁷: it was a misfortune, a time of sorest distress for Judah, 'when Ephraim departed from Judah.'

At the close of this survey of the organs of genuine Jahwism we have still to refer to a circumstance which establishes an essential difference between the religion of Israel—even at this stage—and the other popular religions so closely allied to it in many respects. Apart from the priests, of whose anointing and consequent filling with the spirit no evidence can be adduced for the pre-exilic period, all other organs of Jahweh are fitted for the exercise of their office by the inward working of His spirit. Such a working on seers and prophets, throwing them into an ecstatic condition, is known to heathenism as well. But it does not know *that* working of the spirit of God which impels the 'man of God' to present himself before kings unsummoned, and by sharp condemnation of their sins to obtain satisfaction for outraged justice and morality. In this way Nathan and Elijah become forerunners of the prophets proper, and, long before the day of the latter, prove that Jahweh is always and for all members of His people an absolutely moral Being. To recognize this truth and to impress it on all is the main task of those whom the spirit of Jahweh has constituted His organs. Once more we have to ask:

* Cf. J. Boehmer, *Gottesgedanken in Israels Königtum*, Gütersloh, 1902; K. Budde, *Die Schätzung des Königtums im AT*, Marburg, 1903.

Is anything like this even remotely conceivable in the religion of a Chemosh or a Milcom?

v. *CULTUS AND MANNERS*.—1. In the matter of the cultus, some changes from the state of things in the preceding period must have been introduced in consequence of the above-mentioned taking over of the ancient Canaanite sanctuaries. The places of worship (or, what is the same thing for this period, places of sacrifice) are **high places** *bāmōth**, that is, primarily, the hills and rising grounds in the neighbourhood of the particular localities (so, e.g., 1 S 9¹³ 10⁵), but afterwards standing also for places of sacrifice upon mountains, such as the Mount of Olives, Mt. Carmel, Mt. Tabor, all of which are mentioned upon occasion as places of worship. Hence the Syrians speak (1 K 20²³) of Jahweh as 'a god of the mountains,' who can be combated with success only on the low ground (cf. also Gn 22¹⁴, if the correct rendering there is 'Upon the mountain Jahweh appears'). It was evidently a pre-Canaanite custom to complete the apparatus of a place of worship by providing, in addition to the altar, a *mazzēbāh* and an *'āsherāh* or sacred pole (see above, p. 620). Since the *mazzēbāh* was a pledge of the presence of the Deity, a *bēth 'ēlōhīm* or shrine containing a Divine image was not indispensable. Such 'high place temples' appear, it is true, more frequently in later writers in the catalogue of Israel's sins (1 K 13²², 2 K 17²⁹, 32 23¹⁹), but in olden times (as the medium for obtaining oracles) they are mentioned even apart from any connexion with 'heights.' In 1 S 9²², again, we read of a *liškāh*, that is, a room at the place of sacrifice, in which the sacrificial meal was eaten. A further evidence that *bāmāh* might stand also for the sanctuary erected on the height is found in the frequent mention (1 K 11⁷ 14²³ etc.) of building as well as (2 K 23⁸) pulling down the *bāmōth*. The last-cited passage shows, moreover, that a *bāmāh* might stand on quite a small (artificial) height, else *bāmōth* at the entrance of the door of Joshua the governor of the city could not be spoken of. On the other hand, 2 K 23¹⁵ shows that the *bāmāh* is not identical with the altar. The latter, as we see from Ex 20^{24ff.}, might be built either of earth (i.e., probably, sods) or of stones; but the latter, to avoid desecration, must not be dressed with iron tools. It was likewise forbidden to ascend the altar by steps, to prevent indecent exposure of one's person. Both these regulations are plainly intended by way of protest against innovations that had crept in, and in favour of the ancient simple ritual usages, which were as yet quite uninfluenced by art and higher culture. It may be added that Ex 20^{24ff.} is irrefutable evidence that the author of the Book of the Covenant knew nothing of the requirement of one central sanctuary.†

2. The central feature of the cultus continued to be *sacrifice*. The original significance of the latter (cf. above, p. 618), as the sacral communion of the offerers with the Deity and with one another, still finds its only expression during this period in the form of the common sacrificial meals,‡ of which

we have instructive instances in 1 S 14ⁿ and 9^{12ff.} According to the latter passage, the guests at the meal number about 30 persons, specially invited; and, before they begin to eat, a blessing is pronounced (something after the manner of our saying of grace) by Samuel (v. 13). According to 1 S 21^{3ff.}, the offerer himself killed the victim and boiled its flesh; but even the portion for the priests could not be taken till the portion of Jahweh, namely the fat, had been burned [on the altar]. There is no mention in this passage of a sprinkling of blood on the altar, but this is no doubt taken for granted; at all events, the eating of the flesh *with* the blood is regarded in 1 S 14^{32c} as a heinous offence.

Like the fat and blood of the meal-offering, the burnt-offering or whole-offering also falls completely under the category of a cheering *gift*, the presenting of food. This comes out very clearly in the offering which Gideon presents to the angel of Jahweh (Jg 6^{18ff.}). He calls it by the ancient name applied to every species of offering—*קָדָה*, 'gift' (cf. Gn 4^{3ff.}). It consists of a kid of the goats and unleavened cakes of an ephah [about 8 gals.] of meal. The [boiled] flesh is put by Gideon in a basket, and the broth in a pot. Then, at the angel's bidding, he lays the flesh and the cakes upon a stone [which, as in 1 S 14³³, takes the place of the altar] and pours the broth over them. The meal is now ready, and is consumed by the fire that comes out of the rock. In like manner, Manoah (Jg 13¹⁹) offers to the angel of Jahweh a kid of the goats, with the proper accompaniments, upon the rock [in v. 20 it is called 'altar'], as a burnt-offering (v. 23). Both offerings—that of Gideon and that of Manoah—would have been inconceivable to the ritual of P, and for that very reason they may be supposed to represent the sacrificial usages of the narrator's own time. It may be added that for the whole of this period burnt-offerings were the exception, although upon quite special occasions they might be presented in great numbers. Thus Solomon, at his accession, offered (1 K 3⁴) upon the 'great high place' at Gibeon 1000 burnt-offerings; and, at the dedication of the temple (8²⁴), found it necessary to consecrate the middle portion of the forecourt [as a place of sacrifice], because the altar was unable to contain all the burnt-offerings and the fat of the meal-offerings.

During this period there is no mention of other species of offerings* (apart from the fruit-offerings, which were presented at all periods [Ex 23¹⁹], amongst which must be included the regularly renewed 'shewbread' of the sanctuary [1 S 21⁵, 7]). As is shown by Gn 8²⁰, the burnt-offering serves also as a thank-offering, just as in 1 S 7⁹ (in the form of a sucking lamb) it is an offering with a propitiatory and intercessory aim. The same character belongs to the burnt-offerings presented by Saul (1 S 13^{9ff.} along with peace-offerings) as inaugural offerings before commencing his campaign against the Philistines, and David's offering at the threshing-floor of Araunah (2 S 24^{22ff.}). On the other hand, more general names are used to designate propitiatory offerings (1 S 3¹⁴ slaughter-offering and *minḥah*, 26¹⁹ *minḥah*). Regarding human sacrifices during this period, see above, p. 618^b f.; on the significance still retained throughout the whole period by the sacred Ark, see p. 628^{ff.}; and on the institution of the 'ban,' see p. 619^b.

latter term [sing. *shēlem*, Am 5²² only] is still disputed. The choice lies between 'peace [= safety]-offering,' i.e. in testimony of the peaceful relation with the Deity, and 'recompense- or thank-offering.'

* In 1 S 6³ *עֹלָה* is not a guilt-offering in P's sense, and in 2 K 12¹⁷ (16) it is not guilt- and sin-offerings in the proper sense that are spoken of, but money contributions which bear the names *עֹלָה* and *זָבַח*.

* Cf. Piepenbring, art. 'Histoire des lieux de culte et du sacerdoce en Israël' in *Revue de l'Hist. des Religions*, Juill.-Août, 1891; v. Gall, *Altisrael. Kultstätten*, Giessen, 1898 [where 106 names are discussed].

† The obvious contradiction with the Deuteronomic legislation is sought to be removed in the MT of Ex 20²⁴ by the reading *בְּכָל־מָקוֹם* ('in the whole place'), as if here too one central sanctuary were spoken of. But the whole context requires *בְּכָל־מָקוֹם* ('in every place'), and this was still read by the LXX (ἐν παντί τόπῳ).

‡ These are called sometimes simply *עֹלָה*, i.e. 'slaughter-offerings' intended to be eaten (Ex 13¹², 2 S 15¹² *et al.*), or *עֹלָהִים* (Ex 20²⁴, 1 S 11¹⁵ *et al.*), but also, using the complete expression, *zēbāḥim shēlāmim*, i.e. 'slaughter-offerings in the form of *shēlāmim*-offerings' (Ex 24⁵ *et al.*). The meaning of the

3. There are extremely few notices of *festivals*—a proof that even in this sphere custom rather than legal prescription was the ruling principle. (a) It cannot, indeed, be doubted that even the oldest form of the Decalogue contained a command to rest on the Sabbath (cf. also Ex 34²¹, in the so-called Jahwistic Decalogue), but it is noteworthy that in the Book of the Covenant (Ex 23¹², cf. also Dt 5¹²) it is enforced, not with religious but with humanitarian motives, such as care for the refreshing of cattle and ass, slave and *ger*. In the same source (23^{10f.}) we find already an approach to the keeping of a Sabbatical year: every seven years the fields, the vineyards, and oliveyards are to lie fallow—evidently, however, not all at the same time, but each in its turn—that the [spontaneous] produce may be for the benefit of the poor and the beasts of the field. It will be observed that here again the motive is humanitarian, not religious.

(b) Along with the Sabbath a special festival significance belongs to the New Moon (and that far beyond our period). From 1 S 20^{5ff.}, 24^{ff.} we see that the New Moon festivities even lasted for two days, being made the occasion of a common [sacrificial] meal, and at the same time that it was a favourite practice to present the year's offerings of whole families at the New Moon. In 2 K 4²³, again, it is assumed that the Sabbaths and New Moons (when riding-animals were available) were readily utilized for undertaking journeys to consult a 'man of God.' Further, Am 8³ shows that on Sabbaths and at New Moons there was a cessation, not only from field work but also from trade and the ordinary business of life.

(c) For the three regular annual festivals—apart, perhaps, from the Harvest festival—we have no real testimony for this period except the legal prescriptions in the Book of the Covenant (Ex 23^{14ff.}) and the almost identical text of Ex 34^{18ff.}. According to these, all males are to appear three times a year before Jahweh (i.e. at some sanctuary) with gifts. (a) The first of these is the Feast of Unleavened Bread (*Mazzôth*), which is to be held for seven days in the month Abib, the month when the grain passes into the ear. Here, then, the *Peşah* day is included in the *Mazzôth* festival (cf., on the original significance of each of these, above, p. 622*); but the prescription of 34^{19f.} regarding the presenting of the firstlings of cattle shows that in this code there must have been at one time mention of the *Peşah* as well.* The emphasis laid upon the month Abib as the month of the Exodus from Egypt is the first approach to a theocratic motive, i.e. one derived from the religious history of the people.—(β) The second occasion is the Feast of Weeks (i.e., as follows from Dt 16⁹, seven weeks after the beginning of the [barley] harvest), as the feast of firstfruits of the wheat harvest.—(γ) Thirdly, there is the Feast of Harvest, of the fruit and vintage, at the close of the year.

The Feast of Weeks and that of Harvest, as being purely harvest-thanksgiving festivals, were not possible till after Israel's entrance into Canaan. A trace of their having been borrowed from the Canaanites is found in Jg 9²⁷, where the vintage festival, under the name *hillâlîm* ('jubilant rejoicing') is celebrated by the [heathen] Shechemites. For Israel itself the Feast of Harvest is the only one for which we have historical testimony (Jg 21^{19ff.}, where it is celebrated by the maidens of Shiloh with dances in the vineyards; and in all probability also 1 S 1³). Hence it is often called simply *the Feast*, and that not only in

early passages like Jg 21¹⁹ and 1 K 8^{2, 65} (7), but even as late as Ezk 45²⁵.

There is as yet no fixed date for the festivals (apart from the general assignment of the spring festival to the month Abib).^{*} People were guided, as is natural in the case of harvest festivals, by considerations of weather and climate, and in consequence held the feasts at different dates in different places. This view is supported by the frequently recurring expression 'proclaim a feast,' i.e. invite to the keeping of it by intimating its date. The self-evident terms of Sabbath and New Moon needed no such intimation.

That the festivals in ancient times were, without exception, occasions of rejoicing is shown by a great many expressions: to celebrate a festival and to rejoice before Jahweh are practically identical notions. The suspicion of Eli (1 S 1¹³) and the stern denunciation of Isaiah (Is 28^{7f.}) prove that the sacrificial meals which (along with the dances, Ex 32⁵, Jg 21²¹; the religious dance, with musical accompaniment, of 2 S 6⁵ belongs to a different category) formed the culminating point of the festival, readily led to excesses. It was a still worse feature that immoral ritual practices were taken over from the Canaanites. In Hos 4^{13f.} fornication and adultery are evidently connected with the sacrificial meals at the high place cult under every green tree; and Am 2⁷ (like Hos 4⁴) refers to the evil of the *ḫēdēšôth*, or 'sacred [girls],' who, in accordance with a widespread practice of the heathen Semites, prostituted themselves in honour of the Deity. No less frequent is the mention of male *hierodouloi* (*ḫēdēšîm*). It cannot, unfortunately, be denied that, in spite of the energetic protests of the prophets and the prohibitions of the Law, the notion that such practices were reconcilable even with Jahwism must have been pretty widely prevalent in Israel. It is indeed mentioned to the honour of king Asa (in 1 K 15²²) that he expelled the *ḫēdēšîm* (whose presence is witnessed to as early as the reign of Rehoboam, 1 K 14²⁴) from Judah; yet not only do we hear of remnants of them under Jehoshaphat (1 K 22⁴⁶), but it is recorded of Josiah that (in the year B.C. 623) he broke down the houses of the *ḫēdēšîm* which were situated by the temple of Jahweh (2 K 23⁷). The latter statement permits of no other explanation than that this abuse was connected with the cult of Jahweh. The prohibition contained in Dt 23¹⁸ (17) might, if need be, be referred to *ḫēdēšîm* and *ḫēdēšôth* in the service of a heathen deity, but v. 19 (18) shows clearly that it was nothing uncommon to bring the earnings of these male [here called 'dog'] and female *hierodouloi* as a votive offering into the temple of Jahweh. This would, however, be quite inconsistent if we were intended to think of them as in the service of another god.

4. Outside the cultus proper stands communion with the Deity by seeking and obtaining *oracles*. We have repeatedly spoken already (e.g. p. 641 ff.) of the connexion of Divine images such as the *'ēphôd* and *tērāphîm* with the consulting of oracles. It is a question whether there was even then an inseparable connexion between the *'ēphôd* and the *Urim and Thummim* (such as in Ex 28³⁰, where the latter have their place in the oracle-pocket attached to the ephod of the high priest). The meaning of the names *'ûrim* and *tummîm* (אֲדָמִים וְתֻמִּיִּם) is as much disputed as the nature of the lots for which they stand. All that is

* There is a further interpolated mention of the *Peşah* in Ex 34²⁵, in the direction that the *Peşah* offering is not to be kept till the following morning. It is not clear, however, whether this refers to the flesh of the Paschal lamb.

* In 1 K 12³² Jeroboam I. is charged with having instituted a feast on the 15th day of the 8th month after the manner of the feast in Judah, but it is disputed whether this means that at that time the Feast of Harvest was celebrated even in Judah in the 8th month (instead of the 7th, as was the later practice). The fixing upon the 15th day (as in P) may be due simply to the author of this note about Jeroboam.

certain is that even in early times *'ārim* and *tummim* represented the sacred lot, which was handled only by priests: Dt 33⁸, 1 S 14^{36, 41} 28⁶ [where *'ārim* is no doubt merely an abbreviation for the complete expression *'ārim wəthummim*, as in Nu 27²¹ (P)]. The suggestion that *'ārim* expressed an affirmative (especially as to where guilt lay), *tummim* a negative, answer to a question, is favoured by 1 S 14⁴¹, where, in place of the corrupt MT, we are to read with the LXX: 'If this guilt be in me or my son Jonathan . . . let *'ārim* appear, but if it be in thy people Israel, let *tummim* appear.' As to the nature of these lots, we should probably think of small stones (cf. *gōrāl*, 'lot'; but properly, as the Arabic shows, 'pebble,' 'small stone'), which were shaken in an urn till one 'came out' (Jos 19^{14f}).

If an oracle was to be obtained, the applicant must be on good terms with the Deity. To one who is under the weight of guilt unatoned for, the oracle is silent. This happens even if it is not himself that has incurred the guilt (so in 1 S 14^{37f}, where Saul obtains no response because of the offence of Jonathan; and 28⁶, where Saul consulted Jahweh, but He answered him not, by dreams, nor by *'ārim*, nor by prophets). The man to whom guilt attaches is to all intents and purposes unclean, and, as such, is *ipso facto* excluded from any approach to God or handling of objects consecrated to Him. How far these prescriptions as to cleanness were carried (even without a written law), we see from the casual notice of 1 S 20²⁶, according to which a state of uncleanness excluded from participation in the sacrificial meal at the New Moon; and from 21^{5ff}, where abstinence from sexual intercourse is the condition of being allowed to eat sacred bread.* How deeply such considerations, enforced by religious usage, had impressed themselves on the daily life, could find no better illustration than that usage of language whereby the male population is divided into those who are admissible to, and those who are excluded from, the cultus,† the mention of both serving to express the totality (1 K 14¹⁰ 21²¹, 2 K 9⁸ 14²⁶, Dt 32²⁰).

5. In regard to the morality of this period, we must refer once more to what was said above (pp. 624³, 633) as to the power of *custom* in the earliest times. But, if it had to be assumed even there that custom was not altogether unconnected with religion, this holds in increased measure of the period preceding that of the writing prophets. It is very significant that in 2 S 12¹⁴ Nathan, after he has acted as the mouthpiece of the outraged popular conscience in calling David to account for his crime, discovers the special guilt of the king in the circumstance that by his action he has shown contempt for Jahweh.‡ This requires the death of Bathsheba's child as an atonement, although David has already been assured of the forgiveness of his sin.

* Cf. J. C. Matthes, art. 'De begrippen rein en onrein in het OT' in *Theol. Tijdschr.* xxxiii. 293 ff. [these are, according to him, 'cultus notions', an answer to the question, How am I fit to serve Jahweh?].

† This interpretation of נָצַר וְנִצָּר (lit. 'restrained and left free'), which is that of W. Robertson Smith (*RS*² 456: 'he who is under taboo and he who is free'), is to be preferred absolutely to the interpretations formerly current (such as 'bond and free,' or 'minors and of age,' or 'tribesmen and of no family' [for which A. S. Jahuda contends with much learning in the *Ztschr. f. Assyriol.* 1902, p. 240 ff.]). Cf. especially the expression used of Doeg 'נֶזֶרָה before Jahweh,' i.e. 'restrained' [as it were, in confinement], 1 S 21⁸ (7). So in all probability *'āzārāh*, 'a festal gathering' (Am 5²¹ *et al.*), means originally 'a state of being bound,' namely, by the obligation to certain forms of abstinence.

‡ So we should read with Lucian. The MT inserts 'the enemies [of Jahweh] before 'Jahweh,' and the (linguistically objectionable) interpretation is usually offered: 'because thou hast given the enemies of Jahweh occasion to blaspheme.'

We have all the less right to judge of the general condition of morality from isolated deeds wrought in passion, seeing that these were almost always condemned by contemporary opinion. The outrage wrought by Amnon on Tamar (2 S 13) is to be viewed as an instance of rape rather than of incest. Tamar herself contemplates the possibility (v.¹³) of being given by the king to Amnon as his wife, although she is his half-sister; while in Gn 20¹² it appears to be no way repugnant to E that Abraham's wife should be his half-sister Sarah. But Amnon's act was avenged by his murder by Absalom, who must have considered it a heinous offence. He thus carried out a species of blood-revenge, but, at the same time, exceeded the bounds prescribed by custom (just as Joab did when he treacherously murdered Abner, 2 S 3^{27f}), and had to expiate this by a lengthened term of banishment.

6. The truest reflexion of the manners and morals of our period is preserved, without doubt, in the stories of the patriarchs in Gn 12-50. In these figures we have a twofold presentation of types that are thoroughly true to life—in Abraham a kind of ideal of ancient Israelitish piety, in Jacob the empirical phenomenon of the ancient Israelite, with his virtues, but also with his shady side.* We may leave it an open question whether the Abraham-narratives in their present form were not developed a good deal later than those about Jacob-Israel, the type of the character of the people with the same name. In any case, both fall within the period with which we are dealing. Of both types it is pre-eminently true that their conduct is by no means actuated simply by custom, but quite expressly also by religious motives.

The whole life of Abraham, as related in both the ancient Pentateuchal sources, is viewed as a continued trial of his faith and obedience. With faith in the promise of Jahweh he leaves his fatherland and sets out for the unknown country afar; he acquiesces in the expulsion of Ishmael, and even shows himself willing to sacrifice his late-born only son. The latter narrative (Gn 22), even if it is based upon some cult-legend,† is, in its present form (cf. v. 1), the record of the last and severest trial of his faith to which Abraham was subjected by God. The brilliant manner in which he sustained the test is reckoned to him (v. 12) a proof of true fear of God. It is very remarkable that already in 15⁹ it is not an act, but simply trustful confidence in Jahweh that is counted to Abraham for 'righteousness,' i.e. a display of genuine piety. The Apostle Paul (Ro 4^{12f}) is perfectly entitled to find here the proof that the righteousness of Abraham is grounded, even in Genesis, in quite an evangelical fashion, upon no merit of works.

As in the case of Abraham, so in that of Jacob, in spite of his wholly different character, there are not wanting marks of that humility and resignation by which true piety and fear of God are characterized. So in the grand confession of Gn 32¹¹ (10) (J): 'I am not worthy of all the mercies and all the faithfulness which thou hast shown unto thy servant'; the expression of resignation in 43¹⁴, and the beautiful thanksgiving of 48^{11, 15f}. A counterpart is presented by the expression of profoundest resignation put in the mouth of David in 2 S 15^{26f}, and 16^{14f}. Again, what a high level of moral appreciation of the actions and fortunes of men is found in the words of Joseph (Gn 50²⁰), in

* We may leave Isaac out of account here, since, in comparison with Abraham and Jacob, he plays almost throughout a passive rôle.

† According to Gunkel (Com. on Genesis) it is the cult-legend of the place of sacrifice at Jeruel, and is intended simply to explain how the former practice of child sacrifice had been superseded by the offering only of rams.

which he, as it were, sums up his own and his father's fortunes: 'Ye, indeed, meant evil against me, but God has turned it to good, to . . . save much people alive.' To recognize that God makes even the sins of men serve His purposes, without thereby lessening in the least their moral responsibility, is the only solution that is worthy and satisfying, from the point of view of religion, of the seeming contradiction between the universal activity of God and the moral freedom of man; and it is not the smallest of the evidences of a Divine factor in the religion of Israel, that even at so early a period it had discovered this solution.

Other features that are honourable to Abraham, such as his ready hospitality (Gn 18^{1ff.}; cf. its still more striking exhibition by Lot, 19^{1ff.}), may be best put down to the credit of custom. On the other hand, we are certainly true to the intention of the narrator if we ascribe to religious principle his peaceable attitude and disinterestedness (Gn 13^{7ff.}), as well as his unwearied intercession even for the wicked inhabitants of Sodom (18^{23ff.}).

7. All the above evidences of a high moral standpoint in the patriarchal narratives appear to be little in harmony with the serious moral defects and transgressions which are recorded without a word of censure. Abraham lies (Gn 12¹³ 20²; so also Isaac, 26⁷) in passing off his wife as his sister; Jacob artfully deceives his twin-brother Esau in order to obtain the blessing of the firstborn, and his uncle Laban in the matter of the increase of his herds. Does this not justify the conclusion that God has two standards of measurement; that the Israelite in dealing with the foreigner, the chosen of God in dealing with the rejected, may go any length without its being counted to him a sin?

(a) If the above question is to be correctly answered, two things must be taken into account. Firstly, as a matter of fact, it is one of the principles of ancient ethics, from which even Israel freed itself only with difficulty and slowly, that towards a stranger the same moral obligations do not hold that apply in dealing with a fellow-countryman. In particular, cunning and deceit in the former case are not liable to the same condemnation as in the latter. They appear rather in the light of a duty of self-defence, especially as one has to look for nothing but damage and defrauding at the hands of a stranger, whenever he has the power to inflict harm. But, again, the idea of the national god involves (at least for the older naïve conception) his taking the part of his own people against the foreigner, and protecting them without scruple not only in their rights, but wherever their interests are concerned. So Jahweh acts in relation to Pharaoh (12¹⁷), and, according to 20¹⁷, towards Abimelech.

Secondly, however, and closely connected with the above, what we have really to do with, at least in the Jacob-narratives, are not the actions and experiences of individuals, but the relations of one people to another, namely, of Israel towards the Edomites (Esau) on the one hand, and the Arameans (Laban) on the other. The Esau-narratives are the naïve deposit of the reflexions of very early times as to why the brother who was notoriously the firstborn, *i.e.* who attained to a settled life and to importance sooner than Israel, was yet surpassed by the younger. From the Arameans, again, Israel had from olden times experienced so much hostility that we can readily understand how the cheating of the greedy Aramean by Jacob should have been regarded as quite right and proper, and the exercise of this right have formed the subject of unmitigated rejoicing.

(b) Notwithstanding all this, however, we must still ask the final question, Is it really the case

that the above-cited instances of morally objectionable actions are recorded without a word of censure or disapproval? First, then, it may be observed that in this matter the E source, in opposition to or at least deviating to some extent from J, repeatedly offers a narrative in which the cause of offence, if not wholly removed, is made as slight as possible. This is a proof that at least towards the end of our period a finer moral sensitivity had come in to sit in judgment on those ancient narratives. Sarah is, according to E, really Abraham's sister on the father's side (Gn 20¹²), so that Abraham is cleared of the charge of lying. It is only with great reluctance, and not till he has received the express command of God, that Abraham consents to the expulsion of Hagar and Ishmael (21^{1ff.} [E]; contrast 16⁸ [J]). In the transactions of Laban and Jacob, it is not the latter, but Laban alone, that is guilty of deceit and violent dealing (31^{4ff.})*. Reuben advises, indeed, that Joseph be cast into the empty cistern, but it is with the intention of delivering him. Joseph's brothers did not sell him (as J records), but he was stolen out of the cistern by a passing company of Midianites (37²², 23b-24, 25a c. 26f., 40^{15a}).

(c) But there is yet another fact to be taken into account. It has been rightly noticed that it is the peculiarity of a particular form of narration in the legendary history to avoid passing any direct judgment upon the transactions described, but to allow this judgment to be expressed indirectly by one of the parties concerned. Thus Abimelech in Gn 20^{9f.} (E) severely condemns the conduct of Abraham, and in 26^{9f.} (J) that of Isaac. In 27¹² Jacob himself declares that by imposing upon his father he will exhibit himself in the light of one who mocks at sacred things, and who thus deserves a curse and not a blessing.

8. But, in addition to the narratives belonging to this period, the oldest codification of legal ordinances, the so-called Book of the Covenant, also contains notable evidences of a moral disposition, which could have grown up only upon the soil of a considerably elevated religious system. True reverence for parents regards it as an offence worthy of death to strike or to curse them (Ex 21¹⁵, 17). In dispensing justice the strictest rectitude and impartiality are to be observed (23^{1f.} 6f.). Mildness and pity are due to the poor (22^{25a}, 26f.), protection from harsh treatment and violence to the *ger* (22²¹ 23⁹) and even to the slave (21²⁰, 26f.); the latter is even to be let go free if his master have struck out a tooth. The Sabbath is to be pre-eminently a day of rest for cattle, menials, and *gerim* (employed as hirelings). As to the command in 23^{4f.} to take back to an enemy his ox or ass when they have strayed, and to help him to raise up an ass that has sunk under its burden, this does not, indeed, as yet amount to the Christian command of love to one's enemy, but it is a first step towards it. For it demands a subduing of carnal hatred and malice, a self-denial of which the natural man and natural ethics know nothing, but which is required by that God who watches the conduct of His people and seeks to redress every species of wrong and oppression. For, evidently, it is not only of the poor that the saying (22²⁷) holds good: 'When he crieth unto me, I will hear him; for I am pitiful.'

Since the discovery of the diorite block with the code of the Babylonian king Hammurabi (see art. CODE OF HAMMURABI in present volume, p. 584 ff.), many hands have been busy seeking to demonstrate

* It was quite a perverse attempt that was made by the older harmonizers to remove the contradiction between 31^{4ff.} [E] and 30^{3ff.} [J] by assuming that in 31^{4ff.} Jacob tells a false story to his wives. The fact is that we have here E's account of things, which is meant to be taken seriously, and which completely clears Jacob of blame.

not only the considerable priority (c. 2300 B.C.) of this law-book to the oldest codification of laws in Israel, but even its higher standing in all matters of justice and social order. We readily admit that the laws of Hammurabi imply much more complicated conditions of society than the enactments of the Book of the Covenant, which are intended for a simple race of peasants, and that, consequently, the juridical technique of Hammurabi may frequently exhibit a higher level. A fair estimate of the two codes is reached, however, not by comparing the matter which they have in common, but by looking at the sayings where the Book of the Covenant has the advantage over the Babylonian code. But these are the sayings to which we have already adverted, regarding the poor, *gêrim*, slaves, and enemies, and for parallels to them we may search the 282 paragraphs of Hammurabi in vain, because such are impossible on the soil of natural religion.

vi. **ANTHROPOLOGY AND THEORY OF THE UNIVERSE (WELTANSCHAUUNG).**—Under this twofold heading we propose to treat of everything which, according to modern views, constitutes the scientific standpoint of a period, but which to ancient, and especially to Israelitish, notions is so closely connected with religion that it cannot be passed over in a history of religion. This means that we are concerned, on the one hand, with the anthropological or psychological notions of this period, including conceptions of the state after death; and, on the other hand, with the ideas that were cherished as to the origin and purpose of the universe, the relation of man to the brute world, the opening period of the world's history, and the future goal towards which the present course of things is moving. As elsewhere, the notions about all these things meet us, not in didactic statements but in the guise of narrative (so, especially, in the J portions of Gn 1-11), or in casual notices. The latter almost always take for granted that the notions in question are universally known, and hence refrain from fuller explanation or description. Unfortunately, this leads to our being left in the dark on many an important question.

1. The drawing of a distinction between two main constituents of the human *personality*—one bodily and one spiritual—must have set in as soon as men came to realize the fundamental difference between a living and a dead body. (a) The corporeal being, at least immediately after death, was quite the same as before. What had been the seat of the life which had now taken flight? The readiest reply was: the *breath*. Observation shows that, when the last breath has been drawn, the life disappears; while, conversely, the revivification of one that is dead is accomplished through the breath returning into him (1 K 17^{24f.}). * Alongside of this we encounter another conception, which is also deeply rooted, namely, that the seat of life is to be found in the *blood*. It is true that express statements to this effect do not occur till much later (Dt 12²³, Lv 17¹⁴); but the very ancient pro-

hibition to eat blood (1 S 14^{32ff.}) must have been due in ancient Israel, as elsewhere on heathen Semitic soil, chiefly to the fear of absorbing another life along with the blood. Under special circumstances, indeed (as, for instance, at the sacrificial meals of brotherhoods in pre-Mosaic times; cf. above, p. 618^b), this result might be desired; but in the realm of Jahwism, as far back as we can trace the evidence, such a practice was excluded. It may be added that the conception of the blood as the seat of life must have rested on the observation that, as the blood pours from a wound, the powers of life sensibly diminish, and at last disappear entirely—an observation which could always be made afresh when animals were slaughtered. We shall have to speak afterwards of the importance for the theory of sacrifice which this view of the blood came to assume in the latest period of Israel's history.

(b) For the period with which we are dealing, another question seemed more important, namely, that as to the *origin* of the breath of life, upon whose presence or absence the life or death of the body depends. The answer which the Old Testament gives to this question, and which forms the basis of OT psychology, is connected most intimately with the religion of Jahwism, or, to be more precise, with its notion of God. But our discussion of this point must be preceded by a remark of a general character. Almost all the accounts of so-called Biblical Psychology * are vitiated by the introduction of dogmatic prejudices, and the attempt to read into Scripture a finished system of one's own, instead of closely studying the usage of language. Especially unfortunate has been the attempt to discover in both Testaments exactly the same point of view, whereas the psychology of the OT has for its basis a dichotomy, that of the NT for the most part a trichotomy.

Keeping now to the exact terms of the fundamental and principal passage, Gn 2⁷, we learn from this, in the form of narrative, that Jahweh at first formed a man [proleptically for 'a human body'] from clods [not 'dust'] of the field, and then breathed into his nostrils breath of life, so that man became a living being. In view of this, there can be no doubt that Gn 2⁷ assumes a dichotomy in man's personality. As far as concerns his bodily substance, man is earth, and must accordingly return at death to the earth (3¹⁹). But his breath of life emanates directly from an inbreathing of that of God, and ceases at the man's death, when God calls back this His spirit of life to Himself. We must not, however, think of the 'return of the spirit to God who gave it' (Ec 12⁷) after the manner of the Christian hope of immortality, as if it meant a passing of the individual spirit to be with God, but only as a reabsorption in the creative Divine spirit which pervades the whole Universe. We should even be reminded here of the pantheistic doctrine of the world-soul, were it not that any such thought is excluded by the OT conception of God which lays such emphasis on His living *personality*.

* The clearest evidence of the identification of breath and life is found in the circumstance that in Hebrew, as in other languages (cf. Sansk. *âtman* = 'breath,' 'spirit,' 'soul'; Gr. *πνεῦμα*, orig. = 'breath,' 'blowing'; Lat. *animus* and *anima*, *spiritus*), the notions of 'breath,' 'wind,' 'soul,' 'spirit' are expressed by one and the same word. Thus רִיחַ is at once the name of the wind which dries up the waters of the Flood (Gn 8¹), and of the Divine breath of life which, at the Creation, hovers over the waters (1²), and of the breath of life within man. In like manner it is true of the Heb. נֶפֶשׁ that it may designate at one time the breath, at another the spirit of life within man, the soul and its functions (e.g. longing or eager desire for something); but it may also stand simply for life itself, and, finally, even for the living being or (in the case of men) the person; nay, by a loose kind of usage, it may mean even 'the person of one who is dead,' or, without the genitive, a 'corpse' (Lv 19²⁸ 224 *et al.*). It is, of course, a glaring error, but a deeply rooted one, to give to *nephesh*, in all these manifold senses, the one uniform rendering 'soul.'

* Of the special works on the subject, Beck's *Umriss der biblischen Seelenlehre* (Stuttgart, 1843, 3rd ed. 1871) is based partly on Roos' *Fundamenta Psychologie ex Sacra Scriptura collecta*, 1769 (Germ. tr. 1857, under title *Grundzüge der Seelenlehre aus der heiligen Schrift*). Wörner in his *Bibl. Anthropologie* (Stuttgart, 1887) builds largely upon Beck. Franz Delitzsch's *System der bibl. Psychologie* (Leipzig, 1855, 2nd ed. 1861) is not without a certain mixture of theosophy. More impartial are the accounts of Wendt, *Die Begriffe Fleisch und Geist im biblischen Sprachgebrauch* (Gotha, 1878), and Westphal, *Chair et esprit* (Toulouse, 1885). J. Köberle's *Natur und Geist nach der Auffassung des AT: eine Untersuchung zur historischen Psychologie* (Munich, 1901) is a very thorough and valuable discussion of all questions relating to the conception of the external world and the life of the human soul, the attributing of a soul to nature, mythology, and the notion of the spiritual, together with the influence of religion upon all this.

(c) Not only human but also animal life in general depends upon the possession of the Divine breath of life. Passages like Ps 104^{29f} and Job 34^{14f} leave no doubt on this point: Jahweh is a 'God of the living spirits of all flesh' (Nu 16²² 27¹⁶). Accordingly, the question presses itself upon our attention: What, then, is the precise difference which under all circumstances must be assumed to exist between man and beast? It is not in the manner of their origin that the difference lies, at least according to J. While P (Gn 1^{20f}) makes water-animals and birds spring into being at the simple fiat of the Creator, and land-animals proceed from the earth, J (2¹⁹) records a forming process exactly as in the case of man (v.7), that is to say, an individual creation of the animals. In the case of the latter, however, he makes no mention of an animating by the in-breathing of the Divine breath of life, and in this alone—even if we must assume here the result of reflexion on this question—the distinction between man and beast may be seen: man received the breath of life immediately from God, and on that account he has a far more direct share in the Divine being and life than the animal, in whose case nothing more than a general animating (of the whole species) is assumed. By the theory that the man first formed was directly animated by God, expression was given to the perception which—although without a clearly defined philosophic terminology—had evidently established itself at an early date, that man alone possesses individuality, and is therefore a being capable of individual communion with God, whereas the animal always represents only an example of its species.—J, however, gives expression in another way to the notion of the inferiority of the animal world to man when (Gn 2^{19f}) he quite unambiguously describes animals as having been created on man's account and named by him, with the result, however, that there could be found among them none corresponding to man, and thus suitable to be a 'help' to him.

(d) From God's direct animating of the first created human being we are not, however, to infer that the same thing is presupposed for each particular human individual. The OT has been wrongly burdened with this so-called 'Creationism,' which supposes God to create a special soul for every newly begotten body, and to unite it about the 40th day with the embryo. On the contrary, the OT from first to last is based upon 'Traducianism': he who begets the body implants at the same time the germ of the life or the soul. Otherwise, the view would be impossible by which the OT is unquestionably dominated, that through the process of generation even moral weakness, the inclination to sin, passes as an inheritance from parents to children. This is not 'original sin' in the sense in which it is mostly taught in Protestant confessions, namely, as implying the imputing of the guilt of Adam to all his posterity, but original sin in the more general sense, according to which that term is applied to the strong and almost irresistible inclination to sin, which appears to be inseparably bound up with human nature as such, and consequently looks as if it were the result of descent from parents of like disposition. Thus it is intelligible why allusions to this hereditary sinful disposition are introduced for the most part as furnishing a motive for the forgiveness of sin. In view of the fact that 'the imagination of man's heart is evil from his youth' (Gn 8²¹), God cannot apply the strictest standard of judgment. In addition to Ps 51⁷⁽⁶⁾ ('Behold, in guilt was I born, and in sin did my mother conceive me'), the *locus classicus* for this doctrine of the *natal* quality of sin, we have to take specially into account for the

same purpose Job 14⁴ ('How could a clean come from an unclean? Not one.') 15¹⁴ 25^{4ff}—late passages, but manifestly intending to express nothing more than is meant already by J in Gn 8²¹.

In the last-cited passages from Job the question is put, 'How can one born of woman be pure [before God]?' this shows how the connexion between descent and sinfulness was more precisely thought of. The latter as moral weakness is the natural result of the *physical* weakness of the body. Man is in the narrower sense the offspring of woman, the weaker vessel and the one more exposed to physical hardships. From her, man inherits moral as well as physical (Job 14¹) weakness.

(e) In view of all this, it might have seemed natural that the material substratum of human personality, the *flesh* or the *body* [the Heb. נֶפֶשׁ may stand for either], should be regarded as the seat of sin, just as the NT σάρξ undeniably has this collateral notion attached to it. But, in spite of appearances such as arise from Gn 6³, it is wrong to conclude that such a view was held. It is true that the flesh or the body, in consequence of its origin from the earth, is a type of the decaying and transitory (cf. the characteristic contrast in Is 31³ 'Their [the Egyptians'] horses are flesh, and not spirit'), and this thought attaches itself almost always to the very frequent expression 'all flesh' (i.e. either all men or all earthly living creatures). But the truth that the flesh, although an occasion also of moral weakness, is not thought of as *per se* sinful and therefore unclean, is unmistakably implied in the circumstance that in sacrifice it was used as a gift to God, and such a gift could never have been in itself unclean.

(f) The habit already mentioned of putting upon the OT a trichotomous view of human personality was due almost entirely to a false conception of the *nephesh* (נֶפֶשׁ commonly tr. 'soul'), and of its relation to the *rûah* (רוּחַ commonly tr. 'spirit'). This distinction between soul and spirit naturally caused the actually existing dichotomy of body (or flesh) and spirit of life to be missed. The real state of things is as follows. As long as the Divine breath of life is outside man, it can never be called *nephesh* but only *rûah* (more completely *rûah hayyim*, i.e. 'spirit or breath of life,' in which sense we find also *nishmath hayyim* used [e.g. Gn 2⁷]). On the other hand, the breath of life which has entered man's body and manifests its presence there may be called either *rûah* or *nephesh*. The two alternate in poetical parallelism in such a way that the same functions are attributed at one time to the *nephesh* and at another to the *rûah*. This, indeed, has not prevented its coming about that in certain expressions usage has established only one of the terms, or has at least secured a preference for it. Further, it may be noted that both very frequently stand in parallelism with לֵב ('heart,' 'disposition,' also 'understanding or insight,' the heart and not the head being with the Hebrews the seat of intellect). But in no case should that use of *nephesh*, whereby it stands for particular functions of the soul or even for a complex of these, be confused with its signification of 'person or living being' (and even 'corpse'; cf. above, p. 665ⁿ). In this latter sense *nephesh* could never have its place taken by *rûah* or *lêbh*.

The religious significance of the anthropological views represented by the above-described dichotomy is at once apparent. Everything which in any way can be recognized as spirit and life is brought into direct relation to God, and has its origin in Him, and Him alone. The Pauline saying, 'In him we live, and move, and have our being' (Ac 17²⁸), corresponds exactly to the postulates of OT psychology. The latter proceeds so

consistently in its derivation of *all* human thought and will and action, that it speaks not only of a 'spirit' (*rûah*, i.e. in this instance the same as 'principle,' 'disposition,' or even 'capability for') of wisdom, knowledge, and fear of God (Is 11²), or of skill in art and expertness (Ex 28³), but even of a spirit of jealousy (Nu 5¹⁴), of dizziness (Is 19¹⁴), of deep sleep (29¹⁰), etc. Moreover, this spirit is frequently (so in the two passages from Isaiah) spoken of as directly sent by Jahweh. He causes an 'evil spirit,' i.e. a spirit of discord, to come between Abimelech and the Shechemites (Jg 9²³), and in like manner lets an 'evil spirit,' i.e. a spirit of melancholy or of insanity, take possession of Saul after the departure of the spirit of Jahweh (1 S 16¹⁴).^{*} In this theorem of the universal activity of the spirit, and indeed of the spirit emanating directly from God, we have one of the strongest evidences of the living character and dignity of the ancient Israelitish conception of God. The latter did not take its rise as a result of the preaching of the prophets. The prophets, on the contrary, found it ready to their hand, made large use of it, and, wherever necessary, deepened it and cleared it of excrescences.

The question as to the nature and the components of man's personality was one that could not fail to engage the attention of ancient thought in other quarters as well. Along with the observations which point to its answer, it always forced itself afresh to the front, and in particular exercised an influence even upon the formation of speech. But nowhere did the attempts to solve the problem stand in so close a relation to religion as was the case in Israel.

2. It is otherwise with those questions belonging to the realm of psychology which relate to the *destiny of man*, the goal of the development of humanity or of one particular people. Questions of this kind presuppose a greater advance of thought, and, above all, a rich historical experience. Reflexions on his destiny are quite beyond man in a state of nature; and, even where a commencement has been made with political and social order, he holds to empirical results, without inquiring after the *Whence* and the *Why*. To belong to a particular people with particular settlements and under the protection of a particular national god, is as much a matter of course to him as to have an occupation by which he procures a livelihood. But what is remote from the reflexion of the individual already occupied the popular mind collectively in primeval times, and led to those profound speculations which meet us to-day in the form of the myth, i.e. the clothing of speculative thoughts in history. The people of Israel are no more strangers to such myths than are other nations, and in this particular they have conformed to the course which we may observe in the case of *all* ancient peoples: they have taken over from prehistoric times a store of myths and legends, to which they have then given a particular development on their own soil, subjecting them in part to transformation. The manner in which this has been done gives the most valuable indications as to the inmost character of the popular mind. And here we come face to face with the fact that in this point Israel holds a unique position. The myths taken over from foreign heathen soil have been so transformed and filled with truly religious contents that they have become for all time a part of the revealed religion of Israel. For we cannot consent to regard such

a transformation as if it were merely the accidental result of the inward impulse which drives men to religious and philosophical speculation, but as a fruit of the spirit of God working in Israel as the people of revelation. And the circumstance that the spirit of God resorted to this clothing of the profoundest religious thoughts in the form of childlike naïve narratives, appears to us so far from being a cause of offence that we see in this accommodation to the human understanding an evidence of superior Divine pædagogic and wisdom. (a) This remark applies in a very special manner to that myth which first concerns us here, namely, the story of *Paradise* and the *Fall* (Gn 2 and 3); for this is intended to answer the question as to man's original destiny and the reasons for his actual condition now. While the derivation of the Biblical story of the Fall from a Babylonian source^{*} is as yet unproved, in spite of numerous attempts to establish it, its connexion with the parallel narrative in the Zend religion does not admit of any doubt. That the latter, moreover, is not a later corruption of what, according to the orthodox conception, is the strictly historical narrative of the Bible, is evident from the simple fact that the dualistic basis (i.e. the opposition, essential to the Zend religion, between a good and an evil deity) manifestly played a ruling part in the original narrative. The Hebrew narrator, whose conception of God left no room for this dualism, has got rid of it only by the difficult expedient of making the serpent (which in the Zend religion is the embodiment of the evil deity) a creature of God, like all the rest of the animals. In this way, indeed, the question remains unanswered how this creature of God comes to step out of the ranks of the rest and to assume a hostile attitude towards the Creator.

We shall make no attempt here at an analysis of the narrative as a masterly, unsurpassed account of the origin of sin. We remark only that we cannot, with many moderns, find its deepest meaning exhausted by setting it down as a description of how sin comes into being in the case of *every* individual, or of how man *rose* from a condition of primitive rudeness and unconsciousness to conscious freedom and culture. On the contrary, Christian dogmatics was and is quite within its right in discovering in Gn 2.3 an account of a Fall, i.e. of the origin of sin and the consequent woes of the world. Man's original state, according to the Divine will, was one of undisturbed fellowship with God, who also had His dwelling-place within the sphere of man's abode, the Garden of Eden. The root of sin is pride, which wilfully seeks to go beyond the bounds prescribed by God, and produces disregard of His clear prohibition. But the fruits of disobedience are the loss of the former intimate communion with God, expulsion from His home, a life of endless toil and trouble, and at last death in place of the eternal duration of life that was formerly open to him. This myth has been called a lament over the loss of Paradise, and has been set in parallelism with the Greek myth of the Golden Age. There is justification for both these ways of looking at it. But with all this the main point must not be overlooked, namely, the em-

^{*} There appears to be no doubt that the conception of Paradise with its four rivers is borrowed from Eastern (? Babylonian) myths, and that the description of the rivers (Gn 2⁹⁻¹⁴) is a later insertion in the early narrative. With regard to this insertion (not to the whole myth) Stade may be right in holding (art. 'Der Mythos vom Paradies, Gn 2. 3, und die Zeit seiner Einwanderung in Israel' in *ZATW*, 1903, p. 172 ff.) that it was not adopted prior to the middle of the 8th cent. B.C. The description of Paradise possesses religious interest only in so far as it serves as a preparation for the story of the Fall (see below); for our present purpose everything else may be left out of account.

^{*} From the standpoint of trichotomy this would have to be expressed something to the effect that reason forsook him, while the functions of the 'soul' continued unimpaired. But the point is that no such distinction between *rûah* and *nepesh* is known to the Hebrew mind.

phasis which is laid in the Biblical record on the fateful significance of sin and its worst consequence—exclusion from the Garden of Eden, i.e. from communion with God. Here we have not only—as happens elsewhere so frequently in myths—forebodings, but actual perceptions of a profound religious character, to which cognate myths of other nations present no parallel.

(b) We remarked above that questions as to the nature and destiny of man are far below the horizon of individual reflexion in the primeval history of a people, and arise only when a higher stage of development has been reached. One exception, however, must be made. This relates to the question, *What befalls man at last after the death of the body?* Hitherto we have only touched lightly upon this question, in speaking of possible survivals of Animism in the pre-Mosaic religion of Israel. We there (see above, p. 614*) found that the belief in the existence of shades or 'spirits of the dead' must have found strong and peculiar support in the appearances of the dead in dreams. But here we have to do with the whole circle of conceptions that centre about *Shē'ōl** or the under world, the place of assembly of the dead. The reason why we have not discussed these earlier is simply because it is not till the period with which we are dealing that the mention of *Shē'ōl* is demonstrable, and because we have no sure ground for attributing the *Shē'ōl*-belief to the Mosaic, not to speak of the pre-Mosaic, period. There is nothing impossible in the supposition that it was found as early as that, but the view is equally open to us that this whole circle of conceptions was first encountered by Israel upon Canaanitish soil and thence taken over by them. Support for this view might be found in the circumstance that necromancy, which stands in the closest connexion with the *Shē'ōl*-belief, also came under the notice of the Israelites for the first time, to all appearance, in Canaan. This does not prevent our tracing its origin in the last resort to Babylon.†

Now, it cannot be proved that the Babylonian influence first made itself felt, as is so often asserted at present, in the time of Solomon. On the contrary, the earliest notices of *Shē'ōl* (Gn 37³⁵ 42³⁸ [in almost identical terms in 44^{20, 31}], Nu 16^{30, 33}, all probably J) certainly leave the impression that we have here to do with a conception universally familiar, and hence requiring no more precise description. From the early passages nothing more can be gathered than that *Shē'ōl* is thought of as a subterranean space, for one 'goes down' to it. Yet it cannot be doubted that the other two constant characteristics of *Shē'ōl*—the thick darkness which prevails there, and the impossibility of returning thence—were connected from the first with its conception.‡ But detailed descriptions belong one and all to later times, even to the latest of all, § and it is difficult to say whether (as,

for example, in the bold picture of Is 14^{9ff.}, or the approach to a distinguishing of a Tartarus within the under world in Ezk 32²³, Is 14¹⁵, also (?) Hos 13¹⁴) they are to be set down to the account of foreign influence or of independent poetic imagination. The decision between these two possibilities is all the harder because of the way in which the conception of *Shē'ōl* is constantly mixed up with pictures derived from the rest of the grave. But this does not justify the view that by *Shē'ōl*—at least originally—nothing more was meant than the grave. No doubt, the idea of a place of assembly of the dead would derive ever fresh nourishment from the contemplation of the roomy cave-tomb in which perhaps a whole tribe of contemporaries were buried.* It was all too natural to think of those who had been united in life as still holding converse with one another there. But passages like Gn 37³⁵ exclude the thought of any fellowship in the grave.

The question, what part of the man goes after death into *Shē'ōl*, cannot be answered from the standpoint of the dichotomy of the OT, which has been already described. For the body is laid in the grave and falls a prey to corruption. The breath of life returns to God, and with its separation from the body the man ceases to be a *nephesh* or living being. In spite of all this, it is everywhere taken for granted that at death an indefinable somewhat of the personality descends to *Shē'ōl*, and there—not exactly *lives* on, but—*vegetates* on. This can be explained only by assuming that the old conception of *Shē'ōl* had already taken firm root when that view of man's nature originated which subsequently became the prevailing one, and which was irreconcilable with this conception. The dichotomous theory plainly belongs to Jahwism, while the other conception is a relic of pre-Jahwistic or ex-Jahwistic influences, and is nearly allied to the Greek belief in *manes*. At a man's death a kind of image or outline of the whole personality detaches itself from the corpse. It wants blood, and hence it is without real life (which has its seat in the blood), it is invisible,—save when it appears in dreams or is called up by necromancy,—and it is for ever chained to *Shē'ōl*. It cannot be proved that the condition and appearance of the shades were thought of as exactly the same as those of the man at the moment of death, and that it was on this account that there was such a dread of mutilations of the body. The mention of Samuel's mantle in 1 S 28¹⁴

specially: F. Böttcher, *De inferis rebusque post mortem futuris ex Hebræorum et Græcorum opinionibus*, vol. I. (embracing only the Heb. part; no more appeared), Dresden, 1846 (although in many respects antiquated, still of value as a commentary upon the relevant passages); B. Stade, *Über die ältest. Vorstellungen vom Zustand nach dem Tode* (Leipzig, 1871); A. Bertholet, *Die israel. Vorstellungen vom Zustande nach dem Tode* (Freiburg, 1899); R. H. Charles, *A Critical History of the Doctrine of a Future Life in Israel, in Judaism, and in Christianity: or Hebrew, Jewish, and Christian Eschatology* (London, 1899); L. Aubert, art. 'La vie après la mort chez les Israélites' in *Rev. de Théol. et Philos.* 1902, p. 140 ff.; G. Beer, art. 'Der biblische Hades' in *Theol. Abhandlungen zu Ehren H. J. Holtzmann* (Tübingen, 1902). Cf. also the works of Schwally, Frey, Grüneisen, Matthes, cited above (p. 614*, note), in speaking of the controversy as to Animism and Ancestor Worship.

* This is undoubtedly the origin of the pretty frequent expression 'gathered to his fathers' (also 'to his people or to his fellow-tribesmen') or 'go to or be laid with his fathers' (Gn 25⁸ 35²⁹ 49^{29, 33}, Dt 32⁵⁰, Jg 21⁰, 1 K 21⁰). But the employment of this formula in the case of Abraham, Moses, and Aaron, as well as David, shows that it was used also in a wider sense, namely, of going to *Shē'ōl*. The importance attached to the mingling of one's bones with those of relations (2 S 21^{13a-c}) is sufficiently explained by the fact that this seemed the most honourable and at the same time the safest form of obsequies. On the other hand, the denial of sepulture was regarded as a great misfortune (cf. 2 S 21¹⁰, Jer 22¹⁹, and the frequent threat to give bodies to be eaten by wild beasts and birds). No doubt (as among the Greeks), there was a fear that the spirit of the unburied dead would roam about without rest instead of entering *Shē'ōl*.

* Regarding the etymology of שְׁאוֹל, it may suffice here to remark that it is impossible to accept either the derivation from the root שָׂא 'ask,' 'demand' (as the place that claims all living for itself), or that from שָׂא 'at' with the assumed meaning of 'to be hollow' (so that *Shē'ōl* would be the 'hollow' or 'cavern'). Rather is it from a root שָׁל, which includes the notions of *wide gaping* and *deep sinking*. Hence the idea underlying the Heb. *Shē'ōl* is that of a subterranean cavity. This does not exclude the supposition that the form *Shē'ōl* in this sense is due to the Hebraizing of a foreign word—according to Zimmern (ap. Beer, 'Der biblische Hades,' p. 15), of the Bab. *shūllām*, 'west'; cf. Enoch 22, where also *Shē'ōl* is situated in the West.

† On the undeniable points of contact between the Babylonian and the Israelitish *Shē'ōl*-belief, cf. especially A. Jeremias, *Die bab.-assyr. Vorstellungen vom Leben nach dem Tode* (Leipzig, 1887), and *Hölle und Paradies bei den Babyloniern* (Leipzig, 1905).

‡ We here leave out of account the calling up of spirits of the dead by necromancers, which was an article of the popular faith, but outside the pale of Jahwism.

§ Of the very copious literature on this subject we note

shows, however, that the shades were thought of *in general* after the fashion in which their originals had been accustomed to appear on earth.

According to what is at present the prevailing opinion, the old conception of Shē'ol survived down to the last in the express designation of the shadowy being as *nephesh*. If so, we should have to assume for this word not only the senses described above (namely, the spirit of life specialized in a human body, and hence = 'life,' and also 'person' or 'living being'), but a third wholly different meaning.* Very strong support appears to be given to this by the circumstance that even in late passages we hear expressly of a going down of the *nephesh* into Shē'ol or of its sojourn there, or, finally, of its rescue from Shē'ol (Ps 16¹⁰ 30⁴⁽⁹⁾ 49¹⁶⁽¹⁶⁾ 86¹³ 89⁴⁹⁽⁴⁸⁾, Pr 23¹⁴, cf. also Ps 94¹⁷, where instead of *Shē'ol* we have the poetic *dāmāh*, 'silence'). But in all these passages *nephesh* may quite well be understood as equivalent to 'life' or (as happens frequently elsewhere) simply a circumlocution for the personal pronoun ('my soul' being = 'I' or 'me'). Thus in Ps 16¹⁰ the meaning is 'Thou wilt not give over my life (or me) to Shē'ol,' i.e. 'Thou wilt not suffer me to die.' Ps 30⁴⁽⁹⁾ must, on Schwally's theory, mean: 'Thou causedst the phantom image of my person, which was already in Shē'ol, to come up from it again.' But the speaker had not actually died, his life *only seemed* already a prey to Shē'ol, but obtained a timely rescue from it. If the defenders of *nephesh mēth* or the bare *nephesh* as equivalent to 'soul of the dead' should appeal in support of it to the contrasted expression *nephesh hayyāh*, 'living soul' (Gn 2⁷ *et al.*), they would overlook the fact that *nephesh mēth* or (abbreviated) *nephesh* in the passages in question stands for neither more nor less than 'corpse'; and this, by the *touching* of which uncleanness is occasioned, is surely something quite different from the invisible phantom image of the living personality which goes straight to Shē'ol. *Nephesh mēth* in the sense of 'corpse' is based simply upon the very frequent (cf. e.g. Lv 21¹ 'if any one offereth to Jahweh,' etc., 5³ 7¹⁸ etc.) weakening of the meaning 'person' to the notion of 'some one'; and *nephesh hayyāh*, 'living being,' is not opposed to another form of being of the *nephesh*, but is a pleonasm intended to lay greater stress upon the main idea (cf. our own expression 'a living personality,' which would not suggest to any one the contrast of 'a dead personality'). An argument against Schwally's contention lies in the very circumstance that nowhere is the plural of *nephesh* used for *manes*, as we should then have certainly expected. From the time of the Exile (probably for the first time in Is 14⁹) they are called *rēphā'im*, i.e. probably 'flaccid ones,' but never *nēphāshōth*.

For the truth mentioned above, that the whole conception of Shē'ol lies outside genuine Jahwism, and was at all times a part, indeed, of the popular faith, but not of religion proper, there is evidence not only in the stern rejection of necromancy (as the appendage of another, heathen, religion), but, above all, in the denial of *any* relation between the inhabitants of Shē'ol and the objects and arrangements of the upper world—in particular, those of the theocracy. Only the living are members of the latter, and have a share in its blessings; at death every connecting link with it is broken. In Shē'ol there is no more giving of thanks or praise to God (Ps 6⁵⁽⁵⁾ 30¹⁰⁽⁹⁾ 115¹⁷, Is 38¹⁸⁽¹⁸⁾—nay, God Himself does not remember the

shades any more, or work wonders for those that dwell in 'the land of forgetfulness' (Ps 88⁶ 11⁶). The fortunes of their children do not concern them (Job 14²¹ 21²¹), 'for there is no work nor device nor knowledge nor wisdom in Shē'ol, whither thou goest' (Ec 9¹⁰).^{*} There is no contradiction between all this and the way in which, according to Pr 15¹¹ and Job 26⁶, the omniscience, nay, according to Ps 139⁸, even the omnipresence of God, is extended even to Shē'ol. This is the necessary consequence of the highest stage of the conception of God; but even here a direct relation of God to the inhabitants of Shē'ol is not asserted.

In spite of its very loose connexion with genuine Jahwism, the conception of Shē'ol—like the Hades-belief of the Greeks and all the cognate phenomena in other religions—contains an important religious feature. The tenacity with which it maintains itself all through the centuries, notwithstanding its irreconcilability with the prevailing anthropological presuppositions (see above), is a strong testimony to the fact that man's natural way of thinking revolts at the notion of a complete annihilation of the living personality, even if it has to content itself with a sorry substitute for a real continuation of life. Even in this there are fruitful germs of a later doctrine of immortality, and we shall afterwards see that these were not wanting also in the soil of Jahwism.

3. To the realm of notions which we have included in the title of the present section under the general term *Weltanschauung*, belong, in the first place, those relating to the *origin of the world*. (a) Unfortunately, our only source of information on this point for the present period is the Jahwistic record contained in Gn 2^{4c}. It is very probable, however, that only a part of this (the story of the creation of men and animals) has been preserved; while the introduction, which also must surely have contained some more detailed account of the creation of heaven and earth,[†] has now been dropped, perhaps on account of its deviations from the immediately preceding cosmogony of P. But, even granting that J would have contented himself with a summary mention (in v. 4^b) of the creation of the world by Jahweh, his narrative, with all its naiveness, remains a worthy and valuable counterpart to the preceding cosmogony. Like the latter, it avoids all intermixture of a mythological character—in particular, all thought of an evolution such as is usually bound up inseparably with the cosmogonies of ancient religions. Jahweh is always exalted above matter, sharply distinguished from it, and ruling over it. As in the case of every truly religious *Weltanschauung*, our

* It may be that this conception of Shē'ol first arose in the later period, which was influenced by Prophetism (so Charles, *Critical History*, etc., see above, p. 663^b, note §), whereas at an earlier time an influence of the spirits of the dead upon the upper world was held to be possible. True, we have no other evidence for the latter assumption than the existence of the practice of necromancy so peremptorily forbidden (cf. Is 8¹⁹) by the prophets. The further assumption of Charles, that the earlier conception grew out of Ancestor Worship, cannot, to say the least of it, be proved in face of what we have said already (p. 614 ff.). The same remark applies to Beer's theory ('Der biblische Hades,' p. 3 ff.), that the Shē'ol-belief is a survival of the cult of subterranean gods and demons.

† When Stade (*ZATW*, 1903, p. 178) argues that the belief in Jahweh as the Creator could have taken its rise only as a result of the preaching of the prophets, this is certainly correct in so far as the idea of the creation and control of the *Universe* is concerned. For this idea is essentially irreconcilable with the recognition of foreign national gods, and becomes possible for the first time on the basis of a consistent monotheism. But this does not exclude naïve ideas about a creative activity on the part of the national god (e.g. a creation of man), as is shown by numerous analogies in popular and nature religions. Perhaps the very naiveness of the Jahwistic cosmogony supplied a motive for its suppression. Cf. the remarks of Gunkel in *Schöpfung und Chaos* (Göttingen, 1895, p. 159). He considers that, in early days, people, in speaking of the creation of 'the heavens and the earth,' probably thought primarily of the land of Canaan and the skies of Canaan.

* So esp. Schwally, *Leben nach dem Tode*, p. 7 ff. (founding upon *nephesh mēth* of Lv 21¹¹ and Nu 6⁹, which Schwally renders by 'Totenseele'), also in *Archiv für Relig.-Wissensch.* iv, 2, p. 181 ff.; Willy Staerk, art. 'Nephesh hajja und nephesh mēt' in *SK*, 1903, p. 156 f. ('The *nephesh* does not die, but changes its form of existence').

record is thoroughly anthropocentric; and man is not only (as in Gn 1) the goal and crown of creation, but to such a degree is he its central point that the world of animals is created solely on his account, with the result that in no way do they come up to his dignity and exalted position. It requires a second, wondrous new creation to provide man with the 'help' who is bone of his bone and flesh of his flesh. God Himself brings her to him; so that upon His appointment rests that fellowship against which even the strongest ties of blood are not to prevail. If we note, further, that it is only upon the basis of monogamy that this whole description attains to its full meaning, all the more must we pronounce that we have here a view of the nature and the mystery of marriage as beautiful and worthy as could be conceived of. Here, again, the religion of Israel exercised a powerful influence on its estimate of earthly relationships and duties.

(b) If an underlying Babylonian source for Gn 2 can be proved only in part, and not at all for ch. 3 as yet, it is different with other components of the Hebrew primitive history. In these a far-reaching Babylonian influence has been assumed, and the traces of this have been sought almost everywhere in the OT down to the latest times. But it has become more and more evident that a strong scepticism is justified in face of the excessive zeal of the 'Panbabylonists.*' We are not, indeed, to be held as calling in question the possibility of an extensive influence of Babylonian culture and religious ideas upon Canaan. The cuneiform letters discovered in 1887 at Tel el-Amarna in Egypt, which were addressed about B.C. 1400 from the Euphrates lands to two Pharaohs, prove the existence of a very active intercourse between Babylon and Egypt *via* Canaan, and it is possible (though not strictly proved) that even then a footing had been gained in Canaan by the ancient Babylonian mythology, which was subsequently taken over by the Israelites when they entered the Promised Land. A great influx of Babylonian ideas has been claimed also for the time of world-wide intercourse in the reign of Solomon, not to speak of the numerous occasions of direct contact with Assyria from the middle of the 9th cent. B.C. downwards. Still the only instance where the dependence of the Biblical narrative upon a Babylonian archetype is absolutely unquestionable is (a) the story of the Deluge. And even here the dependence shows itself rather in subordinate points (like the repeated sending out of birds), and not in the main point—the cause of the judgment of the Flood. In the Biblical record this is always traced to moral causes: the Flood comes as a well-merited punishment on the wholly degenerate race of man; Noah only, on account of his righteousness, finds favour in God's sight. The mythological background, which presents itself sometimes in a very offensive way in the Babylonian narrative, wholly disappears in Genesis. Over against men responsible for their actions stands the righteous and almighty God alone.

(β) Of late, special emphasis has been laid on what are supposed to be a number of OT allusions to the Babylonian story of Creation, or, more precisely, to the victorious struggle of the god

Marduk with the ocean, personified as a woman, Tiamat (i.e., as appellative, 'sea'), and the monsters that assist her. A large part of Gunkel's able and ingenious work (*Schöpfung und Chaos in Urzeit und Endzeit: eine religionsgeschichtliche Untersuchung über Gn 1 und Apoc. Joh. 12*, Göttingen, 1895) is devoted to an attempt to discover numerous traces of this myth in the OT. He rightly repels the objection that Gn 1 now forms a part of the latest Pentateuchal source, P. This circumstance does not exclude the possibility that this cosmogony, which in its present form is accommodated to the very highest conception of God, may be based upon a far older form of the myth. The points of contact between Gn 1 and the Tiamat-myth are, however, few and uncertain. The Heb. *tēhōm* (תְּהוֹם), over which darkness hangs (v. 2), is, it is true, the masculine corresponding to the Bab. *tiāmat*; but there is nothing to suggest any other meaning than the simple 'sea' or 'ocean.' As little can it be proved that the large water-animals of v. 21 are originally of a mythological cast.

But the recollection of the conflict of Marduk with the dragon is supposed to be preserved, above all, in certain mythological names—*Rahab*, *Leviathan*, *Behemoth*. The fact that all * the passages where these occur are very late (Ezekiel, Deutero-Isaiah, Job, late Psalms) might not count for much. It would be quite intelligible if the ancient *mythologumena* were again dragged to the light and utilized for poetical ends, when once the triumph of absolute monotheism appeared to have removed all danger of their being misunderstood or misapplied. A stronger objection is, that a considerable number of the alleged allusions can be referred only by very artificial methods to the conflict with Tiamat. How, for instance, if the kernel of the Tiamat-myth consists in the killing and *cutting in pieces* of Tiamat, can the serpent at the bottom of the sea, which Jahweh commands to bite (Am 9⁸), possibly be Tiamat? Of the *Rahab* passages, Is 51⁹, Ps 89^{10f.}, Job 26^{12f.} and 9¹³ ('Rahab's helpers') should in all probability be referred to the defeat of Tiamat, only that the conqueror is naturally not Marduk, but Jahweh. In Ps 87⁴ Rahab is a symbolical name of Egypt, while in Ps 40⁵ (4) the plural *rēhāvim* is a designation of the false gods, but surely not in the sense of 'dragons of chaos.' Of the *Leviathan* passages, Ps 74^{12f.} should perhaps be interpreted mythologically. On the other hand, in Ps 104²⁶ there is absolutely no necessity for such an interpretation. In Is 27¹ Leviathan the fleeing serpent, and Leviathan the coiled serpent, coupled with the dragon in the sea (Egypt), are again nothing but symbolical designations of two world-powers. In Job 3⁸ it is much more natural to interpret Leviathan as a monster in the heavens which threatens to swallow up the sun. The poetical author of Job 40^{25ff.} (41^{16f.}) certainly means by Leviathan nothing but the crocodile. And his *Behemoth* (40^{15ff.}) stands in the same way simply for the hippopotamus. As little are we compelled to explain Job 7¹², Ps 44²⁰ (19), Jer 51^{34, 36, 42} as allusions to the Tiamat-myth; and even in Ezk 29^{3ff.} and 32^{2ff.} there is, at most, only a general comparison of the Pharaoh to a bound monster. In all the passages, finally, where Gunkel sees an allusion to the binding of the primeval ocean (Ps 104^{6f.}, Job 38^{8ff.}, Pr 8^{25ff.}, Jer 5²² 31³⁵, Ps 33⁷ 65⁸ (7)), all that the present writer can discover is a reference to the omnipotence of Jahweh, who commands even the waves of the

* Amongst these the first place belongs to Frdr. Delitzsch, in view of his first two Berlin lectures on *Babel und Bibel* (Leipzig, 1902 and 1903), which have given birth to a violent controversy and an interminable literature. We content ourselves here with naming two of the most recent writings which treat soberly of the points in dispute: Zimmermann, *Biblische und babylonische Urgeschichte*³, Leipzig, 1903 [cf. also his *Klein-schriften und Bibel*, Berlin, 1903]; and Gunkel, *Israel und Babylonien: der Einfluss Babylonien auf die israelitische Religion*, Göttingen, 1903.

* At most we should have to except only the serpent of Am 9³ (see above) and Rahab of Is 30⁷ (as a designation of Egypt). But not only is the authenticity of the last passage disputed, but the correctness of its text is very doubtful, and, finally, *rahab* may here be quite well an appellative 'raging' 'blustering'. Cf. vol. iv. p. 195⁶.

sea, but nowhere any allusion to a conflict with the ocean as a mythological monster.

But, even if all the passages cited by Gunkel were coloured by such allusions, they would be still quite without relevancy as affecting our estimate of the religion of Israel for the period we are considering. For, apart from the fact that, in the few passages that are certainly entitled to be considered, Jahweh expressly takes the place of Marduk (*i.e.* there has been a complete transplanting of the myth to the soil of Jahwism), we must, further, note with emphasis that in every instance we have to do with the utilizing of those mythological reminiscences *in poetry*. Now, the freedom of which the Hebrew poets availed themselves in this matter is as far from supplying a standard whereby to judge of their religious beliefs as the mention of Scylla and Charybdis by a modern writer would be a fair test of his beliefs.

(7) Finally, the attempts that have been made to give a mythological sense to the vessels of Solomon's temple appear to us to have failed completely: *e.g.* the supposition that the so-called brazen sea (1 K 7^{23ff.}) represents the *tēhōm* or primal ocean, or that the oxen are symbols of Marduk.* On this question the present writer must express his full accord with Stade, who (*ZATW*, 1903, p. 179) sees in these vessels no evidence that at that time the myths possibly attached to them had been adopted by the Israelites, or that they were even known to them. 'It was not a religious need, but the needs of kingly pomp, that led to the introduction of a foreign institution into the temple. The Phœnician artist, who was called in to execute the work, wrought according to the fashions of style with which he was familiar, and turned out a product which could be transferred from a Phœnician temple to the temple of Jahweh.'

From all sides, then, it may be considered as established that the extent of Babylonian influence upon the religion of Israel—at least for the pre-exilic period—has been considerably overestimated. Examples of dependence and of allusions are not to be denied. But upon the soil of revelation the foreign material undergoes such transformation, and appears in such a new light, when viewed from an immeasurably higher moral and religious standpoint, that the question has not unreasonably been asked whether, in many passages, we should speak, not of dependence and imitation, but rather of a polemical intention towards the alleged source.

The further question, whether to this period religious *expectations as to the future* (connected with the *theologoumenon* of the 'Day of the LORD') should be attributed, will have to be discussed in the following section.

IV. THE PERIOD OF THE WRITING PROPHETS, DOWN TO THE EXILE.

i. *THE SOURCES*.—As sources for this period, which embraces some 180 years, we have to take account not only of the Prophetic writings, but also of portions of the Pentateuch and of the Historical literature. Thus in the Pentateuch there are the later and latest strata of J and E, and the Book of Deuteronomy; in the Historical books we have the prophetically influenced sections of Judges and Samuel (such as 1 S 1. 211-26 3. 8. 10¹⁷⁻²⁴ 15), but, above all, the first Deuteronomic redaction of the Books of Kings (*c.* 600 B.C.). For our present purposes we can practically leave out of account the

circumstance that the exact chronological position of the particular passages referred to is still the subject of much controversy. For there is practically complete agreement that they are dependent upon the preaching of the pre-exilic writing prophets, and that is the only point that concerns us. Besides, the whole of the historical literature of this period exhibits such a uniformity of ideas that the questions of analysis of sources and precise dating possess only a subordinate importance. For this reason we may leave open the complicated questions connected with the origin of Deuteronomy, namely, whether the law-book introduced by Josiah in 621 is to be regarded as the original Deuteronomy or was compiled from older codifications. So far as the description of the process of development of the OT religion is concerned, the present Book of Deuteronomy may quite properly be treated as a unity.

On the other hand, no little difficulty attaches to the questions of literary criticism affecting the main sources, namely, the Prophetic writings themselves. Here even the most cautious and conservative of critics have been compelled by the latest investigations to make such concessions as would have been considered impossible twenty years ago. Of course this is not the place to describe exhaustively either the process of literary criticism which has led to this, or the results of this criticism. But it may be as well to indicate clearly the general viewpoints which have forced themselves upon investigators in ever-growing measure, and without which a just judgment and a correct employment of the Prophetic writings are impossible.

There are two facts which must be kept steadily in view, because they suffice to explain all the phenomena in the Prophetic literature. (a) In the first place, it is, throughout, a *religious* literature; it does not profess to give anything, and we must accordingly not look to it for anything, that goes beyond religious purposes. (b) Secondly, Israel, to which we owe the Prophetic writings in their present form, had as yet no idea of what we call 'literary property.'* The question was not in what terms a prophet of Jahweh had spoken in former times, but whether those terms were still fitted to fulfil the religious purpose which he once meant to serve. If this did not appear to be the case, it was regarded as not only perfectly right, but as a sacred *duty*, to modify the original form of expression, to give a milder turn to what was too harsh and no longer applicable to a differently constituted age, to expand and state more clearly what was too concise or obscure, to introduce matter that was wanting in the original but indispensable for a later age. To this last category should be assigned a good part of the material on which at one time great stress—and that rightly—was laid, namely, so-called Messianic prophecy. When the threatenings of punishment uttered by the pre-exilic prophets had been fulfilled, when the people languished in exile, or after the Return dragged on a miserable existence under the oppression of the hostile world-power, it could not but seem a piece of cruelty to let words of threatening be the sole or even the predominating feature in the Prophetic oracles, at a time when the people were filled with burning zeal to secure by painful fulfilment of the Law that great change in their lot which had long been promised. We can understand how, under such circumstances, consolation and promise had an ever larger place given them within the framework of the traditional Prophetic writings—nay, how, for instance, the Book of Isaiah could come to assume the form of an an-

* So Kittel in his Com. on Kings (in Nowack's *Idkom.*, Göttingen, 1900, p. 64), following Rosters (*Theol. Tijdschr.* 1879, p. 445ff.). According to Gunkel (*l.c.* p. 153, cf. also 164 f.), the 12 oxen must rather have stood in some relation to the 12 signs of the zodiac.

* Cf. what was said above (p. 625a) on the custom of tracing back all the legislation to Moses.

thology of Prophetic oracles and be even understood and read by the people as such — oracles which in all probability embrace a period of well-nigh 500 years. In saying this we do not mean to give our assent to what an illegitimate hyper-criticism has exalted to a principle, that no word of comfort or of promise is to be allowed to the pre-exilic prophets. But we do mean to claim a perfect right to test fully the authenticity of the various Prophetic words. It is surely not the outcome of a frivolous and unbelieving spirit to seek an answer to the question whether Micah (4^{10f.}) could have predicted in one and the same breath the carrying captive of Jerusalem to Babylon, and (v.¹¹) the miraculous deliverance of the city out of the power of its besiegers. Here sober criticism has a readily available resource, namely, to assign the prediction of the destruction of many peoples before the walls of Jerusalem to a much later date than the 8th cent. B.C. In cases where this resource is not available, such criticism will readily waive any decision. Fortunately, there remains enough that is certain and unassailable to enable us to understand and to depict the ways of God in Hebrew prophetism.

ii. NAME AND CHARACTERISTICS OF THE WRITING PROPHETS.* — 1. In speaking of the *nēbī'im* (p. 650 ff.) we avoided as far as possible the name 'prophets,' so as not to obliterate the deep-seated distinction between them and the Jahweh prophets properly so called, the succession of whom begins with Amos. We found it necessary, indeed, to recognize even those *nēbī'im* who clustered about Elijah and Elisha, and especially the last named themselves, as organs of Jahweh, in whom 'the spirit of Jahweh' worked as a mysterious agency, and who could accordingly be rightly called 'men of God.' But on closer examination we discover such characteristic differences between the two kinds of prophets that we cannot, for instance, place even an Elijah upon the same footing as Amos.

The writing prophets† are essentially connected with the ancient seers (*ro'im*), as is expressly testified in 1 S 9⁹ 'Those who are now called "prophets" (*nēbī'im*) were called in former times "seers." The old names (*ro'im* and *hōzim*) in an honourable sense appear elsewhere only in Is 30¹⁰;

* Of the very extensive literature on the characteristics of prophetism and the theology of the writing prophets, we note, in addition to the works cited on p. 650 n., the following: B. Duhm, *Die Theologie der Propheten*, Bonn, 1875 [a work which already occupies the standpoint of the Reuss-Graf hypothesis, although on questions of literary criticism the author is still pretty conservative]; Ed. König, *Der Offenbarungsbegriff des AT*, Leipzig, 1882, 2 vols. [mainly an analysis of the self-consciousness of the prophets and of their leading statements based upon this, regarding (1) their miraculous powers, call, and endowment with the Spirit of God; (2) the manifestation and speaking of God as the source of the revealed message, König maintaining that in this matter the prophets see and hear with the bodily senses; (3) the fact that it is not their own heart that is the source of the prophets' predictions]; A. Kuenen, *De profeten en de profetie onder Israël: Histor.-dogmat. Studie*, 2 vols., Leiden, 1875 [Eng. tr. under title 'Prophecy and Prophecy in Israel', London, 1877]; W. Robertson Smith, *The Prophets of Israel and their place in History, to the close of the 8th cent. B.C.*, Edinburgh, 1882 [2nd ed., 1895, with Introduction and Additional Notes by T. K. Cheyne]; J. Darnesteter, *Les prophètes d'Israël*, Paris, 1892; A. F. Kirkpatrick, *The Doctrine of the Prophets* (Warburtonian Lectures for 1886-1890), London, 1892; P. Schwartzkopff, *Die prophetische Offenbarung nach Wesen, Inhalt und Grenzen*, Giessen, 1896; F. Giesebrecht, *Grundlinien für die Berufsbegabung der alttest. Propheten* (in 'Greifswalder Studien zu Ehren H. Cremer', Gütersloh, 1895, pp. 37-81); Leitner, *Die prophetische Inspiration* (in Bardenheuer's 'Biblische Studien' [Rom. Catholic], Freiburg i. B., 1896; Ed. König, *Das Berufungs-bewusstsein der alttest. Propheten*, Barmen, 1900).

† The emphasis we lay on the word *writing* in this title is not intended to deny that there were true prophets of Jahweh in Israel besides these (cf. what was said above, p. 656, about Micah ben-Imah, and what is said in Jer 26^{20f.} of Uriah ben-Shemaiah); but we can judge only of those about whose messages we have written evidence.

for in Mic 3⁷ the 'seers' (coupled with 'sooth-sayers') mean false prophets; in Is 29¹⁰ 'the prophets' and 'the seers' are wrong explanatory glosses; and, finally, in Am 7¹² the term 'seer' (*hōzeh*), with which Amaziah the priest addresses Amos, has a flavour of contempt about it. But the reply of Amos (v.¹⁴) must not be misunderstood, as if he absolutely repudiated any claim to be a 'prophet' (*nābī'*), because the word *nābī'* had questionable associations to him coming down from those *nēbī'im* of the time of Saul and of Ahab. This is quite impossible simply on the ground of Am 2¹¹ and 3⁷, where Amos himself speaks of the *nēbī'im* in the most honourable sense. Moreover, we read in 7¹⁶ that God charged him to 'go as a prophet' to His people Israel. The meaning of Amos in 7¹⁴ can only be, then, that he disclaims being a *professional* prophet, in the sense familiar to Amaziah, or a member of a prophetic guild. On the contrary, the call to be a prophet surprised him in the midst of occupations of a wholly different kind: Jahweh took him from the herd.*

2. Here we have already a very essential difference between the prophets of early times and the writing prophets. The latter are conscious of an express call, at a definite moment, by Jahweh to their office. We have not an actual account of this in the case of all of them; but its preciseness in the case of five justifies our assuming that from the time of Amos onwards a similar call was experienced by all true prophets of Jahweh. We have already spoken of Amos' own witness to his call. According to Hos 1², the commencement of Hosea's prophetic ministry was contemporaneous with his recognition that Jahweh intended even the prophet's unhappy experiences in his married life to be a reflexion of Israel's relation to Himself. Isaiah records a vision he had in the year that king Uzziah died, when the Divine commission was given him to drive the people by his message into ever-increasing obduracy. Attempts have been made to explain this vision—the only one in Isaiah—as simply the literary garb invented for inward reflexions and conflicts, so that the prophet's own determination would take the place of an express Divine call. But all such attempts are shattered by the earnest terms of the narrative, which will not permit us to think but of a real occurrence. The very same is the impression we receive from Jeremiah's record of his call in the 13th year of Josiah. Quite remarkable here is the emphasis laid (1⁵) on the choice and consecration of Jeremiah to the prophetic office even before his birth. How could any one invent a thing of this kind and proclaim it as a word addressed to him by God? But as little could he have added the supplementary invention that he tried to evade the Divine commission (v.⁷) by pleading want of skill in speaking, and youth. Rather must we see here again an experience the prophet once had, which left an ineffaceable impression upon his memory. In the case of Ezekiel, his exact dating of his first vision (1¹⁴) by year, month, and day, is the pledge that he too is conscious that his call to be a prophet (23^{af.}) was a definite occurrence.

As it is not in man's power of his own initiative to effect the call to be a prophet, or to complete it by his own determination, so, on the other hand, he has no power to evade it. Nay, as even the boldest will tremble involuntarily when the roar of a lion is heard in the neighbourhood, so the man to whom the word of Jahweh has come *must* prophesy (Am 3⁸). The most striking testimony to this is found in Jer 20^{7f.} With an impatience

* The meaning of Amos becomes still clearer if, with Riedel (SK, 1903, p. 163 f.), we render 'I was no prophet,' etc.

bordering close on blasphemy, the prophet here reproaches Jahweh with having enticed him (by the call to be a prophet) and prevailed upon him, so that he has become a laughing-stock and an object of ridicule. But, he goes on, 'when I thought, I will not make mention of him nor speak any more in his name, then there was in mine heart as it were a burning fire shut up in my bones, I wearied myself with holding out, but I was unable.' It would be no easy task to weaken the convincing power and force of *this* testimony to the unique character of Hebrew prophetism, by pointing to any analogous phenomena elsewhere.

3. A characteristic of the *nēbī'im* in the old sense was a condition of *ecstasy*, occasionally rising to rapture and holy frenzy; and the first of these, namely *ecstasy*, we find witnessed to also in the case of the writing prophets. For, even apart from the vision, which likewise implies a condition of trance, there is repeated mention of 'the hand of Jahweh' being strong upon the prophet (Is 8¹¹, Ezk 3¹⁴), or coming upon him (Ezk 1³ 3²² 37⁴⁰), or falling upon him (8¹), or being over him (33²², here with the more precise note that it was 'at evening'), and on account of which he sits solitary (Jer 15¹⁷). In all these passages 'the hand' is an expression for the Divine influence which lays irresistible hold upon the prophet, being almost the equivalent of 'the spirit of Jahweh,' which likewise 'falls' upon the prophet (Ezk 11⁵), and imparts to him special revelations from God. In the case of Ezekiel, the effect of the hand of Jahweh is almost always to induce a vision. Nevertheless, there is plainly a considerable difference between this kind of *ecstasy* and that of the ancient *nēbī'im*. It is true that under all forms the extraordinary influence of the spirit of God presents an unfathomable mystery. But on the part of the writing prophets we find no trace of their being plunged by this influence into a condition of *amentia* or unconscious rapture. They always retain a clear consciousness and a distinct recollection of what they saw in spirit and of what was said to them.* Otherwise it would be impossible for them to describe the vision or to announce the word of God that came to them in their *ecstasy*.

4. Now, it is quite true that in opposition to this it has been maintained (so, in great detail, by A. Klostermann in *SK*, 1877, p. 391 ff., and again recently by Duhm in his Commentary on Isaiah, p. 129) that, at least in the case of Ezekiel, by the prophet's own confession, cataleptic conditions, namely, temporary loss of the power of motion and speech, must be assumed, although this morbid condition did not exclude an exact recollection of the hallucinations of sight and hearing that were experienced during the catalepsy. In point of fact, Ezekiel tells us that, after his vision of the cherubim-chariot, he went *in bitterness* (כַּר) in the heat of his spirit, and that he then sat stunned with astonishment (שֹׁמֵם) in the midst of his people for seven days (3^{14c}). He speaks, further

* This simple fact refutes the ancient orthodox theories, such as that which goes back to Philo, that human reason left the prophet, to make room for the Divine spirit. Equally futile are all attempts to reduce the prophets to mere instruments of the Divine spirit, *devoid of will*, and comparable to a flute in the hand of the player or a pen in the hand of the scribe. Such attempts suffer shipwreck on the rock of what is an undeniable fact, that the individuality of the different prophets is very clearly revealed in their style and their manner of speech. Isaiah writes quite differently from Jeremiah, and the latter, again, quite differently from Ezekiel. Of course all this does not exclude the possibility of a heightening of the natural gifts and powers of the prophets by the influence of the Divine spirit. Such a process is evident, for instance, in the manner of speech of the herdsman Amos, which is as forcible as it is clear. Jerome's opinion regarding the 'rustic style' of Amos must be pronounced quite unproved and incorrect.

(v. 26^d), of a dumbness which God sends upon him, which can indeed be interrupted when it is the Divine will that he make prophetic announcements, but whose entire removal does not take place till the evening before the news comes of the capture of Jerusalem. All these phenomena agree remarkably with those observed in cataleptics. Duhm is inclined to reckon especially the vision in 8¹-11²⁴ among the cases 'in which the body lies seemingly dead and the phantom (that has left it) represents the Ego.' On the other hand, Zechariah, with his 'angel that spake with me,' is included by Duhm among the instances 'in which consciousness remains in the body, and the phantom that comes forth is apparently unconscious.' But however much the assumption of cataleptic conditions on the part of Ezekiel may have in its favour, this does not yet amount to evidence of a relapse to the old form of mantic. Above all, there are two points not to be overlooked. In the first place, Ezekiel represents his bitterness of spirit and stunned condition, those alleged cataleptic phenomena (3^{14c}), as the *result* of the vision of the cherubim-chariot; whereas he describes the vision itself with a preciseness which does not look like that of a man whose mental balance has been disturbed. Secondly, before and after the story of his being carried to Jerusalem (8¹⁴) and the lengthy account of his visions there, he says not a word about cataleptic conditions, and we have no right simply on the ground of 3^{14c} to postulate them here also. But, above all, the whole nature and contents of the great vision in chapters 40-48 are very hard to reconcile with any notion of a morbid condition on the part of the prophet. Everything here breathes such an air of deliberation and purpose that only a small share in the inception of this lengthy programme for the future can be set down to the account of vision (see below, p. 676^b). Again, as to the 'double consciousness' of Zechariah, it is really only in 4¹ that there is any indication of an abnormal condition of the prophet; and this is very far from justifying the assumption of actual cataleptic conditions. For, when we read that the angel who talked with him reawakened him as a man that is wakened out of his sleep, this means merely that the prophet, exhausted by the preceding visions, had fallen into a kind of sleep, and had now to be made capable of experiencing a new vision. But here, again, in the case of Zechariah, it will be found that his night-visions in their present form are to be in large measure set down to the account of the *littérateur* and not of the visionary.

5. Taking everything into account, the *vision* did not, upon the whole, play such a large rôle in prophetism as there has been a disposition to attribute to it. As for the classical examples, so to speak, of visions which we find on the part of Amos, Isaiah, and Jeremiah, the descriptions are almost all extremely meagre; nay, in some instances they contain nothing more than names of objects with which the utterance of religious truths and exhortations is connected. The more detailed the description (as, for instance, in Ezk 1^{4a}), the more it contains not only framework and motive but exhibits deliberate purpose, the more is it deficient in specifically religious contents. In every instance the word spoken in the course of the vision or for the purpose of explaining it, is by far the most important part of the revelation communicated to the prophet.

6. Finally, it must be pronounced a gross exaggeration to think of *all* the activity of the prophets as carried on under ecstatic conditions. When a prophet begins his message with the expression 'Thus saith the LORD' (כֹּה אָמַר יְהוָה), or introduces into his address the very frequent

'word of the LORD' (דבר יהוה), he means to claim that he does not speak a message of his own creation, like the false prophets: Jahweh must have spoken to him before he can proclaim the word of Jahweh. But this does not imply that the inspiration from Jahweh must in every instance be connected with the throwing of the prophet into the ecstatic condition. It may, further, be asked whether for every particular message of the prophets there was needed a special inspiration from Jahweh, or whether we should not rather hold that they always spoke in the power of the spirit of God, which was imparted to them at their call. The answer is, that both these possibilities are witnessed to in the Prophetic writings. (a) In the story of the call of Isaiah (6^{9ff.}), as well as in that of Jeremiah (1^{9ff.}) and of Ezekiel (23^{ff.} and 31^{7ff.}), we hear of a general commission from God to these prophets, a kind of programme of their ministry, to which at all times they are to give heed in word and act.

(b) But, on the other hand, we possess also some notable evidences that the word of Jahweh may in a particular instance be at first withheld, and only communicated after a while.—(a) Thus the prophet Habakkuk can at first give no reply to the complaint which he has to make to Jahweh (in chapter 1). Nay, he resolves to take his stand upon his watch-tower* to look out and to learn what Jahweh has to say to him, and what reply He will make to his grievance. And, in fact, Jahweh answers him at once, and even commands him to write down the revelation he receives.

But there are two testimonies of Jeremiah which point still more clearly in the same direction.—(β) When the false prophet, Hananiah of Gibeon, in the presence of Jeremiah proclaims to priests and people as a word from Jahweh (Jer 28^{1ff.}) that the yoke of Nebuchadrezzar is about to be broken, and the temple-vessels carried away under Jehoia-*kim* to be brought back from Babylon, Jeremiah gives his Amen to this. He expresses, indeed, his suspicion at the suddenness of the change from the predictions of woe uttered by the old prophets to the opposite. But he allows Hananiah to take from his neck and break the yoke which he had worn for some time as a threatening allusion to the yoke of the Chaldeans. Straightway Jeremiah takes his departure. But soon thereafter the command comes to him from God to announce to Hananiah that Jahweh would put an iron yoke in place of the wooden one broken by him, and would bring all nations under the yoke of Nebuchadrezzar. Hananiah himself was further to be told that as a false prophet he was doomed to die the same year. And so it fell out in the seventh month of that year. In this whole transaction it is highly noteworthy that Jeremiah at first considers it possible that Hananiah has spoken a true message from Jahweh, because he himself has received none to a contrary effect, but that afterwards he has no hesitation in opposing his subsequent communication from Jahweh to Hananiah's

* The much discussed passage, Is 21^{6ff.}, belongs (if we adopt the present text) to a different category. We leave it an open question whether this oracle belongs to Isaiah (dating from c. 710 B.C.), or whether it should not rather be placed about the year 540. In v. 6 Jahweh bids the prophet set a watchtower, who is to mount the tower and tell what he sees. This is generally explained as an embodiment of the fact that the prophet, under the influence of the Divine spirit, distinguishes in himself, as it were, two personalities. According to Duhm (Com. on Isaiah, p. 129), 'the meaning of the command is that the prophet is to yield himself to catalepsy (cf. above, p. 673⁹) and let loose from himself the angel, who, untrammelled by the bodily senses, can perceive supra-sensual things.' But it is hardly open to question that the present text of v. 6 is due to a misunderstanding of the Massorah, and ought, with Buhl (*ZATW*, 1883, p. 157 ff.) and Stade (*ib.* p. 165 ff.), to be emended so as to read as a command of Jahweh to the prophet to mount the tower. Thus the catalepsy alleged by Duhm falls away of itself, and Is 21⁶ becomes a simple parallel to Hab 2¹.

lying word. Here, again, all notion of mere imagination or invention on the part of the prophet is absolutely excluded. What he speaks is based upon real, direct inspiration.

(γ) The other testimony, which is no less characteristic, is found in Jer 42^{1ff.}. The remnant of the people, which had fled from Mizpah after the murder of Gedaliah, beg the prophet to give them a message from Jahweh to indicate the right course for them to pursue, and assure him that, whatever be the instructions, they will carry them out. Jeremiah promises that he will pray to Jahweh for a message, and that he will not keep back a single word of it when he receives it. But ten days elapse before the Divine word comes to him, forbidding absolutely the migration to Egypt, and commanding the people to remain in their own land. The charges of falsehood and treachery which the spokesmen of the people then prefer against the prophet are such as no one will have any difficulty in attributing to the blind zeal of infatuated men. But it would be equally unjust to regard those ten days as simply a period of delay which the prophet took for calm consideration, and with a view to the allaying of excited feelings. Here, too, we must believe him when he tells us that he could not announce a 'word of Jahweh' until it had been given him.

7. In all that we have said hitherto in the way of characterizing the writing prophets, we have not, however, yet mentioned the most essential feature. This we find in the *subjects* of prophetic announcement, which are exclusively the affairs of the theocracy, not to say the kingdom of God in the wide sense of that expression. The prophecies are addressed to the whole body of the people, whether in Israel or Judah,—or at least relate to them; and in every instance the contents are exclusively moral and religious. The few exceptions, where a prophecy is addressed to individuals, are only apparent. When Isaiah (7¹¹) invites king Ahaz to ask a sign from Jahweh, he is speaking to the man who had the control of, and the responsibility for, the fortunes of the people at a critical period. And when the same prophet (Is 22^{15ff.}) announces to the king's *major-domo* his deposition and banishment, and the appointment of Eliakim in his place, the whole context shows that Shebna had brought this punishment upon himself by the harm he had done the theocracy, and by his oppression of the people; whereas it was to be expected of Eliakim, the servant of Jahweh, that he would be 'a father to the house of Judah.' In the same way, of course, we must interpret the minatory prophecies of Jeremiah addressed to individuals: for instance, that to Pashhur (20^{3ff.}), whose ill-treatment of the prophet had proved him to be a rebel against Jahweh Himself; that to Hananiah (28^{13ff.}; see above); that to Shemaiah (29^{24ff.}); and, not less, the numerous prophetic addresses to various kings of Judah (21^{3ff.}, 22^{1ff.}, 10^{ff.}, 27^{12ff.}, 38^{14ff.}). Again, the very frequent words of threatening uttered against whole classes, the nobles and judges of the people, the priests or the (false) prophets, have in view the members of these, not as individuals but as the holders of important offices, on whose conduct the weal and the woe of the whole body depend. The true prophet of Jahweh, on the other hand, holds an office only in so far as he is called *by God* to a definite activity, never for State reasons or by a king's commission. Accordingly, nothing could argue greater perversity than to represent Isaiah, when he announced to Shebna his deposition (22^{15ff.}), as acting in an official capacity and by the king's directions—something after the fashion of a court preacher!

8. It is quite in harmony with the position of the

prophets in the service of Jahweh that they perform their ministry without any claim to fee or reward—differing thus from the ancient seers, who received gifts in return for the answers they gave to inquirers (1 S 9⁷, 1 K 14³). According to Mic 3¹, it is a sign of the false prophets that they divine for money—conduct which is pronounced equally disgraceful with that of judges who take gifts to give decisions, or of priests who impart *tōrah* for a fee.

9. Once more, as to the numerous oracles and addresses spoken against *foreign peoples*: these fall in large measure within the sphere of prophetic activity, for the simple reason that their motive is the hostile attitude of these nations to the theocracy. They denounce the judgment of Jahweh upon those who in their blindness have abused His commission to chastise and have cruelly destroyed (Is 10^{5ff.}); or who, like the Edomites, in Jerusalem's 'evil day,' exhibited a savage joy, and did their best to humiliate and destroy Judah (Ob 10^{ff.}). But even where such motives are not present, or at least not recognizable by us, the oracles against foreign nations occupy a high place in the prophetic addresses. For they are all testimonies that it is recognized that Jahweh alone, with almighty hand, guides the fortunes of the nations, near and remote; that He alone can reward and punish; and that He does both according to the unalterable standard of right and righteousness. It is no more the merely national god, who concerns himself about the course of the world only when his own people are assailed by another, and then—such was the popular belief—takes their part blindly; but One who avenges even the outrage perpetrated by the Moabites on the bones of the king of Edom (Am 2¹). And thus it may well be said that in these very oracles against the nations clear and forcible expression is given to the universalism of the prophetic conception of God, the omnipotence, wisdom, and righteousness of Jahweh. There is nothing in them to invalidate the judgment expressed a little ago, that the activity of the writing prophets is always concerned with the interests and aims of the theocracy, the ways of God with the latter, and that the contents of their prophecies are uniformly of a moral and religious nature.

10. From this follows another result, which is not least in importance, namely, that the minatory prediction, however categorically it may be expressed, has always only a *conditional character*. Even Amos, whose denunciation of judgment sounds so irrevocable that he actually strikes up the funeral dirge (*kīnāh*) over Israel (5¹), does not abandon all hope, for immediately thereafter he utters the exhortation: 'Seek Jahweh, that ye may live' (vv. 4, 6); 'Yea, if ye hate the evil and love the good, it may be that Jahweh, the God of Hosts, will be gracious unto the remnant of Joseph' (v. 15). Isaiah, again, although expressly called (6^{10f.}) to harden the people still more by his preaching of repentance, predicts (12^{5ff.}) the coming of a time when Jerusalem shall once more be called a city of righteousness, a faithful city, after a portion of her inhabitants have been brought by purifying judgment to repentance. Similarly, in 38³ Isaiah, by the instruction of Jahweh, announces to king Hezekiah his speedy end, but immediately thereafter tells him that, owing to his prayer and tears, his life is to be prolonged for fifteen years. Jeremiah announces as a message from Jahweh (26³) that the threatenings uttered against city and temple may perhaps have the effect of leading the people to hearken and turn from their ways, in which case Jahweh will repent Him of the evil which He thought to bring upon them because of the evil of their doings. In short,

the prophetic word is not a *decretum absolutum*, which must work itself out after the manner of a blind natural force, an inexorable fate; it pursues moral aims; it is designed to bring about knowledge and repentance. Hence it is subject to recall, according to the conduct of the party threatened; just as the potter can transform the marred vessel as he pleases (Jer 18^{1ff.}). For Jahweh has no pleasure in the death of the wicked, but in his turning from his evil way, that he may live (Ezk 18³). It was to emphasize this truth, and that even as extended to the heathen, that the little Book of Jonah was composed in the post-exilic period.

iii. *THE FORMS OF DIVINE REVELATION TO THE PROPHETS*.—1. The simplest form of communication from God to the prophets is the *word* which comes to them, and which is very frequently the equivalent of 'revelation.' According to Jer 18¹⁸ it was a current saying of the time that *tōrah* ('direction') could never be lacking to the priest, nor 'counsel' to the wise, nor the 'word' to the prophet. That the prophet, in virtue of his call, could speak in the name of Jahweh, without having in *every* instance received an extraordinary revelation, we have already (p. 674⁴) pointed out. On the other hand, the exact dating of particular Divine messages (particularly in Ezekiel, Haggai, and Zechariah, but occasionally also in Jeremiah) is an evidence that the prophet could be quite conscious of having received a special revelation.

The same is witnessed to by the expression (Is 22¹⁴, cf. 5⁹) 'Jahweh revealed himself in my ears,' i.e. called to me audibly. It has been argued by Ed. König that a hearing with the *bodily* ear is what is thought of in this phrase; but that it is not so, is shown by the fact that elsewhere the Divine word is said to be *seen* by the prophet. But this seeing is with the eye of the spirit, like the beholding of the prophetic visions. Both kinds of seeing are designated by the same word in Hebrew (רָאָה *hāzōn*; cf., for instance, the expression 'Vision of Isaiah,' placed as a collective title at the head of the present Book of Isaiah). This is explicable only on the supposition that the boundary between the two—especially in early times—was a fluid one: even the receiving of a Divine message might readily be coupled with ecstatic visionary conditions.

2. Still we are entitled to speak of *visions* proper, i.e. of the beholding of concrete pictures and incidents, of which the prophet afterwards gives an account, and, if necessary, an interpretation. It is noteworthy that *this* seeing is almost everywhere (cf. Am 7^{1-4, 7} 8¹ 9¹, Is 6¹, Jer 1^{11, 13}, Ezk 1¹, Zec 1⁸ 2¹ etc.) expressed by the verb רָאָה (*rā'ah*), which usually stands for bodily vision. Here, again, it cannot be inferred from this that we have to do with an unveiling of the invisible world to the bodily eye of the prophet, but rather that he with the spiritual eye beholds real pictures and incidents as at other times he does with the bodily eye. Of all the analogies which have been adduced to make the mystery of this kind of seeing (namely, the prophetic vision in the narrower sense) intelligible, that which deserves most attention is the largely attested 'artistic intuition.' In the latter, a work of art, which has been planned and perhaps long considered, may all at once present itself to the mind's eye of the artist in unthought-of finish and beauty, and that so clearly that he is able henceforth to retain it in his memory and carry it into execution. But, even with such an analogy as this, we must not overlook the considerable differences in kind between the two, artistic and prophetic inspiration,

and, above all, the difference in their subject-matter.

But, further, the visions present themselves to us in such multiplicity that we can readily understand how attempts have been made to distinguish between genuine vision and the purely literary garb given to prophetic ideas—not to speak of the attempt to reduce *all* visions to a mere literary device. To refute the latter notion, it is necessary only to point to (a) the single vision recorded by Isaiah (in ch. 6). It is inconceivable that he should have invented this incident, to which his solemn call to the prophetic office is attached, merely in order to present in this form certain thoughts of his own about the nature and the prospects of his prophetic calling. For any such purpose the labour spent on the description would be too great, and everything favours the assumption that the prophet on this *one* occasion actually beheld the supra-earthly pictures which he describes, experienced the atoning influence (v. 7), and heard the Divine commission given him. And, in truth, the pictures are of sublime simplicity, while the succession of the incidents is clear and impressive (just as in the vision of Micaiah ben-Imlah, 1 K 22^{19ff.})—both indications of a real inward experience.

(b) It is much more difficult to gain a harmonious conception of the first two visions of Amos (7^{1ff.}). In the third of them (v. 7^{ff.}) it is to one object alone, the plumbline, that the Divine oracle attaches itself; while the object of the fourth, the basket of harvest fruits, serves merely as a symbol of the harvest which is to be sent to the people. The fifth vision (9^{1ff.}) is the first to offer, although described with extreme brevity, an analogy to that of Isaiah. But, in the opinion of the present writer, it is possible to regard the others also, in spite of their peculiarities, as something more than merely the literary garb of prophetic ideas. This latter device makes its appearance only after the prophetic vision has had a considerable history, and the public ministry of the prophets has had to yield more and more to the activity of the pen. Moreover, the testimony to visions on the part of *pre-exilic* prophets is confined, apart from those of Amos and Isaiah, to those recounted in Jer 1^{11, 12}. In both of the last two a single object (an almond-tree and a seething-pot) seen by the prophet furnishes the motive (and that in connexion with the immediately subsequent call of the prophet) for a prophetic announcement.

(c) In Ezekiel, on the other hand, the vision makes its appearance in a highly detailed and somewhat complicated form. As in the case of Isaiah and Jeremiah, the first vision (Ezk 1^{1ff.}) ushers in the call of the prophet. Ezekiel relates at the outset how, after the heavens were opened (*i.e.* after he had received the faculty of beholding even the supra-earthly), he saw visions produced by God. Yet it is not from heaven, but from the north, that the theophany comes, in a storm-driven fiery cloud. This conceals the very minutely described cherubim (see above, p. 644^b), and it is only at the close (v. 26^{ff.}) that we learn that they bear the platform on which the throne of God stands, with God seated upon it. The merely allusive way in which the prophet speaks of the form of Him who is thus enthroned is in accordance with the reverential reserve which we note also in Ex 24¹⁰ and Is 6¹. But the extraordinary circumstantiality of the preceding description, notwithstanding which it is impossible to form a clear conception of the objects, justifies the conclusion—not that the prophet simply coined the vision (whose exact date is given) but—that literary skill played a very considerable part in his description of it. The same remark applies to the ex-

planation attached (2^{9ff.}) to his eating of the book-roll which was inscribed with sighs and lamentations. Of course the eating of the roll, which is a materializing of the purely spiritual inspiration thought of elsewhere, likewise belongs to the realm of vision, for it is not till 3^{12ff.} that the prophet hears behind him the noise of the cherubim-chariot which bears away again 'the glory' of Jahweh. On the appended description (3^{14ff.}) of the physical condition of the prophet, *cf.* above, p. 673. When the same theophany recurs in 3^{22ff.} the prophet contents himself with a simple mention of it. On the other hand, there is a very detailed account (8^{1ff.}) of the idolatrous horrors which he saw in the precincts of the temple, when he was carried by the spirit to Jerusalem. Then follow, in the same locality, the visions (chs. 9–11) which present to his view the destruction of the city and the temple, together with the threatening address to the heads of the people. From this point the vision does not recur till ch. 37—the reanimating of the dead bones, which symbolize Israel dead, as it were, in the Exile. Here, as in chs. 8–11, there is no reason to doubt that the prophet really saw what he asserts; but the individual descriptions and, in quite a special sense, the detailed interpretations and practical applications must certainly be once more set down to the account of a literary performance. The same is true in quite a peculiar measure of the great vision in the last part of the book (chs. 40–48), where the prophet sketches the future form of the temple and its cultus and of the land. Here the details are so multiplied and involved that it has been plausibly suggested that the prophet worked out his description with the aid of maps and plans. It is evident that the matter which could suggest such a method does not belong to the contents of the vision. Elsewhere the transition from the sphere of the vision to that of literature is betrayed by the elaborate justification of prescriptions which are to come into force only in the future; so, especially, the new regulation about the priesthood (44^{3ff.}), and the distribution of the tribes (ch. 48). These prescriptions and much else are fitted into the framework of the vision only by being put in the mouth of the prophet's guide (*cf.* 40³⁴), or even of Jahweh Himself.

(d) The latest * accounts of visions proper lie before us in the eight night-visions of Zechariah (1^{8–6}). We have already (p. 673^b) pointed out that, apart from 4¹, there are no indications pointing to a cataleptic condition of the prophet when he had these visions. Hence it appeared to us quite improbable that 'the angel who talked with me' (1^{8, 13, 23} etc.) is to be referred, with Duhm, to the seemingly double consciousness of a cataleptic. Rather might we perhaps say, with Baudissin (*Einleitung in die Bücher des AT*, Leipzig, 1901, p. 565): 'The introduction of this medium (the so-called *angelus interpretis*) between God and the prophet changes the character of OT prophecy, which was based upon the notion that the prophet was *directly* filled with the Divine spirit.' This already implies that in these night-visions the great bulk of the matter is to be attributed to the prophet's own imagination and literary activity. On several occasions (so, quite especially, in 1^{14ff.} 2^{10ff.}) the description of the vision passes over into the usual tone of prophetic address.

iv. *THE FORMS OF THE PROPHETIC MESSAGE.*
—1. Amongst the various ways in which the prophets communicated the revelations they received, by far the most important place, at least in the early period, is taken once more by the *word* or

* The visions of Daniel, which really belong to a different category—that of apocalyptic—will be dealt with later on (see p. 714).

the prophetic address, whether in the form of a brief oracle or of a somewhat longer, clearly connected discourse. But it is only with reservations that the view can be maintained that the extant oracles and discourses of the earlier prophets are practically, without exception, to be regarded as the (subsequent) written record of what were originally actual spoken addresses. To be sure, in every instance where the prophet himself gives place and time, and names ear-witnesses of his discourse (as, for instance, in Is 7^{1st}), we must find the record of an actual address. But even such a case as this does not exclude the use of much freedom in regard to the form and the dimensions of what is committed to writing.

Here, once more, we have to keep in mind what holds good of the whole of the literature of the OT, namely, that it aims not at a diplomatically exact record of words and actions, but at exercising a religious influence, and hence that the prophet, when he became an author, must have reserved to himself full liberty as to the method by which he was to achieve this result. But, above all, must this liberty be postulated where it was not till years had elapsed that a prophet reproduced from memory a long series of addresses and dictated these to an amanuensis, as we are told Jeremiah did after twenty-three years of prophetic activity (Jer 36^{1st}). In such a procedure it would be impossible for the earlier addresses to escape being influenced in a variety of ways by the later experiences and views of their author. And, when the roll written by Baruch was burned by king Jehoiakim, the greatest freedom was used once more in reproducing it: 'Then took Jeremiah another roll, and gave it to Baruch the scribe, the son of Neriah; who wrote therein from the mouth of Jeremiah all the words of the book which Jehoiakim king of Judah had burned in the fire; and there were added besides unto them many like words' (Jer 36³²). But there are also other Prophetic books, like that of Amos, whose very dating (1¹ 'two years before the earthquake') shows it to have been composed later than the events, and no less those of Hosea and Isaiah, which bear such evident traces of the subsequent reduction to writing and of the polishing and expansion of the supposed spoken address, that it is scarcely possible anywhere to maintain the absolute identity of the address and its report. In saying this we are leaving entirely out of account the fact that in the end the Prophetic writings were subjected almost, without exception, to editing by other hands—a process which introduced changes not only in their dimensions, but in many instances even in their language. It is useless to seek to deny this. On the other hand, however, it is perverse to see in this a destroying of the character of revelation and of the high value in general which belongs to the word of the prophets. Whatever may have suffered from all those influences which are unavoidable in the course of human tradition, the genuine Divine word retains amidst it all a power and a majesty which even at the present day do not miss their effect.

2. The prophetic address occasionally avails itself, with a view to heightening the effect, of the forms of poetical art, such as the parable (Is 5^{1st}, 28^{2nd}); even the 'riddle' [חֵידָה, *hīdāh*] of Ezk 17^{1st} is there designated at the same time 'comparison', 'parable' [מִשְׁלָל, *māshāl*], or plays upon words (e.g. Mic 1^{10th}); nay, in the pre-exilic period, and repeatedly even in later times, it passes into poetic rhythms.* We must be content, however,

with merely alluding to this, for it lies outside the scope of an article dealing with the history of religion.

3. Full notice must be taken, however, of the *symbolical actions* whereby the prophets gave, as it were, a concrete form to the truths they proclaimed. We meet with an example of this even in very early times, when Ahijah of Shiloh (1 K 11^{30th}) rent his new mantle into twelve pieces and gave Jeroboam ten of these. Here the interpretation follows straight upon the action, whereas in 1 K 22^{1st} the latter comes after the prophetic oracle. With the writing prophets the state of things is the same with symbolical actions as with the vision. At first rare and simple, these actions occur in Ezekiel in considerable numbers, and at times in so complicated a form as to justify the question whether they are meant to be thought of as actually performed, and not simply as the literary garb given to prophetic ideas. In Amos, Hosea, Micah there are no examples.

(a) In Isaiah, as there is only one vision, so there is only one symbolical action (ch. 20). The prophet is to go about for three years naked (i.e. without his upper garment) and barefooted, and thus to furnish an impressive emblem of the condition of the Egyptians and Ethiopians going into captivity. But this action of his serves also, as v. 6 shows, a practical purpose of extreme importance, namely, to keep Judah from foolishly revolting from Assyria, through trust in the delusive aid of the Egyptians and the Ethiopians. The symbolical action then appears here in the direct service of the Divine guidance of the people by means of the prophet, and hence (like all the symbolical actions we meet with in the writing prophets) is directly commanded by God.

(b) After Is 20 the next instances of symbolical actions occur in the life of Jeremiah. In Jer 13 the prophet is told to buy a linen girdle, and first to put it upon his loins and then to hide it in a hole of a rock by the water.* The consequent destruction of the girdle is to symbolize the inevitable destruction of Judah and Jerusalem. With a like aim he goes to Topheth (19^{1st}), the place of child-sacrifice, and before the eyes of many witnesses breaks an earthen pitcher—an action whose significance is heightened by the scene where it takes place. According to 27^{1st}, Jeremiah, in order to symbolize the necessity for Judah's submitting patiently to the yoke of Nebuchadrezzar, places bands and yoke-bars upon his own neck (cf. also 28¹⁰, 13). It is noteworthy that the explanation of this symbolical action, along with a corresponding warning, is sent also to the kings of the surrounding peoples—a strong proof that the prophet felt that he spoke on behalf of the God who rules over all. It is a very crass misconception that sees here an unbecoming interference with foreign politics, or even an evidence that the prophet acted thus because he was in the pay of the Chaldeans. Finally, our present category includes in a certain sense also 43^{3rd}, where the prophet, by Jahweh's instructions, buries great stones in the clay-ground in front of the palace of the Pharaoh at Tahpanhes, as a testimony to the

to be supposed; cf. e.g. Am 5^{2nd}, Is 12th, 25th, 132nd, 144th, 162nd, 221st-4 37^{2nd}, 47^{1st}, 52nd, 57^{1st}, 60^{1st}, Jer 92nd, 15th, Ezk 19^{1st} etc. Cf. art. POETRY in vol. iv.

* If by *Pērāth* (פֶּרֶאֶת) of v. 4th the river Euphrates must be understood, there is no alternative but to regard the account of the whole transaction as simply a literary device, or even (with Duhm in his Commentary on Jeremiah, p. 119) as the free invention of a late redactor. For Jeremiah cannot possibly have undertaken the long journey to the Euphrates twice over, merely to establish the fact that a linen girdle is ruined by damp. But now L. Gautier (cf. *Dote aus Zion*, July 1894, p. 62 f.) points to an 'Ain' ('fountain') *Fara* in the neighbourhood of Anathoth, the home of the prophet. Assuming this to be meant by *Pērāth*, all difficulty disappears (cf. *Enc. Bibl.* ii. 1429).

* Thus, for instance, the so-called *kīnāh* or 'mourning measure' (discovered by Ley and Budde), i.e. the bringing together of a longer and a shorter verse-member (generally 3 and 2 'rises'), plays a much larger rôle in the prophetic writings than used

fact that Nebuchadrezzar would one day set up his throne over these stones, to execute grim judgment upon Egypt.

The above instances, however, exhaust the symbolical actions of Jeremiah; for his purchase, by Divine command, of a field, while he was in prison (32^{7ff.}), is a legal transaction, whose symbolical sense, as we learn from v. 25^{f.}, was not evident to the prophet himself till afterwards. Moreover, all the above enumerated symbolical actions are as simple as they are impressive; they are easy to interpret and easy to remember.

(c) Much more circumstantial is even (a) the first of the emblematical transactions required of Ezekiel (4^{1ff.}). He is to draw upon a tile a plan of Jerusalem, to set in array various siege appliances, nay even whole armies, against the city, and, finally, to place an iron pan between himself (as God's representative) and the city. Still the direction to give the house of Israel a 'sign' in this way was quite capable of execution, whatever room there may be for difference of opinion as to the method by which the prophet depicted the besieging armies.—(β) But it is different with the case contemplated in 4^{4ff.}. Here Ezekiel is to lie upon one side, bound with cords to prevent his turning over on his other side, and first to bear for 190* days the guilt of Israel, and then for other 40 days the guilt of Judah—these numbers corresponding to the number of years, respectively, of the captivity of the two kingdoms. No appeal to the prophet's alleged tendency to catalepsy will suffice to make a literal fulfilment of this command conceivable: for this reason, apart from any other, that such a prolonging of the symbolical transaction over nearly eight months would have tended to rob it of effect, or at least would have been quite unnecessary for the purpose in view. We must therefore assume that the symbolical action was indeed actually carried on by the prophet for a time, but that its prolongation to 190+40 days is merely part of his subsequent explanation of it.—It is only upon this assumption, again, that (γ) the prescription (4^{9ff.}) as to the stinted use of unclean food by the prophet while he was bound as above described,† can be conceived as capable of being obeyed. A daily allowance of 20 shekels [about 5 oz. avoird.] weight of the composite bread prescribed would scarcely have sufficed to support life for 230 (not to speak of 430) days.—(δ) Very graphic and impressive, on the other hand, is the fourth sign (5^{1ff.}). The prophet, having cut the hair of his head and beard, burns a third of the hair, smites about another third with a sword, scatters the other third to the winds, and finally burns some of the hairs that have been concealed in the skirt of his mantle—all this as a sign of the fate that was reserved for the people of Judah. Even if the use of a balance (v. 1¹) to apportion the hair suggests the somewhat mechanical fondness of Ezekiel for exact measures and numbers, the whole transaction is well fitted to make the most lasting impression; and one can well imagine the eager attention with which the onlookers watched the prophet at work, and listened to the explanations that followed.—(ε) No less impressive is the fashion in which he is told (12^{1ff.}) to give the people an emblematic representation of the cheerless departure into exile. He is to bring out his baggage by day in their sight,

and in the evening is to make his way, with his face concealed, through a hole cut in the wall of the house.—(ζ) Again, 12^{17ff.} is certainly to be understood in the sense that the prophet, as he eats and drinks, is to exhibit all the signs of terror, in order to portray to those about him the fear and horror of the besieged in Jerusalem.—(η) In 24^{10ff.} the symbolism consists in the neglect of the mourning customs enjoined by usage.* The prophet himself testifies how much the curiosity of his countrymen was excited by this very strange neglect. All the more impressive on that account must have been the explanation he gave of it.

All the symbolical actions of Ezekiel as yet described had but one purpose: to exhibit the certainty and the terrors of the Divine judgment upon Judah. In opposition to these there is at least one action, of a very simple kind, whose interpretation issues in a *comforting promise*. We refer to the two staves, inscribed with the names of Judah and Joseph, which were to be joined together in one in the hand of the prophet, as a sign that the two separated and apparently ruined kingdoms of Israel were to be restored and united in the old home under *one* king.

The threatenings, which the previous symbolical actions of the prophet served to emphasize, were literally fulfilled; but the restoration, in spite of the very definite terms of Ezk 37^{19ff.}, included only Judah—an undeniable proof of the 'conditional' character of prophecy. The firm conviction of the prophet that at a given moment he was giving utterance to a genuine message from God, does not exclude the possibility of God's ways afterwards taking a different turn.

(d) Something similar applies to the solitary instance of a symbolical action (if this designation can be applied to it at all) in the post-exilic period, namely, the making of a costly crown† from the gifts sent by the Babylonian Jews (Zec 6^{10ff.}). If it is the case that in v. 11 the coronation of Zerubbabel is enjoined, the symbolical action consists in the anticipation and therewith the pre-announcement of a very important event. But it is the last action of its kind—a clear proof that Jahweh prophecy of the fashion inaugurated by Amos had come to an end. Along with a vivid consciousness of being the immediate recipients of a Divine revelation there disappears also any motive for seeking by accompanying action to give an impressive concrete form to the contents of the revelation.

v. THE CONTENTS OF THE PROPHETIC MESSAGE.—1. *The conception of God*.—To the writing prophets, as to the men of earlier days, Jahweh is primarily the God of Israel. To emphasize this was laid upon the prophets as their principal duty: to preach repentance to the people, to hold up to them their ingratitude towards the Creator of their national existence, their Deliverer from Egyptian bondage, their constant Benefactor for so many centuries. But, with all this, Jahweh is no longer simply the God of Israel in the old sense

* The procedure described in v. 3^{ff.} is expressly stated (v. 3^a) to be a 'parable' and not a symbolical action.

† The present text of Zec 6^{11ff.} is undoubtedly corrupt, but its correct restoration is still a matter of dispute. On the ground of the plural 'crowns,' Ewald suggested as the original: 'Place [them] upon the head of Zerubbabel and Joshua,' etc. But the singular verb (7:77) in v. 14 shows incontrovertibly that only *one* crown was in view—that, namely, of the Messianic king. In this way Joshua disappears from v. 11, having been first introduced when, under the post-exilic theocracy, the high priest was actually at the head of the State. The question now is whether v. 11 read, 'and place it upon the head of Zerubbabel' [this is favoured by 'to him' of v. 12], or whether v. 11^b is to be struck out altogether [and then 'to them' to be read in v. 12]. In any case, in view of 4⁹, the crown is to be thought of as destined for Zerubbabel, even if the actual crowning is reserved for a later occasion, with a view to which the crown is directed (v. 14) to be laid up in the temple.

* So, with most moderns, we should read (following the LXX) in place of 390. From the beginning of the exile of Israel to that of Judah there are reckoned in round numbers 150 years [in reality they amount to only about 130, or, counting from 734, to 142], which are followed by 40 years of joint exile. Nothing can be made of the number 390.

† That in v. 9 the '390 [LXX '190'] days' are an erroneous gloss, is evident from the simple fact that, in view of v. 3^c, it should be '430 [230] days.'

of the national God, whose sphere of power ends, strictly speaking, at the boundaries of His land. On the contrary, we note on the part of all the writing prophets a strong, and almost everywhere successful, effort to burst the barriers of the old particularist conception of God, and to lay prominent emphasis on the unconditioned superiority of Jahweh to every form of restriction by space or time, and especially to every restriction of His sphere of power. The old representation of the national God is still at work in so far as the manifestations of His omnipotence, in the world of nature as well as in dealing with the heathen world, are almost always connected with His purposes towards His people. Yet there are not wanting approaches to a *Weltanschauung* which brings even the heathen nations, and that on their own account, within the scope of the Divine rule of the world and plan of salvation.

(a) In seeking to establish these propositions in more detail, we may look first at what is said of the *Person of God*. It was an unavoidable necessity that even in this period the analogy of the human personality should still be used to give a clear, nay even an intelligible, idea of the nature and working of the Divine personality. Even we, who stand on Christian ground, must have recourse to the same analogy if we wish to set up the concept of a living, energetically active, Personality. Hence even the prophets resort not infrequently to anthropomorphisms and anthropopathisms, which, in early times (cf. above, p. 627^b) owed their origin to the naïve belief in Jahweh's possession of a human bodily form. But there is not a single trace that they continued to share that naïve belief. When Isaiah, in the vision which marked his call to the prophetic office (6¹), beholds Jahweh seated upon a throne high and lifted up, no doubt a human form is here thought of. But it must be remembered that this is a *vision*, a sight beheld with the spiritual eye of the prophet, and, moreover, he says nothing more about the figure on the throne than that it had a long flowing train. He does not thus go beyond the simple indication of a splendidly-clothed, majestically-enthroned, ruler.

We must by no means conclude from the above single instance of the localizing of Jahweh in the earthly temple [for nothing else can be thought of, in view of the 'house' of Is 6⁴ and the altar of v. 6⁶], that during this period the notion was still retained that Jahweh dwelt in a grossly material fashion in the sanctuary. The temple, it is true, and Zion in general, is the spot where Jahweh manifests Himself: He has Himself founded it as a precious corner-stone of the theocracy (Is 28¹⁶), as a refuge for the afflicted of His people (14³²); He roars from Zion, and causes His voice to be heard from Jerusalem (Am 1²); He dwells on Zion (Is 8¹⁸), where, in the form of the sacrificial hearth, he has His fire and His furnace (Is 31⁹; cf. also 29¹⁴, where *'āriel* probably stands for 'hearth of God'). Hence, in praying, one readily turns towards the city and temple of Jahweh (1 K 8^{38, 44, 48}, but cf. also v. 22²). But numerous other passages leave no doubt that, notwithstanding all this, heaven was regarded as the proper dwelling-place of Jahweh, as had already been the case even in the preceding period (cf. above, p. 646^b f.). What dwells on Zion is not the Person of Jahweh in the most real sense, but a more or less secondary representation of this, such as His 'glory' (cf. above, p. 639^f.) or His 'name' (cf. the references, especially those from Deuteronomy, p. 640^b f.). He Himself is enthroned in heaven. From there He spoke already to the people at Sinai (Ex 20²², Dt 4³⁶); there is His holy dwelling-place (Is 31⁴, Mic 1² [where the

'holy palace' must, in the light of v. 2, be understood of heaven], Dt 26¹⁵, 1 K 8³⁰); there He hears the prayers of His people (1 K 8^{32, 34} etc.), when they spread forth their hands towards heaven (v. 22²). But it comes to be strongly felt that this localizing of Jahweh in heaven, if taken literally, amounts to an unworthy limitation of His boundless being. Hence it is more than once stated emphatically that not only the heaven to its utmost heights, but also the earth with all that it contains, belongs to Him (Dt 10¹⁴); that He alone is God in heaven above and on the earth below (Dt 4³⁹, Jos 2¹⁴). Nay, in 1 K 8²⁷, in the prayer of Solomon at the consecration of the temple, it is positively declared that heaven to its utmost bounds cannot contain Him, not to speak of the earthly house which Solomon has built for Him. When, again, in Jer 23²⁴ Jahweh asks, 'Do not I fill heaven and earth?', it is true that we must be careful not to give to this question anything of a pantheistic sense, for this would be in the sharpest conflict with the OT conception of God. But, on the other hand, the above question certainly contains a protest against the crass notion of Jahweh as the God of heaven, and at the same time shows an approximation to that conception which is so very difficult to the human mind—the conception of a purely spiritual being. A clear formula for the notion of pure spirituality, such as we find in Jn 4²⁴, was beyond the reach of the Old Testament. But when Isaiah (31³) exclaims, 'The Egyptians are men, not God; and their horses are flesh, not spirit,' he manifestly contrasts man and perishing flesh with God, who is spirit. In like manner, the analogy of the human personality in the matter of the so-called anthropopathisms is denied; e.g. Nu 23¹⁹ (1 S 15²⁹), where it is declared that 'God is not a man that he should lie, nor a son of man that he should repent' (cf. also Hos 11⁹).

The great advance in the spiritualizing of the notion of God shows itself clearly in two other points—

(b) The first of these is that nowhere in the pre-exilic prophets are *angels** spoken of as beings mediating between God and man. For the seraphim in the vision of Isaiah (see above, p. 644^a), which might readily occur to one's mind, are really the retinue of Jahweh, not His messengers who are supposed to be at a distance from Him, and who perform His will. The latter notion is indeed contradictory of the idea of a living presence of God, and hence it is wanting in the prophets, however familiar they may be otherwise with the conception of angels.

(c) The other evidence of the spiritualizing of the notion of God is the unwearied polemic the prophets carry on against the *images* of Jahweh in both kingdoms. At one time it used to be assumed that this polemic was almost exclusively directed against the images of heathen gods, or, at most, against the golden bulls of the Northern kingdom, whose construction was viewed as a glaring violation of the Second Commandment in the Decalogue. But we found (see above, p. 641^b) that the making of images of Jahweh must have been regarded, down to the 8th cent., and that in the most widely separated circles, as quite unobjectionable, and hence there is the greatest difficulty in holding that the prohibition of images was an original feature of the Decalogue. In the Elijah- and Elisha-narratives there is not a trace of any polemic against the bull worship of the Northern kingdom. All the more marked is the fashion in which the indignation of the writing prophets is roused when that God who in His majesty is exalted above

* On Hos 12^{4c} as an allusion to a manifestation of God, see above, p. 638^b.

everything earthly is brought down to the sphere of the visible and transitory—a process which only too readily leads also to a dishonouring of Him.*

The answer to the question whether *Amos* had already opened the polemic against the images of Jahweh, depends upon how we interpret Am 8¹⁴.† The 'sin of Samaria' may there refer to the golden bulls of Jeroboam I.; but the text is probably corrupt. As to *Hosea*, it cannot be proved from Hos 3⁴ that he expressly repudiated the ancestral representation of Jahweh in the form of the 'ephōd' (see above, p. 641^a) or the 'tērāphim' (see above, p. 642^b), for his primary object in this passage is simply to affirm that Israel in exile will have to do without everything which at present it regards as indispensable. On the other hand, there are other passages which leave no doubt that, to the mind of Hosea, the Divine images of gold and silver, the work of men's hands, and the bull figures pre-eminently, were an abomination; cf. Hos 8⁴⁻⁶ (especially v. 5 'thy bull, O Samaria, stinketh') 10⁵ 13² 14³. The polemic of *Isaiah* against the אֱלֹהִים (prob. originally 'gods,' but also the equivalent of 'nothings,' and hence to the prophets a welcome occasion for a play upon words) applies not only to the idols of the heathen (Is 10¹⁰ 19³) and the gods whom they represented (19¹), but to the images of Jahweh (28¹⁸ 20¹⁰ 10¹¹). Even the latter are only men's work, and on that account contemptible (25¹⁷ [in the latter passage the 'altars' are to be struck out as an incorrect gloss] where the Divine images are called 'the work of your hands'; in Jer 1⁵ 25⁵ 32³⁰ 'the work of their own hands' may refer to images of Jahweh, but perhaps includes also, as it certainly does in 44⁸, actual heathen idols). In Dt 4¹⁶, the representation of Jahweh by any figure is strictly forbidden, on the ground that Israel at Horeb saw nothing of this kind; while in 27¹⁵ a curse is pronounced on the making of a carved or a molten image by the hands of an artist. Here, as in the Decalogue, the reference is to every species of Divine image, including those of Jahweh. The rigour of the Deuteronomist has all the less power to astonish us, seeing that he repudiates in express terms, not only the 'āshērāh, or sacred pole at places of sacrifice, but also (Dt 12³ 16²²) the mazzēbāh, which, in earlier times, were regarded as quite unobjectionable (see above, p. 620).

(d) What we have said about the character of Jahweh as God of heaven, and the sharp rejection of all pictorial representations of the Deity, may seem to have already answered another question, namely, as to the *solity* of Jahweh, as contrasted with the mere henotheism (see above, pp. 625^b, 635^a) of earlier times. Now, it must indeed be remarked that it is still customary to cite, as proofs of the absolute monotheism of the Prophetic period, a number of passages which in truth are intended only to emphasize Israel's obligation to reverence Jahweh alone, and which thus amount simply to henotheism.‡ Such are, for instance, the very

frequent cautions in Deuteronomy against other gods; in none of the passages containing these is there any expression of opinion as to the reality or non-reality of these 'other gods.' Even the famous 'Hear, O Israel' of Dt 6⁴, which the Jews and many Christian exegetes are wont to regard as the formulated fundamental confession of monotheism, signifies by itself no more than that Jahweh is the God of Israel, Jahweh alone,* and that hence the veneration of Israel is due to Him alone. The declaration is thus on a parallel with the First Commandment. Hos 13⁴, again, says only that Israel knows (or should know) no other God, and has experienced no other deliverer than Jahweh. Moses testifies in Dt 3²⁴, as Solomon does in 1 K 8²³, that Jahweh the God of Israel has no other god like Him, either in heaven above or on earth below. But here the existence of other gods seems to be yet always assumed, precisely as in the question of Ex 15¹¹ 'Who is like thee, O Jahweh, among the gods?'; or in the designation of Jahweh as 'God of gods' and 'Lord of lords' (Dt 10¹⁷); or, finally, in the statement of the prophet: 'Before him (Jahweh) trembled the idols of Egypt' (Is 19¹).

There can, however, be no doubt that the passages last cited are to be set down simply to the account of poetic colouring or of an involuntary accommodation to the still subsisting popular conceptions. The real belief of the leading circles of thought is presented to us—at least in the later Deuteronom. stratum—in the confession: 'Jahweh is the [true] God' (Dt 7⁹); 'Besides him there is none' (43³⁸, 39, 1 K 8⁶⁰; cf. also Is 37¹⁶, 2 K 19¹⁵). But the same faith is held by the writing prophets, although it is never reduced to so precise a formula. Without it the conception of Jahweh as God of heaven could never have established itself in the shape above (p. 679) described. The God to whom 'belongeth the heaven to its utmost heights, the earth and all that is upon it' (Dt 10¹⁴), cannot possibly share this sovereignty of His with another god. It might indeed appear surprising that the allusions to the creative power of Jahweh, in which afterwards His uniqueness as God of the whole world comes into the sharpest prominence, are so scanty in the pre-exilic prophets. For, apart from the oft recurring Divine name *Jahweh Zēbā'ōth*, which, in the mind of the writing prophets (see above, p. 637^b), doubtless includes a confession of the supramundane power and glory of Jahweh, and leaving out of account occasional allusions to Jahweh as bestower of the rain (Am 4⁷, Jer 5²⁴ 14²²) and, conversely, as the author of drought and famine, all that we find is an express reference in Jer 27⁵ to Jahweh as the Creator of the earth, with man and beast, and an allusion (put in the mouth of Hezekiah in 2 K 19¹⁵ = Is 37¹⁶) to Him as the Creator of the heaven and the earth.†

But the scantiness of these allusions should not excite our wonder. It is richly counterbalanced by the abundance of other passages which witness to the *solity*, or at least the incomparable omnipotence, of Jahweh in the *world of nations*. It was not the function of the prophets to solve cosmic or purely metaphysical problems, but to hold up

Beiträge zum positiven Aufbau der Religionsgeschichte Israels, ii.: 'Der Monotheismus der legitimen Religion Israels,' Leipzig, 1889.

* This interpretation of the words is claimed, in our opinion rightly, on the ground of the accentuation. The prevailing explanation, on the other hand, yields the sense: 'Jahweh our God is *one* Jahweh' (i.e. not broken up into a number of local deities; cf. Zec 14⁹). Even thus the question of the reality of the strange gods is still left quite out of account.

† So far as their contents are concerned, Am 4¹³ 58⁶, 95⁶ would also fall under this category; but these passages are now pretty generally regarded as late glosses. The same remark applies to Jer 10¹², and 32²⁵, where we read of a covenant of Jahweh with the day and the night, and of His appointing of the ordinances of heaven and earth.

* We see from Hos 13² that in Hosea's time it was still customary to kiss the bull-images, and thus to put them (like the images of Baal in Elijah's time, 1 K 19¹⁸) on a footing of equality with the God whom they were meant to represent. Also the expression הָלַךְ אַחֲרָיו (Ex 32¹¹, 1 S 13¹², and often, in sense of 'propitiate Jahweh') originally means in all probability 'stroke the face of [the Divine image]', and points to a practice which must have been in vogue wherever images of Jahweh were worshipped.

† Am 24, with its allusion to the (Judæan) אֱלֹהִים, lit. 'lies,' [= 'idols'], is generally recognized to be a later interpolation.

Religionsgeschichte*, i., Leipzig, 1876 (Studie 2 'Die Anschauung des AT von den Göttern des Heidenthums'); Baethgen, *Beiträge zur semit. Religionsgeschichte: der Gott Israels und die Götter der Heiden*, Berlin, 1880 [cf. esp. pp. 131-152 'Israels Verhältniss zum Polytheismus']; Ed. König,

to the eyes of their people the greatness of their responsibility and the dreadfulness of the God to whom they had to give account. Thus the judgments of God, present and future, supply a constant motive to portray Jahweh as the God who has at His command not only the resources and powers of the whole Universe, but, no less, the nations of the earth, when it is necessary to realize His purposes. When He commences a lawsuit with His people, heaven and earth have to listen in reverential silence (Is 1²; cf. also Mic 6^{1f}, Hab 2²⁰); and, when He comes to execute judgment, the whole course of nature reels (Mic 1^{3ff}, Nah 1^{3ff}), and men hasten to hide themselves in terror of His majestic appearance (Is 21⁰, 19, 21). The mighty Assyria, with all its subject peoples, is like a lifeless instrument in His hands if He cares to employ it for the chastisement of Israel. He whistles for it from the end of the earth (Is 5²⁶), much as the shepherd whistles to his dog, and it comes hurrying up. And if, in its haughty conceit, Assyria fancies that it has accomplished by its own strength what it has done only as the chastising rod in Jahweh's hand (Is 10³⁷), it has to listen to the crushing question: 'Does the axe boast itself against him that heweth therewith, or does the saw magnify itself against him that worketh it?' (v. 15). Then by a fearful judgment is Assyria taught the truth of the all-superior might of Jahweh (vv. 16^{ff}, 25^{ff}). The rôle that Assyria plays in Isaiah is played in Jeremiah by 'all the families of the kingdoms of the north' (Jer 1¹⁵). These are called by Jahweh to execute judgment upon Jerusalem; He has given all lands into the power of Nebuchadrezzar (Jer 27⁶; cf. 23¹⁴, Hab 1², also 2 K 15³⁷). Jahweh's judgments upon foreign nations are for the most part occasioned by their hostility to Israel (so Am 1^{3.9.11.13}, Is 14^{24ff}, 17^{12ff}, 18^{3ff}, Nah 3^{3ff}, Hab 2¹⁶). Yet passages are not wholly wanting which speak of an unlimited exercise of the Divine sway amongst the nations, even apart from any such motive. Jahweh punishes Moab for its outrage on the king of Edom (Am 21⁶); it was Jahweh that brought the Philistines from Caphtor and the Arameans from Kir (97). He stirs up the Egyptians against one another, and gives them over into the hand of a cruel lord (Is 19^{4.4}); He produces in them a spirit of dizziness (v. 14). He has determined upon the destruction of Tyre, 'to stain the pride of all glory, to bring into contempt all the honourable of the earth' (23⁹, cf. also v. 11). At His command, Jeremiah hands to all kings of the earth the intoxicating cup, and, whether they will or no, they must drink it (Jer 25^{15f}).

In view of all these testimonies to a lofty view of history and a conception of God which embraced the whole Universe, we can now see also the polemic against images in its true light. We perceive how to the prophets every attempt to give to this powerful, majestic God a petty visible form, must have been an abomination. But we understand also how, in the case of the heathen idols, they could recognize no reality except that of metal, wood, and stone. This is not yet (except perhaps in Hab 2^{18f}, Jer 21¹⁶^{18f}, and in the later Deuteronom. stratum, Dt 28^{36.64}) expressed so definitely as in the next period; but the above-described notion of God leaves no doubt that there is no room for real 'other gods' alongside of the one God who rules over the Universe and the world of men. A proof of this is found even in the numerous designations of the idols which lay stress either upon their repulsiveness or upon their utter nothingness (or unreality). Some at least of these designations are as early as the pre-exilic period. Evidently, there lies at the root of almost all of them the assumption that the gods whom they represent

are nothing but vain imaginations of the heathen. To the first category, that of opprobrious epithets, belong the following terms: עֲבֹמִים 'abomination' (Jer 4¹ 7³⁰; and used repeatedly by the Deuteronom. redactors of the Books of Kings, 1 K 11⁵, 2 K 23^{13.24}), and, with the same sense, מְרִיבִים (2 K 23¹⁹); still later probably is מְרִיבִים, i.e. perhaps 'round blocks or dolls,' if not rather, 'excrements' (Dt 29¹⁶ 17 'of wood and stone, of silver and gold,' 1 K 21²⁶, 2 K 17¹², and oft. in Ezekiel). To the second category, terms expressive of unreality, belong: לֵבָיִם, lit. 'breath,' 'nothingness' (Jer 2⁵, 1 K 16¹³, 2 K 17¹⁶; in plur. Jer 8¹⁹ 14²²); and קֵץ, 'vain,' 'null' (Jer 18¹⁵). Cf., finally, the threatening of Dt 4²⁸ (that is to say, within the later framework of Deut.) that Israel in exile will have to serve gods which are the work of men's hands [and nothing more], wood and stone, which can neither see nor hear nor eat nor smell.

(c) If, by way of supplement to this, we further ask in traditional fashion how the being of Jahweh reveals itself in the prophets in the way of special *attributes*, we must from the very first renounce all idea of discovering any didactic abstract statements or purely scholastic definitions. Here, again, it holds good that the mission of the prophets was primarily to preach repentance to their people. Hence they exhibit to them their God in a light corresponding to changing needs, now as the terrible avenger of their apostasy, now as the long-suffering and merciful One. Nay, these qualities always make their appearance first in the special bearing of Jahweh in concrete instances. It was not till the days of the late-Jewish theology that it became possible to draw up a 'doctrine of the attributes,' upon the basis of a scholastic analysis of the living being and acting of Jahweh, which to the prophets had been the object of direct vision.

(a) Under the heading of 'attributes' it has from the first been usual to discuss, above all, the holiness* of God, and to follow the definition, borrowed from dogmatics, according to which God is called holy because He loves only good and hates evil. But we shall find that this definition, however it may answer to the NT conception of holiness, is true only in a very limited measure to the OT conception.

We might have spoken of the latter conception, even in dealing with the earlier periods, for the terms קֹדֶשׁ 'holy,' קִשְׁיָה 'holiness,' and קָדַשׁ 'to declare holy,' 'to consecrate,' are, beyond doubt, very ancient. But they occur primarily—and that as marking an attribute especially of things, rarely of (human) persons—in a ritual connexion, and, as is a matter of course in the case of things, without any ethical connotation. Anything is called קֹדֶשׁ† which is withdrawn from profane possession and use, nay even from profane touch, and in place of this is destined for the possession and service of the Deity. Thus the name 'holy' is given naturally to all the ritual apparatus, all the rooms which serve as the dwelling-place or the spot of worship of Jahweh, all the sacrificial gifts intended for Him. But the same name is given also to such things as have, for some special reason, been forfeited, not indeed to the service

* Cf. the very thorough discussion by Baudissin, 'Der Begriff der Heiligkeit im AT' (*Studien zur semit. Religionsgeschichte*, ii. pp. 1-142); R. Schröter, *Der Begriff der Heiligkeit im AT und NT*, Halle, 1892. See also art. HOLINESS (in OT) in vol. ii. of the present work.

† The etymology is disputed. There is still, however, most to be said in favour of tracing it to the root קָדַשׁ, in the sense of 'separate,' 'segregate.' At all events this answers admirably to the Hebrew usage, which is more than can be said of the proposal to trace it to the Heb. קָדַשׁ 'new,' and hence 'pure,' 'bright,' 'sparkling' (cf. also Assy. *kudûshu*, 'shining,' 'pure').

of God, but so as to be His property and that of His sanctuary. Thus the censers of Korah and his company become 'holy' (Nu 17³ [16³⁷]), and are accordingly to be employed to overlay the altar. In the same way, however, even a person by unauthorized touching of what is itself holy may 'become holy,' i.e. fall forfeit to the sanctuary, enter into a special relation to God: so, for instance, by touching the altar (Ex 29³⁷) or the sacred vessels (30²⁹, Hag 2¹² etc.). In such an event, special offerings and atonements are needed in order to remove the condition of 'being holy,' which presses upon the individual as a danger. The danger lies in the fact that, while he is in this condition, every species of defilement, whether due to his own fault or no, may readily prove fatal to him.

It cannot occasion us any surprise that *this* use of the concepts 'holy' and 'holiness' meets us most frequently in the latest stratum of the Pentateuch, the so-called Priests' Code, for the latter is concerned, above all, with ritual prescriptions. But in this matter it is plain that it simply follows a long-established usage of language, and that, too, even long after the notion of holiness had begun to assume a positive connotation.

At a very early period we already hear (1 S 21⁵ (4)) not only of 'holy' bread (i.e. bread consecrated to God and hence withdrawn from profane use), but also (v. 9 (6)) of holy 'vessels,' i.e. clothes and weapons. The 'holiness' is here manifestly produced by special rites such as were customary at the beginning of a campaign. This is proved by the expression 'hallow a war or a festival,' i.e. prepare oneself for the conflict or the celebration of the festival by performing certain acts of consecration. There are quite a number of passages which show that this consecration, apart from certain forms of abstinence, consisted mainly in the washing and cleansing of the person and the clothes. Thus 'holy' and 'hallow oneself' come to be almost synonymous with 'clean' and 'cleanse oneself' (cf., for example, 1 S 20²⁶ where לא קָדַשׁ 'not clean' stands for one who, in consequence of a nocturnal pollution, has been incapacitated for taking part in the sacrificial meal at the New Moon festival).

When the demand is made in Dt 7⁶ 14² that Israel shall be a holy people to Jahveh its God, because He has chosen it out of all peoples to be the people of His own possession, the notion of holiness is not here restricted merely to the point that Israel has been separated from the peoples and appropriated by Jahveh to be His property alone. In that case the notion of 'holiness' would be concerned merely with a relation (as in the case of the sacred bread), and would not imply any alteration in the quality of the persons or things dedicated to God.* In reality, however, the 'holy' people means one that carefully guards against any defilement that would make it incapable of being called the people of this very God and of taking part in His worship. But here, again, it is far from being the case that moral defilement is primarily in view. What incapacitates for participating in the cultus is physical or so-called 'Levitical' uncleanness. To this category belongs every kind of contact with persons or things belonging to the realm of idol worship, as well as the touching (even unwittingly and unintentionally) of a corpse, the partaking of unclean food (Dt 14²¹), and other acts of the same kind. Even in the so-called 'Law of Holiness' (Lv 17-26, cf. also 11^{44f.}), in spite of such general expressions

* How far removed any such implication was in the oldest linguistic usage, is best shown by the designations קִדְּשׁוּ and קִדְּשׁוּ, given to those who prostituted themselves in honour of a deity (cf. above, p. 662b). Here, of course, any thought of a religious-moral quality is out of the question.

as are found in 19² 20¹⁴, we have to do, not with a demand for absolute moral holiness, but with the same caution against every species of physical defilement. The circumstance that the latter may frequently include at the same time a religious offence is left at first out of view in applying the notions of clean or holy. Hence is to be explained the fact, which is so strange from *our* point of view, that outward, physical, and it may be even unwitting defilement involves guilt, and necessitates the same sacrifices and other means of atonement as actual moral defilement. This view, which characterizes the Priests' Code, presents itself to us most clearly in Ex 19⁸, where the ideal goal of God's ways with Israel is set up as consisting in His making them a 'kingdom of priests,' a holy people, i.e. a people every member of which answers always to the conditions of perfect (Levitical) purity as these were binding at all times on the priests.

Still more marked is the filling of the concept 'holy' with moral contents, when it is transferred to God, and—what is very noteworthy—exclusively to the God of Israel. The earliest passage of this kind is probably 1 S 6²⁰, where the inhabitants of Bethshemesh, after the stroke which fell upon them for looking into the sacred Ark, ask in terror: 'Who can stand in presence of Jahveh, this holy God?' Here the word 'holy' manifestly contains the notion of terrible and unapproachable—nay, death-dealing; for there is a deep cleft between the imperishable being of the Deity and everything which is subject to decay and uncleanness. To say that Jahveh is a holy God means thus that He is *elevated* above all that is outside Him, that He holds a unique position over against all that is created. Hence it has been rightly said that the holiness of Jahveh is not a single attribute (such as 'moral perfection'), but a designation of His essential being, practically identical with the notion of being Divine (*Gottsein*). Hence Jahveh in Am 4² swears by His holiness, i.e., as is seen from Gn 22¹⁶ and Jer 22⁵, by Himself.

It may be added that expressions about the holiness of God are at first very rare. Ex 15¹¹ ('Who is like thee, glorious in holiness, terrible in exploits, doing wonders?') should probably be assigned to the later Prophetic period. Jos 24¹⁹ ('Ye cannot serve Jahveh, for he is a holy God'), from the pen of E, emphasizes, like 1 S 6²⁰, the terrible and unapproachable nature of Jahveh. All that occurs in Amos, apart from 4² (see above), is the reference in 2⁷ to the dishonouring of the *holy name* of Jahveh by shameless immorality. In Hos 11⁹ ('For I am God, and not man; as holy I dwell among you') 'holy' means raised above human passion and hasty anger.

It is in Isaiah that the notion of the holiness of God first comes to be frequently mentioned and is most sharply defined. Already in the vision that marked his prophetic call, he hears the antiphonal song of the seraphim that surround the throne of Jahveh—

'Holy, holy, holy is Jahveh of Hosts,
The whole earth is full of his glory.'

These two parallel members contain two statements, which supplement one another, about the inmost being of Jahveh. The first concerns the *immanent* being—that elevation above everything earthly or creaturely which belongs in the highest degree* to Jahveh; the second, again, the *transcendent* being—the glory that manifests itself over the whole earth (cf. above, p. 639^{f.}). In so far, now, as absolute elevation above everything earthly includes, as a matter of course, superiority to all

* On the expression of the superlative by repetition of the adjective, see Geseuius, *Heb. Gram.* 27 § 133 k.

infirmity and sin, we may speak also of an ethical content of the notion of holiness. But even in Isaiah this does not yet make its appearance expressly or quite exclusively. The designation of Jahweh as 'the Holy One of Israel' (a favourite expression with Isaiah, 1⁴ 10³⁰ 17⁷ etc.) implies that He is to be recognized and correspondingly venerated by Israel as the absolutely exalted and therefore terrible One, who is not to be provoked with impunity; for towards His despisers He shows Himself holy by His punitive justice (5¹⁰).

The only pre-exilic prophet, besides Isaiah, who uses 'holy' as a predicate of Jahweh, is Habakkuk (1²). Here the ethical quality of the Divine holiness comes pretty clearly into the foreground. Immediately after the question, 'Art thou not from everlasting, Jahweh, my Holy One?' comes the statement, 'Thou art of purer eyes than to behold evil, and thou canst not look on perverseness' (v. 13).

We have already (p. 682^a) pointed out that the holiness of God, which is so often urged in the 'Law of Holiness' as a motive why Israel should be holy, is, above all, the contrast to all Levitical impurity. This priestly notion of holiness is thus markedly inferior in depth and significance to Isaiah's conception. But the latter did not on that account disappear from the language of religion. We meet with it frequently in the exilic and post-exilic prophets (especially Deutero-Isaiah), and no less in the Psalms. And we may say that it is the essential designation of the God of Israel, laying the greatest stress, as it does, on His uniqueness and incomparable character, before which all gods recognized elsewhere shrink into their nothingness. Holy things and persons (i.e. set apart for the exclusive service of a deity) are known to other religions as well; but the holiness of its God is known to Israel only through the revelation given to it. Thus the application of the notion of holiness to Jahweh includes, when rightly understood, a kind of monotheistic confession, a far-reaching testimony to the surpassing greatness of the religion of Israel.

Although, as was remarked above, the idea of moral perfection and aversion to evil was not the primary one attaching to the notion of holiness, it is by no means strange to the Prophetic conception of God. This idea comes to light in the absolute truthfulness and fidelity of Jahweh, as well as in the unconditional character of the moral demands made on Israel; but, above all, in the attitude of Jahweh to heathen nations, for He avenges outrage and injustice everywhere on earth, even although these have not (as in Am 1³. 6. 9. 11) been inflicted on Israel. Thus He once punished Sodom and Gomorrah; thus, according to Am 2¹, will He chastise Moab for their sacrilegious treatment of the bones of the king of Edom. The prophet thus takes it as self-evident that there are moral principles which are binding upon all peoples, and on whose observance Jahweh, as an absolutely moral Being, and at the same time Ruler and Judge of all, keeps strict watch. But, above all, Israel itself must be taught that Jahweh is a God of right* (Is 30¹⁸), and of right at any price. In

* We may take this opportunity of pointing out that the Hebrew words which are commonly rendered 'righteous' (צַדִּיק) and 'righteousness' (צִדְקָה) have originally a different sense from that of forensic justice. צַדִּיק or צִדְקָה denotes a way of acting or a condition corresponding to a standard (so quite clearly in צִדְקָה כִּסְאוֹ 'correct scales,' צִדְקָה אֲבֵנֵי 'correct weights'). When used of men, it is mostly 'righteousness' (δικαιοσύνη), 'piety'; used of God, it denotes the attitude corresponding to the norm of the Divine being. But to this norm belong not only strict justice, but also God's covenant faithfulness, coupled with long-suffering and grace; and hence צִדְקָה (esp. in Is 40-66) is used not infrequently of that aspect of Jahweh's activity which has for its object the salvation of His people. See,

another connexion we shall have to speak of how He causes it to triumph over wrong and sin, even if this involves the giving up and destruction of His own people. Here it may suffice to refer to one other illustration of how widely the genuine Prophetic judgment of things differs from that of the mass of the people of Israel. Jehu's extirpation of Baal worship in Israel was carried out with terrible bloodshed. The early narrative of 2 K 9. 10 evidently saw in this a laudable 'zeal for Jahweh' (10¹⁰), and the Deuteronom. redactor, who on this point represents the general opinion of Israel in the supposed interest of the Jahweh religion, makes Jahweh Himself declare to Jehu (v. 30) that he has done what is well-pleasing in His eyes, and has treated the house of Ahab entirely after His mind. Quite different is the judgment of Hosca (1⁴). To him it appears impossible that blood-guiltiness should not be called blood-guiltiness simply because it assumes the title of zeal for Jahweh. And so the prophet threatens that the blood-guiltiness of Jezreel shall be avenged on the house of Jehu, by the destruction of the kingdom of Israel and the shattering of her military power in the Plain of Jezreel.

(β) As was remarked above (p. 681^b), the conviction of the prophets regarding other attributes of God presents itself, not in express definitions, but rather (apart from certain Divine names)* in casual utterances about His activity and the occurrences which He brings about. Thus we have His absolute omnipotence (which is already, if only in a general way, presupposed in such early passages as Gn 18¹⁴, Nu 11²³, 1 S 14⁶), which shows itself in His unconditioned supremacy over all, even the mightiest, peoples of earth (see above, p. 681^a), but no less also in such remarkable passages as Is 7¹¹. The whole context of this last passage permits of no other view than that Isaiah holds with unshaken confidence, that whatever Ahaz may demand from Jahweh as a confirmatory sign, be it as great a wonder as it may, Jahweh will bring it to pass. So firm a belief is with difficulty conceivable by us, because our judgment is influenced by all the dogmatic considerations about the possibility and the limits of miracles as a 'violation of the laws of nature'—laws which, however, are imposed by God Himself. Such considerations, it is plain, never crossed the prophets' minds. Of 'miracles' in the sense familiar to us they know nothing. They are acquainted with extraordinary occurrences and actions (מִפְלְאוֹת) which transcend the ordinary course of things, but to them nothing is so extraordinary as to be beyond the sphere of Jahweh's power (Jer 32²⁷). This conviction is a self-evident result of their notion of God; the idea of the Divine omnipotence is a postulate of their faith long before language had coined a special term for this attribute. Such a term could be dispensed with all the more readily, seeing that allusions to the Divine omnipotence served not scholastic speculations, but prominent religious interests; they brought consolation to the godly, who could now unreservedly trust to the help of their God; they were meant to instil

* On the title *Jahweh Zebôth* as used by the prophets in allusion to the supramundane power and glory of Jahweh, cf. above, pp. 637^b and 680^b. Cf., further, the designation of Jahweh as אֱלֹהֵי יִשְׂרָאֵל 'the strong One of Israel' (Is 12⁴); and as צֶדֶק 'rock' (Is 17¹⁰ 30²⁹; elsewhere in the later passages, 26⁴ 44⁸, Dt 32⁴. 15. 18. 30. 31. 37, 1 S 22, 2 S 22³. 32. 47 23³, and 14 times in the Psalms; cf. Wiegand, 'Der Gottesname zār,' etc. in *Z. A. T. W.* x. [1890] 85 ff.; and art. Rock in vol. iv. of the present work).

terror into the hearts of sinners, whom nothing could deliver from this God's mighty arm.

(7, 8) Precisely similar remarks apply to the occasional allusions to the omnipresence and omniscience of God. That the first named of these could be regarded only with reference to the Divine activity (i.e. God's cognition and Providential care) and not of the Divine substance, has been already remarked; and for the OT conception of God this is self-evident, in so far as any approach to pantheistic notions would destroy, or at least greatly endanger, the idea of the living Personality, which forms the inmost kernel of the conception in question. But this does not prevent His care from always following His people, or, on the other hand, His eye from penetrating all darkness, so that there is no secret corner where the workers of iniquity can remain unseen by Jahweh (Jer 23²⁴). If in this last statement the idea of omnipresence already touches that of omniscience, still more is this the case with the declarations about Jahweh as One who can see into the most hidden depths of the human heart. He penetrates the secret plans of the Judæans with reference to an alliance with Egypt, however carefully they may seek in their folly to conceal these from Him (Is 29¹⁵); He it is that searches the heart, tries the reins, to recompense every man according to his works, according to the fruit of his deeds (Jer 17¹⁰). And this applies not only to Israel, but He alone knows the heart of *all* men. But the strongest evidence of the firmness of the belief in the omnipresence and omniscience of God, and at the same time the most significant fruit of this faith, is the conviction (already felt in the preceding period) that Jahweh hears, and for the most part also answers, the prayers of His people.* This conviction meets us everywhere in the Prophets, most markedly perhaps in Jeremiah's manifold communion in prayer with his God, but in every case as a conviction that is a matter of course. All the more on that account may it be reckoned among the evidences that the religion of Israel, at an early date and in quite a special way through the influence of the pre-exilic prophets, was filled with an imperious desire to burst the barriers of a merely national religion, and to pave the way to a worship of God in spirit and in truth, such as should satisfy the deepest longings of every individual soul that drew near to this God.

(e) In view of the above-described strong emphasizing of the holiness of God as the absolute elevation and unapproachableness, nay the awfulness, of the Divine essence, and, in no less degree, owing to the circumstance that the preaching of repentance was the main task of the prophets, it is readily intelligible that expressions about the love, the goodness, and mercy of God should recede more into the background. The terms so frequently used of human love are transferred to God first by Hosea (3¹ 11⁹), more frequently by the Deuteronomist (4³⁷ 7⁸, 13¹⁰ 15¹⁶ 23⁵, cf. 1 K 10⁹), once also by Jeremiah (31¹³). But, apart from Dt 10¹⁸ ('Jahweh loveth the *gēr*'), it is always God's love to the people of Israel that is spoken of; and, besides, the words used for 'love' (both noun and verb) have always attached to them the notion of choice, nay, of preference; the full unfolding of the idea of the Divine love is not yet reached. In like manner, the expressions for 'mercy', 'grace', 'compassion' are in later linguistic usage transferred to God, or at least somewhat frequently employed in making predications about Him. A collection of almost all the qualities of the love of God is brought together in Ex 34⁶ ('Jahweh, a

God full of compassion and gracious, slow to anger, and plenteous in mercy and truth'), but this passage, too, is undoubtedly from the hand of a later redactor than the *J pericope* in which it is now inserted.

2. *The relation of Jahweh to Israel.*—That an intimate relation has subsisted from the first between Jahweh and Israel, is assumed in all the OT sources as a matter of course. They likewise hold that this relation is not based, as in the nature-religions, on some primeval and not to be explained condition of things, but upon a *bērith* (cf. above, p. 630⁶), or solemn transaction, at Sinai, whereby the nation becomes the 'peculiar people' of Jahweh, who by mighty acts has delivered it from the bondage of Egypt.

(a) Already in Ex 4²² J speaks of the position of Israel as that of a firstborn son. This, in spite of Jer 3¹⁹, is not to be understood as if it meant to ascribe filial rights to all other peoples as well. The emphasis lies upon 'firstborn' in the sense that Israel alone possesses all the prerogatives which belong to the firstborn as the one who is loved and preferred before all others. These filial privileges, however, are predicated only of the people collectively, not of the individual Israelite. The latter, on the other hand, is a 'servant' of Jahweh (so in Nu 12⁷), and repeatedly, of Moses; in Is 20³ of Isaiah; in Jer 7²⁵ of the prophets). Even the OT, it is true, is acquainted with the notion of individual sonship, but only* in the person of the theocratic king (2 S 7¹⁴, Ps 27 89²⁷ [of David]), not yet in the NT sense of sonship for which all men are destined.

We meet with this same conception of the sonship of collective Israel not infrequently in the Prophetic period: Is 1² 30¹⁻⁹, Dt 14¹ (where 'children' || 'people holy to Jahweh', v. 2), Is 43⁹ (where sons and daughters are distinguished) 45¹¹.† The necessary reverse side of this is the idea of the *Fatherhood of God*. Disregarding here passages where 'father' stands mainly for the physical Creator of the people (Dt 32⁶, Mal 2¹⁰), the fatherly relation is once more one that is sustained towards the nation collectively: so Jer 34¹⁹ 31⁹ (towards Ephraim as 'firstborn son'); cf. also Is 63¹⁶ (|| 'redeemer'), Mal 1⁶.

(b) The foundation of this close relation is *the election of Israel*. Israel has been chosen out of all nations to be the people of God's own possession, i.e. a highly prized and therefore carefully guarded and cherished piece of property. Thus Amos (3²) says, 'You only have I known (i.e. made the object of my intimate knowledge and close care) of all the peoples of the earth,' from which, indeed, he draws the inference, so startling to the popular view of the matter, that for that very reason Jahweh will visit upon them all their offences. The idea of a choice [verb *בָּחַל*] of Israel from amongst the numerous nations makes its appearance first in the vocabulary of the Deuteronomist: Dt 4³⁷ 7⁶ 10¹⁵ 14², 1 K 3⁸ 85³; cf. also Ps 33¹² 47⁵ (4) 135⁴ etc., and numerous passages in Is 40-66. Quite a unique contrast is drawn in Dt 4²⁰ between the choice of Israel and the fact that Jahweh has assigned to the other nations of the earth the stars as the object of their veneration.

The motive assigned for Israel's election is in 1 S 12²² the good pleasure of Jahweh, but repeatedly (so already in Hos 11¹, Dt 4³⁷ 10¹⁵) Jahweh's love to Israel (coupled in Dt 7⁸ with His oath to the patriarchs) is exhibited as the motive. A reason for this love itself is not stated. But

* Cf. Caldesaignes, *La prière dans la religion de Jéhovah*, etc., Cahors, 1899; Köberle, *Die Motive des Glaubens an die Gebetserhörung im AT*, Erlangen und Leipzig, 1901.

* In Ps 68⁶ (5) ('father of the orphans') 'father' as the parallelism shows, is figurative = 'protector', 'provider'; cf. P. Bauer, 'Gott als Vater im AT' in *SK*, 1899, p. 483 ff.

† In Hos 11¹ (MT 'out of Egypt I called my son') we should probably read, with LXX and Targ., 'his sons' (יָהוּדָיִם).

the Book of Deuteronomy labours to impress it upon the people's minds that it was not on account of any greatness (Dt 7⁷) or any special righteousness of theirs that they were so highly favoured of God. On the contrary, Israel was the smallest of peoples, and a stiff-necked people to boot. All the more, it is urged, is Israel bound to show heartfelt gratitude to God.

(c) In the closest connexion with the idea of Israel's election stands the *theologoumenon* of the 'jealousy of Jahweh.' The Heb. word (קנאה) appears to stand originally for angry zeal in general (Zeph 1¹⁸ 3⁸, Dt 29¹⁹ ⁽²⁰⁾, and very often in Ezekiel; cf. also קנא 'jealous,' in Jos 24¹⁹ and Nah 1⁷); more specially the zeal of God on behalf of Israel against the heathen, as manifested particularly in the exact fulfilment of His promises (Is 9⁶, 2 K 19³¹, and often in Ezekiel and Is 40-66). If קנא here already denotes God's jealous guarding of His honour, no less does the adjective קנא import the 'jealous' God who vehemently asserts His sole right to the love and reverence of Israel, and hence tolerates no kind of idolatry: so in Ex 20⁵ [Dt 5⁹] 34¹⁴, Dt 4²⁴ 6¹⁵, all of which passages are probably not earlier than the Deuteronom. stratum.

(d) Jahweh's special love to Israel, evinced in the choice of this people, shows itself, further, in the wise *guidance* and powerful *protection*. He accorded them from the first and all through their history. This is a favourite theme of the prophets, and very specially of Deuteronomy, and it serves in almost every instance as a motive for strong denunciations of Israel's ingratitude. Thus Amos (29⁶) holds up to the people the powerful aid given by Jahweh in the extirpating of the Canaanites, His deliverance of them from Egypt, and His 40 years leading of them in the wilderness. Hosea (11³) recalls how, in spite of their disloyalty, God taught Ephraim, like a child, to walk, took them in His arms, and bound them to Himself by cords of love. Isaiah (1³) begins his great arraignment of Israel with the words: 'I have nourished and brought up children, but they have rebelled against me.' Micah (6⁴), too, presses upon the people's notice the gracious acts of Jahweh after their deliverance from Egyptian bondage. In Jeremiah (22⁵), again, Jahweh Himself recalls the time of the wilderness wandering as the glorious bridal era of the people's history; and speaks of His marvellous guidance of them through the terrible wilderness (v. 6), and his settling of them in the fruitful land of Canaan. The transfigured light in which the initial stages of the national history appeared to a later age is witnessed to by the Deuteronom. speech of Joshua (Jos 23⁹). According to the latter, none could then stand against Israel: a single Israelite could chase a thousand foes, for Jahweh their God Himself fought for them. A glorious description of the blessings which Jahweh showered upon the people in the days of their youth is contained also in the (probably exilic) Song of Moses (Dt 32⁵⁻¹⁴).

(e) Such numerous and important benefits received from Jahweh demand, as a matter of course, Israel's gratitude and obedience to their God. This leads us now to ask, *What does Jahweh, according to the teaching of the prophets, require of the people?* In the first place, naturally, there must be abstinence from every species of idolatry and of image worship, the images of Jahweh included. This inexhaustible theme of the warnings and reproaches of Deuteronomy, as it had been already with the great prophets of the 8th cent., will have to be more fully discussed below (see p. 689 f.). On the repudiation of the images of Jahweh, see above, p. 679^a.

(a) Here the primary question that concerns us

is this. When the prophets repudiate an external cultus, to which even the cult of Jahweh, with its intermixture of heathen ritual customs, belongs, do they at least demand a purified, God-pleasing cultus? This question, if it is *sacrifice*, the proper centre of ancient worship, that is in view, is to be answered with a flat negative, and this negative—in spite of appearances to the contrary—is to be extended even to Deuteronomy. It is true that the latter law-book imperatively requires (12³, etc.) all kinds of sacrifice to be brought to the *one* sanctuary chosen by Jahweh, and the offerers are to eat and drink and rejoice there before Jahweh. But, apart from such general prescriptions as 12³, there is not a single trace of any importance being attached to the ritual at these sacrificial meals. All that the code is concerned about is that the latter, which are now ancestral, deeply-rooted practices, should be held at the *one* legitimate sanctuary * which Jahweh has chosen. Only thus is there any security that the cultus shall be so watched over that the relics of heathen ritual customs shall at length be combated successfully. Further, it is the case that Deuteronomy (26¹⁷)—no doubt, taking up a long-established custom—requires a basket of the firstfruits of the field to be handed to the priest. But it does not neglect to prescribe to the offerer (v. 5¹⁷) a prayer (the only prayer for public worship, besides that of v. 13¹⁷, in the whole Pentateuch!) which gives the true meaning and sets in a clear light the deeper significance of the outward gift as a grateful testimony to Jahweh as the bestower of the fruits in question. With regard to the so-called 'poor's tithe,' again, the most important question for Deuteronomy, as 26¹⁴ shows, is whether the gifts in question have been brought into connexion with practices which are to be regarded as a denial of the pure Jahweh-cult.

While Deuteronomy accommodates itself to prevailing customs, there are, on the other hand, sayings of the prophets proper which cannot be understood except as absolutely disclaiming any demand on God's part for sacrificial gifts—a proof, by the way, that these prophets, one and all, are as yet quite unacquainted with a law-book such as P, where sacrifice becomes a sacred duty. It is readily intelligible that for a long time there was a reluctance to admit this fact. Sacrifice appeared to form such an integral part of the religion of Israel that it was *a priori* declared to be impossible that the prophets could have carried on a polemic against it. And so it is a favourite subterfuge still to say that the prophets never polemize against the offerings *per se*, but only against offerings that are presented hypocritically, without repentance and a right disposition, with blood-stained hands; against the *opera operata* of the carnally-minded, half-heathen mass of the people. But such an interpretation is made possible only by doing violence to the clear language of the passages in question. When, in Am 5²⁵, Jahweh, after very warmly repudiating the offerings of Israel (v. 21²⁵), asks, 'Did ye bring unto me sacrifices and offerings in the wilderness forty years?' He evidently expects the answer, No. And the practical application is equally self-evident: if Jahweh could do without their offerings then, He does not need them now. In like manner, it is perfectly futile to read out of Hos 6⁶ anything else than a categorical rejection of sacrifice: 'For I have pleasure in mercy and not in sacrifice, in the knowledge of

* That this did not imply such a mechanically conceived concentration of the sacrificial cultus as if only the *one* altar of burnt-offering could serve as a legitimate place of sacrifice, is shown by 1 K 8⁶⁴ (D), where we read that Solomon consecrated the whole of the middle court because the brazen altar was too small for the multitude of offerings at the dedication of the temple.

God and not in burnt-offerings!'^{*} With regard to Is 1¹¹, it has been maintained with some appearance of plausibility that the flat rejection there of offerings and festivals is intended to apply only to the false worship, which is coupled with a sinful disposition. But any one who reads the whole passage carefully must pronounce it impossible that the prophet, after the burning words (v. 16¹), in which he impresses upon his hearers what are the real demands of God, could still have left room for the exhortation: 'And then come and bring your offerings!' On the contrary, once they have cleansed themselves, once they have helped the widow and the orphan to their rights, *then* they have done what God asks of them, and there need be no word of sacrifice. The very same meaning attaches to the words of Micah (6⁶⁻⁸). The people are still under the delusion that it may be possible by multiplying their offerings—in an extreme case by perhaps giving up even their firstborn son—to atone for their sin, and thus, as it were, compel the favour of Jahweh. But the prophet does not go on to answer the questions put by those who are so deluded. In this way he gives it to be clearly understood that they are questions that are not worth discussing. Instead he points them to the requirements of God which were made known to them long ago, and in which everything is comprehended that is well-pleasing to God—namely, to do justly, and to show love, and to walk humbly with their God. Alongside of this threefold command there is plainly no room for requiring any outward services. Much about the same time, if not somewhat later (for the *tērūphim* are already reckoned among the apparatus of idolatry), we may place I S 15²². It is true that here obedience is only declared to be better than sacrifice, and disobedience put on the same level as idolatry. But the whole tone of the statement leaves no doubt that we are listening to the words of a narrator who has penetrated deeply into the thoughts of the true prophets of Jahweh, and who shares their conviction of the utter worthlessness of outward offerings.

A final testimony, and that of the strongest kind, to this judgment of the sacrificial cultus is found in Jeremiah. Already in 6³⁰, the prophet combats the notion that Jahweh has any pleasure either in the incense of Saba and the costly cane from a distant land, or in the burnt-offerings and slain beasts of the people. Still his language here might be explained as amounting only to a rejection of sacrifice as a hypocritical *opus operatum*. But when, in 7²¹, Jahweh says, 'Add your burnt-offerings unto your sacrifices, and eat ye flesh,' this can mean only that it is to Him a matter of pure indifference whether they themselves eat not only the sacrificial meals but the burnt-offerings (which, according to very ancient custom, had to be wholly consumed by fire). And when He goes on (v. 22) to say, 'For I spake not unto your fathers, nor commanded them in the day that I brought them out of the land of Egypt [i.e. at the time when the foundation of the theocracy was laid], concerning burnt-offerings or sacrifices,' this is intended to show that it is a complete delusion to suppose that God requires any such offerings or makes His favour depend upon them. Not outward services, but *obedience* to His will is what He demands; in other words, a moral life, for this and nothing else is the meaning of the words (v. 23), 'Walk ye in all the way that I command you.'

This testimony of Jeremiah weighs all the more

that he himself was a priest. His denial that God gave any commands as to sacrifice appeared so unheard of that men did not shrink from the most incredible exegetical operations in order to compel him to say something different from what he actually says. But no wresting of the text can alter the fact that Jeremiah is as little acquainted as the prophets before him with a law-book which issued in God's name statutes as to sacrifice. This does not mean that the Book of Deuteronomy was unknown to him. This book, however, as we saw a little ago, never sets itself to distinguish in principle the value and the necessity of sacrifice, but simply takes sacrifice for granted as a present fact, an old-established custom. And so the result of our whole inquiry is that no one has any right to depreciate the merit which belongs to the above-named prophets, of having discovered the ideal of true service of God in the worship of Him in spirit and in truth, without any outward ceremonies and performances.

We may anticipate a little by adding that this Prophetic conception was not so very quickly obliterated even in the post-exilic period, which is mostly thought of as the era of torpid, rigid legalism. Even Ps 40⁷ (6) roundly declares: 'Sacrifice and offering thou hast no delight in; ears hast thou opened [lit. digged] for me [namely, that I may hear and obey thy will]; burnt-offering and sin-offering thou requirest not.' In Ps 50⁸, the writer repels as a piece of childish imagination, not to say ridicule, the notion that the flesh of bulls and the blood of goats are to be offered as food to God, the Lord of the whole world of beasts. Ps 51¹⁸ (16) insists once more that God does not desire sacrificial victims and has no pleasure in burnt-offerings, but with the very weighty addition (v. 19 (17)) that the true sacrifices of God are a broken spirit, a broken and contrite heart. We may compare, finally, Ps 69³¹ (30)¹, according to which Jahweh has more pleasure in grateful praise than in a young bullock with horns and hoofs.

We have not here to inquire how it was possible for these Psalms, with their very emphatic setting forth of the Prophetic view of sacrifice, to find their way into the 'song-book of the post-exilic congregation,' which was at all times profoundly penetrated with the notion of sacrifice as a sacred and quite indispensable duty. Was it that a forced interpretation was put upon the actual expressions so as to remove what was offensive to the later, priestly view of sacrifice? This would really appear to have been the case, in view of the present conclusion (v. 20 (18)¹) of Ps 51. Here the Prophetic view expressed in v. 18 (16)¹ has evidently *this* turn given to it: all this applies as long as Israel languishes under God's wrath; in this situation sacrifices are useless and displeasing to God. But once He has compassion again on Zion, and has built again the walls of Jerusalem,—a proof that the time of wrath is finally over, and the long-promised great restoration begun,—then once more will He take pleasure in right offerings, then shall bullocks be offered on His altar. The most recent commentators on the Psalms are in part disposed to regard this conclusion as original, and to find in it the simple solution of the problem how a Psalmist could have given utterance to such revolutionary sentiments. But the present writer agrees with Duhm in holding that it is quite impossible to remove the difficulty in *this* way.* It implies the doing of quite unseemly violence to the language of v. 19 (17). A saint, who had reached so

* The usual rendering, 'more than in burnt-offerings,' by which, after all, a recognition of sacrifice is introduced into the saying, would be in itself linguistically possible, but is absolutely excluded by the first half-verse; כִּלְעִילִי means simply 'apart from (or to the exclusion of) burnt-offerings.'

* We are compelled to pronounce completely mistaken also the argument of Jacob (ZATW xvii. [1897] 265) and Matthes (ib. xxi. [1901] 73 ff.), according to which the meaning is that God asks for thank-offerings and votive offerings in preference to others (in which, however, He also takes pleasure, the teaching of the Psalms being uniformly favourable to sacrifice).

thoroughly purified and truly evangelical a conception of the proper service of God as we find in that verse, could never have sunk to such an appreciation of external sacrificial worship as manifestly underlies v. 21¹⁹.

In view of all this, it cannot surprise us that, apart from sacrifice and from frequent denunciations of false worship, the Prophetical references to matters of the cultus are scanty, and are based, moreover, rather upon accommodation to the prevailing popular view than upon an independent appreciation of it. To the people, to be sure, it is a terrible threat that Jahweh is to put an end to all their festivals, new moons and sabbaths (Hos 2¹¹); that in exile they shall be without king and ruler, without altar* and *mazzēbāh*, ephod and *tērāphim* (3⁴); that there, in an unclean land, where no cult of Jahweh is possible, they shall have to eat unclean food, and be unable to present offerings of any kind (9^{2ff.}). But all that the prophet is concerned about is simply to threaten something that shall sound terrible to his hearers, not to express approval or disapproval of the cultus and its necessary apparatus. Elsewhere, too (Am 8⁵, Is 29¹ [Jer 17^{2ff.} is a later addition, probably from the time of Nehemiah]), it is only in a secondary way that the festivals, New Moons and Sabbaths, are mentioned. We have already explained the sense in which Deuteronomy commends the observance of the yearly festivals (ch. 16) and the use of the tenth for sacrificial meals (14^{22ff.}). Moreover, this book seizes every opportunity of substituting humanitarian for ritual motives, or at least of putting them alongside the latter: so, for instance, with the commandment to hallow the Sabbath (5^{12ff.}); the tithe every third year (14^{28ff.} 26^{12ff.}); the year of release (15^{1ff.}); and the letting go of a Hebrew slave in the seventh year (15^{12ff.}). And if Deuteronomy, as is only reasonable, requires the punctual fulfilment of vows once they have been taken (23²¹), it does not omit to add that the man who forbears to vow is guilty of no sin (v. 22).

But the strongest evidence of the Prophetical spiritualizing of the old ritual customs is the turn now given to the very ancient and strictly observed requirement of *circumcision* (cf. above, p. 622^b f.), when in Jer 4¹ (cf. also Dt 10⁶ 30⁶) the removal of the foreskin of the heart is called for. We shall not be wrong in assuming that the prophet here passes a judgment on the value of external circumcision similar to what he passed in 7^{10ff.} on the value of sacrifice. To him it is a symbol of the purifying of the heart, which is what God requires above all, and without which it has neither use nor value.

(β) In all other instances as well as in those we have considered, the actual demands of the prophets are of a specifically *religious* and, above all, specifically *moral* nature. But the latter are in no way separated from the former. Nothing would be more perverse than to represent the prophets as preachers of a bare moral religion simply because in their writings the inculcating of justice, honesty, and mercy, in relation to one's neighbour, always plays a most important part. Behind all this is the implication that the determining motive for such conduct is to be the revealed will of the God of Israel and the reverent fear of His displeasure [in Deuteronomy (6⁵) hearty love to God]. It is in harmony with this that, as in the First Commandment, the demand for veneration of Jahweh alone precedes all others. It is indirectly expressed in the numerous denuncia-

tions of idolatry, but has also positive utterance given to it frequently (cf. e.g. Am 5⁴ 6, Is 8^{12ff.}). The greatest zeal in this direction is displayed by Deuteronomy (cf. 4¹⁹, the reasoned exhortation against star worship; but, above all, 12^{1ff.}). Any enticing to idolatry, even if it emanate from prophets or from one's nearest relations, is regarded by this book (13^{2ff.} 17^{2ff.}) as nothing less than a capital crime; and the penalty is to be executed on the guilty party without pity, even if this should involve the destruction of a whole city with all its inhabitants and all their property (13^{17ff.}).

Real reverence for Jahweh shows itself, above all, in unreserved confidence in His wise disposal of events and His help in time of need (Is 7⁴, and esp. v. 9^b 'if ye trust not, ye shall not stand'; cf. also the *locus classicus* Jer 17^{5ff.}). This is at the root of the unvarying policy which the true prophets of Jahweh commend to their countrymen in relation to the world-powers. After Ahaz, against the earnest counsel of Isaiah, has called in the aid of the Assyrians and become their vassal, the prophet sees in this a Providential dispensation of Jahweh and a well-deserved punishment of Judah. And now what is required is to keep still under the salutary chastening rod (28¹² 30¹⁵ [In turning away (from the wild struggles of the others) consists your safety, in quietness and confidence is your strength']), until the hour has come for Jahweh to interpose and to display His power on the defiant Assyria itself (10^{16ff.} 24^{1ff.} 33¹, 18^{1ff.}). Precisely the same standpoint is assumed by Jeremiah in reference to the Chaldeans. There is no resource for the nations subject to them (Jer 27^{2ff.}), or for Zedekiah of Judah (v. 12^{1ff.}), but to put their neck under the yoke of Nebuchadrezzar (cf. also 38², 17^{1ff.} 42^{10ff.}). How little on this account Jeremiah despairs of the return of God's favour to the nation and their restoration, he proves by purchasing, although a prisoner, a field (32^{1ff.}), when already the embankments of the besiegers stretch up to the city.

The right knowledge of Jahweh issues likewise in due humility, such as love to one's neighbour (cf. the prophetic programme of true morality in Mic 6⁸). The latter shows itself primarily in striving after justice at any price, especially when protection and care for oppressed widows and orphans are concerned: Am 5¹², Is 1¹⁷, 23 10², Jer 7^{6ff.} 22³ (addressed to the king), Dt 10¹⁸ (coupled with the injunction to love the *gēr*) 24^{17ff.} 27¹⁹. In general, the whole legislation of Deuteronomy is permeated with a spirit of the most genuine humanity, and thus constitutes, as it were, a deposit of the ethical system of the prophets. It evidently discovers the main value of the sacrificial meals, as well as of the three years' tithe, in the provision for the Levites, the poor, the widow, and the orphan (14²⁹ and oft.); in face of an extremely powerful custom—that of blood-revenge—it provides for the deliverance of the unintentional manslayer (19^{2ff.}); it claims tender consideration for female prisoners of war (21^{10ff.}), and the less loved spouse (v. 13^{1ff.}), as well as for the poor when a pledge for a loan is taken from them (24⁶, 10^{1ff.}). An escaped slave is not to be given up (23^{16ff.}); a day-labourer is not to be oppressed, but to be paid his wages before sunset (24^{14ff.}). Interest is to be taken only from foreigners, not from one's countrymen (23^{20ff.}). The property of the latter is to be jealously safeguarded (22^{1ff.}); the danger of falling from a roof is to be averted by a railing (22⁸).

But all this humanity and mildness in Deuteronomy goes hand in hand with an unbending strictness, not only against idolatry but against every form of lawlessness. The son who is hopelessly corrupt is, at the instance of his own parents, to be stoned to death (21^{18ff.}). In like manner, in the case of adultery (22²²), or of the seduction of a

* Since the LXX still retains 'altar' along with 'sacrifice' (αὐτὸς ὁ ἅγιος οὗτος αὐτὸς ὁ ἅγιος ὁ ἅγιος), we should probably read ἅγιος ὁ ἅγιος. 'Altar and *mazzēbāh*' forms a good collocation, not 'sacrifice and *mazzēbāh*.'

betrothed maiden within the city, the penalty of death is to be inflicted on both parties (22^{23a}). Seduction of a maiden who is not betrothed is punished by a money fine and the obligation to contract an indissoluble marriage with her (22²⁸). Shameless conduct on the part of a woman is avenged by her having her hand cut off (25^{11a}). A newly married woman who proves to be not a virgin is to be stoned (22^{20a}), while a false accusation on this score by the husband involves his paying of a considerable money fine and agreeing to hold his marriage with her indissoluble (22^{18a}). If a husband wishes to put away his wife 'because he has found some unseemly thing in her,' he is required to give her a bill of divorce. To all appearance, dissolution of marriage was pretty frequent; it was only gradually that even the people of Israel shook itself free of the general Oriental conception of woman as a kind of chattel. Yet at least remarriage with a divorced wife who in the interval has been married to another man, is strictly forbidden as a defilement of the land (24^{14a}). Finally, a sort of compendium of the Deuteronomic ethics may be discovered also in the twelve curses of Dt 27^{15a}.

In all this, moreover, Deuteronomy implies that the demands put forward by it are not (with such exceptions as that relating to the concentration of the cultus) addressed to the people as something entirely new. Nay, Jahweh has from the first provided organs for the communication of His will, in the shape of priests and prophets. To the former of these the following functions are assigned in Deuteronomy: the decision of the more difficult law-cases (17⁹⁻¹² 19^{17a} 21⁵); the service of Jahweh in the sanctuary, which gives them a means of livelihood in the absence of a tribal portion of the land (18^{1a} 26^{31a}); the encouraging of warriors before battle (20^{21a}); and the supervision of leprosy (24^{21a}). As regards the prophets, Deuteronomy finds itself involved in a certain measure of self-contradiction in so far as, upon the one hand, it emphasizes the pre-eminence, nay perfection, of the code it promulgates (4⁸ 30^{11a}; cf. also Jos 1⁸); while, on the other hand, it recognizes the importance of the Prophets, although these were, properly speaking, rendered superfluous by the written Law. This contradiction, however, is resolved by considering that Dt 18^{15a} has manifestly in view only one particular function of the prophets—not the announcement of the Divine will in general, but the prediction of the future. Prophecy is Jahweh's substitute for the soothsaying and prognosticating of other nations (v. 14). Jahweh Himself sees to it that this substitute is always * present; but the only proof that a prophet has really spoken in the name of Jahweh is the fulfilment of his prediction (v. 21).

Of the prophets proper, Jeremiah indeed commends the observance of 'the words of *this* law' (11^{2a});† by which only Deuteronomy can be meant. But he can never have been of opinion that true Jahweh prophecy, the living word of Jahweh, which is as a fire, and like a hammer breaking the rock in pieces (23²⁰), is ever to be rendered superfluous by a written Law. Jahweh still acts as He has done since the choice of Israel, sending without intermission His servants, the prophets, to announce His will (7²⁵ 25⁴ 26³ 29¹⁹). And only this immediate *tôrâh* ('direction') of God offers a guarantee that it is a true Divine word—an assurance

which cannot be unreservedly felt regarding a written Law. It is only in this way that we can explain the remarkable words of Jer 8⁸ 'How can ye say, We are wise, and the *tôrâh* (here = the [written] Law) of Jahweh is with us? Nay, the lying pen of the scribe hath worked so as to deceive.* If this is not exactly a repudiation of the law-book discovered and introduced in Josiah's reign, it is at least an allusion to the dangers which beset a written code; and hence the latter can never take the place of the living word communicated through the prophets.

Amongst the earlier prophets, Hosea (8¹²) assumes the existence of a multitude of written *tôrôth*† ('directions'); but the context of the passage shows that these cannot be regulations for the cultus, but only guides to a moral life. In Is 8¹⁶ the *tôrâh* that is to be laid up and sealed refers only to the immediately preceding predictions. Nowhere except in Jeremiah and Hosea do we find any allusion to a written Law. On the other hand, we encounter everywhere (cf. Am 2¹¹, Hos 6⁵, Is 6^{1a} 8¹¹, Mic 3⁸, Hab 2^{1a} etc.) the conviction of the Divine mission and the direct communion of the genuine Jahweh prophets with their God.

Since we have already (p. 672 ff.) discussed fully the nature and functions of these, we may here refer to other two points only. There is, first, the very definite way in which the prophets look for the fulfilment of their predictions (cf. esp. Is 8^{1a} 30⁸, Hab 2², where the prediction is still further strengthened by being committed to writing; but also Is 20^{1a}, Jer 20⁶ 21⁷ 28^{16a}). The other point is that the natural feelings of the prophet may readily come into conflict with the message he is commanded by God to utter, whether it be that he has a transitory fit of doubt as to the justice of the principles that govern the course of the world (Jer 12^{1a}), or that he despairs of any success to his mission (15^{10a} 20^{7a}), or that he is unable to suppress a feeling of profound compassion for the objects of his threatening (Is 22⁴, Mic 1⁸, Jer 4¹⁹ 8^{18a}). In the end, however, the conviction always triumphs which Jeremiah (12⁴) prefixes to his complaint and reproaches: 'Thou remainest in the right, O Jahweh, if I think to strive with thee.' Nay, in God's sight all human wisdom and strength and all riches are as nothing (Jer 9²³).

Amongst other organs of Jahweh, Amos once (2¹¹) mentions the Nazirites (see above, p. 658*); but of the priests, apart from the honourable reference to the chief priest Uriah in Is 8², all that we hear from the prophets are vehement denunciations for neglect of duty. Almost as frequent are serious complaints against the kings. Not, indeed, that the old conception (cf. above, p. 660^b), which saw in the monarchy a blessing from Jahweh, and in the king as well as in the priests and prophets an organ of the theocracy, is wholly denied. It meets us clearly in the present (Deuteronom.) form of 2 S 7; but experience of the monarchy in general—particularly in the Northern kingdom—as this is very clearly reflected in the so-called 'law of the kingship' (Dt 17^{14a}), must inevitably have led to a judgment almost entirely adverse.

(γ) There is still one question we must answer before passing from this division of our subject. Do the prophets consider that *perfect obedience* to

* The usual interpretation, 'the lying pen of the scribe hath made deceit of it,' would require the reading שקריו instead of שקר.

† Instead of the sing. תּוֹרָה, by which the MT means to suggest the one Law of Moses, read the plur. תּוֹרוֹת. Only thus does 'the countless number' spoken of bear any sense.—On the usage of the word תּוֹרָה, cf. J. Valetan, art. 'Beteekenis en gebruik van het woord Thorâ in het Oude Testament' in *Theol. Studien*, 1891, p. 101 ff.

* The referring of 'the prophet' of v. 15 and v. 18 to a particular individual, namely the Messiah (on which the old dogmatic founded the *munus propheticum* of Christ), is at once seen to be mistaken, when one looks at v. 20 and v. 22.

† In this connexion we should not omit to say that the strong objections taken by Duhm (in his Commentary on Jeremiah) to Jeremiah's authorship of this passage, rest on what is by no means an airy foundation.

the Divine will is possible, and do they measure each man's responsibility accordingly? The answer must be that the prophets know only too well the inborn sinfulness of man, which is connected with the weakness of the flesh. Even an Isaiah must lament (66) that he is a man of unclean lips and dwells in the midst of a people of unclean lips. Jeremiah (17⁹, cf. also 13²³) pronounces that 'the heart is deceitful above all things and desperately sick: who can know it?' The Deuteronomist, again, makes Solomon declare (1 K 8⁴⁶) at the dedication of the temple: 'There is not a man that sins not.' But, in spite of this general condition of sinfulness, the prophets know of a relative righteousness, a piety which honestly endeavours to satisfy the Divine claims. What it still lacks, owing to error, haste, and weakness, is made up to it by the sparing, pardoning grace of God. In this connexion it is noteworthy that, in all the numerous expressions for the forgiveness of sins, stress is laid, not upon a complete destroying of sin (as in the Catholic sense, without which there could be no 'saints'), but only upon an overlooking of it or rendering it invisible, so that it no more provokes the judicial eye of God to punish it. No doubt, we have figurative language here, but language answering to the true evangelical view, according to which the man remains as before a poor sinner, but is *declared* by God in His grace to be righteous, and accordingly free from condemnation. Propitiation* consists in a 'covering' (and thus making invisible) of guilt; and, according to the Prophetic usage of language, it is God Himself that covers the sin (Is 6⁷, Jer 18²³ et al.). Other expressions for the forgiveness of sins are 'take away,' 'put aside,' 'let pass,' 'wash away,' 'wipe away,' 'heal'; God plunges sin into the depths of the sea (Mic 7¹⁹), or casts it behind His back (Is 38¹⁷)—all with the same result, that sin is now withdrawn from His view. In all this it is assumed as a matter of course that true contrition and repentance are present, and these can make sins that are blood-red to be white as snow, and make the purple-red to be like wool (Is 1¹⁸).

The proof that at least a *relative* righteousness is regarded by the prophets as attainable, is found, on the one hand, in allusions to such righteousness in past times (Is 1^{21f.}, 26); and, on the other hand, in the frequent promises attached to the honest fulfilment of the Divine will (Is 1¹⁹, and with special frequency and emphasis in Deuteronomy [7^{12f.}, 11^{13f.}, and, with the corresponding threatenings against disobedience, 28^{15f.}, 30^{15f.}]). The question how such a doctrine of retribution, according to which a man's lot corresponds exactly to his conduct, is in harmony with the experiences of real life, is not yet raised. Pious faith holds simply to the postulate which must always be maintained by any truly religious *Weltanschauung*, that genuine godliness must find its reward, ungodliness its punishment. This postulate appeared to be justified all the more as it was applied, above all, to the conduct and the lot of the people as a whole, and less to those of the individual. And if, according to D (for to this stratum belongs, no doubt, the expansion of the Decalogue in Ex 20^{5b.}, 6), a continued influence of guilt upon the children, grandchildren, and great-grandchildren of the ungodly is taught, as conversely a continuance of the Divine favour, gained by godliness, till the thousandth generation, this is merely to affirm, in the sense of the Prophets, a truth which is frequently testified to elsewhere in Scripture and confirmed a thousand times over by experience. As the merits of David benefit the peoples for centuries long (1 K 1^{12f.}, 32 15⁴, 2 K 8¹⁹), so, on the

other hand, the sins of Manasseh inevitably bring about the destruction of the nation (Jer 15⁴, 2 K 24³). Deuteronomy, however, is far from inferring the false converse of this postulate that virtue is sure of reward, and wickedness of punishment; it does not assert, what was afterwards the popular opinion, that all human suffering is a consequence of sin, and that a very severe affliction must be due to a very heinous transgression. No less does the prophet Jeremiah (31^{29f.}) oppose the proverb (whose currency is witnessed to also by Ezk 18²) with which it was then customary to ridicule the misunderstood retribution doctrine of Ex 20^{5b} 'The fathers have eaten sour grapes, and the children's teeth are set on edge.' No, says the prophet, every man must pay the penalty of his own guilt (cf. also Dt 24¹⁶); no one can shirk the moral responsibility that rests upon him, and in this lies the proof that the fulfilment of Jahweh's demands is thought of as practicable.

Under all circumstances, however, rewards and punishments are thought of as bestowed in this present life; of any expectation of a continued life after death or of a resurrection there is not a trace in pre-exilic prophecy. On the contrary, so far as its view of the conditions after death is concerned, the latter evidently still occupies the position of the old popular belief in Shē'ol (cf. above, p. 668 f.), although mention of the latter is only rare and incidental (Am 9², Is 5¹⁴ 7¹¹ 28¹⁵, 18, Hab 2⁵). The national religion, with which the pre-exilic prophets have mainly to do, had its interest simply in the continuance and, if necessary, the restoration of the earthly theocracy. Questions of immortality and resurrection concern the individual. We shall therefore first make acquaintance with these at a time when, after the political downfall of the nation, the interests of the religious unit as opposed to the mass obtained more and more recognition.

3. *The relation of the nation to Jahweh.*—How far now does the people chosen by Jahweh answer to the picture we have just sketched of God's demands by the mouth of the prophets? It is a very sorry view that is opened up to us in almost all the writings of the pre-exilic prophets; and one has no right to assert that, after the manner of preachers of repentance in all ages, the conditions are painted too black in order that denunciations and warnings may have more effect. On the contrary, the principle which underlies all these descriptions is that the high privilege accorded to Israel involved an equally high responsibility, but that this was precisely what the people refused to see. They were only too ready to hear of the privilege, 'You only have I chosen of all the nations of the earth' (Am 3²); but the conclusion, 'for that very reason I will visit upon you all your transgressions,' appeared to them incomprehensible. The words of Amos we have just quoted are addressed primarily to the inhabitants of the Northern kingdom, like the whole of Hosea's prophecies, and a variety of sayings elsewhere (e.g. Is 17^{3f.}, 28^{15f.}; cf. also Jer 31^{29f.}, 15^{2f.}, as well as the judgment expressed by D² in 2 K 13⁵ 14^{26f.}, and the whole viewpoint of 17^{3f.}). In point of fact, the prophets show no difference in their judgment of the two kingdoms, in so far as Ephraim, even after the disruption, is still counted the people of Jahweh, and is consequently under precisely the same responsibility, and exposed therefore to the same condemnation for its apostasy and wickedness.*

In the forefront of all the charges against Israel stand those which concern the root of all their perverse conduct: denunciations of idolatry proper,

* Cf. the elaborate discussions of O. Procksch, *Geschichte, betrachtung und geschichtliche Ueberlieferung bei den eozylischen Propheten*, Leipzig, 1902.

* Cf., on this subject, art. PROPITIATION in vol. iv.

of false views of Jahweh and His will, and of the false service of Jahweh based thereupon.

(a) With reference to *idolatry*, we had occasion, in dealing with the preceding period (see above, p. 645), to show that what is in view is not a complete denial of Jahweh as the national God (not to speak of a denial of His existence), but simply an ineradicable attachment to a syncretism which will not break with Baal (or, more precisely, the baals, i.e. the various localized forms of Baal). This, which was the complaint of Elijah, is still heard with equal loudness from the lips of Hosea (27^{ff.}), that is, about 25 years before the downfall of the kingdom. However unobjectionable such conduct might appear to the people, the prophet brands it as adultery (1² 24^{ff.} and often; cf. also Jer 31^{ff.} 13^{7f.}). We leave it an open question whether the comparison between Jahweh's relation to Israel and a married or betrothed relation was introduced by Hosea in allusion, first of all, to the unfaithfulness of his own wife, in which he saw a reflexion of the unfaithfulness of Israel to Jahweh. In any case this picture fulfilled the prophet's purpose, to portray to the common understanding the conduct of Israel as something shameful and worthy of the most unreserved condemnation.

In the category of idolatry, Hosea (4¹²) clearly includes also divining by means of small staves (the so-called rhabdonancy), as Isaiah (8¹⁹) includes necromancy and in general every form of divination and magic (2⁶, cf. also 2 K 23²⁴). The popular belief might imagine these things to be reconcilable with the worship of Jahweh. But, even apart from syncretism in the matter of the baals, there are not wanting allusions to idolatry in the proper sense: so, e.g., Is 1²⁹, and very frequently in Jeremiah (1¹⁶ 25^{ff.} 13, 20^{ff.} 11¹³). After the middle of the 7th cent. B.C. the denunciations are directed especially against the worship of the host of heaven (Zeph 1⁵, Jer 7^{17ff.} 8² 19¹³; very characteristic are the words of the people in Jer 44^{17ff.}; cf. also 2 K 23^{14ff.}), and against the sacrifice of children (Jer 7^{30ff.} 19⁵, 2 K 23¹⁰). In this last case it is not indeed certain whether the *בָּנֵי הַמִּזְבֵּחַ* ('king'),* to whom these sacrifices were offered, is not meant to stand for a special form of Jahweh (cf. above, p. 646). A similar doubt arises, as we have already (p. 643^a) explained, regarding the Divine images (Is 2²⁰, etc.), where in many instances it may be images of Jahweh that are in view.

Amongst the denunciations of idolatry it was formerly the custom to include numerous sayings which are meant in reality for the perverted, unthinking worship of Jahweh, with its strong admixture of Canaanite ritual practices. The sacrificial meals were frequently the occasion of excess (cf. esp. Is 28^{7ff.}) and immorality. Thus already Amos (2⁸) complains: 'Beside every altar they stretch themselves on pledged garments, and drink penalty-wine† in the temple of their God.' According to Am 4^{4f.}, seeming zeal for the cultus at Bethel and Gilgal is coupled with disgraceful acts. To Hosea (4^{13f.}) the sacrificial worship upon the high places, in the company of the *kēdeshōth*, is no better than idolatry, and the offerings of the people are therefore valueless in the sight of Jahweh (5⁶). They may have erected numerous altars [to Jahweh], but these have become to them only an occasion of sin (8¹¹ 10¹, although the last passage might refer also to altars and *mazzēbōth* of Baal). On Isaiah's polemic against the multiplied but wholly useless *opera operata*, see above, p. 685^b f. The people draw near, indeed, to Jahweh with their mouth, and honour Him with their lips, but their heart is far from

Him, and their fear of God nothing but a commandment of men which they have learned by rote (Is 29¹³, Jer 12²). Similar are the complaints of Micah and Jeremiah. But the strongest evidence of the radically perverted character of the cultus is found in the circumstance that such a shocking abuse as that of the presence of *kēdeshim* and *kēdeshōth* (see above, p. 662^b) in connexion with the cult of Jahweh (for this must be our inference from Dt 23^{18f.} and 2 K 23⁷) was able to maintain its hold down to the reform of the cultus by Josiah.

(b) Both the above aberrations, idolatry and the perverted worship of Jahweh, spring from a common source: a complete *failure to recognize the true character of Jahweh*. Only this can explain the people's gross ingratitude to Him who has been their Benefactor and Guardian from the earliest times (Is 1³ 5^{1ff.}), and their false confidence in Jahweh as the national God, who, for the sake of His own credit, cannot finally abandon His people and temple to the heathen, but must at last overlook all their rebellions and sin (Jer 7¹⁰ *et al.*). Very often this misplaced confidence is ascribed to the seductive words of false prophets, who still preach safety even when all the terrors of judgment present themselves vividly to the eyes of the true prophets of Jahweh (Mic 3^{5, 11b}, Jer 5^{12, 31} 7⁴ 14^{14f.} 23¹⁶⁻¹⁸ 27⁹, 14^{ff.} 28^{1ff.} 29^{8f.} 21-23, 31).

This false trust in Jahweh is far, however, from preventing distrust of His power and aid—a distrust which shows itself in an eager striving after self-help and in the attaching of value to self-chosen carnal expedients. This is one of the principal sources of complaint on the part of the prophets, whether the subject of their censure be the people's trust in resources of their own (battle-chariots and warriors, gold and treasures: Hos 10³⁶, Is 27 22^{8ff.} 30¹⁶, Mic 5⁹ (10⁹); or alliances, now with Assyria, now with Egypt or with the neighbouring peoples as a defence against Assyria (Hos 5¹³ 7¹¹ 8^{9f.} 12² (1) 14¹ (2), all referring to the Northern kingdom; Is 23¹⁴ 29^{15f.} 30^{1f.} 31^{1f.}, of Judah's alliance with Egypt).

The want of real belief and confidence in God, which reveals itself in such conduct, reaches a climax in open renunciation of Jahweh and frivolous mockery of His prophets and of the Divine oracles announced by them (Am 2¹², Hos 9^{7f.}, Is 1⁴ 5¹⁹ 11^{18ff.} 12⁶ 15^{10, 16} 18¹⁸⁻²³ 20^{7ff.} 22^{1ff.} 28^{9f.} 30^{9f.}; Mic 2^{5, 11}, Jer 6¹⁰). Is 22^{22ff.} in particular reminds us strongly of the 'sin against the Holy Ghost' (Mt 12^{31f.}), which can never be forgiven.

(c) The character of the conception of God and the religious conditions find their natural reflexion in the *moral conditions* that prevailed in the nation. On this head we have endless complaints by the prophets, directed at times against the people as a whole, and at times against particular classes. Beginning with the latter, we find, at least in Hosea, no longer an echo of the ancient sentiment (cf. above, p. 660^b) about the monarchy as a blessing bestowed by Jahweh. There is no bond of union between these later kings of Israel, who made their way to the throne largely by rebellion or even assassination, and the kingship in the sense and spirit of the theocracy (Hos 8³ 13^{10f.}).^{*} Isaiah's opinion of Ahaz is presumably contained in the statement of 3², and the downfall of Judah is ultimately traced to the iniquities of Manasseh (2 K 23^{26f.} 24²⁻⁴). Numerous, and at times very vehement, are the complaints against the heads of the people (Is 3^{12ff.}, Mic 3¹¹ 7⁴) as unfaithful shepherds (Jer 23^{1ff.}); against the priests (Hos 4^{6f.},

* Cf. B. D. Eerdmans, *Melekdiens en vereering van hemel-liechen in Israëls assyr. Periode*, Leiden, 1892.

† i.e. wine which they have exacted in lieu of a money fine.

* If Hos 9¹⁵ 10⁹ really referred to the introduction of the monarchy, these passages (like 1 S 8^{6ff.} 12¹²) would contain an absolute repudiation of it. But this interpretation is, to say the least of it, doubtful.

Mic 3¹, Zeph 3⁴, Jer 2⁸ 5³¹ 6¹³, and against the false prophets (Zeph 3⁴, Jer 2⁸ 6¹³ 23²⁷. 21. 25²⁷. 30²⁷). No wonder that under such guidance all kinds of vices flourished luxuriantly. Abundance of outward possessions gives birth to arrogance (Am 6³ 13, Jer 13⁹, Dt 8¹²), luxury (Am 6⁴), ostentation, especially on the part of women (Am 4¹, Is 3¹⁶), and licentiousness (Am 2⁷). But it is, above all, the oppression of the poor and needy, the turning aside of justice in the case of widows and orphans, that provokes the bitterest complaints (Am 2⁶⁻⁷, Is 5²³ 10¹⁷, Mic 2² 3¹⁷). Finally, not only are the people charged with particular vices and offences, but there is attributed to them such a perversion of all moral ideas (Is 5²⁰), such radical and general corruption, that any increase of it seems hardly possible. Hosea (4¹⁷) is already constrained to lament that there is no fidelity, no love, no knowledge of God in the land: 'they curse and lie, they murder and steal and commit adultery, and one bloody deed treads upon the heels of another.' Is 3³ refers to the shamelessness with which, in bold defiance of Jahweh, they proclaim their sins, like the Sodomites, without concealment. No less cheerless is the condemnatory verdict of Micah (7¹⁷; cf. esp. v. 4 'The best of them is as a brier, the most upright is as a thorn hedge') and of Jeremiah (5¹⁷. 6¹³. 28 9¹⁷). Jeremiah declares the corruption to be so deeply rooted that the Ethiopian could more readily change his skin or the leopard his spots than the people their evil course of conduct (13²³). Deceit and treachery are so general that they find their way into the closest friendship and the most sacred family connexions, so that it has become a rule that 'a man's foes are they of his own household' (Mic 7⁵).

4. *The attitude of the Prophets to the corrupt moral condition of the people.*—In view of the conditions above described, it might have been expected that the efforts of the prophets would be primarily directed towards preaching repentance and amendment, so as, if possible, to snatch the people from destruction even at the eleventh hour. And so in point of fact it was. The assertion so often repeated at the present day, that the writing prophets before the Exile announced judgment only, without any alleviation or any prospect of at least a partial deliverance and restoration, is *ab initio* psychologically unintelligible. A prophet who had a perfectly definite expectation of the destruction of the State and *all* the members of the nation, must have regarded it as quite purposeless to proclaim unceasingly nothing but this destruction, especially if his words met with no credit. The most natural course for him would have been to abandon the multitude to their fate, and in the company of those like himself to bewail their obduracy and the ruin of his nation. Instead of this we find that all these prophets, in proclaiming the word of Jahweh, display a burning zeal which finds its only explanation in the aim which they always set before them in the discharge of this duty. They seek to rescue what is still capable of being rescued, to open the eyes of at least a portion of their infatuated countrymen, and to bring them within the small remnant which has been chosen by God to survive the judgment. And so we have the following stages in the prophetic message: a simple call to repentance, coupled with the indication of a still possible escape; then the denunciation of judgment, so far as the godless majority of the people are concerned. This judgment assumes more and more of an inevitable aspect, and appears as a total destruction of the State and the hitherto existing nationality. But, notwithstanding all this, there is ever in the background the thought that for a portion of the people it will prove a purifying and not a destroying

judgment. And across the terrors of the judgment there smiles an era of grace and Divine compassion, an era of renewal, when the remnant of the nation shall once more answer to the idea of a people of God, and reap the fruits of such a privilege. It is only natural that these various stages of the prophets' message should not be always found complete or in the same order. Special motives or differences in the audiences addressed might push sometimes one and sometimes another into the foreground, but none of the features above described will be found wanting, at least in the more considerable Prophetic writings. It must be admitted, indeed, that the difficulty of forming a conclusion is not seldom materially increased by what are undeniably later additions to the text (see above, p. 671^b f.). In the following survey we shall limit ourselves to the rejection only of such passages as are generally admitted not to be genuine, and will reserve for separate treatment the phenomenon of so-called 'Messianic prophecy.'

(a) The above-mentioned assertion that the threatening of final judgment constitutes the sole contents of pre-exilic Prophetic preaching has most to say for itself in the case of *Amos*. In his message not the faintest glimmer of consolation seems to shine in the dark night whose advent he proclaims. For not only must we leave out of account the present conclusion of the book (9²⁷), but the repeated reference in the visions of 7¹⁷ to the long-suffering of God, who at the intercession of the prophet may be brought to repent of the evil intended, is designed only to prepare for the moment when God's long-suffering has an end, and there is scope left only for the execution of judgment (7¹⁷). This accords also with the whole preceding message of Amos. He sees the judgment impending over the Northern kingdom in the form of a devastating horde of foreign enemies, whom none can escape either by strength or speed (2¹⁴. 3¹¹ 4². 5³ 7⁹ 9¹¹); in 6¹⁴ there is a pretty clear allusion to the Assyrians as the hostile power). There is no contradiction between this and the threat of exile (5⁵⁻²⁷ 6⁷ 7¹¹⁻¹⁷ 9⁴) or even of a wasting pestilence (so, probably, 5¹⁶ 6³⁵. 8³⁻¹⁰). For pestilence and famine (8¹³) step in of themselves after the ravages of the sword. In view of all this, it appears to follow that the funeral dirge,* which Amos (5¹) raises over the virgin of Israel, is the final word of his prophecy, especially as he has immediately before (4⁵) been pointing to the utter fruitlessness of previous judgments.

The 'Day of the LORD' is the term fixed for the execution of judgment. The prophet already alludes to it in 2⁶, but a more detailed description of it is first found in 5¹⁸. Here we learn that the expectation of the Day of Jahweh was already quite familiar to the hearers of the prophet, only that they manifestly attached to it quite a different sense from what he did. To them it is a day of Jahweh's vengeance on all the foes of His people, and hence a day of victory and glory for Israel—a day whose coming is heartily desired. To Amos, too, it is a day on which the justice of Jahweh is glorified, but—true to the principle expressed in 2³—the claims of this justice are directed against His own people. Hence the prophet is constrained to pronounce a woe upon those who long for the coming of this day of terror: 'What shall the day of Jahweh bring to you? It is darkness, not light'; and it is wholly vain to seek to escape it. Indirect allusions to this day of Jahweh's judgment alike upon Israel and Judah and upon the heathen nations underlie all those passages where a prophetic message is introduced with the formula

* Even the rhythm of the two *stichoi* of 5¹ is that of the so-called *kinah*, or mourning refrain, with alternating longer and shorter verse-members. See art. POETRY in vol. iv. p. 5.

'upon that day.' Direct allusions are found, further, in Is 21²², in the lengthy catalogue of all the objects that fall victims to that day which Jahweh has reserved, when all that is proud and lofty shall be brought low, when 'the loftiness of man shall be bowed down, and the haughtiness of men shall be brought low, and Jahweh alone shall be exalted on that day.' Finally, in Zeph 1⁷, the Day of Jahweh, which is close at hand, is described under the figure of a great sacrificial feast, which Jahweh Himself has appointed, and for which He has sanctified His guests (i.e., as in Is 13³, the heathen nations who are to be the instruments of His vengeance). Jerusalem falls before their storming attack, and so (v. 15) 'that day is a day of wrath, a day of trouble and distress, a day of wasteness and desolation, a day of darkness and gloominess, a day of clouds and thick darkness, a day of the trumpet and alarm.'

Turning again to Amos after this digression, we have to keep in mind two points in connexion with his seemingly unconditional threatenings of judgment. In the first place, these threatenings, if we leave out of account the manifest gloss 2¹⁴, are directed exclusively against the Northern kingdom, and they were fulfilled on it practically to the letter. But all this time the 'people of God' continued to exist in Judah as heir of the historical recollections, and as possessor of the hopes of a better future. Secondly, it is not the case that all thought of the possibility of a timely repentance and consequent escape of Israel is wholly wanting in Amos. For do we not read in 5⁴ the exhortation, 'Seek me that ye may live,' and in v. 14 'Strive after the good and not the evil, that ye may live; for then will Jahweh the God of Hosts be with you, as ye have said. Hate the evil and love the good, and establish right in the gate: it may be that Jahweh the God of Hosts will be gracious unto the remnant of Joseph.' These last words suggest the question whether perhaps, after all, the closing part of the Book of Amos did not contain originally something of a consoling outlook for a remnant of the Northern kingdom, without prejudice to the condemnatory judgment passed on the mass of the people.

(b) Amos, at Jahweh's command, travelled from Judah to Bethel, and, when he had discharged his Divine commission, returned to his home. Hosea, on the other hand, was a citizen of the Northern kingdom, and hence could not but feel quite a personal interest, different from the herdsman of Tekoa, in the Divine decree of condemnation on this kingdom. In fact we are face to face, on every page of Hosea, with the tragic lot of a man who is selected by God to proclaim to his own people and his native land the well-deserved and inevitable final catastrophe, and who, amidst all his acquiescence in the justice of the Divine judgment, is filled with bitter sorrow at their destruction. With him, too, the possibility of repentance and amendment on the part of the people before the judgment falls is not wholly excluded, as when he cries, in 10¹², 'Sow in righteousness, and ye shall reap according to the measure of love; plough your fallow ground, for it is time to seek Jahweh, that he may come and teach you righteousness.' Still more express are the terms of this exhortation in 14²⁷, where, at the same time, a confession of sin is put in the mouth of the people, which straightway (v. 5²⁷) calls forth a Divine promise of restoration. But this very fact shows that judgment is already executed, and that we are here listening to a later speaker, who believes that after wrath the time for pity is come again. Hosea himself looked for the outpouring of wrath as a thing of the future. Like Amos, he thinks of it as accomplished by means of a hostile invasion (1⁵ 5³),

which makes the land a desolation (5⁹ 10⁸; also 2¹¹, should certainly be explained in the same sense), while the people themselves have to go into captivity to Egypt and Assyria (8¹³ 9³ 6¹¹). But, certain as all this is to happen, seeing that 'the iniquity of Ephraim is laid up and hidden [with God for future punishment], 13¹², it is ultimately only a purifying, not a destroying, judgment that God purposes with him. For He is God and not man, that He should be hurried away by fury to destroy Ephraim entirely (11⁹). On the contrary, He means, as Hosea has already explained in another connexion (2¹⁶), by the wasting of the land and the exile of the people to bring about a salutary change: 'The valley of trouble shall be to her a door of hope, so that she shall there [in exile] be again submissive as in the days of her youth, when she went forth out of Egypt.' Then shall the names of the baals (2¹⁹, 16¹⁷) be no more on the lips of the people; everything that can harm shall be destroyed, the old intimate relation with Jahweh returns again to the basis of right and justice, kindness and love; nor are outward blessings—corn, must, and oil—wanting to complete this happy state of things.

Strong objection has recently * been taken to the genuineness of this whole passage (Hos 2¹⁶). It has been proposed to set it down as one of those later additions whereby for after-generations (especially in Judah) the cheerlessness of an unpitying series of denunciations of judgment was sought to be alleviated. Only in that case we must go further, and (with Marti) pronounce chapter 3 also a later addition. For so long as the wife of 3¹ is held—and this still appears to us the only natural view—to be Gomer bath-Diblayim, taken back by Hosea in spite of her unfaithfulness, the conduct of the prophet teaches quite expressly that this very wife of his is a type of the nation which, in spite of all its ingratitude and all its unfaithfulness, is not to be cut off from the pitying and pardoning love of Jahweh.

(c) The case of Isaiah, once more, gives much plausibility to the assertion that the pre-exilic prophets were messengers only of woe. At his very call the Divine commission is given him (6⁹) to produce in the people by his preaching the extreme of hardening, so that all understanding and repentance, nay more, all escape, may be rendered impossible for them. But here, again, we have to remark that an entirely literal interpretation of this Divine saying is neither psychologically conceivable nor reconcilable with the actual ministry of Isaiah. It is true that the mass of the people is hopelessly marked for judgment: with this terrible conviction the prophet is profoundly inspired. But this does not prevent a small band of faithful ones from grouping themselves around the prophet—a band which, when the judgment comes, is to remain under the protection of its God. These are the 'disciples' (Is 8¹⁶), among whom (or 'by whose help') the Divine revelation rejected by Ahaz and the mass of the people is to be sealed; so, too, the 'sons' of v. 13 should perhaps be understood, not of the prophet's sons literally but of these same disciples. But, at all events, Isaiah gave to one of his own sons the name *Shē'ar-jāshūb*, 'a remnant shall return,' and thereby gave expression to his hope that the coming judgment did not signify the destruction of all.† Again, Isaiah, after his unfavourable verdict on the value of the people's offerings, exhorts them thus (14¹): 'Wash you, make you clean. Put away your evil deeds out of sight. Learn to do good, strive after right. Set violent doers in the

* Cf. esp. Marti, 'Dodekapropheten' (in *Kurzer Hdbch.*, Tübingen, 1903), p. 27 ff.

† On the 'holy seed' of 6¹³ see below, p. 696b.

right way. Procure justice for the orphan, plead the cause of the widow.' These words surely indicate that he does not consider it an impossible supposition that at least some of his hearers may take his words to heart. Otherwise, there would be no meaning in his asserting immediately afterwards (v. 16^{ff.}) the possibility of a complete forgiveness of sin, and in his giving the people the choice between obedience and blessing on the one side and stubbornness and destruction by the sword on the other. Even a man like Ahaz has the words addressed to him (7⁹), 'If ye believe not, ye shall not stand,' in which is implied, on the other hand, 'Whosoever believeth shall not be put to shame' (28¹⁶). The judgment predicted then is, after all, a purifying one—a smelting process in which Jahweh Himself (12^{5ff.}) purges away all base metal, so that only the pure silver ('judges as of old and rulers as at the first') is left, while 'the rebellious and sinners shall be shattered one and all, and they that forsake Jahweh must perish.'

Like his predecessors, Isaiah thinks of the judgment as brought about by the destructive invasion of the then world-powers, Assyria (5^{26ff.}) and Egypt (the latter, however, only in 7¹⁸ and there coupled with Assyria). A complete devastation and desolation of the land is the result (5^{2f.}, 10 6^{1ff.}, 7^{18ff.}, 8^{6ff.}, 21^{f.}). All the men but a few perish in the conflict, until seven women press their suit upon one man, simply that they may escape the reproach of being unmarried (3²⁵ 4¹; cf. also 5^{24f.}). It is a question to what extent Isaiah contemplated the exile of the inhabitants of the land. As in the case of the Northern kingdom (17^{4ff.}), there appears, according to 5¹³ 6^{12f.}, 10⁴ 30^{13f.}, 17, to be in prospect for Judah as well a complete destruction of the people by sword and exile; and even the tenth, which at first escapes the judgment, is to be sifted once more. On the other hand, in 31^{ff.} what is contemplated is the exile only of all the leaders of the people (as in v. 24 it is the carrying away to slavery of the aristocratic ladies); among those that are left behind wild anarchy rages, and a war of one against another. The dignity of ruler becomes so cheap that no one cares for it. It is impossible to resist the impression that the prophet here beholds in spirit the conditions which, to a large extent, actually arose in Judah after the first deportation by the Chaldeans in 597.

But we have still to face the question, Did Isaiah at all times hold fast to these cheerless expectations, or is there not much in favour of the view that all the threatenings referred to belong to his first period (say down to the death of Ahaz), whereas, under the righteous rule of the pious Hezekiah, he changed his tone, and, while still expecting a purifying judgment effected by the Assyrian invasion, felt assured of the deliverance of the city and the State at the moment of extreme peril, his idea being that the cruel sufferings and consequences of the war would suffice to appease the just anger of Jahweh, so that He could once more have compassion on His people before things came to the worst (10²⁴)?

The possibility of such change is not to be *ab initio* called in question. The notion that Assyria in its overweening pride has far exceeded the Divine commission, and thought to destroy Judah instead of merely chastising it, is so marked in Isaiah (and that too, as would appear, pretty early) that it connects itself of necessity with the threat of a thorough chastisement of Assyria. Only the most pitiful hypercriticism can deny to Isaiah such passages as Is 10^{16ff.}, 20^{ff.}, 33^{ff.}, 14^{24ff.}, 17^{12ff.}, 18^{5f.}. As soon as this is recognized, there is equally little difficulty about accepting the oracle 37²²⁻²⁹, and in that case the prophecy of Isaiah achieved in the destruction of Sennacherib's host (37^{36f.}) as brilliant

a triumph as can be imagined. Thus was confirmed what Isaiah, in allusion to the successive actions of the husbandman (28^{24ff.}), emphasizes so strongly as a type of the conduct of the Divine wisdom: God's action is not like the working of a blind fate, but wisely accommodates itself to changing circumstances, times of severe chastisement being followed in turn by times of compassion and sparing grace. Nor is there any contradiction in the fact that, on the approach of the Assyrian peril after the death of Sargon (B.C. 705), Isaiah not only expressly condemns the arbitrary revolt of Hezekiah and the carnal measures adopted for defence, particularly the alliance with Egypt (29¹⁵ 30^{1ff.}, 31^{1ff.}), but predicts the futility of such enterprises (30⁸ 31²⁴), the siege and the great anxiety of the city (29^{1ff.}), as well as the ravaging of the country (32⁹⁻¹³). For the inevitable judgment upon the carnally secure and godless (28^{13ff.}, 17^{ff.}) does not exclude the deliverance of the humble and penitent (10²⁴), even if this is preceded by a time of sore trouble.

We must still ask, however, whether Isaiah meant thus to recall all his earlier threatenings of a far-reaching judgment, and especially of a deportation of almost the whole nation. In face of Divine utterances like that in 6^{1ff.} (addressed to the prophet on the occasion of his call), such a complete transformation of his expectations as to the future must be pronounced impossible. The original pitiless threatenings of his opening ministry may have, even for himself, receded into the background amidst the excitement of Sennacherib's invasion, but he certainly did not on that account lose his conviction that the incidents of the year 701 formed merely an episode in the general plan of Jahweh, and meant nothing more than a postponement of the final judgment. And if the oracle of 22^{1ff.} should be assigned to the period *after* the retreat of the Assyrians, the prophet must have returned only too soon to his former extremely gloomy view of the future. What hopes he cherished, nevertheless, of a restoration *after* the judgment, we shall have to consider elsewhere (see p. 695^b f.).

(d) The question whether, in the case of *Micah*, the contemporary of Isaiah, the threatening of the total destruction not only of Samaria (1^{6f.}) but also of Jerusalem (3¹²) was the final word of his prophecy, depends upon the other question, how much of Mic 4 ff. is from the pen of Micah himself. In any case we cannot regard as genuine such passages as 4^{11ff.}, which anticipate a sudden deliverance of besieged Jerusalem; but it may be possible to reconcile 3¹² with the prediction of exile and subsequent deliverance contained in 4⁹, 10, 14 [5¹] (on 5¹ (2) ff. see below, p. 696^a) and 6^{13ff.}.

(e) The greatest variety meets us, as might have been expected, in *Jeremiah's* expectations as to the future. He lived through the period not only of the decline but of the fall of the nation, with all the attendant terrors, and was a witness of all the vacillations between fear and hope, between unbelieving despair and foolish illusion—a witness, too, whose personal fortunes were very closely intertwined with all this. Considering the state of things, it is only natural that with this prophet, again, threatenings of judgment should occupy the foreground. Sword, famine, and pestilence are the means whereby Jahweh means to destroy the people (14¹², 18 24¹⁰ 29¹⁸, and very often); the Chaldean invasion introduces them into the land. The total destruction of the city (9¹⁰), the deportation of all the inhabitants of Judah (9¹⁵ 13¹⁵ 14^{18b} 16¹³ 17⁴; according to 25¹¹, the exile will last 70 years), are beheld by the prophet in spirit, and in addition—and here is a new element in the prediction—the boundless mockery and scorn of the

heathen towards the people abandoned by their God (18¹⁶ 19⁸ 25⁹. 18 26⁸ 29¹⁸).

But, in spite of all this, Jeremiah teaches his people (18^{32f.}) that neither the threatenings nor the promises of God amount to a *decretum absolutum*.^{*} Nay, as the potter can remodel the marred vessel after his pleasure, God can change His threatenings and His promises into their opposite, according to the conduct of a people in each case. Accordingly, Jeremiah too regards his exhortations to repentance, at least for a time, as not absolutely hopeless. By Jahweh's command (7^{12f.} and, quite similarly, 26^{2f.}) he takes his stand at one of the gates of the temple, and declares to those who pass through what are the conditions on which they may have a permanent place in the land. But, as time went on, the certainty was more and more borne in upon the prophet's mind, that all calls to repentance would fall unheeded upon the ears of the hardened people, as in former times all Jahweh's chastisements had proved ineffectual (5³). Judgment has become an irrevocable necessity. To this conviction Jeremiah gives forcible expression in a variety of ways. There is, for instance, the symbolical action of the breaking of an earthen pitcher before the eyes of the chiefs of the people (19^{10f.}); and, no less telling, there is the repeated declaration that any intercession for the people has been forbidden him by God as wholly useless (7¹⁶ 11¹⁴ 14²¹). Yea, although Moses and Samuel—the most powerful intercessors and deliverers of the people—should present themselves before God on their behalf, His determination to cast off the people would remain unshaken (15¹). But the strongest evidence of the prophet's perfect certainty as to the Divine resolution is afforded by 37^{36f.}. When the Chaldeans were compelled temporarily to raise the siege of Jerusalem owing to the advance of Pharaoh-hophra, all Judah broke into a frenzy of joy and imagined itself to be already delivered from all straits and danger. Jeremiah alone did not suffer himself to be deceived for a moment, but answered the inquiries of king Zedekiah in the words: 'Though ye had smitten the whole army of the Chaldeans that fight against you, and there remained but a few wounded men among them, yet should they rise up every man in his tent and burn this city with fire.'

The course of events showed the prophet to be right: all his threatenings were fulfilled in the horrors of the long siege, the terrible famine, and the slaughter wrought by the sword of the enemy. But all these judgments are not the concluding stage in God's ways with Israel. Jeremiah already beholds in spirit the time when Jahweh shall have gathered the dispersed from all lands and brought them back to the sacred soil, to dwell there under the charge of faithful shepherds, and to have henceforward no cause for fear or alarm (Jer 23^{3f.} 30³. 18^{3f.} 32^{37f.}). And when the wounds of Judah have thus been healed (30¹⁷), their plunderers and oppressors fall in turn a prey to plunder and exile (v. 16). Moreover, the return of Divine favour extends to all the tribes of Israel, and thus includes also the exiles of the Northern kingdom: 31^{12f.} (cf. esp. vv. 5. 9. 18^{3f.} 27). In regard to the Judahites, a distinction is drawn between those already deported in the year 597 and those that remained in the land with Zedekiah (24^{12f.}). The former are like the good figs which Jeremiah saw in a vision; to them belong all the comforting promises of return and repatriation (v. 5^{1f.}). But the others, who correspond to the bad figs, are to fall a prey to the sword, the famine, and the pestilence, besides the cruel mockery of all peoples of the earth.

^{*} Cf. above, p. 675^a.

5. The so-called 'Messianic prophecy.'—(a) So far as words are concerned, we have to deal here, properly speaking, only with such predictions as have for their subject the Messiah, the 'Anointed,'^{*} i.e. the King of the house of David, who, after the purifying judgment is over, is to hold sway as an ideal ruler over the regenerate people. But it has long been customary to speak of 'Messianic prophecy' in a wider sense, to include such predictions as occupy themselves with the conditions of the Messianic era inaugurated by the Messiah. Nay, predictions are included which do not even mention the person of the Messiah at all, and of which it is even doubtful whether they look for any such personality. In what follows we purpose to deal also with those Messianic prophecies in the wider sense. But one reservation must be made. Every expectation of a restoration after the purifying judgment (as, for example, Is 1²⁶, Dt 30^{3f.}) cannot be set down right off as a Messianic prediction.† On the contrary, it is essential to the latter that the transformation be brought about by an extraordinary interposition of Jahweh (for the most part accompanied also by violent natural phenomena), and, no less, that the new-created conditions represent not merely a copy of those that have been already experienced by the people (e.g. in the era of David and Solomon), but in some way transcend anything hitherto known. Apart from certain fundamental characteristics, the descriptions in question exhibit a very great variety. Moreover, the question has not infrequently to be asked how much the prophet means to be taken literally, and how much is to be set down simply to the account of poetical embellishments, and even of poetical hyperbole.

Owing to the extraordinary importance attached by the early Church to the OT predictions (which were viewed as much as possible in a magical light) about the Person and the Work of Christ, the literature on this subject has been all along very copious. We confine our attention here naturally to such works as have either actually advanced the knowledge of the subject, or exercised for a longer or a shorter period some considerable influence on the view taken of Messianic prophecy. The titles of the following works are arranged in three classes, and in chronological order; we leave out of account the relevant sections in works on Biblical Theology and articles in Dictionaries of the Bible.

1. The standpoint of the so-called mechanical theory of inspiration, or at least a specifically dogmatic point of view, is represented by: E. W. Hengstenberg, *Christologie des AT, und Commentar über die messianischen Weissagungen der Propheten*, Berlin, 1829-1835, 2nd ed. 1854-1857, 3 parts [according to Hengstenberg, the prophets always pronounce their oracles in the ecstatic condition, often without themselves understanding the contents and scope of their words, and, in virtue of Divine inspiration, thus anticipate the whole Christology of orthodox dogmatics]; Joh. Chr. von Hofmann, *Weissa-*

^{*} Cf., on the history and meaning of the anointing of persons, above, p. 695^b. The term *Messias*, which is frequently used, is derived, as is well known, from the NT *Messias* or *Mesias* (so only in Jn 1⁴¹ and 4²⁵; elsewhere, as in the LXX, ὁ Χριστός [so for the most part in the Gospels] or Χριστός [so generally in St. Paul])—a form which itself springs not from the Hebrew מָשִׁיחַ (*māshiah*), but from the Aramaic form מְשִׁיחָא (*mēshihā*), the so-called *status emphaticus*, with the determinative ending מָשִׁיחָא, which corresponds to the Hebrew article, so that the name = ὁ Χριστός. The written form *Messias* is after the same analogy as Γεωργίος = Γεώργιος, or 'Ιερωνύμ = 'Ιερώνυμος, and does not justify the assertion of de Lagarde (*Bildung der Nomina*, Göttingen, 1889, p. 93 ff.) that *Messias* cannot go back except to a form מִשְׁחִיחַ (*mishshiah* = Arah. *mīssih*) whose meaning would be 'oft anointing.'

† In the same way, of course, every threatening against the nations hostile to Israel is not to be summarily assigned to the realm of Messianic prophecy. Such threatenings may spring simply from a general faith in the righteous conduct of Jahweh as the Ruler of the world (so Am 1^{34f.}) or from special faith in the righteousness of the God of Israel, who chastises the overweening pride of the world-power employed by Him as the rod of chastening (so with Isaiah's threatenings against Assyria [see above, p. 693], Nahum's against Nineveh, Habakkuk's [32^{1f.}] against the Chaldeans). The case is different, to be sure, where the threatening stands in connexion with an allusion to the personal Messiah or other indubitable characteristics of Messianic prophecy.

gung und Erfüllung im AT und NT, Nördlingen, 1841-1844, 2 parts [attempts to prove that the time and all the details of fulfilment were already predestinated in the facts of the OT history of salvation, the word of prophecy simply accompanying the facts by way of supplement and confirmation. The types of Christ which were supposed to be embodied in the history were arrived at by an extremely artificial system of exegesis, without any regard to literary criticism].

II. A scientific but critically conservative standpoint is occupied by: C. v. Orelli, *Die älteste Weissagung von der Vollendung des Gottesreiches in ihrer geschichtlichen Entwicklung dargestellt*, Wien, 1882, Eng. tr. 1885 [contains a number of specimens of translation and a commentary on the individual prophecies]; Ch. A. Briggs, *Messianic Prophecy*, New York, 1886; Franz Delitzsch, *Messianische Weissagungen in geschichtlicher Folge*, Leipzig, 1890, Eng. tr. 1891.

III. The following represent a free critical standpoint: Ferd. Hitzig, *Vorlesungen über die biblische Theologie und* [forming an independent 2nd part] *die messianischen Weissagungen des AT*, herausgegeben von Kneucker, Karlsruhe, 1880; Ed. Riehm, *Die messianische Weissagung*, Gotha, 1875, 2nd ed. 1885, Eng. ed. 1900; V. H. Stanton, *The Jewish and the Christian Messiah*, Edinburgh, 1886 [successfully maintains that the Jewish Messianic expectation had not yet attained to the full contents of the Christian idea of the Messiah, which was based upon a deeper knowledge of His nature and functions]; H. Hackmann, *Die Zukunftserwartung des Jesaja*, Göttingen, 1893; P. Volz, *Die vorzeitliche Jahweprophezie und der Messias*, Göttingen, 1897 [seeks, by the aid of very old literary criticism, to prove that the Messianic idea is foreign to the character of pre-exilic prophecy, and makes its first appearance in Ezekiel. Even there it is held to be not a derivative of the spirit of pre-exilic prophecy, which was pre-eminently a preaching of judgment and a call to repentance, but a concession by Ezekiel to the national and particularistic sentiments of the Jewish popular mind—in opposition to his ordinary viewpoint]; H. Hühn, *Die messianischen Weissagungen des israelitischen und jüdischen Volkes bis zu den Targumim*, Freiburg i. B., part I., 1898 [a concise but very able handling of the subject; part II., Tübingen, 1900, deals with the OT citations and allusions that occur in the NT]; G. Nowack, *Die Zukunftshoffnungen Israels in der assyrischen Zeit*, Tübingen, 1902; A. B. Davidson, *Old Testament Prophecy*, Edinburgh, 1903 [a posthumous work edited by J. A. Paterson].

One of the principal difficulties in this connexion is occasioned by questions of literary criticism. The authenticity of those prophecies, especially the Isaianic ones, in which a personal Messiah is spoken of, has recently been powerfully assailed by Hackmann (see above), Cheyne, and others; and, although the last word may not have been spoken on all the sections in question, there is scarcely a single passage which does not labour under serious difficulties in regard either to its contents or its language.

(b) In view of what has been said, it is only under reserve that we commence our examination of strictly Messianic prophecies with—

(a) Is 7¹⁴.—According to the presently prevailing opinion, indeed, this so-called Immanuel-prophecy would have to be left quite out of account in our discussion. The prophet, we are told, meant to say nothing more than that any boy born within a short time from then might receive from his mother the name 'God with us,' in allusion to the quickly following deliverance from the foes that were then threatening Judah. The 'sign' which Ahaz had disdained, and which the prophet now announces to him in the name of his God, is held to consist simply in the name 'Immanuel,' neither the person of the young woman (מְיָרָם) nor that of the boy being of any importance. We cannot help feeling, however, that this interpretation overlooks in its haste two serious objections. In the first place, is it possible that the confirmatory sign announced so solemnly by Isaiah should have consisted merely in affirming, by the name given to any boy, the deliverance of Judah? Would not the logic of this prophetic announcement simply come to this: 'The deliverance will take place as surely as it will take place'? Secondly, is it possible in Is 8⁸ to rest content with the explanation that the expression, 'thy land, O Immanuel,' is intended to refer to the home of that casual, purely imaginary boy, who may receive the name?

But if, in view of these difficulties, the ancient Messianic interpretation of Is 7¹⁴ is still entitled

to serious regard, a number of concessions must be made. First of all, it must be admitted that the prophet expected the advent of the Messiah, not merely within the period of Assyrian world-empire but in the immediate future; and consequently that he was mistaken on this point. Secondly, his announcement of Immanuel as the Messiah and as the Deliverer is intelligible only on the assumption that he could confidently take it for granted that his hearers were familiar with the *theologumenon* of the Messiah. Otherwise, his mode of expression would be so obscure and enigmatic that scarcely any one could have understood him. Now, it is quite conceivable that an ancient Divine oracle regarding the perpetual duration of the Davidic dynasty, such as doubtless underlies the present recension of 2 S 7 (cf. especially v.¹⁴), may have already become transformed in the popular belief into the expectation of one ideal ruler of David's family, and that this expectation always prevailed more powerfully when the nation saw itself menaced by any serious danger. The prophet could then without anything further count upon the intelligence of his hearers, if he simply alluded to that expectation. All this does not indeed answer the question how it comes to pass that the prophet never again recurs to this *theologumenon* of the Messiah, even in a case where (as amidst the sore distress caused by Assyria in the year 701) this procedure would have been most natural. Are we to hold with some that Isaiah afterwards abandoned his Messianic expectations and attributed to Jahweh alone all the functions of the Messiah; or even that, in the matter of his expectations as to the future, we must distinguish not two but three, or even four, periods? * Such a notion is contradicted by all that we are really able to learn of the personality of Isaiah. All the more weight, indeed, thus attaches to the circumstance that, subsequent to 8⁸⁻¹⁰, he never returns to the subject of Immanuel.

(β) Is 9¹⁻⁶ and 11¹⁻⁹.—The same difficulty arises, of course, in estimating the two great, undoubtedly Messianic prophecies, Is 9¹⁻⁶ and 11¹⁻⁹ [the secondary character of 11^{10ff}, is now pretty generally acknowledged]. It is no objection to Isaiah's authorship that in 9¹ the circumstances of the Exile appear to be presupposed, and that in 11¹ the stock of David seems to be reduced to a mere stump. For it lay quite within the range of true Jahweh prophetism that Isaiah should be transported by the spirit of God into these very future conditions—a result which would not at all impair his connexion with the present. Again, as regards the further features of the prediction of 9^{1ff}, namely, the hope of a brilliant victory, whereby *Jahweh* breaks the yoke of the enemy (v.³), the burning of all instruments of war (v.⁴), the righteous and peaceful rule of the descendant of David (for such is certainly intended) over the kingdom of David restored to its old extent,—all these are expectations which an Isaiah may quite well have cherished. Nor is any stumbling-block occasioned by the names by which God (v.⁵) calls the Messiah, provided one does not render אֵל גִּבּוֹר, 'hero God,' but finds in it an epithet = 'god of a hero,' i.e. 'Godlike hero': an absolute predication of Godhead, even in the case of the Messiah, would be inconceivable in the OT.† But it is an undeniable difficulty that

* Two periods (the first from 736-724) are assumed by Guthe (*Das Zukunftsbild des Jesaja*, Leipzig, 1885); a 'threefold picture of the future' by Giesebrecht (*Beiträge zur Jesajakritik*, Göttingen, 1890, p. 70 ff.); a fourfold one by Meinhold (*Studien zur israel. Religionsgeschichte*: i. 'Der heilige Rest,' Bonn, 1903).

† Rabbinical exegesis, as is well known, gets over the difficulty by taking the first three (or at least two) titles as subjects, Divine names in apposition with the 'He' of 'and He calls,' so that only the last title (or at most the last two) belongs to the Messiah.

the announcement of the Messiah is conveyed by such enigmatic expressions as 'a child' or 'a son' without any more specific explanation—a manner of procedure which indeed reminds us of the purposely obscure manner of speech of the later prophecy, which is already on the point of passing into apocalyptic. The same cannot be said of 11^{10c}. The fresh shoot from the stump of Jesse could not be misunderstood by any one, and as little could this be the case with the beautiful description of the righteous sway that he is to exercise in virtue of his extraordinary endowment with the spirit of Jahweh, with its many-sided influences. The whole prediction is indeed dominated by religious points of view, but the ideal picture of the theocracy is yet far from that of a priestly State under the dominion of a written law. On the contrary, the expectation in question moves quite within the sphere of ideas that strike us as perfectly natural to a prophet of the 8th cent., looking to the historical experiences of the past and to the conditions of his own time. Even the appended description (v. 6^{10c}) of the paradisaic peace that reigns among wild animals could be pronounced Utopian and derived from the later apocalyptic only if in v. 9 the animals had attributed to them a share in the universal knowledge of God which marks the Messianic age. If this latter piece of (certainly unjustified) exegesis be rejected, all that remains is a highly poetical carrying out of the true Prophetic notion that even the external course of nature and the changes it undergoes stand in the closest connexion with the fortunes of the people of God, whether their fall or their rising again. In view of all this, it is quite intelligible that even so radical a critic as Duhm holds to the authenticity of 9¹⁻⁶ and 11¹⁻⁹; and we should readily subscribe unreservedly to this view, if the question were first answered how such express and strong expectations of a personal Messiah could possibly find no echo in the later oracles of Isaiah.

(γ) Mic 5^{10c}.—New difficulties are raised by the Messianic prophecy of Mic 5^{10c}. These do not lie in the seemingly magical prediction that Bethlehem is to be the place from which the Messiah is to come forth. For (as in Is 11¹) all that is meant by this is plainly nothing more than that the Davidic dynasty must first be reduced to the pre-Davidic conditions before the Messiah can make His appearance. Again, the reference to the remote antiquity* from which the origin of the Messiah dates, would tell against Micah's authorship only if the allusion were to the time when David first came upon the scene and not rather to the primeval resolution of Jahweh to send the Messiah. But our difficulties do begin with v. 2. Are we to hold that Micah, with an eye upon the prophecy (which he interpreted in a Messianic sense) of his contemporary Isaiah (Is 7¹⁴), used the peculiarly veiled expression 'till the time when one who is to bear shall have brought forth'? When the hope is expressed of the return of the *residue* of his countrymen along with the Israelites (v. 3^b), is not the return of a portion already presupposed (and thus not predicted)? And does not the announcement that the Messiah shall be great 'even to the ends of the earth' already recall the late *theologoumenon* of the world-empire of Israel under the Messiah? All these are questions which still wait for a satisfying answer. But the main difficulty here, again, is that so sharply defined a Messianic expectation should apparently have passed again into oblivion both with Micah himself and with the prophets who succeeded him.

(δ) Jer 23^{5ff}.—In view of all that has been said,

* Dt 32⁷ shows that *this* is the meaning of עֶלְיוֹן (not 'days of eternity', as if what were spoken of were the eternal pre-existence of the Messiah).

it might not be an impossible supposition that the real starting-point of the expectation of a personal Messiah is to be found in Jer 23^{5ff}, the prophecy of the 'righteous shoot' of David.* He is called the 'righteous shoot' because, unlike David's descendants in the time of Jeremiah, He will correspond to the ideal of a Davidic ruler. But the little that Jeremiah says about Him (that He will rule wisely and justly, that under Him Judah and Israel shall be saved and dwell secure) implies no very extraordinary fortunes or attributes of the subject of the prophecy; so that the question might almost be asked whether the concept of 'Messiah' is applicable at all to Jeremiah's 'righteous shoot.' Nor are we carried any further by the name given Him in v. 6 'Jahweh is our righteousness,' especially as it is exegetically uncertain whether this name is intended for the Messiah and not rather for the land and the people: in the late imitation of our passage in 33¹⁶ the same name is bestowed upon Jerusalem. But, even if Jeremiah means by the 'righteous shoot' the Messiah in the narrower sense, he by no means thinks of a *single* descendant of David who lives and reigns for ever. For already in v. 4 he promises *shepherds* to feed the people when they are collected again, that is to say, he expects a succession of righteous descendants of David, as the author of Jer 33¹⁷ already understood him to do. This would not indeed exclude the supposition that the shoot of David who first arises and inaugurates the great revolution was thought of as the Messiah in the narrower sense; but a closer examination of the passage shows that the idea of the personal Messiah does not come so prominently forward as to be capable of being regarded as a landmark in the history of Messianic prophecy.

(ε) The Messianic prophecies in the wider sense which are attributed to pre-exilic prophets, stand in urgent need of careful sifting. Many of them are encumbered with serious difficulties as to their authenticity, and hence had better be reserved for treatment at a later stage. Others are based upon the expectation of a *natural* course of things, and hence lack the marks of true Messianic prophecy mentioned above (p. 694^b). To this category belong—

(α) Is 7³.—A certain expectation is here embodied in the name given by Isaiah to his son, *Shē'ār-jāshūb*, 'a remnant† shall return.' The underlying notion is that the impenitent mass of the people shall be involved in destruction on Jahweh's day of judgment, but that a small number of godly ones shall survive the judgment, and, under a regenerated political constitution, lead a life well-pleasing to God. So also the closing words of 6¹³ 'and a holy seed shall be the stump [of the tenth that survives at the end of the first judgment],‡' may be understood to mean simply that the survivors are to form the stock of a population of Judah 'consecrated' to Jahweh, i.e. truly belonging to Him. The additional idea that their conversion and deliverance as well as the forming of the new political constitution are to be brought about by a miraculous interposition and extraordinary measures on the part of Jahweh, could be supplied from the above-noticed prophecies of a personal Messiah, only if the latter certainly emanated from Isaiah.

(β) Hos 2²⁰ (19), 23 (21) f.—Along with the promise of

* The authenticity of this prophecy appears to us (against Duhm in his Commentary on Jeremiah) to be absolutely proved by Zec 3⁸ and 6¹², where 'Shoot' (EV 'Branch') has already become (no doubt, on the authority of Jeremiah) a *nomen proprium* of the Messiah.

† On the 'holy remnant' see the above-cited studies of Meinhof (p. 695^b note *).

‡ We do not forget that these words also [they are wanting in the LXX] are denied by many to Isaiah.

a community purified from sin and introduced into the closest fellowship with God we meet here with the promise of extraordinary outward blessings: protection from all harm from animals (as in Is 11^{5a}), and the so-called 'Messianic fertility'—a theme which, in the later eschatological prophecies, is treated with special predilection and in language of the strongest hyperbole.

(7) Zeph 3¹¹⁻¹².—From the period prior to Jeremiah, at most Zeph 3¹¹⁻¹² can be assigned to our present category. But even this passage speaks only of taking away the consciousness of guilt and preventing fresh guilt on the part of 'the humble and small people,' which, after the removal of the haughty ones, is to be left on the holy mountain, where henceforward it shall dwell in peace.

(8) Jer 12^{14a}.—In Jeremiah we encounter, perhaps for the first time,* the notion—still indeed expressed in a very limited fashion—that the Gentiles are to be partakers of the blessings of the theocracy. In 12^{14a} there is a promise that the heathen neighbours of Judah who have been carried captive shall be planted again, and shall flourish in the midst of Judah, provided they confess the name of Jahweh; otherwise, they are to be plucked up once more and completely destroyed. Beyond doubt, we must see in this oracle an approximation to the *theologumenon*, so important in after-times, of the conversion of the heathen and their reception into the kingdom of God—an expectation which witnesses to a profound insight into the Divine plan of salvation, and deserves more than any other the name of a truly Messianic hope of the future.

(9) Jer 31³¹⁻³⁴.—We do not find that Jeremiah follows out the above notion elsewhere. But in its place he offers in 31³¹⁻³⁴ a prophecy regarding the condition of Judah after the purifying judgment, which goes far beyond the announcement of simple restoration and renewed prosperity. This is the famous prophecy of the 'new covenant' which Jahweh is yet to make with Israel [so that the long exiled Northern kingdom is included in the prophecy] and Judah. We pass over the fact that even in Jeremiah the word *ברית* does not denote simply a 'covenant' or engagement entered into at will by two parties, and to be abandoned at pleasure, but, in accordance with the *religious* use of the term in the OT (cf. above, p. 630^b), stands for an ordinance emanating from God and binding unconditionally upon Israel. But this is not inconsistent with what is a fact, that here a wholly new conception of the *ברית* makes its appearance in history. The prophet himself emphasizes this in the words: 'not according to the covenant that I made with their fathers in the day that I took them by the hand to bring them out of the land of Egypt, which my covenant *they* broke.' And the continuation in v. 33 teaches plainly wherein the deep-seated difference between the two forms of *ברית* consists. In the first instance, it was outward ordinances [the prophet is thinking in all probability of the law-book introduced by Josiah in the year 621] that were laid upon the whole body of the people, which always confronted them as external, *dead* statutes, incapable of penetrating to the heart and conscience of the individual, and producing there an enduring spiritual life. This is now to be quite different: Jahweh will put His law within them and write it in their heart; and *upon this* shall henceforward be based the truth, 'Jahweh the God of Israel, Israel the people of Jahweh.' Then

no longer shall any one need (v. 34) to be taught or exhorted to know Jahweh, for they shall all know Him from the least to the greatest, thanks to the enlightening that shall go forth from Him. For the latter they are prepared, moreover, by the guilt of their transgressions being removed, and their sins being no more remembered against them. True knowledge of God, as well as worship of Him in spirit and truth, can take root only in the soil of pure hearts.

The importance of this prophecy of Jeremiah's about the 'new covenant' cannot readily be exaggerated. It means nothing less than a distinct breaking with the conception of the religion of Israel as a merely national religion indissolubly connected with particular outward forms of the cultus, and, above all, with a particular land. The 'new covenant' can blossom and bear fruit wherever an Israelite looks up to his God with a grateful and trustful heart. In place of the general body of the people, which had hitherto constituted the 'subject of religion,' the individual * now comes forward with his claim to the most direct personal communion with his God. Thus the victory is finally won over those particularistic features, nay, features bordering upon nature-religion, which from early times had clung to the religion of Israel.

vi. *THE EXTERNAL COURSE OF DEVELOPMENT OF THE RELIGION OF ISRAEL DURING THE PERIOD OF PRE-EXILIC PROPHECY.*—1. After the disruption under Rehoboam, the two kingdoms went each its own way in matters of religion, and, as time went on, these ways always deviated more and more. Not indeed that there was no longer a consciousness of what was common to all the tribes—the *one* God and His former mighty acts. That the opposite was the case is shown by the almost complete identity of the conceptions and the institutions found in the two kingdoms. Image worship and the localizing of Jahweh at different sanctuaries had the same vogue in Israel as in Judah, and, if Judah repudiated the bull worship, it sacrificed, down to the time of Hezekiah, to a brazen serpent, even if the latter had not its place in the temple. Both kingdoms are reproached with over-zealous—only, indeed, external—practice of the sacrificial cult (Am 5^{25a}, Is 1^{11a}). In both kingdoms priests and prophets of Jahweh are at work. The high appreciation of Israel for her priests is sufficiently attested by the eulogistic language of Dt 33^{8a}, which shows that in their claims they were not a whit behind their brethren at Jerusalem. When, again, Jehoshaphat (1 K 22⁷), dissatisfied with the bearing of the 400 prophets of Ahab, asks, 'Is there not yet a prophet of Jahweh here, whom we may consult?' he assumes that even in Israel there are genuine prophets of Jahweh, and his expectation is not disappointed. In short, Israel as well as Judah continues to be the people of Jahweh, and that in the estimation not merely of Hosea, who himself belonged to the Northern kingdom, but of Amos the Judahite (Am 7^{1b}), and of all the later prophets. Otherwise, it would be unintelligible that the expectation of a return of Israel from exile and of its reunion with Judah under *one* king should have persisted so tenaciously, and that far beyond the time of Ezekiel, whose strong emphasizing of

* It would of course be a gross exaggeration to deny any individualistic traits to the religion of Israel prior to the time of Jeremiah. Such an assertion would be contradicted by such notices of individual prayer as we find in 1 S 11^{10a} etc. But, on the other hand, we are not entitled, with Sellin (*Beiträge zur israel. und jüd. Religionsgeschichte*: Heft 1, 'Jahwes Verhältnis zum israel. Volk und Individuum nach altisrael. Vorstellung,' Leipzig, 1896), to deny the profound difference between Jeremiah's position and that which was maintained prior to his time.

* The authenticity of Is 187, and above all of 1918^{ff}, is encumbered (like that of Is 2^{ff} and Mic 4^{ff}) with difficulties too serious to allow of the placing of these passages prior to Jeremiah. It may be added that Jer 12^{14a} is denied to Jeremiah by Stade and Duhm, but (with the exception of v. 14b 2) is held by Giesebrecht (with whom the present writer agrees) to be authentic.

this expectation (37^{15a}) is strange enough when we take into account his sternly condemnatory judgment of Samaria in chs. 16 and 23.

2. But, in spite of all this, it cannot be overlooked that a difference between the two kingdoms showed itself early and sank deep. The Northern kingdom had inherited, along with the name of Israel, the claim to represent the proper continuation of the Davidic-Solomonic empire—a claim which finds drastic expression in the words of king Joash in 2 K 14⁹, as well as in Dt 33⁷. In the political sphere it might be to a large extent justified: the strength of the whole nation was, above all, represented by Israel, whereas Judah—notwithstanding the silence of its historians—was in all probability a vassal of Israel, not only in the time of Jehoshaphat, but on other occasions as well. But in the religious sphere it was only in a very precarious sense that Israel could be called the heir of the ancient traditions. Everything indicates that the religious conceptions as well as the cultus of the Northern kingdom were far more strongly permeated with relics of the once prevailing nature-religion than was the case in Judah. The syncretism between Baal and Jahweh, which Hosea still found it necessary to denounce so sharply, proves how far removed the people were (only a generation before the fall of Samaria!) from a consistent henotheism, not to speak of a real monotheism. We find also in Amos and Hosea abundant indications of the extent to which the ritual customs in Israel were full of imitations of Canaanite practices.

But yet another element entered into the situation. Israel was drawn earlier than Judah into the vortex of the great world of politics, which turned mainly on the question of Assyria's supremacy in Western Asia and its designs upon Egypt. Now, the tendency of political experience was to produce, not indeed leanings towards the gods of the world-powers as the stronger, but—as could hardly happen otherwise from the standpoint of a purely national religion—an involuntarily depreciatory judgment of the power of the God of the land, as compared with the immense superiority of Assyria, and a consequent depreciation of this God himself. However much in the narrower sphere men might still look to Him for all kinds of blessing and aid, His power appeared inadequate to meet the needs of the people at large, struggling for their existence, and it was thought necessary to look around for other resources and allies. We understand now why Hosea displays such holy zeal, above all, against his people's wooing the favour sometimes of Assyria, sometimes of Egypt: such conduct amounted to a flat denial of the God of Israel, even to a species of blasphemy. And it is easy to comprehend that a religion and a cultus with such a notion of God could be no source of moral renewal to the life of the people. One dynasty after another fell a prey to assassination and the bloody strife of factions; terrible corruption prevailed among the heads of the people and the priests; and even among the lower classes the last relic of loyalty and trust, reverence for any kind of authority, not to speak of regard for the holy will of God, had disappeared. We hear no longer of 7000 who had not bowed the knee to Baal (which is now the same thing as reposing fleshly confidence in worldly resources). The rottenness to which the body of the nation had fallen a prey wrought its effects without intermission. In 722 Israel, after a protracted struggle of despair, fell before the conquering might of Sargon. The circumstance that the name of not a single leader has come down to us from the period of the fall of the kingdom can be explained only on the ground that the religious factor was completely over-

shadowed at this crisis in Israel's history. Had it been otherwise, the Judahite historical narrative, which still shows a religious interest in the remnant of the inhabitants of Samaria (2 K 17^{24ff.}), would surely have preserved for us one name.

3. As a matter of course, the fall of the Northern kingdom was bound to exercise a very powerful influence on the condition of things in Judah. The immediate result, indeed, was simply to strengthen the national religion. Samaria had fallen, Jerusalem remained. Consequently, it was felt, Jahweh had rejected the Northern kingdom, the apostate from Judah (Is 7¹⁷), whereas Judah was now 'the people of Jahweh,' the continuation of the totality of Israel, and henceforward it, too, came readily to be called 'Israel.' But, above all, the course of events raised the prestige of the temple in the eyes of the people. Although primarily only the palace-sanctuary of Solomon, the possession of the temple must have served, after the disruption of the kingdom, to give a great advantage to Judah, so that Jeroboam I. desisted in the halo that surrounded it a danger to the permanence of his monarchy (1 K 12²⁷). To the sacred Ark, which now stood in the temple in mysterious darkness, attached the most sacred recollections of the Heroic Age of the nation; while the proud building of Solomon, with its giant substructures, was associated with the most glorious recollections of the Golden Age of united Israel; and the Northern kingdom could only reflect with envy that it had no share left in this pride of the whole nation.

But was not this advantage of Judah, after all, only an outward, not to say a purely imaginary and unreal, one? And did not the prophets find it necessary, even in Judah, to complain bitterly of crass image worship, crude faith in *opera operata* in the cultus, disregard of justice, and carnal trust in outward politics? Such questions are justified, but equally justified is the assertion that in Judah things were different from what they were in Israel. In the first place, the continuity of the Davidic dynasty, the legitimate heir of the monarchy instituted by Jahweh Himself, was a powerful bulwark against political disorder. Once (2 K 14^{15ff.}), indeed, we hear of a conspiracy against king Amaziah, which issued in his murder, without, however, the continuance of the dynasty being thereby affected. The extirpation of the family of David by Athaliah (2 K 11¹) is the work of a foreigner, but the latter is overthrown with all possible speed by the chief priest Jehoiada, in favour of a prince of David's line. Similarly, in 2 K 21²⁰, the murder of Amon is quickly expiated by the putting to death of his assassins and the placing of Josiah on the throne. If, owing to the prestige of the dynasty, even worthless kings like Ahaz were tolerated, how much more must a distinct blessing have emanated from able and religiously well-disposed rulers like Amaziah, Uzziah, Jotham, and Hezekiah.

Again, the priesthood at the temple of Jerusalem must have ranked considerably higher than that at Bethel and Dan. Its hereditary character from early times, as well as the not infrequent marriages which there are various indications that it contracted with the royal family, gave it high standing and political influence; while the care of literary and, above all, of spiritual interests was, without doubt, almost exclusively in its hands.

4. In this way, by means of kings and priests, at least during certain considerable periods, all the conditions were present in Judah for implanting more deeply the ideas of the prophets concerning God and His true worship. And, what is the main point, despite the presence of many false prophets there were never wanting powerful repre-

sentatives of true Jahweh prophecy. It is true that outside the ranks of the writing prophets only a few isolated names have come down to us, but at least we have evidence in Is 8^{16f.} of the existence of a band of disciples gathered about Isaiah; and to these, as guardians and champions of the thoughts of the master, we must ascribe a far-reaching influence on future times. This passage conveys the distinct impression that Isaiah at that time, despairing of any improvement in religious conditions under an Ahaz, resolved to retire completely into the inner circle of his disciples and give himself to esoteric teaching. It is accordingly not without reason that Robertson Smith* writes: 'The formation of this little community was a new thing in the history of religion. . . . It was the birth of a new era in the Old Testament religion, for it was the birth of the conception of the Church, the first step in the emancipation of spiritual religion from the forms of political life.' Still, even for Isaiah there was left in the times of Hezekiah occasion enough to make his influence felt in favour of a truly theoretic scheme of politics.

It is another question how far Isaiah succeeded in carrying through the Prophetic demands even in the matter of the cultus, and, above all, of the outward form in which the Jahweh religion expressed itself. According to the Deuteronomic narrative of 2 K 18⁴, Hezekiah had already entirely abolished the worship on the high places, shattered the *mazzēbōth*, and cut down the *'āshērāh* (i.e. here the sacred pole beside the altar); and it is usual to trace this 'cultus reform of Hezekiah' in a general way to the influence of Isaiah. But the following period knows nothing of such reforms by Hezekiah.† This is explained, indeed, by a late gloss in 2 K 21^{3f.} as due to the circumstance that Hezekiah's son, Manasseh, rebuilt the destroyed high places and set up a new *'āshērāh*. But the whole description contained in 2 K 22 and 23 permits of no doubt that the state of things which was finally put an end to by Josiah's cultus reform had been for centuries regarded as quite unobjectionable, and had accordingly maintained itself without any opposition. Nay, as we see from 2 K 23², this held good even of the 'high places,' i.e. places of sacrifice, which Solomon once erected on the Mount of Olives for the convenience of his heathen wives.

But if in this respect the influence of Isaiah upon Hezekiah cannot be maintained, especially as nowhere in Isaiah do we hear a word against the high places or the *mazzēbōth*, such influence is very probable in another direction. We have seen that Isaiah, owing to his conception of God, felt himself called to a fiery polemic against the images of Jahweh. And so it was he, doubtless, that inspired Hezekiah's destruction of the brazen serpent made by Moses (2 K 18⁴);‡ and brought about—at least in circles favourably disposed to the teaching of the prophets—a general abandonment of images of Jahweh. This supposition is favoured especially by the circumstance that in after-times Jeremiah found occasion, indeed, to inveigh vigorously against heathen idols, but not, to all appearance, against images of Jahweh.

In what has been said above we do not mean to affirm that the idea of centralizing the cultus, which was first realized in 621 through the law-book of Hilkiah, was wholly remote in the time of

Isaiah, or altogether foreign to that prophet's own mind. Not that, after the fashion of the ancient national religion, he reposed a carnal confidence in the continuance of the temple, as a place which Jahweh could not under any circumstances give over to the enemies of His people. But the idea that Jahweh, or at least a form of manifestation of Jahweh, dwelt upon Zion, was familiar even to Isaiah. Even he sees in Zion—although in an infinitely deeper, spiritual sense—a bulwark of the theocracy (28¹⁶), the dwelling-place and hearth of God (8¹⁸ 29^{1f.} [if יֵצֵא in the latter passage = 'hearth'] 31⁹). This idea of the 'house of Jahweh' was, however, clearly opposed to the partitioning of Jahweh among a number of sanctuaries; and, if Isaiah himself did not yet press for a concentration of the cultus, this may have been simply because he attached no importance at all to the external cultus, especially in the then prevailing forms. On the other hand, they may be right who discover in Isaiah's band of disciples the forces we have to thank for the first preliminary steps towards the law-book of Deuteronomy.

Meanwhile, however, things had taken quite a different course. After the death of Sargon (705), Hezekiah, manifestly with the strong disapproval of Isaiah, had allowed himself to be drawn into the vortex of the rebellion of Western Asia against Sennacherib. It is not improbable that the king himself would have preferred to listen to the counsels of the prophet, but that he was not strong enough to withstand the veritably intoxicated war-party. Isaiah (cf. especially 30^{1f.} 31^{1f.}) declared with the utmost frankness how the alliance with Egypt against Assyria, which was promoted at first secretly and then openly, was to be judged from Jahweh's point of view. But when the catastrophe had befallen, when the land was frightfully ravaged by the Assyrians, and (as we now know from the cuneiform inscriptions) over 200,000 of the inhabitants had been carried captive, Isaiah comes forward to announce that Jahweh intends, not the destruction but the deliverance of the sorely beset capital. Without doubt, this change of opinion on the part of the prophet was due, above all, to the perfidy with which Sennacherib, in spite of the submission of Hezekiah and the payment of an enormous tribute by Judah (2 K 18^{14f.}), insisted upon the surrender of the city.

5. The incredible happened. The Assyrians were compelled by pestilence to beat a hasty retreat; Jerusalem saw itself saved in the course of a night. The prophetic insight of Isaiah had achieved a great triumph. But the practical application of these occurrences, which was made by popular opinion and, if not by Hezekiah himself, soon afterwards by his son Manasseh, was to the following effect. The deliverance was attributed, not to the God of the prophets, with His inexorable demands, but to the ancient national God of the land, Jahweh, who, from regard to His own honour, could never give over city and temple to the heathen, provided only that there was no lack of offerings—in extreme cases, even child-sacrifices—presented to Him. That this fancy as to the certain efficacy of child-sacrifice—a notion which was the offspring of a naturalistic conception of God—had not died out even in Judah, is proved by the unimpeachable note of 2 Ch 28³ regarding the offering of his own sons by Ahaz (in all probability in the year 735, during the stress of the Syro-Ephraimitic war). But what happened then as an isolated occurrence in the extremity of need, what was a relapse to a stage of religion that had been overcome through the prophets, became to all appearance the rule under Manasseh: the old naturalism revived, the whole life-work of

* *The Prophets of Israel*, Edinburgh, 1882, p. 274 f.

† The attempt of W. Erbt (*Die Sicherstellung des Monotheismus*, Göttingen, 1903), notwithstanding, to trace the concentration of the cultus to Hezekiah must be pronounced a failure.

‡ The note on this subject cannot, like the rest of the narrative, be the work of the Deuteronomist, but must have been taken from the so-called Great Book of Kings used by him as a source.

an Isaiah and a Micah seemed to have been in vain. Regarding the varied and gross idolatry of Manasseh, all that we can learn is on the authority of a late addition (2 K 21³⁻⁶) to the older narrative of the Deuteronomic writer. It is quite possible, however, that Manasseh did not shrink from an amalgamation of the cult of Jahweh with that of the host of heaven.* But the child-sacrifice with which he is charged, as well as the magic and sorcery and necromancy, and no less the *'āshērāh* at which the Deuteronomic compiler takes such umbrage (21^{7a}), are certainly to be put down to the account, not of a disposition to idolatry but of a radically mistaken view of the kind of worship that was pleasing to God. When, again, the shedding of much innocent blood is attributed (v.¹⁶) to him, this may refer to nothing more than outbreaks of hatred and cruelty in general. But we shall probably not be wrong in thinking, above all, of the blood of martyrs, of prophets, and prophets' disciples, who in holy indignation withstood the abominations that were creeping in, and who paid for their opposition with their life. As is well known, a tradition, which may be more than a pure legend, includes the aged Isaiah among the victims of the senseless fury of the king.

It is worthy of note that since the time of Micah, whose swan-song, full of the bitterest complaints, may be preserved in the fragment Mic 7¹⁻⁶, the voice of Jahweh prophecy had been, so far as we know, completely hushed. The oracle of Nahum against Nineveh (dating probably about 660), lies, in view of its contents, outside our sphere of consideration; while the next prophet, Zephaniah (c. 630), already belongs to the time of Josiah. This *lacuna* of some 60 years in the succession of prophets is surely not to be explained on the ground that cowardly fear of man closed the mouths of those who were raised up by God. Rather may we say, it was only natural that, in view of the cheerless condition of public religion and the complete purposelessness of any opposition, religious zeal concentrated itself above all on literary work, in order to prepare in this way the dawn of better days. We should probably assign to this period not only the preliminary steps towards Hilkiah's law-book (see above, p. 699^b), but in all probability also the combining of the early sources, J and E, of the Pentateuch—possibly also other fresh recensions of the earlier Historical books and Prophetical writings.

6. The language of Zeph 1 permits us to look far into the conditions that prevailed prior to Jeremiah's coming upon the scene. Zephaniah commences with the threat of an annihilating judgment, which is to sweep away man and beast. Judah and Jerusalem are to be affected by it because of their prevailing idolatry. But, alongside of the idolaters, Zephaniah (1^{6, 12}) knows also of men who seek not after Jahweh because He can neither bestow happiness nor inflict harm. This conclusion is again characteristic of the standpoint of national religion; its adherents are completely mistaken as to the power of the God of Israel. Long experience has taught them that He is no match for the gods of the world-empires. It is not then by any means that they deny His existence, but they deny that there is any profit in serving Him. Of what use is a God who can render no help? The idea that the seeming inactivity of Jahweh is due to the fault of the people themselves is incomprehensible to them: 'they are settled upon their lees' (v.¹²).

7. Jeremiah, who came upon the scene shortly after Zephaniah, had to combat first of all the carnal security with which the deluded people shut their eyes to the terrible seriousness of the situation. All signs of approaching ruin, all calls to repentance, were unheeded, thanks to the vain notion that, if it came to the worst, Jahweh *must* snatch the city and the temple out of the enemy's hands (cf., especially, 7^{aff. 3ff.}). In this delusion they were constantly encouraged by false prophets, who sought to heal the hurt of the people hastily, saying, 'Peace, peace,' when there was no peace (8¹¹). From these circles naturally emanated afterwards the encouragement to a senseless resistance of the Chaldeans, contrary to the unceasing exhortation of Jeremiah to patient submission, as what was alone in conformity with the purpose of Jahweh.

But once more it seemed as if that indispensable change in the religious sentiments of the people, for which the prophets had wrought in vain, was to be accomplished from another quarter. The contents of the law-book found by Hilkiah* had produced an immense impression, at least upon the pious king Josiah, and had led him to introduce this code, and, at a solemn gathering in the temple, to bind the whole people to observe it (2 K 23^{1ff.}). The circumstance that before doing so he took counsel (22^{12a}), not with Jeremiah but with the prophetess Huldah, can be explained only on the supposition that Jeremiah happened to be absent from Jerusalem at the time. For that Jeremiah himself placed great hopes on this law-book is evident from the fact that he still, about the year 605, utters very earnest exhortations to render obedience to it (11^{1ff.}). At a later period, indeed, the uselessness even of this last attempt appears to have become quite clear to him; for while he sharply denounces (34^{12a}), about the year 588, the neglect of a Deuteronomic command, he no longer mentions the law-book as a whole.

Hilkiah's law-book did not fail at first of outward results. Apart from the rigid concentration of the whole of the cultus at Jerusalem,† it led to a radical cultus reform in general. One is astounded in reading 2 K 23^{4ff.} to learn what, up till now, had been possible in and around Jerusalem, under the eyes of so pious a king as Josiah. But it would be wrong to represent the improvement of outward conditions as the only aim of the law-book in question. We have already (p. 687 f.) seen that the whole of Deuteronomy is inspired with the spirit of true Jahweh prophecy, that the service of God and the moral conduct it requires are based upon truly religious motives, namely, the humble recognition of one's own unworthiness, love to God, and hearty gratitude for His inexhaustible benefits. Josiah himself may have been deeply impressed and permeated with these ideas. But the reform which he based upon them remained for the mass of the people simply a royal decree which showed its effects in a variety of external matters,

* Regarding this law-book it must suffice here (cf. also above, p. 671b) to remark that, although not wholly identical with our present Book of Deuteronomy, it must have had the closest affinity with the latter. Further, we have to confess ourselves convinced that the discovery of the book by Hilkiah was really accidental (on the occasion of repairs on the temple) and not due to some collusion between Shaphan and Hilkiah, with a view to imposing upon the king. The fruit of holy zeal in prophetic circles (see above, p. 699^b), the expression of a firm conviction that only by the centralizing of the cultus was deliverance still possible, the book may have been deposited in the temple in the time of Manasseh, in the hope of better days, and afterwards (perhaps on the death of the depositor) forgotten. Only thus is it explicable that 18 years of Josiah's reign had passed before it was discovered. What object could the authors of the alleged 'pious fraud' have had in waiting so long, when all the conditions were extremely favourable for its perpetration?

† The attempt of Fries (*Die Gesetzesschrift des Königs Josia*, Leipzig, 1903) to explain away the demand of Dt 12 for the concentration of the cultus is a complete failure.

* The altars for the whole host of heaven, mentioned in 2 K 21⁵, are derived from 23¹², but in the latter passage it may very well be Jahweh altars that are meant. Are we to hold, with Budde, that Manasseh regarded the Assyrian star-gods as vassals of Jahweh?

but, so far as the inward disposition was concerned, left everything as before. Moreover, the new law-book produced one effect which can hardly have been intended by its authors, but which was inevitable all the same. The *written Law*, being apparently the exhaustive revelation of the Divine will, rendered the *living word* of the prophets really superfluous, in spite of the promise of Dt 18¹⁸. The supreme authority now rests with the letter of the Law. It is by this standard that the Deuteronomic redactors of the Books of Kings judge the theocratic quality of the different kings (cf. also Dt 17¹⁸). All that is really left to the prophets is the task of expounding and enforcing the Law.

The decisive proof that the effect of Josiah's reform was only an external one, is found in the treatment to which Jeremiah was constantly subjected on account of his calls to repentance and his threatenings of judgment (20^{1st}). The old dogma of the inviolability of the city and the temple still persisted unweakened in the popular imagination. The people, it is true, are on one occasion (26^{1st}) so overpowered by the greatness of the prophet that they shield him successfully from the fury of the priests and the false prophets, and even among the princes of Judah there were not wanting some that favoured Jeremiah (36^{1st}, 25); but all this could not check the infatuation of his enemies. Among the latter we have to reckon, above all, king Jehoiakim. With mingled defiance and fear he burned (36^{2nd}) the roll containing Jeremiah's messages from God, as if the final doom of Judah and Jerusalem could be averted by the destruction of the writing which announced it. And, even after a terrible warning had been furnished by the deportation (in 597) of Jehoiachin and the spiritual heads of the people, the activity of the false prophets continued (28^{1st}, 29^{1st}). King Zedekiah vacillated continually between fear of the Divine word spoken by the prophet and of the threats of the war-party, until finally his dread of the latter gained the upper hand, and he abandoned the prophet to them (38^{1st}). If evidence were still wanting that the Judah of those days was ripe for judgment, it would be supplied by the circumstance that it was a foreigner, an Ethiopian, who rescued the great sufferer from an ignominious death. But even the last drop in Jeremiah's bitter cup was not to be spared him, namely, to see that even the terrible Divine judgment which overtook Jerusalem in 586 had remained without effect on the remnant of the people that was left in the land. In 597 they had refused to believe in the real seriousness of the Divine judgment, but after the murder of Gedaliah at Mizpah they are seized with mad terror, for now they entertain no doubt that Jahweh has for ever forsaken the land and abandoned His people. In Egypt, to which, in spite of all the efforts of the prophet to dissuade them, they fled, taking him along with them, they commenced afresh the cult of the queen of heaven, and attributed all the disasters of recent times simply to the interruption of this cult (by the reforms of Josiah). No wonder that in the effrontery with which they proclaim these sentiments Jeremiah sees a self-condemnation which excluded all thought of repentance and forgiveness.

If, in spite of all his bitter disillusionings, Jeremiah still expected (see above, p. 697) the resettlement of the exiles in their native land, and the establishment of a 'new covenant,' based on the true knowledge of God, between God and Israel, this is a striking evidence of the unconquerable certainty with which he clung to the revelations of his God. He looked for the great transformation, consisting in a complete renewal of heart, to be yet wrought by God Himself (31^{2nd}). His younger contemporary, Ezekiel, sees in a

somewhat different light the further course of God's ways with Israel. He, too, is aware that the rebellious disposition of the people can be overcome only by a new heart and spirit bestowed by God; but the way to this leads, according to him, through a school of iron discipline, which accustoms the people to quite new forms of worship, and leads to the final triumph of the idea that for all Israel's acquisitions and actions there is but one supreme standard and one final goal—God's holiness.

V. EZEKIEL.

1. The great importance of Ezekiel for the further development of the religion of Israel, as we have sketched it at the close of the preceding section, could not be recognized until the dependence of the Priests' Code upon his programme for the future (Ezk 40-48) was placed beyond doubt. As long as it was held possible that he, the priest, occupied the leisure of the Exile in constructing fantastic variations on the priestly legislation which had already been long in existence, nothing could be made of his book, or at least of the closing parts of it. Nay, it was possible, as we see from the Talmud, even to dispute whether the Book of Ezekiel was entitled to a place at all in the canon of the Old Testament. But quite a different judgment has to be formed if Ezk 40-48 is to be regarded as a bold sketch of the future form of the State and the cultus. Then the 'priest in prophet's clothing' is all at once transformed into the pioneering genius, the real creator of Judaism in the narrower sense, the religion of the Law, which is the subsequent form of the religion of Israel. Not as if on that account the name of prophet is to be denied him altogether. On the contrary, we shall see immediately that in every particular he attaches himself to his predecessors—to Jeremiah in particular—and that he frequently assumes their ideas as self-evident. But with all this it remains true that, for the realizing of God's plans with Israel and of the demands and the promises of the earlier prophets, he looks to the establishment of a priestly State, whose chief aim shall be the conserving of the holiness of God. This last idea is Ezekiel's own, and through it he acquired an extraordinary influence on succeeding ages.

2. The truth that Ezekiel simply takes for granted the religious notions of his predecessors, holds good in quite a remarkable way of his *conception of God*. The zeal with which he constantly insists upon his two main themes—the guilt of the people and the way to its removal—scarcely gives him any occasion for specific declarations regarding the being and attributes of God. Indeed, if one were to judge merely by appearances, Ezekiel's detailed description of the glory (כבוד) of Jahweh as His sensible form of manifestation (12^{1st}, 43^{2nd}, cf. above, p. 639^f), and of the temple as the place of God's throne and the place of the soles of His feet (43⁷), might seem a return to long superseded material conceptions of the Godhead. But it is inconceivable that to Ezekiel the 'glory' of Jahweh which dwells in the temple should be wholly identical with His essential being. He himself inveighs (8¹²) against the silly delusion of those who had been left in Judah, that 'Jahweh sees us not, Jahweh hath forsaken the land.' But, above all, it is noteworthy how Ezekiel handles the attitude of Jahweh to the heathen peoples hostile to Israel. Scarcely anywhere* do we find an indication of the reasons for this attitude, or a rejection of false notions,

* It is, in any case, one of the very isolated exceptions, when in 29¹⁶ it is put forward as one result of the judgment upon Egypt that this country shall be no more a source of confidence for Israel.

except the very frequently recurring formula, 'that they may know that I am Jahweh' (so four times over in the oracle against Edom in ch. 35). This is as much as to say, 'that My absolute omnipotence, My absolute sovereignty over all peoples of the earth, My inviolable holiness, may be brought to their consciousness.' Nay, in view of 36^{20ff.}, it looks quite as if Jahweh's only reason for resolving upon the restoration of Israel was that their continuing in exile gave occasion for blasphemies on the part of the heathen, and the consequent dishonouring of His holy name.

3. The thought of the election of the people and of the benefits bestowed upon them by Jahweh appears only in the striking allegory contained in 16^{4ff.}, 10^{ff.}, where there is clearly dependence upon the ideas of Deuteronomy, and the inference is silently implied of the immensity of the debt of gratitude which the Divine goodness imposes upon Israel. The ethical demands of Jahweh, collected in a sort of canon in Ezk 18^{2ff.} (cf. also 22^{6ff.}), partly agree *verbatim* with those of the pre-exilic prophets, but are partly intermingled already with allusions to specifically religious or, more precisely, ritual obligations (regard to what is sacred to Jahweh, Sabbath observance, refraining from sacrifice upon the high places, etc.). In his view of the moral responsibility of the individual, Ezekiel attaches himself entirely to the teaching of Jeremiah. Like the latter (cf. Jer 31^{20ff.}), he opposes the delusion that Jahweh makes the children suffer innocently for the sins of the fathers (18^{2ff.}); on the contrary, 'he that sinneth, he shall die' (v. 20). But the general rule expressed in this last saying does not exclude the efficacy of timely repentance: Jahweh will not the death of the sinner, but that he should turn and live (v. 23 33¹¹). Therefore He takes measures even for the warning of the ungodly by the prophets, and the latter are held fully responsible if they neglect this duty (31^{7ff.} 33).

4. The rarity with which the above ideas are touched upon in Ezekiel is plainly owing to the circumstance that he feels himself in the first instance far more impelled to give strong expression to his holy indignation at the sins and the consequently enormous guilt of his people. Hence his Divine commission has for its very starting-point that he is sent to 'the apostate ones, the house of rebellion' (23.⁵ 5^{5ff.} and often). And indeed it is always the same complaint that occupies the foreground in all his arraignments of the people, namely, that of gross apostasy from Jahweh—idolatry.

In order rightly to appreciate this charge, two things must be kept in view. (a) First of all, by idolatry Ezekiel understands not merely the actual worship of strange, heathen gods,* such as he once beheld (8^{1ff.}) in a vision, when he saw carried on in the temple at Jerusalem the worship of the 'image of jealousy' (? an 'āshērāh) and of all kinds of creeping things, the lamenting for Tammuz, and the adoration of the sun. He includes in the term the whole of the Jahweh cult, in so far as it is combined with the use of images of Jahweh and sacrificial worship on the so-called 'high places.'

The Book of Deuteronomy makes no secret that the abolition of the high place worship is an innovation, which must be carried out with a certain measure of forbearance. For it really amounted to counting every spot outside Jerusalem profane—an intolerable idea to the ancient way of thinking. Consequently, Deuteronomy had conceded to the former priests of the high places at least the right of officiating in the temple, and at the same time commended them as far as possible

to kindness at the hands of the people. An absolute condemnation of the high place worship as a heinous sin was thus far from its intention, although it held that subsequent to the time of Solomon the confining of the cultus to the temple had become a universal obligation. Quite different is the judgment of Ezekiel. The occurrences of the year 597, by which he had suffered so much personally, and the days that followed, had revealed to him that the roots of the evil lay too deep to be removed by the reforms of Josiah. Not only from the time of Solomon, but from the very first the worship of Israel, even when it had Jahweh for its object, had been pure idolatry, masquerading first in Egyptian (23³⁻⁸)* and afterwards in Canaanite dress. The latter is what is referred to by the prophet at the commencement of his great arraignment of Jerusalem in ch. 16: 'Thy birth and thy nativity are of the land of the Canaanites; thy father was an Amorite, and thy mother a Hittite.' Ezekiel's intention here is not to teach anything new about the earliest history of Israel, but simply to characterize in the strongest fashion the heathenish form of its worship. This comes out not only in the two great indictments of chs. 16 and 23, but also elsewhere (cf. e.g. 44^{9ff.}). The heathen character of this worship is shown to consist not only in specifically heathen practices connected with the cultus, such as excess and immorality at the sacrificial meals, but in the utter lack of fine feeling for what is holy and worthy of the Deity. No wonder that Ezekiel regarded the transferring of *this* cultus to *one* sanctuary as only a half measure, which must now be energetically superseded by a whole one. For, even after the reforms of Josiah, the sanctuary had been further 'defiled'; in particular, images of Jahweh appear to have been afterwards reintroduced and to have played an important rôle (5¹¹ 6^{4ff.} 13 7²⁰).

(b) But, secondly, the charge of idolatry as adultery against Jahweh includes also courting the favour and aid of the heathen powers. This is clearly the case in 16^{26ff.}, probably also in 23³⁻⁸ 14^{ff.} 21; elsewhere it is sometimes doubtful whether actual apostasy to heathen gods, as the result of political intercourse, is not intended. To Ezekiel, indeed, *all* contact with the sphere of heathendom causes outward and inward defilement.

5. In the view of Ezekiel, both kingdoms (Samaria in 23⁴ under the name 'Ohēlāh='her [own] tent,' and Jerusalem under the name 'Ohēlībāh='my tent is in her') are naturally in the same condemnation. Yet Judah's guilt is greater in so far as she has not only failed to take warning from the fate of Sodom and of Samaria, but has acted even more corruptly than these her sisters. Therefore the ill-fortune of the latter is to be reversed, that they may serve for the profound humiliation of Judah; for the latter has shown by her conduct, that, in comparison with herself, even Sodom and Samaria still deserved consideration (16^{46ff.} 23¹¹).

6. The special charges made by Ezekiel (esp. 22^{6ff.}) against Jerusalem are concerned, above all, with the perverting of justice and the committing of deeds of violence, and remind us strongly of the ever recurring complaints of the earlier prophets. The only strange feature is the emphatic mention of incest (22^{10ff.}), which it is impossible to understand in a figurative sense. Moreover, all classes share in the general corruption: the king (Zedekiah), who is to pay heavily for his perjury and

* There is no evidence for the view of Robertson Smith and Smead, that in Ezk 8 it is ancient Israelitish family or tribal gods that are in view.

* The picture of gross unchastity which the prophet draws in such realistic fashion in chs. 16 and 23 can only be intended, in accordance with a familiar usage of language, to stand for idolatry (a view which is confirmed by 20⁸); and thus the suggestion is very natural that Ezekiel was led to the above judgment by referring Am 5²⁶ to the Egyptian period of the people's history.

breach of treaty (17^{24f.}); the princes, who are like wolves and worthless shepherds (22²⁷ 34^{1f.}); the priests, who are forgetful of their duties (22²⁶); the lying prophets (13^{1f.} 22²⁸) and prophetesses (13^{17a.}), who lull the people into false security.

All this guilt cries for vengeance. A feeling of pity for the perishing people is awakened, indeed, in the heart of Ezekiel by the view of the approaching terrible judgment, but the transgression is too great for pardon to be still possible (9⁸ 11¹³ and often). Even such examples of piety as Noah, Daniel, and Job could now effect nothing by their intercession; at most they would be able to save only themselves (14^{4ff.}). The judgments that now threaten are only the close of those that have long—always, indeed, in vain—been impending over Israel. Quite peculiar in this connexion is the prophet's doctrine that Jahveh has punished the Israelites for their apostasy by giving them commandments that were not good, as, for instance, the order for child-sacrifice. Only in this sense can the language of 20^{25ff.} be understood, even if the prophet in 16^{24f.} and 23³⁹ speaks of these sacrifices as offered to idols. But it is almost inconceivable that Ezekiel should have represented child-sacrifice as instituted by Jahveh Himself for the purpose of destroying Israel. Perhaps he speaks of the command of Ex 22²⁸ (29)^b as 'not good' simply because it gave occasion to the delusion that God demanded not only the dedication but the actual sacrifice of the first-born.

Ezekiel foresees with perfect clearness the approach of the Chaldeans (21^{27ff.}), the siege of the city, with all its horrors (4^{1f.} 16^{1f.}), as well as its burning to the ground (10⁹). By symbolical actions he portrays the fate of the besieged, the fresh decimation of those who had apparently escaped (5^{1f.}), and their departure to exile (12^{2ff.}). Sword, famine, and pestilence shall devour them without intermission; the land shall become a desolation and, along with its people, the subject of savage mockery by the heathen (5^{4ff.} 33^{27ff.}); the inhabitants themselves, carried into exile, shall have to eat unclean bread in the place of their captivity (4^{9ff.}).

7. But this casting off is not to be final. It would appear, indeed, from 21^{6ff.} as if the pious and the ungodly were alike to be overwhelmed by the judgment—a declaration to which Ezekiel evidently felt impelled for the time by the facts of the case; but at bottom the old Prophetic expectation abides, that a certain number, however few, shall escape sword and famine, wild beasts, and pestilence (14^{21ff.}). For Ezekiel beholds in spirit (9^{4ff.}) not only the fall of Jerusalem into the hands of the enemy, but also the mark put by the angel on the foreheads of those who are destined to escape. And, further, he sees in spirit (37^{1ff.}) the resurrection of the dead bones (i.e. the people sunk as it were into the grave in exile) by the breath of God, which awakens them to new life. Those who are brought back to the Holy Land shall henceforward, after the removal of all the former abominations, dwell there secure, and rejoice in rich blessings from Jahveh's hand (11²⁷⁻²⁸ 25^{1f.} 34^{13ff.} 36^{31f.} 33^{9f.} 39^{25ff.}). For He remembers His former promises, forgives Jerusalem all her sins, and concludes with her an ever enduring covenant (16^{60ff.} 37²⁶). He can no more hide His face from His people now that He has poured out His spirit upon them (39²⁹). And, as the result of this receiving of the spirit of God, it is promised that the old nature shall have its place taken by another spirit and a new heart,* that the stony

heart shall be changed into a soft heart of flesh (11¹⁹ 36^{26f.}).

8. In so far as its fulfilment necessitates an extraordinary interposition of God, the last mentioned promise may already be included in the category of Messianic prophecies (in the wider sense). Such prophecies, even in the narrower sense, are found in Ezekiel, although sparingly and with no special emphasis. Thus the tender sprout taken from the top of the tall cedar, and planted on a high and lofty mountain (the temple hill), where it grows to be a majestic cedar (17^{22ff.}), can stand only for the Messianic king of David's race, under whom Israel is to dwell secure. By his exaltation shall the heathen kingdoms ('all the trees of the field') learn to know the power of Jahveh. There is no mention here then of the exercise of world-empire by the Messianic king. So also in 21³² (27) it is said only that the State shall lie low until *he* comes to whom it [sc. the rule] belongs and to whom Jahveh gives it. A descendant of David is first expressly promised by Ezekiel in 34^{23f.}; but even there not as the champion and saviour of the people, but only as the faithful shepherd, who shall feed the flock after Jahveh Himself (v. 1^{ff.}, clearly dependent on Jer 23^{1ff.}) has intervened on behalf of His sheep and even zealously discharged the shepherd's office for them (v. 11^{ff.}). It is only after this that He is to set over them a single shepherd, namely His servant David. That this does not mean king David *redivivus*, but, as in the case of the 'righteous shoot' of David in Jer 23⁵, only one who rules in the spirit of David, is shown by the simple fact that he is not once called 'king'; on the contrary, it is said in v. 24 'I, Jahveh, will be their God, and my servant David shall be *prince* (נָשִׂיא) in the midst of them.' But, beyond this, nothing is predicated of him. It is Jahveh alone that concludes a covenant of peace with the people (v. 25^{ff.}), confers upon them security from wild beasts, as well as from oppression and mockery by their enemies, and imparts rich fertility to the land. The same prediction occurs in 37^{24ff.} in connexion with the symbolic action whereby two staves (Judah and Joseph) are to be joined together in the hand of Ezekiel. Even the long fallen Northern kingdom is to be reunited with Judah so as to form *one* kingdom under *one* king. But once more it is Jahveh Himself (v. 23) who delivers and purifies them, that they may become again His people. Now, it is true that in 37^{22ff.}, as compared with 34²³, there appears to be an advance in so far as 37^{24f.} declares not only 'and my servant David shall be *king* over them,' but (v. 25) 'my servant David shall rule over them *for ever*.' Can it be that the expectations of Ezekiel underwent such a transformation in the interval that he now looked for a king whose dominion should be unending? This is impossible, for it would completely contradict the rôle which the 'prince' (not the *king*) plays in the future programme of Ezk 40-48 (see below). But, even apart from that, in ch. 37 as in ch. 34 Jahveh appears so prominently as the real Ruler dwelling in His sanctuary in the midst of the people and exercising towards them the everlasting covenant of peace, that there is scarcely room left for the idea of the Messiah.

9. As elsewhere in the expectations of the prophets regarding the future, a pretty large space is occupied in Ezekiel with threatenings against foreign nations; nay, it would seem from 30^{2f.} as if the 'Day of the LORD,' which had been looked for from the time of Amos, was exclusively a day of judgment upon foreign peoples. The hostility of these peoples to Israel is also, it is true, specified as a ground of the Divine anger [thus we have the malicious joy and thirst for revenge of

* The call in 18³¹, in a somewhat different connexion, 'Make you a new heart, and a new spirit,' does not invalidate the truth that the bestowal of the new spirit can come from God only.

the Ammonites, 25³; the Moabites, v.⁸; the Edomites, v.¹², and again in ch. 35; the Philistines, 25¹⁵; the Tyrians, 26²¹; but the main point of view always is that all the splendour and proud display of the heathen is to be brought low, 'in order that they may know that I am Jahweh' (25⁷, 11, 17 etc.). Hence the longest and the severest threatenings are directed against the haughtiest and most powerful peoples: against Tyre (chs. 26-28), because she has declared herself to be the perfection of beauty (27³), and her king has claimed even to be a god (28²); against the Egyptians (chs. 29-32), because the Pharaoh has boasted, 'mine is the Nile, I have made it' (29³). God is going to punish this arrogance as He formerly punished that of the Assyrian warriors, whose graves (as those of the most heinous offenders) are 'set in the uttermost parts of the pit' (32²³, where by the way there is the first approximation to a distinction between inhabitants of the under world, and thus to the doctrine of the pains of hell).

10. A peculiarity of the eschatology of Ezekiel is his expectation of a hostile storm of great masses of people, led by Gog the prince of the land of Magog, against the resettled land of Israel, that is to say, *after* the dawn of the Messianic age (ch. 38 f.). Here too the essential point of view is that stated in 38¹⁶ 'that the nations may know me when I shall show myself holy before their eyes' (cf. also 39⁷). Neither here nor anywhere else in Ezekiel is there any hint that this knowledge is to lead further to these peoples attaching themselves to Jahweh and thus sharing in Israel's salvation. Gog is to fall upon the mountains of Israel; and so enormous shall be the number of his warriors, that for seven years on end their weapons shall serve for fuel, and seven years shall be required for the burying of their dead bodies.

When Ezekiel (38¹⁷) appeals to the predictions of former prophets concerning Gog, it is impossible to say what utterances of theirs (provided they have come down to us at all) he may have had in view. But, in any case, his allusion to them is a proof that the pre-exilic prophecies had already become to him the object of reflexion. And this implies at the same time the consciousness that the old form of prophecy, as the product of a direct operation of the spirit of God, was practically extinct, and had essentially to be replaced by literary activity.

11. To this last domain belongs, beyond doubt, the whole section made up of chs. 40-48, which, as was pointed out above, proved of epoch-making importance for the form afterwards assumed by the religion of Israel, containing as it does a sketch of the new form to be given to the sanctuary and the cultus after the return of the people from exile.* Not that even in chs. 1-39 there are no hints at all pointing to this final aim of the Divine judgments, for we find such, for instance, in 20^{40f.} and 37^{26, 28}. But in chs. 40-48 these interests—the reconstruction of the temple in all its details, the exact regulation of offerings and festivals, etc.—come so strongly into the foreground that everything else, i.e. all that does not belong to the cultus, looks like a mere appendage and scarcely worthy of mention.

(a) All the manifold and complicated regulations in chs. 40-48 have, strictly viewed, only *one* underlying idea—namely, the perfect representation and conservation of the holiness of God, in opposition to the endless detriment done to it in the pre-exilic period. This conservation, moreover, is to be effected by means of a great number of external institutions and ordinances. To be sure, these are at bottom only *symbolical* pictures of the Divine holiness and of the zeal directed

towards its maintenance, but strict attention to them is absolutely indispensable instead of being (as the sacrifices were in the estimation of the earlier prophets) merely an expression, that might be dispensed with at need, of a pious frame of mind. Ezekiel is in fact the founder of *legal religion*, the Levitical system. It is, above all, characteristic of this standpoint that any wrong done to the holiness of God is estimated exclusively as an objective fact, without regard to the intention and motive of the author of the wrong. Unwitting Levitical defilement and knowing sin involve exactly the same degree of guilt.

(b) At the head of all the regulations in question naturally stand those about *holy ground*. The idea that now the whole land is sacred to Jahweh, finds its symbolical expression in the high degree of holiness which attaches not only to the temple, the dwelling-place of Jahweh, but to the whole quarter surrounding the temple, on the summit of the hill (43²). For city and temple are henceforth to stand on a very lofty mountain (40²), in token that they surpass in importance every other spot on earth. Any pollution of the sanctuary, such as was formerly occasioned by the close proximity of the royal graves to the temple (43⁷), is now completely excluded. The holiness of the fore-court is constantly recalled by the keeping shut of the east door (44¹), by which Jahweh returned from the Mount of Olives to the sanctuary. But the whole of the sacred precincts, including the quarters of the priests and the Levites, is a *tērāmāh* of the land (45^{14f.}, 48^{8ff.}), a kind of oblation whereby all the rest of the land is likewise hallowed and made fit for use, as the fruits of the land are, through the rendering of the firstfruits to Jahweh. Directly adjoining the sacred precincts is the ground occupied by the city, and the land which appertains *ex officio* to the 'prince.' To the former of these a certain measure of holiness still belongs; in fact, according to 48³⁵ (the closing word of the whole section), the city is to be called *Jahweh-shāmmāh*, 'Jahweh is there.' It belongs to no one tribe exclusively, but members of all the tribes are to people it (48¹⁹).

(c) Suitably to its above significance, the city along with the sacred *tērāmāh* is the heart and almost the exact central point of the whole country; for to the north of it lie seven, and to the south five tribes, the latter—quite contrary to the former historical state of things—including even Issachar, Zebulun, and Gad. The district to the east of the Jordan had been probably for a long time too largely occupied by heathen for Ezekiel to count it as any longer belonging to the Holy Land. On the other hand, the strangers dwelling in the midst of Israel, who have begotten sons (i.e. who are permanently settled there), are to be on exactly the same footing as native-born Israelites, and are equally to receive a possession (47²²). The meaning of this at first sight strange prescription is simply that in the new State there can be only full-blooded members of the worshipping community, possessed of equal rights, but sharing also equal responsibilities.

(d) Finally, the idea that the land consecrated to Jahweh has His blessings showered upon it, finds very drastic expression in the prophecy of the temple spring (47^{1ff.}), which, taking its rise under the temple itself, is at first a tiny rill, but after a course of 4000 cubits has already become a mighty river, which causes the numerous trees on its banks to bear foliage that is ever green and fruits that never fail, which makes the waters of the Dead Sea wholesome and teeming with fish. The explanation offered for all this is that 'because the water proceeds from the sanctuary' it has a magical efficacy (47¹²).

(e) The degree to which even the most subtle

* Cf. Bertholet, *Der Verfassungsentwurf des Ezechiel in seiner religionsgeschichtlichen Bedeutung*, Freiburg i. B., 1896.

prescriptions regarding points in the cultus are of importance in the eyes of Ezekiel, is shown by his regulations concerning the sacrificial tables (40^{33a}), the priests' cells (42^{13a}), the sin-offering in connexion with the seven days' dedication of the altar (43^{18a}), the measures and weights to be used in the cultus (45^{9a}), the rules for festivals and sacrifices (45^{13a}; cf. also the complicated prescriptions as to the place and number of the sacrifices to be offered by the 'prince,' ch. 46). With reference to the festivals, it is noteworthy that, as is shown even by their exact dating, they have now lost their connexion with the course of nature [*sc.* as harvest festivals] and have become simply church festivals; for, apart from the prohibition of leaven at the time of the Passover, there is no mention of anything but the official offerings to be presented (45^{31a}). Very striking is the complete ignoring of the Feast of Weeks, which, on the ground of very ancient tradition, is retained even by P; and no less so is the fact that the two days of atonement, of which Ezekiel places one at the beginning of each half of the year (45^{18a}), do not represent days of humiliation on the part of the people, but contemplate an atonement for the sanctuary by means of external ceremonies 'on account of those who may have offended through error or ignorance.' The purifying of the temple building from Levitical defilement appears here as the main object to such a degree that the cleansing of the heart, which to the pre-exilic prophets was by far the most important matter, remains unmentioned.

(f) Much of what is ordained by Ezekiel may have been based upon ancient tradition, which was perhaps familiar to him in connexion with the exercise of his duties as *priest*. New, however, beyond doubt, and of great consequence is his distinction (40⁴⁶ and esp. 44^{6a}) between those priests of Levi who are also descendants of Zadok (*i.e.* who belong to the hereditary priesthood established at Jerusalem), and those other priests of Levi who have ministered to the people in the times of error (*i.e.* the former priests of the high places). The priesthood in future is to pertain to the Zadokites alone. The other class are 'to bear the consequences of their guilt' (44^{10a}), and are condemned to discharge all the menial offices of the cultus which were formerly attended to by uncircumcised ones (slaves and prisoners of war). Ezekiel in this way first paved the way for that distinction between priests and Levites which is so familiar to us in P and the Chronicler, that we can hardly conceive of the cultus of Israel without it from the time of Sinai downwards, although, as a matter of fact, it is still quite unknown even to the Book of Deuteronomy.

(g) When we turn to the special rules for the priests (44^{17a}), it is again noteworthy that at the head of their official duties (v. 23) is the instruction of the people in the distinction between holy and common, clean and unclean; it is only after this that there is mention of their judicial functions.

(h) By the side of the priests the *nāsi* or 'prince' plays, as was remarked above, a somewhat colourless part. A head was necessary, and nothing was more natural than to form a connexion here with the historical tradition of many centuries, namely, the expectation of a political head belonging to the family of David. Surprise has been felt quite unnecessarily that Ezekiel does not assign to the priestly State a spiritual head—nay, that he is altogether silent about the 'high priest.' But in the pre-exilic period there had been no high priests at all, but at most at Jerusalem *chief* priests. The latter, moreover, were simply exalted officials of the king, and it may very well be that Ezekiel had good reasons for not wishing to see priestly

officials of this kind reintroduced. It was quite outside the scope of his ideas that in the new Jerusalem the place of the national political head should be taken by a spiritual one—in fact, by a *high priest*. Ezekiel, then, retained a political head; but the latter is, strictly speaking, only the guarantor for the regular performance of the cultus. It is scarcely right to speak of a sovereign prince. If this *nāsi* has a tract of land assigned to him at the eastern and western ends of the *tērāmāh*, it is with the strangely distrustful remark added, 'that my princes may no more oppress my people, but give the land to the house of Israel according to their tribes' (45⁸ 46¹⁸). The prince, indeed, receives a further *tērāmāh* from the people, levied on wheat, barley, oil, and sheep (45^{13a}); but in return he is to provide all the offerings for the congregation at the festivals, the new moons, and the Sabbaths, as well as the daily morning burnt-offering and meal-offering (46^{13a}). The one prerogative he enjoys is that of entering the vestibule of the east door (which is usually closed), that from its threshold he may behold the preparing of his sacrifices by the priests, and may stand there and pray (44³ 46²). That Ezekiel does not think of this *nāsi* as the Messiah, is a fact that needs no proof.

(i) When we now ask, finally, What was Ezekiel's own view about the fulfilment of his programme for the future?, the answer must be to the following effect. A distinction must be drawn between expectations the fulfilment of which was in no man's power (such as the elevation of the temple hill, or the producing of the temple spring, or even the bringing back of the ten tribes), and expectations within the range of human effort. With these last Ezekiel was perfectly in earnest, and he was fully justified by the further course of events. In some instances, it is true, the force of ancient usage was stronger than the theory of the prophet, as, for example, in the case of the Feast of Weeks. Other prescriptions, such as the degrading of the former priests of the high places, evidently could be carried out only after severe conflicts and in a very much mitigated form. But, upon the whole, it remains true that we have now in P a rearrangement of the cultus approximating as nearly as possible to the prescriptions of Ezekiel. Particularly convincing is the evidence for this which is furnished by the parallels in P to the special rules for the priests contained in Ezk 44^{17a}. To all appearance, the priestly circles—and that, too, at different centres—had already begun during the Exile to reduce the ideas of Ezekiel to a cultus law. The fruit of these labours—varied, yet all inspired with the same spirit—was the great priestly book of history and law, the introduction of which gave to post-exilic Judaism the final stamp which it bears, not only in New Testament times but down to the present day.

But here once more the truth is manifested that historical development is not always in a straight line. Right in the midst of the labours devoted to the codification of a priestly law in the spirit of Ezekiel we come once more upon a powerful exhibition of genuine Jahweh prophetism in the form of the so-called Deutero-Isaiah, to which we must next turn our attention.

VI. THE SO-CALLED DEUTERO-ISAIAH.

1. It may now be regarded as finally established that with Is 40 an entirely new book commences, which nowhere makes any claim to be the work of Isaiah. The compass of this so-called Deutero-Isaiah is still, however, the subject of controversy. According to the view that at one time generally prevailed, it embraced chs. 40-66. But more and

more confirmation has been discovered for the proposition already propounded by Eichhorn and reaffirmed by Kuenen, that a portion of these chapters can have been composed only at Jerusalem after the return from the Exile.* At first it was thought sufficient to separate off chs. 63-66 as a later addition, but finally it has become almost the general fashion to distinguish between chs. 40-55 as Deutero-Isaiah, and chs. 56-66 as Trito-Isaiah. The present writer is among those to whom this view commends itself as the correct one. It may be remarked that Is 40-66 is a striking proof that questions of authenticity have little bearing upon the value of the religious and ethical contents—or, in short, upon the character as revelation—of an OT writing. The full meaning of the glorious book made up of Is 40-55 could be first appreciated and established only by those who taught men to understand it historically from the last years before the conquest of Babylon by Cyrus (538 B.C.) and the return of a portion of the exiles as authorized by him.

2. The book of the 'Great Unknown' would have had significance enough for his contemporaries even if it had been nothing more than a book of consolation for the exiles, assuring them of the end of the captivity, return to the Holy Land, and a renewed dispensation of Jahweh's grace. But it contains infinitely more than this. From an elevated prophetic viewpoint, which is scarcely reached again in the OT period, it brings the whole preceding history of Israel as well as its whole future under the scheme of an original, all-wise, saving purpose of Jahweh, which has for its object the whole world of nations. The barriers of national religion are here completely burst, and the foundation laid for a universal religion, and all this without the old Prophetic ideas of the election and pre-eminence of Israel being given up. How these two apparently heterogeneous notions could be united, will have to be shown afterwards. The whole, solitary glory of Deutero-Isaiah we shall best appreciate if we compare it with Ezekiel or the nearly contemporaneous passages Dt 4^{19f.} and 32⁸. In Ezekiel's future expectations there was no room for any share of the heathen in the salvation of Israel. In Dt 4^{19f.}, again, the view is stated without any circumlocution that Jahweh has destined the heathen to serve the star-gods (*i.e.* practically condemned them to idolatry), whereas He has chosen Israel to be His own possession. Quite the same notion is expressed in Dt 32⁸ 'Jahweh fixed the bounds of the peoples according to the number of the gods' (בְּכִנּוּן אֱלֹהִים, LXX ἀρχέλων θεοῦ, MT wrongly כִּנּוּן אֱלֹהִים, *i.e.* He assigned to each of the (subordinate) gods a particular people, whereas He declared Israel to be His own heritage).

3. We have just described Deutero-Isaiah's fundamental notion of a Divine purpose of salvation, which is at present becoming plain—a purpose which includes all nations, and which at the same time solves all the enigmas of Israel's history. It is primarily under this notion that we must subsume all the declarations from which our prophet's very lofty conception of God may be gathered.

* The following have specially contributed to the elucidation of the controversy regarding Deutero- and Trito-Isaiah: Duhm, in his Commentary on Isaiah in the *Kurzer Hdbch.*, Göttingen, 1892, 2nd ed. 1902 [holds that Trito-Isaiah commences with ch. 56]; Cheyne, *Introduction to the Book of Isaiah*, London, 1896 [places 56¹⁻⁸ 58. 59 under Artaxerxes II. or III.; 63⁷-64¹² about 350 B.C.; ch. 66 under Darius Ochus]; H. Gressmann, *Ueber die in Jes. cc. 56-66 vorausgesetzten zeitgeschichtlichen Verhältnisse*, Göttingen, 1899 [holds that chs. 56-66 are not a unity, but that they are all post-exilic and emanate from Judea]; E. Lüttmann, *Ueber die Abfassungszeit des Tritojesaja*, Freiburg i. B., 1899 [Trito-Isaiah is held to embrace 56-63⁸ (except 59⁵⁻⁸ and perhaps 56¹⁻⁸) as well as chs. 65 and 66 (except 66^{23f.}), and to emanate wholly from the period between 457 and 445, prior to the arrival of Nehemiah; on the other hand, 63^{7f.} and 64 date from between 638 and 520].

An absolutely harmonious plan of the Universe implies the solity of God. Absolute monotheism here reaches its clearest and sharpest expression (43^{10f.} 44⁶. 8 45^{5f.} 14. 18). The continuous fulfilment of the plan presupposes His eternity (41⁴ 44⁶), unchangeableness (41⁴ 43¹⁸), and always equally full power (40^{29f.}). God's omnipotence is proved, above all, by His creative work: He alone has stretched forth the heavens and formed the earth (40¹². 22^{f.} 23 42⁵ 44²⁴ 45¹². 18) in the fulness of His omnipotence and the strength of His might (40²⁶); it needed but His call, and these things were there (43¹⁸). He is the maker of all families of men from the beginning (41⁴), and controls by His sovereign omnipotence the fortunes even of the greatest (40^{23f.})—nay, the nations are before Him only as a drop on [the side of] the bucket or a speck of dust on the balance (40^{15f.}). How shall the individual ever contend with Him, the potsherd with the potter (45⁹)? As in the first Isaiah, so here God is frequently called 'the Holy One of Israel,' and that, in like manner, in the sense of His absolute elevation above everything creaturely and perishable, and hence, of course, above all stain and dishonour (41¹⁴. 16 43³. 14 etc.). The same attribute excludes absolutely any representation of God by images (40^{18f.}), and, in general, our prophet cannot sufficiently emphasize the folly and senselessness of idol and image worship (cf. 41²⁹, and very specially the almost humorous description in 44^{9f.} 46^{6f.}). The holiness of God requires also that all His actings should have for their deepest motive the honour of His name (48⁹. 11). He will not give His honour to another, nor His glory to idols (42⁸), as if they had accomplished what was His work alone.

4. The scanty references to the means whereby God accomplishes His world-plan and saving purpose, make mention, above all, of the prophetic word. This has irresistible power (53^{10f.}) and eternal validity (40⁸). In the exact pre-announcement of the wonderful events that are passing (the mission of Cyrus and the impending deliverance of Israel), our prophet sees one of the strongest evidences of the solity and omnipotence of the God of Israel (41^{25f.} 42⁹ 43^{10f.} 44^{7f.} 26^{f.} 45²¹ 46^{10f.} 48^{2f.} 14^{f.}); the idols, which are things of nought, can neither explain the past nor predict the future (41^{21f.}).

5. Deutero-Isaiah, like the pre-exilic prophets and the Book of Deuteronomy, traces the preferential treatment of Israel to its election (41^{8f.}); but this last is ascribed not simply to God's love for Israel, as might appear from 43^{2f.}, but to the special purposes which Jahweh wills to accomplish for the benefit of the whole world, by the instrumentality of Israel, His servant (see below). On this account He has carried them all along from their mother's womb (46³); and, when by their sins they provoked His just anger, He gave them, indeed, into the hands of their enemies (42^{23f.} 50¹ 51¹⁷); but it was not His intention that Babylon, the instrument of executing His vengeance, should show herself pitiless against Judah (47⁶). All the more on that account God regards the old guilt of the people as atoned for—nay, as doubly expiated (40² 51¹⁹). All the same, the coming deliverance is nothing but the outcome of the free favour of God; it has been brought about neither by sacrifice nor any other merit on the part of Israel, which, on the contrary, has sinned from the time of its first father (Jacob) and deserved destruction in consequence (43^{22f.} 48¹. 4. 8). But Jahweh blots out their transgressions as a cloud (44²²).

In view of all this, there is the less justification for Zion's discouragement, and her complaint that she is forsaken and forgotten by God (40²⁷ 49¹⁴). As little as a mother is forgetful of her sucking child has God forgotten the community of Israel (49¹⁵). Nay, He is at once her creator and her

husband, who can never cast off the wife of his youth (54^{27f.}).

6. The instrument employed by Jahweh for the deliverance of His people and the further accomplishment of His saving purpose, is *Cyrus*, of whom and of whose Divine mission the prophet speaks in such honourable terms that it has been suggested that he actually saw in him the Messiah promised by the earlier prophets. Jahweh Himself speaks of Cyrus as His 'shepherd' (44²⁸), nay as His 'anointed,' whom He has taken by the right hand that He may cast down peoples before him, whom for Israel's sake He has called by name (45^{15f.}), for whom He will make all his ways plain (45^{18f.}), as the man of His counsel (46¹¹), whom He loves (48¹⁴).

If the victorious career of Cyrus is to be *thus* interpreted, Israel has no more occasion for anxious fears, but may with full complacency look for the manifestation of the glory of Jahweh (40⁵ 41^{10f.}). God ensures to the exiles a secure return; He gathers them from all quarters (43^{35f.}), and outdoes even His own former mighty acts when He brought His people forth from Egypt (43^{16f.}). He fashions for them in the desert a road well constructed and free from danger (40³ 42¹⁶ 43² 49^{10f.}), makes abundant provision of water and noble trees (41^{18f.} 43^{18f.} 48²¹), and Himself leads them like a loving shepherd (40¹¹ 52²). All nature accompanies these redemptive acts with a song of jubilation (42^{10f.} 44²³ 49¹³ 55¹²). The returned exiles shall be as a bridal ornament to Zion, the seemingly forsaken and sorely troubled, who shall now be astonished at the multitude of her children, and scarcely find room for them all (49^{18f.} 54^{18f.}). For along with Jacob (Judah) shall return also 'those who have been preserved of Israel' (49^{6f.}). Jahweh, moreover, shall once more reign as king over Zion (52^{7f.}), and all His gracious promises to David, the witness of His glory and the ruler of nations, shall be fulfilled to the whole people, who also shall draw to them foreign peoples—nay, peoples as yet unknown to them (53^{3f.}). All these other nations are brought to recognize that Jahweh has called Cyrus, and crowned him with victory, and to give the glory to the God of Israel (41^{15f.}). As for Israel itself, the outpouring of the spirit of God, which seals the truth that every individual is His special property (44^{28f.}), and makes them all true disciples of Jahweh (54¹³), brings about a wondrous renewing of the nation's youth (40^{29f.}). Moreover, the duration of this renewed 'covenant' is to be unlimited; the brief period of God's anger is to be followed by a time of eternal favour and blessing (45¹⁷ 54^{7f.}).

In the above orderly summary of the ideas of Deutero-Isaiah, which appear in the book itself, for the most part, in a scattered detached fashion, we have purposely passed over two statements, because they can in no way be brought into harmony with the other expectations of the prophet, and must accordingly be regarded as later additions—

(a) According to 41^{15f.}, Israel is to become a new, sharp, many-toothed threshing-wagon, which goes so thoroughly to work that it crushes the very mountains and hills. This figure, of course, refers to the destruction of Israel's foes. Now, it is true that our prophet has a threat against Babylon (47^{15f.}); she, the oppressor of Israel, has now in turn to take the 'intoxicating cup' which Jerusalem had formerly to drink (51^{22f.}). But there is no indication of anything except that Cyrus is to execute the judgment on Babylon, while the other peoples are called to share in Israel's salvation. Thus 41^{15f.} belongs to quite a different sphere of ideas—that, namely, of *Ezk* 38f. and *Mic* 41ff.

(b) In 49^{22f.}, instead of the return of the exiles through the wilderness under the leadership of Jahweh, we have a bringing of them back by the Gentiles acting under Jahweh's orders. It may be said that these two representations are not mutually exclusive. But in the statement that kings shall be the guardians of Israel and queens her nurses, nay, that they shall in humble obeisance lick the dust of her feet (49²³), we have the expression of expectations that belong, not to Deutero-Isaiah but to a considerably later phase of Judaism.

7. But all this does not exhaust the ideas contained in this unique book. The most wonderful

thing in it is the idea of Israel as the 'Servant of Jahweh,' who, in accordance with His eternal purpose, which transcends all human comprehension, is destined to expiate, by his penal sufferings, not only Israel's own guilt, but also that of the heathen world, and then to exercise a great missionary vocation on the world of nations, that 'all ends of the earth may see the salvation of the God of Israel' (52¹⁰).

Ever since Biblical study began, it has been felt to be a very difficult problem how the statements in which the Servant of Jahweh (עֶבֶד יְהוָה) is undoubtedly to be understood of the *people* of Israel (41^{18f.} 42¹⁹ 43¹⁰ 44^{1f.} 21 45¹ 48²⁰, cf. also the 'servants of Jahweh' in 54¹⁷) are to be reconciled with those which, to all appearance, have an individual in view (thus in the so-called *Ebed Jahweh Songs*: 42¹⁻⁴ [according to others, 42¹⁻⁷], 49¹⁻⁶, 50¹⁻⁹ [with v.¹⁰], and 52¹³⁻⁵³¹²). Countless are the attempts which have been made to solve the problem in question.

After Duhm, in his *Commentary on Isaiah* (Göttingen, 1892), assigned the 'Ebed-Jahweh-Lieder' to a different and later hand than that of Deutero-Isaiah, and hence pronounced them a subsequent addition to the latter, explaining them, at the same time, in the individual sense (as perhaps referring to Jeremiah), there sprang up a crop of similar hypotheses. The individual interpretation of the 'Ebed-Jahweh-Lieder' is supported also by J. Ley (*Historische Erklärung des 2. Teils des Jesaja*, Marburg, 1893; art. 'Die Bedeutung des Ebed-Jahweh,' etc., in *SK*, 1899, p. 163 ff.) and L. Laue (*Die Ebed-Jahweh-Lieder im 2. Teil des Jesaja*, Wittenberg, 1898; also in *SK*, 1904, Heft 3). Both see in the Servant of Jahweh 'the Messiah of the future,' as does also G. Füllkrug (*Der Gottesknecht des Deuterisjesaja*, Göttingen, 1899), only that he believes the *Lieder* to have been composed by Deutero-Isaiah himself. E. Sellin (*Serubbabel*, Leipzig, 1898) identified the Servant with Zerubbabel, who, he contended, actually assumed the crown, and in consequence suffered a terrible martyrdom at the hands of the Persians. In his *Studien zur Entstehungsgeschichte der jüdischen Gemeinde*, i. (Leipzig, 1901), Sellin substitutes for Zerubbabel some other descendant of David. Kittel (*Zur Theologie des AT*, ii., Leipzig, 1898) finds at least in ch. 53 the crucified Zerubbabel. Bertholet (*Zu Jesaja 53*, Freiburg i. B., 1899) refers 53¹⁻¹¹ to the sufferings and death of the ninety year old scribe Eleazar (cf. 2 Mac 6^{18f.}). The composition of 52¹³⁻⁵³¹² by a different poet from the rest of the 'Ebed-Jahweh-Lieder' (whose authorship by Deutero-Isaiah is likewise denied) is maintained also by Laue (see above) and Schian (*Die Ebed-Jahweh-Lieder in Jes. 40-66*, Halle, 1895). It was the merit of K. Budde (art. 'The so-called Ebed Yahweh Songs and the Meaning of the term Servant of Jahweh in Is 40-55' in *Amer. Journal of Theology*, 1899, iii. p. 499 ff. [in German, *Die sogenannten Ebed-Jahweh-Lieder und die Bedeutung des Knechtes Jahwehs in Jes. 40-55*, Giessen, 1900]) and K. Marti (*Das Buch Jesaja*, Tübingen, 1900) to recall the exegesis of these passages from the forest of hypotheses to a more sober consideration of facts. Their argument was strengthened on all sides by the very thorough discussion of F. Giesebrecht (*Der Knecht Jahwehs des Deuterisjesaja*, Königsberg, 1902), and it may be considered as henceforward a position that is not likely to be shattered, that even the so-called 'Ebed-Jahweh Songs' are the work of Deutero-Isaiah, and that their subject is Israel, with its call to serve a missionary function to the Gentiles.

On the present occasion we must be content to say that, in the violent controversy which has raged since the year 1892, the explanation of the Servant of Jahweh as referring to the people appears to us to have retained the victory. Once the fondness of Hebrew poetry and prophecy for far-reaching personifications of collective notions, and especially of bodies of people, is grasped, and 53^{15f.} rightly understood as spoken by the Gentiles, all the declarations about the Servant combine into one perfectly intelligible whole. The question seems to us quite an idle one, whether Deutero-Isaiah meant the Servant of Jahweh to be understood of the whole nation or only of the truly godly kernel of it, the 'spiritual Israel,' which fully answered the idea of a people of God. When the prophet has to speak of the election of Israel and its destined mission in the world's history, his words naturally refer to the whole body of the nation, for it was this that was the object of election and of manifold guidance in the course of its history. But it is equally natural that, in the passages which have in view the representative suffering of the Servant

and his missionary function, not those should be thought of who perish in the purifying judgment, but only the truly pious kernel of the people, who seek God and have penitent hearts. Nay, it is not an impossible position that the Servant, as a portion of the people, namely, that which is specially penitent and afflicted, should be opposed to the general body (49³ 'Jahweh that formed me from the womb to be his servant, to bring Jacob again to him, and that Israel should be gathered unto him,' cf. also v.⁶). But much more frequently and emphatically than this work on his fellow-countrymen is the missionary vocation exercised by the Servant towards the heathen world set forth. This is the central point of our prophet's whole world of ideas. It is only from this standpoint that the problem either of Israel's election or of her temporary rejection can be brought into harmony with the Divine plan of the world. The grievous sufferings of Israel were the indispensable condition of the salvation of the whole world.

That even the Gentiles are from the first destined to entrance into the kingdom of God, is shown by the Divine call (45^{22f.}) to all the ends of the earth to turn to Him and let themselves be saved, as well as by God's oath that at last every knee shall bow to Him and every tongue swear by Him. But the instrument in proclaiming His salvation is His Servant, whom He has called from the mother's womb (i.e. from the beginning), that He may be glorified in him (49¹⁻³). God has put His spirit upon him (42¹), given him persuasive eloquence (49²), the tongue of a proper disciple of Jahweh (50⁴), that he may proclaim the true religion to the heathen (42¹), and thus become a light to the heathen (42⁶ 49⁶), the founder of a covenant (ברית) between God and men (42⁶ 49⁸). And Israel is to await this call with all meekness and lowly submission (42^{22f.}). True, there is not wanting a certain measure of preparedness of the heathen for the Servant's gospel of salvation. Already the isles wait for his instruction (42⁴)—nay, the nations must themselves recognize that Jahweh alone could have accomplished the mighty transformation wrought through Cyrus (41^{12f.}). But the decisive influence is brought to bear, finally, by the great sufferings of the Servant, and the patience with which he has submitted to every species of ill-treatment and mockery (50⁶). To their own extreme astonishment, the perception dawns upon many peoples and kings that the Servant of Jahweh—marred almost beyond recognition as a man, utterly despised, and maltreated to the uttermost—has, through his voluntary, patient sufferings, borne the punishment of others as a guilt-offering, atoned for their sins, and procured salvation for them (52^{13f.}).

This idea of a vicarious penal suffering of Israel for the Gentile world, in order to bring salvation to the latter, is so extraordinary and unique that one can easily understand how it has called forth all kinds of explanations, and that ever and anon voices are still raised in support of the contention that the direct reference of this passage to the vicarious suffering of Christ (cf. I P 2^{22f.}) is the only one that meets the necessities of the case. And, as a matter of fact, the Church is entitled to see the complete fulfilment of this very remarkable prophecy only in the person of Christ. But nothing is taken from its significance in that direction through our interpreting the Servant of Jahweh, so far as the mind of the prophet was concerned, primarily of Israel. Only, we must be careful not to limit his meaning to the idea that the Gentiles, touched by the spectacle of the patience of Israel amidst all its sufferings, are moved to a ready acceptance of its message of salvation, and thus brought to adopt its religion ;

for the prophet expressly emphasizes the fact that the Servant of Jahweh has fulfilled his high calling by bearing the sins of many and *making intercession for the transgressors*. He speaks thus of a high-priestly intercession performed by Israel, in conjunction with its vicarious sufferings. In this way he gives his readers a view into the depths of the Divine counsel of salvation, such as is offered by scarcely any one of his fellow-prophets—a view of the truth that the seeming disturbance of God's saving purpose by man's sin, and the sufferings introduced in consequence, are really made to serve the end of realizing His saving purposes. But from the beginning all other purposes have been subordinated to *this* one: 'The heavens shall vanish away like smoke, and the earth shall fade like a garment . . . but my salvation shall be for ever' (51⁶). Behind and above the temporary, perishing world there is another, which offers higher, eternal blessings. That the entrance to it should be open even to all the heathen, was a notion still beyond the horizon of any Israelitish mind of the time. But the prophet understood the word of his God: 'My thoughts are not your thoughts, neither are your ways my ways; but, as the heavens are higher than the earth, so are my ways higher than your ways, and my thoughts than your thoughts' (55^{8f.}).

VII. REMAINING EXILIC PROPHECIES, POST-EXILIC PROPHECY, AND THE BEGINNINGS OF APOCALYPTIC.

i. *THE SOURCES*.—To the time of the Exile may, further, be assigned with some confidence Is 21¹⁻¹⁰ and 13¹⁻¹⁴²³, and perhaps also chs. 34 and 35, which are closely akin to Deutero-Isaiah. On the other hand, it is difficult to decide whether a portion of the later additions (noted below) to pre-exilic Prophets are as early as the Exile. At all events, this view is not sufficiently proved by the (very frequent) allusions to the gathering and bringing back of the exiles. For, apart from the fact that such expectations are more than once put into the mouth of the earlier prophets from the standpoint of fulfilment, and indeed for the purpose of softening their denunciations, the number of Jews living in all quarters of the Diaspora even after 537 and 458 was still very great, and the expectation of their return might hence become very readily an indispensable element in the hopes of the future.

To the earliest post-exilic period belong: Haggai (520), Zechariah (520-518), and the Book of Malachi (probably before 458), as well as Ob 10-21 and the so-called Trito-Isaiah (Is 56-66, probably about 440). To the beginning of the 4th cent. we assign Joel and Jonah; towards the end of the 4th, if not in the 3rd or even the 2nd cent., we would place the so-called Apocalypse of Isaiah (Is 24-27) and Zec 9-14. Of the additions to the older prophets which cannot be more precisely dated, a not inconsiderable portion may come down to the 4th and even the 3rd cent. B.C. Passing over some isolated verses, we give the following as almost universally acknowledged later additions:—

Is 22-4 (Mic 4¹⁻⁴) 42-6 89^{f.} 10²⁰⁻²³ 11¹⁰⁻¹² 13¹⁻¹⁴²³ (see above) 18⁷ (?) 19¹⁸⁻²⁵ 21¹⁻¹⁰ (see above) 23¹⁵⁻¹⁸ 25⁵ 7^{f.} 17-24 30¹⁸⁻²⁶ 27-33 (?) 31⁵⁻⁸ 32. 33. 34^{f.} (see above).

Jer 31¹⁴⁻¹⁸ 10¹⁻¹⁶ 16¹⁸⁻²¹ 17¹⁹⁻²⁷ 29¹⁶⁻²⁰ 30^{10f.} 31¹⁰⁻¹⁴ (?) 31³⁸⁻⁴⁰ 32¹⁷⁻²³ 33¹⁴⁻²⁶ chs. 46-49 (?) 50¹⁻⁵¹⁵⁸.

Hos 21-3 3³ (?; in any case, the words 'and David their king') 14²⁻¹⁰ (?).

Am 9⁸⁻¹⁵.

Mic 4¹⁻⁴. 6-8. (?) 11-13 77-20.

Hab 3.

Zeph 24-15 314-20.

ii. *HISTORICAL BACKGROUND.*—Deutero-Isaiah's prophecy of the freeing of the people by Cyrus had been fulfilled in 538 after the conquest of Babylon. The edict of Cyrus granted permission to the exiles to return, and about 50,000, under the leadership of Zerubbabel and Joshua the priest, availed themselves of it. But the condition of things in the home so eagerly longed for did not answer the high-flown expectations of the returned exiles. The foreign domination still continued, and all energy was paralyzed by poverty and failure of crops, as well as by the hostility of the Jewish-heathen mixed population, which had gradually spread over the land during the Exile. Even if the cultus was resumed, immediately after the Return, by the re-erection of the altar of burnt-offering (Ezr 3^{26f.}), it was not till the year 520 that, thanks to the energetic stimulation of Haggai and Zechariah, the work of building the temple was taken in hand in earnest, and finished in 516. Evidently, these prophets expected the dawn of the Messianic age after the building was finished, and at the same time saw in Zerubbabel the 'shoot of David' promised by Jeremiah (Hag 2^{6. 20ff.}, Zec 3^{8. 6^{11f.}}, where in all probability there was originally mention only of a crowning of Zerubbabel). These hopes, too, were completely deceived. We possess, indeed, only very scanty traditions regarding the history of the post-exilic Jewish colony down to the time of Malachi (Ezr 4⁶⁻²³), but the Book of Malachi itself shows that the conditions had rather changed for the worse since 516. The offerings naturally suffered from the continued poverty of the people (3^{8ff.}), but no less from the unscrupulous character of the priests (1^{6f.} 3^{3f.}). The prophet also complains bitterly of the facile putting away of Jewish wives in order to contract new marriages with heathen women (2^{10ff.}). But the worst feature was the resigned, not to say despairing, disposition which had taken possession of the people. This showed itself in such blasphemous judgments as that 'Every one that doeth evil is well pleasing to Jahweh, and in such he hath his delight, or where is the God of judgment?' (2¹⁷, and still more fully in 3^{14f.}). One can readily conceive how to the priestly circles in the Diaspora, which had been for long following in the footsteps of Ezekiel in laying down new regulations for the cultus (see below, § VIII.), it might seem that the time had come for them to step in. But even Ezra, the leader of a second band of exiles (B.C. 458), soon had the conviction forced upon him that it was necessary first to attend to other tasks than the introducing of the priestly legislation he had brought with him from Babylon. His Draconic zeal in dissolving the numerous mixed marriages so increased the hostility of the heathen and Jewish families thereby affected, that they obtained from Artaxerxes I. full powers to destroy the walls and gates of Jerusalem, which had been scarcely yet completed by Ezra. How thoroughly this process was carried out does not indeed appear from the timid allusion in Ezr 4²³, but is clear enough from the documentary report of Nehemiah (1^{3f.} 2^{12ff.} 3^{1ff.}). The arrival of the latter at Jerusalem (445) had for its main result the solemn introduction of the priestly law-book (Neh 8, probably extracted in large part from the Memoirs of Ezra). Of the high significance of this act we shall have to speak in the next section. That all these occurrences, moreover, found an echo in prophecy is *a priori* probable, and is confirmed especially by the contents of Trito-Isaiah. In this way the enigma in which Is 66 was formerly involved is very simply cleared up, when it is recognized that there we have to do with a polemic against the Samaritans, belonging to the time of Ezra-Nehemiah. From the second visit of Nehe-

miah to Jerusalem (Neh 13^{4ff.}) in 432 [according to others, not till 412] OT tradition is silent till we reach the commencement of the Maccabee wars, even if a considerable portion of the above-mentioned Prophetic literature may emanate from the intervening period.

iii. *CONCEPTION OF GOD, AND ETHICS.*—The whole of the exilic and post-exilic literature with which we have here to do, bears almost without exception a secondary character, and—apart from the further colouring given to the hopes for the future—lives entirely upon the ideas of the older prophets, or simply takes these for granted. This comes out clearly in regard to the *conception of God*. The reason why the statements in this sphere are so scanty is that there was nothing to add to the message of the pre-exilic prophets. Belief in the solity and supramundane character of Jahweh is the common possession of the whole of this period. The apparent localizing of Him on Sinai (Hab 3³) can be regarded only as a poetical reminiscence of ancient descriptions, such as that of Jg 5⁴. His omnipotence and omniscience are revealed in the creation of heaven and earth (Jer 10^{12ff.}); to Him nothing is impossible (32¹⁷). The mighty Babylon is simply a hammer in His hand (51^{20ff.}). He chose Israel because He loved it, whereas He hated Israel's twin brother Esau (Mal 1^{2f.}); here there seems to be no attempt to trace the election to an ethical motive, as in Deutero-Isaiah. Jahweh shows Himself to be the father and saviour of Israel in a far deeper sense than Abraham or Jacob could claim to be (Is 63^{16. 64⁷}). But the old conception of the national God, Jahweh, who has His eye upon Israel alone, has no longer any room left for it. Jahweh is great beyond the realm of Israel, His name is feared among the nations as that of a great king (Mal 1^{5. 14}, Jer 10⁷); nay, the incense-offerings and pure gifts, which from the rising to the setting of the sun are offered by the Gentiles, have Him, strictly speaking, for their object (Mal 1¹⁴)—a remarkable witness to the far-reaching influence of Deutero-Isaiah's teaching! There is no longer any need for a polemic against the folly of image and idol worship; Is 57^{30f.} is in all probability addressed to the half-heathen mixed population in and about Judah, and Jer 10^{10f.} to the exiles who are endangered by their heathen environment.

The supramundane character of Jahweh is not impaired by the frequent emphasis laid upon His accompanying the exiles, or His dwelling upon Zion (see below); for in the latter instance what is in view is, as in the conception of God in the pre-exilic period, the indwelling of His 'glory' (*i.e.* a manifestation-form of His person), which is not absolutely identical with His full being. The 'angel of Jahweh,' in olden times (see above, p. 633^{ff.}) a form of appearance of Jahweh Himself, is in Zec 1^{12ff.} (where he prays to Jahweh and is comforted by Him) clearly distinguished as a serving angel from Jahweh. In Zec 3¹ 'the Satan' makes his appearance for the first time, not as a mere appellative='adversary' (as in Nu 22^{22. 32} [of the angel of Jahweh], 1 K 11^{14. 23} *et al.* [of enemies in war]), but as a definite angelic being, who comes forward as the accuser of Joshua the high priest; but this is no proof of the rise of a dualistic conception of God. The Satan, who by the way cannot have been newly introduced by Zechariah, but is presupposed by him as long familiar to his readers, manifestly belongs (as he still does in Job 1^{6f.}) to the category of serving angels, only that, in his zeal as Jahweh's prosecutor, he goes too far. Rather may we find in Is 24^{21f.} an allusion to angelic feuds corresponding to those among the peoples of earth. But even in this very late *theologoumenon*, with which we shall meet again when

we come to speak of the Book of Daniel, the supremacy of Jahweh, who imprisons the rebellious ones, and only pardons them after a long interval, remains quite unaffected.

The consciousness that they lived in an age of *epigoni*, as compared with the creative times of prophecy, betrays itself clearly in the repressed tone of the post-exilic prophets, and their very frequent use of the formula 'thus saith Jahweh,' as well as in Zechariah's preference for the vision, the latter being no doubt in large measure simply to be regarded as a literary device. The same consciousness is manifested in the express appeals to earlier Prophetic oracles (Is 34¹⁶, Jl 3³ [232]), and no less by the announcement of a messenger who is to prepare the way of Jahweh prior to the dawn of the day of judgment (Mal 3¹; in v. 23 [45] the prophet Elijah is named as this forerunner). There were even yet required energetic instruments of God to bring about the great transformation. Finally, again, in Zec 13², the expectation is expressed that in the Messianic age the prophets and the unclean spirit shall be removed from the land, and that any one who yet ventures to come forward as a prophet shall be put to death by his own parents. Here, of course, it is false prophets that are in view, but the whole form of expression shows that it is not considered possible that any others shall then be found.

Like the conception of God, the *ethical demands* of the exilic and post-exilic prophets correspond exactly with those of their pre-exilic predecessors. At least in theory the justice of these demands is generally acknowledged, although the practice of the people still continues to supply occasion for bitter complaints (Is 56⁹, 58¹, 59²). As with Amos and Isaiah, the urgent call is to do right and justice and show pity to the poor, the widow, the orphan, and every class of afflicted ones (Zec 7¹⁰, 8¹⁶, Is 56¹ 58⁶, Mal 3⁵). [This last passage denouncing, however, also sorcerers, adulterers, and perjurers]. Moreover, it cannot be contested that even in the early post-exilic period a mechanical theory of retribution shows itself—the notion of a direct succession of sin and punishment, right conduct and outward blessing (Zec 8¹²). Thus the scanty harvest is, according to Hag 1⁵, 10¹, the direct penalty for the people's remissness in the work of rebuilding the temple; according to 2¹⁴, all offerings presented before the temple is finished count as unclean, and consequently inefficacious, but after that event all the richer an era of blessing shall set in.

iv. *THE CULTUS*.—The few utterances about the cultus—we here leave out of account those that belong to the realm of eschatology—show again a certain falling away from the height of the true prophetic point of view (cf. above, p. 685). The law-book of Hilkiah, although marked by the prophetic spirit, had at the same time laid down such definite rules for the cultus that it was inevitable that a tendency should arise to attach value to the merely external performance of these. In addition to this, Ezekiel's conceptions, with his total rejection of the past and his sketch of a radically new constitution of the cultus, must have permeated all Jewish circles to such an extent that long before the introduction of the Priests' Code there had been produced a positively painful attention to matters connected with the cultus. It is true that even yet evidences are not lacking of a truly prophetic appreciation of ritual services. The description of the proper kind of fasting contained in Is 58³, might well have come from Isaiah ben-Amoz himself, while Joel's (2¹³) call, 'Render your heart and not your garments,' recalls Jeremiah's demand for a circumcision of the heart. Similarly, the ideal of the

duties and the significance of the priesthood set up in Mal 2⁵, must be pronounced a thoroughly worthy one. On the other hand, the way in which Haggai and Zechariah make all blessing for Judah depend essentially upon the rebuilding of the temple (Hag 1⁴, Zec 8⁹), the emphasis laid upon outward observance of the Sabbath (Jer 17¹⁹), [cf. especially the motive urged in v. 25], Is 56², 58¹³), the extraordinary value attached to the regular food- and drink-offerings in the temple (Jl 1⁵, 13, 16 2¹⁴),—all this is hardly in accordance with the view of the cultus held by an Isaiah or a Jeremiah.

v. *ESCHATOLOGY*.—1. The edict of Cyrus had indeed brought freedom to a portion of the people, but had by no means introduced the great transformation of things contemplated by Deutero-Isaiah. On the contrary, the returned exiles had to struggle hard for their existence, and their lot could scarcely appear an enviable one to those who had remained behind in the land of their captivity. No wonder that men's minds turned with all the more longing to the future as that which should finally bring all their hopes to pass. With attention ever more tense they listened for the signs which were to herald a movement among the nations and the birth-pangs of the Messianic age. Zechariah, indeed, in the first of his night-visions learns (1⁶) from the heavenly horsemen, who have reconnoitred the earth, that the whole world is still at rest and quiet. But, when the angel reminds Jahweh that the seventy years of anger have elapsed, comforting words, with the promise of happiness, are spoken to him. Haggai announces as a message from Jahweh that within a short time He will make the earth tremble and throw all peoples into commotion (2⁶, 2¹¹). But even Trito-Isaiah has yet to complain (Is 59⁹) that Israel has always hitherto waited in vain for light, and he begs the heavenly 'watchers,' whom Jahweh has placed over the walls of Jerusalem, to give themselves and Jahweh no rest until He has established and glorified Jerusalem (62⁶).

2. The great transformation is brought about, according to the ancient expectation (see above, p. 691), by the 'Day of the LORD,' the day of judgment alike upon the sinners in Judah and upon the nations hostile to Israel. Properly speaking, it is only Malachi (3²) that mentions the judgment upon Judah, when the angel of the covenant, like a refiner's fire and like fuller's lye, tries and purifies the Levites and the people; the 'great and dreadful day' (whose coming is preceded by the advent of Elijah to reconcile the fathers and the children, and so to avert the curse from the land, 4⁵, [Heb 3²³]) devours in its fury all the proud and all the workers of wickedness (4¹ [3⁹]), whereas upon those that fear God the sun of righteousness shall arise, and they shall come forth unharmed and tread down the wicked (4², [3²⁰]). In Joel it looks at first as if in the devastating of the land by the locusts the precursors of the Day of Jahweh have appeared, 'a day of darkness and gloom, a day of clouds and thick darkness' for Judah (1⁵ 2¹); but in 3¹, [2²⁸] the outpouring of the spirit on Judah precedes the advent of the 'great and terrible day.' That is to say, the judgment of that day overtakes only the heathen. The latter ('all nations') are again the only subject of judgment in the Valley of Jehoshaphat (3[4]¹⁴), where Jahweh calls them to account 'for his people and his heritage Israel.' So in Is 13⁵, although the avenging host is sent out by Jahweh to make the earth a desolation and to destroy the sinners upon it (v. 9), the Day of the LORD affects mainly Babylon. [In 34⁸, it is a day of vengeance, a year of retribution for Zion against Edom; also in Ob 15⁴, all peoples, but especially Edom, are visited with vengeance on the Day of Jahweh. On the

other hand, in Zeph 2⁴⁻¹⁵ (a later addition to the threatening against Judah in vv. 1-3) the Day of Jahweh overtakes five different nations]. Finally, in Zec 14^{1ff.} the situation of Ezk 38 f. is implied, only that the onslaught of the heathen at first results in the capture and plunder of the city and the carrying captive of a portion of its inhabitants. But then Jahweh with all His holy ones [angels] fights from the Mount of Olives against those nations, while those who are destined for deliverance make their escape through a wide cleft in the same mount (v. 3^{ff.}). For other features in this *fantastic* prophecy, which, after the fashion of the late eschatologies, mingles quite disparate elements, see below.

The ancient *theologumenon* of the interweaving of the world of nature with the fortunes of the people of God appears here also, in association with the Day of Jahweh, or in general as a mark of the Messianic last days, but in more striking forms. Thus we have allusions to strange, fear-compelling, natural phenomena such as the darkening of sun, moon, and stars (Is 13¹⁰, Jl 2^{10, 30f.} [33^{f.}] 3[4]¹⁵, Zec 14^{9f.} [according to which, on the Day of Jahweh it shall be neither day nor night, but at eventide it shall be bright]); earthquakes (Is 13¹³ 24^{18ff.})—nay, the dissolving of the host of heaven along with the heavens themselves (Is 34⁴). On the other hand, according to Is 30²⁶, when the Messianic age comes, the light of the moon is to equal that of the sun, and that of the sun to be multiplied sevenfold.

3. Apart even from the occasions when it is brought into connexion with the Day of Jahweh, the idea of vengeance upon the heathen nations occupies the forefront of expectations as to the future. Those nations in particular are specified which either aided to the best of their ability in the destruction of Jerusalem, or at least indulged in savage mockery and malicious jubilation over it. Among these the pre-eminence belongs to Edom (Is 34^{5ff.}, Ob 10^{ff.}, Jer 49^{7ff.}, Jl 4[3]¹⁹; also Am 1^{11ff.} was in all probability added after the Exile). Jer 48 is directed against Moab; Is 13^{2ff.}, and the whole series of threatenings contained in Jer 50 f., against Babylon; Jer 46 against the Egyptians; ch. 47 against the Philistines; 49^{1ff.} against the Ammonites; Zeph 2^{4ff.}, Jl 4[3]^{1ff.}, Zec 9^{1ff.} against almost all the neighbours of Israel. But no less frequent are the threatenings which are directed against the nations in general, and which contemplate the laying waste and depopulating of the whole earth (Mic 7¹³, Is 24^{1ff.})—nay, the trampling down of the nations by Jahweh Himself as one treads grapes (Is 63^{1ff.}); or the burning of them to lime (Is 33¹²). Zechariah in the second of his night-visions sees four horns (1^{18ff.} [2^{4ff.}]), which represent the hostile powers in all four quarters of heaven that have scattered Judah; but he beholds at the same time four smiths that are to cut off the horns. In his eighth vision, again, he sees (6^{1ff.}) the war-chariots which drive out in all directions to execute the judgment. And the reason why Jahweh is sore displeased against the nations is because, when He was a little displeased (with Judah), 'they of themselves helped forward the affliction' (1¹³). Here the old conception that Jahweh employed the heathen as His rod of chastisement for Israel is almost forgotten, and we hear only of the offence of the heathen. In Mic 7^{9f.}, indeed, the guilt of Judah is freely admitted, but this confession is at the same time coupled with the hope of revenge. Cf. also Is 8^{9f.}, Jer 10²⁵ 25^{30ff.}. Nevertheless, all these threatenings do not prevent very different expectations regarding the Gentile nations from being expressed elsewhere.

In all the passages discussed above, judgment upon the heathen is the condition of the gathering

together and reuniting of Israel in the Holy Land. From all sides they are to stream; neither floods nor deserts can check them, for Jahweh Himself prepares the way for them and leads them (Is 35^{1ff.} 11^{1ff.}). According to Is 27^{12f.}, they are gathered by Jahweh one by one from all quarters, and follow the call of the great trumpet that summons them home; cf. also Jer 30^{10f.} 46^{27f.}, Zec 10^{8ff.}. In a way altogether unique the deliverance of the captives is connected in Zec 9^{1ff.} 10^{2ff.} with victorious conflicts of Judah and Ephraim with the Ionians, i.e. the Greek world-power. As in Ezk 37^{15ff.}, the expectation is firmly established that the exiles of the Northern kingdom as well are to return (cf. Hos 2², Mic 2¹², Jer 3¹⁸ 50⁴, Ob 18); of envy and jealousy betwixt Judah and Ephraim no more is heard (Is 11¹³).

A favourite expectation of the post-exilic period is evidently that the heathen themselves shall bring the exiles home, and thus play a very humiliating rôle. We already encountered this expectation in an addition to Deutero-Isaiah (Is 49^{22ff.}, see above, p. 707^a, small type), cf. also Is 60^{4b} and v. 9^{f.}. According to Is 66^{19ff.}, certain of those who have escaped Jahweh's judgment upon the heathen are sent to the distant nations to bring reverently to Zion, as an offering to Jahweh, all yet banished Israelites. According to Is 60¹⁰, foreigners shall then build their walls for the Judahites, and kings shall minister to them; according to v. 14 (cf. also Mic 7^{16ff.}), the sons of their former oppressors shall pay them lowly homage. They themselves are to be as priests, i.e. free from all secular employment; for the foreigners shall be their shepherds, farmers, and vine-dressers (Is 61^{5f.}). Of the same kind is the expectation expressed in Is 14^{16f.}, that the Israelites, after their arrival in the land of Jahweh, shall make slaves of the heathen that brought them home, and thus 'they shall take them captive whose captives they were, and they shall rule over their oppressors.' Elsewhere (Is 11^{14f.}, Am 9¹², Ob 19^{f.}) the subjugation of the former vassals of the Davidic kingdom is thought of as the work of the already returned exiles. To quite a different order of thought belongs the expectation (connecting itself with Ezk 38 f.) that the mass of heathen peoples, gathered before the walls of Jerusalem, which they already look upon as a certain prey, shall be speedily destroyed through the sudden intervention of Jahweh (cf. Is 29^{5, 7f.} 30^{27ff.} 33^{3f.} 23^b, Mic 4^{1ff.}, Zec 12^{2ff.} [where also the princes of Judah co-operate in the destruction of the nations] 14^{2ff.} [where the terrible punishment inflicted on the assailants, and the immense booty that falls to Judah, are described]); on the different expectation expressed in Zec 14^{2ff.}, see preceding column. If we are right in assigning these passages to the post-exilic period, they can have in view only one coming final attack by the heathen peoples on Jerusalem. The frequent vacillation and obscurity of statement is due to their eschatological character, which can tolerate the close conjunction of heterogeneous elements.

4. If, in all the above expectations hostile to the heathen, we meet with a particularism which can be regarded only as a denial of the message of Deutero-Isaiah, there are, fortunately, not wanting numerous witnesses that his work had not been by any means in vain. Zec 2¹⁵ (1¹) foresees many peoples attaching themselves to Jahweh, that they may belong to His people and dwell in Judah. According to 8^{20f.}, many peoples and nations shall come to seek Jahweh and entreat His favour; ten men of different languages shall lay hold of the skirt of *one* Jew, that they may go with them of whom they have heard that God is with them. But a merely external attachment is not all. The whole of the heathen are to stream to the mount-

tain of Jahweh, there to receive instruction as to the manner of conduct He requires, and to submit to His judicial decisions; universal peace among the nations shall be the result (Is 2^{2ff.}, Mic 4^{1ff.}, Zeph 3⁹, Is 60³). In like manner, the feast of fat things which Jahweh, according to Is 25⁶, will prepare on Zion for all peoples, must be understood as a sacrificial meal by which they are received into the fellowship of the people of God; v. 7 declares how at the same time the covering shall be destroyed which has hitherto been cast over all peoples, and has kept them from the joyful fulfilment of the will of God which is known even to them. According to Is 56^{2ff.}, not only foreigners but even eunuchs who have attached themselves to Jahweh and keep His Sabbaths, may present to Him in Zion sacrifices that shall be well-pleasing in His eyes, for His house shall be called 'an house of prayer for all nations' (v. 7).

But the victory over particularism reaches its culminating point in the remarkable prophecy of Is 19^{18ff.}, which contemplates the conversion of the Egyptians and their joining with Assyria and Judah in a common worship of the true God. It may be that Assyria is here only a symbolical name (for Syria), and that the special circumstances of a late period (the 3rd, if not the 2nd, cent. B.C.) supplied the motive for this prophecy. But, in any case, it is an important witness that all the particularism of the later post-exilic period had not been able to quench the spirit of Deutero-Isaiah. The same remark applies to the Book of Jonah. The simple teaching of this much misunderstood, and therefore inadequately appreciated, little book, is that God in His mercy desires not the death of sinners, even among the heathen, but that they should turn and live; and, further, that it is within His power to effect such a turning, in opposition to all human expectation. Hence it only shows a carnal disposition and a low desire for revenge, if Judah, instead of rejoicing in the conversion of the heathen, is filled with fury because vengeance has not yet overtaken Nineveh (which here probably stands for Babylon). Thus understood—and the closing words of the narrative imperatively demand this interpretation—this little book, too, represents the highest elevation reached by the point of view characteristic of Deutero-Isaiah.

5. In what precedes we have brought together all the expectations concerning the heathen world. But the centre round which the expectations of this period revolve is always Israel, the 'heritage' of Jahweh (Is 19²³). It is for it, above all, that the joyful message is meant, which comforts the mourners of Zion (Is 61¹); on it is accomplished the wondrous transformation, nay the conversion of all conditions into their opposite (Is 29^{17ff.}), and therewith the triumph of the patient and the poor among men (v. 19).

The principal guarantee for all blessings of the Messianic age is found—as in the earlier prophecies—in the restored personal presence of Jahweh, or, to be more precise, in the indwelling of His 'glory' (Zec 2^{4. 6ff.}, 8³, Is 4² [where cloud and shining flame, after the purifying judgment is over, are meant to recall the fiery cloud in which Jahweh once accompanied Israel on the wilderness march]). With His appearing upon Zion, He enters at the same time on the kingly rule over Israel, and judicial authority over all nations (Is 2⁴ 33²² 24²³, Jer 10¹⁰, Ob 2¹, Zeph 3¹⁵, Zec 14⁹). Under His sway, the population (which in post-exilic times was long so small) is to multiply beyond measure (Zec 8⁵, Hos 2¹ [1¹⁰]); the walls of Jerusalem must stretch far out (Mic 7¹¹, Jer 31^{38ff.}), nay even be dispensed with altogether, on account of the multitude of men and cattle (Zec 2^{5ff.}); for Jahweh Himself will be to

them as a wall of fire (v. 9). Jerusalem is henceforward holy; foreigners shall no more pass through her (Jl 4 [3]¹⁷), no oppressor shall again lord it over her, for Jahweh now with sleepless eye interposes Himself as the bulwark of His temple against all that comes and goes (Zec 9⁸; cf. also Is 60¹⁸). Nor is there any further need of the sun and the moon, for Jahweh is their unceasing light (Is 60^{19ff.}).

Corresponding to the glory of her king is the external glory, the renown and splendour of the new Jerusalem, and the happiness of her inhabitants. They are there as a boast and a praise among all the peoples of the earth (Zeph 3²⁰); all nations shall praise their country as a delightful land (Mal 3¹²), Jerusalem as the pride and joy of all future generations (Is 60¹⁵). Zion, the city of the festivals, shall be like a secure habitation, subject to no change (Is 33²⁰; cf. also Am 9¹⁵, Jl 4 [3]²⁰); Israel shall be like splendidly blossoming plants (Hos 14⁶ [5]¹⁷, Is 27⁶; according to many, also Is 4²). One and all, the inhabitants shall enjoy a long duration of life (Zec 8⁴, Is 65^{20. 22}), surrounded by blessings, including fertility (Is 30^{23ff.}, Jer 31¹¹⁻¹⁴, Am 9¹³, Jl 4 (3)¹⁸); for they are 'a family blessed by Jahweh' (Is 65²³). In the profoundest peace they pass their days (Mic 4⁴, Is 60^{17ff.})—a peace which extends even to the wild animals (Is 65²⁵).

But the heathen, above all, have to contribute to the splendour of Jerusalem. All their wealth is to flow to that city as a token of homage to the temple (Hag 2⁷, Is 11¹⁰ 18⁷ (?) 23¹⁸ 60^{9ff.} 11), their flocks are to be available for the sacrifices (Is 60⁷), and the glory of Lebanon for the beautifying of the sanctuary (v. 13). Thus then shall Israel 'suck the milk of the nations, and suck the breast of kings' (v. 16).

But it is not only upon endowment with the good things of earth that the happiness of the new Jerusalem shall rest. Prophecy does not forget higher, spiritual blessings, even if their limitation to Israel preponderates, showing here again a falling away from the height reached by Deutero-Isaiah's expectations. The most important point, because it is the prerequisite for all other blessing, is the complete atonement for all the past guilt of the people. From the way in which Zechariah in his fourth night-vision (3^{1ff.}) hears the Satan simply commanded to be silent when he charges the people in the person of the high priest Joshua with their old guilt, it might appear as if the past judgments had sufficed of themselves to constitute a full atonement. But this is not the meaning of the prophets. On the contrary, Jahweh (v. 4) must expressly forgive the people's sin. The clothing of the high priest in clean garments is a symbolical action, declaring him (and with him the people) justified, but of course with the implication of the presence of a penitent frame of mind, such as is well-pleasing to God. In reality it is the grace of God which brings about the atonement, as is expressly urged in Is 12^{1ff.} 33²⁴ and, above all, Mic 7^{18ff.}. Thus Israel becomes a people who are all righteous (Is 60³), who are holy (Is 4³) to Jahweh (*i.e.* consecrated to Him as an inalienable possession)—nay, Jerusalem is to bear the honorific appellation, 'Jahweh is our righteousness' (Jer 33¹⁶). It is only occasionally that the religious and moral regeneration of the people is traced to the bestowal of the Divine spirit; cf. Is 32^{15ff.} 59²¹, Zec 12¹⁰, and especially Jl 3^{1ff.}, although in this last passage the outpouring of God's spirit upon all branches of the people, even male and female slaves, refers mainly to the bestowal of the gift of prophecy. But the mental transformations described in Is 29²⁴ 33^{5ff.} are also, no doubt, thought of as due to the influence of the Divine spirit.

6. Amidst all this, however, it cannot be denied

that the 'legal' religion, for which the way was laid by Ezekiel, and which became an actual fact during the period with which we are dealing, casts its shadow even upon the expectations regarding the time of consummation. The very commanding part played by temple and cultus at present (see above, p. 710^a) is to be retained even in the Messianic future. It is true that embodiments of the Divine presence such as the sacred Ark shall then be readily dispensed with, because the whole of Jerusalem shall be called the throne of Jahweh (Jer 31^{6f}). But the temple hill, as the holiest and most important, shall tower above all others (Is 2², Mic 4¹), whereas, according to Zec 14¹⁰, the whole of the rest of the country shall be changed into a plain. Ezekiel's prophecy (ch. 47) of the temple spring undergoes an advance in Zec 14⁸ in so far as the living waters, starting from Jerusalem, flow down to both seas, east and west, and thus fertilize the whole land. The importance attached, again, to the performance of the cultus is evidenced not only by the expectation of gifts of homage offered to the temple by the Gentiles (see above, p. 712^b), but also by passages like Jer 33^{18, 21}, in which the regular succession of Levitical priests is put on a level with the succession of the Davidic dynasty. According to Is 66²¹, however, the priesthood is to be open also to the returned exiles (not, presumably, to the Gentiles who bring them home). The religious festivals present themselves in a specially important light. The former fast-days shall indeed be transformed into days of rejoicing (Zec 8^{18f}), but at every New Moon and at every Sabbath all flesh (in Israel) shall come to worship at Jerusalem and—here we have a strange expectation, due probably to a later insertion—to look upon the corpses of the apostate ones, 'whose worm dieth not and whose fire is not quenched' (Is 66^{24f}; on this passage see p. 714^a). Zechariah (14^{16f}), on the other hand, looks at every Feast of Tabernacles for a pilgrimage of all nations to Jerusalem to pray before Jahweh and to join in the keeping of the festival: if any one neglects this, his land shall be punished with drought. The holiness belonging to the temple shall extend even to the bells of the horses in Jerusalem and the cooking-pots of the temple. It need not be pointed out that *this* notion of holiness cannot be explained from the usage of an Isaiah or a Deutero-Isaiah, but only from the mechanical and outward conception characteristic of the 'legal' religion.

7. We have purposely left out of account until now that branch of the expectations as to the future which, according to a still prevailing opinion, occupied the forefront of interest, namely, the hope of the appearing of the Messiah, the 'shoot of David,' predicted at the latest by Jeremiah (see above, p. 696^b). Really, however, it cannot be said that this aspect of prophecy plays a prominent part in our period, unless the very important oracles contained in Is 91⁶ and 111¹⁻⁹, as well as Mic 5^{1f} (cf. above, p. 696^a), are to be assigned to the post-exilic period. Leaving these passages out of account, we find a direct allusion to Jeremiah's (23^{3f}) 'shoot of David' in Jer 33^{14f}. (where, however, vv. 17, 21^f show that it is not one particular ruler, but a continuous succession of rulers of David's line, that is thought of) and Zec 3⁸ 6¹².^{*} Here 'Shoot' has already become a proper name, but one has no longer to look for his coming, since he is present in the person of Zerubbabel. All that is now needed is the revelation of his dignity as a signet-ring chosen by Jahweh (Hag 2²²), and his elevation to the throne of his fathers—an event which appears to be connected in

Zec 6¹² with the completion of the building of the temple. We have already (p. 678^b) pointed out that the crowning there enjoined had in the original text not Joshua but Zerubbabel for its object. It is perfectly intelligible that, after the shattering of the hopes reposed on Zerubbabel, the high priest should have taken his place (v. 11), especially as in the fifth of Zechariah's night-visions (4¹⁴) he is already reckoned as one of the two 'anointed' ones who stand before the Lord of the whole earth.

In Is 11¹⁰, which clearly looks back to v. 1, we hear of the 'shoot from the root of Jesse,' which is to be as an ensign to the nations (*i.e.* to indicate to them the way they are to go), who shall seek his favour and (by their gifts of homage, cf. above, p. 712^b) enhance the splendour of his residence. In the whole of the following description, however, he is not mentioned again.

The expectation of a king of David's family is found also, beyond doubt, in the beautiful prophecy of Zec 9^{9f}, although he is there called simply 'king.' Jerusalem is to rejoice over him who returns home as a conqueror over all enemies, but mounted upon the animal ridden in times of peace, in token that henceforward he is to rule as a peaceful prince to the ends of the earth. The idea of the world-empire of the Messiah appears here with its final stamp, and indeed in a form which goes far beyond all prophecies uttered hitherto, and to which there is no parallel except in passages like Ps 2⁸.

Apart from the above prophecies, we meet only with quite general promises, such as that of the righteous rule of a king and his ministers (Is 32^{1f}), the choice of a common head over Judah and Israel at the advent of the Messianic age (Hos 2² [1¹¹]); also the 'breaker' of Mic 2¹³ means the earthly leader, but the real king at the head of the returning people is Jahweh Himself, and the rearing up again of the fallen tabernacle of David (Am 9¹¹). The last-named expectation might, however, refer simply to the re-establishing of the residence and kingdom of David; while in Zec 12^{8, 10} the 'house of David,' which (in the joy of victory) is to be like the angel of Jahweh, stands simply for the aristocracy of the nation. A closer examination of all these passages always yields the same result, namely, that during this period the person of the Messiah is either of only secondary importance, or, if this be not the case, the rôle it plays is far less religious than political.

8. Finally, we have still to mention some quite isolated expressions, which (like some even of those above mentioned) belong to the sphere of late apocalyptic expectations. We should hardly include in this category the promise of a new heaven and a new earth (Is 65¹⁷ 66²²). For, although this promise plainly attaches itself to Is 51⁶ (the annihilation of heaven and earth), Trito-Isaiah, as the whole context shows, is thinking rather of the complete transformation of all conditions than of an actual new creation of the Universe. On the other hand, Is 25⁸ contains an apocalyptic feature in the announcement that death shall be destroyed for ever,* as does also 26¹⁹ in the hope expressed of the resurrection of the godly dead. In the latter case the form of expression appears to the present writer to exclude a symbolical explanation of this resurrection as referring to the return from exile (as in Ezk 37^{11f}). 'They that lie in the dust' are those actually buried; the mysterious dew descending from the starry region causes the earth to send forth the shades again. The definiteness with which the

* We leave out of account Is 42, because there 'shoot' or 'sprout' [better 'sprouting'] of Jahweh can only mean, in view of the parallelism, 'that which Jahweh causes to sprout.'

* We leave the question open whether this clause, which suits neither the rhythm nor the contents of the two following clauses, belonged from the first to Is 25⁸.

resurrection hope is here put forward can cause us all the less surprise, seeing that the so-called Apocalypse of Isaiah (chs. 24-27) appears to belong to a period from which we possess other witnesses to this expectation (see below, on Dn 12³). Elsewhere, throughout this period we find everywhere assumed the old conception of Sh'ol (see above, p. 668^a), the place whence no return is possible. Only, it is questionable whether the description in Is 14^{9ff.} of the conditions in the kingdom of the dead, after the analogy of the conditions that prevail in the upper world, is to be put to the account of bold poetical colouring or of a further development of the ancient and simpler conception. If the latter must be assumed, yet even in this passage (especially v. 15, cf. Ezk 32²³) nothing more than an approach can be discovered to the doctrine of a separation between the good and the bad. On the enigmatic saying in Is 66²⁴ (probably a later addition), cf. above, p. 713^a. It would have to be regarded as a clear approach to the doctrine of the pains of hell if there were here any reference to the under world at all, and not rather to the corpses of apostates lying before the walls of Jerusalem.

9. In what precedes we have already had to notice a variety of passages which pass beyond merely eschatological expectations into the sphere of apocalyptic, in so far as their language is purposely obscure and veiled, nay enigmatic in form, partly perhaps with the well-founded intention of rendering it unintelligible to outsiders. But apocalyptic proper meets us in the extant literature for the first time in the *Book of Daniel* (c. 165 B.C.). Since this book has found entrance into the OT canon, we cannot pass it over entirely in our present exposition. In reality, however, it belongs to the category of post-canonical (apocryphal and apocryphal) literature, and hence we refer for details to the article DEVELOPMENT OF DOCTRINE IN THE APOCRYPHAL PERIOD (above, p. 272 ff.); cf. also P. Volz, *Jüdische Eschatologie von Daniel bis Akiba*, Tübingen and Leipzig, 1903; W. Bousset, *Die jüdische Apokalyptik*, etc., Berlin, 1903; W. Baldensperger, *Die messianisch-apokalyptischen Hoffnungen des Judenthums*³, Strassburg, 1903.

The apocalyptic character of the Book of Daniel is already indicated by the command (8²⁶ 12⁴⁻⁹) to Daniel to keep the revelations made to him secret, and to seal the book till the time of the end. But it is seen most clearly of all in the contents of chs. 2, 7, 10 ff. Throughout these chapters events are *predicted*, some of which had happened within the author's own experience, while others had long been things of the past: in chs. 2 and 7 the world-empires that succeeded the empire of Babylon, along with the ten kings of the fourth kingdom; in 10 ff. the conflicts of the Ptolemies and the Seleucids, with numberless details; and, most of all, the terrible danger to the religion of Israel threatened by Antiochus IV. Epiphanes (11^{36ff.}). The purpose is everywhere the same: the author means to encourage his countrymen to unconquerable endurance amidst the severe persecution to which their faith and their fidelity to the Law were subjected. With this view he shows them, by the example of the young Daniel and his companions (1^{8ff.}), the blessing of unqualified obedience to the laws about food; by the example of the three men in the fiery furnace (ch. 3), and by the example of Daniel in the lions' den (ch. 6), he exhibits how for courageous confessors of the God of Israel wondrous deliverance is wrought, while punishment inevitably overtakes the despisers of this God (3^{22ff.} 4^{30ff.} 5³⁰ 6²⁵ 24). On the other side, the consolation he offers is based upon the prediction—veiled indeed in true apocalyptic fashion, yet on that account exact—of the end of the oppression.

It is derived (ch. 9) from a mystical interpretation of Jeremiah's prophecy of a seventy years' period of rejection for Jerusalem, the years being explained as weeks of years. Even this instance of occupation with the long-canonized Sacred Writings, in order to discover a secret sense, is a characteristic mark of apocalyptic.

It would be doing the Book of Daniel serious injustice to deny it all claim to a truly religious tone, and to see in it merely an embodiment of rigid zeal for the Law. Even if the beautiful confession of sins contained in 9⁴⁻¹⁹ should have to be regarded, with many moderns, as a later addition, yet in 8¹⁹ and 11³⁰ there is the implication that the advent of the final age is still kept back by the continuance of God's well-merited anger against Israel. But elsewhere, it cannot be denied, the strict observance of the outward demands of the Law, especially those relating to the cultus, occupies the forefront of interest. To our apocalypticist what appears to be the principal misfortune in the religious persecution under Antiochus Epiphanes, is plainly the abolition of the regular morning and evening burnt-offering (8¹¹ 13 11³¹ [coupled in the latter passage with the defilement of the sanctuary by a heathen image]), while its reintroduction is the subject of exact calculation (8^{13ff.} 12^{11ff.}).

Considering the date of origin of the Book of Daniel, it is a matter of course that its conception of God should occupy the level reached by the writing prophets. It is remarkable, however, that here already there should be such striking traces of the effort, which afterwards reached a climax in the Rabbinical theology, to jealously guard the person of God from all direct contact with the visible world. This explains the great multiplying of comparatively independent intermediate beings, who hold converse with the apocalypticist, in order to give him information (7^{16ff.} 8^{15ff.} 9^{21ff.}), where, for the first time, we meet with the name of an angel, Gabriel; 10^{4ff.}); or whom he beholds otherwise in his visions, such as the countless myriads of 7¹⁰ (cf. also 8^{13ff.} 12^{5ff.}, and the mention of guardian angels in 3²⁵ 6²³). In the story of the madness of Nebuchadnezzar (4^{10ff.}) it looks almost as if the rule of the world was left to the 'determination of the *watchers*' [certain superior angels] and the command of the 'holy ones'; it is not till v. 21 (24) that we hear of a 'determination of the Highest.' No less do the struggles of the nations appear to be decided simply by angelic princes (כְּרִי) as the guardians and champions of the various peoples; † cf. 10^{4ff.}, where probably we should see Gabriel in the fantastically described figure of the champion of Israel, who, with the aid of Michael, ‡ one of the chief princes (10¹³ 21; in 12¹ he is called 'the great prince who protects thy countrymen'), contends with the patron angels of the Persian empire and (v. 20) of Greece.

The above-described tendency to keep the person of God at a distance appears to be quite contradicted by the description in 7^{9ff.}, where the 'ancient of days,' who takes his seat upon the throne to execute judgment, can be understood only of God. But apart from the fact that here we have to do with a mere vision, and that on the occasion in question personal action on the part of God was indispensable, the description is confined wholly to externals (clothing, hair of the head, dazzling throne, and myriads of attendant spirits), God is not once introduced as speaking. On the contrary, it appears as if the decision of the assessors of the court (v. 10^b) were pronounced on the ground

* In 12^{11ff.} there may be two later systems of reckoning, different from that of 8¹⁴.

† Cf. what was said above (p. 709^b f.) on Is 24^{21ff.}.

‡ Cf. the exhaustive monograph of W. Lueken, *Michael*, Göttingen, 1898.

of the 'books,' in which, presumably, the actions of the parties to be judged had been written down.

This judgment evidently enters as a principal component into the eschatological expectations of the apocalypticist. And its result is not merely to cast down the heathen world-empire personified in the God-blaspheming Antiochus Epiphanes, but to bestow the world-dominion for ever on the 'saints of the Most High,' i.e. on the people of Israel (7^{13f.} 21^{f.} 27; cf., by the way, even 2¹⁴). In view of the express interpretation of the angel in 7²⁷, the figure who, like a man, comes with the clouds of heaven, can be understood only of Israel, and not of a personal Messiah, of whom, strangely enough, the book contains no hint. On the other hand, it is the Book of Daniel (12²) that contains the first undoubted * reference to the resurrection. Even here, however, what is looked for is not a general resurrection of *all* the dead, but only a resurrection of *many*, including both the godly (to everlasting life) and the ungodly (to shame and everlasting abhorrence). The number of the first naturally includes Daniel himself (v. 13).

That this last offshoot of prophecy should now exhibit only faint traces of the true prophetic spirit, and should move rather on the lines of 'legal' religion, is only natural in view of the fact that the latter had held almost unlimited sway for nearly 300 years at the date when the Book of Daniel was composed.

In speaking of the Book of Daniel, and even in dealing with a not inconsiderable portion of post-exilic prophecy, we have been compelled to anticipate the order of the stages of development of the religion of Israel. Our next task will be to seek to realize more fully the nature of the 'Priests' Code.'

VIII. THE PRIESTS' CODE (P).

i. *THE SOURCES.*—Regarding the numerous questions connected with the literary criticism of the stratum usually known as P, we must here be content with a few remarks. It is generally admitted that not only the present Pentateuch but also its latest stratum, namely P, must be viewed as the fruit of a somewhat lengthy literary process. Nevertheless, the spirit and the diction of this whole stratum exhibit such unity, that, from the point of view of the history of the religion of Israel, it is a matter of only subordinate interest to determine the component elements more exactly. Thus we do not dispute the possibility that the so-called Law of Holiness (H) may include some pre-exilic passages, but we regard by far the most of H as having originated within the priestly circles of the Exile, and that by way of carrying out the programme sketched by Ezekiel (chs. 40–48). The same remark applies to the priestly law-book, which, according to the express statement of Ezr 7²⁵ (cf. also Neh 8^{14, 15}), was first brought with him from Babylon by Ezra, and which, in view of Ezr 7^{12, 21} ('the writer of the law of the God of heaven'), must at least have been edited by him. Whether this law-book of Ezra was identical with that recension which embodied the cultus laws in the form of a cultus history (cf. e.g. Lv 10^{10f.}, Nu 15^{32f.}), and included also the historical parts of Genesis, Exodus, Numbers, and Joshua, we leave an open question. Only, we have no doubt on this point, that Ezra's law-book was identical neither with the whole of the present Pentateuch nor with the whole of the present P stratum. For, in the one case, the occasional glaring differences between the laws in D and in P would have occasioned serious confusion; while,

on the other supposition, it would be quite impossible to account for the very frequent repetitions (for instance, the duplicate versions of the ordinances regarding the building and furnishing of the Tent of Meeting, Ex 25–31 and 35–40), as well as the partial divergences of the components of certain groups (for instance, in the so-called sacrificial *tôrâh* of Lv 1–7). On the contrary, we can only conclude that the code of Ezra, which was originally *harmonious*, was subsequently enlarged by the products of other priestly schemes, and so finally (probably still within the 5th cent. B.C.) united with the older sources (J, E, D) into a single whole.

ii. *THE CONCEPTION OF GOD.*—1. P's conception of God can, properly speaking, be gathered only from the Creation narrative of Gn 1. For, as almost his whole interest is fixed on the preparation for and the establishment of the Israelitish theocracy, little occasion presents itself elsewhere for descanting on the being of God. But in the story of Creation (cf. above, p. 666) we encounter such a transcendence of God in relation to matter, in opposition to all pantheistic intermixing of the two, and to every theory of evolution, that we may here pass by the much debated question of the dependence of the narrator on the Babylonian or the Phœnician cosmogony.* At most, a mythological echo has survived in the allusion to a chaos (v. 2) and the hovering (scarcely 'brooding') of the creative spirit of God over the primeval ocean. But, even if v. 2 should be urged in opposition to the assumption of a creation *ex nihilo*, there would still be left the making of light, of the firmament of heaven, and, above all, of the stars, which are evidently to be thought of not as formed from pre-existing material but as called immediately into being. The absolute omnipotence of the Creator results of itself from the fact that His word of command is all that is needed to bring things into being according to His pleasure; while His absolute wisdom is manifested in the progressive order of the creative work, culminating in man, the goal and the crown of creation; as well as by the testimony of the Creator Himself (v. 31) that all He had made was 'very good,' i.e. perfect.

2. This lofty conception of the living, personal, but at the same time purely spiritual, God—a product of perfected prophetism—shows itself elsewhere in P in his careful avoidance of all anthropomorphism. True, indeed, even he cannot entirely dispense with theophanies at specially important crises in the history of redemption; but he always contents himself with almost imperceptible allusions to the near presence of God (Gn 17²² 35^{13a}), or to the appearing of the 'glory of Jahweh' (see above, p. 639^b f.) in the cloud (Ex 16⁹, Nu 9^{15f.} 17⁷ [16⁴²]). This glory appears to the Israelites upon the top of Mount Sinai like devouring fire (Ex 24¹⁷); its reflexion causes the skin of Moses' face to shine, so that he has to cover his countenance with a veil (Ex 34²⁹). But none of these passages venture on even a remote description of the being of God. Under these circumstances it is surely no accident, again, that in P we find no trace of intermediary beings between God and man, the sole medium of revelation being the word of God. Manifestly, the sending forth of angels, who had to be thought of all the same as wearing some bodily form, appeared to P as itself a degrading of the Divine sphere to the realm of the creaturely.

3. All the less can it be that, when man is said to have been created after the image of God and

* The above (p. 713^b) cited passage, Is 26¹⁹, which, by the way, perhaps belongs to the same period as Daniel, is by not a few explained of the *political* resurrection of the people.

* The fullest treatment of these questions is by H. Gunkel, *Schöpfung und Chaos in Urzeit und Endzeit* (Göttingen, 1894); and Frdr. Delitzsch, *Das babylonische Welterschöpfungsepos* (Leipzig, 1896).

in His likeness (Gn 1²⁷), there is any thought of a copying of the *bodily form* of God. Even if something of the kind may have been intended in the heathen source which is assumed by many to have been used by the narrator, he himself would have indignantly repelled any such conception. Man is the image of God in so far as he, in distinction from all other living creatures, belongs to the realm of rational and moral beings, whose supreme head is God Himself. The idea that this Divine image was lost by a fall into sin is quite unknown to P. On the contrary, he expressly notes (Gn 5³) that it was transmitted by Adam, through the process of generation, to Seth (and his further posterity); and, even after the Flood, murder is declared to be an act worthy of punishment by death (9⁶), because it amounts to a destroying of the Divine image.

A result of the position of pre-eminence held by man as the bearer of the Divine image is the dominion accorded him by God over the earth, and in particular over the world of animals (Gn 1²⁸). For the exercise of this dominion men are capacitated by becoming fruitful and multiplying in accordance with the so-called 'Creation-blessing.' At the same time, however, they are at first (v. 29) confined exclusively to a vegetable diet; permission to use animal food (but to the exclusion of eating blood) does not come till after the Flood (Gn 9^{3ff.}), i.e. it is simply a concession to the corruption that has now set in, a perversion of the condition originally designed by God. In His perfect creation slaughter could not have held sway from the first.

iii. THE REGULATIONS OF THE THEOCRACY.—

1. That interest in the regulations of the theocracy by which the whole of P is dominated, makes itself felt already in the Creation narrative, in so far as the latter represents the Sabbath as blessed and hallowed from the beginning as the day on which God rested from His six days' work (Gn 2³). The Flood is indeed, as in J, a judgment of God (6^{1ff.}) on a wholly corrupt humanity, but at the same time furnishes the occasion for concluding a *berith* (cf., on this so-called 'covenant,' above, p. 630^b f.) with the new race of men descended from Noah. It consists in God's promise that mankind is in future to be safe from the recurrence of destruction by the waters of a flood, and in the binding of Noah (and in him of all mankind) to abstain from eating blood and from murder. The covenantal sign confirmatory of the Divine promise is the rainbow (9^{12ff.}).

2. In the history of the patriarchs, which is dismissed by P in a few very brief notices, there emerges prominently once more the concluding of the *berith* with Abraham (Gn 17^{1ff.}). The Divine promise in this instance has reference to the bestowing upon the patriarch of a very numerous posterity, which shall include even kings, and to the assigning of the land of Canaan to Abraham's seed as a permanent possession. On the other hand, Abraham is bound to an upright walk before God and to the adoption of circumcision as the outward sign of this second 'covenant.' It is clear that circumcision, which, as a very ancient practice of many nations surrounding Israel, must originally have rested upon other grounds (cf. above, p. 622^b f.), is here brought under a specifically religious point of view. Since an uncircumcised person is 'unclean,' circumcision, as the taking away of a portion of the uncleanness, is a symbolical act of purifying. But this negative sense is supplemented by a positive one—an act of consecration. Circumcision is the rite whereby a child is received into the fellowship of the pure God-consecrated people, and it includes at the same time the obligation to conform to all the

Divine ordinances that are binding on this body. All these features (purification, consecration, engagement) impart to circumcision, as viewed by P, a sacramental character, which suggests comparison with Christian Baptism. The circumstance that, according to v. 12, circumcision is to be performed also on every class of slaves, appears at the first glance very strange, in view of the particularism with which P elsewhere insists on the sole claim of Israel to the name of a people of God. But it seems to him even more important that no unclean one shall be tolerated in the company of the clean, and hence he resorts more readily to the expedient of requiring that even foreigners who have come into external fellowship with Israel shall be bound to the Law by circumcision, and be thereby constituted full citizens of the Divine commonwealth.

3. Except for his detailed account of the purchase of the burial-place at Hebron (Gn 23), upon which he evidently means to base a claim on the part of Abraham's posterity to the land of Canaan, P hastens rapidly over the history preliminary to the Sinai covenant, that he may dwell all the more fully on this third *berith*, whose duration is to be eternal, and whose sign is the Sabbath (Ex 31^{13ff.}). In the forefront stands (Ex 6^{2ff.}) the solemn revelation of the name 'Jahweh' to Moses. This name is expressly said to have been then first communicated, God having revealed Himself to the fathers only as *El-shaddai* ('God almighty'). No explanation of the name 'Jahweh' is given. Doubtless, the explanation which underlies Ex 3¹⁵ is assumed as long familiar. But here already the promises of Jahweh are enumerated, upon which the *berith* at Sinai is to be founded: the deliverance from the bondage of Egypt, whereby at the same time Israel's election as the people of God's own possession is sealed, and the settlement of them in Canaan in fulfilment of the sworn promise to the patriarchs that this land was to be given to their descendants for a perpetual possession. The obligations, again, to which the people have to submit themselves, in order to prove themselves worthy of these Divine blessings and of the name 'people of Jahweh,' are laid down in the numerous ordinances which form the kernel of the so-called 'Priests' Code.' The latter name is not meant to imply that this code is concerned only with prescriptions for the priests—by way of opposition, for instance, to Deuteronomy as a law-book for the people. On the contrary, the majority of the laws contained in it assume the form of communications which Moses by God's command imparts to the people. But, as all strictly ritual acts can be performed only by priests, and the laws have reference very largely to the cultus, the designation of the whole as the 'Priests' Code' is perfectly justified. The realm of civil and criminal jurisprudence,* which plays by no means an unessential part in the 'Book of the Covenant,' comes into consideration in P only where specifically religious interests are involved.

4. The fundamental notions on which the so-called *Ceremonial Law*, in dependence on the legislative programme of Ezekiel, is based, are extremely simple. They amount essentially to the one idea that in the domain of Israel, Jahweh's own people, everything without exception belongs, and is thus consecrated, to Him alone. This holds good accordingly of all space and time, and of all pro-

* On this side of the legislation, which we pass by here, the reader may compare the following: W. Nowack, *Die sozialen Probleme in Israel*, Strassburg, 1892; E. Schall, *Die Staatsverfassung der Juden*, Leipzig, 1896; F. Buhl, *Die sozialen Verhältnisse der Israeliten*, Berlin, 1899; G. Förster, *Das mosaische Strafrecht in seiner geschichtlichen Entwicklung*, Leipzig, 1900.

perty and life. The full logical consequence of this now would be, properly speaking, that man would have to renounce all use of what is God's sole property—nay, that all life would have to be brought to Him in sacrifice. But this would make the continued existence of the God-consecrated people impossible. Hence God has so ordained it in His law that only a portion of the property in question is to be exclusively hallowed to Him and thus withdrawn from profane use. This due (*tērūmah*), levied upon the whole, gives symbolical expression to the confession that Jahweh is incontrovertibly Lord of everything. With this admission He is graciously satisfied; and by the sacred *tērūmah* all the rest is also hallowed and its safe use procured for Israel. But all the heavier is the vengeance that overtakes him who omits the prescribed hallowing and rendering of a portion to Jahweh, or lays his hands on what has already been hallowed. It will be our object in the following survey to show what was the special portion of Jahweh under all the categories above referred to.

(a) *Holy places*.—Jahweh is sole Lord of all space. But He contents Himself with requiring that a limited space be marked off and declared absolutely sacred. This space is the place where His 'glory' dwells, and thus at the same time supplies the condition of approach to Him and of all kinds of ritual proceedings. (a) The latter became possible for the first time after the construction of the one legitimate sanctuary, in the form of the 'Tent of Meeting' (commonly called 'the tabernacle,' German *Stiftshütte*) at Sinai. Hence P nowhere speaks of the erecting of altars or the offering of sacrifices by the patriarchs, but the constitution of the sanctuary is the first and very minutely handled subject of the Sinaitic legislation (Ex 25th and 35th). The concentration of the cultus at one legitimate sanctuary, which Deuteronomy (12th) put forward as a new demand and which it carried through not without difficulty, appears in P as something that is self-evident and needs not to be specially enjoined. Nor does P, like Deuteronomy, regard the unification of the cultus as coming into force only after the termination of the conquest of Canaan [or, to be more precise, after the building of Solomon's temple], but as a principle that was valid from the very first. The tent-sanctuary erected at Sinai is indeed, in view of its whole character, nothing but the Jerusalem temple projected back into the time of the wilderness journeyings; but there are two considerations that forbid our speaking, in this connexion, of P's account as pure fiction. In the first place, even the ancient tradition (Ex 33th) knows of a 'Tent of Meeting,' only that the latter is not a place of worship but simply the seat of an oracle, and that it stands not in the midst of but outside the camp. Secondly, the tent-sanctuary of P belongs to the numerous theories which owe their form, not to an actual tradition but to a religious postulate. Things must have been so ordered, it was argued, if they were to harmonize with the (much later, but) absolutely authoritative theories. Thus a delicate symbolical idea comes to be transformed into tangible history. Any one who straightway pronounces this a falsifying of history, shows that he has no notion of the peculiar character of the whole genus of literature known as the *midraš* (for it is to this realm that we must assign all this embodying of religious ideas in history, within the Ceremonial Law). See, further, art. TABERNACLE in vol. iv.

The setting up of the sacred tent in the midst of the camp of Israel naturally implies that Jahweh means to take up His abode amidst His people, if not in His real person, yet with a representation

of His being (cf. above, p. 639^b f., on the 'glory of Jahweh'). The special seat of His revealing presence, and consequently the most holy centre of the sacred spot, is the lid of the Ark of the Law in the dark *adytum* of the tent (Ex 25th). Next to this 'Holy of Holies,' which, it would appear from Lv 16, could be entered only by the high priest, and even by him only on the Great Day of Atonement,* comes the 'Holy Place,' which only the priests, not the Levites, might enter. These two spaces are surrounded by the fore-court, in which the priests, with the assistance of the Levites, attend to the sacrificial cultus. Between the fore-court, again, and the tribes of Israel which—three on each side—surround the court, the Levites are encamped. In virtue of the consecration which they have undergone, they are fitted to serve as a bulwark to the people against the Divine holiness, which threatens with destruction everything unclean that comes near it (Nu 1st).

(β) The idea of a *tērūmah* of the land being due to Jahweh as an acknowledgment that one owes the whole to Him, finds a further expression in the command to set apart 13 priestly and 35 Levitical cities, each with a piece of pasture-land round about it (Nu 35, Jos 21). The circumstance that these cities and the pasturage pertaining to them are intended for the use of man, does not exclude the possibility of looking upon them as a due paid to Jahweh. For in other instances as well (e.g. the thigh in meal-offerings) the *tērūmah* falls to the priests. This whole enactment, however, is intended simply to embody one of those theories spoken of above, without regard to the possibility of carrying it into practice. This is sufficiently proved by the single fact that the territory of the twelve tribes, in each of which, in proportion to their size, a certain number of cities are to be set apart (Nu 35th), had long ceased to be under the control of the people, and that it cannot be proved that in the post-exilic period such a law was carried out even in the case of Judah, although priests and Levites may have fixed their abode by preference in those particular cities of Judah and Benjamin. In favour of the view that we are here dealing with a mere theory, there is, finally, the further circumstance that several of the cities enumerated were situated so near to one another that the pasture-lands attached to them (extending each to a distance of 2000 cubits from the city wall) would in many instances have overlapped. The late date, however, at which this theory was constructed is evident from the way in which the Priests' Code proper repeatedly (Nu 18th, 26th) insists that the tribe of Levi is to be compensated by the offerings of the people for having *waived its claim* to a share of the land: Jahweh is its portion.

(γ) A final embodiment of the idea of Jahweh as the sole owner of the land is found in a portion of the regulations about the *Sabbatical year* and the so-called *great year of jubile* (Lv 25). It is true that even the Book of the Covenant prescribes (Ex 23rd) that the land is to be allowed to lie fallow once in seven years, for the good of the poor and the beasts of the field. The motive there, however, is a humanitarian, not a theocratic, one; and, moreover, the rule is certainly not meant to apply to all cultivated land in one and the same year. Deuteronomy prescribes (ch. 15) only a remission

* The opening part of Lv 16 contains, indeed, primarily only regulations as to the precautions to be taken by Aaron to ensure his being able to enter the sanctuary without danger, and thus manifestly assumes the possibility of repeated entrances. This introductory passage was afterwards amalgamated with the ritual of the Day of Atonement. Nu 18th, again, implies that *all* priests may officiate in the Holy of Holies.

of debts for the seventh year, again on humanitarian grounds. On the other hand, Lv 25^{34f} requires that every seven years *all* land shall enjoy absolute rest. There is no more word of humanitarian motives: the Sabbath of the land in the Sabbatical year denotes a consecration of the land just as the weekly Sabbath signifies the consecration of a specified shorter period of time. But this consecration implies once more the solemn acknowledgment that the people have received the land only on revocable lease from Jahweh, the sole feudal owner.

We have the express testimony of the history of the Maccabean wars to the fact that the prescriptions regarding the Sabbatical year were carried into practice. On the other hand, Jewish tradition itself admits that the so-called great year of jubile, which fell every fiftieth year (after the complete lapse of seven Sabbatical-year weeks), was only counted but not actually observed. As a matter of fact, the carrying out of the prescriptions of Lv 25¹³, so far as this was possible at all, would have led to a total want of certainty as to all matters of property and a consequent paralyzing of economic relations. But the consistent theory of P's legislation is indifferent to questions of practicability, and even to such considerations as that the year of jubile immediately follows a Sabbatical year and thus implies a second fallow year. All this appears to P insignificant compared with the principle which here (v.²³) finds its most notable and clearest expression: the land (like every other possession), being the property of Jahweh, may not be sold. On the contrary, one man can sell to another only a certain number of harvests; the price is to be proportioned to the number of years which have yet to elapse before the next jubile year, when the property spontaneously falls back to the original usufructuary of it, the proper feudatory of Jahweh. It is significant that, according to v.^{29f}, the houses in a walled city do not pass back in the year of jubile into the hands of the seller. They are the handiwork of man, and, as such, do not belong to the feudal property of which Jahweh gives a lease. On the other hand, the houses in villages are, according to v.³¹, a part of the landed property; hence they are redeemable at any time, and pass back in the year of jubile to their original owner.

(b) *Holy times*.—Jahweh is Lord also of all time. Hence the employing of time in any pursuit that brings profit amounts to an encroaching upon God's right of property. He permits, however, of such encroachment, upon condition that special portions of the whole time are set apart and 'hallowed,' *i.e.* withdrawn from profane use, as belonging to God. The essential point is thus abstention from work. It is only in a secondary way that P thinks of the spending of holy days in Divine worship or private meditation. On ordinary holy days it is only professional work that is forbidden (Lv 23^{7f}. 21. 25 etc.), but on the Sabbath and the Great Day of Atonement it is work of *every kind* (vv.^{3. 30}). The standpoint of P comes out, above all, in the motives he assigns for the festivals. The original agrarian character of these (cf. above, p. 662 ff.) still survives—apart from the dedication of the firstling sheaf at the *Mazzôth* festival, Lv 23^{9f}.—only in the Feast of Weeks, as the occasion when the firstling loaves are presented. On the other hand, the Passover, as an independent festival, precedes the seven (formerly six) days of Unleavened Bread. Already instituted in Egypt (Ex 12^{1ff.}), it is meant for all time, in grateful remembrance of the sparing of Israel the night before the Exodus, when God smote all the firstborn of the Egyptians. The manifestly primitive form of the celebration (the eating of the lamb in the houses, and the besprink-

ling of the doorposts with its blood) could be retained by P only through giving up the sacrificial character of the festival; for otherwise it could not have been celebrated except (as in Dt 16^{5f.}) at the central sanctuary. In the case of the *Mazzôth* festival it is repeatedly emphasized that the strict prohibition of leaven was given at the very Exodus itself, thereby conferring upon this festival also the character of a theocratic memorial ordinance. With the Feast of Tabernacles (now an eight days' instead of a seven days' festival), which was originally the joyous feast of the fruit- and wine-gathering, the same result was reached by giving to the ancient custom of dwelling in booths during the festival the stamp of a memorial of the wilderness journeyings. This giving up of the original motive of the festivals, namely, the course of the various harvests, permits also of an exact dating of them. Thus the Passover falls on the evening of the 14th Nisan, *Mazzôth* extends from the 15th to the 21st of the first month, Tabernacles from the 15th to the 22nd of the seventh month, while the Feast of Weeks falls on the fiftieth day after the offering of the firstling sheaf, which was always to be presented the day after the Sabbath of the *Mazzôth*-week. Of new festivals we have: the Feast of Trumpets at the new moon of the seventh month [otherwise the New Moon, to which such importance was attached in early times, is signalized in P only by a multiplication of the official offerings], and the Great Day of Atonement on the 10th day of the same month. Once more it is significant that the latter festival, which is undoubtedly of very late origin, and whose motives are purely theocratic, should have become the most important and the holiest of all. By the way, it is only in the case of seven of these days (the 1st and 7th days of *Mazzôth*; the Feast of Weeks; the 1st, 10th, 15th, and 22nd days of the seventh month [but, according to Lv 23³, also every Sabbath]) that a 'holy convocation' of the whole people is required at the sanctuary—a demand which is intelligible only if one thinks of the people as living in the neighbourhood of the sanctuary, as was actually the case during the first period after the Return from the Exile.

All the festivals hitherto enumerated recurred every year. But the underlying idea of all the festal seasons made its way to a further realization in the setting apart, as hallowed to God, of seasons within larger divisions of time. This led to the expansion of the idea of the Sabbath by the separation and hallowing of every seventh year as the close of a year-week, and of the fiftieth year after the termination of a cycle of seven year-weeks. The celebration of these is based upon a renunciation of the use of the soil. Since in this instance the theory of sacred time is in the closest contact with that of sacred space, we have already (p. 717^b) had to speak of the Sabbatical year and the great year of jubile.

(c) *The consecrated character of all members of the people; 'holy persons' in the narrower sense (Priests and Levites)*.—(a) The fact that Jahweh by mighty acts 'redeemed' the people from the bondage of Egypt, constituted Israel the property of Jahweh alone (Lv 25^{42. 55}); and henceforward it was to be a people consecrated to Him, and thus—in harmony with His superiority to every kind of stain—an absolutely pure people. This idea finds expression on the one hand in the purificatory act of circumcision, and on the other in the numerous regulations about cleanness (cf. especially Lv 11-15), which furnish instructions as to the precautions to be taken to avoid defilement, and as to the atoning acts necessary when Levitical purity has been lost. In so far as these acts consist of sacrificial transactions, we shall have to speak of

them more fully below in connexion with the subject of sacrifice. But, besides these, we have to do here with the command to consecrate to God all the male firstborn (and therewith all the further offspring of the same womb), and, following out this idea, to redeem them by a prescribed performance from the condition of forfeiture to the Deity (Ex 13^{1, 12^{ff}}, Nu 18¹⁶). The same object is aimed at in the requirement of a poll-tax of half a shekel from every adult Israelite as a protective 'covering' of his life upon the occasion of the numbering of the people (Ex 30^{11^{ff}}). For this last is, as it were, an encroaching upon Jahweh's sphere of sovereignty; hence an express acknowledgment of His sole claim to the life of all persons is necessary, and this takes the form of a poll-tax (Heb. כִּסָּף 'covering', 'atonement'), which is of the same amount for all. A natural result of the same assumption is found, finally, in the injunction (Lv 25^{39^{ff}}) that Israelites, who from any cause have become bondmen, are not to be regarded and treated as real slaves, although in the Book of the Covenant (Ex 21^{1^{ff}}) and even in Deuteronomy (15^{12^{ff}}) this is treated as quite possible. On the contrary, P demands that, as really the property of Jahweh, they are to rank only as hirelings or *tôšābhîm* (Lv 25⁴⁰), and in any case are to go free in the year of jubile.

(B) But, more clearly than in any way hitherto mentioned, the idea of a people consecrated to God finds expression in the *organization of the priesthood*. Properly speaking, all male Israelites ought to discharge priestly functions, and thereby testify their willing devotion to God. But for this an indispensable requisite is such a condition of purity as cannot possibly be maintained by every man amidst the duties of common life. Hence Jahweh has arranged for a permanent representation * of the people, in the form of the hereditary priesthood entrusted to Aaron and his sons. The restriction of the priesthood to the 'sons of Zadok,' demanded by Ezekiel (see above, p. 705^a), was impossible for P for the reason that his whole legislation dates from Moses, and thus long before the time of Zadok. At the same time, moreover, the deriving of the priesthood from Aaron made it possible to recognize the priestly rights of certain non-Zadokite families.† But, in the main, P's 'sons of Aaron' are just the Zadokites.

In order to be able to approach God and present Israel's offerings to Him without danger, the priests have to guard carefully against all defilement. In particular, they are not to incur defilement from any dead body (Lv 21^{1^{ff}}), except in unavoidable cases when the body was that of a parent, a brother, an unmarried sister, or one's own child. Any bodily defect serves of itself to exclude from priestly functions, for one thus affected would 'desecrate the sanctuaries of Jahweh' (v. 23). But the highest requirements in the matter of outward purity apply to the high priest, in whose person the idea of a personal representation of the holy people reaches its climax. He may not defile himself with any

dead body, even that of father or mother, and is not to leave the sanctuary at all, that he may not (by contact with what is profane) 'desecrate the sanctuary of his God.' Moreover, his very clothing shows (Ex 28^{2^{ff}}) by various symbols that he represents not only the holiness of the priestly people but also their kingly dignity. He wears a robe of blue and red-purple, and a golden diadem inscribed 'Holy to Jahweh,' and upon his shoulder-piece and breastplate are the names of the twelve tribes engraved on precious stones. In short, in place of the pre-exilic chief priest, who is an official of the king, we have now the sovereign, hereditary high priest. At his death the claim of the avenger of blood upon the life of the manslayer lapses (Nu 35²⁵). This means simply that with the supreme head of the State ends the period of political life which began with his entry upon office. In like manner the anointing of the high priest, at least according to the theory which represents him alone as anointed (Ex 29⁷; cf. Lv 4^{3, 5, 16} 8¹² 'the anointed priest,'* Lv 21¹² 'the consecration of the anointing oil of his God rests upon him') is undoubtedly thought of as a parallel to the anointing of the king. In the other theory, which makes all priests anointed, the thought is probably the ancient one (cf. above, p. 659^b f.) of an imparting of the spirit as the result of the anointing (Ex 40¹⁵; on the other hand, in 29²¹ and 30³⁰ the sprinkling of the priests' garments with anointing oil seems to be distinguished from the pouring of oil upon the head of Aaron in 29⁷).

(γ) As to the *Levites*, it is a very general error to regard them as priests of a lower grade, the rank and file, as it were, of the 'priestly tribe' of Levi, from which the priests proper, with the high priest at their head, emerge as a special branch. But this is by no means the intention of P. The circumstance that it is from the tribe of Levi that the Levites are taken, is due to a Divine arrangement equally with the setting apart of the priests from Levi; it is not the consequence of the latter arrangement. On the contrary, the Levites are a selection *from the people* to represent them in connexion with the lower offices of the cultus. These offices ought to be discharged by the people themselves, or, to be more precise, by the firstborn who are consecrated to God. But here, again, the unavoidable absence of constant purity would have rendered such service impossible, seeing that the firstborn could not be kept from all contact with profane life. Hence, according to Nu 3^{40^{ff}}, each of the firstborn is to have his place taken by a Levite. Now, as there were only 22,000 Levites available, whereas the number of the firstborn was 22,273, the extra 273 of the latter had to be specially redeemed from their obligation by a further payment of five shekels each. In this requirement P's real view of the character of the Levites finds very clear expression. They are a 'gift' of the people to the priests (Nu 3⁹ etc.), to minister to the latter. According to Nu 8^{10^{ff}}, they are, like all 'wave-offerings,' assigned to Jahweh through laying on of hands (see below) by the Israelites; they are 'waved' [i.e., probably, led hither and thither, in place of being waved backwards and forwards in the hands, like other sacrificial gifts] by Aaron before Jahweh, and then fall, like all heave- and wave-offerings, to the priests as their property. Their installation is not spoken of, as in the case of the priests, as a consecration, but as an atonement and a purifying (Nu 8^{5^{ff}, 21}). In view of all this, we cannot speak of any *priestly service* rendered by the Levites. Nay, according to Nu

* It needs no argument to show that the parallel it was once customary to draw between the OT and the Catholic conception of the priesthood is quite a mistaken one. According to the latter, the priest acts the part of God over against the people, and hence in God's name gives absolution and imparts blessing. On the other hand, in P the high priest is nothing more than a representative—highly exalted and dignified, indeed—of the God-consecrated people. He represents it before God in every regard (see below). Any (ritual) shortcoming on his part involves the whole people in guilt. As to the blessing of Jahweh, again, the high priest, like the other priests, cannot impart this of himself, but must supplicate it of God (cf. Nu 6^{23^{ff}}, and especially v. 27).

† These have their genealogy traced not to Eleazar but to Ithamar, another son of Aaron. It may be noted that only one head of a family is named in Ezr 8² as a descendant of Ithamar, namely Daniel.

* The title so familiar to us, 'high (lit. 'great,' גָּדוֹל) priest,' appears in Lv 21¹⁰ in the form 'the priest who is greater than his brethren,' while in Ezr 7⁵ we have 'the priest [who is] the head.'

4¹⁵, they are not to touch the sacred vessels upon pain of death, but to carry them only after they have been carefully covered up by the priests. It is true, however, that their superior condition of purity enables them to come nearer to the sanctuary than the profane multitude can do, and to serve as a bulwark to the latter against the destroying holiness of God (cf. above, p. 717).

(δ) We have already (p. 658^b f.) noted how even P recognizes also a kind of lay priesthood in the shape of the *Nazirate* undertaken for a fixed period of time.

(d) *The hallowed character of all property.*—This principle finds expression partly in the ancestral custom of offering the firstfruits of barley, must, and oil (Nu 18^{12ff.}), and partly in a number of sacrificial transactions. Every due paid from the products of the soil signifies that one owes the whole to Jahweh, and it is only when He has received His portion that the rest is hallowed and given over freely to the use of man. Amongst the regular ritual dues is included also the tenth paid in early times to the king, only that it is no longer, as in Deuteronomy (14^{22ff.}), eaten at the sanctuary and given every three years to the poor, but is assigned to the Levites as a recompense for the service which they render in the sanctuary as representatives of the people (Nu 18^{21ff.}).

(a) But in P, as in the pre-Prophetic period, by far the most important place among gifts to God is held by the *sacrifices*. They, too, are in many instances the expression of the consciousness that man owes to God all blessings connected with his earthly possessions, and that he has solemnly to testify his gratitude for these. But this is not the only point of view. On the contrary, there were still at work here a number of motives, partly very ancient, whose presence in sacrificial transactions we have already had to note, although it is hard to say how far a consciousness of the original meaning of the ritual survives in the minds of the authors of P. The idea of the sacral communion (cf. above, p. 661 ff.) still continues to find expression in the employment of blood, as the most important part of all sacrificial transactions; and, indeed, the blood is brought always the nearer to God in proportion to the importance and holiness of the sacrifice. Thus the blood of the peace-offering and the burnt-offering is poured only round about the altar (Lv 1⁵⁻¹¹ 3²); whereas of the blood of the sin-offering the priest has to sprinkle a portion before the curtain which separates the Holy Place from the Holy of Holies, to smear a portion on the horns of the altar of incense, and to pour the rest upon the ground beside the altar of burnt-offering (Lv 4^{6ff.} 16^{1f.} 29). On the Great Day of Atonement the blood of the guilt-offering is actually brought by the high priest into the Holy of Holies, and sprinkled upon and before the lid of the sacred Ark (Lv 16^{14ff.}). But even the idea of the offering of food still plays a part (although, no doubt, a less prominent one) in P, as is evident from such facts as that—apart of course from incense—it is only what may be eaten that is to be offered, and indeed—as befits the holiness of God—only clean and unblemished animals; that every sacrifice must be seasoned with salt (the meal-offering with oil); and, above all, that every complete sacrifice includes not only flesh but an additional dish in the form of a food-offering, and a portion of drink in the shape of a wine-libation.

But in all this we have not yet the answer to the most important question from the point of view of the history of religion, namely this: *Wherein consists, according to P, the efficacy of sacrifice?* Is it effectual simply *ex opere operato*, or do other,

specifically religious, points of view come into consideration? The reply to this question depends upon a correct understanding of the force of the so-called *semikhah* (שְׁמִיכָה) or laying on of hands, and of the significance of the blood in the sacrificial ritual.

In every species of bloody sacrifice the offerer has to take his stand before the door of the sanctuary and lay his hand upon the head of the victim (Lv 1⁴, here of the burnt-offering, with the addition 'so shall it be accepted for him and procure atonement for him'; 3^{2-8, 13}, of the peace-offering; 4^{4-15, 24, 29}, of the sin-offering). What is the meaning of this ceremony of hand-imposition, upon which manifestly great weight is laid in the sacrificial ritual? It was natural to think of a transference of guilt, especially as this is expressly witnessed to in Lv 16^{21ff.}. There the high priest lays both hands on the head of the so-called 'scape-goat' (see art. AZAZEL in vol. i.), confesses over him all the transgressions of Israel, and then sends him away, laden with the people's guilt, into the wilderness. Beyond doubt, the laying on of hands in this instance denotes a transference of guilt, but the 'scape-goat' is no *sacrificial victim*, and hence the whole parallel is unsuitable as an aid to explaining the ritual of *sacrifice*. Besides, the laying on of hands is practised also with peace- or thank-offerings, which are not presented for atoning purposes, as well as in connexion with the consecration of the Levites (Nu 8¹⁰). The latter ceremony, in particular, permits of no other explanation than that the laying on of hands is an act whereby a renunciation of personal possession and a giving over with a view to sacrifice [or, in the case of the Levites, with a view to perpetual service in the sanctuary] is accomplished. Hence the comparison with the *manumissio* of Roman law is quite appropriate.*

It is another question whether—quite apart from the meaning of the שְׁמִיכָה—there may not have been present, at least in the guilt-offering, the idea of a surrender of the life of the animal in place of the forfeited human life—in other words, the inflicting of a penalty upon the victim, and thereby accomplishing a *satisfactio vicaria*. This view has been maintained all the more positively, because in the New Testament the sacrificial death of Christ is undeniably at times looked at from this viewpoint. Further, in Lv 17¹¹ it is expressly insisted that the seat of life is in the blood, and that God has ordained that blood be used at the altar to accomplish propitiation, for 'the blood atones through the life [contained in it].' Here, surely, it appears to be clearly declared that the life of the victim is a substitute for that of the sinner. But this conclusion is once more rendered impossible by the circumstance that then the sacrificial victim must have been regarded as laden with guilt and curse, and hence as unclean, whereas in reality it is

* Volz (art. 'Die Handauflegung beim Opfer' in ZATW, 1901, p. 93 ff.) protests against the idea of the *manumissio*, and refuses to separate the שְׁמִיכָה of sacrifice from that of blessing and of installation in office (Nu 27^{18, 23}, Dt 34⁹). What is in view, he holds, is the conveying of a substance from one party to another—in the case of the sin-offering, the conveying of sin, uncleanness, and curse to the sacrificial victim. But how then could the flesh of the sin-offering have been counted most *holy*, and been directed to be eaten by the priests in a holy place (Lv 6^{18ff.})? Volz meets this objection by supposing that the sin-offering was meant originally not for Jahweh but for demons hostile to man, and that the שְׁמִיכָה was then transferred from the sin-offering to the other offerings as well. On the other hand, Matthes (art. 'Der Sühnegerade bei den Sündopfern' in ZATW, 1903, p. 97 ff.) rightly contends, in opposition to Volz, for different kinds of hand-imposition. Bertholet's proposal (Com. on Lv 14) to start from Lv 24¹⁴ and to explain the שְׁמִיכָה of sacrifice as the 'establishing of a solidarity between offerer and offering,' comes in the end to the same thing as the *manumissio* interpretation, only that, according to Bertholet, the fundamental notion of the *communio* is meant here again to find expression.

treated as most holy and serves as holy food for the priests.

In view of all this, in the mind of P there could be no other answer to the question as to the efficacy of sacrifice, but simply this: God has connected the accomplishment of atonement with the obedient discharge of the sacrificial prescriptions; whoever fulfils these and gets the priest to perform the atoning usages, is forgiven (Lv 4²⁰, 26, 31, 35 and oft.). The ritual, especially the prescribed presenting of the blood, is accordingly the indispensable condition of atonement, but is not yet exactly synonymous with the latter. On the contrary, the forgiveness of sin flows from the grace of God exactly as in the Prophets, only that the latter regard the outward offering as a thing that may be dispensed with, provided the true penitent disposition is present, whereas, according to P, it is imperatively required that this disposition be accompanied by its outward manifestation in the shape of an offering. Even from the point of view of linguistic usage, the difference between the prophetic and the priestly view of atonement is characteristic. According to the prophets (cf. above, p. 689*), God Himself covers the sin, i.e. He declares it invisible, so that the sinner is safe from the wrath of God, whereas, according to P, the priest covers the person of the sinner by means of presenting the blood [only in exceptional cases also through an unbloody offering, Lv 5^{12a}], so as to shield him from the destroying holiness of God.

The circumstance that the process of atonement is primarily connected with the presenting of the blood, explains itself naturally as a powerful after-influence of primitive sacrificial usages, in which the sprinkling of the blood had a different significance. The latter is no longer in the mind of P; for even the view is untenable, that the blood, being the seat of life, is regarded as the most precious gift which man can offer. At most, we might hold that P has still the idea of a symbolical (not real) satisfaction, or, in other words, the notion that, through the offering of the life of the animal, *symbolical* expression is given to the acknowledgment that, strictly speaking, the sinner's own life is forfeit to God. But the main idea continues to be, as already noted, this: 'thou shalt procure atonement in this and in no other way, because God has so commanded it.'

(β) The technical questions connected with the sacrifices may here be passed by. Their various degrees of value come out clearly in the order in which they have to be offered in all cases where a number of different kinds of sacrifice are combined. (i.) The first place is always held by the *propitiatory* offerings, which include two species: the *sin-offering* (חטאת) and the *guilt-offering* (עולה). The difference between the two is not very easy to determine from the descriptions contained in Lv 4f. Both are presented even in the case of unintentional and even unconscious offences; but the guilt-offering (Lv 5^{15a}) has very largely to do with occasions when one has unconsciously (vv. 15, 17) or consciously (v. 20a, [6^{12a}]) interfered with the property of another, whether God or one's neighbour. The guilt-offering (in the shape of a ram without blemish) is always coupled with restitution of what has been wrongly taken, with an additional fifth of its value. Of sin-offerings the holiest and most important are naturally those presented on the Great Day of Atonement (Lv 16), when the blood of the victims is brought by the high priest into the Holy of Holies, and thus into the immediate presence of the Divine form of manifestation whose seat is the sacred Ark. It is quite a unique feature that in this instance P introduces, along with the customary atoning medium of sacrifice, another, perhaps very ancient,

form of propitiation, namely, the loading of the 'goat for Azazel' with the sins of the people by the high priest, and the sending of this goat away to 'Azazel into the wilderness. The interpretation of the name 'Azazel' is disputed; it may mean either 'the apostate' or 'the one who takes away [sin].' Only, there can be no doubt of this, that a personal being must be intended, for in v. 20a, he is expressly opposed to Jahweh; and it is equally clear that he is thought of as an unclean demon dwelling in the desert (or as the prince of the demons that dwell there?). The sending away of the goat to him is simply an act symbolical of the cleansing of the sacred God-consecrated soil from sin and guilt (cf. the precisely similar example of a symbolical removal of uncleanness in Lv 14⁵³); sin and guilt are sent off into the unclean wilderness to the demon with whose character they correspond. It would be quite wrong to discover in P's recognition of 'Azazel any tendency to dualistic conceptions. 'Azazel is not a power hostile to Jahweh, a power to be in any way compared with Him, but simply a demon, standing outside the theocracy, but none the less on that account subject to Jahweh, the almighty Creator and Ruler of the world (see, further, art. AZAZEL in vol. i.).

There is a widely diffused notion that P regards propitiatory offerings as effectual only in the case of unintentional or, at most, hastily committed sins. This view is based upon Nu 15^{22a}, where in point of fact a distinction is expressly drawn between unwitting offences and those that are committed 'with a [defiant] high hand.' It is only for the first of these that the propitiatory usages have efficacy. The man who sins wilfully is guilty of blasphemy against Jahweh, and is to be cut off without pity (v. 30a).

Such is indeed the theory of this passage (Nu 15^{22a}), but it is impossible to regard it as the meaning of P everywhere.* How could it have failed to be seen that, if every wilful transgression was to be punished by cutting off the offender, the undeniably universal sinfulness of man would have speedily led to the extinction of the whole nation? But such a reflexion as this was unneeded. The offences enumerated in Lv 5^{20a}, [Eng. 6^{12a}] as calling for guilt-offerings (denial of a deposit, or of the finding of a lost article, perjury, extortion) surely do not belong to the category of unwitting or hastily committed sins. It may be added that the Psalms also furnish on almost every page evidence that even in the post-exilic theocracy the belief of the prophets in a grace of God which can take away even heinous guilt has not died out.

(ii.) A stage lower than the propitiatory offerings

* The result of such an assumption would be that the notion of atonement (and forgiveness of sins) is not really taken into consideration at all by P. This conclusion is drawn by A. Ritschl (*Lehre von der Rechtfertigung und Versöhnung*, ii. 3 [1882] 68 ff., 184 ff.), according to whom the 'covering' (*kappara*) needed was not against the wrath of God on the sinner, but against the destroying majesty (holiness) of God, to which man, owing to his creaturely weakness, could not otherwise draw near. The procuring of the *kappara* [Ritschl would prefer to see the term 'atonement' avoided here] is thus simply the condition of safely approaching God with an offering, and always implies the undisturbed continuance of the covenanted grace of God, without which no sacrifice is possible. But, quite apart from the oft-recurring (Lv 4²⁰, 26 etc.) formula 'and he shall be forgiven [after the atoning acts have been performed],' the theory of Ritschl is shattered by the fact that the 'covering' of the man by the priest is, of course, only the later transformation given to the prophetic formula, according to which God covers the guilt. In both cases the point is that the *guilt* is to be declared powerless—in other words, it is an atoning act that is in view. Cf., further, on the whole question, A. Cave, *The Scriptural Doctrine of Sacrifice and Atonement*, Edinburgh, 1890; A. Schmoller, 'Das Wesen der Sühne in der alttest. Opferthora' (SK, 1891, p. 205 ff.). Stade's definition (*Geschichte Israels*, ii. 57), 'Atonement means reconsecration or restoring, by means of rites, a sacred character that has been lost,' while it is quite applicable to a great many cases, needs, in view of what is said above, to be enlarged.

stands the *burnt-offering* (חֹטֶת) or whole-offering (זֶבַח). But, as wholly belonging to Jahweh, it retains a higher significance than the meal-offering. At one time presented also as a propitiatory offering, it has in P the significance of a general 'adoration offering,' a testimony to the normal relation between Jahweh and the people. Hence it has its place after the propitiatory offerings, since the latter are appointed for the purpose of removing any disturbance of the normal relation. But, even unprecedented by propitiatory offerings, the burnt-offering may be presented as a dutiful expression of absolute dependence on the covenant God, and of the consciousness of owing all blessings to Him. Thus we find it especially in the form of the so-called חֲזָקִי or 'continual' offering, i.e. the offering every morning and evening of a yearling lamb, along with food-offering and drink-offering (Ex 29^{38ff.}, Nu 28^{3ff.}). On the Sabbath (v. 9^{f.}) and still more at the New Moon (v. 11^{ff.}) this regular offering undergoes material enlargement.

(iii.) A third species of offering meets us in the *meal-offerings* (מִנְחָה) Lv 3, 7^{29ff.}, of which the fat is burned, the blood sprinkled on the altar, the breast 'waved' * and given along with the right leg (as a so-called *têrûmâh*) to the priests, while the rest of the flesh is eaten by the offerers. A special branch of the *shêlāmîm* is supplied by the 'thanksgiving offerings' of Lv 7^{11ff.}. But to P all *shêlāmîm*-offerings are only offerings of the second rank, since they are not appropriated by Jahweh (i.e. the priests) alone, but are meant to be consumed also by the laity—in other words, are destined for profane use. The small value attached to the meal-offering by P as compared with the place it still holds in Deuteronomy (cf. above, p. 661) is explained by the completely changed conception of the cultus which had already been produced by the programme of Ezekiel (45^{17, 22} etc.). The private cultus that once prevailed, whose central point was the joyous sacrificial meal, has now been displaced by the official cult performed with scrupulous regularity by the priests † in the name (it might be without even the presence) of the theocratic community. It was quite in the spirit of the Priests' Code, that when the temple square was stormed by Pompey the priests continued unflinchingly the performance of their functions until they were cut down at the altar; and that during the siege by Titus the daily burnt-offering was continued morning and evening even after the city had long been brought to the extreme of famine.

We pass over all further prescriptions regarding festal offerings and freewill services, and content ourselves with noting the fact that *all* directions regarding holy places, times, persons, and actions have ever in view the *one* aim of realizing the idea of a God-consecrated people, the fact of its absolute dependence upon Him, and the necessity of ever renewed surrender to Him. It is quite possible that, in the working out of the system in detail, Babylonian ‡ influences may have co-operated;

* This waving (lit. 'swinging') of the offering or part of it denotes, according to what is surely the right interpretation, a moving backwards and forwards in the hands, the priest making as if he would cast the offering into the altar flame, but ending by taking it back as food assigned by God to the priests. A different explanation is given by Philo (in a fragment of his treatise *de Victimis*, edited by Wendland in 1891), who holds that the waving of the offering consisted in holding it up towards heaven.

† According to the list of offerings in Nu 28 f., the number of official sacrifices amounts yearly to 115 young bullocks, 1100 lambs, 38 rams, and 32 goats, besides the food- and drink-offerings pertaining to them.

‡ On this point cf. especially P. Haupt, 'The Origin of the Mosaic Ceremonial' in *John Hopkins University Circular*, xix. No. 145 (Baltimore, 1900), in which a Babylonian origin is claimed even for חֹטֶת, זֶבַח, and נֶסֶךְ; and the same author's art. 'Babylonian Elements in the Levitic Ritual' in *Journ. of Bibl. Lit.* xix. i. 55 ff.

but in any case these are so incorporated with, nay even subordinated to, the theocratic fundamental ideas, that they are no longer felt to be a foreign element, hence requiring to be considered less from the standpoint of Biblical Theology than from that of the History of Religion in general.

5. On the other hand, we have still to answer another extremely important question, namely, as to the *ethical system* upon which P builds, and which he desires to see realized. What ideal of morality floats before his mental vision, and by what means does he aim at realizing it?

In dealing with these questions it is necessary at the very outset to repel a charge which, for reasons that are readily intelligible, is often brought against P, namely, that moral commands proper recede in his pages so far behind ritual ordinances that they seem to possess no importance at all. But we must not forget that P represents the close of a long development in the course of which the moral demands of the prophets, at least after the introduction of Deuteronomy, had long become flesh and blood in the case of the better portion of the people—certainly of all who accepted the future hope. It did not appear to P to be necessary to emphasize these demands afresh, seeing that in the form of the Decalogue they had long been a common possession of the people. Moreover, there is not wanting, at least in the Law of Holiness (Lv 19 and 20), a collection of a whole series of essentially moral commands, although these are for the most part amalgamated in a remarkable fashion with ritual prescriptions (cf. e.g. 19^{3ff.}, 19, 21^{f.}, 23^{ff.}, 27^{f.}), and the way in which humanitarian prescriptions, like those contained in 19^{10f.}, 13^{f.}, are based upon the motive of the fear of God (see especially vv. 14, 32) more than once vividly recalls Deuteronomy. The same remark applies to the exhortations to the strictest impartiality in judicial decisions (vv. 15, 35), and to absolute honesty in business and uprightness of life (vv. 11, 13a, 36). Besides, v. 33^{f.} contains not only a prohibition against oppressing the *gêr*,* but a command to love him as oneself. On the other hand, however, it cannot be disputed that the concept 'neighbour' in vv. 16, 18 is restricted solely to one's fellow-countrymen. Amongst other instances, this comes out clearly in the prohibition to treat Israelites as slaves: the heathen and even settlers in Israel may be purchased as slaves and bequeathed as such to one's children, but not so with Israelites (Lv 25^{44f.}). Everything of heathen origin is *eo ipso* unclean, and hence so far beneath Israel that the latter recognizes no consideration or equal rights as belonging to it. Deutero-Isaiah's thought of Israel as having a missionary function to discharge to the heathen appears to be completely forgotten.

But, if we cannot thus speak of moral duties towards non-Israelites (with such exceptions as the general prohibition of murder, Gn 9^{5f.}, and the above-mentioned kindly recommendation of the *gêrîm*, Lv 19^{33f.}), it is true that otherwise the ethical system of the prophets may be regarded as binding for P. Only, in his estimation, the moral ideal is not exhausted in the fulfilment of specially *ethical* demands, but he places along with these, at least upon the same level, if not upon a higher one, regulations as to the cultus—nay, purely external, ritual requirements. Here, if anywhere, we see that P sets before him the realizing of the system sketched by Ezekiel. The aim to which every other interest must give way is the setting up of a pure God-consecrated people;

* By the *gêr* here is evidently to be understood not a heathen but an Israelite of another tribe or family, or even a foreigner who has settled in Israel and become completely incorporated therewith; cf., on this controverted question, Bertholet, *Die Stellung der Israeliten und der Juden zu den Fremden*, Freiburg, 1896.

but this is achieved, not primarily, as in the view of the prophets, by circumcision of the heart, but by means of all the countless purifying and atoning acts prescribed by the Law for every conceivable case (cf. especially Lv 12 and 15). Neglect of these rules—even wholly unintentional and unconscious neglect—involves the same degree of culpability as a mortal sin does. The rigid consistency and outwardly mechanical character of this whole conception come out, above all, in the ritual of the Great Day of Atonement. The solemn propitiation made by Aaron with the goat of the people (Lv 16^{16ff.}) is intended, properly speaking, not for the people themselves but (vv. 16, 20) for the inner sanctuary, the Tent of Meeting and the altar—in other words, for things without life. Atonement on behalf of these for all the ritual transgressions and omissions of the people thus appears as the most important feature in the ritual of the Great Day of Atonement.

It can occasion no surprise that very depreciatory judgments have often been passed on P alike for his exclusiveness towards foreigners and his placing of moral and physical (ritual) purity on precisely the same level. The gulf between the religion of the Prophets—above all, of Deutero-Isaiah—and that of the Priests' Code has been described as one that cannot be bridged. That there is, in fact, a deep gulf between the two, and that this shows itself in P in the shape of a falling away from the pure level reached by the Prophets, are truths that need be denied all the less, seeing that the teaching of Jesus certainly attached itself to the prophets, and would have the Law interpreted only in their sense and spirit. Yet, if we would do justice to P, there are two things that must not be forgotten. In the first place, even his system did not exclude the possibility of viewing the revelation of the Divine will as a guide to real inward piety and morality, and of thus finding in it a means of joy and edification.* Many passages in the Psalms (1² 19^{8ff.}, and almost the whole of Ps 119) testify to this rejoicing of the heart in God's law. The period of *painful* attention to the observance of the Law first set in when the religion of Israel was seriously endangered by Antiochus Epiphanes. It was thought then that the anger of God could be appeased only by the strictest, most literal fulfilment of the Law, and the time of consummation be thus brought on. But the heavy burden of the Law was increased, above all, by the addition of the alleged oral tradition from Sinai downwards, the casuistry developed in Pharisaic circles, with its endless particular rules, which kept the Israelite who was loyal to the Law in momentary anxiety lest he had in any way incurred defilement and consequently heinous guilt.

But, secondly, it must not be forgotten that, in spite of its inferiority to the religion of the Prophets, the Law fulfilled an important mission in the course of the history of the religion of Israel as a whole. Experience had taught that the great mass of the people had proved themselves incapable of understanding and fruitfully assimilating the teaching of the prophets. Hence the latter had its place taken by another Divine paedagogic method—the discipline of the Law, with its ceaseless reminders of the immense distance between the holy God and the sinful uncleanness of everything creaturely, with its constant compelling of a lively sense of the need of forgiveness and atonement, and of the duty of a conscientious use of the prescribed means of propitiation. In short, the Law proved a *παιδαγωγὸς εἰς Χριστόν* (Gal 3²⁴) not only in the sense that it forced the recognition of the impossibility of attaining to righteousness before God by the works of the Law, but also that it was a school which taught absolute sub-

mission to the will of God and therewith sincere piety. And what an intensely religious life might be developed alongside of and under the rule of the Law, is witnessed by the last two groups of literature we have yet to consider: the religious Lyric and Elegiac poetry, and the remnants of the so-called *Hokhmāh* or Wisdom literature.

IX. THE RELIGIOUS LYRIC AND ELEGIAC POETRY (Books of Psalms and Lamentations).

If, in addition to the Prophets, only the Law had come down to us, a wholly inadequate, nay partially wrong, idea of the power exercised by the Prophetic religion would have been inevitable. But, fortunately, more than one literary product has survived, and amongst these the Psalms are, above all, fitted to guide us to a profounder judgment. In them is exhibited such a wonderful variety and intensity of the genuinely religious life, that our verdict must be that there is practically no trace to be detected of the serious danger that was called up by the complete equalizing of ritual obligations with specially moral duties, of physical with moral purity; nay, testimonies are not wanting to an express repudiation of sacrifice (see above, p. 686^b), i.e. of what is to P the most important element in the cultus.

The numerous critical questions connected with the Books of Psalms and Lamentations may here be entirely passed over (see article LAMENTATIONS in vol. iii., and PSALMS in vol. iv.). It may be that in the Psalms there still survive scattered relics of pre-exilic religious poetry, but in *that* form in which the book now lies before us it is a work of the post-exilic period* and may thus, in spite of all its variety of contents, be treated without hesitation as a harmonious whole, and a consistent witness to the faith and hopes of post-exilic Israel.

The question so much debated in recent times, who is to be regarded as the speaking subject ('*das betende Ich*') in the Psalms,† must undoubtedly, with Olshausen, Reuss, Cheyne, *et al.*, be answered very frequently in favour of the so-called *collective* subject, as against the almost uniformly *individual* interpretation of Ewald, Hupfeld, Duhm, *et al.* Reuss in particular has rightly argued that the endless complaints against cruel foes and persecutors can be felt to be intelligible and justified,

* What appears to the present writer the most probable view of the case is as follows. The oldest collection, Ps 3-41, was already formed in the time of Ezra; then, say towards the close of the Persian period, a second collection, made up of further (alleged) Davidic psalms (51-71), songs of contemporaries of David (42-49, 50, 72, 73-83), and a supplementary collection (84-89). The third collection (90-150) can scarcely have originated before the founding of the Hasmonean dynasty by Simon (B.C. 142 ff.). Psalms 1 and 2 were probably first prefixed by the final redactor of the whole Psalter, as a very appropriate prologue.

As to the Book of Lamentations, it may suffice to remark that the oldest components (chs. 2 and 4) are based upon quite fresh recollections of the destruction of Jerusalem in 587, whereas ch. 5 may belong to the 6th cent., ch. 1 to the 5th, but ch. 3 as late as the 3rd cent. B.C.

† On this controverted question, cf. R. Smend, art. 'Ueber das Ich der Psalmen' in *ZATW*, 1888, p. 49 ff. [where the idea of the collective subject is almost consistently carried through]; J. Z. Schuurmans Stekhoven, *ZATW*, 1889, p. 121 ff. [a partial modification of Smend's view]; G. Beer, *Individual- und Gemeindep salmen*, Marburg, 1894; F. Coblentz, *Ueber das betende Ich in den Psalmen*, Frankfurt, 1897; H. Roy, *Die Volksgemeinde und die Gemeinde der Frommen im Psalter*, Gnadefeld, 1897; D. Leimdörfer, *Das Psalter-ego in den Ich-Psalmen*, 1897; Engert, *Der betende Gerechte der Psalmen*, Würzburg, 1902. The last six of these insist with more or less emphasis that it is not the actual people that is to be looked on as the '*betende Ich*', but only the godly portion, which pines under the oppression of the enemy and prays and hopes for deliverance. They point out, further, that (altogether apart from psalms which are absolutely individual in their reference) even the psalms which represent the community, although spoken in the name of the latter, were primarily the work of a particular individual.

* Cf. Gunkel, *Ausgewählte Psalmen*, Göttingen, 1904, p. 22 ff.

may even touching, only if they are referred not to private affairs, but to the straits ever the same to which the godly community is reduced by heathen oppressors and by renegades within the nation itself. It would, however, be altogether an unjustifiable exaggeration to seek to refer practically all the Psalms to a collective subject—the godly community. On the contrary, for the proper appreciation of the Psalter, it is of the very highest importance to note that ‘individualism’ in religion, for which the way was paved especially by Jeremiah, already has clear expression given to it in many ways in this very book.* The numerous witnesses to the pining and striving of individual suppliants after living communion with their God, and to the blessed assurance of this communion, will alone explain how the Psalter has been able to serve even down to the present day as the prayer-book even of Christian nations.

1. *Conception of God.*—(a) As in exilic and post-exilic prophecy, the conception of God is seen in the Psalms occupying a height which could not be surpassed even on New Testament soil except in a few points. The solity of Jahweh (18³²), the impossibility of comparing Him with any other being, the utter nothingness of idols (115^{4ff.}), are to the psalmists axioms which need no proof. As Creator of the world (24^{1ff.}, 74^{16f.}, 95⁴, 104^{2ff.}, and often), and that by the simple word of His power (33⁶⁻⁹), He is at the same time also the absolute Ruler of the whole (33^{14f.}, 46^{7-9ff.}, 47^{2ff.}, 65^{6ff.}, 66⁷, 82⁸, 103¹⁹, 113⁴). He glorifies Himself continually in inanimate nature (8^{4f.}, 19^{2ff.}; in 29^{3ff.} by the majesty of His thunder); hence it is summoned, as well as living creatures, to praise Him (148^{3ff.}). Above all, wonderful appears His condescension to man, who by himself is so weak; He has constituted him only a little short of the nature of Divine beings (8^{6ff.}, with a manifest allusion to Gn 1^{2ff.}). The care of God for His creatures is evidently not separated, after the manner of Christian dogmatics, from the work of creation and classed as a preserving and governing, or even thought of as a continued working of laws of nature once established; but consists in ever renewed, independent creative acts of an actively ruling God (65^{1ff.}, 104^{13ff.}, 27¹, 145^{13f.}, 147^{8f.}).

(b) The solitary limitation of the being of God which in itself is absolutely without limits, which might be discovered, would be the frequent mention of His heavenly dwelling-place (11⁴, 14², 20⁷⁽⁶⁾, and very often). But this form of spatial limitation could not be dispensed with by the conception of God, even at its highest reach, if it was to escape the danger of being dissipated into pantheism. The no less frequent allusions to Zion as God’s abode and the starting-point of His action (20³⁽²⁾, 50², 68¹⁷ etc.) does not, as we have already had occasion to explain, contradict in the least the idea of the God of heaven. Heaven is His throne, Zion the place of His revealed presence, which is not identical with His most essential being. The magnificent description of the theophany in Ps 18^{8ff.}, where God mounts the cherub and thus flies abroad, belongs to the domain of poetic licence, equally with His appearing from Sinai in 68¹⁸.

(c) On the other hand, it might appear strange that we still meet in the Psalms with traces of a *theologoumenon* with which we have already (above, p. 684^b) made acquaintance in Dt 4¹⁹ as well as in Dn 10 (see above, p. 714^b). We refer to the idea of under-gods (*bēnē ’ēlōhīm* or, shortly, *’ēlōhīm* or *’ēlīm* ‘gods’; even *bēnē ’ēlōhīm* does not mean ‘sons of gods,’ but ‘those who belong to the category of *’ēlōhīm*’), who, either independently,

although commissioned by Jahweh, rule over the heathen peoples (so with the star-gods in Dt 4¹⁹ *), or under the ægis of Jahweh take their part as a kind of vassal kings in the government of the world. Only in this sense are we to explain not only the *שָׂרִים* or ‘princes’ of Dn 10, but also the *אֱלִים* [so read for the corrupt *אֱלִים* of Ps 58² and the *אֱלִים* of 82¹⁻⁶ v. *בְּנֵי עֲלִיּוֹן* ‘sons of the highest’]. In both passages the injustice and partiality of their rule are complained of,—alluding, of course, to the treatment of Israel by heathen peoples,—and in 82⁷ they are even threatened with death after the manner of man, by way of punishment for their conduct. This last passage shatters all possibility of explaining these *אֱלִים* as human judges; to ‘die like men’ is possible only to those who in themselves are immortal. Now, even although it cannot be denied that in the whole conception of these under-gods we have a manifest after-effect of the belief in the reality of the former gods of the nations, yet the idea is so incorporated with and subordinated to Jahwism that it is impossible to regard it as a survival of the once prevailing Henotheism or even of a former Polytheism. The same complete welding of originally heathen *mythologumena* with Jahwism is met with also in 74^{13f.} and 104²⁶, with their allusions to the subduing of Leviathan; and in 89¹¹⁽¹⁰⁾, with its crushing of Rahab.†

These same under-gods of Ps 58 and 82 are, beyond doubt, intended also by *אֱלִים* of 86⁸, 95⁹, 96⁴, 97⁷⁻⁹, 135⁵, 138¹ and the *אֱלִים* of 29¹ and 89⁷, over whom Jahweh is absolutely exalted. Distinguished from them, we have in 103^{2ff.}, 148² the angels (*מַלְאָכִים*, lit. ‘messengers’), who surround the throne of God offering praise, or, sent by Him, stand by the side of the godly to protect him (34³, 35^{1ff.}, both times ‘the angel of Jahweh,’ but certainly not now in the sense of a self-manifestation of Jahweh [cf. above, p. 639³]; 91^{11ff.}). The idea of a heavenly council includes also ‘the holy ones’ (i.e., as elsewhere, those who stand in the closest relation to God, not those who are morally perfect) of Ps 89^{7ff.}. The angels, again, who bring misfortune (78⁴⁹), being sent by God to punish, are not morally wicked beings or even hostile to God, but are simply ‘angels of evils’ (*מַלְאָכֵי רָעָה*), i.e. such as are sent by God to bring trouble upon sinners.

(d) The so-called *attributes of God*, or, to be more correct, the various sides on which His one being displays itself, are never with the Psalmists the subject of metaphysical speculation, but are always put forward only with a specifically religious interest—at one time for the warning, at another for the consolation, of the godly. The Eternity of God is the pledge that He can be a true refuge to His people (90^{1ff.} 4). His Omnipotence has proved itself alike in creation and in the directing of history (115³, 135⁶). His Unchangeableness sets the nothingness of all created things in its true light: heaven and earth shall decay, and He shall change them like a garment, but He Himself remains unchangeably the same (102^{26ff.}). His Wisdom has manifested itself, above all, in the work of creation (104²⁴), but in other matters too the depth of His thoughts awakens wondering admiration (92⁶⁽⁵⁾, 139^{17f.}). His Omniscience extends to every action, however trifling, and every thought of man (139^{1ff.})—a salutary warning to him; for even the most secret depth of the heart is open to Him (7¹⁰⁽⁹⁾, 44²²⁽²¹⁾). And when it is said in 139^{9f.} that He takes cognizance even of the embryo in the womb, and that

* The same idea is certainly present when we read of the fixing of the bounds of the peoples according to the number of the *bēnē ’ēlōhīm* (Dt 32⁸, reading, with the LXX, *בְּנֵי אֱלִים* for the *בְּנֵי שָׂרִים* of MT).

† Cf. above, p. 670^b f.

* Cf. the articles of Sellin on ‘Das Subject der altisraelitischen Religion’ in *Neue kirchliche Zeitschrift*, iv. (1893) Heft 6, and v. (1895) Heft 4.

the span of life and perhaps also the fortunes of the individual in question are written in His book, this is certainly to be understood not in the sense of a rigid predestination, but only as implying that absolutely nothing can evade the knowledge or thwart the will of God. Similarly, His Omnipresence (139^{7ff.}) is described not (pantheistically) as that of His substance, but of His knowledge and His power, in order to check at the outset all thought of escape from Him. His moral Perfection comes to view in His horror of sin (5^{5ff.}), His Righteousness in His attitude not only to His own people (7¹² 11⁷ 33³ etc.) but to heathen nations as well (9⁸). But, naturally, the largest space is occupied in the psalmists' descriptions by such attributes of God as His Love, by the praise of His inexhaustible Grace and Compassion, His Long-suffering and Truth (86¹⁵ 103^{8ff.} 36^{6, 8}). In His Goodness all His creatures may take comfort (33⁶⁽²⁾ 145^{8ff.}); but, above all, He shows Himself 'the Father of the orphan and the Provider of the widow' (68⁸⁽²⁾ 146⁹). It is noteworthy that, apart from this application of the name 'Father,' the idea of the Fatherly love of God, which forms the central point of the NT conception of God, meets us only once more (Ps 103¹³), and there only in the form of a comparison, not to speak of its being manifestly restricted to Israel—another of the evidences that the OT conception of God was capable of enlargement in one very important direction.

2. *Anthropology outside the sphere of Jahwism proper.*—In the judgments passed in the Book of Psalms on the purely human, we find, side by side with panegyrics on the lofty pre-eminence of man in his lordship over creation (8^{4ff.}, see above, p. 724^a), lamentations over the weakness and transitory nature of everything human (33^{16f.} 62¹⁰ 103^{14ff.}; 144³ 'Man is like a breath, his days are as a shadow that passeth away'). This lament applies to even the strongest (146^{3ff.}). And when the life—all too short—comes to an end (39^{5ff.} 90^{10, 12}), dark *She'ol* (see above, p. 668f.) awaits the departed, and cuts him off finally from all relation to the upper world, and above all from the blessings of the theocracy or the praise of God (6⁶ 30¹⁰ 88^{13ff.} 115¹⁷). None can escape this fate (89⁴⁸). It is true that at times the sense of close fellowship with God (see below) reaches a height and a strength which seem to leave only a short step to the conviction that true fellowship with God must of necessity be enduring and extend beyond the present life;* but this step is never definitely taken. Only as a 'stranger and a sojourner' does man continue with God during his earthly walk (39^{13(12)f.}), at death the bond of connexion is severed for ever. In this matter, if anywhere, it is clear what a power and stimulus must have belonged to faith in the God of Israel, seeing that, even without the hope of immortality, it could produce fruits of such intense religiousness as we find in the Psalms (and Job). The question whether there are not really to be found in the Psalms traces of the hope of a continued existence, will have to be discussed when we come to speak of the eschatological expectations.

The physical weakness of man finds its analogue in his moral weakness. When in Ps 51⁷⁽²⁾ the latter is traced back to his generation and birth by sinful parents, this is not intended, of course, to mean that generation and birth are of themselves sinful.

The whole statement amounts to a plea that God would judge leniently one who, as sprung from sinners, necessarily carries within him from the womb a sinful habit and sinful inclinations. It is only in the latter sense that the statement can be called a contribution to the doctrine of original sin. There is not the faintest reference to an imputation of Adam's guilt—the very kernel of the dogmatic doctrine of original sin.

3. *Nature and history of the Theocracy.*—The idea of an election of Israel to be God's own people is firmly held also by the Psalmists (33¹² 74² 135⁴), and it cannot be doubted that here again this conviction carried with it the serious danger of national conceit and a mischievous disposition to look down on all other peoples—a danger which threatened to stifle completely the existence of those great thoughts of Deutero-Isaiah regarding a missionary vocation of Israel to all the heathen. It is true that this conceit was materially diminished by the honourable confession that Israel has almost always shown itself unworthy of the Divine choice and the great acts of Jahweh in connexion with the deliverance from Egyptian bondage (77^{16ff.} 78^{4, 11ff.} 106^{7ff.}). It is the well-deserved anger of God that has given Israel over to the powerful oppression and the savage mockery of her enemies (La 2^{1ff.} 21^{ff.} 4¹, Ps 22^{7ff.}, and numerous other passages). Israel heeded not the threatenings of Jahweh repeated from the days of old (La 2¹⁷), but allowed herself to be deceived by false prophets and priests (La 2¹⁴ 4¹³). But in spite of all this the Divine covenant is assured for ever (Ps 105⁸ 111⁹); and thus to those who humbly submit themselves to Him the day must come when all the comforting promises of days gone by shall be fulfilled (La 3^{21ff.}). The principal expectations attached to the theocracy of the future will come out in the section devoted to the Messianic hopes.

4. *The theocratic institutions.*—There are a great many passages in the Psalms, in which touching and powerful expression is given to high esteem for the temple as the place of Jahweh's gracious presence, and to longing after the beautiful service conducted there (5⁸ 26⁸ 27⁴ 43^{3ff.} 65⁵ 84^{2ff.} 111^{6ff.} 122^{1ff.}). But it would certainly be an error to discover the principal motive of this longing in joy in the cultus in the narrower sense, i.e. in the sacrificial performances. Against such a supposition there is not only the fact that mention of sacrifice is extremely rare (20⁴ 54⁸ 66^{13ff.}; in 141² it is only symbolical sacrifice that is in view), but it is well known that there are not wanting in the Psalms passages in which the necessity of sacrifice and its acceptableness to God are repudiated in the most unqualified terms, and not without a touch of sarcasm (40⁷ 50^{8ff.} 51¹⁸ 69³²; see more fully, above, p. 686^b). We must hold then that the piety of the psalmists occupies in general a higher level than that of the framers of the Priests' Code. Their joy in the beautiful service of the temple was evidently derived primarily from what appealed to the heart and the feelings: the festal processions, the prayers and benedictions of the priests, and, not last, it may be presumed, the temple music and singing (to which last the greatest care seems from all accounts to have been given). All this is supported by the circumstance that the (not very frequent) praise of the Law (1² 19^{8(7)f.}) is probably everywhere intended for the specifically moral (so quite clearly in 19^{2ff.}) commands and not for the Ceremonial Law. Even the endless utterances—most of quite a general character—in Ps 119 as to the value and efficacy of the Divine commands show at times (so vv. 9, 36, 133) that what they have in view is the moral content of the Law.

5. *The character of the religion of the Psalms.*—If a *sine quâ non* of all true religion is a sincere

* Thus R. H. Charles (in the second chapter of his *Critical History of the Doctrine of a Future Life in Israel, in Judaism, and in Christianity*, London and New York, 1899) discovers in Ps 49, 73, as well as in the Book of Job, approaches to an immortality doctrine—an individual eschatology which finally (according to ch. 3) combined with the popular eschatology to form the doctrine of the resurrection (cf. below, p. 725^a note; and the later article of Charles, 'The Rise and Development in Israel of Belief in a Future Life,' *Expositor*, Jan. 1903, p. 49 ff.).

confession of sin, then the religion of the psalmists has undoubtedly a firm basis. In addition to the ready admission of the general guilt of the people, of which we have already spoken, there are not a few testimonies to the impossibility of all attempts of one's own to attain to a righteousness which can bear to be tested by the eye of a holy God (38¹⁹ 51^{3a} 130^{1a} 143⁷, La 1⁵ 8. 14. 18. 22 33^{9a}. 46^{5b}), as well as evidences of a tenderness of conscience which feels concerned even about unconscious sins (Ps 19¹³ 90⁸) and sins of youth (25⁷), and prays God to forgive them. It is only rarely that we still meet with outbursts of self-righteousness, showing itself in a disposition to boast of one's minute observance of the Law (17⁵ 18^{24a} 44^{18a}), and even to complain that God, notwithstanding all this, delays to help His people (44^{10a}). No less surprising, and quite opposed to the usual language of the Book of Lamentations, is the complaint of La 5⁷ 'The fathers sinned, and we bear their guilt.'

More than once we meet with an almost evangelical perception in what is said about the forgiveness of sin. The Apostle Paul was thoroughly justified (Ro 4^{6a}), in using Ps 32^{1a} as a Scripture proof that the blessedness of a conscience at peace with God is based not upon any merit of works, but upon the fact that God in His grace does not impute guilt (cf. also Ps 103^{3a}, esp. v. 8^a).

To those, again, who are ever mindful of their constant need of fresh grace, who are 'of a broken heart and contrite spirit,' Jahweh is near (34¹⁹ 51¹⁹), and creates in them—for an actual new creation is needed—a clean heart and a new, right spirit (51¹²). He teaches them to recognize in God the highest, yea the only, good (16²), the source of all true spiritual life and all real light (36¹⁰); He awakens in them an inextinguishable longing for blessed peace in God and the closest fellowship with Him, and provides for the full satisfying of this longing. Sayings like those of 16⁵ 8^a 42^{2a} 63² 73^{25a} 143⁶, and, above all, the noble words of 131^{1a}, have found a perfect echo even in Christian hearts all through the centuries.

(a) A fruit of such fellowship with God is a life of *prayer* (supplication, thanksgiving and adoration) of inexhaustible variety and intimacy. Examples of this it is all the less necessary to quote, since the whole Psalter is *one* witness to this fact. A single remark may, however, be made. How petty and empty appear all those philosophical and theological discussions about prayer as an attempt to interfere with the unalterable predetermination of God, when compared with the grand simplicity and inward certainty of the praying psalmists! Their hearts have no room for such considerations. No doubt they, too, feel the manifold mysteries of the course of things in this world, and are plunged by them into doubt and unrest. Nor are they strangers to impatience, nay, at times, even displeasure, on account of the delay of Divine aid and the seeming silence of God in presence of violence and injustice. But in the end the certainty forces its way that the omnipotence, the wisdom, and the righteousness of God must triumph over all unreason and unrighteousness. And the conviction that prayer, the indispensable nourishment of the soul, is more precious than aught else (92^{2a}), and that God is ever near to them that call upon Him (145^{18a}), is placed at last beyond the reach of doubt.

(b) A further fruit of this spiritual life in and with God shows itself in the disposition which recognizes all the actions and the whole lot of the godly to be absolutely dependent upon the wise and gracious will of God, and which is therefore prepared in all things to give the glory not to man but to God alone (115^{1a}), and to expect all things from His blessing alone (127^{1a}). The Psalm pas-

sages, in which an inflexible confidence in the wise and loving guidance and protection of the godly finds touching and often typical expression (e.g. 34^a 51^{2a} 23^a 27^{1a} 91^a 118^{6a} 121^{1a}), have in all ages retained their place even in Christian hearts as forms of prayer which possess inexhaustible living power.

6. *Morality*.—After what we have had to say about the attitude of the Psalmists to the cultus, and about the character of their religion, we could not but expect that their moral disposition would show itself in a corresponding form. The testimonies to this can hardly be called numerous, if we leave out of account the endless complaints against the heathen and against faithless fellow-countrymen [the latter being for the most part referred to in the term גִּימְרִים or 'ungodly']. The contents of these complaints point of themselves to the opposite as constituting what is right and moral. Of more importance, however, are the passages in which we find positively, as it were, set up an ideal of the life that is truly moral and well-pleasing to God. It is noteworthy in this connexion that in almost all these passages (15^{1a} 24^{3a} 34^{13a} 101^{1a}; in a negative form in 50^{16a}.) the strongest emphasis is laid upon those requirements, inattention to which had furnished the main occasion for the denunciations and complaints of the prophets: honesty and truthfulness, above all in judicial cases which might issue in endangering the rights of the poor and the weak.

A dark shadow is undeniably cast on this attractive picture by those outbursts of sometimes passionate longing for revenge that are found in the so-called 'imprecatory psalms' (41¹¹ 58¹¹ 109^{7a}, and esp. 137^{8a}; cf. also La 1^{21a} 36^{1a} 42^{1a}). The expedient of declaring that the objects of hatred and revengeful longing in these passages are not persons but the cause they represent, their hostility to God and His kingdom, is utterly untenable in view, for example, of Ps 137^{8a}. We have simply to acknowledge that there is not to be detected here the slightest breath of the spirit which inspires the words of Mt 5^{44a}. And, however readily we may concede that such utterances are partly intelligible as the cry of distress of a people long enslaved and maltreated, and that on that account they are in a measure excusable, they still continue to be at the same time instructive witnesses to the fact that in the OT, side by side with the word of God, the disposition and the voice of the natural man may still be remarked.

7. *The doctrine of retribution*.—The problem ever raised afresh by experience, namely, how the actions and the fortunes of men are related to one another, had already, as we saw above (p. 689), engaged the attention of the later Prophets, and had led first to the conclusion that no one has to pay the penalty of another's guilt, but only his own. But in proportion as the place of the old popular religion, which had regard almost exclusively to the nation as a whole, had its place taken by an interest in the religious individual, the question always became a more burning one,—in view of the complete absence of any hope of a compensatory process in the world beyond,—how the sufferings of the godly and the prosperity of the wicked were to be reconciled with faith in a Divine, and thus absolutely righteous, rule of the world. At first the Psalmists, too, abide by the simple postulate, which appears to be imperatively required by the conception of God, and which the very first psalm states in the sharp antithesis, 'Happiness to the righteous, woe to the wicked!' The description of the happiness of the godly (23^a 92^{13a} 112^a 128^{1a}.) is presented in such beautiful pictures and with such definiteness that there appears to be no room left to raise the problem above referred to. But it was impossible

117¹ 138^{4f}. 148¹¹) may quite well be understood in the sense of readily confessing the superior power of Jahweh and the consequent necessity of submitting themselves to serve Him. The same may be the meaning also of passages like 86⁹ 96^{7d}. 102¹⁶. 23, and certainly of 68^{30f}. 72^{9a}. The gifts brought to the temple by the kings of the heathen are simply the tribute offered by them in testimony of their subjection to the supreme God. In view of all this, it cannot be denied that here again we may mark a falling from the level of prophetism down to specifically Jewish particularism.

9. *The question of personal immortality.*—An old controverted question still remains to be dealt with: Are there to be found in the Psalter—in spite of what was said above about *She'ol*—passages in which expression is given to the hope of individual immortality? We here leave out of account passages like Ps 31⁶ or 49¹⁶, which are put out of court by a correct exegesis [in Ps 31 all that is needed to do this is v. 16]. On the other hand, it deserves to be seriously considered whether 16^{10a} speaks only of preservation from sudden death and not rather from death altogether, namely, through living to see the Messianic time (cf., for this expectation expressed in Is 25⁸, above, p. 713³). And no less may it be considered whether in Ps 17¹⁵ we are not to think of an awakening in like manner to enter upon the enjoyment of the Messianic age (in the sense of Is 26¹⁹). In that case we should have a parallel to the resurrection hope expressed in Dn 12² (see above, p. 715^a).^{*} But these two passages in the Psalms would thus stand so isolated, besides being of so doubtful interpretation, that we must be content, after all, to return on the question at issue a verdict of *non liquet*.

X. THE SO-CALLED HOKHMĀH (WISDOM) LITERATURE (Proverbs, Job, Ecclesiastes).

The earliest trace of the 'wise' as a separate professional class is found in Jer 18¹⁸, where they are placed side by side with the priests and prophets as possessors of 'counsel,' i.e. ability to select the best course in particular cases. They also appear frequently as a separate class in Proverbs (1⁶ 13⁴ 22¹⁷ etc.; cf. also Ec 12¹¹), above all as teachers of youth (1⁴ 2¹ 3¹ 4¹. 10 etc.). This is quite compatible with the fact that they are likewise (in part, perhaps, exclusively) to be conceived as writers. And, since in the period to which the creations of the *Hokhmāh* (חֻכְמָה) belong it is impossible to speak of authorship beyond the limits of the religion of the Law, the 'wise' ought in the main to be identified with the 'scribes'; only, they rather represent a particular side of the scribes' activity,—not the fixing of the letter of the Law, or instruction in its punctual observance (e.g. in matters of cultus),—but the useful application of the specifically ethical content of the Law and of

^{*} Cf. the literature cited on p. 668^a, and add F. Schmidt, *Der Unsterblichkeits- und Auferstehungsglaube in der Bibel*, Brixen, 1902. We may take this opportunity of remarking that we do not consider that proof has been given of the influence of Parsism on the rise of the Jewish hope of the resurrection. Charles (in work cited on p. 725^a note) holds Mazdean influences possible in Dn 12², but sees in Is 26¹⁹ a product of purely Jewish thought. But the distance from Is 26¹⁹ to Dn 12² is easily bridged. Cf., further, on the question of Parsi influences: J. H. Moulton's art. ZOROASTRIANISM in vol. iv. of the present work; T. K. Cheyne, 'Possible Zoroastrian Influences on the Religion of Israel,' *Expos. Times*, Aug. 1891; E. Stave, *Ueber den Einfluss des Parsismus auf das Judentum*, Leipzig, 1898 [holds that the future expectations connected with this world emanated from Judaism, while those connected with the world beyond, particularly the (post-canonical) doctrine of a general resurrection, are traced to Parsism]; E. Bölden, *Die Verwandtschaft der jüdisch-christlichen mit der persischen Eschatologie*, 1902 [a careful collection of matter, the author's own intention being, above all, to provide material for arriving at a judgment; but his procedure in adducing Parsi parallels to OT passages is in not a few instances too artificial].

Scripture generally—so far as Scripture existed—as the revelation of the will of God, which alone may determine human action. For 'wisdom,'^{*} the unsurpassable worth of which is ceaselessly lauded in Proverbs, and the attainment of which at any cost is incessantly inculcated, is not the fruit of philosophic or religious speculation, or even an esoteric or secret doctrine; it is (as already in Jer 18¹⁸, see above) ability for the right conduct of life, or, in one word, the *practical wisdom of life*. One who possesses wisdom is capable of rightly judging every situation in which he may find himself, and of taking the best way to master it. Thus what distinguishes the wise from fools is, as it were, the art of taking a wide view of things. Now, if we consider that the political situation of the people under heathen rulers, and the increasing, and in part wealthy and influential, Jewish Diaspora in heathen lands, made ever greater demands for a prudent attitude towards foreigners, we can understand how it is that the doctrine of wisdom shows traces here and there of a certain cosmopolitanism, at all events the inculcation of prudent judgment of, and attitude towards, the king and heathen rulers. The tendency of wisdom to run out into the practical prudence of life is shown, above all, in the multiplicity of its principles and aims. It is astonishing to mark what a number of questions relating to the prudent conduct of life are canvassed in Proverbs: occupation, profit, business in general, intercourse with superiors and inferiors and with different classes of men generally, one's attitude to rulers, and numberless others. How far the specifically religious interest gets justice alongside of the thoroughly predominant practical interest, is a question to be investigated when we come to discuss the individual books.

1. *Proverbs.*—(a) Like the Psalms, Proverbs ought also for our purposes to be treated as a literary unity, in spite of the variety, and, it may well be, the divergence in age, of its component parts.† Between the Prologue (chs. 1–9) and the collections of proverbs proper the difference is at most this, that in the first we find not only numerous connected arguments, but also—at least on one point—attempts at religious speculation; while in the 'Proverbs of Solomon' and the collections which follow we encounter almost everywhere isolated proverbs, antithetic in form (so from the very first, 10^{1–17}), in the most motley mixture, and only very seldom in connected groups. Besides, it has long been recognized that the number of proverbs which can be viewed as real proverbs, current on the lips of the people, is small. The majority obviously belong to artificial poetry both in contents and form.‡

^{*} Cf., for special literature on the *Hokhmāh*: T. K. Cheyne, *Job and Solomon, or the Wisdom of the Old Testament*, London, 1887 [an incisive critical, exegetical, and biblico-theological discussion of the Books of Job, Proverbs, Ecclesiastes, and Sirach]; H. Zschokke, *Der dogmatisch-ethische Lehrgehalt der alttest. Weisheitsbücher*, Wien, 1889; W. T. Davison, *The Wisdom Literature of the Old Testament*, London, 1894; K. Benkenstein, *Der Begriff der Chokma in d. Hagiographen d. AT*, Nordhausen, 1895.

† The superscription קִלְמֹת שְׁלֹמֹה, which was later prefixed also to the Prologue (11), indicates that 10^{1–22} was the basis of the collection. Whether in 10^{1a} there are present any relics of a collection of proverbs attributed to Solomon (cf. the trace of such a collection in 1 K 5¹²) is a question on which we cannot even form an opinion; the present Book of Proverbs cannot have been put together before the post-exilic period. Two supplements were added to the original basis noted above (22^{17–24}), which are not attributed to Solomon. A second collection of 'Proverbs of Solomon' is given in 27^{1–29}, with three supplements—the words of Agur (ch. 30), the words of king Lemuel (31^{1–9}), and the acrostic eulogy of the virtuous woman (31^{10–31}). It was only as a last step (and not before the middle of the 4th cent. B.C.) that the Prologue can have been prefixed to the whole.

‡ For special literature on Proverbs, cf. R. Pfeiffer, *Die religiös-sittliche Weltanschauung des Buches der Sprüche in*

(b) The approach to religious speculation, to which reference was made above, has to do with the personification of Wisdom in several passages of the Prologue. Here it is a question whether we have to do with a purely poetical manner of speech, or with a hypostatizing of Wisdom, that is, with the introducing of an intermediate being between God and matter. The descriptions in 1st, 8th, and 9th, can quite well be interpreted as purely poetical personifications, all the more that in 9th 'Madam Folly' is contrasted with Wisdom, and in this second case it is impossible to speak of hypostatization. The case, however, is different in 8th. The Wisdom, whom Jahweh created of old as the first of His works, and set up of everlasting, who was there when He established the heavens, and was by Him as a master-workman 'daily his delight, rejoicing always before him, rejoicing in his habitable earth'—this Wisdom is no longer a merely poetical personification, but a being which has come forth from God, and works independently by His side, or, more accurately, with Him. And indeed we are probably not mistaken if we see in it a hypostatization of the creative ideas,—the passing into self-conscious personality of the system of archetypes, in accordance with which is determined the nature and measure of created things,—as it were, the fundamental principle of the Divine world-order. On this interpretation, a comparison with the 'Ideas' of Plato involuntarily suggests itself, but it is a further question whether we are to suppose that the influence of the Platonic philosophy was direct. Such a supposition is not absolutely necessary. On the other hand, it is hardly to be doubted that a causal connexion exists between the hypostatizing of Wisdom (Pr 8th) and the Logos idea in the New Testament. This, however, is not the place to pursue this question further.

The interpretation of Pr 8th, given above is considerably strengthened by Job 28th. It is true, the hypostatization of Wisdom here is still in its rudimentary stage, and the passage is therefore certainly older than Pr 8th. Job speaks at length (28th-34th) of the complete unattainability and (v. 15th) of the incomparable worth of Wisdom, until finally (v. 28th) he gives the explanation: *God* understandeth the way thereof, and He knoweth the place thereof. At the settling of the laws of nature (v. 25th) 'then did he see it, and declared it; he established it, yea, and searched it out.' Obviously, Wisdom is here something other than the 'master-workman' of Pr 8; it is rather a secret talisman, endowed with wondrous powers, and accessible to God alone; but it is also equally obvious that it is closely connected with God's works of creation, and so here again is equivalent to a system of types for the individual creatures.

(c) As to the further contents of the Book of Proverbs, their dependence on the specifically religious presuppositions of their age, as these were formed above all by the doctrine of the prophets, and pre-eminently by their conception of God, is a fact which needs no demonstration. There is more ground for saying that the specifically religious background and atmosphere of Proverbs has been at times far too much depreciated by modern writers, in view of its eudæmonistic and even utilitarian standpoint. It is indeed undeniable that a prominence which is often startling is given to considerations of the outward success of good and bad actions. The reader has not seldom an impression as though offences and even gross sins were to be avoided, not because to commit them is to forfeit the grace of God, heap guilt upon oneself,

and burden one's conscience, but because by such actions one may all too easily incur disgrace, danger, and loss. (Cf. e.g. 6th and 32th, also 5th, 24th; and the warnings against wine, 20th 21th 23th, and 29th; for more general expressions, 3th, 4th 22th).

In spite of this, however, it would be unjustifiable to regard Wisdom, in the form which it assumes in Proverbs, as *only* a means of attaining eudæmonistic ends—protection from everything that might disturb the quiet enjoyment of life. For not a few expressions reveal to us a far more intense religious life. Apart from 3rd, exhortations and warnings throughout are concerned with the precepts of morality proper, not with duties of the cultus; in 21st, indeed, righteousness is declared better than sacrifice (quite in the spirit of Hos 6th, etc.). The warning against adultery and profligacy (6th, 7th) is grounded beforehand in 6th by reference to the command of God, as is the case just as often with exhortations to righteousness, integrity, and compassion (3th, 14th and very specially 14th 17th 19th 28th). But we can point further to altogether different evidences of a moral disposition based upon true piety. The fear of Jahweh, which according to 17th 29th 9th is the beginning of wisdom (or, more accurately perhaps, the most important thing in wisdom)—though represented, conversely, in 23rd, as the fruit of wisdom—is not identical with slavish fear of Jahweh's punishment and the loss it brings, but with the knowledge that what is needed is the unconditional surrender of body and soul to Him (18th) who knows the most secret places of the heart (15th 17th 24th), who rules all things, even the doings of kings, by His will (16th, 33rd 21st, 31st), and on whose blessing everything depends (10th). The wise man knows that the corruption of sin is universal (20th); he understands the healing chastisement of Jahweh, which comes precisely on him whom He loves (3rd), and is aware that nothing but penitent confession can deliver out of the distress of sin (28th). He mistrusts his own understanding (3rd 28th), and exercises himself at all times in humility (16th 18th) and contentment (15th, 16th 30th), as the best supports of the fear of God. If we add to this the estimate of woman and of marriage which is given in 17th 31st (above all, in the noble saying of v. 30), the exhortation to compassion even towards animals (12th), the warning against retaliation and vengeance (20th 24th), the exhortation to magnanimity towards a foe, which almost touches on love to enemies (25th), and, finally, the reference to the love that covereth all transgressions (10th),—we shall no longer doubt that the ethic of Proverbs stands in great measure on a far higher level than the catchword of eudæmonism and utilitarianism is willing to admit.

(d) As to the doctrine of retribution, we find Proverbs occupying exactly the same standpoint as the Psalmists (see above, p. 726^b), viz. founding on the postulate that virtue and ungodliness must receive on earth a precisely equivalent requital (2nd, 10th 11th, 31st 13th, 21st, 14th 24th etc.). Nowhere is there a trace to prove that the authors of Proverbs had felt the least difficulty in making this postulate. But that this very problem had exercised the devotees of *Hokhmāh* profoundly and persistently is shown by the book which must undoubtedly be described as the ripest fruit of this whole movement, as it is in general one of the sublimest monuments of the religion of Israel, and even of the pre-Christian literature of the world.

2. The Book of Job.—(a) Of the critical questions

* To the same category of 'rules for life,' tinged with a utilitarian complexion, belongs the repeated and extremely insistent warning against becoming surety for others (6th, 17th 20th 22nd), as also against sloth (6th, and frequently).

Orienten inneren Zusammenhänge dargestellt. München, 1896; O. Meusel, *Die Stellung der Sprüche Salomos in der israelitischen Litteratur und Religionsgeschichte*, Leipzig, 1900.

that gather round the Book of Job one only need be taken into account for our purposes—the question touching the genuineness of the speeches of Elihu (chs. 32–37), which break the connexion between ch. 31 and ch. 38 in an unintelligible fashion, and suddenly introduce a speaker who is quite unknown both to the Prologue and to the Epilogue of the poem. We shall have to state briefly at the close our reasons for holding his observations to be an incontestably later addition. The theory, at present well-nigh dominant (owing to the commentaries of Duhm and Budde), that in the Prologue and Epilogue we have an older popular writing, in which the author of the main part has inserted the speeches of Job, of his friends, and of Jahweh, is one to which the present writer is unable to subscribe, believing as he does that the Prologue and Epilogue were written by the same hand as the rest (though, of course, as Ezk 14¹⁴,²⁰ demands, in dependence on an old and familiar tradition).^{*} As to the date of the book, not only its angelology, which presents similarities to that of Daniel, but also linguistic reasons, compel us to bring it down to the later post-exilic period. That its conception of God (especially in regard to the creation and government of the world, ch. 38 ff. and elsewhere) stands on the loftiest height of OT beliefs, needs no proof.† And as to its ethics, passages like 29^{12ff.}, and, above all, 31^{1ff.}, with their truly evangelical idea of morality, have hardly a parallel in the OT.

(b) As regards the angelology, the novel element lies less in the rôle played by the Satan (1^{6ff.}, 2^{1ff.}) than in some other expressions. The Satan here is distinguishable from his counterpart in Zechariah (cf. above, p. 709^b) at most by this, that, while not yet the calumniator of the pious man, he still excites suspicion against him. He still belongs to the *bēnê 'Elohim*, who stand around Jahweh as His servants (1⁶ 2¹; in 38⁷ they are named alongside of the morning-stars, which are to be conceived as personified), and he is absolutely bound to the will of God. But there is plainly in him a strain of malice, a joy in the fall of the godly. So far we have here a further development of the idea of the Satan as found in Zec 3¹. 1 Ch 21¹—an instructive parallel to 2 S 24¹—is the first passage where the Satan has become a being dualistically hostile to God. The further expansion of the idea, as presupposed in NT, belongs to the department of the Apocrypha (cf., especially, Wis 22¹).

Peculiar to the Book of Job is the idea of interceding angels (5¹ 33²³), as also that of angels of death (33²³). The description of the angels as holy (15^{1b}) is no more here than elsewhere meant to emphasize their moral perfection, as is clear from this very passage, which (like 4¹⁸) makes the angels subject to error and sin.

(c) In view of the ever renewed attempt to draw from 19^{25ff.} indications of the sudden flaming up of the hope of resurrection or immortality, emphasis must never cease to be laid on this fact: the view set forth in Job in regard to *She'ol*—its cheerless darkness, the complete isolation of its inmates from the upper world, and the impossibility of return from it (7^{9f.} 10^{21ff.} 14^{10ff.} 21^{1f.} 16²² 21²⁶ 30²³)—is uniformly the same throughout the whole poem. With such an idea, however, the hope of immortality would be in insoluble contradiction. The expectation to which expression is given in Job 19^{25ff.}, accordingly, relates to this life, and this is expressly confirmed by the clear reference back from 42⁵ to 19²⁷.

^{*} Cf. on this point Karl Kautzsch, *Das sogenannte Volksbuch von Hiob und der Ursprung von Hiob 1.2. 41–47*, Tübingen, 1900.

† Of the particular mythological allusions (3⁸ to the Leviathan, 9¹³ to the helpers of Rahab, 26¹² to Rahab, 29¹³ to the phoenix) the same view must be taken as of those in the Psalms.

(d) The problem to the solution of which this sublime poem is devoted is simply, How is the suffering, nay the sore and hopeless suffering, of a notoriously good man compatible with the justice of God?; and, conversely, How is it compatible with the justice of God that notoriously godless men enjoy to the end of life an absolutely untroubled happiness? These became burning questions once men had learned to distinguish the weal and woe of the individual from that of the nation, and to face the actual facts of the individual life.

The poet brings the problem before us in the Prologue in the guise of historical facts. Job has witness to his exemplary piety from God Himself (1⁸ 2²). And yet measureless woe has fallen upon him. Why? The reader is told in the Prologue:—the torture of Job rests on the permission extended by Jahweh to the Satan, with the object of proving that there does exist a piety which no temptation can cause to waver. The suffering of Job, accordingly, is in no way a manifestation of God's anger, but rather of His love; it is a martyrdom for the honour of God and human fidelity towards God. The fact that the reader is put in possession of accurate knowledge on this point from the first, and therefore can quietly watch the controversy as from a watchtower, is one of the poet's finest strokes of art. The other *dramatis personæ*, however, know nothing of this solution of the problem, and are therefore groping in the darkness. They carry on the controversy only as human judgment and knowledge best can.

Job, with heroic devotion, offers a steadfast resistance to the repeated assaults of evil, in spite of his being sorely tempted by his own wife. But the mute reproach which he perceives in the silence of his friends, together with his awful, excruciating, and hopeless malady, finally breaks down the courage of his faith. With the monologue in which he curses the day of his birth (ch. 3), he opens the threefold cycle of speeches and counter-speeches, in which the problem, instead of drawing nearer to solution, becomes ever more complicated. The standpoint of the friends is that of the old doctrine of retribution—that false inversion of the fact declared in Ex 20^{5f.}, that the fear of God brings a blessing, while sin brings ruin. The friends deny the existence of any problem at all: all suffering is punishment; monstrous suffering is punishment for monstrous, and very specially for secret, guilt. The happiness of the ungodly, however, is never more than apparent, and is destined to sudden destruction.

Job does not in the least deny (14¹ 19⁴) his participation in the universality of human sin as affirmed by the friends (4¹⁷ 15¹⁴). But he repudiates in the strongest way any such guilt as would even come near explaining his fate. On the other hand, he is never weary of pointing to the facts of actual life (cf., especially, 21^{7ff.} and 24^{1ff.}), the infinite enigmas created by the hopeless suffering of the godly, and the untroubled happiness of the wicked. This does not lead him, it is true, to doubt the omnipotence of God (9^{5ff.} 12^{13ff.} 26^{5ff.} 26¹⁴), but he can recognize only its incalculable and destructive effects. He rejects, with justifiable indignation (21^{19ff.}), the expedient, which was plainly in high favour in his day, of saying that God lays up the punishment of the godless for their children. For this theory was in fact nothing but a desperate device, which overthrew the principle of the current doctrine of retribution—otherwise so eagerly defended—that each receives according to his deserts.

Still, his doubts regarding the justice of God (cf., especially, 9^{22ff.}) are gradually overcome by his better faith. He begins to distinguish between

the wise and righteous God, whose image lives on indelibly in his heart, and the enigmatical God of his trial, and appeals to the first for help against the second (16^{18ff.}). Nay, he has the adamant assurance that God Himself will at the end arise for him, and bring his innocence to the light (19^{25ff.}). But, even though with all this he gradually silences the contradictions of the friends, he himself, in view of the enigmas that confront him, attains to no more than a painful renunciation of the hope of their solution. The moving delineation of his former happiness (ch. 29), of his present misery (ch. 30), and of his pious life (ch. 31), closes (31^{35ff.}) with the solemn demand addressed to God, to afford him the opportunity of defending his cause in a regular judicial trial.

And indeed Jahweh does appear (38^{1ff.}). But not, as Job had requested and hoped, to enter into a controversy with him,—anything of the kind had been utterly unworthy of Him,—but in order, by means of the tempest and with withering irony, to make him feel the absolute foolishness and childishness of what he expected from God. And the whole arrangement of the poem forbids us to doubt that only in these speeches of Jahweh (chs. 38–41), with their Divine irony, and nowhere else have we to seek the solution of the problem intended by the poet himself. In all conceivable simplicity it runs thus: God, who has made known His unfathomable omnipotence and wisdom in the multimiform wonders of creation, and His goodness in His loving care for the animal world (38^{41ff.}), rules likewise over the fortunes of men, and here too all His action can flow only from wisdom and love, whether much or little of it be comprehensible by man.

It has been said that this is no solution of the problem, but a compulsory abandonment of it. But in both his answers (40^{4ff.} and 42^{30ff.}) Job himself takes quite another view. He humbles himself to the very dust; not, however, in painful resignation, but in the elevating assurance that his God has acknowledged him, and that he must regard all the elements of his lot as evidences of an all-wise and loving will. While, then, the justification of Job as against the friends in the Epilogue, and the return of his prosperity, may only be meant to satisfy so-called 'poetic' justice, yet they were indispensable for the harmonious solution of all difficulties for the reader, who in the Prologue had been enlightened as to the innermost connexion of events.

All this of itself settles what we are to think of the Elihu-speeches. They are the work of a reader of the original poem, who felt dissatisfied that the speeches of Job, dubious in part, and almost bordering on blasphemy, should not have received a more stringent refutation. This lack the author of the Elihu-speeches seeks to supply, and does so by explaining the suffering of Job as *purificatory*, designed for the purging out of the sins of pride and self-righteousness which clung to him. In themselves many of this author's ideas are beautiful and good. But as a professed solution of the problem they are irreconcilably opposed to the presuppositions of the original poem.

3. *Ecclesiastes (the Preacher)*.—(a) It is not without hesitation that we enumerate Ecclesiastes as one of the creations of the *Hokhmah* literature; for it is only in a very relative sense that it can be treated in the same series as Proverbs and Job. The original portions of the book,* at all events,

* The very striking contradictions in the statements of the Preacher (cf. for example 7^{11ff.} 19 31 9^{17ff.} 10¹², with expressions used elsewhere regarding the worth of wisdom 13^{18ff.} 18 6^{8ff.} 7²⁵; or again 57–58 7^{11ff.} with the opinions he expresses as to the injustice that dominates the course of the world 3¹⁶ 4^{1ff.}; as also 8¹⁰ 14 on the worth of piety with v. 11^{1ff.}) have long been noticed

stand on the extreme periphery of OT faith; and of a hope for the future, be it for the nation or the individual, they exhibit not a trace. The Preacher shows himself to be dominated by a dark, almost pessimistic, tone of feeling. The history of his nation obviously appears to him like an extinct volcano. He does not touch upon it even in a single word; the cheerless conditions of the present alone occupy his mind, together with the prospect of the cheerless end, identical for all. The thesis of which he makes a headline—'vanity of vanities, all is vanity'—recurs again and again even in the course of his argument. Everywhere he sees things in restless revolution, ending in nothing profitable (1^{4ff.}); there is no new thing under the sun (1^{9ff.}). Vain is the pursuit of riches and pleasure, even when it rests upon industrious labour (2^{1ff.}). But vain also is the pursuit of wisdom (1^{13ff.} 6^{8ff.} 7²³), for he that increaseth knowledge increaseth sorrow (1¹⁸). Wise men and fools have ultimately the same destiny (2^{14ff.} 9^{2ff.}). Nay, vain is even the pursuit of piety (4¹⁷ [5¹] 7¹⁵ 8¹⁰ 14); it does not change the fact that man and beast at last go to the one place (3^{19ff.}), to the joyless *She'ol* and everlasting oblivion. The attempt by means of mistaken exegesis to foist upon the Preacher a hope of immortality has completely failed. Passages like 3²⁰ 9^{4ff.} 10⁶, 'there is no work, nor device, nor knowledge, nor wisdom, in the grave, whither thou goest,' admit of no doubt as to his real opinion. Even in 3²¹ the sense of the doubting question* is not to ask whether the spirit of man as immortal returns to God, but whether a difference between the breath of man and of beast exists so far that the latter, it may be, goes downward to the earth, but the former upward—not in any sense as self-conscious spirit, but (exactly as in 12⁷) as once more re-entering the universal Divine life-spirit, from which it had once come forth. The expectation of a future judgment can at most be found in the closing verse (12^{13ff.}), 'fear God, and keep His commandments: for this pertains to all men. For God shall bring every work into the judgment which tries every hidden thing, whether it be good or whether it be evil.' But it is certain that this epilogue (from v. 9 onwards) does not belong to the work of the original author. For the folly and injustice which manifest themselves everywhere in the course of the world (3¹⁶ 4^{1ff.}), that author knows no consolation other than the possibility of securing, by means of a rational enjoyment of life, the relatively best side of what is in every respect a mournful earthly existence. This is the counsel he is never weary of giving (2²⁴ 3^{12ff.} 22 5¹⁷ 8¹⁵ 9^{7ff.} 11⁹), not in the sense of vulgar Epicureanism, but still from the standpoint of a man who has made up his mind about the value of all other earthly goods and aims.

What preserved him from vulgar godless Epicureanism is the fact that even he had retained one important relic of the believing treasures of

and explained, sometimes in mechanical fashion (by supposing a dialogue between the doubting scholar and the didactic master, or even by the hypothesis that parts of the MS have got out of order), sometimes from the character of a mind tossed hither and thither by doubt. The present writer, however, is now convinced that C. Siegfried was on the right track when (in his Commentary on Ecclesiastes, Göttingen, 1898) he argued in favour of a number of successive hands, which from very divergent standpoints sought to supplement, to correct, or even in many places expressly to refute, the judgments of their predecessors. Siegfried's analysis may in part be needlessly artificial, since he postulates first a pessimist (Q[ohelath])¹ infected with Greek philosophy, then an epicurean glossator belonging to Sadducean circles (Q²), next a 'wise' man who defends wisdom (Q³), and, finally, one of the 'pious' (*hāsīd*, Q⁴), who defends the justice of the Divine government of the world, together with two further glossators—yet in the main his theory is a sound one.

* According to the correct text *לְעוֹלָם וָעוֹלָם*; the MT has been corrected on dogmatic grounds, so as to express the hope of immortality).

his people, viz. the kernel of the OT conception of God. All his scepticism and all his pessimism had not impaired his faith in a personal God who is at the same time the God of the whole world.* He does not really doubt even the wisdom and justice of this God: 'He hath made everything beautiful in its time, yet so that man cannot find out the work that God hath done from the beginning to the end' (3¹¹ 14 8¹⁷). What pains the Preacher is this, that comforting insight into the enigmas of the world, for which in view of God's wisdom and justice there must be a solution, is for ever forbidden to man.

(b) We can well understand that the reception of Ecclesiastes into the canon should have awakened serious doubts, even as late as the 1st cent. A.D. Nevertheless, we have cause to thank the editors of the canon for having suppressed these doubts (perhaps on account of the conciliatory epilogue). By doing so they have bequeathed to us a priceless evidence that those of Israel who to this day believe that God's last word to humanity was spoken in the revelations and institutions of the Old Covenant, are in error. Having once perceived the insufficiency of all works of the Law and renounced belief in the trustworthiness of his own wisdom, the Preacher could find solace and support only in faith in redress beyond this life. But of such a faith, so far as the individual was concerned, the religion of his people knew nothing, and to be pointed to the Messianic future of the nation as a whole evidently appeared to him but a dubious substitute. In all this he affords a proof that this religion called for supplement and completion—a completion which came in the fulness of time through Christ, who is the end of the Law.

LITERATURE.—The older works on Biblical Theology and on the History of the Religion of Israel may be all the more readily passed over, since they are almost without exception based upon incorrect critical principles—a blemish which attaches, indeed, even to some of the more recent works cited below. The view which once held sway, namely, that the beginnings of the Religion of Israel as well as of its codification are to be sought in P, gives so completely false a picture of the development of this religion, that in such works it is at most only the treatment of neutral points (where the question of gradual development does not arise) that can have any value. The foundation of a true knowledge of the subject was laid by E. Reuss in 1833 (in theses for his students) and in 1850 (in his art. 'Judentum' in the so-called *Hallesche Encyclopädie* of Ersch and Gruber); and, independently of Reuss, by W. Vatke in *Die biblische Theologie wissenschaftlich dargestellt*, vol. i. 'Die Religion des AT nach den canonischen Büchern entwickelt,'

Berlin, 1835.—In what follows we distinguish the following branches of literature on our subject—

I. WORKS DEALING WITH THE HISTORY OF RELIGION IN GENERAL, IN WHICH THE TREATMENT OF THE RELIGION OF ISRAEL IS INCLUDED.

—C. P. Tiele, *Vergelijkende Geschiedenis van den Godsdienst* [Dutch, 1876 (2nd ed. 1894), French, 1882], and the same author's *Geschiedenis van den Godsdienst en de Oudheid*, 2 vols. 1896 ff. [Germ. tr. by Gehrich, 1896–1903], and *Inleiding tot de Godsdienstwetenschap*, Amsterdam, 1897, 1899, 2 parts [German tr. by Gehrich, Göttingen, 1899]; Chantepie de la Saussaye, *Lehrbuch der Religionsgeschichte* [in collaboration with Buckley, Lange, Fr. Jeremias, Valetton (whose account of the Religion of Israel is amongst the best parts of the work), Houtsman, Lehmann], Freiburg i. B. 1897, 2 vols.; C. von Orelli, *Allgemeine Religionsgeschichte*, Bonn, 1899.

II. WORKS ON THE HISTORY OF SEMITIC RELIGION, WHICH TAKE ACCOUNT OF THE OT PARALLELS.—See above, p. 612b, and add: Père Lagrange, *Études sur les religions sémitiques*, Paris, 1903.

III. WORKS ON BIBLICAL THEOLOGY OR ON THE HISTORY OF THE RELIGION OF THE OT.—A. Kuenen, *De Godsdienst van Israël tot den ondergang van den Joodschen staat* [Dutch, Haarlem, 1869–1870, 2 vols.; Eng. tr. by May, London, 1874, 1875, 3 vols.]; H. Schultz, *Alttest. Theologie*, Braunschweig, 1869 [5th ed. Göttingen, 1896]; G. F. Oehler, *Theologie des AT*, herausgegeben von Herm. Oehler, Tübingen, 1873, 1874, 2 vols. [3rd ed. by Theodor Oehler, Stuttgart, 1891]; A. Kayser, *Die Theologie des AT in ihrer geschichtlichen Entwicklung*, herausgegeben von E. Reuss, Strassburg, 1886 [the 3rd edition of 1896 was completely revised by K. Marti and published as *Geschichte der israelitischen Religion* (4th edition 1903)]; Ch. Piepenbring, *Theologie de l'ancien Testament*, Paris, 1886 [intended also for educated laymen]; W. L. Alexander, *System of Biblical Theology*, Edinburgh, 1888, 2 vols.; Ed. Riehm, *Alttest. Theologie*, herausgegeben von K. Pahnke, Halle, 1889; K. Schlottmann, *Kompendium der bibl. Theologie des AT und NT*, herausgegeben von E. Kühn, Leipzig, 1889 [2nd ed. 1895]; R. Smend, *Lehrbuch der alttest. Religionsgeschichte*, Freiburg and Leipzig, 1893 [2nd ed. 1899]; A. Dillmann, *Handbuch der alttest. Theologie*, aus dem Nachlass des Verfassers herausgegeben von R. Kittel, Leipzig, 1895; W. H. Bennett, *The Theology of the OT*, London, 1896; T. K. Cheyne, *Jewish Religious Life after the Exile*, New York, 1898 [German tr., with the assistance throughout of the author, by H. Stocks, Giessen, 1899]; A. Duff, *OT Theology, or History of Hebrew Religion*, London, 1891, 2 vols., and the same author's *History and Ethics of the Hebrews*, London, 1902; A. B. Davidson, *The Theology of the OT* [posthumous work, ed. by S. D. F. Salmond], Edinburgh, 1904; K. Budde, *Religion of Israel to the Exile*, New York, 1899 [German edition under title 'Die Religion des Volkes Israel bis zur Verbannung', Giessen, 1900]. This sketch of Budde's is designed for a wider circle of readers, and so is F. Giesebrecht's *Die Grundzüge der israelitischen Religionsgeschichte*, Leipzig and Berlin, 1904.

IV. THE MORE CONSIDERABLE MONOGRAPHS (supplementary of the literature cited in the footnotes at the commencement of different sections of the above article).—F. Baethgen, *Beiträge zur semitischen Religionsgeschichte* (i. 'Der Gott Israels und die Götter der Heiden', Berlin, 1888); E. Sellin, *Beiträge zur israelitischen und jüdischen Religionsgeschichte* (i. 'Jahwes Verhältnis zum israelitischen Volk und Individuum nach altisraelitischer Vorstellung', Leipzig, 1896; ii. 'Israels Güter und Ideale', 1897); J. Köberle, *Natur und Geist nach der Auffassung des AT: eine Untersuchung zur historischen Psychologie*, München, 1901.

E. KAUTZSCH.

TABLE OF CONTENTS OF ABOVE ARTICLE.

Introduction, p. 612a.

I. TRACES OF A PRE-MOSAIC RELIGION OF ISRAEL, pp. 613a–624a.

i. CONCEPTION OF THE DEITY, etc., pp. 613a–618a.

1. Totemism: existence in Israel not proved, p. 613.
2. Animism and Ancestor Worship: the evidence for the latter insufficient, p. 614 f.
3. *Numina loci*: sacred stones (*mazzēbōth*), p. 616a; trees, p. 616a; springs, p. 616b.
4. Supposed traces that Polytheism once prevailed in Israel, p. 616b ff.

ii. FORMS OF WORSHIP, AND OTHER RITES AND USAGES, pp. 618a–624a.

1. Sacrifice: gifts to the Deity, p. 618a; sacramental communion between the Deity and the worshipper, p. 618b; importance attached to the blood, p. 618b; human sacrifice, p. 618b; the ratifying of a covenant by passing between the pieces of a dismembered animal, p. 619a; the *helem* or *ban*, p. 619b; the altar and its horns, p. 620a.
2. The *mazzēbāh* and the 'āshērūh, p. 620.

3. Ritual practices: walking barefoot in sacred places, p. 621a; washing the person and the clothes before approaching the presence of the Deity, p. 621a.

4. No record of priests in pre-Jahwistic times, p. 621a.
5. The sacred body, p. 621a.
6. Periodical festivals: New Moon, p. 621b; Passover, p. 621b; *Mazzōth*, p. 622a; sheep-shearing, p. 622b.
7. Course of procedure at festivals, p. 622b.
8. Circumcision, p. 622b, and Blood-revenge, p. 623a.

Summary, p. 623b.

iii. MORAL CONDITIONS, p. 623b.

II. FOUNDING OF THE RELIGION OF ISRAEL (JAHWISM) BY MOSES AT SINAI, pp. 624a–634b.

i. THE PERSON OF MOSES AS THE FOUNDER OF THE JAHWEH RELIGION, pp. 624b–625a.

1. Question of the historicity of the traditions regarding the life of Moses, p. 624b; his claim to be the organ of a special revelation, p. 624b.
2. Paucity of references to Moses outside the Hexateuch, and especially to his work as the founder of a religion, p. 625a.

ii. JAHWEH PROCLAIMED BY MOSES AS THE GOD OF ISRAEL, pp. 625a–626b.

1. Moses' view of Jahweh only henotheistic, not monotheistic, p. 625a.
2. Derivation of the name 'Jahweh', p. 625b.
3. Source of Moses' knowledge of Jahweh: the Kenite hypothesis, p. 626b.
4. Human form attributed to Jahweh, p. 627b.
5. The *Nēphushtān*, p. 628a.
6. The sacred Ark, p. 628a.

* This faith is indicated by the very fact that the Divine name 'Jahweh' is consistently replaced by the appellation 'Elohim' (as almost everywhere in the 2nd and 3rd books of the Psalter, very frequently in Chron., and generally in the latest Scriptures). It is true that the influence of awe at the use of the sacred name also had to do with this result; but, on the other hand, this complete equating of 'Jahweh' and 'Elohim' affords a proof that the faith of Israel had now finally decided on the absolutely unique character of Jahweh.

- iii. *THE ESSENTIAL CHARACTER OF JAHWISM AS THE RELIGION OF ISRAEL*, pp. 629^b-632^b.
1. Misuse of the term 'theocracy,' p. 629^b f.
 2. The *bērit̃h* at Sinai, p. 630^b; its historical character, p. 631^a; ethical henotheism implied in it, p. 632^a.
- iv. *THE STAMP OF JAHWISM ON OUTWARD ORDINANCES IN THE TIME OF MOSES*, pp. 632^b-634^b.
1. Difficulty of holding that any exclusive priestly order was instituted by Moses, p. 633^a.
 2. The Passover the only religious festival, p. 633^b.
 3. Custom the ruling factor in social life, p. 633^b.
 4. Is the Decalogue in any form Mosaic?, p. 633^b.
- III. *THE RELIGION OF ISRAEL IN CANAAN IN THE PRE-PROPHETIC PERIOD*, pp. 634^b-671^a.
- i. *THE SOURCES*, p. 634^b.
- ii. *CONCEPTION OF GOD*, pp. 635^a-644^b.
1. Henotheism, not Monotheism, still the standpoint, p. 635^b.
 2. Jahweh the God of Israel, and Israel the people of Jahweh, p. 635^b.
 - (a) Jahweh as the war-God, p. 635^b.
 - (b) The *hērem* executed in honour of Jahweh, p. 636^a.
 - (c) The name *Jahweh Zēbā'ōth*, 'Jahweh of Hosts,' variously explained of (α) hosts of 'demons,' p. 636^b; (β) heavenly hosts, i.e. angels, p. 636^b; (γ) the earthly hosts of Israel. Objections to this last view repelled, p. 636^b f. *Jahweh Zēbā'ōth* is specially the war-God as represented by the sacred Ark, p. 637^a; (δ) later use of the title to express the supramundane power and glory of Jahweh, p. 637^b.
 3. Distinction between the real being of Jahweh and His manifestations, p. 637^b.

1. Scanty traces of a priesthood in the pre-Prophetic period, p. 648^a.
 2. Eli and his descendants. Meaning of 1 S 22th, p. 648^b.
 3. Spiritual and religious significance of the priesthood during this period, p. 649^a.
2. *Prophets*, pp. 650^b-657^a.
1. Relics in Jahwism of semi-magical practices, p. 650^b.
 2. The 'seer' (נָחֵד or נִחֵד): Moses, Balaam, Deborah, Sammel, Gad, p. 651^a.
 3. The 'prophet' (נָבִי). The *nēbī'im* of early times quite different from the later Jahweh prophets, p. 652^b ff.
 4. Forerunners of the 'prophets' proper: Gad, Nathan, Ahijah of Shiloh, Jehu ben-Hanani, p. 653^b.
 5. Prophetism strongly developed in the Northern kingdom in the 9th century: (a) Elijah, p. 654^a; (b) Elisha, p. 655^a; (c) Micaiah ben-Imlah, p. 656^a.
 6. The *nēbī'im* associated with Elijah and Elisha, p. 656^b.
3. *Nazirites*, pp. 657^a-659^a.
1. Original sense of the word *nāzīr*, p. 657^a.
 2. Three restrictions connected with the Nazirate, p. 657^b.
 3. The Nazirate of Samson, p. 657^b.
 4. The Nazirate in Am 21st, p. 658^a.
 5. The Nazirate in Nu 6, p. 658^b.
4. *Rechabites*, p. 659.
1. Testimony of 2 K 101st, p. 659^a.
 2. " " Jer 35, p. 659^a.
3. Religious significance of the Rechabite mode of life, p. 659^a.
5. 'Judges' and kings, p. 659^b f.
1. The spirit of Jahweh in the 'judges,' p. 659^b.
 2. " " imparted to kings by *anointing*, p. 659^b.
 3. Favourable estimate of the monarchy in the early sources, p. 660^b.
- v. *CULTUS AND MANNERS*, pp. 661^a-665^a.
1. The 'high places' (*bāmōth*), p. 661^a.
 2. Sacrifice the central feature of the cultus, p. 661^a.
 3. Festivals: (a) the Sabbath, p. 662^a; (b) the New Moon, p. 662^a; (c) the three regular annual festivals—Unleavened Bread, Weeks, Harvest, p. 662^a. Joyous character of the ancient festivals, p. 662^b.
 4. Consulting the oracle: Urim and Thummim, p. 662^b.
 5. Custom closely connected with religion, as the ruling force in morals, p. 663^a.
 6. The stories of the patriarchs the truest reflexion of the manners and morals of this period, p. 663^b.
 7. Examination of the alleged indifference of the early sources to moral aberrations on the part of the chosen people, p. 664^a.
 8. Elevated morality of the Book of the Covenant, p. 664^b. Comparison with Code of Hammurabi, p. 665^a.
- vi. *ANTHROPOLOGY AND THEORY OF THE UNIVERSE (WELTANSCHAUUNG)*, pp. 665^a-671^a.
1. Man's personality, p. 665^a.
 - (a) The seat of life: breath, blood, p. 665^a.
 - (b) Origin of life traced to God, p. 665^b.
 - (c) Distinction between human and animal life, p. 666^a.
 - (d) 'Traducianism,' not 'Creationism,' doctrine of OT, p. 666^a.
 - (e) The flesh not regarded as the seat of sin, p. 666^b.
 - (f) *Nephesh* and *rūah*, p. 666^b.
 2. Man's destiny, p. 667^a.
 - (a) Story of Paradise and of the Fall, p. 667^b.
 - (b) Conception of *She'ol*, p. 668^a.
 3. Origin of the world, p. 669^b.
 - (a) The Jahwistic story of Creation, p. 669^b.
 - (b) The question of how far the influence of Babylonian myths is traceable in the OT: (α) story of the Deluge undoubtedly based on a Babylonian archetype, p. 670^a; (β) supposed OT allusions to Marduk's conflict with Tiamat, p. 670^a; (γ) attempts to assign a mythological sense to the vessels of Solomon's temple, p. 671^a.
- IV. *THE PERIOD OF THE WRITING PROPHETS, DOWN TO THE EXILE*, pp. 671^a-701^b.
- i. *THE SOURCES*, p. 671^a ff.; (a) exclusively religious aims of the Prophetic literature, p. 671^b; (b) lack of the idea of 'literary property,' p. 671^b.
- ii. *NAME AND CHARACTERISTICS OF THE WRITING PROPHETS*, pp. 672^a-675^b.
1. 'Prophets' and 'seers,' p. 672^a.
 2. The prophetic 'call,' p. 672^b.
 3. Prophetic ecstasy, p. 673^a.
 4. Examination of the 'cataleptic theory,' p. 673^a.
 5. The 'vision,' p. 673^b.
 6. General and special inspiration, p. 673^b.
 7. The subjects of prophetic announcement, p. 674^b.
 8. The prophetic ministry discharged without fee, p. 674^b.
 9. Oracles against foreign peoples, p. 675^a.
 10. Conditional character of prophecy, p. 675^a.
- iii. *THE FORMS OF DIVINE REVELATION TO THE PROPHETS*, pp. 675^a-676^b.
1. The 'word,' p. 675^b.
 2. The 'vision,' p. 675^b. Sometimes only a literary device, p. 676^a.
 - (a) The vision of Isaiah, p. 676^a.
 - (b) Visions of Amos and Jeremiah, p. 676^a.
 - (c) " " Ezekiel, p. 676^a.
 - (d) " " Zechariah, p. 676^b.
- iv. *THE FORMS OF THE PROPHETIC MESSAGE*, pp. 676^b-678^b.
1. The 'word': difference between actual address and form finally committed to writing, p. 676^b.
 2. Devices of style adopted for purpose of heightening the effect of the address, p. 677^a.
 3. Symbolical actions: (a) in Isaiah, p. 677^b; (b) in Jeremiah, p. 677^b; (c) in Ezekiel, p. 678^a; (d) in Zechariah, p. 678^b.
- v. *THE CONTENTS OF THE PROPHETIC MESSAGE*, pp. 678^b-697^b.
1. The conception of God, p. 678^b.
 - (a) The Person of God, p. 679^a.
 - (b) Angels no longer mediate between God and man, p. 679^b.
 - (c) Polemic against images of Jahweh, p. 679^b.

- (d) The solity of Jahweh, p. 680^a.
 (e) Attributes of Jahweh: (α) holiness, p. 681^a; (β) omnipotence, p. 683^b; (γ δ) omnipresence and omniscience, p. 684^a; (ε) love, goodness, mercy, p. 684^a.
 2. Relation of Jahweh to Israel, p. 684^b.
 (a) The OT conception of the Fatherhood of God, p. 684^b.
 (b) The election of Israel, p. 684^b.
 (c) The Divine jealousy, p. 685^a.
 (d) Jahweh's guidance and protection of Israel, p. 685^a.
 (e) Jahweh's demands upon Israel: (α) the Prophetic view of sacrifice and other external services, p. 685^a; (β) specifically ethical character of the duties enjoined, p. 687^a ff.; trust in God and love to man, p. 687^b; the Deuteronomic legislation characterized, p. 687^b f.; (γ) the Prophetic view of the capabilities of human nature, the forgiveness of sin, and retribution, p. 688^b f.
 3. Relation of the people to Jahweh, p. 689^b. Israel's failure to realize the Divine ideal, p. 689^b.
 (a) Idolatry, and false worship of Jahweh, p. 690^a.
 (b) Mistaken notions about the character of Jahweh, p. 690^b.
 (c) Low state of morals, p. 690^b.
 4. Attitude of the Prophets to the corrupt moral condition of the people, p. 691^a. Were the pre-exilic prophets messengers of woe only?, p. 691^a.
 (a) The position of Amos, p. 691^b. The 'Day of the LORD,' p. 691^b.
 (b) " " Hosea, p. 692^a.
 (c) " " Isaiah, p. 692^b.
 (d) " " Micah, p. 693^b.
 (e) " " Jeremiah, p. 693^b.
 5. The so-called 'Messianic prophecy,' p. 694^b.
 (a) Meaning of the term, p. 694^b. Questions of authenticity and literary criticism, p. 695^a.
 (b) Messianic prophecies in the narrower sense: (α) Is 71^a, p. 695^a; (β) Is 91^a and 111^a, p. 695^b; (γ) Mic 51^a, p. 696^a; (δ) Jer 23^{5a}, p. 696^a.
 (c) Messianic prophecies in the wider sense: (α) Is 73^a, p. 696^b; (β) Hos 22²³, p. 696^b; (γ) Zeph 311³, p. 697^a; (δ) Jer 121⁴, p. 697^a; (ε) Jer 31³⁴, p. 697^a.
 vi. THE EXTERNAL COURSE OF DEVELOPMENT OF THE RELIGION OF ISRAEL DURING THE PERIOD OF PRE-EXILIC PROPHECY, pp. 697^b-701^b.
 1. Features common to the Northern and Southern kingdoms, p. 697^b.
 2. Points of difference, p. 698^a.
 3. Circumstances that heightened the religious prestige of Judah, p. 698^b.
 4. Influence of Isaiah and his disciples, p. 698^b.
 5. The time of Manasseh. *Lacuna* in the Prophetical succession, p. 699^b.
 6. Zephaniah's account of the religious and moral conditions of his time, p. 700^a.
 7. Jeremiah's work, p. 700^b. Hilkiah's discovery of Deuteronomy, and its results, p. 700^b f. Bitter experiences of Jeremiah, p. 701^a.
 V. EZEKIEL, pp. 701^b-705^b.
 1. Ezekiel's relation to the Priests' Code, p. 701^a.
 2. Conception of God, p. 701^a.
 3. Israel's relation to Jahweh, p. 702^a. Responsibility of the individual, p. 702^a.
 4. Ezekiel's denunciations of Israel's 'idolatry,' including (a) improper worship of Jahweh, p. 702^a; (b) alliances with the heathen, p. 702^b.
 5. Judah's guilt more heinous than Israel's, p. 702^b.
 6. Special charges against Jerusalem, p. 702^b. The approaching judgment, p. 702^b.
 7. A remnant to be saved, p. 703^a.

A SELECTION OF BOOKS RECOMMENDED IN HASTINGS' 'BIBLE DICTIONARY'

For further study, and published by MESSRS. T. & T. CLARK, Edinburgh.

* * *Except in the case of Books issued at net prices, a liberal discount for cash is usually given by the Booksellers. Messrs. Clark will be glad to give further information about any of their Publications, and their complete Catalogue, Prospectuses, etc., will be sent free on application.*

Andrews.—THE LIFE OF OUR LORD UPON THE EARTH: Considered in its Historical, Chronological, and Geographical Relations. By Rev. SAMUEL J. ANDREWS. A New and Revised Edition (the only Authorised Edition in this Country). 8vo, 9s.

* * *This book has long been an acknowledged authority with scholars and with the general public. In order to retain for it the rank it has gained, the author has undertaken a complete revision, having almost entirely rewritten the work in the light of recent researches.*

'As a teacher's apparatus, I would recommend—(1) Andrews' "Life of our Lord."—Professor J. STALKER, D.D.

The Ante-Nicene Christian Library.—A Collection of all the Works of the Fathers of the Christian Church prior to the Council of Nicæa. Edited by Professor ROBERTS, D.D., and Principal J. DONALDSON, LL.D., St. Andrews. In 24 handsome 8vo Vols., Subscription Price, £6, 6s. net; or a selection of 4 Vols. for £1, 1s. net. (Any Volume may be had separately, price 10s. 6d.)

This Series has been received with marked approval by all sections of the Christian Church in this country and in the United States, as supplying what has long been felt to be a want, and also an account of the impartiality, learning, and care with which Editors and Translators have executed a very difficult task.

The following works are included in the Series:—

APOSTOLIC FATHERS, comprising Clement's Epistle to the Corinthians; Polycarp to the Ephesians; Martyrdom of Polycarp; Epistle of Barnabas; Epistles of Ignatius (longer and shorter, and also the Syriac Version); Martyrdom of Ignatius; Epistle to Diognetus; Pastor of Hermas; Papias; Spurious Epistles of Ignatius. One Vol. JUSTIN MARTYR; ATHENAGORAS. One Vol. TATIAN; THEOPHILUS; THE CLEMENTINE RECOGNITIONS. One Vol. CLEMENT OF ALEXANDRIA, comprising Exhortation to Heathen; The Instructor; and the Miscellanies. Two Vols. HIPPOLYTUS, Vol. I.; Refutation of all Heresies, and Fragments from his Commentaries. IRENEUS, Vol. I. IRENEUS (completion) and HIPPOLYTUS (completion); Fragments of Third Century. One Vol. TERTULLIAN AGAINST MARCION. One Vol. CYRILIAN: The Epistles and Treatises; NOVIATIAN; MINUCIUS FELIX. Two Vols. ORIGEN; De Principiis; Letters; Treatise against Celsus; and Life of Origen. Two Vols. TERTULLIAN: To the Martyrs; Apology; To the Nations, etc. Three Vols. METHIDIUS; ALEXANDER OF LYCOPLIS; PETER OF ALEXANDRIA ANATOLIUS; CLEMENT ON VIRGINITY; and Fragments. One Vol. APOCRYPHAL GOSPELS, ACTS, AND REVELATIONS; comprising all the very curious Apocryphal Writings of the first Three Centuries. One Vol. CLEMENTINE HOMILIES; APOSTOLICAL CONSTITUTIONS. One Vol. ARNOBIUS. One Vol. GREGORY THAUMATURGUS; DIONYSIUS; ARCHELAUS; SYRIAN FRAGMENTS. One Vol. LACTANTIUS; together with the Testament of the Twelve Patriarchs, and Fragments of the Second and Third Centuries. Two Vols. EARLY LITURGIES AND REMAINING FRAGMENTS. One Vol.

N.B.—Additional Volume, containing 'RECENTLY DISCOVERED MSS,' 4to (pp. 540), 12s. 6d. net.

Alexander.—A SYSTEM OF BIBLICAL THEOLOGY. By the late Principal W. LINDSAY ALEXANDER, D.D., LL.D. Two Vols. 8vo, 21s.

'Oh that Scotland and Congregationalism had many worthies like Dr. Lindsay Alexander! . . . The ripe man, full of rich experience and heavenly knowledge, will prize each leaf, and give himself a glorious drilling as he masters chapter by chapter.'—C. H. SPURGEON.

Beck.—OUTLINES OF BIBLICAL PSYCHOLOGY. By Prof. J. T. BECK, D.D., Tübingen. Cr. 8vo, 4s.

'A useful, handy volume, which compresses into small space the results of scholarly and elaborate investigations.'—*Baptist Magazine*.

Beyschlag.—NEW TESTAMENT THEOLOGY; or, Historical Account of the Teaching of Jesus and of Primitive Christianity according to the New Testament Sources. By Prof. Dr. WILLIBALD BEYSCHLAG, Halle. Two Vols. 8vo, 18s. net.

'It is not only very able, but it is a truly valuable contribution to its subject, and no one who takes upon himself to expound the deep things of God as set forth by the New Testament writers should neglect to make an earnest study of it, and thus enrich his ministration of the word.'—Prof. A. S. PEAKE, M.A.

Blake.—HOW TO READ THE PROPHETS: Being the Prophecies arranged Chronologically in their Historical Setting, with Explanations, Maps, and Glossary. Now complete in 5 Vols. cr. 8vo.

Part I. THE PRE-EXILIAN MINOR PROPHETS (with JOEL). 4s.—Part II. ISAIAH (Chaps. i.—xxxix.). 2s. 6d.—Part III. JEREMIAH. 4s.—Part IV. EZEKIEL. 4s.—Part V. ISAIAH (Chaps. xl.—lxvi.) and THE POST-EXILIAN PROPHETS. 4s.

The Series being now complete, Messrs. Clark offer the Set of 5 Vols. for 15s. net.

'It has often been found a difficulty to profit fully from the reading, especially of the smaller prophecies of the Old Testament. To make these prophecies intelligible to the plainest reader, it seems desirable that a chronological arrangement of the prophetic books should be attempted. Alongside of the several prophecies should be placed those portions of the Old Testament historical books which deal with the same period. The aim of these manuals is consequently in this direction: to bring within the reach of the many a clear and succinct presentation of these prophets in their historical environment.'—From the AUTHOR'S INTRODUCTION.

'Mr. Blake seems to have hit upon the right thing, and he has proved himself competent to do it rightly. While these books are the very best introductions to the study of the prophets, even the accomplished scholar will find them indispensable.'—*Expository Times*.

BOOKS RECOMMENDED IN HASTINGS' 'BIBLE DICTIONARY'

Brockelmann.—**LEXICON SYRIACUM.** Auctore CAROLO BROCKELMANN. Præfatus est TH. NOLDEKE. In handsome roxburghe binding, 30s. net; or in Seven Parts, 4s. each net.

'The appearance of a new Syriac Lexicon, designed to meet the wants of students, is an event of considerable importance for the progress of Semitic studies at home and abroad. The work will be welcomed on all hands as fulfilling what has long been the most conspicuous *lacuna* in Semitic bibliography. . . . The publishers have earned, and will certainly receive, the thanks of every Semitic student for thus coming forward to remove what had almost become a scandal to international scholarship—the lack of a student's dictionary of a language so important to the philologist, the historian, and the theologian.'—A. R. S. KENNEDY, D.D. (Professor of Oriental Languages in the University of Edinburgh), in the *Expository Times*.

Bruce.—**APOLOGETICS; or, Christianity Defensively Stated.** By the late Professor A. B. BRUCE, D.D. Post 8vo, 10s. 6d. (*International Theological Library*.)

'Dr. Bruce has won for himself the foremost place among apologists. . . . There does not exist in our language so satisfactory or original a treatment of the historicity of the Gospels, the claims of Jesus, and the significance of His appearance; nor have we so just and informing a criticism of the theories of primitive Christianity. . . . The Church at large will inevitably recognise Dr. Bruce's "Apologetics" as a volume of great and permanent value.'—*Expositor*.

THE HUMILIATION OF CHRIST, in its Physical, Ethical, and Official Aspects. 8vo, 10s. 6d.

'These lectures are able and deep-reaching to a degree not often found in the religious literature of the day; withal, they are fresh and suggestive. . . . The learning and the deep and sweet spirituality of this discussion will commend it to many faithful students of the truth as it is in Jesus.'—*Congregationalist*.

THE TRAINING OF THE TWELVE; or, Exposition of Passages in the Gospels exhibiting the Twelve Disciples of Jesus under Discipline for the Apostleship. 8vo, 10s. 6d.

'A volume which can never lose its charm either for the preacher or for the ordinary Christian reader.'—*London Quarterly Review*.

THE KINGDOM OF GOD; or, Christ's Teaching according to the Synoptical Gospels. Post 8vo, 7s. 6d.

'To Dr. Bruce belongs the honour of giving to English-speaking Christians the first really scientific treatment of this transcendent theme. . . . his book is the best monograph on the subject in existence.'—Prof. JAMES STALKER, D.D., in the *British Weekly*.

ST. PAUL'S CONCEPTION OF CHRISTIANITY. Post 8vo, 7s. 6d.

'There need be no hesitation in pronouncing it the best treatment of Paulinism we have. . . . A book of first-rate importance.' *Expositor*.

THE EPISTLE TO THE HEBREWS: The First Apology for Christianity. An Exegetical Study. Post 8vo, 7s. 6d.

This book, the fruit of thirty years' study, is a companion volume to Professor Bruce's 'The Kingdom of God' and 'St. Paul's Conception of Christianity.'

Bruce.—**THE ETHICS OF THE OLD TESTAMENT.** By W. S. BRUCE, M.A., D.D., Banff. Cr. 8vo, 4s.

'An excellent work. . . . I have found it most interesting and instructive. I hope that the book may have the success which it well deserves.'—Prof. R. FLINT, D.D., LL.D.

Burton.—**SYNTAX OF THE MOODS AND TENSES IN NEW TESTAMENT GREEK.** By Prof. ERNEST D. BURTON, Chicago University. New and thoroughly Revised Edition. In large 12mo, 5s. 6d. net.

'A valuable book. . . . I venture to express the hope that arrangements may be made to facilitate its circulation in this country.'—Prof. W. SANDAY, D.D., Oxford.

Calvin.—**WORKS OF JOHN CALVIN.** COMMENTARIES, 45 Vols. TRACTS ON THE REFORMATION, 3 Vols.

A Selection of Six Volumes (or more at the same proportion) for 21s., with the exception of *PSALMS*, Vols. I. and V.; *HABAKKUK* and *CORINTHIANS*, 2 Vols.—which are now out of print. Any separate Vol., 6s.

THE LETTERS, Edited by Dr. BONNET, 2 Vols., 10s. 6d.

THE INSTITUTES, 2 Vols., Translated, 14s.

THE INSTITUTES, in Latin, 2 Vols., Tholuck's Edition, 14s. net.

Candlish.—**THE KINGDOM OF GOD, Biblically and Historically considered.** By the late Prof. J. S. CANDLISH, D.D. 8vo, 10s. 6d.

'Dr. Candlish treats his subject with an admirable combination of scholarly comprehensiveness, historical candour, and regard to the practical demands of mankind.'—*Christian World*.

THE WORK OF THE HOLY SPIRIT. Cr. 8vo, 1s. 6d.

Cave.—**THE SCRIPTURAL DOCTRINE OF SACRIFICE AND ATONEMENT.** 8vo, 10s. 6d.

'Let readers judge: is this not now the best systematic study of the Atonement in the English language?'—*Expository Times*.

Cremer.—**BIBLICO-THEOLOGICAL LEXICON OF NEW TESTAMENT GREEK.** By Prof. H. CREMER, D.D. In demy 4to, 4th Edition, with SUPPLEMENT, 38s.

This Lexicon deals with words whose meaning in the Classics is modified or changed in Scripture—words which have become the bases and watchwords of Christian theology, tracing their history in their transference from the Classics into the LXX, and from the LXX into the New Testament, and the gradual deepening and elevation of their meaning till they reach the fulness of New Testament thought.

'It gives with care and thoroughness a complete history, as far as it goes, of each word and phrase that it deals with. . . . Dr. Cremer's explanations are most lucidly set out.'—*Guardian*.

Dahle.—**LIFE AFTER DEATH, and the Future of the Kingdom of God.** By Bishop DAHLE, Knight of St. Olaf. *Authorised Translation.* 8vo, 10s. 6d.

The late Rev. C. A. BERRY, D.D., wrote: 'Messrs. T. & T. Clark have enriched modern theological literature by the publication of this book. The volume is a careful, scholarly, and evangelical treatment of the doctrine of "Last Things," and bears evidence on every page, not only of close and prolonged study, but of the profound piety and charming spirit of the writer.'

Dalman.—**THE WORDS OF JESUS.** Considered in the Light of Post-Biblical Jewish Writings and the Aramaic Language. By Prof. G. DALMAN, Leipzig. *Authorised Translation* by Prof. D. M. KAY, St. Andrews. Post 8vo, 7s. 6d. net.

'No German scholar has given us a volume so absolutely indispensable to the understanding of the New Testament.'—*British Weekly*.

Davidson.—**THE THEOLOGY OF THE OLD TESTAMENT.** By the late Prof. A. B. DAVIDSON, D.D., Litt.D., LL.D. Edited by Principal S. D. F. SALMOND, D.D. (*International Theological Library Series*.) Post 8vo, 12s.

'This is probably the volume with which the name of Prof. A. B. Davidson will come to be most identified. 'It contains the fully matured fruits of many years' study of the Old Testament, and of practical experience in teaching its theology. It will take its place in English theological literature as marking the highest level both of scholarship and of religious thought and feeling. It is truly a great work on a great subject.'—Dr. J. A. SELBIE, in the *Expository Times*.

BOOKS RECOMMENDED IN HASTINGS' 'BIBLE DICTIONARY'

Davidson.—THE EPISTLE TO THE HEBREWS. Cr. 8vo, 2s. 6d.

'For its size and price, one of the very best theological handbooks with which I am acquainted—a close grappling with the thought of the Epistle by a singularly strong and candid mind.'—Professor SANDAY in the *Academy*.

THE EXILE AND THE RESTORATION. With Map and Plan. Paper cover, 6d.; cloth, 8d.

'A remarkable instance of Professor Davidson's gift of compressed lucid statement. . . . It may be safely said that nowhere within anything like the same narrow limits will one get so vivid a view of that period of Old Testament history.'—*Expository Times*.

Also by Prof. A. B. DAVIDSON:—

AN INTRODUCTORY HEBREW GRAMMAR, with Progressive Exercises in Reading and Writing. Seventeenth Edition. 8vo, 7s. 6d.

'The best Hebrew Grammar is that of Professor A. B. Davidson.'—*British Weekly*.

HEBREW SYNTAX. Third Edition. 8vo, 7s. 6d.

'The whole is, it is needless to say, the work of a master; but it is the work of a master who does not shoot over the learners' heads—one who by long experience knows exactly where help is most needed, and how to give it in the simplest and clearest fashion.'—*Methodist Recorder*.

OLD TESTAMENT PROPHECY. Edited by Prof. J. A. PATERSON, D.D. One large 8vo Vol., 10s. 6d. net.

Old Testament Prophecy was Dr. Davidson's favourite study, and in this volume are contained the final results of forty years' strenuous thinking on this profoundly interesting subject.

THE CALLED OF GOD. With Biographical Introduction by A. TAYLOR INNES, Esq., Advocate, and Portraits. Post 8vo, 6s.

'The biographical introduction is admirable. . . . The sermons have thoughts that startle with their depth; they have passages that thrill us with their suppressed emotion.'—*Aberdeen Free Press*.

WAITING UPON GOD (a further, and final, Selection of Sermons). Post 8vo, 6s.

Deane.—PSEUDEPIGRAPHIA: An Account of certain Apocryphal Sacred Writings of the Jews and early Christians. By Rev. W. J. DEANE, M.A. Post 8vo, 7s. 6d.

'It is the most complete book on the subject in the English language, and contains the most ample information on these writings. It is indispensable to every scholar who wishes to be acquainted with this class of literature, and should occupy a place in the library of every theologian.'—PATON J. GLOAG, D.D.

Deissmann.—BIBLE STUDIES. Contributions, chiefly from Papyri and Inscriptions, to the History of the Language, Literature, and Religion of Hellenistic Judaism and Primitive Christianity. By Prof. G. A. DEISSMANN. *Authorised Translation* (incorporating Dr. DEISSMANN'S most recent changes and additions) by Rev. A. GRIEVE, M.A., Ph.D. 8vo, 9s.

'In every respect a notable book. . . . As to its value there can be no hesitation about the verdict. . . . Words, syntax, and ideas can all be tested over again by a completely new apparatus of study, the lexicon of the New Testament can be enriched, the grammar rewritten, and the theology revived and humanised.'—Dr. J. RENDEL HARRIS in the *Examiner*.

Delitzsch.—A NEW COMMENTARY ON GENESIS. By Prof. FRANZ DELITZSCH, D.D. Two Vols. 8vo, 12s. net.

'We congratulate Professor Delitzsch on this new edition. By it, not less than by his other commentaries, he has earned the gratitude of every lover of biblical science, and we shall be surprised if, in the future, many do not acknowledge that they have found in it a welcome help and guide.'—Prof. S. R. DRIVER in the *Academy*.

Delitzsch.—THE PROPHECIES OF ISAIAH. Translated from the Fourth and last Edition. *The only Authorised Translation*. With an Introduction by Prof. S. R. DRIVER, D.D., Oxford. Two Vols. 8vo, 12s. net.

'Delitzsch's last gift to the Christian Church. . . . In our opinion, those who would enter into the meaning of that Spirit as He spake long ago by Isaiah words of comfort and hope which have not lost their significance to-day, cannot find a better guide, one more marked by learning, reverence, and insight, than Franz Delitzsch.'—Professor W. T. DAVISON in the *Expository Times*.

A SYSTEM OF BIBLICAL PSYCHOLOGY. 8vo, 12s.

'Still the best book on the subject.'—Principal CAVE, D.D.

Dorner.—A SYSTEM OF CHRISTIAN DOCTRINE. By Prof. I. A. DORNER, D.D. Four Vols, 8vo, 21s. net.

'Had it been the work of an entire lifetime, it would have been a monument of marvellous industry and rare scholarship. It is a tribute alike to the genius, the learning, and the untiring perseverance of its author.'—*Baptist Magazine*.

SYSTEM OF CHRISTIAN ETHICS. 8vo, 14s.

'This noble book is the crown of the Systematic Theology of the author. . . . It is a masterpiece. It is the fruit of a lifetime of profound investigation in the philosophical, biblical, and historical sources of theology. The system of Dorner is comprehensive, profound, evangelical, and catholic. It rises into the clear heaven of Christian thought above the strifes of Scholasticism, Rationalism, and Mysticism. It is, indeed, comprehensive of all that is valuable in these three types of human thought.'—Prof. C. A. BRIGGS, D.D.

Driver.—AN INTRODUCTION TO THE LITERATURE OF THE OLD TESTAMENT. By Prof. S. R. DRIVER, D.D. (*International Theological Library*.) Eighth Edition. 12s.

The *Guardian* says: 'By far the best account of the great critical problems connected with the Old Testament that has yet been written. . . . It is a perfect marvel of compression and lucidity combined. A monument of learning and well-balanced judgment.'

DEUTERONOMY. *International Critical Commentary*.) Third Edition. 12s.

Prof. G. A. SMITH, in the *Critical Review*, says: 'The series could have had no better introduction than this volume from its Old Testament editor. . . . Dr. Driver has achieved a commentary of rare learning and still more rare candour and sobriety of judgment.'

Ebrard.—APOLOGETICS; or, The Scientific Vindication of Christianity. By Prof. J. H. A. EBRARD, D.D. Three Vols. 8vo, 18s. net.

'Dr. Ebrard takes nothing for granted. He begins at the beginning, laying his foundations deep and strong, and building upon them patiently and laboriously, leaving no gaps, no loose work, and adjusting each stone to its place and use.'—*Church Bells*.

Edgar.—THE GOSPEL OF A RISEN SAVIOUR. By R. M'CHEYNE EDGAR, D.D. Post 8vo, 7s. 6d.

Principal FAIRBAIRN writes: 'Let me thank you for a most instructive and stimulating book. I am struck with its careful workmanship and the way in which it has grouped its material round its central idea. I am sure every evangelical theologian must feel that you have made a most helpful contribution to a great subject.'

Expository Times.—THE EXPOSITORY TIMES. Edited by Rev. JAMES HASTINGS, D.D., Editor of the 'Bible Dictionary.'

The purpose of THE EXPOSITORY TIMES is to record the results of the best study of the Bible in the present day, in an interesting and practically useful form; and to stimulate and guide both Ministers and Laymen towards a fuller, more accurate, more fruitful study of the same inexhaustibly precious library.

PUBLISHED MONTHLY, 6d. ANNUAL SUBSCRIPTION, 6s. Complete Vol., in cloth binding, 7s. 6d.

'Dr. Hastings has made The *Expository Times* the best preacher's monthly magazine we have. . . . The scholar and the ordinary pastor will find rich material here.'—*London Quarterly Review*.

* * * A Specimen Copy of the Magazine will be sent free on application to the Publishers.

Fairweather.—FROM THE EXILE TO THE ADVENT.
By W. FAIRWEATHER, D.D. Cr. 8vo, 2s.

Forbes.—THE SERVANT OF THE LORD, in Isaiah xl.-lxvi. Reclaimed to Isaiah as the Author, from Argument, Structure, and Date. By Prof. JOHN FORBES, D.D. Cr. 8vo, 5s.

'Dr. Forbes' commentary and translation will be found useful and suggestive, and we admire the courage and enthusiasm which have enabled him to complete such a task.'—*Scotsman*.

Forrest.—THE CHRIST OF HISTORY AND OF EXPERIENCE. By Rev. DAVID W. FORREST, D.D., Edinburgh. Post 8vo, 6s.

'This book has now won for itself the position of a standard work on a subject which recent critical and theological investigations have rendered of the first importance.'—*Examiner*.

Geden.—A CONCORDANCE TO THE GREEK TESTAMENT: According to the Texts of Westcott and Hort, Tischendorf, and the English Revisers. Edited by W. F. MOULTON, D.D., and A. S. GEDEN, M.A. In cr. 4to (pp. 1040). SECOND EDITION, *Revised throughout*. Price 26s. net; or in half-morocco, 31s. 6d. net.

* * * It will be generally allowed that a new Concordance to the Greek Testament is much needed in the interests of sacred scholarship. This work adopts a new principle, and aims at providing a full and complete Concordance to the text of the Greek Testament as it is set forth in the editions of Westcott and Hort, Tischendorf (8th), and the English Revisers. The first-named has throughout been taken as the standard, and the marginal readings have been included. Thus the student with any one of these three editions in his hands will find himself in possession of a complete Concordance to the actual text on which he is engaged. While the method employed, it may fairly be claimed, precludes the omission of any word or phrase which, by even a remote probability, might be regarded as forming part of the true text of the New Testament, on the other hand passages disappear as to the spuriousness of which there is practical unanimity among scholars.

Professor W. SANDAY, D.D., LL.D., Oxford, writes: 'There can be no question as to the value of the new "Concordance." It is the only scientific Concordance to the Greek Testament, and the only one that can be safely used for scientific purposes.'

'It would be difficult to overpraise this invaluable addition to biblical study. . . . For all English students of the Greek Testament this great work is indispensable.'—*BRITISH WEEKLY*.

Prospectus, with Specimen Page, free on application.

Gloag.—INTRODUCTION TO THE CATHOLIC EPISTLES.
By PATON J. GLOAG, D.D. 8vo, 10s. 6d.

'A work of masterly strength and uncommon merit.'—*Evangelical Magazine*.

Godet.—A COMMENTARY ON THE GOSPEL OF ST. LUKE. By Prof. F. GODET, D.D., Neuchâtel. Two Vols. 8vo, 12s. net.

'Marked by clearness and good sense, it will be found to possess value and interest as one of the most recent and copious works specially designed to illustrate this Gospel.'—*Guardian*.

A COMMENTARY ON THE GOSPEL OF ST. JOHN.
Three Vols. 8vo, 18s. net.

'This Gospel forms one of the battlefields of modern inquiry, and is itself so rich in spiritual truth that it is impossible to examine it too closely; and we welcome this treatise from the pen of Dr. Godet. We have no more competent exegete, and this new volume shows all the learning and vivacity for which the author is distinguished.'—*Freeman*.

Godet.—A COMMENTARY ON ST. PAUL'S EPISTLE TO THE ROMANS. Two Vols. 8vo, 12s. net.

'We prefer this commentary to any other we have seen on the subject.'—*British and Foreign Evangelical Review*.

A COMMENTARY ON ST. PAUL'S FIRST EPISTLE TO THE CORINTHIANS. Two Vols. 8vo, 12s. net.

'We do not know any better commentary to put into the hands of theological students.'—*Guardian*.

INTRODUCTION TO THE NEW TESTAMENT.

- I. THE EPISTLES OF ST. PAUL. 8vo, price 12s. 6d. net.
- II. THE GOSPEL COLLECTION, AND ST. MATTHEW'S GOSPEL. 8vo, 6s. net.

'In every particular it is fully abreast of the times. For the purposes of the hard-working preacher there is no book on St. Paul's Epistles quite equal to this. For the student, it must always lie in a place that his hand can reach. It is delightful reading.'—*Methodist Times*.

Grimm.—GREEK-ENGLISH LEXICON OF THE NEW TESTAMENT: Being Grimm's Wilke's Clavis Novi Testamenti. Translated, Revised, and Enlarged by Prof. J. H. THAYER, D.D., Harvard University. Fourth Edition. Demy 4to, 36s.

'The best New Testament Greek Lexicon. . . . It is a treasury of the results of exact scholarship.'—Bishop WESTCOTT.

Hagenbach.—A HISTORY OF CHRISTIAN DOCTRINES. By the late Dr. K. R. HAGENBACH. With Introduction by Dean PLUMPTRE. Three Vols. 8vo, 18s. net.

'There is no work which deals with this subject in a manner so scientific and so thorough as Hagenbach's.'—*Church Bells*.

Hill.—A DISSERTATION ON THE GOSPEL COMMENTARY OF S. EPHRAEM THE SYRIAN. With a Scriptural Index to his Works. By the Rev. J. HAMLYN HILL, D.D. 8vo, 7s. 6d.

The BISHOP OF GLOUCESTER AND BRISTOL writes: 'This work forms a valuable appendix to Dr. Hill's English Version of the "Diatessaron." . . . It is a monument of patient research and intelligent industry, which deserves very hearty recognition.'

Johns.—THE OLDEST CODE OF LAWS IN THE WORLD. The Code of Laws promulgated by HAMMURABI, King of Babylon, B.C. 2285-2242. Translated by C. H. W. JOHNS, M.A., Lecturer on Assyriology, Queens' College, Cambridge. Cr. 8vo, 1s. 6d. net.

'The discovery and decipherment of this Code is the greatest event in biblical archaeology for many a day. A translation of the Code, done by Mr. Johns, of Queens' College, Cambridge, the highest living authority on this department of study, has just been published by Messrs. T. & T. Clark in a cheap and attractive booklet. Winckler says it is the most important Babylonian record which has thus far been brought to light.'—*Expository Times*.

Keil.—HANDBOOK OF BIBLICAL ARCHÆOLOGY. By Prof. C. F. KEIL. Two Vols. 8vo, 12s. net.

'No mere dreary mass of details, but a very luminous, philosophical, and suggestive treatise. Many chapters are not simply invaluable to the student, but have also very direct homiletic usefulness.'—*Literary World*.

INTRODUCTION AND COMMENTARIES. 6s. net, per Vol., viz.:—

- INTRODUCTION TO THE OLD TESTAMENT. 2 Vols.
- COMMENTARY ON THE PENTATEUCH. 3 Vols.
- COMMENTARY ON JOSHUA, JUDGES, AND RUTH. One Vol.
- COMMENTARY ON THE BOOKS OF SAMUEL. One Vol.
- COMMENTARY ON THE BOOKS OF KINGS. One Vol.
- COMMENTARY ON THE BOOKS OF CHRONICLES. One Vol.
- COMMENTARY ON EZRA, NEHEMIAH, AND ESTHER. One Vol.
- COMMENTARY ON JEREMIAH AND LAMENTATIONS. 2 Vols.
- COMMENTARY ON EZEKIEL. 2 Vols.
- BOOK OF DANIEL. One Vol.
- COMMENTARY ON THE MINOR PROPHETS. 2 Vols.

BOOKS RECOMMENDED IN HASTINGS' 'BIBLE DICTIONARY'

König.—THE EXILES' BOOK OF CONSOLATION (Deutero-Isaiah). By Prof. ED. KÖNIG, D.D. Cr. 8vo, 3s. 6d.

'The appearance of this book is most opportune. . . . The views of Professor König upon the interesting questions he discusses are sure to receive the careful attention of scholars of every shade of critical opinion.'—*Expository Times*.

Ladd.—THE DOCTRINE OF SACRED SCRIPTURE: A Critical, Historical, and Dogmatic Inquiry into the Origin and Nature of the Old and New Testaments. By Prof. G. T. LADD, D.D., Yale College. 2 Vols. 8vo (1600 pp.), 24s.

'It is not easy to give an account of this very considerable and important work within the compass of one short notice. . . . It is one which will certainly be studied by all scientific theologians, and the general reader will probably find here a better summary of the whole subject than in any other work or series of works.'—*Church Bells*.

Laidlaw.—THE BIBLE DOCTRINE OF MAN; or, The Anthropology and Psychology of Scripture. By Prof. J. LAIDLAW, D.D. Post 8vo, 7s. 6d.

'The standard work in English on the Anthropology and Psychology of the Bible. . . . A volume worthy of its subject, and likely to hold the first place in it for many days to come.'—*Expository Times*.

Lechler.—THE APOSTOLIC AND POST-APOSTOLIC TIMES: Their Diversity and Unity in Life and Doctrine. By Prof. G. V. LECHLER, D.D. Two Vols. cr. 8vo, 16s.

'It contains a vast amount of historical information, and is replete with judicious remarks. . . . By bringing under the notice of English readers a work so favourably thought of in Germany, the translator has conferred a benefit on theology.'—*Athenæum*.

Luthardt.—A HISTORY OF CHRISTIAN ETHICS BEFORE THE REFORMATION. By Prof. C. E. LUTHARDT, D.D., Leipzig. Translated by Prof. W. HASTIE, D.D. 8vo, 6s. net.

'Charmingly written, and adequately covers the ground. . . . The ablest and most thorough historical exposition of the subject of Christian Ethics that has been made accessible to English-speaking people.'—*Presbyterian and Reformed Review*.

Macpherson.—COMMENTARY ON ST. PAUL'S EPISTLE TO THE EPHESIANS. By the late Rev. J. MACPHERSON, M.A. 8vo, 10s. 6d.

'It is an advance, and a great one, on anything we yet possess. . . . The author goes to the root, and neglects nothing that usually comes under the eye of a careful student. . . . Besides all this, the book is a living book. One is conscious of the heart of a man in it, as well as the brains.'—*Methodist Times*.

Martensen.—CHRISTIAN DOGMATICS, 1 Vol.—CHRISTIAN ETHICS, 3 Vols. (General, Individual, Social). By H. MARTENSEN, D.D., Bishop of Seeland. 8vo, 6s. net per Vol.

'The greatest Scandinavian, perhaps the greatest Lutheran, divine of our century. The famous "Dogmatics," the eloquent and varied pages of which contain intellectual food for the laity no less than for the clergy. . . . His "Christian Dogmatics" has exercised as wide an influence on Protestant thought as any volume of our century.'—*Expositor*.

Meyer.—CRITICAL AND EXEGETICAL COMMENTARY ON THE NEW TESTAMENT. By Dr. H. A. W. MEYER, Oberconsistorialrath, Hannover. Under the editorial care of Rev. Dr. DICKSON, late Professor of Divinity in the University of Glasgow. In 20 handsome 8vo Vols., price £5, 5s. net. Or a selection may now be made of

any 4 Vols. for One Guinea net (or a larger number at the same proportion). Any Volume may be had separately, price 10s. 6d.

ST. MATTHEW'S GOSPEL, 2 Vols.; MARK AND LUKE, 2 Vols.; ST. JOHN'S GOSPEL, 2 Vols.; ACTS OF THE APOSTLES, 2 Vols.; ROMANS, 2 Vols.; CORINTHIANS, 2 Vols.; GALATIANS, One Vol.; EPHESIANS AND PHILEMON, One Vol.; PHILIPPIANS AND COLOSSIANS, One Vol.; THESSALONIANS, One Vol.; TIMOTHY AND TITUS, One Vol.; HEBREWS, One Vol.; JAMES AND JOHN, One Vol.; PETER AND JUDE, One Vol.

Milligan.—THE RESURRECTION OF THE DEAD. By the late Prof. W. MILLIGAN, D.D. Crown 8vo, 4s. 6d.

'In the treatment of such passages as these, Dr. Milligan's thoughtfulness, judgment, and scholarship reach their highest expression. We can but lament that this is the last volume for which we shall be indebted to him.'—*Record*.

Moore.—JUDGES. By Prof. G. F. MOORE, D.D. Second Edition. 12s. (*International Critical Commentary*.)

BISHOP H. E. RYLE, D.D., says: 'I think it may safely be averred that so full and scientific a commentary upon the text and subject-matter of the Book of Judges has never been produced in the English language.'

Moulton.—A CONCORDANCE TO THE GREEK TESTAMENT. (See under **Geden**.)

Müller.—THE CHRISTIAN DOCTRINE OF SIN. By Dr. JULIUS MÜLLER. Two Vols. 8vo, 12s. net.

McGiffert.—A HISTORY OF CHRISTIANITY IN THE APOSTOLIC AGE. By Prof. A. C. MCGIFFERT, D.D. Post 8vo, 12s. (*International Theological Library*.)

'A reverent and eminently candid treatment of the Apostolic Age in the light of research.'—*Literary World*.

Neander.—GENERAL HISTORY OF THE CHRISTIAN RELIGION AND CHURCH. By Dr. NEANDER. Vols. I.—VIII. £2, 2s. net.

Oehler.—THEOLOGY OF THE OLD TESTAMENT. Translated from the German of Dr. G. FR. OEHLER. Two Vols. 8vo, 12s. net.

'These volumes form a treatise of rare worth.'—*Bibliotheca Sacra*.

Orelli.—THE TWELVE MINOR PROPHETS. By Prof. C. VON ORELLI, D.D. 8vo, 6s. net.

'A very valuable and trustworthy compendium of the latest results of critical research, written in a sober and devout spirit.'—*Christian World*.

THE OLD TESTAMENT PROPHECY OF THE CONSUMMATION OF GOD'S KINGDOM. Traced in its Historical Development. 8vo, 6s. net.

'Cannot fail to be regarded as a standard work upon the subject of Old Testament prophecy.'—*Sword and Trowel*.

Reuss.—HISTORY OF THE SACRED SCRIPTURES OF THE NEW TESTAMENT. By Prof. E. REUSS, D.D. 8vo, 640 pp., 15s.

'One of the most valuable volumes of Messrs. Clark's valuable publications. . . . Its usefulness is attested by undiminished vitality. . . . His method is admirable, and he unites German exhaustiveness with French lucidity and brilliance of expression. . . . The sketch of the great exegetical epochs, their chief characteristics, and the critical estimates of the most eminent writers, is given by the author with a compression and a mastery that have never been surpassed.'—Archdeacon FARRAR.

BOOKS RECOMMENDED IN HASTINGS' 'BIBLE DICTIONARY'

Riehm.—MESSIANIC PROPHECY: Its Origin, Historical Growth, and Relation to New Testament Fulfilment. By Dr. EDWARD RIEHM. New Edition, Translated by Rev. L. A. MUIRHEAD, B.D. With an Introduction by the late Prof. A. B. DAVIDSON, D.D. Post 8vo, 7s. 6d.

'No work of the same compass could be named that contains so much that is instructive on the nature of prophecy in general, and particularly on the branch of it specially treated in the book.'—Prof. A. B. DAVIDSON, D.D.

Ritschl.—JUSTIFICATION AND RECONCILIATION. By ALBRECHT RITSCHL. Edited by Prof. H. R. MACKINTOSH, D.Phil., and A. B. MACAULAY, M.A. Second Edition. One large Vol. 8vo, 14s.

'At last there is provided what has been a desideratum for years—a really reliable translation of the great dogmatic work on "Justification," by which the most noted of modern theologians chiefly made his mark on the thinking of his age.'—*Critical Review*.

Salmond.—THE CHRISTIAN DOCTRINE OF IMMORTALITY. By Principal S. D. F. SALMOND, D.D. Post 8vo, 9s.

'This is, beyond all doubt, the *one* book on the transcendent subject of which it treats. There is none like it—sound, frank, fearless, and yet modest in every page.'—*Methodist Times*.

Sanday.—ROMANS. By Prof. W. SANDAY, D.D., LL.D., and Rev. A. C. HEADLAM, D.D., Oxford. Fourth Edition. 12s. (*International Critical Commentary*.)

Principal F. H. CHASE, D.D., Cambridge, says: 'We welcome it as an epoch-making contribution to the study of St. Paul.'

Sayce.—THE RELIGIONS OF ANCIENT EGYPT AND BABYLONIA. The Gifford Lectures on the Ancient Egyptian and Babylonian Conception of the Divine. By Prof. A. H. SAYCE, M.A., LL.D., Oxford. 8vo, 8s. net.

'Extremely interesting. . . . One can have no guide in these complex subjects more learned or more considerate to his readers' difficulties than Professor Sayce. He always writes from the amplest knowledge, and he always writes clearly.'—*Spectator*.

Schaff.—HISTORY OF THE CHRISTIAN CHURCH. By the late Prof. PHILIP SCHAFF, D.D., LL.D.

There are Six 'Divisions' (in Two Vols. each, ex. demy 8vo, 21s.) of this great work. Each Division covers a separate and distinct epoch, and is complete in itself.

1. APOSTOLIC CHRISTIANITY, A.D. 1-100.
2. ANTE-NICENE CHRISTIANITY, A.D. 100-325.
3. NICENE AND POST-NICENE CHRISTIANITY, A.D. 325-600.
4. MEDIEVAL CHRISTIANITY, A.D. 590-1073.
5. THE GERMAN REFORMATION.
6. THE SWISS REFORMATION.

'Dr. Schaff's "History of the Christian Church" is the most valuable contribution to Ecclesiastical History that has ever been published in this country. It has no rival in point of comprehensiveness, and in presenting the results of the most advanced scholarship and the latest discoveries. Each Division covers a separate and distinct epoch, and is complete in itself.'

'No student, and indeed no critic, can with fairness overlook a work like the present, written with such evident candour, and, at the same time, with so thorough a knowledge of the sources of early Christian history.'—*Scotsman*.

COMMENTARY ON THE NEW TESTAMENT. With Illustrations and Maps. Edited by PHILIP SCHAFF, D.D., LL.D. Complete in Four Vols. imp. 8vo, 12s. 6d. each.

CONTRIBUTORS:—The Very Rev. Dean Howson; The Very Rev. Dean Plumptre; Principal David Brown, D.D.; J. Rawson Lumby, D.D.; W. Milligan, D.D.; W. F. Moulton, D.D.; Rev. Canon Spence; Marcus Dods, D.D.; J. Oswald Dykes, D.D.; Joseph Angus, D.D.; Paton J. Gloag, D.D.; Principal S. D. F. Salmond, D.D.; William B. Pope, D.D.; Philip

Schaff, D.D.; Matthew B. Riddle, D.D. MAPS AND PLANS—Prof. Arnold Guyot. ILLUSTRATIONS—W. M. Thomson, D.D., Author of 'The Land and the Book.'

- Vol. I. THE SYNOPTICAL GOSPELS.
Vol. II. ST. JOHN'S GOSPEL, AND THE ACTS OF THE APOSTLES.
Vol. III. ROMANS TO PHILEMON.
Vol. IV. HEBREWS TO REVELATION.

N.B.—THE INTRODUCTION TO, AND COMMENTARY ON, ST. JOHN'S GOSPEL, by Drs. MILLICAN and MOULTON, is also published separately in One Vol. Price 9s.

'We congratulate Dr. Schaff on the completion of this useful work, which we are now able to commend, in its complete form, to English Readers of the Scriptures. . . . It will be seen that we have a high opinion of this commentary, of the present volume, and also of the whole work. In this last respect it is perhaps of more uniform excellence than any of its rivals, and in beauty of appearance it excels them all.'—*Church Bells*.

Schultz.—OLD TESTAMENT THEOLOGY. The Religion of Revelation in its Pre-Christian Stage of Development. By Prof. H. SCHULTZ, D.D. Authorised Translation by Prof. J. A. PATERSON, D.D. Two Vols. 8vo, 18s. net.

'Professor Paterson has executed the translation with as much skill as care. . . . Readers may rely on his having given the meaning of the original with the utmost accuracy.'—*From the Author's Preface to the Translation*.

'The book will be read with pleasure, and, it need not be said, with profit, not only by professional students, but by all intelligent persons who have an interest in the Old Testament. . . . Though externally popular and of singularly literary finish, the author's work within is a laborious and able study of the whole subject.'—Prof. A. B. DAVIDSON, D.D.

Schürer.—HISTORY OF THE JEWISH PEOPLE IN THE TIME OF JESUS CHRIST. By Prof. E. SCHÜRER, D.D., University of Göttingen. Complete in 5 Vols., 8vo. INDEX VOL. (100 pp. 8vo), 2s. 6d. net.

'Recognised as the standard authority on the subject.'—*Critical Review*.

Smyth.—CHRISTIAN ETHICS. By NEWMAN SMYTH, D.D. 10s. 6d. (*International Theological Library*.)

The *Bookman* says: 'It is the work of a wise, well-informed, independent, and thoroughly competent writer. It is sure to become the text-book in Christian Ethics.'

Stalker.—THE LIFE OF JESUS CHRIST. By Prof. J. STALKER, D.D. In large type and handsomely bound, cr. 8vo, 3s. 6d.

'Even with all our modern works on the exhaustless theme, from Neander to Farrar and Geikie, there is none which occupies the ground of Dr. Stalker's. . . . We question whether any one popular work so impressively represents Jesus to the mind.'—*Christian*.

THE LIFE OF ST. PAUL. Uniform with the 'Life of Christ' in size and price.

'Even to those who know by heart the details of the great apostle's life, this glowing sketch will be a revelation. Written with a fine sympathy for the more tender and personal aspects of his theme, Dr. Stalker has portrayed the outer and the inner life of Paul with a mingled power and beauty which is as rare as it is needed in evangelical writings.'—*Christian*.

* * * Small type Editions of both Volumes, in the 'BIBLE CLASS HANDBOOK' Series, price 1s. 6d. each.

Thayer.—GRIMM'S GREEK ENGLISH LEXICON OF THE NEW TESTAMENT. Edited by Prof. J. H. THAYER. (See under Grimm.)

Weiss.—THE LIFE OF CHRIST. By Prof. BERNHARD WEISS. Three Vols. 8vo, 18s. net.

'The authority of John's Gospel is vindicated with great fulness and success. Altogether, the book seems destined to hold a very distinguished, if not absolutely unique, place in the criticism of the New Testament. Its fearless search after truth, its independence of spirit, its extent of research, its thoughtful and discriminating tone, must secure for it a very high reputation.'—*Congregationalist*.

BOOKS RECOMMENDED IN HASTINGS' 'BIBLE DICTIONARY'

Weiss.—**BIBLICAL THEOLOGY OF THE NEW TESTAMENT.** Two Vols. 8vo, 12s. net.

'Written throughout with freshness, vigour, and perfect command of the material. . . . This is a field which Weiss has made his own. His work far exceeds the numerous works of his predecessors in thoroughness and completeness.'—*Methodist Recorder*.

NOTE.—These Five Volumes by Prof. Weiss may now be had complete for 26s. 3d. net.

Wendt.—**THE TEACHING OF JESUS.** By Prof. H. H. WENDT, D.D., Jena. Two Vols. 8vo, 21s.

'Dr. Wendt's work is of the utmost importance for the study of the Gospels, both with regard to the origin of them and to their doctrinal contents. It is a work of distinguished learning, of great originality, and of profound thought. The second part [now translated into English], which sets forth the contents of the doctrine of Jesus, is the most important contribution yet made to biblical theology, and the method and results of Dr. Wendt deserve the closest attention. . . . No greater contribution to the study of biblical theology has been made in our time. A brilliant and satisfactory exposition of the teaching of Christ.'—Prof. J. IVERACH, D.D., in the *Expositor*.

Woods.—**THE HOPE OF ISRAEL: A Review of the Argument from Prophecy.** By the Rev. F. H. WOODS, B.D. Cr. 8vo, 3s. 6d.

'The book is a convenient and attractive one. And the subject being the keenest controverted in our day,—being, indeed, the one subject which has passed into feverish interest and unrest,—and Mr. Woods being a master on both sides of it, this volume should have a wide and thankful welcome.'—*Expository Times*.

Workman.—**THE TEXT OF JEREMIAH; or, A Critical Investigation of the Greek and Hebrew, with the Variations in the LXX retranslated into the Original, and Explained.** By Prof. G. C. WORKMAN, M.A. With an Introduction by Prof. F. DELITZSCH, D.D. Post 8vo, 9s.

'The most painstaking and elaborate illustration of the application of his principles to this end that has yet been given to the world. . . . Scholars will hail it with gratitude, and peruse it with interest.'—*Guardian*.

The International Theological Library.

Edited by Principal S. D. F. SALMOND, D.D., and Prof. C. A. BRIGGS, D.D.

Seventeen Volumes are now ready, viz.:—

1. AN INTRODUCTION TO THE LITERATURE OF THE OLD TESTAMENT. Prof. S. R. DRIVER, D.D. 12s.
2. OLD TESTAMENT HISTORY. Prof. H. P. SMITH, D.D. 12s.
3. OLD TESTAMENT THEOLOGY. Prof. A. B. DAVIDSON, LL.D., 12s.
4. THE CANON AND TEXT OF THE NEW TESTAMENT. Prof. C. R. GREGORY, D.D., LL.D. 12s.
5. THE THEOLOGY OF THE NEW TESTAMENT. Prof. G. B. STEVENS, D.D. 12s.
6. THE CHRISTIAN DOCTRINE OF GOD. Prof. W. N. CLARKE, D.D. 10s. 6d.

9. ECCLESIASTES. Prof. G. A. BARTON, Ph.D. 8s. 6d.
10. AMOS AND HOSEA. Pres. W. R. HARPER, Ph.D. 12s.
11. ST. MATTHEW. Principal W. C. ALLEN, M.A. 12s.
12. ST. MARK. Prof. E. P. GOULD, D.D. 10s. 6d.
13. ST. LUKE. A. PLUMMER, D.D. 12s.
14. ROMANS. Prof. W. SANDAY, D.D., and Rev. A. C. HEADLAM.
15. PETER AND JUDE. Prof. W. BIGG, D.D. 12s.
16. PHILIPPIANS AND PHILEMON. Prof. M. R. VINCENT, D.D. 8s. 6d.
17. EPHESIANS AND COLOSSIANS. T. K. ABBOTT, D.Lit. 10s. 6d.

* * * The above two 'International' Series are constantly referred to throughout the 'Bible Dictionary.'

Detailed Prospectus on application.

A most useful, and indeed indispensable, companion to the 'Bible Dictionary' is the—

NEW TOPOGRAPHICAL, PHYSICAL, AND BIBLICAL MAP OF PALESTINE. (Scale—4 miles to an inch.) Compiled from the latest Surveys and Researches, including the Work of the English and German Palestine Exploration Funds. Showing all identified Biblical Sites, together with the Modern Place-Names. Prepared under the Direction of J. G. BARTHOLOMEW, F.R.S.E., F.R.G.S., and Edited by Prof. GEORGE ADAM SMITH, LL.D. With complete Index.

Prices: Mounted on cloth and in cloth case, with Index, 10s. 6d.; mounted on rollers and varnished, with Index separate, 15s.; mounted on cloth, in two sheets folded in leather packet, 15s.

This new Map has been designed to present in a clear and readily accessible form the results of recent Surveys and Research in Palestine. It represents a complete survey of the country as it exists at the present day, while superimposed upon this are all the Scriptural names of the past. The Map is drawn to the scale of four miles to an inch, and includes the country from Beirut in the north to the Araab in the south, extending as far east as Damascus and Jebel Hauran. All the modern place-names are given, while the accepted identified Biblical sites have been added in bolder lettering.

The Physical Relief of the country is effectively shown by colouring in contours, and there are diagrammatic cross-sections illustrating the configuration of the plateaux and the Jordan valley depression. Inset Maps show the Environs of Jerusalem and the Vegetation of Palestine. All the names on the Map, numbering about 3180, are contained in the accompanying Index. Each place is indexed under its modern as well as ancient name, and cross-references are given.

Besides meeting the special requirements of the student and the teacher, the Map will be found invaluable as a Touring Map for Travellers in Palestine. It shows all modern roads, railways, and places of interest.

'The most welcome gift of the season. We are greatly struck with its beauty of workmanship. That it will supersede all maps in existence there can be no doubt. We expect to see it soon in all our church halls, and it will find its way into the knapsack of the traveller. It will also take its place as a very suitable companion to the "Dictionary of the Bible," edited by Dr. Hastings, the ordinary case-form being folded in the same size as the "Dictionary" and bound to match.'—*Expository Times*.

LONDON: SIMPKIN, MARSHALL, HAMILTON, KENT, & CO. LIMITED.

T. & T. CLARK'S PUBLICATIONS.

A GREAT ENCYCLOPÆDIA.

VOLUME ONE

NOW READY

ENCYCLOPÆDIA
OF
RELIGION AND ETHICS

EDITED BY

DR. JAMES HASTINGS.

THE purpose of this Encyclopædia is to give a complete account of Religion and Ethics so far as they are known. It will contain articles on every separate religious belief and practice, and on every ethical or philosophical idea and custom. Persons and places that have contributed to the History of religion and morals will also be described.

The Encyclopædia will cover a distinct department of knowledge. It is the department which has always exercised the greatest influence over men's lives, and its interest at least, if not its influence, is probably greater at the present time than ever. Within the scope of 'Religion and Ethics' come all the questions that are most keenly debated in PSYCHOLOGY and in SOCIALISM, while the title will be used to embrace the whole of THEOLOGY and PHILOSOPHY. Ethics and Morality will be handled as thoroughly as religion.

It is estimated that the work will be completed in Ten Volumes of about 900 pages each, size 11½ by 9.

PRICE—

In Cloth Binding . . . 28s. net per volume.
In Half-Morocco . . . 34s. net per volume.

OR, EACH VOLUME MAY BE HAD IN 12 MONTHLY PARTS,
PRICE 2s. 6d. NET PER PART.

Publishers, on request.*

'It is a work that for scholarship and all-round reliability will take its place among standard works of the kind—because it deserves to.'—*Daily Chronicle*.

'A very warm tribute is due to the eminent publishers, Messrs. T. & T. Clark. They have done their part to admiration. No handier or more handsome encyclopædia exists. It is well printed, well bound, and very light in the hand. Those who know the immense risk and pains involved in a work of this kind will know how to estimate the services of Messrs. Clark in what is, we think, the boldest and most enterprising venture in religious literature which has ever been undertaken in this country. We wish them all the success they deserve, and that success should be very great. The services of Dr. Hastings and his loyal colleague Dr. Selbie demand an acknowledgment not less ample. . . . The scope of this encyclopædia is immense, and as for the quality of the articles, the list of the contributors proves that it is in general very high.

'It will be one of the most reassuring and encouraging signs of the times if this great and magnificent enterprise receives adequate encouragement and recognition.'—*British Weekly*.

'No library could be better provided with what men have said and thought through the ages on Religion and Ethics and all they imply than by this one library in itself. . . . Some of the articles themselves summarise a whole literature.'—*Public Opinion*.
